

FY 2021

Proposed Highway Improvement Program

Program Overview

Each year, the Illinois Department of Transportation (IDOT) develops the Annual Highway Improvement Program. This publication presents a detailed account of the Fiscal Year 2021 highway program element, originally presented in the Fiscal Year 2021-2026 Proposed Highway Improvement Program. It provides a current listing of the projects sorted by district and phase of work to assist stakeholders with planning activities.

Due to the unprecedented COVID-19 pandemic, the reduced consumption of motor fuel is expected to cause a decrease in motor fuel tax revenue that would be deposited into the state's Road and State Construction Fund. It is not yet known what the actual decrease will be. The department will continue to monitor the data and make any adjustments to the Annual Highway Improvement Program deemed necessary as actual revenue impacts become known. The department is committed to the projects identified in the FY 21-26 Proposed Highway Improvement Program and this Annual Highway Improvement Program, however – decreased revenues may lead to projects being accomplished later than anticipated.

As a result of the passage of the Rebuild Illinois capital program in June 2019, which generated new revenues and increased appropriations, the FY 2021 Annual Highway Improvement Program continues to remain significantly larger than previous years. The FY 2021 Annual Highway Improvement Program provides \$3.150 billion of the \$21.26 billion included for highways in the Fiscal Year 2021-2026 Proposed Highway Improvement Program. Also included are projects totaling \$310 million in appropriation from previous fiscal years that are scheduled to be implemented in FY 2021. As a result, the FY 2021 Highway Improvement Program totals \$3.460 billion. This allows the department to continue to move forward assertively towards meeting the Transportation Asset Management Plan (TAMP) goals and fixing our crumbling state's infrastructure.

A total of 1,056 miles of highways and 180 bridges will be improved or constructed through the FY 2021 Annual Highway Improvement Program. Safety and traffic improvements are scheduled at 97 locations. The FY 2021 Annual Highway Improvement Program includes \$2.194 billion for projects on the state highway system and \$1.266 billion for projects on the local system.

This year continues the implementation of the federally required TAMP. This means that states are required to consider the life cycle cost of roads and bridges. On August 29, 2019, the Federal Highway Administration determined that IDOT had developed and implemented a fully compliant TAMP. The projects in the FY 2021 State Program of the Annual Highway Improvement Program that improve the condition of pavements and bridges have been selected within the parameters of the TAMP.

Focusing on asset management has allowed IDOT to change from a “worst-first” philosophy to a proactive approach to preserving our assets. The traditional “worst-first” strategy meant that IDOT prioritized assets that had deteriorated past the point of preservation, needing more costly repairs or total replacement. Under asset management, the strategy is to develop and implement a data-driven decision process that supports the use of analysis tools and life cycle strategies to reduce the rate of system deterioration as cost effectively as possible.

The program priorities are to maintain and preserve our existing roads and bridges, or assets, with a special emphasis on the NHS and structurally deficient bridges on that system. There are more than 7,700 miles of roads and 4,822 bridges (totaling 73,998,819 square feet of deck area) on the NHS.¹ The department’s focus on the NHS is due in large part to new federal performance rules that require state departments of transportation to prioritize its condition. New federal performance measures were developed to “increase the accountability and transparency of the federal-aid highway program and provide for a framework to support improved investment decision making through a focus on performance outcomes for key national transportation goals.”²

The additional funding through the Rebuild Illinois capital program, along with the implementation of Transportation Asset Management philosophy, will help to make significant progress in addressing our road and bridge needs in Illinois. However, the state’s needs are so significant that even with the additional funding, not all roads and bridges will be able to be addressed in the next six to 10 years.

