for preventive maintenance and receive $318 million in statutory RTA funds set by formula, which include Sales Tax and PTF receipts. These combined Federal and RTA statutory funds total $378 million; exceeding the operating deficit of $337 million by $41 million. From this remaining balance $10 million will be transferred to the capital program for Metra's capital farebox initiative with the remaining balance of funds, $31 million, available to pay for ongoing operating expenditures or continuing capital project commitments as cash balances have been dawn down extensively due to the economic downturn over the past three years, and current delays in receiving State funds.

Pace Suburban Service

Pace's funding to cover its suburban service operating deficit in 2011 is budgeted at $134 million. Pace will receive statutory funds totaling nearly $129 million including $103 million from sales tax and PTF, and $26 million for Suburban Community and South Suburban Community Job Access initiatives. The remaining $5 million will be sourced by federal funds for preventive maintenance, CMAQ, and JARC initiatives totaling $4 million, and $1 million provided from Pace funds and RTA discretionary funds.

Pace ADA Paratransit Service

Funding for ADA Paratransit service in 2011 is budgeted at $111 million. RTA Part II sales tax and PTF funds are statutorily provided by 2008 legislation, and increase or decrease each year, from the base level of $100 million set by statute in 2008, by the percentage change in sales tax revenue. The economic decline, since the base was established, has reduced statutory funding with the amount provided in 2011 reaching just $93 million. The remaining funding need totaling $18 million will be split between funds drawn from the State based on a Memorandum of Understanding between the Illinois Department of Transportation, the RTA, and each Service Board, and actions taken by Pace, which conditions may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds including estimated 2011 ICE funds totaling $9 million.

Innovation, Coordination and Enhancement (ICE) Funding

The Innovation, Coordination, and Enhancement (ICE) program, established as part of the 2008 Mass Transit Reform Legislation, offers operating and/or capital funding for projects that provide cost-effective ways to enhance the coordination and integration of public transportation, and develop and implement innovations to improve the quality and delivery of public transportation. However in 2011, given the adverse economic conditions in recent years, and the shortfall in ADA Paratransit funding, an emergency was declared with respect to 2011 ICE funds, and such funds have been reserved for potential allocation to Pace for use in 2011 ADA Paratransit operations, subject to the conditions identified above for Pace's ADA Paratransit service.

Reduced Fare/Free Ride Programs and Sales Tax Interest

State reduced fare and free ride reimbursements are received as revenue by the RTA, as previously described, and flow directly to the Service Boards to help defray program costs. The 2011 projected reimbursement level of $34 million remains unchanged from expected 2010 receipts.

There is a lag in time between when the State collects RTA sales tax and when it distributes the funds to the RTA. The RTA receives interest on this sales tax, and then disburses earnings on Part I sales tax to the Service Boards using the same formula as the Part I sales tax distribution formula. Payments in 2010 and 2011 are budgeted above $1 million.

Agency Administration, Regional Services & Programs

Agency administration represents on-going RTA functions to execute its funding and financial

oversight responsibilities. Budgeted 2011 administrative expenses totaling $8 million are significantly below the 2011 statutory cap of almost $18 million permitted by the RTA Act.

The RTA coordinates and funds several region-wide initiatives that bring together public transportation services. These programs include system maps, local advertising, the transit benefit program, the Travel Information Center (TIC), ADA certification, Reduced Fare, and the Customer Service Center. In addition, the RTA supports continued demands for technical assistance initiatives and coordination programs that encourage transit oriented improvements in the region. Programs supported include various community planning and sub-regional programs. The budget for these 2011 initiatives totals $24 million.

Debt Service and Capital Expenditures

Total expenditures in this category are projected to decrease from $253 million in 2010 to $238 million in 2011, a decrease of 6%. This change basically reflects the decrease of statutory funds Metra has available for capital expenditure, and the RTA's transfer of funds for CTA operations instead of funding for capital investment as outlined earlier in the CTA discussion.

Principal and Interest

Principal and interest (debt service) expenditures in the 2011 budget total $226 million. Payments cover the debt incurred on bonds (authorized by the state), which help pay for Service Board capital projects, and pay for the occasional issuance of working cash notes to cover extended accounts receivable cycles from the State. The State's financial assistance for SCIP bond programs in 2011 covers roughly 54% of the RTA's debt service costs with the remaining balance paid from RTA funds.

Regional Technology and Agency Capital

The 2011 budget continues the RTA's commitment to fund region-wide capital and/or technology driven initiatives and Agency programs. The 2011 Agency budget of $2 million includes the start of a virtual and disaster recovery project (Cloud), some necessary hardware (switch replacements), business intelligent (BI) solutions and reporting tools for the new integrated management system, and various technology planning programs, such as regional travel information (goroo), bus arrival information project, and the green transit plan.

Transfer Capital

Since 1995, the RTA has transferred a portion of its discretionary funds, available for region-wide capital or operating initiatives, to the CTA for capital investment. Funding in recent years has been over $20 million; the same amount of funding provided in 2010. However, in 2011 the State of Illinois (per MOU), will make available funding for debt service on bonds issued by the RTA, which provide approximately $83 million in capital funding to the CTA for the year. Also, in 2011 the RTA increased its discretionary funds for CTA operations by $10 million; resulting in an overall funding assistance to the CTA totaling $20 million.

Additionally, the statutory apportionment of sales tax to a Service Board can exceed its operating needs. When this occurs, the Service Board retains the funds for their capital program. Over the years Metra has been the only Service Board that has been able to retain such funds for capital investment. However, Metra's budget for 2011 does not call for such funds to be available for its 2011 capital program.

Fund Balance

In 1998, the RTA Board adopted an ordinance establishing a 5 percent minimum level in the unreserved and undesignated fund balance. If the amount is below 5 percent the financial plan

must show full replenishment by the end of the current three-year planning cycle. The percentage is based on total operating expenditures for the year (as shown on Exhibit 2-3). The purpose of the ordinance was to formalize a practice of maintaining a level of available financial resources for funding during unfavorable economic periods. The policy proved its value as sluggish economic conditions over the past several years' limited growth of sales tax receipts.

However, continued unfavorable economic conditions created the need to waive, the provision for the 2009-2011 planning period, and the continued uncertainty in the economic environment necessitated the continuance of this waiver during the 2010-2012 planning cycle. With the economy beginning to post recovery signs in 2010, the RTA Board reinstated the fund balance policy for the 2011-2013 financial planning periods; the fund balance in 2011 is projected to reach $13 million.

Beginning Balance

The beginning fund balance is the amount of funds in the undesignated and unreserved (General Fund) fund balance after the previous year's results have been audited and the accounting records are closed. All statements in this document reflect 2009 actual results for the 2010 beginning balance.

Change in Fund Balance

Total RTA revenues less total RTA expenses produce an annual change to the fund balance. When revenue exceeds expense, the remainder is added to the fund balance. If expenses exceed revenues, the fund balance is reduced by the deficit amount. Estimates indicate that revenues will exceed expenditures in 2011 by $13 million before using $5 million to fund the regions Joint Self Insurance Fund (JSIF).

Recovery Ratio

The RTA Act requires the RTA Board to set a recovery ratio for the next fiscal (calendar) year for each Service Board. The RTA Act further requires that the combined revenues from RTA operations cover at least 50% (apart from ADA Paratransit service) of the system operating cost. The RTA's system-generated revenue recovery ratio for 2011 is over 53%. A breakdown of this calculation is provided in the Region section.

In meeting the 50% recovery ratio, the RTA Act requires that the revenue figures include all receipts consistent with generally accepted accounting principles with certain specified exceptions. Therefore, the revenue figure used to determine whether the RTA system meets this 50% requirement includes not only all of the items contained in the recovery ratio for the Service Board budgets, but also the net gain on lease/leaseback transactions. The Act further requires a recovery ratio for ADA Paratransit service of 10%, the 2010 budget for this service meets this stipulation.

Statutory Compliance

The RTA Act requires that the CTA, Metra and Pace each have a balanced budget; the region's recovery ratio is at least 50% (apart from ADA Paratransit that requires a recovery ratio of 10%); and the RTA's (Agency's) administrative expenses do not exceed an established statutory cap (CAP). The CAP is approximately $18 million, and the Agency's administrative expenses of $8 million are well below the statutory amount. The Act also requires that prudent fiscal practice be followed such as proper cash management, use of reasonable assumptions, and sound accounting and financial practices. Each Service Board, the Agency and the region as a whole have budgets presented in this document that comply with these stipulations.

Source and Use of Funds

Each section of the 2011 Program and Budget Book presents the source of funds (public funding and/or operating revenues) and the use (expenditure) of funds for the respective operation.

Exhibit 2-8: **2011 Source and Use of Funds** (dollars in millions)

Source of Funds	**Total**
RTA Sales Tax	916
State Funds	457
Service Board Operations	926
Federal Capital Funds	217
Chicago RETT	24
Other	19
Total Source	**2,559**

Use of Funds	**Total**
Service Board Operations	2,276
RTA Agency	34
Debt Service	226
Capital	10
JSIF & Fund Balance	13
Total Use	**2,559**

Exhibit 2-9: **2011 Source of Funds - $2,559 million**

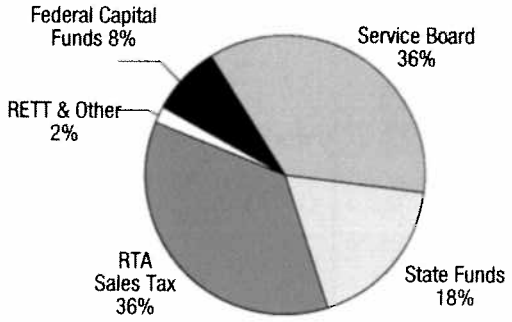

Exhibit 2-10: **2011 Use of Funds - $2,559 million**

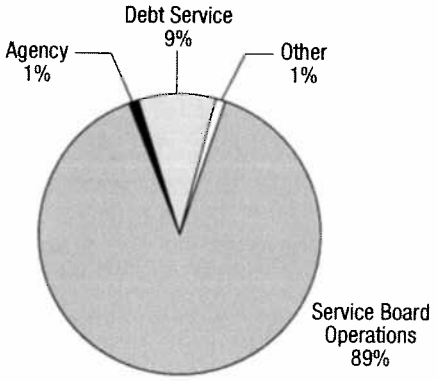

The subsequent paragraphs and exhibits (Exhibits 2-8 though 2-11) summarize the source and use of these funds for the 2011 budget.

In 2011, total revenue estimates of $2,559 million include: $916 million in receipts from RTA sales tax; State funding totaling $457 million, Service Board operating revenues of $926 million, the use for federal capital funds for preventive maintenance totaling $217 million, and Other totaling $43 million ($24 million from RETT, and RTA and miscellaneous revenue equaling $19 million).

The use of $2,559 million in funds includes $2,276 million for service operations including ADA Paratransit, 34 million for Agency operations and initiatives, $226 million for debt service; and $23 million for: capital programs ($10 million), JSIF funding ($5 million), and a remainder that increases the RTA fund balance by almost $8 million.

Capital Program

2011 capital program funds adopted by the RTA Board on December 16, 2010 total $859. Federal Grants are $443 million; less $251 million transferred for operating needs with $217 million used in 2011. State funds total $575, and RTA and Service Board funds (with program de-obligations) totaling $159 million. Also lowering the funds available for asset investment in 2011 (e.g. rolling stock, track and structure, facilities, other) are funds to pay the debt service on bonds issued for capital programs by the CTA, an amount for the year totaling of $67 million.

Capital funding for the 2011-2015 five-year program totals $4,355 million (Exhibit 2-12). The planned use of these funds includes $2,293 or 53 percent for rolling stock, $820 million and 19% for track and structure, $409 million for facilities and equipment equaling 9 percent, $385 for signals and communications or 9 percent, $247 million for stations and passenger facilities using 6 percent of the funds, and $201 million or 4 percent for Other (contingencies, administration and miscellaneous programs). Please reference the capital Section for program details and the capital program impact on region-wide operations.

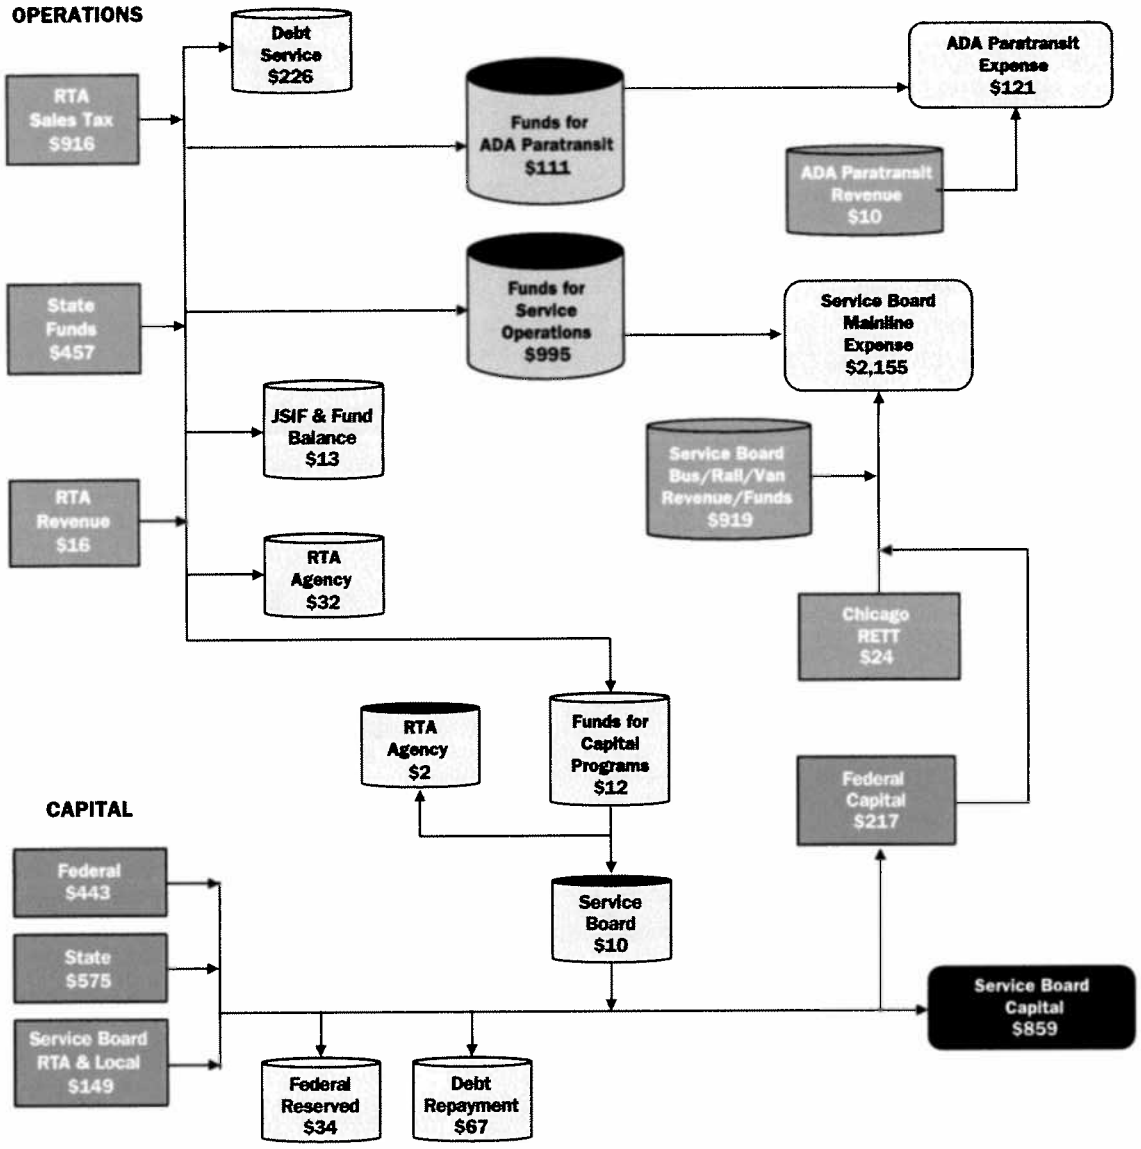

Exhibit 2-12: **2011-2015 Service Board Capital Program – $4,355 million**

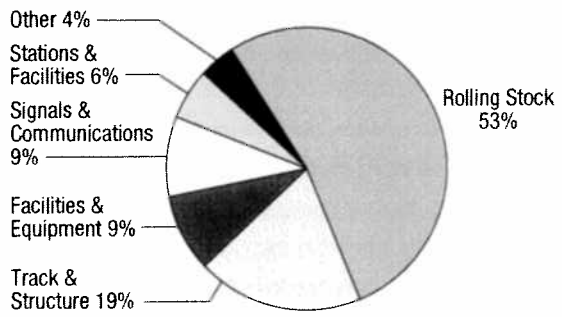

3 RTA

Region Operating Plan

Budget and Financial Plan

The RTA must prepare and publish a document every year that includes a one-year operating budget, a two-year financial plan, and a five-year capital program that meets specific statutory requirements. This document fulfills this responsibility. Exhibit 3-1 provides a summary of the RTA's statement of revenue and expenditures for 2009-2013. Throughout this document, 2009 is actual data, 2010 is an estimate of year-end results, 2011 is the operating budget, and 2012-2013 represent the two-year financial plan.

