Create a report

Create detailed reports using Replica data in just a few clicks. There are now nine types of reports with more launching soon. Select a report type below, then choose the area, or tansit route you're interested in to get started.

Resident report

View all movement patterns and associated information for the residents of a selected area

Worker report

View information about the workers of a selected area

Transit report

View all movement patterns and associated information for people using a selected transit route

Destination report

View all movement patterns and associated information for trips that ended in a selected area

Shared origin/ destination report

View all movement patterns and associated information for trips that both started and ended in a selected area

Car-free residents report

View all movement patterns and associated information for residents without a car at home in a selected area

Lower income residents report

View all movement patterns and associated information for residents with a household income of $25k or under in a selected area

Minority residents report

View all movement patterns and associated information for residents whose race and ethnicity was other than white non-hispanic

Seasonal comparison report

See how movement patterns for a particular place change from season to season

IDOT PARTNERSHIP

Together, we are building a state-wide model.

A fully integrated and shared platform with access for everyone.

Insight into macro and regional movements.

Support for ALL modes: Auto, Transit, TNC, Pedestrian, Biking, Carpooling.

Also includes freight and visitors movements.

Replica

IDOT PARTNERSHIP

Here's how you can prepare your region for Replica.

What specific geography units are relevant to your region?

Document any major network impacts or transportation policy changes that have occurred within the past 12 months.

Start to assemble ground truth data.

Truck Parking Issues:

- Promote access to safe/convenient truck parking.

- Provide information on Parking Demand vs. Supply and real-time parking availability to drivers.

- Improve Security/Safety for Rest Area Patrons.

- Reduce need for truckers to park illegally or unsafely on the shoulders of highways, on off-ramps or at abandoned facilities.

- Provide information to drivers to better plan their rest periods, to increase drivers' overall productivity and efficiency.

AMTRAK. WE'RE MAKING THE TRAINS WORTH TRAVELING AGAIN

(All we ask from you is a little patience)

Amtrak Passenger Representative with a model of a modern Amtrak passenger car now in service

What is Amtrak? We're America's first nationwide passenger rail system.

When President Nixon signed the Rail Passenger Service Act, it gave us the responsibility for managing the country's intercity rail network starting May 1, 1971.

That meant merging the services and solving the obstacles of what had been 22 different passenger railroads, each with its own built-in problems. While at the same time running 1300 trains a week over 20,000 miles of track to 340 cities in the U.S.A.

It may not be the country's biggest headache. But it's close. That's why when we took over we made only one simple promise. To make the trains worth traveling again. It's going to take time, and work. But we're going to do it. Just be patient, please.

You're going to ride the best 1200 cars in the country. You can't run a good railroad without good railroad cars. So our first order of business was to take stock of our rolling stock. We examined all 3000 passenger cars formerly in service. And we're keeping only the 1200 best, most of them stainless steel.

You talk—we listen. For the first time there are passenger representatives riding our trains just to get your ideas about rail service. You've already made it clear that you want your trains a lot cleaner than in the past. And they will be.

Eat a little better. Right now we're concerned with making sure that you get a real good dinner every time you enter our dining cars. And that even a snack in an Amtrak coach is always fresh and tasty.

We want to save you time, money and aggravation. Some of the most annoying problems of going by train take place before you even step aboard. And we know it. That's why we're putting such a high priority on faster and simpler reservation and ticketing procedures. We don't like red tape any better than you do.

People who care are caring about you. If you've been aboard an Amtrak train lately, perhaps you've noticed how attentive our personnel are. Nobody has a greater stake in the success of Amtrak than the people on our trains. After all, their future is riding on it.

All this, of course, is only a very small start on a very big job. But we are making progress—and we're proud of it. Come aboard an Amtrak train this fall and see for yourself.

We're making the trains worth traveling again.

