### SYMBOLS

- **Arrow boxes**: Work area
- **Worker**: Worker
- **Sign**: Direction indicator barricade with steady burn monodirectional light
- **Type II barricade, drum, or vertical barricade with steady burn monodirectional light**: Sign
- **Spotter**: Spotters
- **Type II barricade, drum, or vertical barricade**: Type II barricade, drum, or vertical barricade

### GENERAL NOTES

This Standard is used where at any time any vehicle, equipment, workers, or their activities will encroach on two lanes of a freeway/expressway.

This Standard must always be used in combination with Standard 701400.

This Standard also applies when work is being performed in the left lanes. Under these conditions, the set up would be a mirror image to what is shown.

Check barricades shall be placed in the middle of the closed lanes at 1000' (300 m) centers. All dimensions are in inches (millimeters) unless otherwise shown.

### Table: Two Lane Closure, Freeway/Expressway

<table>
<thead>
<tr>
<th>Duration of Closure</th>
<th>Length of Tangent Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 14 Days</td>
<td>1000' (300 m)</td>
</tr>
<tr>
<td>≥ 14 Days</td>
<td>2000' (600 m)</td>
</tr>
</tbody>
</table>