Revenue

Total operating revenue for the region is projected to decline $19.1 million or 1.4 percent from to $1,386.8 million in 2009 to $1,352.0 million in 2010. The State agreed in a Memo of Understanding to provide additional funding for ADA and Debt Service, a total amount of $13.6 million in 2010, $18.7 million in 2011, and $11.2 million in 2012 and 2013. However, from 2009 to 2010 sales tax, PTF, and State reimbursement for free and reduced fares are expected to decline by $3.8 million, $8.8 million, and $5.2 million, respectively. In 2013, total revenue is expected to reach $1,458.4 million, an increase of $103.2 million, a compound annual growth rate of 2.5% from 2010 (Exhibit 3-1).

The RTA Sales Tax (Part I and II) is the primary source of revenue totaling $894.2 million or 64.5 percent of total revenue in 2009. The Public Transportation Fund (PTF-Part I and PTF-Part II) totaling $282.5 million comprised 20.4 percent of total revenue. State Financial Assistance (ASA/AFA), State reimbursement for free and reduced fares, and other revenue provided the balance of RTA revenue totaling $210.1 million or 15.1 percent (Exhibit 3-2).

Sales Tax (Part I and Part II)

The RTA Sales Tax (Part I and II) is authorized by Illinois statute and imposed by the RTA in the six-county northeastern Illinois region. The RTA Sales Tax is collected by the Illinois Department of Revenue, paid to the Treasurer of the State of Illinois and held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are paid directly to the RTA monthly, without appropriation, by the State Treasury on the order of the State Comptroller.

Part I of the RTA sales tax (Sales Tax I) is the equivalent of 1 percent on sales in Cook County and 0.25 percent on sales in DuPage, Kane, Lake, McHenry and Will counties (the collar counties). Sales Tax I in Cook County is 1 percent on food and drugs and 0.75 percent on general merchandise, with the State of Illinois then providing a "replacement" amount to the RTA equivalent to 0.25 percent of general merchandise sales. The RTA retains 15 percent of sales tax I and distributes the remaining 85 percent to the Service Boards according to the formula specified in the RTA Act (Exhibit 3-3).

Public Act 95-0708 (P.A. 95-0708) enacted in January 2008 established RTA Sales Tax Part II (Sales Tax II). The legislation increased the RTA sales tax from 1 percent in Cook County to 1.25 percent and the sales tax in the collar counties from .25 percent to .75 percent. The collar county tax increase is divided evenly between the RTA and the county where the tax is collected. Thus, the rate of the sales tax that the RTA receives from the collar counties doubled (from 0.25 percent to 0.50 percent).

Total sales tax revenues are projected to decline from $894.2 million in 2009 to $890.5 million in 2010. In 2011, 2012, and 2013, total sales tax revenues are estimated to increase 2.9%, 2.9%, and 3.2%, respectively, reaching $972.9 million in 2013 (Exhibit 3-4).

Sales tax projections are made by examining economic trends at a national, state and regional level. From a geographic standpoint, the City of Chicago accounted for 29.6 percent of sales tax collected in 2009, suburban Cook 47.3 percent,

Exhibit 3-1: **RTA Statement of Revenue and Expenditures - General and Agency Funds** (dollars in thousands)

	2009 Actual	2010 Estimate	2011 Budget	2012 Plan	2013 Plan

(1) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT). (2) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT) and RTA discretionary funds available for region-wide capital or operating initiatives transferred to the CTA for preventive maintenance in the operating budget. (3) Includes Suburban Community Mobility Funds (SCMF) and South Suburban Job Access (SSJA) funds. (4) 2011 includes additional IDOT funding of $8.5 million per MOU. (5) Further actions are required to balance the ADA Paratransit budget, which may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues, including 2011 funds from the ICE Fund that may be allocated pursuant to Paragraph 8 of Ordinance 2010-92. (6) Funding from the State (IDOT) for Debt Service per MOU. (7) RTA funds to purchase excess liability and terrorism insurance to provide protection against catastrophic loss.

Exhibit 3-2: **2009 RTA Revenue** - $1,387 million

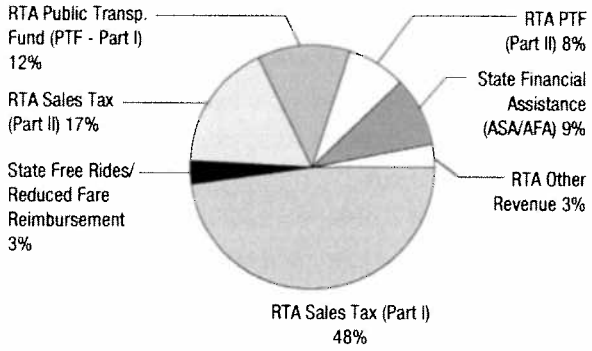

Exhibit 3-3: **Distribution of RTA Sales Tax (Part I)** (in percent)

	CTA	Metra	Pace	Total
Chicago	100	0	0	100
Suburban Cook	30	55	15	100
Collar Counties	0	70	30	100

Exhibit 3-4: **RTA Sales Tax** (dollars in millions)

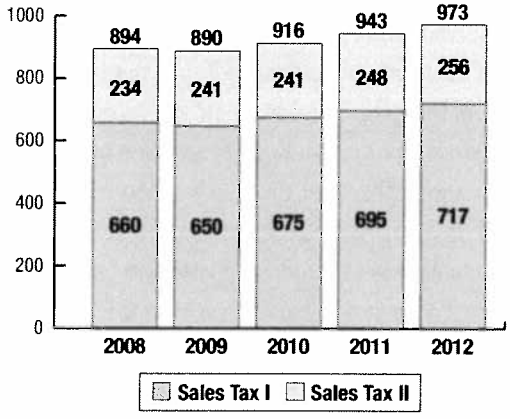

Exhibit 3-5: **2009 Part I Sales Tax by Sub-Region** - $894 million

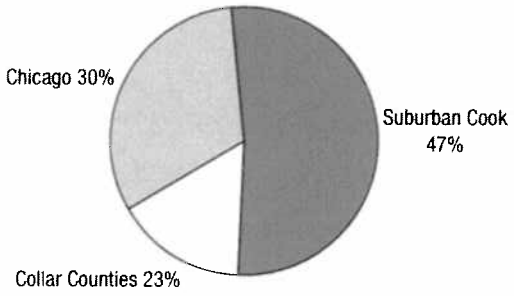


and the collar counties 23.1 percent (Exhibit 3-5). RTA Ordinance 2010-121 Schedule I-D (Introduction Section) illustrates the source and distribution of funds provided by the new legislation.

Exhibit 3-6 illustrates the distribution of 2009 RTA sales tax to the transit agencies. In 2009, the $894.2 million in sales tax was distributed as follows: the CTA 38.6 percent, Metra 31.5 percent, Pace Suburban Service 12.3 percent, Pace ADA Paratransit Service 7.3% and the RTA 10.2 percent.

Public Transportation Funds (PTF I and PTF II)

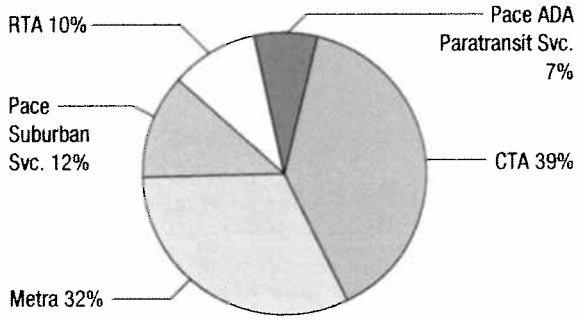
PTF revenues are paid to the RTA upon State appropriation. In accordance with the *RTA Act*, the State Treasurer is authorized and required to transfer from the State of Illinois' General Revenue Fund an amount equal to 30 percent of net revenue realized from the RTA sales tax and 30% of the net revenue realized by the RTA Real Estate transfer tax (RETT) in the City of Chicago. These receipts are projected to increase or decrease at a rate equal to growth or decline of the sales tax and RETT.

P.A. 95-0708 also increased the real estate transfer tax (RETT) in the City of Chicago by 0.3 percent, which yields $3 in public funding for the CTA for every $1,000 paid for the property. This funding flows directly from the City of Chicago to the CTA and is not included in the RTA schedule of revenues and expenditures (Exhibit 3-1). However, PTF funds associated with RETT (i.e. 30 percent of RETT) flow through the RTA and by statute become part of Service Board funding.

PTF I is the equivalent of 25% of Sales Tax I. The 2011 projected amount is $168.8 million (Exhibit 3-1). PTF I is allocated at the discretion of the RTA Board upon the review and approval of each Service Board's annual or revised budget.

PTF II is the equivalent of 5% of Sales Tax I, 30% of Sales Tax II and 30% of the RETT. The 2011 projected amount is $113.3 million (Exhibit 3-1). By statute, the CTA receives five sixths of the 30% PTF on the RETT. The remaining PTF II revenues are combined with Part II sales tax and designated for certain operations and programs before formula allocation to the Service Boards.

Exhibit 3-6: **RTA Sales Tax Distribution** - $894 million



Money set aside before allocations include funding for ADA Paratransit operations, Suburban Community Mobility (SCMF), and Innovation, Coordination and Enhancement (ICE) initiatives. As set by statute, funding for these three initiatives increases or decreases with the annual change in sales tax collections, with 2008 set as the base year. The 2011 appropriation for the ADA Paratransit Fund is $92.9 million, SCMF $18.6 million, and ICE $9.3 million. The remaining balance is allocated as follows: CTA 48 percent, Metra 39 percent and Pace suburban service 13 percent.

None of the PTF revenue is payable to the RTA until the Agency certifies to the Governor, State Comptroller and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the *RTA Act*.

State Financial Assistance (SFA)

This revenue source is a state-authorized assistance to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds. SFA has two components: ASA for SCIP I bonds and AFA for SCIP II bonds. Subject to the appropriation of funds by the State of Illinois, the RTA will continue to be eligible to receive State Financial Assistance (SFA) payments. The RTA received $123.0 million in 2009 and estimates that it will receive the same amount each year from 2010 to 2013.

State Free Rides/Reduced Fare Reimbursement

This operating assistance program is a partial reimbursement from the State of Illinois to the Service Boards for discounts mandated by law. This includes discounts to students, elderly, and disabled individuals.

The free ride/reduced fare funds are distributed by the State of Illinois through the RTA and then to the Service Boards. Funding received from that State in 2009 was $42.0 million and is estimated at $33.6 million annually from 2010 through 2013.

State Funding for ADA per MOU and State Funding for Debt Service per MOU

In November 2009, RTA, the Service Boards, and the Illinois Department of Transportation (IDOT) executed a Memorandum of Understanding (MOU) concerning CTA fares, Pace ADA paratransit fares, and funding for the CTA and ADA paratransit service. The MOU prescribed that the RTA issue general obligation bonds to provide approximately $83 million of capital funding to the CTA in both 2010 and 2011; that the RTA provide funding to the CTA in amounts equal to the debt service payable for these bonds in these two years; and that in future years the RTA provide funding to the CTA in amounts equal to the debt service payable for these bonds in those years provided sales tax and RETT funding to the CTA does not exceed then current projections by more than the debt service payable in that year. The MOU also prescribed that IDOT enter into a grant agreement with the RTA to fund Pace ADA Paratransit service in the amount of $8.5 million in State fiscal years 2010 and 2011.

Other Revenue

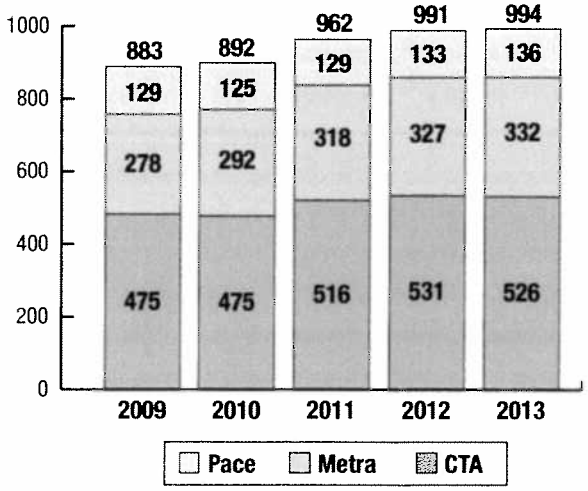
The Other revenue category generally consists of sales tax interest, investment income, and Agency revenue. In 2009, Other revenue of $45.1 million included $3.0 million of an advance repayment and non-cash financial transaction gains of $20.6 million.

Illinois pays interest on sales tax receipts to the RTA from the time of collection until it is disbursed to the RTA. The RTA then disburses the interest on Part I sales tax receipts to the Service Boards based on the same formula used to allocate the Part I sales tax receipts. In 2010, sales tax interest is estimated at $1.7 million. RTA investment income is dependent on available cash balances and prevailing market rates. The RTA's cash balance comprises funds reserved in prior years for various Service Board capital projects and associated RTA financial transaction proceeds. Other revenue also includes fees charged to employers for RTA Fare Checks that help offset the costs of administering the program, as well as matching funds obtained under federal, state and local programs for RTA regional planning, development and new technology efforts. Other revenue of $17.6 million to $17.8 million is expected annually during the 2011-2013 planning cycle.

Operating Expenditures

Exhibit 3-1 provides a summary of the RTA's operating expenditures from 2009 through 2013. Total operating expenditures are projected to increase from $1,054.5 million in 2009 to $1,171.3 million in 2013. This increase of $116.8 million over the four-year period represents a compounded annual growth rate of 2.7% percent.

Exhibit 3-7: **RTA Operations Funding** - Excludes ADA
(dollars in millions)



Operations Funding

The RTA's primary expenditure is the funding of the Service Boards' operating deficits. An operating deficit is the difference between a Service Board's system-generated revenue (farebox and other revenue) and system operating expenditures. Exhibit 3-7 presents the RTA operations funding level for the three Service Boards apart from ADA Paratransit. Excluding ADA Paratransit Service, the Service Board operations funding from the RTA was $882.7 million in 2009 and is expected to reach $994.5 million in 2013. This $111.7 million increase represents to a compound annual growth rate of 3.0%. Exhibit 3-8 presents the RTA operations funding level for ADA Paratransit service. Funding from the RTA was $97.2 million (including $4.2 million of ICE funds) in 2009 and is expected to reach $101.4 million in 2011 with the inclusion of 8.5 million of Additional state funding. RTA funding of $95.6 million and $98.7 million are projected for 2012 and 2013, respectively.

Projected growth from 2009 to 2013 of RTA operations funding to the Service Boards (with the exception of ADA paratransit service) is as follows: The CTA's funding (including PTF from RETT) is estimated to increase from $475.4 million to $526.4 million at a compound annual growth rate of 2.6%. Metra's combined operations and transfer capital funding level is expected to increase from $309.3 million in 2009 to $337.8 million in 2013 at a compound annual growth rate of 2.2%. Pace's suburban bus service funding (including Suburban Community Mobility Funds and South Suburban Job Access funds) are expected to increase from $129.0 million in 2009 to $135.8 million in 2013 at a compound annual growth rate of 1.3% (Exhibit 3-1).

Total funding for the 2011 through 2013 financial plan is provided in the Introduction Section (Ordinance 2010-121, Schedule I-B). A detailed discussion of each Service Board's revenues and

expenditures is provided in the CTA, Metra and Pace sections of this document.

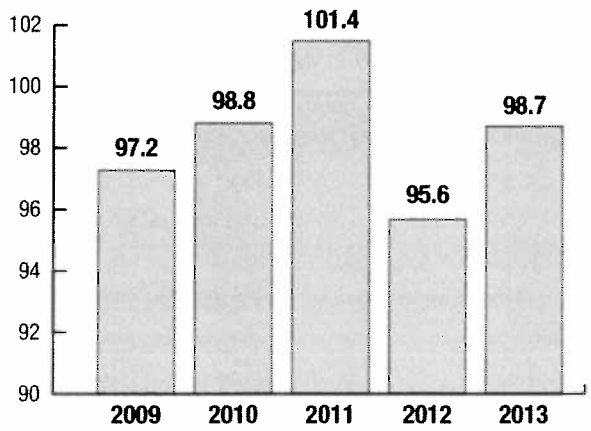
Suburban Community Mobility Fund

As provided by P.A. 95-0708, the Suburban Community Mobility Fund (SCMF), including interest and earnings, shall be used by the RTA to provide grants to Pace for operating transit services that enhance suburban mobility, including, but not limited to, demand-response services, ride sharing, van pooling, service coordination, centralized dispatching, call taking, reverse commuting, service restructuring, and bus rapid transit (BRT). Each year, the RTA shall deposit into this fund an amount that increases or decreases with the percentage change in sales tax receipts. This change is indexed from the 2008 statutory base year amount of $20 million. The SCMF, included in funding for Pace Suburban Service operations, declines to $18.1 million in 2010. Funding increases from $18.6 million in 2011 to $19.7 million 2013.

