N.S. indicates legal dimension not specified.

**Notes:**

- \*1 65 feet overall length (bumper to bumper) and/or 55 feet from center of front axle to center of rear axle.
- \*2 Tandem is defined as any 2 or more single axles whose centers are more than 40 inches and not more than 96 inches apart, measured to the nearest inch between extreme axles.
- \*3 See tables II and III.
- \*4 Applies on semitrailers longer than 48 feet.
- \*5 55' on Local Roads and Streets, 65' from designated State Highway (5 mile access law).
- \*6 Gross weight is determined by measuring to the nearest foot between extreme axles. (See Table II)

**Exceptions to WIDTH requirements above:**

- Does not include certain safety devices approved by Department.
- Width restrictions do not apply to vehicles transporting implements of husbandry operating in the daytime. Loads of hay, straw or other similar farm products are limited to a maximum of 12 feet.
- A recreational vehicle may exceed 8' 6" if the excess width is attributable to appurtenances that extend 6" or less beyond either side of the vehicle body.

**Exceptions to LENGTH requirements above:**

- Length limits do not apply to vehicles operating in the daytime except on Saturdays, Sundays or legal holidays when transporting poles, pipes, machinery or other objects of a structural nature which cannot be readily disassembled, provided the length of the object being transported does not exceed 80 feet and the overall length of vehicle and load does not exceed 100 feet.
- Stinger-steered vehicles designed to transport motor vehicles or boats, may have an overall length of 80 feet plus overhang of 4 feet in front and 6 feet in the rear on Class I and II highways. The maximum overall length on all other streets and highways is 60 feet.
- Conventional transporters (vehicles designed to transport motor vehicles or boats), may have an overall length of 65 feet plus overhang of 3 feet in front and 4 feet in the rear on Class I and II highways. The maximum overall length on all other streets and highways is 60 feet.

**General exceptions to above Table:**

- All large vehicles operating on Class I highways shall have access for a distance of one mile on any street or highway to points of loading and unloading, and facilities for food, fuel, rest and repair provided there is no sign prohibiting that access.
- Large vehicles operating on designated state highways shall have access for a distance of 5 highway miles on any other state highway and on designated local streets and highways, to points of loading and unloading, and facilities for food, fuel, rest and repair provided there is no sign prohibiting that access. (This applies only on local streets and highways specifically designated and posted by local officials.)
- Permits may be issued for overdimensional objects and vehicles if they have been reasonably disassembled. Multiple objects loaded side-by-side, end-to-end, or on top of each other may not cause the overdimension.
- Streets or highways are designated by the Department of Transportation or local officials having jurisdiction.

on Special Haul Vehicles

- Notes:**
- 1 Measured to the nearest foot between the extremes of any group of two or more consecutive axles.
  - 2 Gross weights for 5 and 6 axles applicable only to a combination of vehicles.
  - 3 Two consecutive sets of tandems may carry 34,000 pounds each providing the overall distance between the first and last axles of such consecutive sets of tandems is 36 feet or more.
  - 4 If the distance between the centers of the first and third axles in a group of consecutive axles does not exceed 96 inches, the group is a tandem.
  - 5 Maximum single axle 20,000 pounds; maximum tandem 34,000 pounds.
  - 6 Combinations of vehicles designated as special haul vehicles which include a semitrailer manufactured prior to the model year 2014 and first registered in Illinois prior to January 1, 2015 having five axles with a distance of 42 feet or less between extreme axles may have a gross weight of 72,000 pounds provided the weight shall not exceed 20,000 pounds on a single axle or 34,000 pounds on a tandem. For such combinations manufactured subsequent to September 9, 1986, the minimum distance between the first and last axles of the two sets of tandems must be 18 feet 6 inches or more.
  - 7 Permits may be issued for an overweight load providing it consists of one object that cannot be reasonably dismantled or disassembled.
