CIRCULAR LETTER 2008-09

FY2010 TRUCK ACCESS ROUTE PROGRAM (TARP)

COUNTY ENGINEERS/SUPERINTENDENTS OF HIGHWAYS
METROPOLITAN PLANNING ORGANIZATIONS - DIRECTORS
MUNICIPAL ENGINEERS/DIRECTORS OF PUBLIC WORKS/MAYORS
CONSULTING ENGINEERS

The department has proposed the Truck Access Route Program (TARP) be funded in FY2010. If enabling legislation is passed and signed, we anticipate funding will be available for this program beginning in July 2009.

Each candidate project must have a completed application (attached). Applications should include information pertaining to prior commitments by the department; a description of industries or truck generators served; projected growth; and number of trucks using the route. Information pertaining to phase construction that completes a truck route or is part of a multi-stage construction should be provided.

Only sections of roadway determined to be eligible for upgrading to an 80,000 pound truck route will be funded from the program. Roadway sections that were previously upgraded with TARP funds are not eligible for funding from this program. The TARP is not intended for use in pavement preservation or maintenance projects. The program will provide \$30,000 per lane mile and \$15,000 per intersection up to one-half of the project construction cost, subject to a maximum of \$600,000 per project. TARP funds can be used for construction only.

Proposed projects should be submitted to your district office no later than **August 22, 2008**. Any questions regarding the funding for the Truck Access Route Program should be directed to Steve Dwyer at (217) 782-3401. Questions involving design issues should be addressed to the appropriate Project Development Engineer.

Sincerely,

A handwritten signature in black ink that reads "Charles J. Ingersoll".

Charles J. Ingersoll, P. E.
Engineer of Local Roads and Streets