South Suburban Job Access Fund

Another provision of P.A. 95-0708 is the establishment of the South Suburban Job Access Fund (SCMF) to provide financial resources to Pace, in cooperation with the RTA, for the development of operating programs that enhance access to job markets for residence in south suburban Cook County. SCMF funding was set at $3.75 million in 2008 increasing to $7.5 million annually thereafter.

Exhibit 3-8: **ADA Paratransit Funding** (dollars in millions)



ADA Paratransit Service

The State of Illinois appropriated additional funds to the RTA in the amount of $54.3 million for ADA Paratransit service and other costs and services in 2005, 2006, and 2007. In 2005, the CTA received the full appropriation. In 2006 the CTA and Pace shared the appropriation because Pace acquired responsibility for all ADA Paratransit service in the RTA region effective July 1, 2006. In 2007, Pace received the full appropriation from the State of Illinois. Because of growing service demands and increased operating costs, Pace also received $21.8 million of RTA Discretionary Funds producing a total funding for ADA Paratransit in 2007 of $76.1 million.

In 2008, the additional state funding for ADA Paratransit service ($54.3 million) was terminated with the passage of P.A. 95-0708. Provisions in the RTA Act set aside a base amount of $100 million for 2008 ADA Paratransit operations that change annually in conjunction with the annual percentage change in sales tax receipts. Funding from this source is estimated to decrease to $89 million in 2009 and then increase to 95.6 million in 2012 (Exhibit 3-9), a compound annual growth rate of 1.8 percent. The additional $8.5 million from the state increases total funding to $98.8 million in 2010 and $101.4 million in 2011. Consult the section titled Pace ADA Paratransit for further information on Pace ADA revenues and expenditures.

Innovation, Coordination and Enhancement (ICE) Fund

P.A. 05-0708 also established the ICE fund for innovation, coordination, and enhancement. The $10 million base amount of the ICE fund changes at the same rate as regional sales tax collection changes. ICE Fund are appropriated with the affirmative vote of 12 RTA directors for operating or capital grants or loans to the Service Boards, transportation agencies, or units of local government that advance the goals and objectives of the RTA's Strategic Plan. However, if the RTA Board determines that an emergency exists, then by

an affirmative vote of 12 members funds may then be used for urgent operating or capital needs.

In 2009, the ICE fund was used to fund CTA and ADA paratransit operations. In 2010, the ICE fund has again been reserved to fund ADA paratransit operations. The amount of the ICE fund is expected to increase from $9.0 million in 2010 to $9.9 million in 2013.

Reduced Fare/Free Ride Programs and Sales Tax Interest

State reimbursement for reduced fare/free ride programs is received as revenue by the RTA and flows directly to the Service Boards to help defray a portion of the revenue lost from providing free and reduced fare service. Reimbursement in the amount of $33.6 million is expected annually from 2010 through 2013.

There is a lag between when the State of Illinois collects the RTA Sales Tax and when the State of Illinois transfers it to the RTA. The RTA receives interest on the sales tax, and then disburses 85 percent of the interest on Sales Tax Part I to the Service Boards according to the same formula used for the distribution of Sales Tax Part I. From 2010 through 2013 the annual amount is projected to hold at $1.7 million.

Agency Administration, Regional Services and Programs

Spending for Agency administration, regional services and regional programs are discussed further in the Agency portion of this section. Expenditures in 2009 were $32.1 million and estimated to decline at $30.7 million in 2010. The expenditures are expected to increase annually from $31.8 million in 2011 to $33.1 million in 2013, corresponding to a compound annual growth rate of 2.0 percent.

Debt Service and Capital Expenditures

Exhibit 3-1 provides a summary of the RTA's debt service and capital expenditures from 2009 to 2013. Total debt service and capital expenditures of $254.5 million in 2009 are expected to decline in 2010 and remain below the 2010 level through 2013 with the absence and decline of Metra transfer capital. Debt service and capital expenditures are expected to increase from $238.2 million in 2011 to $246.5 million in 2013. This represents an increase of $8.3 million corresponding to a compound annual growth rate of 1.7%.

Principal and Interest

Principal and interest payments reflect the RTA's expenditures and projected expenditures for debt service on RTA SCIP and non-SCIP bonds that finance Service Board capital projects. The amount also reflects debt service costs for RTA working cash notes required because of delays in receipts from the State which are running six months in arrears. In 2009, principal and interest payments totaled $202.0 million. Expenditures of $226.1 million, $226.7 million, and $227.7 million are expected in 2010, 2011, and 2012, respectively. Additional bond information is provided at the end of this section.

Regional Technology & Agency Capital

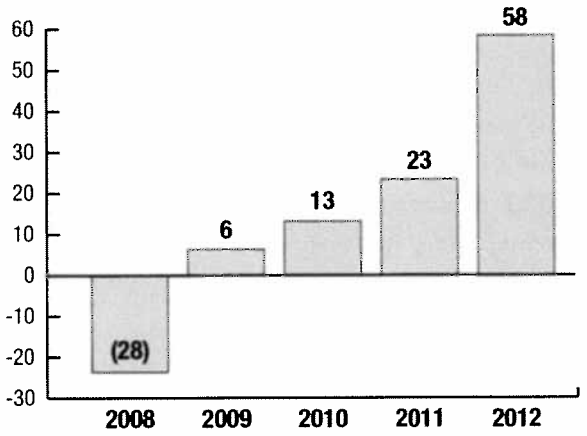
The 2010 budget continues to fund region-wide capital-driven technology enhancements. Like regional technical assistance programs, the regional technology programs are coordinated efforts with other state and local agencies, reducing RTA funding. At the end of the year, any funds that have not been spent are reserved. Included in this category are expenditures for the Agency's capital needs. The funds are used to enhance various information technology programs and preserve the office environment.

The budget for 2011 totals $2.0 million, remaining level though the planning period. More details are spelled out in the Agency's share of this section.

Transfer Capital

Two funding sources cover this category of expenditure, statutory and RTA discretionary. The

Exhibit 3-9: **Ending Fund Balance** (dollars in millions)



statutory apportionment of sales tax to a Service Board can exceed its operating deficit, when this occurs, a Service Board can transfer these funds to its capital program. During the planning period Metra continues to be the only Service Board that can assign funds that could be used for operating purposes to its capital program. In 2009, Metra transferred $31.0 million. In 2010, Metra expects to transfer $18.0 million. Metra projects that it will not transfer additional funds until 2013 in the amount of $5.5 million.

Since 1995, the RTA has transferred a portion of its discretionary funds, available for operations, to the CTA for capital investment. The CTA transfer capital program was funded at $19.0 million in 2009 and $20.4 million in 2010. This amount falls to $10.2 million in 2011 and $11.2 million in 2012 and 2013, with the remainder of the annual $20.4 million in each year added to the RTA's discretionary funding to the CTA in the respective amounts of $10.2 million, $9.2 million and $9.2 million.

Total Expenditures

Total RTA expenditures include all operating, debt service and capital program costs. In 2009, these expenses totaled $1,309.0 million and are expected to be $1,318.5 million in 2010. Total expenditures of $1,378.4 million, $1,403.6 million, and $1,417.8 million are projected for 2011 through 2013. This $108.8 million increase from 2009 to 2013 corresponds to an annual growth rate of 2.0 percent.

Fund Balance

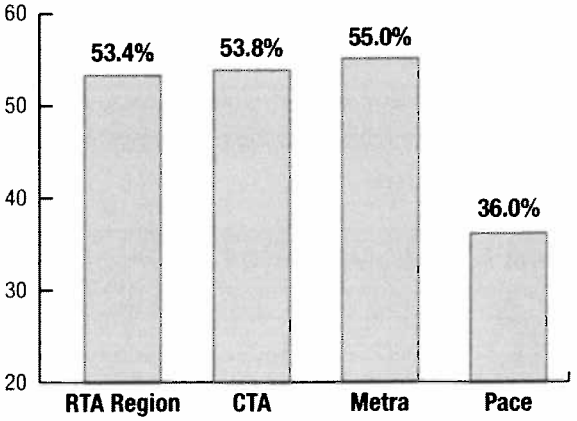
In 1998, the RTA Board adopted an ordinance establishing a minimum level in the unreserved and undesignated fund balance of 5 percent of total operating expenditures. Fund balance policy details are outlined in the Introduction Section. The purpose of the ordinance was to formalize a practice of maintaining a level of financial resources available for funding during unfavorable economic periods. However, unfavorable economic conditions created the need to waive the provision for the 2010 budget and 2011-2012 financial plan, but the provision has been reinstated for the 2011 budget and 2012-2013 financial plan.

The 2009 undesignated/unreserved ending fund balance was negative $53.5 million. The estimated ending balance for 2011 is $5.7 million. An ending balance of $58.3 million is projected for the 2013 financial plan (Exhibit 3-9).

Beginning Balance

The beginning balance is the amount of funds in the undesignated and unreserved fund balance after the previous year's results have been audited and the accounting books are closed. All statements in this document reflect 2009 actual

Exhibit 3-10: **RTA and Service Board Recovery Ratios** (excluding ADA Paratransit)



results of negative $53.5 million as the 2009 beginning balance.

Change In Fund Balance/Ending Fund Balance

Total RTA revenue less total RTA expenditures produces a change in fund balance. When revenue exceeds expenditures, the gain is added to the fund balance. If expenditures exceed revenue, the deficit reduces the fund balance. In 2009, total revenues exceeded total expenditures on a budgetary basis by $77.9 million.

Premium payments for the Joint Self Insurance Fund (JSIF) are expended from RTA's fund balance. The amount reserved in 2009 was $3.6 million. The RTA provides excess liability insurance to protect the self-insurance programs maintained by the Service Boards. The Service Boards are obligated to reimburse the fund for any damages paid plus interest. The 2011-2013 Budget and Financial Plan provides for an annual pension payment of approximately $5.4 million.

Exhibit 3-11: **RTA Statement of Revenues and Expenditures - General & Agency Fund** (dollars in thousands)

	2010 Budget	2010 Estimate	Change

Total System-Generated Revenue Recovery Ratio %	53.0%	53.0%	-
ADA Paratransit Recovery Ratio %	10.0%	10.0%	-

1) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT). (2) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT) and RTA discretionary funds available for region-wide capital or operating initiatives transferred to the CTA for preventive maintenance in the operating budget. (3) Includes Suburban Community Mobility Funds (SCMF) and South Suburban Job Access (SSJA) funds. (4) Includes additional IDOT funding of $8.5 million per MOU. (5) Further actions are required to balance the ADA Paratransit budget, which may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues, including 2010 funds from the ICE Fund that may be allocated pursuant to Paragraph 7 of Ordinance 2010-74. (6) Funding from the State (IDOT) for Debt Service per MOU. (7) RTA funds to purchase excess liability and terrorism insurance to provide protection against catastrophic loss.

At year end changes in revenues over expenditures (change in fund balance) and changes in other funding and reserves, which includes capital grant budget versus actual reimbursement and non-cash financial transaction gains or losses, are reconciled on a GAAP versus budgetary basis with the balance in the general fund then reflecting a GAAP based undesignated/unreserved balance. The year-end unreserved/undesignated fund balance in 2009 was negative $27.9 million (Exhibit 3-1).

Recovery Ratio

The RTA Act requires the RTA Board to set a recovery ratio for the next fiscal year for each Service Board. The RTA Act further requires that the combined revenue from RTA operations cover at least 50 percent of the system operating cost apart from ADA paratransit Service. The RTA's system-generated revenue recovery ratio in 2011 is 53.4 percent or 3.4 percentage points above the mandated 50.0 percent. This calculation is based on the CTA, Metra and Pace achieving their respective marks of 53.8 percent, 55.0 percent and 36 percent, respectively (Exhibit 3-10).

In meeting the 50.0 percent recovery ratio, the RTA Act requires that the revenue figures include all receipts consistent with generally accepted accounting principles with certain specified exceptions. A breakout of this calculation is provided in Exhibit 3-34 at the end of this section.

2010 Budget Versus 2010 Estimate

Total estimated revenue $1,352.0 million is unfavorable to budget by $2.5 million. Varying from budget are State financial assistance, $1.0 million favorable, State Free Rides/Reduced Fare Reimbursement, $3.2 million unfavorable, and State Funding for Debt Service, $0.3 million unfavorable.

Total estimated operating expenditures of $1,066.0 million are favorable to the budget by $3.9 million, reflecting favorable State Free Rides/Reduced Fare Reimbursement, $3.2 million, and favorable expenditures for RTA regional services and programs, $0.7 million. Total estimated debt service and capital expenditures is $4.8 million unfavorable to budget, as a result of Principal and Interest, $4.1 million unfavorable, and Regional Technology and Agency Capital expenditures, $0.7 million unfavorable. Thus, total estimated expenditures of $1,318.5 million are expected to be $0.9 million unfavorable to budget and the Change in the fund balance (total revenues less total expenses) $3.4 million unfavorable (Exhibit 3-11).

Capital Program

When the budget was approved, the 2011-2015 capital program funding marks totaled $4.355 billion. When federal, state or local appropriation figures change, the Service Boards' capital programs may not match the program marks.

When this occurs, the RTA Board considers ordinances that incorporate all changes and bring the Service Board programs in balance with the marks. Detailed Service Board program information is provided in the Capital Section of this publication.

Agency Staffing and Departments

Agency Overview

As previously discussed, the lingering economic downturn in recent years has continued to pose a significant impact on transit funding over the last three years.

However, while the downturn has very much affected the RTA Agency important progress has been made as we have worked to hold the line on expenses by freezing salaries and increasing employee contributions for benefits such as health care, and recognizing that the immediate future continues to pose significant financial challenges for the region's public transit system, the agency is doing its part to hold the line on costs. For example, the budget of $33.7 million for 2011 holds expenditures flat with the level of spending over the past two years by such actions as salary freezes and reducing outside professional fees, but please note that the cost of legislative actions regarding the senior ride free program and the Office of Inspector General, that may have a significant impact on the 2011 Agency budget, are not part of the $33.7 million.

Despite the affects of the economic downward spiral our progress will not be held back, and in 2011 the Agency will continue to build on key initiatives that are closely aligned with the RTA's mission, goals and objectives of its strategic plan as illustrated in the sections that follow, which include discussions by department and expense type.

Agency Staffing and Departments

The agency's 2011 budget includes a staffing plan of 114 positions, an increase of four positions over the 2010 staffing plan (Exhibit 3-12). This change will make available in-house resources that take on initiatives previously carried out by contract, offsetting those costs with more effective services. This includes activities such as travel training, to increase mainline service usage and decrease ADA Paratransit service dependency, ADA certification, and customer services; additional information is provided in subsequent sections.

Exhibit 3-13 shows the 2011 staffing plan by department. The RTA organization chart – Exhibit 3-14 – illustrates the agency departments and their divisions of functional units.

Exhibits 3-15 and 3-16 show the agency expenses by each department. 37% of the agency budget is dedicated for various regional services that are mandated by law, such as the ADA paratransit certification program, reduced fare, senior and disabled ride free programs, as well as Travel Information Center and customer service. 18% of our budget covers different regional planning programs and studies. 19% of our efforts are spent for finance and administrative services, while 12% of our budget is for oversight, research, analysis and policy development. The remaining 14% is dedicated for various management services, such as executive services, legal, governmental affairs, and communications.

Executive Office

This department includes the RTA Board of Directors and organizations that support the RTA Chairman and Board of Directors, and administers day-to-day agency activities.

The RTA Board of Directors consists of 15 members and a chairman. The RTA Board has the statutory authority to establish by rule or regulation, financial, budgetary, or fiscal requirements for the region's public transit system. The RTA Board and its committees set policy, consider matters relating to RTA operations and compliance with the ADA Act, supervise audits, and consider planning studies and capital program investments. The Board has six standing committees that review and recommend policy to the entire Board.

The Executive Director executes the policy decisions of the RTA Board and staffs the agency to administer its statutory mission and implement

Exhibit 3-12: **Agency Budget Staffing by Department**

	2009	2010	2011	2010 vs. 2011
Executive Office	3	3	3	-

Board policy. The Executive Director informs and assists the RTA Chairman and the Board in the development of policy, and is the principal contact with executive staffs of the CTA, Metra, and Pace to ensure effective administration of the RTA's regional planning and oversight responsibilities.

The Secretary to the Authority provides Board support functions by assisting with the information, documentation, and logistical needs of the RTA Board. The Secretary works with staff to supply Board members with the information and documentation needed to fulfill their statutory role and to obtain quorums for meetings of the Board and its six standing committees.

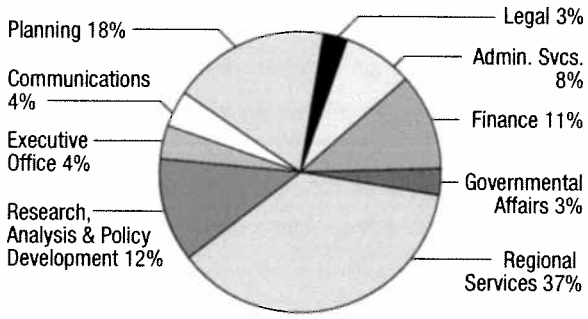
Exhibit 3-16: **Agency Expense by Department** ($33.7 million)



Program priorities:

- Manages the department's continued implementation of the RTA Act mandates and Illinois Auditor General Recommendations
- Oversees the department's achievement of their 2011 program goals
- Works closely with the RTA Board to obtain the necessary Board direction for the achievement of the overall 2011 program

2011 expenditures of $1.5 million represent 4% of the total agency budget, which include personnel related expenses for the board and the executive area. The 2011 budget reflects a 3.1% increase over 2010 primarily due to higher health insurance and pension expenses.

