☐ State Approved Categorical Exclusion (CE)

IDOT has addressed all environmental requirements for this project and determined that it has met the following requirements for a State Approved CE in the CE Programmatic Agreement (approved 10/14/15): (1) the scope is consistent with the project scope listed in Appendix ☐ A or ☐ B , item number _____ and (2) none of the circumstances in Section V exist. Therefore, on behalf of FHWA, IDOT hereby approves this project as a State Approved CE.

Approved by
Signature of Regional Engineer _____ Date _____

☒ Federal Approved Categorical Exclusion

After reviewing the project information provided, FHWA has determined that this project will not have any significant impacts on the human environment and approves its designation as a Federal Approved CE.

Approved by
Signature of FHWA Representative _____ Date 01/25/2017

Wetland Impacts Involved

☐ Yes ☒ No

The FHWA issued a programmatic Wetland Finding for CEs on October 14, 2015, in compliance with Executive Order 11990, Protection of Wetlands. The programmatic Wetland Finding is contained in the CE Agreements, available online in the BDE Manual Appendix A.

Cultural Clearance: March 12, 2014 Special Waste: October 2, 2014

NOISE ANALYSIS:
The Federal Highway Administration (FHWA) Traffic Noise Model (TNM) was used to model the existing condition, the build year (2015 - Build and No-Build scenerios) and the Design Year (2040 - Build and No-Build scenarios). The noise analysis for the receptor sites analyzed, has shown that the predicted noise levels will exceed the FHWA Noise Abatement Criteria (NAC). The predicted noise levels were analyzed using 58 receptor sites utilizing TNM are as follows:

Existing year, no-build scenerio: 49 dB to 76 dB
Design year (2024), no-build scenario: 51 dB to 78dB
Design year (2024), build scenario: 51 dB to 78 dB

Based on the modeled analysis, a traffic noise impact will occur and, therefore, based on feasibility and reasonableness criteria noise barriers are recommended north of the outlet mall in West Frankfort and at KOA Campground on the west side of I-57 near Petroff Rd.

AIR QUALITY ANALYSIS:
No portion of this project is within a designated nonattainment or maintenance area for any of the air pollutants for which the USEPA has established standards. Accordingly, a conformity determination under 40 CFR Part 93 ("Determining Conformity of Federal Actions to State or Federal Implementation Plans") is not required.

This project is of a type qualifying as a categorical exclusion (Federal Approved CE) under 23 CFR 771.117(c), or exempt under the Clean Air Act conformity rule under 40 CFR 93.126, and, as such, a Mobile Source Air Toxics analysis is not required.

In accordance with the IDOT-IEPA "Agreement on Microscale Air Quality Assessments for IDOT-Sponsored Transportation Projects," this project is exempt from a project-level carbon monoxide analysis because no intersections are being improved with the proposed project.

PERMIT STATUS (TOPIC 6-280), SECTION 404/401WQC, NPDES:

FAI-57 (I-57)
SECTION I-57 ADD LANE-2
WILLIAMSON and FRANKLIN COUNTIES

The above noted project was discussed at the July 24, 2013 coordination meeting. An attendance roster is attached.

The project consists of the addition of a third lane in the northbound and southbound direction of I-57 from Stiritz Road (MP 61) to the Franklin/Jefferson county line (MP80). The additional lanes will be added in the existing median with an open ditch median or concrete barrier median being used depending on the existing median width. Also, the superstructures for bridges within the project limits will be replaced and widened to accommodate the additional lanes. A request for approval to process the project as a CE II was tentatively approved pending the environmental findings.

During the project discussion it was brought up that the county line cannot be used a logical termini. Therefore the project limits will be extended to I-64.

Chris Fraley stated that a field safety review will be required since the project is full federal oversight. A field safety review will be scheduled as soon as possible.

