New lane configurations on I-290 over Salt Creek

CHICAGO – The Illinois Department of Transportation announced today that as part of ongoing efforts to rebuild the Interstate 290 bridge over Salt Creek, in Addison, new lane configurations will begin, weather permitting, the week of July 27.

With the upcoming completion of the westbound bridge, westbound I-290 traffic will be shifted back to the westbound structure.

Crews will continue to remove the temporary pavement. During that time, traffic will not be impacted, and all lanes are open. The overall project is expected to be completed in November, with landscaping in spring 2021.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.