Communications

The Communications department leads management in three key areas: communications, marketing and public outreach to communicate market, publicize and obtain input for each RTA department's programs and initiatives. The department also collaborates with the Service Boards to promote their services and programs.

Program priorities:

- **Transit Vision**
  Implement "Envisioning the Future of Chicagoland" campaign -- a communications and outreach strategy to re-engage key stakeholders, agencies, and the public to advocate for greater state and federal coordinated investment in our region's transit infrastructure. Transit must receive its fair share of transportation dollars and needs a dedicated revenue source to fuel the future of our region's economy.
- **Clean Air Commuter Challenge**
  Partner with the Active Transportation Alliance on a marketing campaign funded by an FTA grant that seeks to shift commute trips away from individual vehicle use and toward sustainable transportation modes (transit, bicycles, walking, car/vanpool).
- **BRT**
  Conduct outreach, education and marketing in partnership with Pace for the region's inaugural Bus on Shoulder pilot project to occur on I-55. Promote the project as a congestion mitigation initiative.
- **Capital Prioritization Tool**
  Publicize this unprecedented initiative that is being managed by the RTA in conjunction

with the service boards and also involves the FTA. The tool seeks to improve transit project coordination and prioritization from a regional perspective.

- **Technology Coordination**
  goroo: Continue to promote goroo as the region's preferred travel resource that offers multi-modal trip planning. Reinstate marketing campaigns to publicize goroo and new enhancements to conclude a CMAQ grant.
  Signage project rollout: Support this transit information project that will be utilized in four locations by publicizing the debut of signage that reflects international standards and facilitates intermodal connections.

The department's 2011 expenses of $1.2 million are 4% of the total agency budget. It shows a 12% decrease over the 2010 budget level. Projected new web site advertising revenue has contributed to a net decrease in 2011 expenses.

Legal

The Legal Department provides legal advice and counsel to the RTA Board, Executive Director, and staff regarding the statutory and regulatory provisions governing the Authority, as well as overseeing all RTA transactions and litigation.

Program priorities:

- **Overhaul Procurement & Contracting Policies/ Procedures**
  RTA's procurement and contracting policies and procedures need to be updated to improve agency efficiency. This overhaul will include preparing a new procurement handbook, rewriting our form contracts and other documents, addressing how RTA Board approval fits into the process (where required) and training staff. RTA's DBE program will also be updated and integrated into the revised procurement process. RTA's Procurement Manager has already taken the first step of preparing an initial draft of an updated procurement handbook, which is under review.
- **Records Management**
  RTA has not updated its record retention policy in several years. Development and implementation of a new records management policy will improve agency efficiency by reducing search times for information, save money by reducing offsite storage costs, and result in the creation of a meaningful archive of information that has long term value.

The department's expenses represent 3% of the total agency budget. 2011 expenses of $1.1 million show a 14% decrease over the 2010 budget reflecting lower legal fees as more services are provided internally.

Governmental Affairs

The Governmental Affairs Department develops and promotes the RTA's federal, state and local government affairs agenda, in coordination with the Service Boards.

Program priorities:

- **Promote Increases in Federal Funding for Transit State of Good Repair Needs**
  The region has suffered from many years of deferred maintenance, at the same time the system has withstood historic ridership increases. The RTA will continue within the industry and advocate directly with state and federal legislators to promote increased in

state and federal funding for state of good repair needs. As part of this initiative, the RTA will identify and pursue opportunities for state and federal legislative and policy changes that will protect and increase transit capital and operating funding and transit-oriented development.

- **Advocate for increased ADA paratransit coordination and financial support**
  Title II of the Americans with Disabilities Act of 1990 (ADA) requires that public entities operating non-commuter fixed route transportation services also provide complementary paratransit service for individuals unable to use the fixed route system. However, the federal government does not provide funding specifically to support the provision of these services. The federal government does allow flexibility in the use of Section 5307 Urbanized Area Formula funding to support paratransit operations, but this draws federal dollars away from vital capital projects. Paratransit services are an effective way to provide specialized transportation for the most vulnerable citizens, and they are also a civil right under federal law. However, paratransit services are also very expensive to operate, costing 7 to 10 times more than the costs for fixed-route service per trip provided. As these costs have continued to rise, transit agencies have struggled to find ways to contain costs and continue to provide service without putting the regular fixed-route services at risk. As Congress and the Obama Administration continue to work on authorizing a new six-year surface transportation program, we will continue to advocate for paratransit support at the federal level.
- **Advocate for Stable State Funding**
  As the State of Illinois faces challenges with its budget, the RTA will need to advocate forcefully on the important role that transit plays in our region's economy and that not only should transit funding not be reduced, but that it be provided to the transit agencies in a reliable and consistent manner to allow the transit agencies to make long term plans.
- **Continue to Implement State Capital Bill**
  In 2009 the Legislature and Governor enacted two capital bills that together provide $2.7 billion in funding for northeastern Illinois mass transit. In 2010 the transit agencies were awarded with $443 million, and in 2011 the RTA will continue to work cooperatively with the Service Boards and with the State (Governor's Office, Office of Management and Budget, and the Illinois Department of Transportation) to continue to implement the capital program. This will include seeking the timely sale of bonds to fund additional capital projects, as well as build on the development of a capital administrative process that allows for an efficient implementation of the program.

The department's expenses represent 2.7% of the total agency budget. The 2011 expenses of $0.9 million are budgeted at the 2010 expense level.

Administrative Services

The Administrative Services department includes Human Resources, Procurement, and Information Technology. These areas are responsible for compensation and benefits, purchasing, and information systems management.

Program priorities:

- **Information Strategic Plan**
  In 2011, Administrative services will formalize and begin implementation of the Information Strategic Plan. This will incorporate Virtual Servers/Virtual Desktop and DR (disaster recovery) which will improve the efficiency and availability of IT resources and applications through virtualization. The V/DR software will allow us to get more out of our existing resources, reduce data-center costs by reducing our physical

infrastructure and improve our server to admin ratio, increase availability of hardware and applications for improved business continuity, increase operational flexibility, and improve desktop manageability and security. The 2011 budget includes $381,000 to start the virtual and disaster recovery project.

- **Revise Procurement Regulations**
  This initiative will seek to revise and implement agency procurement regulations, and issue an updated procurement handbook to agency staff.

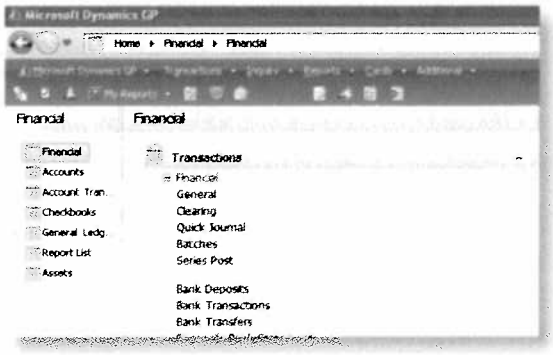
The department's 2011 expenditures of $2.7 million represent 8% of the overall Agency budget. This reflects a 13% decrease over the 2010 budget mainly due to lower budgeted expense for the integrated management system.

Finance

The Finance department executes the funding and oversight responsibilities of the RTA. It works to maintain financial stability in the region and ensures that the agency and the Service Boards execute their statutory requirements for fiscal responsibility. The Finance department includes the following divisions: Controller, Financial Planning and Analysis, Audit and Review, Financial Development/ Grants and Capital Program, and Treasury.

Program priorities:

- **New State Capital Program**
  Implement a new program for the award and administration of capital grants associated with the new State Capital Program. As part of this effort, the Financial Development and Capital Grants will process Service Board applications and submit applications to the Illinois Department of Transportation (IDOT) within one month, and execute grant contracts and/or grant amendments with IDOT and the Service Boards by processing budget revisions, requisitions, and concurrences as necessary for existing grants.
- **Business Transformation**
  This effort looks for opportunities to change current operating practices which reduce costs including public private partnerships (PPP) and improved interagency coordination. In 2011, Finance will continue interagency partnering and coordination with the Service Boards to provide economic assessments of PPP opportunities and alternatives. Additionally, the department will partner with other agency departments and provide economic assessments of alternative operating scenarios aimed to reduce costs and provide additional funds for capital investment.
- **Microsoft Integrated Management System**
  Activity in 2011 will focus on final development of business intelligence ("dashboard") information, as well as any effort necessary to ensure the overall system environment is working properly. The system enhances our ability to perform more robust analysis of agency revenues and expenditures and provides information to agency management and the Board, as well as improving agency process efficiencies. The 2011 budgeted amount for these support consulting activities is $128,700, which is included in the Administrative Services budget.



The department's 2011 expenditures of $3.6 million represent 11% of the overall Agency budget. This reflects a 2.0% decrease over the 2010 budget mainly due to lower consulting services and financial charges.

Planning and Regional Programs

The department consists of four principal organizational areas. Three areas, Strategic & Long Range Planning, Special Programs, and Regional Coordination provide strategic, regional, subregional and corridor planning, and coordination between Service Boards. The fourth area, Regional Services is responsible for the following RTA-operated regional services and programs: the RTA Travel Information Center, Accessibility, ADA Paratransit Certification program, RTA reduced fare program, senior and disabled ride free program, and the RTA Customer Service Center.

Program priorities:

STRATEGIC AND LONG RANGE PLANNING

- **Corridor/Sub-Regional Studies**
  The projects under this key initiative include the implementation of the I-55 Bus On Shoulder (BOS) Pilot as well as 2 major IDOT projects - the Elgin O'Hare-Western Bypass study Tier 2 Environmental Impact Statement (EIS) and the I-290 Phase I. Advancing the I-55 BOS pilot is in accordance with RTA's legislative mandate to explore Bus Rapid Transit on the Stevenson. The 2011 budget includes $300,000 for these initiatives.
- **Data Services (RTAMS/GIS Enterprise)**
  The Regional Transit Asset Management System (RTAMS) is a data warehouse for planning and financial information on the transit system in the northeastern Illinois area surrounding Chicago. RTAMS uses Geographic Information System (GIS) technologies by allowing users to access transit and other related data through an interactive map. Work in 2011 will upgrade and streamline features making this tool more useful and efficient. Data service initiatives under RTAMS and the umbrella of GIS activities support analysis needs in many departments internal to RTA, and are heavily used by the Service Boards and other industry professionals throughout the region (e.g., local & county planning staff, consultants, real estate professionals, etc.). RTAMS is an initiative under which RTA has been successful in developing and maintaining a process by which all the Service Boards regularly provide data. As technology progresses to automate data sharing and updating, 2011 work allows RTA to keep pace with these industry trends, streamline data sharing and ensure that the published data is accurate and most current. The 2011 budget includes $107,500 for GIS and RTAMS enhancements.

SPECIAL PROGRAMS

- **Oversight of RTA Funding Programs**
  The RTA Funding Programs administered by the Special Programs Division provide value to the region by offering planning, operating, and capital grant opportunities for a variety of projects. The programs provide a unique opportunity for the RTA and its Service Boards to coordinate at the local level to not only create plans, implement services, or pursue capital improvements, but to facilitate intergovernmental cooperation and relationship building. Staff will continue to provide program and project management support, conduct compliance activities, outreach, and coordinate activities with the Service Boards and CMAP. The 2011 budget includes $1,620,000 to complete planning studies previously approved by the RTA Board.
- **Transit-Oriented Development (TOD)**
  The RTA will continue to lead the Regional TOD Working Group consisting of planning partners throughout the region, including the Service Boards and CMAP. The Working Group will support and advise RTA's activities in 2011, including the development of additional education materials, research, and investigating concepts such as land acquisition funds and value capture strategies. The RTA will

also continue to advance transit-oriented development concepts as part of previously approved planning studies through the Funding Programs. The 2011 budget includes $150,000 for these initiatives.

- **Implementation**
  The RTA has invested in past planning studies, and it is the RTA's responsibility to identify ways to achieve a return on this investment through successful Transit-Oriented Developments (TOD), service coordination efforts, and improved service which ultimately would increase ridership and promote public transportation in the RTA's service area. Staff will reach out to each of the RTA's past grant funding recipients, meet to discuss their progress, and identify barriers to implementation. Once the barriers are identified, staff will provide advice, technical support and guidance to implement the recommendations. The RTA will work closely with CMAP to coordinate implementation efforts by participating in each other's activities in support of the RTA's Strategic Plan and the GOTO 2040 regional plan. The 2011 budget includes $250,000 for this initiative.
- **Mobility Management**
  This activity includes continued oversight and expansion of the RTA Travel Training program, staffing the RTA ADA Advisory Committee, oversight/support for coordinated Paratransit and Human Service Agency Transportation systems and initiatives, and inventorying the region's existing and potential future mobility management activities. Staff will expand the Travel Training program through the introduction of classroom and peer travel programs. The 2011 budget includes $70,000 for this initiative.

REGIONAL COORDINATION

- **Fare Coordination**
  The RTA's goal is promoting seamless regional mobility, by making it easier for transit customers to pay for travel on different segments of the RTA system with a simple, single form of payment. As part of this initiative, alternative regional fare policy options will be explored. CTA's open payment project is moving forward and RTA must ensure interoperability and future scalability. Additionally, the Planning Department is working towards reducing the operating costs for our Service Boards and maximizing the potential for passenger revenues. The work with the Service Boards will leverage their investments to provide a seamless regional fare payment system that provides the most value for our customers and service operators.
- **Technology Coordination**
  The RTA will work to implement real-time transit information functionality from CTA Bus Tracker, Pace WebWatch and the expected CTA Train Tracker for a one stop website for regional customers as is currently done with the goroo trip planner. The Regional Coordination Division will work to update goroo and ensure that the RTA Transit Hub contains the latest updates from data providers. This will include automated updates of schedule data from CTA, Metra, and Pace. The 2011 budget includes $850,000 for these goroo website enhancements.
- **Environmental Coordination**
  Regional Coordination will work with the Service Boards and local municipalities to complete the Regional Green Transit Plan (RGTP) inventory and displacement analysis with 2009 data. Staff will work with the Service Boards to look at implementation of RGTP recommendations and work to find funding opportunities for it. Part of this outreach will be the promotion of the results and findings of RGTP around the region and across the country.

  One project to help promote transit as a green alternative is the initiation of the Clean Air Commuter Challenge. The Challenge,

overseen by the Planning and Communications Departments, will co-brand the RTA's goroo and Drive Less Live More websites, to provide social networking capabilities between challenge participants and sophisticated personal and competitive trip tracking system (mileage, comparative team progress, carbon and calorie calculators). The Environmental Coordination initiatives are $209,572 in the 2011 budget.

- **Information Coordination**
  During the budget year the Regional Coordination Division will supervise the installation of Interagency Transit Passenger Information signs at four pilot locations throughout the region, (Van Buren, Davis-Evanston, Joliet, and 95th and Western). After installation of the four pilot locations, these prototype interagency information products will be thoroughly evaluated to ensure that they meet customer needs and all functional requirements. Regional Coordination will assess the signage for durability while overseeing maintenance of the signs. In addition, a final standards manual for regional interagency signage will be produced based on the results of the testing of the prototype products.

REGIONAL SERVICES

- **Customer Service and Travel Information Center**
  The RTA interacts with the public through the Travel Information Center (TIC) which provides travel information for the CTA, Metra, and Pace via outsourced call center personnel located in the Metra building. This service is a valuable resource for residents and visitors to this region for their travel needs on public transportation. For 2010, the center is projected to answer over 5 million calls. Additionally, the RTA Customer Service Center assists senior citizens and people with disabilities with reduced fare and ride free permits. Our center sees an average of 100 walk-in customers per day, and answers an average of 300 phone calls per day with questions regarding replacements for lost or stolen permits, how to obtain and use them on buses and trains, and general questions about our programs. The customer service center, transit benefit, reduced fare, and ride free programs direct cost total $1.4 million in 2011. The direct cost for the TIC operation in 2011 is budgeted at $4.0 million.
- **ADA Paratransit Certification**
  Staff will manage and oversee all aspects of the ADA paratransit certification program, including ongoing and time limited initiatives such as: phone screens, scheduling, transportation, interviews, and make certification decisions for a projected 12,000 in-person certification and recertification applicants in 2011. Additionally, staff will process approximately 1,000 mail-in recertification applicants. This reflects a 30% increase in total application volume over the prior 2 years. Staff will continue to meet standards of notifying applicants of certification decision with 65% of decisions made within 15 calendar days of completed application submission and an additional 33% of decisions made within 21 days. No more than 2% are to be placed on interim service until certification decision can be made.