Section I-57 Add Lane-2
Job No. P-99-005-13
Williamson, Franklin and Jefferson County

An Interstate Safety Review was conducted on September 24, 2013 for the above noted project. The following were in attendance: Joe Zdankiewicz, Chris Fraley, Lance Kidd, Charles Stein and Brandy Maes.

The proposed project includes adding a lane in both the northbound and southbound directions from ½ north of Stiritz Road to the tri-level structures south of Mount Vernon in Jefferson County. Median ditches will be graded and median drainage structures widened or a closed median with concrete barrier will be used. Existing structures will be widened.

The following safety issues regarding this project were discussed:

- Structures will need to be replaced to accomadate additional lane
- Outside concrete shoulder with aggregate wedge will need to be removed and replaced
- A new wearing surface should be considered for the completed rubblized lanes
- Gaps in concrete median should occur at current median crossovers and impact attenuators placed according to policy
- Foundations of all signs, control boxes and lights will need to be inspected to insure proper heights. Any deficient foundations shall be corrected or protected with guardrail.
- Research into a deceleration lane at all median crossovers was recommended

NO HISTORIC PROPERTIES AFFECTED

Ms. Anne Haaker
Deputy State Historic Preservation Officer
Illinois Historic Preservation Agency
Springfield, Illinois 62701

Dear Ms. Haaker:

Enclosed are copies of the Phase I Survey Report completed by Illinois State Archaeological Survey personnel concerning historical and archaeological resources potentially impacted by the above referenced project. Survey of the 120-acre project area resulted in the identification of no archaeological sites. No architectural resources eligible for National Register consideration were identified by IDOT's cultural resources staff.

This add-lanes project is confined to existing IDOT ROW. Remnants of four known archaeological sites (11FK11, 11FK13, 11JN37, and 11JN38), identified during the original I-57 survey in the early 1960s, could not be located within IDOT ROW. These site areas were likely removed during I-57 construction.

In accordance with the established procedure for coordination of proposed IDOT projects, we request the concurrence of the State Historic Preservation Officer in our determination that no historic properties subject to protection under Section 106 of the National Historic Preservation Act of 1966, as amended, will be affected by the proposed project.

Very truly yours,

Brad H. Koldehoff, RPA

Seq. #18286
Williamson, Franklin, Jefferson Counties

The proposed project involves adding lanes in the median of I-57 from Stiritz Road just north of Johnston City to the merge with I-64 just south of Mt. Vernon. The project length is 33 miles.

There will be no new land acquisition. There will be in-stream work. Tree removal is undetermined at this time. Land cover in the vicinity of the proposed improvement is mowed and maintained interstate right of way.

Review for Illinois Endangered Species Protection and Illinois Natural Areas Preservation – Part 1075

The Illinois Natural Heritage Database contains no record of State-listed threatened or endangered species, Illinois Natural Area Inventory sites, dedicated Illinois Nature Preserves, or registered Land and Water Reserves in the vicinity of the project location. **Therefore, consultation under Part 1075 is terminated.**

This review for compliance with 17 Ill. Adm. Code Part 1075 is valid for two years unless new information becomes available that was not previously considered; the proposed improvement is modified; or additional species, essential habitat, or Natural Areas are identified in the vicinity. If the proposed improvement has not been implemented within two years of the date of this memorandum, or any of the above listed conditions develop, a new review will be necessary.

Review for Illinois Interagency Wetland Policy Act – Part 1090

The National Wetlands Inventory does not show wetlands in the median of the interstate. **Therefore, the wetland review under Part 1090 is terminated.**

Review for Endangered Species Act - Section 7

See the attached US Fish and Wildlife Service list of endangered, threatened, proposed and candidate species and proposed and designated critical habitat that may be present within the counties in which the proposed project is located. We cross-referenced the preferred habitat of each listed species with our knowledge of the project area and determined that listed species and critical habitat are not present.

Should the proposed improvement be modified or new information indicate listed or proposed species may be affected, consultation or additional coordination should be initiated.