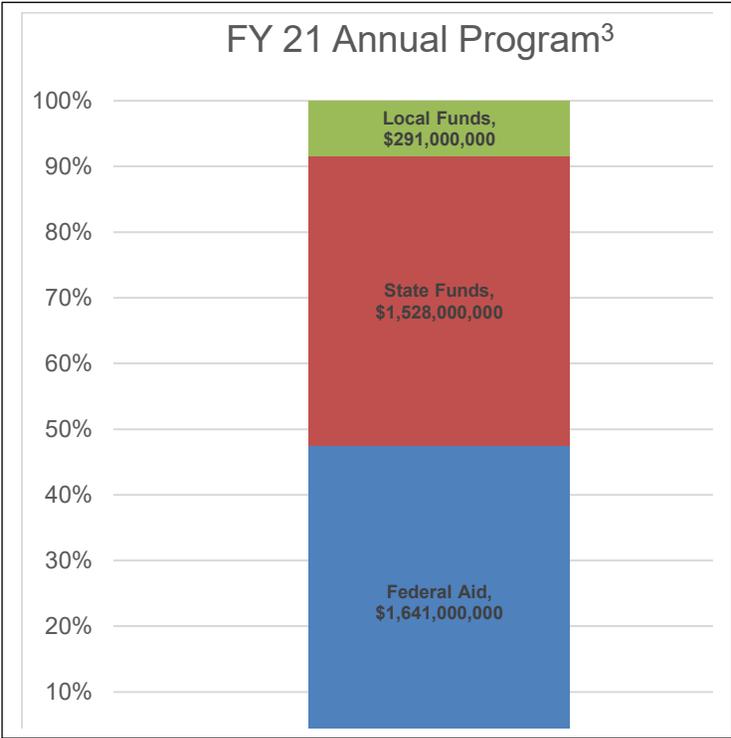

The size of the program is much more significant than previous investments, and the additional funding is being provided by a combination of both bond funds and an increase in motor fuel taxes of \$.19 per gallon, diesel differential increasing \$.05 per gallon, and motor vehicle registrations increased \$50 or \$100 depending on class. Also, beginning July 2021, a 5-year phase-in of the state portion of the sales tax on motor fuels will be deposited to the Road Fund instead of the General Fund.

Asset management is a strategic and systematic process of operating, maintaining, and improving physical assets, with a focus on engineering and economic analysis based upon quality information, to identify a structured sequence of maintenance, preservation, repair, rehabilitation, and replacement actions that will achieve and sustain a desired state of good repair over the life cycle of the assets at minimum practicable cost. (23 U.S.C. 101(a)(2), MAP-21 § 1103)

¹ National Highway System Illinois Highway Statistics Sheet 2019

² <https://www.fhwa.dot.gov/tpm/rule.cfm>

The chart below displays the funding sources for the Annual Highway Improvement Program.

³ There are projects totaling \$310 million included in the published FY 2021 program utilizing reappropriations.

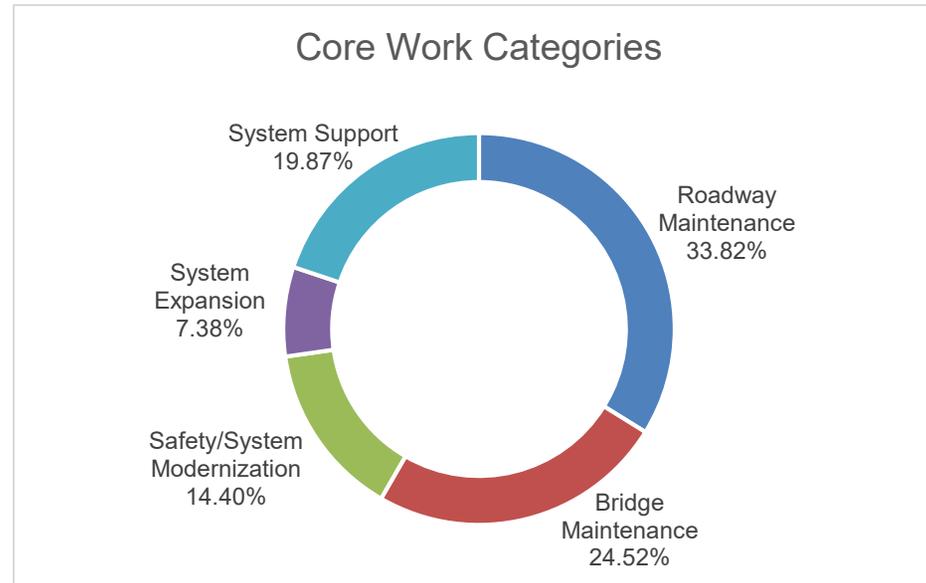

State Program

The FY 2021 state program included in the Annual Highway Improvement Program focuses on maintaining and preserving our existing roads and bridges, or assets, with a special emphasis on the NHS and structurally deficient bridges for a total cost of \$2.194 billion. This investment allows for 754 miles of roads to be improved or added to the existing highway system, along with 1,023,639 square feet of deck area improvements (66 bridges) and 60 intersection and spot improvements.