The 2011 budget includes $4.1 million in direct costs for program operating expenses such as: interviews, assessments, certification site operating costs, Pace transportation costs, printing, and mailing house expenses. This amount does not include RTA staff compensation or allocated office expenses.

Planning programs and studies of $6.1 million represent 18% of the total agency budget. This is an 18% reduction over the 2010 budget as more work is brought "in-house" and conducted by staff.

Regional Services of $12.6 million represent 37% of the total agency budget. This is a 9%

increase over the 2010 budget, due mostly to an increasing application volume for ADA paratransit certification.

Research, Analysis and Policy Development (RAP)

The RAP Department was created in 2007 to better meet the RTA's oversight responsibilities and address the recommendations of the Illinois Auditor General. Departmental divisions include Program Compliance, External Audit, Performance Measures and Standards, and Operations Research. The primary function of the department is to strengthen the RTA's oversight of the Service Boards and ensure that RTA has adequate finance, administration, and operations information and resources to develop policies for a more effective and efficient regional mass transit system. The department is also responsible for the CTA Rail Safety Oversight, which assures compliance with Federal State Safety Oversight Rules for Rail Fixed Guideway Systems.

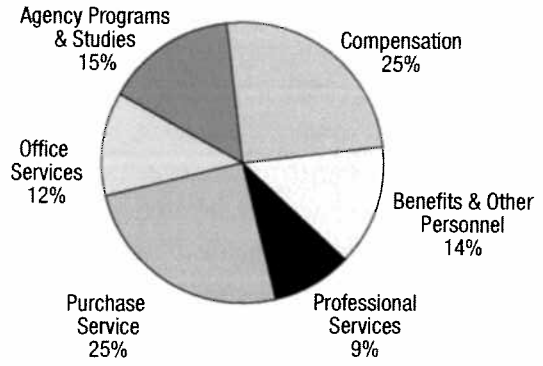
Program priorities:

- **Performance Measurement**
  Implement methodologies to measure and monitor key performance elements of the transit system at the regional, sub-regional and strategic levels that are consistent with the agency's strategic plan. Specifically, 2011 resources will focus on the development of strategic measures as well as the implementation of standards and targets. These efforts will compliment recent accomplishments relative to an overall performance management process as required by the RTA Act.
- **ADA Paratransit Oversight**
  Manage ADA paratransit oversight through the continuation of the development and execution of a plan for oversight of regional paratransit operations as required by Illinois HB1663 (2008) and the FTA. The major initiative for 2011 is completing a review of the ADA paratransit certification process, which includes a cost/benefit analysis to assist in administrative and operational policy making, for which the Agency is planning to spend $117,765 in 2011.
- **Customer Satisfaction Survey**
  Implement a regional customer satisfaction survey as outlined by the performance measurement system and as required by the RTA Act. The development of a regional survey instrument that coordinates and consolidates various aspects of the individual Service Board surveys, as well as reflects specific regional interests, will continue in 2011. Furthermore, it is planned that RTA will work with the Service Boards to administer, tabulate and analyze the regional surveys as part of the overall customer satisfaction program of each Service Board. The 2011 budget includes $450,000 for this initiative.
- **Project Management Oversight (PMO)**
  Improve the execution of the capital program to reflect RTA reform legislation mandates and OAG recommendations. It is anticipated that the development and implementation of an enhanced PMO program for the monitoring and reporting of overall capital project performance that includes both fiscal and planning/engineering aspects will be completed in 2011, allowing for the actual reporting to begin in the first quarter. Due to the increased number of Service Board capital projects as a result of the issuance of $443 million in state bonds, the RTA is responsible for ensuring that the Service Boards are managing their capital funds effectively and efficiently. To assist the RTA staff in fulfilling its project management oversight function, consultant services are necessary. The 2011 budget includes $400,000 for these professional services.
- **Rail Safety Oversight**
  Administer the Rail Safety Oversight (RSO) Program for the CTA's rapid transit system

Exhibit 3-17: **Agency Summary by Expense Type** (in dollars)

	2009 Actual	2010 Budget	2010 Forecast	2011 Budget
Compensation	8,144,913	8,089,187	8,192,524	8,573,345
Benefits and Other Personnel	3,718,124	4,322,549	4,203,829	4,918,583
Professional Services	1,477,373	3,298,221	2,779,628	3,000,015
Purchase Service	7,025,120	7,670,000	8,378,769	8,356,012
Office Services	4,080,463	4,040,360	3,756,898	3,929,681
Agency Programs & Studies	9,278,669	6,304,345	6,413,014	4,947,026
Total Agency	**$ 33,724,662**	**$ 33,724,662**	**$ 33,724,662**	**$ 33,724,662**

Exhibit 3-18: **Agency Expense by Type** ($33.7 million)



as required by the FTA and State. RTA will continue its State Safety Oversight (SSO) responsibilities including responding to and investigating accidents and management of hazards. Significant efforts will also be placed on assuring the implementation of the Corrective Action Plans (CAPs) identified in the 2010 triennial reviews of the CTA and RTA. $50,000 is budgeted for external resources for Rail Safety Oversight in 2011.

- **Capital Asset Evaluation and Programming**
  Assure assets are in a state of good repair as reflected in the RTA reform legislation mandates, Office of the Auditor General's recommendations and FTA requirements; and, implement a mechanism to facilitate the execution of the capital program selection process. To this end, 2011 will see the continuation of efforts begun in 2010, including the development and deployment of the capital prioritization tool and the maintenance and update of the current capital asset condition assessment. The Agency is planning to spend $612,935 on professional services and software towards these efforts in 2011.
- **Audit of Service Boards**
  Design and implement a five-year audit program of the Service Boards as required by the RTA Act. The RTA is responsible for the review and audit of the management control processes of the Service Boards, which includes management and performance audits, operational audits, financial audits, and program specific audits. The estimated annual amount to execute the five-year audit program, with an emphasis on a risk assessment and special audits of the Service Boards, is $350,000 in 2011.

2011 expenses of $4.0 million represent 12% of the total agency budget. This amount is a 36% increase over the 2010 RAP Department budget reflecting initiatives required by the RTA Act such as the capital asset condition assessment and the development of a capital program prioritization tool; customer satisfaction survey development as part of performance measurement; audit of Service Boards; rail safety oversight and an improved and increased program management oversight due to the new State Capital Program.

Agency Expenses by Expense Type

Exhibit 3-17 shows an Agency summary by major expense type from 2009 through 2011. The 2011 budget of $33.7 million remains flat over the 2009 actual expenses and no increase over the

Exhibit 3-19: **2011 Statutory Cap** (in dollars)

	2009 Actual	2010 Budget	2010 Forecast	2011 Budget
Administration Expenses	7,818,229	8,084,978	7,774,689	7,997,244
Regional Expenses	23,380,406	23,360,884	23,562,503	23,772,828
Capital Expenses	2,526,027	2,278,800	2,387,470	1,954,590
Total RTA	**$ 33,724,662**	**$ 33,724,662**	**$ 33,724,662**	**$ 33,724,662**
2011 Agency Statutory Cap				
Administrative Expenses	$ 7,997,244			
Statutory Cap	$ 17,778,221			
Percent under Cap	**55.0%**			

2010 budget. The 2010 expenses of $33.7 million are expected to be on budget.

Exhibit 3-18 shows that Compensation is $8.6 million or 25% of the total expenses. This represents a 6% increase over the 2010 budget primarily due to the full year impact of new hires in 2010. By hiring some new employees, the agency eliminated certain professional consulting services discussed below.

Benefits and other personnel costs of $4.9 million represent 14% of the total budget and show a 14% increase over the 2010 budget reflecting higher health insurance and pension contribution expenses.

Professional services of $3.0 million represents 9% of the overall expenses and reflect a 9% decrease over the 2010 budget. Although this category includes some new initiatives required by the RTA Act, such as the five-year service boards audit program, customer satisfaction survey for performance measurement, and new project management oversight program development, which require increased funding sources; lower budgeted legal fees and other outside consulting services are able to offset or lower the overall category.

Purchase Service is the biggest expense category and represents 25% of the total Agency expenses. This category includes the operation of the Travel Information Center, the ADA paratransit certification program, ADA Accessibility program, the senior and disabled ride free programs, and the transit benefit program. The 2011 budgeted expense of $8.4 million reflects an increase for the ADA paratransit certification program over the 2010 budget due to a higher number of applicants.

Office services of $3.9 million represent 12% of the overall Agency budget and reflects a 3% decrease over the 2010 budget. Projected new web site advertising revenue has contributed to a net decrease in 2011 expenses.

Agency programs and studies of $4.9 million represent 15% of the total Agency expenses. This category includes all the agency planning programs/projects and studies such as community and subregional planning programs, regional coordination programs, and strategic & long range planning programs as well as the agency capital program initiatives such as the integrated management system. This category shows a 22% decrease over the 2010 budget due to the completion of the integrated management system implementation and fewer budgeted new planning programs and studies.

In 1985, a statutory cap for administrative spending was set at $5 million, with a growth rate of 5 percent per year. The proposed 2011 administrative expenditures of $8.0 million are 55% below the cap allowance of $17.8 million as it shown on Exhibit 3-19.

Background on Goals and Performance Measures

In February 2007, the Regional Transportation Authority released its five-year strategic plan entitled Moving Beyond Congestion (MBC). This joint planning process between the RTA and the three service boards achieved several important milestones, including the establishment of a shared vision and goals for the region, a detailed analysis of the current status of the transit network, and a long-term evaluation and assessment of the infrastructure and operational needs of the system.

In January 2008, the Illinois General Assembly enacted significant amendments to the RTA Act, which mandated an ongoing strategic planning process, the establishment of goals, and measurement of performance. In response to the new legislation, the RTA joined in partnership with each of the Service Boards to enact a resolution in February 2009 that would revise the goals and objectives of the MBC Strategic Plan in order to satisfy all requirements of the amended RTA Act.

Vision

The RTA, CTA, Metra, and Pace share a common vision for the region: That the RTA system is a world-class public transportation system that is affordable, reliable and safe, and is the keystone of the region's growing business opportunities, thriving job market, clean air, and livable communities.

Goals and Objectives

The below table identifies the current regional goals and objectives. The Goals explain what the RTA Region needs to accomplish in order to realize its vision, the Focus identifies the stakeholders of each goal, and the Objectives identify how the RTA region will meet its goals.

The executive director and staff of the RTA are committed to working with the Service Board's, their staffs, and local and state elected officials in order to achieve the objectives in the Plan, promote investment in the region's transit system, and ensure that the system operates efficiently and in a coordinated fashion throughout the region

To achieve the objectives of the Strategic Plan and as part of the RTA's oversight function to support the evaluation and management of the region's public transit system, the RTA has identified five major areas for performance analysis: Service Coverage, Service Efficiency and Effectiveness, Service Delivery, Service Maintenance and Capital Investment, and Service Level Solvency. Each major area has several corresponding performance measures.

- **Service Coverage** - monitors both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.
- **Service Efficiency and Effectiveness** - evaluates the level of resources spent for delivering service as well as the extent to which passengers are using public transit.
- **Service Delivery** - reflects the quality of the service delivered.
- **Service Maintenance and Capital Investment** - indicates the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

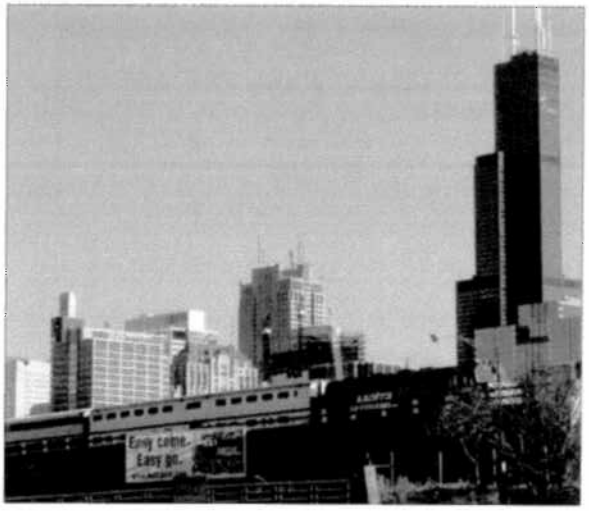


Exhibit 3-20: **RTA Goals and Objectives**

MBC Goal	Focus	Objectives
Provide Transportation Options and Mobility		
Provide attractive, high-quality, innovative transit choices that link people to jobs and facilitate the use of transit for other trips. Transit use in our region is the broadest measure of the success of the transit system.	Customer / external	· Increase the use of public transportation for commuting · Increase the use of public transportation for other purposes · Increase the amount of transit service provided and serve more of the region's travel markets using innovative approaches, as appropriate · Take advantage of highway pricing strategies and promote preferential treatment of transit · Provide quality transit service that is fast, clean, safe and reliable · Provide affordable transit service · Increase the ease of connection between different transit providers by coordinating service, fares, information and physical connections · Ensure appropriate consideration of regional equity principles
Ensure Financial Viability		
The sustained financial viability of public transportation is essential to the region's effective multi-modal transportation system. The transit agencies need to manage operating costs, make sound investment decisions and implement the capital program in a timely manner.	Internal to transit agencies	· Manage the growth of operation costs · Select investments which maximize returns to the region · Progress towards achieving a state of good repair while making appropriate investments to enhance and expand the transit system · Implement the capital program in a timely manner · Ensure a fair allocation of passenger revenue from interagency trips across service providers · Where appropriate, engage in joint efforts with private interests that contribute resources and add value to the transit system
Enhance Livability and Economic Vitality		
An effective transit system makes many contributions to an economically vibrant and livable region. Though transit's role is secondary, not primary, in achieving this goal.	External: transit is a secondary contributor but does not have direct control	· Mitigate the growth in highway congestion · Improve our environment by reducing total transportation emissions and energy consumption · Coordinate transit with development to encourage concentrated growth near transit services · Provide mobility for aging populations and people with disabilities · Provide employers with access to a broader workforce
Demonstrate Value		
In order to fulfill its valuable role in our region, transit requires the support of key constituencies and the public at large.	External: Taxpayers and key stakeholders	· Realize additional operations support through legislative action · Achieve adequate capital funding to move the system towards a state of good repair and undertake selective expansions · Manage transit operations so that they are cost and service effective · Create and sustain public understanding of the benefits of public transportation

- **Service Level Solvency** - assesses financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

Performance Measures

In 2010, the RTA continued its work on the development of a performance measurement reporting and analysis system. In 2009 the RTA began reporting performance at a region-wide level by aggregating data from each of the service boards – CTA, Metra, and Pace – to arrive at an assessment of regional performance. In 2010, the RTA continued reporting at a regional level and introduced a new sub-regional performance report that analyzes performance at the service board and mode level. For both the regional and sub-regional reports, performance is analyzed over a five year period using data from the Federal Transit Administration's National Transit Database (NTD), RTA financial reports, and operating reports from the three service boards. The sub-regional report provides a more detailed level of analysis that helps interpret trends observed at the regional level and provides a means of assessing areas of strength and weakness in the delivery of specific services. Regional and sub-regional performance reports are posted on the RTA website and presented to the RTA Board of Directors. The most recent reports cover the period 2005-2009 using NTD data published in November 2010.

The RTA has also developed a set of companion reports to the regional and sub-regional reports that are based on an analysis of peer groups. At the regional level, the peers selected represent the transit systems that serve the ten largest metropolitan regions in the country. Regional peer reporting began in 2009. At the sub-regional level the peer analysis is being conducted at the mode level with five peers selected for each mode in the RTA system – urban bus, heavy rail, commuter rail, suburban bus, vanpool, and ADA paratransit. In 2010, the selection of modal peers was completed and work began on development of the sub-regional peer report.

Also in 2010, the RTA began to develop a set of strategic measures. The purpose of the strategic level measures is to focus on broader societal outcomes in the economy, environment, and social/political community to assess how transit is positively impacting the quality of life for members of the region. The measures will necessarily involve factors that are out of the direct control of the RTA and service boards because of their broader scope, but are ones for which public transportation plays a significant contributing role. The strategic measures also become a way to link RTA goals with those of other regional stakeholders including planning organizations, other transportation departments, and units of local and state government. The strategic measures will be used to monitor progress in the goals and objectives of the Moving Beyond Congestion Strategic Plan.

In 2010, the RTA also worked with the service boards to develop preliminary estimates of a subset of the performance measures for the 2010 fiscal year just completed, and for the 2011 budget year. 2009 figures were provided by the service boards, 2010 data were based on forecasted information, and 2011 data were based on targets established in each of the service board's budgets. A full report of the performance measures at the regional and sub-regional level can be found on the RTA website at http://rtachicago.com/initiatives/performance-measures.html (these reports cover the period of 2005 to 2009 and are based on NTD data.) The following are highlights from these reports, as well as projected measures for 2010 and 2011 for several of the service delivery and cost efficiency measures.

Service Coverage

These performance measures monitor both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.