A FLEET OF MODERNISM

LED BY A NEW AND FINER BROADWAY LIMITED

FIRST ALL-ROOM TRAIN IN HISTORY . . NEW FAST TIME

EIGHT premier Pennsylvania trains, four in each direction, now constitute *a Fleet of Modernism.* Designed by Pennsylvania Railroad and Pullman Company engineers in collaboration with Raymond Loewy, noted industrial designer, and led by a new, magnificent . . . *Broadway Limited!*

Staffed with valet, barber, manicurist, maid and train secretary, this leader now becomes an all-room Pullman train. A wider range of private accommodations than ever before. Master Rooms, Roomettes, Drawing Rooms, Compartments, Double Bedrooms —all equipped with real beds and individual toilet facilities. Privacy for every passenger! New-style diners, too—excitingly different. Faster schedule also—over the shortest route between east and west.

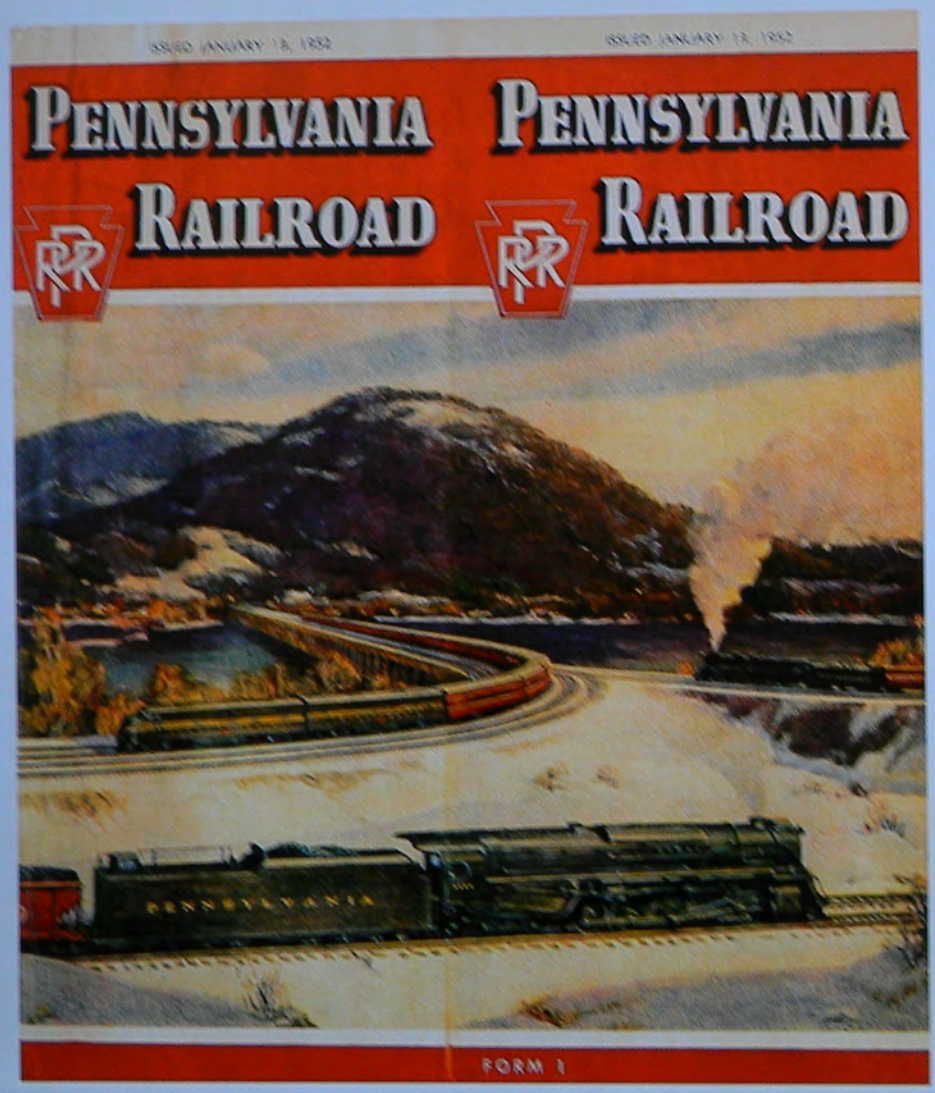
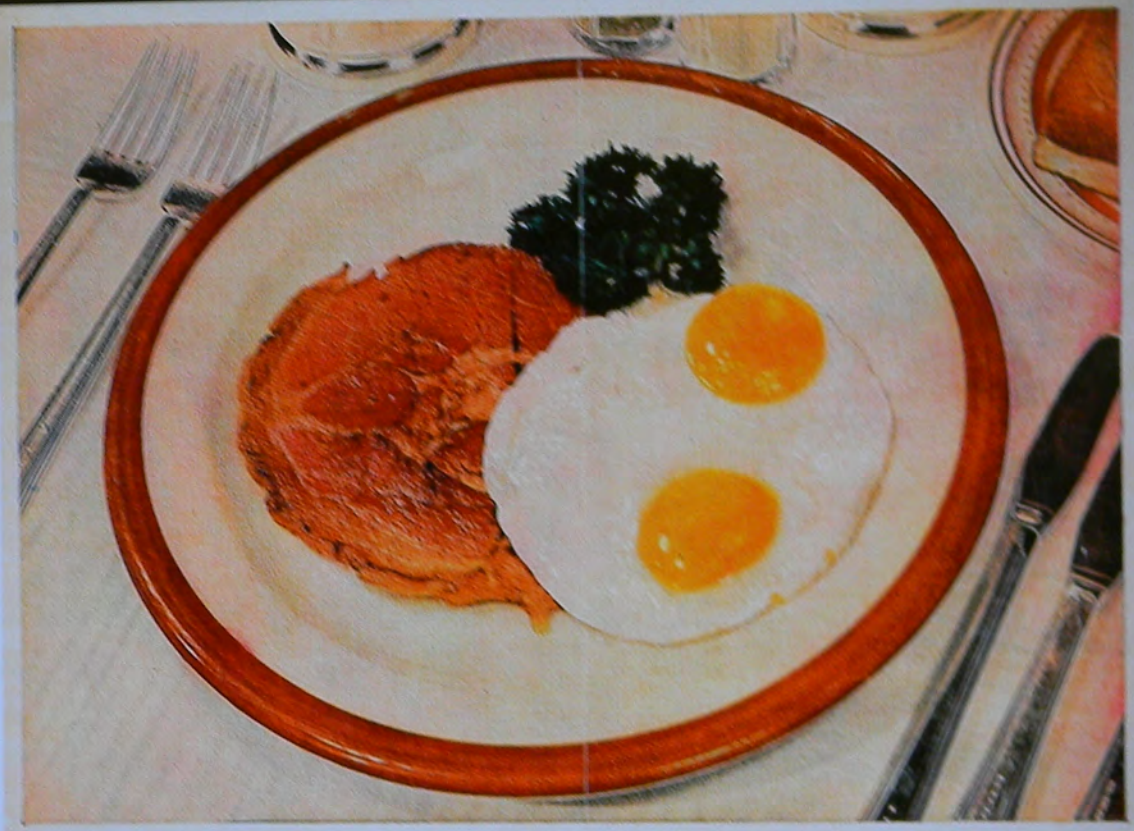
(DESCRIPTIONS OF OTHER TRAINS OF THE FLEET ON SUCCEEDING PAGES)

The Dining Car





An American Favorite

AS YOU LIKE IT!

Here's a breakfast prepared in a way that really says "good morning" on Pennsylvania Railroad dining cars! First, if you wish, a freshly-brewed pot of fragrant coffee; then tree-ripened fruits in season, orange juice, or a hot or cold cereal with cream. Next, tender sliced ham broiled to perfection over charcoal . . . served with farm-fresh eggs cooked to your order. Toast or hot breads and preserves . . . your favorite beverage . . . what a way to start the day!