The department is working to more accurately relate cost associated with preservation and maintenance activities. Through this effort IDOT has the ability to evaluate potential investment strategies and determine how best we can reach the goals outlined in the TAMP. With the additional funding provided in Rebuild Illinois, it is anticipated that the pavement goals will be met or nearly met. However, the rate at which bridges are deteriorating will make it very difficult to meet the bridge targets, even with the additional investment provided by Rebuild Illinois. All pavement and bridge projects included in the state program have been evaluated to ensure they are programmed for the right treatment at the right time, consistent with the life-cycle planning as described in the TAMP.

Core Work Categories

The implementation of asset management has necessitated several changes to the FY 2021 state program, as federal asset management rules require that IDOT show a commitment to preserving and maintaining the existing system. The department's focus has been modified to concentrate on five core areas in categorizing projects: road maintenance, bridges, safety/system modernization, system expansion and a system support category which includes assets and activities supporting the transportation network. Much of the funding in the FY 2021 state program will be used to maintain and preserve the state's existing system of roads and bridges as shown in the chart on the following page.

The types of work included in the core areas are:

- **Roadway Maintenance** includes reconstruction, resurfacing, widening and pavement preservation projects.
- **Bridges** consists of bridge replacement and rehabilitation, minor structure repairs and preservation projects. Bridge information will be discussed in terms of square feet of deck area instead of number of bridges.
- **Safety/System Modernization** consists of projects such as interchange reconstruction, interstate safety projects, and traffic and safety improvements.
- **System Expansion** includes major projects, such as new bridges on new alignment, bridge replacements that increase capacity, additional lanes, new interchanges, and strategic regional arterials.
- **System Support** consists of rest area and weigh station maintenance, miscellaneous districtwide projects, contract maintenance, statewide engineering or other statewide items, such as pavement markings, guardrail delineation, sign truss work and median barriers.

The table below lists the miles of roads and square feet of bridges programmed in the FY 2021 state program for the NHS and non-NHS system.

Table 2. Total Miles and Square Feet of Bridges in the FY 2021 State Program

FY 2021 Core Work Categories Programmed Improvements

Roadway Maintenance

New Bridges (Sq. Ft.)	1,883

Preservation

Accomplished (miles)	193
----------------------	-----

The following notable NHS system projects are included in the Annual Highway Improvement Program:

- Phase II Engineering on Interstate 80 at Des Plaines River Bridge and Chicago Street and Center Street Interchanges in Joliet, New Lenox and Minooka at a cost of \$13.450 million;
- Bridge demolition and removal, bridge replacement, lighting, and construction engineering on Interstate 74 over the Mississippi River in Moline at a cost of \$29.086 million;
- Phase I Engineering on Interstate 80 over the Mississippi River and Illinois 84 in Rock Island at a cost of \$17.0 million;
- Bridge deck overlay, bridge joint replacement and repair, bridge repair, standard overlay, resurfacing, and culvert repair on Interstate 57, 0.7 miles north of the Iroquois County line to 0.8 miles north of the Kankakee River bridges in Chebanse and Kankakee at a cost of \$21.0 million;
- Designed overlay, widening existing pavement and new shoulders on U.S. 67 at Illinois 135 and Alexis Road to 270th Avenue and County Highway 3 in Warren and Mercer Counties at a cost of \$16.50 million;
- Interchange reconstruction, new bridge, culvert replacement, new culvert, and bridge replacement on Interstates 57 and 74 at the Interstate 74 Interchange in Champaign at a cost of \$121.0 million;
- Bridge superstructure and median crossover on Interstate 74 over Salt Fork Vermilion River west of Danville in Vermilion County at a cost of \$17.750 million;
- Resurfacing, standard overlay and shoulder reconstruction on Interstate 72 east of U.S. 54/Illinois 107 Interchange to 0.6 miles east of 290th Avenue Overhead in Pike County at a cost of \$21.90 million;
- Rubblization and ramp repair on Interstate 72, 4.4 miles west to 0.3 miles west of the Piatt County line in Macon County at a cost of \$26.650 million;
- Interchange reconstruction on Interstate 270 at Illinois 111 Interchange in Pontoon Beach at a cost of \$17.0 million funded through the Illinois Competitive Freight Program;
- New construction, grading, paving, drainage, signing and lighting on U.S. 67 at the Delhi Bypass in Jersey County at a cost of \$25.50 million;
- Standard overlay and resurfacing on Interstate 24 at the Johnson County line to the Ohio River in Metropolis at a cost of \$18.890 million.

