New lane configurations on I-290 over Salt Creek

CHICAGO – The Illinois Department of Transportation announced that the ongoing bridge replacement of Interstate 290 over Salt Creek just east of Addison Road will require new lane configurations starting, weather permitting, April 22.

All traffic will be shifted to the westbound bridge. Once the eastbound bridge is complete by August, construction begins on the westbound bridge. At that time, eastbound traffic will be shifted back to the eastbound bridge while westbound traffic will be placed on temporary westbound pavement, separated by barrier walls from the construction zone.

The work is expected to be complete by October.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.