Exhibit 3-21: **Regional Vehicle Revenue Miles** (millions)

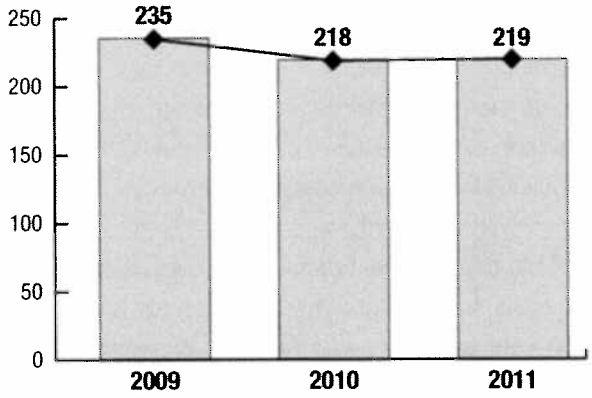

Exhibit 3-22: **In millions**

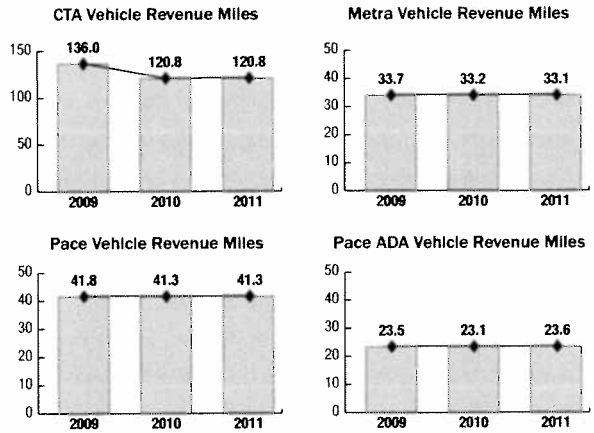

Exhibit 3-23: **Regional Unlinked Passenger Trips** (millions)

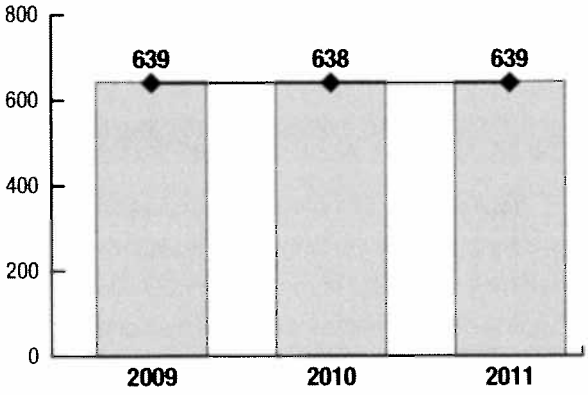

Exhibit 3-24: **In millions**

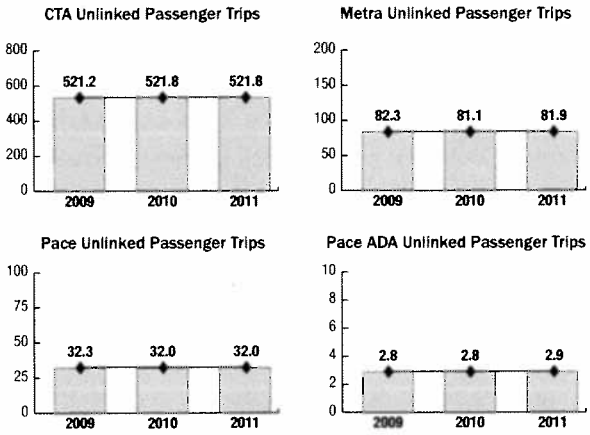

Vehicle Revenue Miles

Vehicle Revenue miles are the amount of service provided as measured in miles driven by vehicles while in service. At the regional level the system experienced a 7.2 percent decline in revenue vehicle miles provided between 2009 and 2010 as the service boards were forced to reduce service due to the recent economic conditions. In 2011 the service boards have projected stable vehicle revenue miles as economic conditions stabilize. (Exhibit 3-21 and 3-22)

Unlinked Passenger Trips

Unlinked Passenger Trips or Ridership, provides the number of times passengers board busses and trains including transfers from one bus or train to another in order to complete their trips. As demonstrated in the projected data below, Ridership in between 2009 and 2010 remained fairly stable. In 2011, passenger trips are anticipated to rise slightly higher than in 2010. The relative stability of ridership at the CTA and Pace despite a reduction in service between the years 2009 and 2010 indicates the service boards' capacity to strategically reduce service without significantly affecting ridership. (Exhibit 3-23 and 3-24)

Service Efficiency and Effectiveness

These performance measures evaluate the level of resources spent for delivering services as well as the extent to which passengers are using public transit.

Operating Cost per Passenger Trip

Operating cost per passenger trip illustrates both the cost of providing a trip and demonstrates the gap between the established fare and the cost of providing an individual trip. The projected performance figures provided in Exhibit 3-25 and 3-26 indicate that the cost of providing one unlinked trip is expected to increase 15 cents between 2010 and 2011. The increase is slightly higher than the expected CPI change and demonstrates that some efficiencies could be further achieved in this category.

Operating Cost per Passenger Mile

Operating cost per passenger mile takes total operating costs and divides it by the cumulative sum of the distance ridden by all passengers.

Projected values for this performance measure are shown in Exhibits 3-27 and 3-28. At the regional level it costs about 54 cents to take one passenger one mile. In 2010 that value is expected to increase approximately 2 cents or 3.7 percent, higher than the projected rise in the CPI of 1.6 percent. Rail tends to be more efficient than buses with a lower operating cost per passenger mile. Metra had the lowest costs per passenger mile; CTA rail had the next lowest. Operating cost for CTA bus and rail combined declined in 2010 as CTA reduced bus service more than rail service. All of the Service Boards are anticipating an increase that is greater than the CPI in the operating Cost per passenger mile for 2011.

Service Delivery

This objective reflects the quality of the service delivered and focuses on customer service and safety.

On-Time Performance

Each of the Service Boards define on-time performance differently but it is generally understood to represent the percentage of times a transit vehicle departs from and/or arrives at a location within a certain number of minutes after or before the scheduled time. As demonstrated in the actual reported data in exhibits 3-29 to 3-32, since 2007 the on-time performance for the region has steadily increased, improving nearly 8 percent between 2007 and 2009. Exhibits 3-29 to 3-32 show the Service boards reported numbers from 2005 to 2009. The CTA has increased on time performance percentages for bus and rail for each reported year (rail data began in May 2007). Metra's on-time performance has remained very stable over the five years reported, varying between 95.4 percent and 96.3 percent. Pace fixed route service also has experienced very stable on-time performance except for a slight downward tick in 2008. Pace ADA paratransit has seen increased on-time performance for each year except 2007, when the transition to full regional Paratransit coverage was completed.

Major Safety and Security Incidents per 100,000 Passenger Trips

This Performance Measure demonstrates the rate of reportable safety and security incidents per 100,000 unlinked passenger trips. In 2008, the NTD made extensive changes to this reporting standard. The new standards include hazardous material events, acts of God, and suicide incidents which had previously been excluded. Overall for the region, the incident rate is very low and there were approximately 8.5 percent fewer reportable safety and security incidents in 2009 than in 2008. Exhibit 3-33 indicates actual performance data.

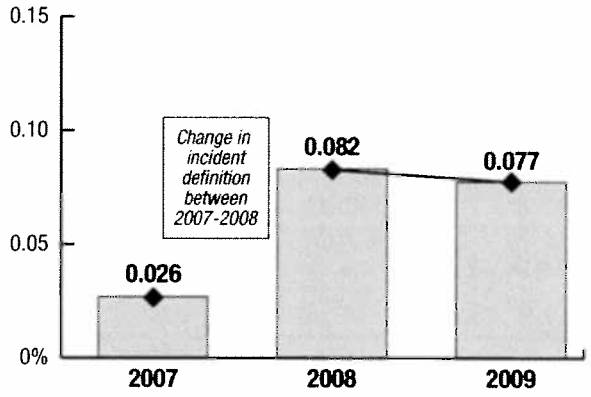

Exhibit 3-34: **Miles Between Major Mechanical Failures**

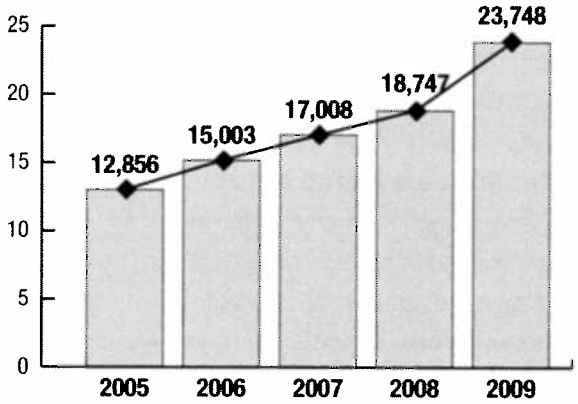

Service Maintenance and Capital Investment

The measures associated with this objective demonstrate the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

Miles Between Major Mechanical Failures

This measure takes the average distance that vehicles travel in revenue service uninterrupted by mechanical failures that prevent them from completing a scheduled trip or from starting the next scheduled trip (Exhibit 3-34 to 3-37). At the Regional level miles between failures has shown steady improvement through 2009. CTA rail service showed a significant 31% improvement in 2009. CTA bus has shown steady improvement in distance traveled between failures with investment in new buses and a decrease in the age of the fleet starting in 2006. Metra's average distance between major mechanical failures has declined by 41 percent from its high in 2006 as a result of the aging fleet and an increasing time between scheduled overhauls. Pace bus showed a significant (39 percent) improvement in the measure in 2009, aided by the introduction of new busses since 2006.

Exhibit 3-35: **CTA - Miles Between Major Mechanical Failures** (thousands)

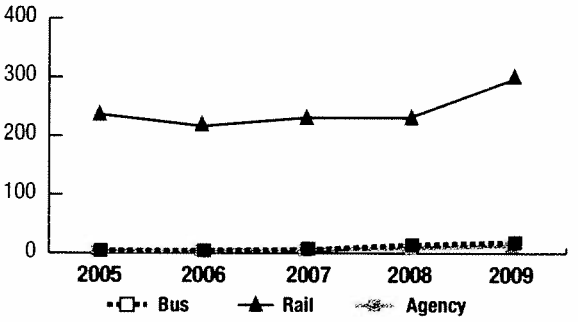

Exhibit 3-36: **Metra - Miles Between Major Mechanical Failures** (thousands)

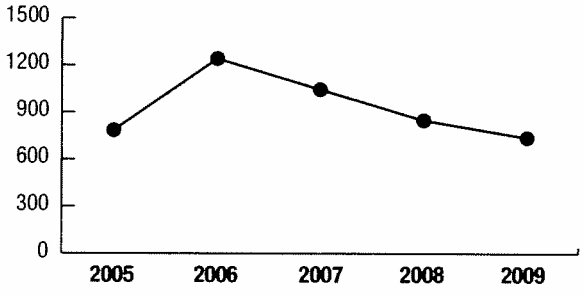

Exhibit 3-37: **Pace - Miles Between Major Mechanical Failures** (thousands)

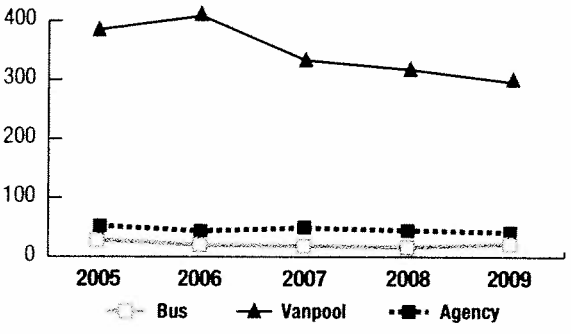

Percent of Vehicles Beyond Useful Life

This measure shows the percentage of vehicles in the total active vehicle fleet beyond their minimum useful life, as defined by the Federal Transit Administration (FTA). The FTA defines useful life as 4 years for automobiles or vans, 12 years for buses, and 25 years for rail cars. Due to limited capital funding, vehicles usually exceed their useful life before actually being retired. After a steady decline through 2008 in the percentage of vehicles beyond useful life, there was a slight increase for the region in 2009 from 28 percent to 29 percent. CTA bus shows improvement in this measure from the purchase of new busses delivered between 2006 and 2009. The CTA's goal is to retire busses and rail cars at the FTA guidelines. Metra is experiencing a steady decline which went from 55 percent to 60 percent beyond useful life over the five year period with an average useful life of 26.9 years. However, Metra undertakes extensive maintenance programs to keep its locomotives and cars in service and operating safely longer than the FTA guidelines. Pace bus shows improvement in this measure reflecting new bus purchases, while the vanpool fleet is aging. The average age of Pace buses, vans and Paratransit vehicles are 6.8 years, 3.3 years and 2.0 years, respectively. Exhibits 3-38 to 3-41 represent actual performance measure data.

Exhibit 3-38: **Region - Percent of Vehicles Beyond Useful Life**

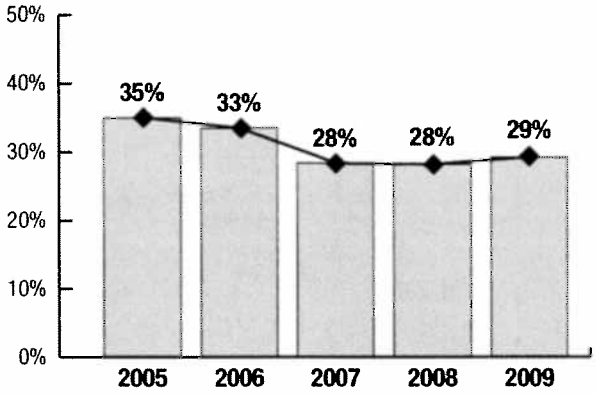

Exhibit 3-39: **CTA - Percent of Vehicles Beyond Useful Life**

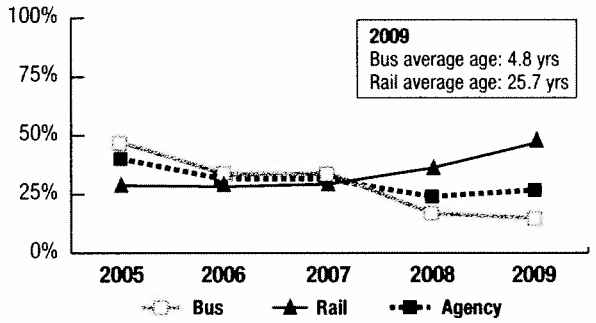

Exhibit 3-40: **Metra - Percent of Vehicles Beyond Useful Life**

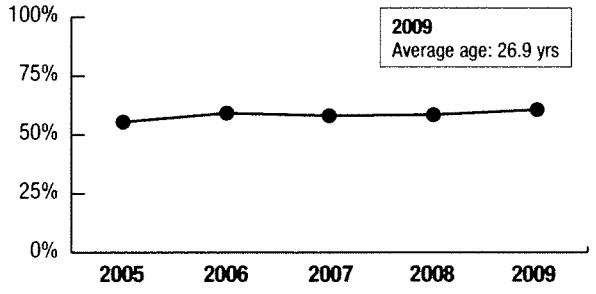

Exhibit 3-41: **Pace - Percent of Vehicles Beyond Useful Life**

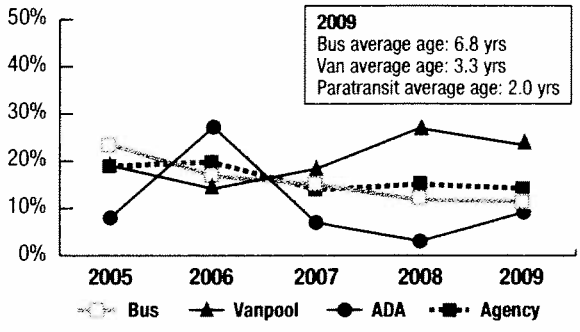


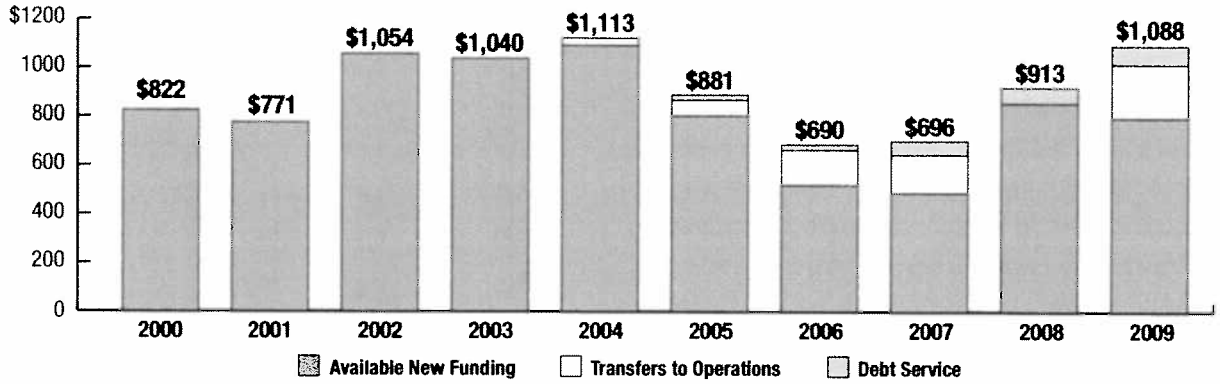
Service Level Solvency

These measures assess financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

Capital Program Funding

This indicator demonstrates the amount of capital funds available to finance maintenance enhancement, and expansion of the transit system infrastructure. This figure represents actual data of the new funding available to Service Boards for the past five years and does not include de-obligated

Exhibit 3-42: **Region - Capital Program Funding** (dollars in millions)



or re-appropriated funds that become available. (Exhibit 3-42 to 3-45)

Capital Funding, net of transfers to operations and payment of debt services decreased by nearly 7 percent in the region. In 2009, CTA had 39 percent less funding available than in 2008 as a result of having to divert over $200 million to operations and $80 million to debt service. Metra and Pace saw increases of 74 percent and 73 percent in available new funding, respectively. The recently completed Capital Asset Condition Report indicates that projected funding needs will total $24.6 billion over the next ten years, which is more than three times higher than the projected funding to be awarded during that time.

