TYPICAL APPLICATIONS

Bridge construction
Culvert construction

SYMBOLS

- Work area
- Signs
- Barricade or drum with steady burn bi-directional light
- Double vertical panel
- Type III barricade

GENERAL NOTES

This Standard is used where at any time, any vehicle, equipment, workers or their activities require the closure of both lanes and a temporary run-around is constructed.

Barricades or drums at 30' (15 m) centers shall be used in lieu of vertical panels on the detour where they are to be placed on new or existing pavement.

Where the tangent distance on the temporary run-around extends 600' (180 m), crystal delineators at 30' (15 m) centers may be substituted for the vertical panels, or the spacing between vertical panels may be increased to 100' (30 m) within the limits of the tangent.

All dimensions are in inches (millimeters) unless otherwise shown.

LANE CLOSURE, 2L, 2W, WITH RUN-AROUND, FOR SPEEDS ≥ 45 MPH

DATE | REVISIONS
--- | ---
1-1-16 | Changed signs on drums to bi-directional
1-1-11 | Changed vertical panel to double vertical panel
