

Plan Sheet Organization

To provide consistency from project to project, the plan sheets should typically be assembled in the recommended sequence below. The designer should note that not all plans will have all sheets and that several sheets can be combined together. The recommended plan sequence is as follows:

1. Cover Sheet;
2. Index of Sheets, Listing of applicable Highway Standards, General Notes, Commitments;
3. Summary of Quantities;
4. Typical Sections;
5. Schedules of Quantities;
6. Alignment, Ties, and Benchmarks;
7. Plan and Profile Sheets;
8. Suggested Stages of Construction and Traffic Control;
9. Erosion and Sediment Control Details;
10. Drainage and Utilities Sheets;
11. Right-of-Way Sheets;
12. Intersection Details;
13. Pavement Marking Details;
14. Landscaping Details;
15. Traffic Signal Details;
16. Lighting Details;
17. Structural Sheets;
18. Wetland Details;
19. Culvert Details;
20. District Details/Standards;
21. Cross Sections; and
22. Statewide Highway Standards*

*For full-sized plans these will be added by Springfield.