Fare Revenue per Passenger Trip

Fare Revenue per Passenger Trip is the total fare revenue divided by the total number of passenger trips providing the average fare that a passenger pays. The projected Performance measures below indicate that in 2010 regional Fare revenue per trip is estimated to increase by about 2.4 percent and in 2011 Fare revenue per Trip is budgeted to stay almost flat, increasing less than 0.8 percent from 2010. The CTA anticipates a slight increase in fare revenue per trip of about 1 cent or 1 percent in 2011 and Metra anticipates a slight increase of 0.3 percent. Pace does not anticipate any increases in the Fare pre Revenue Trip and none of the Service boards are budgeting for any increases in fares.

A Commitment to Performance Measurement

The RTA is committed to the use and development of performance measurement, and recognizes that these measures increase overall accountability, and can explain where the system is doing well and where it can make improvements. In conjunction with the service boards the RTA will be working to develop targets for the adopted set of performance measures that will help define areas of improvement. Through the continued use of Performance Measurement the RTA recognizes that trends will emerge which will help the region as a whole make informed planning, operating, capital and financial decisions.

Reference

RTA Bonds

The bonds issued by the RTA carry a rating of "AA+" from Standard & Poor's, AA- Fitch IBCA and "Aa3" from Moody's Investors Service, Inc. These represent strong investment grade ratings. The RTA has the distinction of being one of the highest rated public transportation agencies in the United States.

All bonds are general obligations of the RTA to which the full faith and credit of the RTA are pledged. These general obligation bonds, with a balance of $2,419.1 million as of December 31, 2009, are divided into two types: $1,538.3 million in Strategic Capital Improvement Program (SCIP) bonds and $620.8 million in RTA bonds (Exhibit 3-48 and Exhibit 3-49).

On June 21, 1993, the RTA issued an advance refunding of a portion of its 1990A Series general obligation bonds. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the financial statements.

On January 30, 1996, the RTA also issued an advance refunding of a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the financial statements.

On September 18, 1997, the RTA issued an advance refunding of a portion of its 1990A, 1991A, 1992B and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series). Proceeds from the issuance amounted to $105,570,935, including a premium of $7,185,935. The proceeds are to fund an irrevocable trust for generating resources for all future debt service payments. As a result, the

refunded bonds are considered to be defeased and the liability has been removed from the financial statements.

On August 10, 1999, the RTA made an advance refunding of a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation (1999) bonds to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the financial statements. The refunded bonds are as follows: $113,895 of the 1992A Series, $9,720,000 1993A, $142,615,000 1994A, and $21,955,000 1994C. The refunding was undertaken to reduce debt service over the next 26 years by $22 million, an economic gain of $11.4 million, which represents a 3.9 percent savings on the previous debt service.

Effective January 1, 2000, the RTA Act was amended to authorize the issuance of an additional $260 million of SCIP Bonds in each year for the period of 2000 to 2004. In March 2001, the RTA issued $100 million in SCIP bonds.

During 2002, the RTA issued two bond offerings. The first issue was a $160 million SCIP bond offering. The second issue was a $200 million non-SCIP issue.

During 2003, the RTA issued three bond offerings. On January 1, the RTA issued $150,000,000 of general obligation (2003B) bonds to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments. The second issue was a $260 million SCIP bond offering on April 1. On the same day, RTA currently refunded the remaining portion ($19,055,000) of its 1993C Series general obligation bond issue. As a result the refunded bonds are considered to be defeased and the liability has been removed from the financial statements. The refunding was undertaken to reduce debt service through 2009 by $ 1.6 million (an economic gain of $ 1.6 million) which is a 6.9 percent savings on the previous debt service.

On October 13, 2004, the RTA issued one bond offering (Series 2004A) for $260 million in SCIP bonds. The Series 2004A Bonds are also secured by the Series 2004A debt service reserve account.

		Total	**$2,528**
2010 B	CTA	Replace/Upgrade Power Distribution and Signal Systems	$11,320
		Total	**$11,320**

On May 2,2005, the RTA issued $148,110,000 of general obligation bonds (2005B) to defease the remaining balance of the 1996 refunding. As a result, the 1996 refunding bonds have been removed from the financial statement.

On September 13, 2006, the RTA issued a general obligation bond for $250,350,000 (2006A) to be used to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

RTA Sales Tax must be 2.5 times greater than the debt service requirement. As shown over the last ten years (Exhibit 3-50 and 3-51), the RTA meets this test. Any differences between debt service amounts presented and amounts shown in general purpose financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

The RTA and its Service Boards have put an emphasis on making sure that the bond proceeds are spent in a timely and efficient manner. Exhibit 3-52 highlights recent bond issues with the largest project-to-date expenditures.

Fund Accounting

The accounts of the RTA are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are separated in its own set of accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled.

Governmental Fund Types

The RTA's governmental fund types are the General Fund, Debt Service Fund and Capital Projects Fund (Exhibit 3-53).

General Fund

The General Fund is the general operating fund of the RTA. It is used to account for all financial

transactions that are not specifically required to be accounted for in another fund such as the Agency Fund. Exhibit 3-1 shows the balance in the General Fund from 2009 through 2013. The General and the Agency Funds are the only two funds that have annual budgets. Exhibit 3-54 highlights the 2011 budget for these funds.

Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest and related costs. The interest earned is generated from the funds being held for payment to the bondholders. The difference between the transfer and payment expenditures reflects the year-over-year timing variance.

Capital Projects Fund

In 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of SCIP bonds, and to have a maximum of $500 million RTA bonds outstanding. Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of the bond issues. The first Capital Projects Fund was established in

1990 with the issue of $100 million of RTA bonds to fund capital projects at the Service Boards. The RTA allocated the proceeds from the bonds issued under the General Assembly's authorization as follows: 50 percent for CTA capital projects; 45 percent for Metra capital projects; and 5 percent for Pace capital projects. Projects included in approved five-year capital programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

Effective January 1, 2000, the RTA Act was amended to authorize the issuance of an additional $260 million of SCIP Bonds in each year for the period of 2000 through 2004 and to issue and have outstanding an additional $300 million of non-SCIP Bonds. These amounts have been issued.

Proprietary Fund

Proprietary Funds are used for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one Proprietary (Enterprise) Fund—the Joint Self-Insurance Fund.

Joint Self-Insurance Fund

The Joint Self-Insurance Fund is used to finance claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. This fund is reported as an enterprise fund since the predominant participants are outside of the RTA.

Fiduciary Fund Types

Fiduciary Funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's Fiduciary Funds consist of an Agency Fund and a Pension Trust Fund.

Agency Fund

The Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra and Pace, including Retailers' Occupation and Use Tax (sales tax), interest on this tax, reduced fare reimbursement grants and federal operating assistance grants. Sales tax revenues are recorded in the fund and are equally offset by expenditures recording the pass through to the Service Boards.

Pension Trust Fund

The Pension Trust Fund is used to account for all accumulation of resources for and payments of, retirement benefits to employees participating in the RTA Pension Plan and Trust.

Basis of Budgeting

The basis of budgeting refers to the conventions for the recognition of costs and revenues in budget development and in establishing and reporting appropriations. The RTA's annual budget and related appropriations are prepared on the modified accrual basis of accounting in conformity with generally accepted accounting principles except for capital grants/expenditures and debt service payments. Capital grants/expenditures are budgeted for on a project basis, which normally exceed one year. Debt service

payments are budgeted as transfers from the General Fund.

Although appropriations are adopted for individual line items, the legal level of control is restricted to total appropriations/expenditures and total administration (statutory cap) appropriations/ expenditures. Management has the authority to exceed any line appropriation without Board approval, provided it does not exceed the legal levels of control. It has been the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the Budget Ordinance. However, due to the unfavorable economic conditions in recent years and the depletion of funds in the undesignated / unreserved fund balance to preserve operating stability, the RTA waived its fund to budget policy for the 2011 fiscal year.

Budgetary reporting is balanced with accounting records on a monthly basis and is fully reconciled to the accounting system on an annual basis in the Comprehensive Annual Financial Report and for the annual Municipal Bond Disclosure Reports required by the Securities and Exchange Commission (Exhibit 3-55 and 3-56).

Total Expense	**99,938**
Recovery Ratio	**10.0%**

(1) The RTA Act permits certain revenue and expense adjustment for the recovery ratio calculation. The RTA, by means of ordinance, allows supplementary adjustments for service board calculations, but such adjustments are reversed to determine the system-generated revenue recovery ratio for the region, which by statute must be at least 50%. Service board adjustments include amounts that result in calculations that equal the "marks" set by the RTA. (2) CTA adjustments to revenue include credits for seniors who ride free and in-kind revenue for security services provided by the Chicago Police Department (CPD). Expense adjustments include in-kind costs for the CPD equal to the revenue credit, and credit for security, pension obligation debt service and some grant revenues. (3) Metra revenue reflects senior ride free credits; expense adjustment credits include security, depreciation and transportation facility leases. (4) Pace revenue adjustments include in-kind ADvAntage program, free ride credits and credits for capital costs incurred in providing contracted services (capital cost of contracting). Expense adjustments include in-kind ADvAntage program charges and credits for ICE project operating expenses. (5) Regional revenue adjustments include a debit for service board senior ride free credits, and a credit for a CTA lease transaction. (6) Expense adjustments include reductions for budget balancing actions, and credits for capital costs incurred in providing contracted services (capital cost of contracting).

4 CTA Operating Plan

Overview

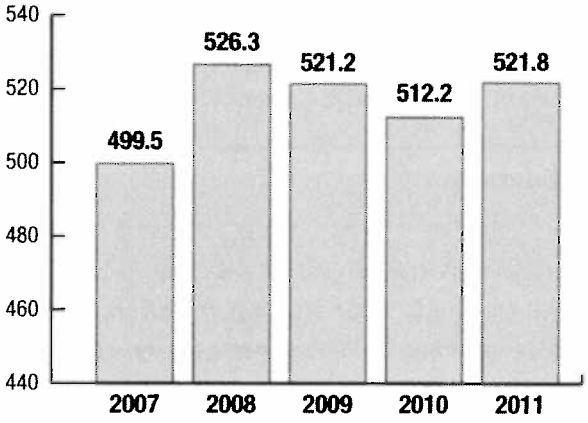
The Chicago Transit Authority (CTA) was created by the Illinois State legislature in 1945 and began operations in 1947. It became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator and is governed by a seven-member Chicago Transit Board.

A new State funding package ratified by state legislation in 2008 increased the percentage of State sales tax dedicated to mass transit and gave authority to the City of Chicago to increase the Real Estate Transfer Tax (RETT) to support the CTA. Unfortunately, the economic recession has had a significant impact on these funds, revenues from sales tax and the RETT have been hit hard by the effect of reduced consumer spending. Additionally, the recession has impacted the rate at which the State of Illinois has made payment to the RTA and subsequently the rate at which the RTA can make payments to the CTA.

In order to balance its 2010 budget the CTA reduced bus service 18 percent and rail service nine percent. A borrowing agreement that the RTA reached with the State of Illinois in 2009 enabled the CTA to avoid even further service reductions but stipulated that the CTA not raise fares. As a testament to CTA staff, service reductions were made carefully and had a limited impact on ridership, and cost savings were achieved through responsible and efficient management.

Building on its success in 2010 the CTA will continue to hold the line on costs in 2011 without the need for increases in fares or further reductions in service. Unfortunately, the CTA is faced with the difficult decision of having to transfer funding from Capital to Operations. In 2011, the CTA has budgeted for the transfer of over $196 million in capital funds to operations. While the CTA has over $6.8 billion in unfunded capital needs, the use of capital funds for operations remains a necessary measure that allows the CTA to minimize the negative impact of the recession on its customers.

Exhibit 4-1: **CTA Ridership** (in millions)



Service Characteristics

The CTA operates the second largest public transportation system in the United States with average weekday ridership on its bus and rail system of 1.6 million. The CTA's service area encompasses 220 square miles in the City of Chicago and 40 surrounding suburbs.

Bus operations provide 1,782 buses traveling over 141 routes covering 2,517 miles, with approximately 11,577 bus stops. Rail service on eight routes has 1,190 train cars traveling over 224 miles of track.

Exhibit 4-2: **CTA Annual Ridership by Mode** (in millions)

	2007	2008	2009	2010	2011
Bus	309.3	328.2	318.6	304.3	306.7
Rail	190.3	198.1	202.6	207.9	215.0
Total Ridership	**499.6**	**526.3**	**521.2**	**512.2**	**521.8**

Exhibit 4-3: **CTA Average Daily Ridership** (in thousands)

	2007	2008	2009	2010	2011
Weekday	1,606	1,679	1,658	1,633	1,660
Saturday	977	1,048	1,058	1,049	1,059
Sunday	675	725	748	732	750

Ridership

Total ridership for 2011 is estimated at 521.8 million trips in 2010 (Exhibit 4-1). This is 1.9 percent or 9.6 million trips higher than projected 2010 ridership. Bus ridership is estimated at 306.7 million trips in 2011. This is 0.8 percent or 2.4 million trips higher than estimated 2010 ridership. Rail ridership is budgeted at 215.0 million trips in 2011, 3.4 percent or 7.1 million trips more than estimated 2010 ridership (Exhibit 4-2).

Average weekday ridership in 2010 was about 1.7 million, while Saturday and Sunday average ridership was nearly 1.1 million and 750 thousand, respectively (Exhibit 4-3). Total vehicle miles are expected to decline from 122.7 million in 2010 to 120.8 in 2011. This 1.5 percent decline in vehicle miles is largely due to the service reductions implemented in 2010 (Exhibit 4-4).

Service Quality

The CTA has continued to work on improving the core components of its business that impact its customers directly. Some of its efforts include the implementation of performance management initiatives that ensure the delivery of safe, clean, on-time, courteous and efficient service; the restructuring and consolidating of customer service and customer communications providing timely and accurate information to the riders; and

concrete repairs made to improve the safety of bus turnarounds and rail stations.

As part of its effort to improve service quality, the CTA has implemented a variety of performance measures. These measures support a significant effort by the CTA to improve service quality. Grouped by quality service objective, the CTA provides for each performance measure the average monthly 2009 result, a 2010 monthly target, 2010 monthly results, a definition of the performance measure and when it is applicable the performance measure is associated with a specific department. The quality objectives include Ridership, On-Time, Efficient, Safe, Clean, and Courteous. When performance for a month exceeds the monthly target, the measurement is highlighted in green. If performance for the month falls below but within 10% of the target, the measurement is highlighted in yellow. When performance falls below 10 percent

Exhibit 4-4: **CTA Ridership and Miles** (Riders and Miles in thousands)

	2007 Actual	2008 Actual	2009 Actual	2010 Estimate	2011 Budget
Ridership (1)	499,544	526,336	521,242	512,180	521,745
Vehicle Miles	135,244	136,190	136,034	122,679	120,827
Passengers Per Mile	3.7	3.9	3.8	4.2	4.3

(1) Ridership in annual inlinked trips.

of the target, the measurement is highlighted in red. Performance measure targets yet to be established are highlighted in gray. The monthly performance measures published on the CTA's website through November 2010 can be found at the end of this section. (Exhibit 4-20)

Business units and departments are responsible for certain performance measures. For instance, the Bus Operations unit is responsible for the "% of Big Gaps interval" measurement which measure, the number of bus intervals that are double the scheduled interval. In 2010, the bus operations department enhanced its 2010 on-time performance by communicating goals and performance to everyone from managers to operators while providing a platform for reporting issues and brainstorming solutions. As indicated in Exhibit 4-20 the CTA was able to keep "% of Big Gaps Interval" performance measure at or below the 5% target every month of the year of 2010 through the month of November.

The use of performance measures ensures high levels of service quality and increases accountability to the public. By creating these performance targets and striving to meet or exceed them and delegating responsibility for the performance measures to specific departments and units, the CTA has shown that it values customer opinion and that it is working toward improved service quality, and greater accountability.

Challenges

Although there are signs in the broader economy that the nation may be pulling out of the deep recession that began in 2008, the outlook for 2011 continues to be pessimistic. The CTA's primary revenue sources are very sensitive to the health of the economy. In addition to significantly lower public funding, the CTA is also faced with higher costs in several areas. Labor costs make up the largest portion of the CTA's budget. In 2011, the CTA's unionized employees will receive contractual wage increases resulting in an over $23.7 million increase in labor expense compared to prior year. The CTA is partially mitigating these increases by eliminating vacancies, controlling hiring and strictly managing overtime. Required employer contributions to the CTA's employee pension fund will add an additional $22 million and the cost of providing benefits is also expected to rise approximately $17.8 million in 2011 over the 2010 budget.