Of the 34 NHS bridges programmed, 25 are structurally deficient. Following are a few of the significant NHS bridge projects included in the Annual Highway Improvement Program:

- Bridge replacement on Interstate 55 at Lemont Road in Woodridge at a cost of \$11.0 million;
- New bridge deck on Interstate 280 at the Mississippi River southwest of Rock Island at a cost of \$34.0 million;
- Bridge replacement on Interstate 57 over Norfolk & Southern Railroad and Grinnell Road north of Illinois 17 in Kankakee at a cost of \$13.0 million;

- Bridge replacement on Illinois 116 over the Burlington Northern Santa Fe Railroad, the Union Pacific Railroad and Kickapoo Creek 0.1 miles east of Airport Road in Bellevue at a cost of \$25.0 million;
- New bridge deck, bridge repair on Interstates 55 and 64 at Poplar Street Collector-Distributor 0.2 miles east of Poplar Street Bridge in East St. Louis at a cost of \$25.0 million;
- Bridge replacement on Interstate 57, 0.2 miles north of the Dix interchange in Jefferson County at a cost of \$6.5 million.

Local Program

The FY 2021 Highway Improvement Program includes improvements on local streets and highways using federal funds. A portion of the federal funding is allocated based on population to local agencies throughout the state. The local program included in the FY 2021 Highway Improvement Program provides \$1.266 billion to fund improvements on 303 miles of road and 507,264 square feet of deck area (114 bridges), along with 37 traffic and safety improvements. In addition, \$7 million is included in the program to help local governments upgrade designated truck routes.

Under the current asset management requirements, IDOT is required to report on the condition of the total NHS, regardless of who maintains it. Of the 303 miles of road and 114 bridges programmed, four miles and two bridges are located on the locally owned NHS. The two bridges total 24,564 square feet and are structurally deficient. IDOT will work with its local agency partners to develop a plan to address the maintenance of the locally maintained miles and square feet of bridge deck area to determine how their plans impact IDOT's ability to meet its goals.

The FY 2021 Highway Improvement Program also provides \$75.1 million in state funds to assist local governments that are not listed in this document. These funds are allocated directly to local governments by formula. The breakdown is as follows:

- \$16.8 million for needy townships
- \$6.7 million for high-growth cities
- \$36.6 million to counties less than one million in population
- \$15 million for the local township bridge program

Approximately \$980.9 million of state motor fuel tax funds will be directly distributed to municipalities, counties and townships for administration and the repair of local roads and bridges during FY 2021. This distribution is in addition to the state's \$3.460 billion FY 2021 Annual Highway Improvement Program.

GUIDE TO THE LISTING

The projects included in the FY 2021 Annual Highway Improvement Program are grouped by state highway district. Within each district, projects are listed under six headings:

- State Construction
- State Engineering
- State Land Acquisition
- Local Construction
- Local Engineering
- Local Land Acquisition

Individual projects are listed within these six headings in descending route marking order, i.e., Interstate, U.S., Illinois and other. Each project's funding type is identified by eligibility with symbols. The symbols and their funding categories are shown in Table 3. Projects in some categories, such as railroad-highway grade crossing safety and some statewide and districtwide items, will be identified and selected during the fiscal year. A glossary with abbreviations is listed in Table 4.