UNITED SEAMEN'S SERVICE
564 Market Street
San Francisco

Why we are slowing down Train Schedules

—on our Overland Route, Shasta Route and San Joaquin Valley Line, effective February 15

If you have traveled on Southern Pacific in recent months, you know that many of our trains have been late. Very few of you have complained, and we deeply appreciate your patience and your understanding of our problems. But we know you have found these late arrivals unpleasant and inconvenient.

We have tried our best to maintain on-time performance according to our published time tables, but we are in the same position you would be in if you promised to arrive home for dinner at a certain time and were unavoidably delayed by traffic.

So many extra war trains—passenger and freight—are moving over our lines that we haven't been able to get all regular trains through on time.

A railroad line has limitations on its capacity the same as a highway. The more automobiles on a highway, the harder it is to "make time." In the same way the more trains on a piece of track, the more difficult it is to maintain fast schedules. The task is complicated further when many of the war freights and troop trains must move on emergency schedules to which our regular service must be adapted, sometimes on very short notice. The victory trains come first with us. We know that's the way you want it.

However, we know that you, as a passenger, would like to be fairly sure that your train will arrive at its scheduled time so you can make your plans accordingly.

So, in order to give you more dependability, as well as to reduce the operating difficulties that late trains create, we have lengthened the schedules of nearly all important trains over our lines. This gives these trains more time to make their runs and a better opportunity to reach destinations on time.

The changes on February 15 affect a total of 40 important trains on the Shasta Route, Overland Route, San Joaquin Valley Line and between San Francisco and Sacramento. (Schedules on our Sunset Route, Golden State Route, Coast line and the San Francisco Peninsula were slowed down earlier.)

We know these new schedules will not solve all problems. There will still be some delays and there will still be crowded trains. But we want you to know that we'll do everything we can to keep on schedule.

NEW SCHEDULES ARE SHOWN IN THIS FOLDER

A-520 (2-4-43) 11M—Standard Folder—Form A—February 15, 1943—Subject to change without notice—Printed in U. S. A.

SOLDIERS ON THE WINTER FRONT

A million veterans on the home front are in action in the war against winter.

It's a war being fought by railroad men to keep the greatest traffic load in history rolling every minute of the day and night.

It means miles of snowsheds built through the mountains.

It means miles of detector fences to warn of snowslides.

It means mighty locomotives pulling behind great rotaries, or shoving steel-winged plows to fling drifts aside.

It means men braving the blizzard's bite to keep clear the thousands of switches—repair crews standing ready to meet the threat of flood-swollen streams.

All this is an old story to railroad men—but it's a story that takes on new drama today.

For America depends on its railroads as never before, to keep its war factories humming, its armies fed and equipped around the world—at the same time that 130 million Americans at home are supplied with the food and fuel they must have.

Railroad men know the size of the job that rests on their shoulders. It's a job twice as big as it was before the world went to war.

And they'll give it the best they've got, so long as they have an engine that will pull, a car that will roll, and a track to follow.

  Explore Chicago Collections lets researchers, teachers and students search

Digital and Archival Collections

Archival Collections | Digital Collections

- David Toms Collection
  The David Toms Collection consists of 1,059 transportation-related items from 123 airlines and cruise lines. The collection primarily consists of airline menus and safety cards, with a strong secondary component of airline-related ephemera and cruise ship menus. Items in the collection are in 27 languages; most items are in two or more languages. Materials in the collection range from the 1950s to the early 2000s.
- David V. Woolf Bus and Train Collection
  The David V. Woolf Bus and Train Collection consists of 154 transportation-related postcards primarily related to buses and bus lines. The collection ranges in publication date from the 1950s to the early 200s. Text on the postcards is primarily in English; Dutch, French, and German are also represented. The collection measures .5 linear feet in one box.
- Early Automobile Ephemera Collection
  The Early Automobile Companies Ephemera Collection consists of brochures, advertisements for automobile parts and service products, maps and travel guides published between 1910 and 1932