Capital Investments

The CTA spent $672 million on its capital program in 2009 a 28.6 percent decrease from the amount spent in 2008. The CTA is expected to spend a total of $1.2 billion on capital projects in 2010 and 2011. (Exhibit 4-5) Combined 2010 and 2011 capital expenditures constitute a 27.1 percent increase over what was spent in the single year of 2009.

The Brown Line Capacity Expansion, which began in the late 1990's, was completed in January of 2010. Following the capacity expansion, the Brown Line accommodates eight-car trains and provides greater accessibility to customers with disabilities in accordance with the Americans with Disabilities Act.

Exhibit 4-5: **CTA Capital Statistics** (dollars in thousands)

	2007	2008	2009	2010	2011
CTA Total Capital Expenditures	$730,819	$940,749	$671,952	$605,692	$589,824
CTA Bus Vehicles	2,175	2,093	2,053	1,782	1,782
Average Age of Buses (in years)	9.3	5.6	4.7	4.3	5.3
CTA Rail Cars	1,190	1,190	1,190	1,190	1,240
Average Age of Rail Cars (in years)	24.0	25.0	26.0	27.0	26.0
Bus Routes Offering Lift Service	154	154	154	150	141
ADA Accessible Stations	82	85	85	85	88

In late 2010 the CTA requested that the RTA suspend a financial policy that requires a service board to use less than 50% of capital funding for debt service. The CTA wished to issue bonds in 2012 totaling $430 million and use the funding to exercise one of two options in their contract to purchase approximately 706 rail cars. The RTA Board recognized that this represented a unique opportunity for the CTA to purchase rail cars at a dramatically reduced price and suspended the financial policy which was created in a previous ordinance. The action taken by the RTA board temporarily redacted the policy that limited the use of capital funds for debt service to 50% in favor of one that increased that limit to 60%. Thanks to these actions, the CTA will be able to purchase these cars at the current price of approximately $1.4 million per car versus an estimated price of $2.5 million per car if the CTA had to rebid the contract. Further, if the CTA did not replace the existing cars in a timely fashion, they would need to perform a life extending rehabilitation at approximately $1.2 million per car. The current estimate is that the temporary increase in the debt limit would run through 2019.

Bus System

In 2010, the CTA operated a fleet of approximately 1,782 buses, which made 19,741 weekday trips on 140 routes, providing almost 993 thousand rides on a typical weekday. Between 2006 and 2009 the CTA purchased 1,293 new busses. All busses delivered since 2007 have clean diesel engines and particulate filters that meet EPA emissions standards, and the entire bus fleet is ADA accessible and air-conditioned. The continued investment in the bus fleet has reduced the average age of the bus fleet from 9.4 years to 4.3 years.

The bus vehicle overhaul program continues to improve service through regular replacement of major mechanical components subject to extensive wear. In 2011, bus mid-life overhaul activities are programmed for $25.1 million, and total $151.1 million during the period from 2012-2015. With overhauls, the fleet will demonstrate increased reliability and fewer instances of expensive breakdown-based repair.

In 2010 the CTA implemented the Bus tracker project which improved data communication between buses, the Control Center and on-street supervision. The project tracks CTA buses in real time and provides customers estimated bus arrival times via Global positioning satellite (GPS) technology and a dedicated web site (www.ctabustracker.com). In November of 2010 the CTA's bus tracker was the recipient of the 2010 Chicago Innovation Award for bringing valuable and timely bus service information to customers.

Rail System

The CTA has committed to an aggressive slow zone rehabilitation schedule. As of June 2010, slow zones on CTA's rail system have been reduced to 7.3 percent of track from a peak of 22.3 percent in 2008.

The proposed Capital Improvement Plan (CIP) schedules $137.3 million in FY 2011 to fix right-of-ways, ties, rail and structure, to reduce slow zone imposition and therefore maintain operating speeds. An additional $329.9 million is budgeted from 2012-2015 to continue systematic rehabilitation of the CTA right of way.

The CTA has 406 railcars currently on order, and is currently performing testing on 10 prototype cars. The remaining 396 cars will be delivered once the prototypes have gone through the complete testing phases. These railcars will replace the aging 2200-Series and 2400-Series fleet placed into service in 1969 and which have already exceeded their expected service lives of 25 years.

System-Wide Improvements

The CTA continues to invest in new technology to further improve service and safety. The CTA operates over 1,500 desktop computers that link into local area networks for efficient data transfer and team analysis and CTA's proposed Capital Improvement Program allocates 1.1 million in FY 2011 for computers and associated components. Recently, the CTA provided $10 million to enhance its security and surveillance network by expanding camera coverage at its rail stations. The new system integrates sate-of-the-art high-definition digital cameras, which are capable of capturing facial recognition and displaying six times the detail of analog cameras in real time. Other system improvements include better lighting, rehabilitation of station escalators and elevators, replacement of station roofs, canopies, and upgraded passenger public address systems.

Total Deficit Funding	**$685,642**	**$670,339**	**$735,658**	**$664,627**	**$686,193**
Recovery Ratio % (1)	**53.1%**	**55.2%**	**53.8%**	**61.2%**	**61.1%**

(1) Recovery Ratio is calculated by dividing System Generated Revenues over Operating Expense. The calculation includes in-kind revenues and expenses for security services provided by the City of Chicago, excludes security expense, grant revenues. PO debt service and includes some grant revenues.

Budget and Financial Plan

The 2011 budget and 2012 and 2013 financial plan approved by the RTA Board on December 16, 2010, conform to the 2010 marks set by the RTA on September 15, 2010. The CTA's operating funding marks were set at $515.5 million for 2011, $530.8 million for 2012, and $526.4 million for 2013. The CTA's recovery ratio mark was set at 54.0 percent in 2010. The CTA's statement of revenue and expenditures, which includes the recovery ratio, is presented in Exhibit 4-6. The following portrays the outlook for the 2011-2013 planning period.

System-Generated Revenue

Total system-generated revenue is expected to increase from $601.6 million in 2009 to $707.9 million in 2013, an increase of $106.3 million over the four-year period, or a compound annual growth rate of 4.2 percent (Exhibit 4-7). System-generated revenue includes passenger revenue, reduced fare reimbursement, and other revenue. In 2011, passenger revenue comprises 87.0 percent of the CTA's total operating revenue. The reduced fare subsidy and other revenue account for the remaining 13.0 percent (Exhibit 4-8). In 2012 the CTA anticipates a $102.0 million increase in total revenues over the 2011 budget, and in 2013 revenues are expected to increase an additional $3.8 million over 2012, a 0.5% increase.

Passenger Revenue

Passenger revenue is estimated to increase from $505.7 million in 2009 to $518.7 million in 2010, an increase of $12.9 million or 2.6 percent as ridership increased due to a modest economic recovery (Exhibit 4-9).

Exhibit 4-7: **CTA System-Generated Revenue** (dollars in millions)

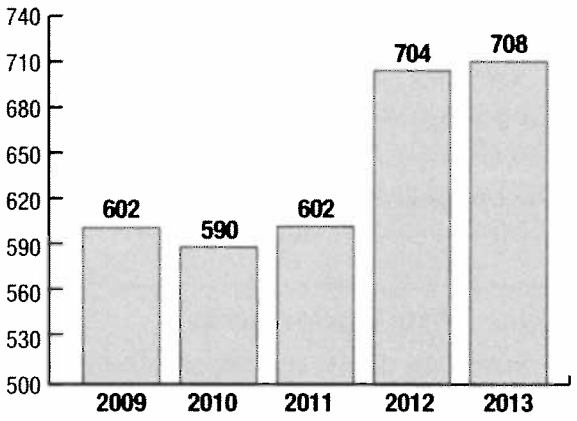

Exhibit 4-8: **CTA Revenues** - $1,338 million

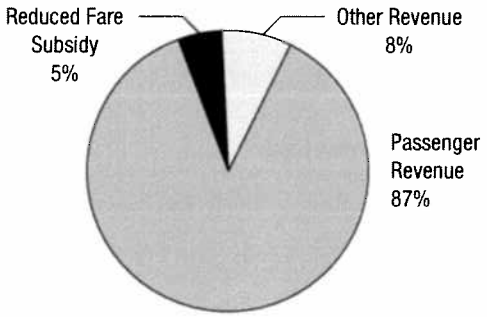

Passenger revenue is budgeted at $523.6 million in 2011, $5.0 million higher than the 2010 estimate, reflecting continued modest economic recoveries. 2012 passenger revenues are anticipated to increase $98.4 million in 2012 or 18.8 percent, and remain at that level in 2013. The revenue increase is expected to come from a combination of increases in fares and ridership. The CTA fare structure is shown in Exhibit 4-10.

State Free Rides & Reduced Fare Reimbursements

The Illinois General Assembly passed legislation in 1989 that provided funds to

Exhibit 4-9: **CTA Average Fare Calculation** (revenue and ridership in thousands)

	2007	2008	2009	2010	2011
Passenger Revenue	$457,299	$471,099	$505,713	$518,660	$523,660
System Ridership	499,544	526,336	521,241	512,180	521,745
Average Fare	$0.92	$0.90	$0.97	$1.01	$1.00

reimburse the CTA for the cost of providing reduced fares for the elderly, students, and the disabled. Fare reimbursement is included as revenue and became available in July 1989. However, in 2009 the State eliminated a portion of the funding for this program thereby providing only $28.2 million. For 2010-2013, CTA assumes that the program will continue to be funded at $28.0 million.

Other Revenue

This category includes advertising, charters, concessions, contributions from local governments, investment income, and other revenue (Exhibit 4-11). Also included are essential contributions from the City of Chicago and Cook County. Annual funds provided by the City are $3.0 million, and the County contributes an additional $2.0 million. Other revenue was $67.7 million in 2009 and is expected to fall to $57.8 million by 2013. The economic recession has impacted the CTA's efforts to increase Advertising, Charters and Concessions revenues, as corporations have been forced to reduce their spending in these activities. Accordingly the 2011-2013 plan shows increases

Exhibit 4-10: **CTA Fare Structure**

	Full	Reduced(1)	Comments
Basic Cash Fare (Bus)	**$2.25**	**$1.00**	**No transfers allowed**
Transit Card (Rail)	$2.25	$0.85	
Chicago Card (Rail)	$2.25	None	
Chicago Card (Bus)	$2.00	None	
Transit Card (Bus)	$2.00	$0.85	
University Pass	$0.84	None	20% increase; price change effective 2009 Fall term
First Transfer w/Fare Card	$0.25	$0.15	Allow two add'l rides within two hours of issue. Transfers are not valid for travel in reverse direction on the route of issue
Passes			
1-day	$5.75	None	
7-day (CTA only)	$23.00	None	
7-day (CTA/Pace)	$28.00	None	7-Day CTA/Pace Pass valid on CTA and Pace non-premium/ subscription routes.
30-day	$86.00	$35.00	
Visitor Passes			
1-day	$5.75	None	
3-day	$14.00	None	
Link-up Pass	$39.00	None	Sold by Metra; use with Metra monthly ticket.
Express Surcharge	$0.25	$0.25	Downtown on bus routes 2, 6, 14, and 147.
Rush Shuttle Fares	$1.00	None	To/from downtown Metra stations during rush hour.
128 Soldier Field Express	$1.00	$0.50	
154 Wrigley Field Express	$6.00		Per carload.

Note: (1) Reduced fares are for children 7 through 11 years old. Grade and high school students with CTA riding permit.

Exhibit 4-11: **All Other Revenue** (dollars in thousands)

	2009 Actual	2010 Estimate	2011 Budget	2012 Plan	2013 Plan
All Other Revenues:					
Advertising, Charter, & Concessions	$30,215	$18,900	$18,924	$21,552	$24,984
Investment Income	1,259	850	850	867	884
Contribution from Local Govt. Units	5,000	5,000	5,000	5,000	5,000
All Other Revenue	31,206	18,400	25,663	26,567	26,921
Total All Other Revenues	**$67,680**	**$43,150**	**$50,437**	**$53,986**	**$57,789**

of 7.0 percent in both 2012 and 2013 over the preceding years as the economy begins to recover.

Operating Expenditures

Total operating expenditures are forecasted to increase from $1,261.6 million in 2009 to $1,394.1 million in 2013. This $132.5 million increase represents a 2.5 percent compound growth rate (Exhibit 4-12).

For 2011, operating expenditures are estimated at $1,337.8 million, or $76.2 million greater over 2009 actual expenditures of $1,261.6 million, a 6.0 percent increase. The increase is due mainly to higher labor pension, fuel, security and all other costs.

Budgeted 2011 expenditures of $1,337.8 million are expected to increase $77.7 million or 6.2 percent over 2010 expenditure. Financial projections for the years 2012 and 2013 show increased operating expenditures at $1,368.7 million and $1,394.1 million, respectively. The 2012 financial projection represents an increase of 2.3 percent over the 2011 budget, and the 2012 financial projection represents an increase of 1.9 percent over the 2012 financial plan.

Expenditure Elements

2011 operating expenditure elements include labor, material, fuel, power, insurance & claims, security, and other costs. Labor expenditures, including fringe benefits, represent 69.6 percent of the CTA's total expenditures. Base wages represent about two thirds of that total, while fringe benefits, which are primarily medical insurance and pension costs, represent the remaining one third. Materials, used primarily for maintenance, are 5.4 percent of total expenditures. Fuel and power represent 6.3 percent of the CTA's expenditures. Security and insurance & claims represent 3.6 percent of total spending. Other expenditures comprise the remaining 15.0 percent. The other expenditure category includes items such as leases, utilities, and contractual services (Exhibit 4-13).

Exhibit 4-12: **CTA Total Operating Expenses** (dollars in millions)

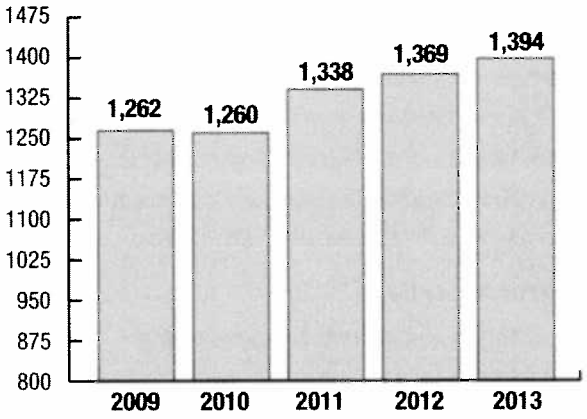

Exhibit 4-13: **2010 CTA Operating Expenditures - $1,271 million**

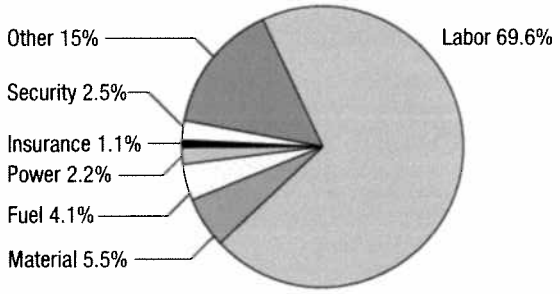


Labor Costs

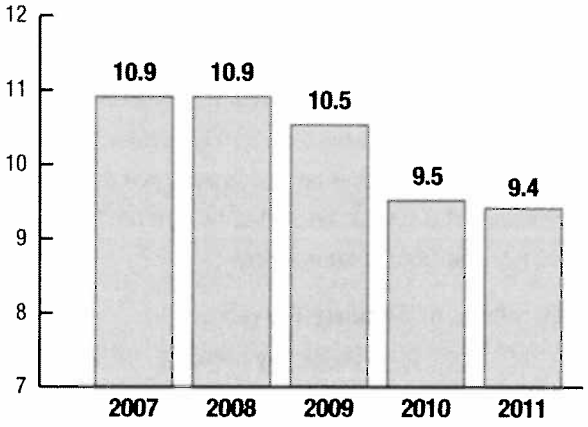
Labor expenditures are expected to increase from $856.5 million in 2009 to $951.3 million in 2013. This $94.8 million increase represents a compound annual growth rate of 2.7 percent (Exhibit 4-14). Labor expenditures for 2010 are estimated at $835.0 million or $21.5 million less than prior year. The lower labor expense is a result of administrative layoffs effective January 1,

Exhibit 4-14: **CTA Labor Expense Growth** (in thousands)

	2008	2009	2010	2011	2012	2013
Labor Expense	$873,636	$856,468	$834,974	$931,178	$937,242	$951,320
% Change from Prior Year	11.3%	(2.0%)	(2.5%)	11.5%	0.7%	1.5%

2009. The number of budgeted positions in 2011 is lower than in 2009 (Exhibit 4-15). Budgeted labor expenditures of $931.2 million in 2011, are projected to increase by 0.7 percent to $937.2 million in 2012 and increase another 1.5 percent to $951.3 million in 2013.

Exhibit 4-15: **CTA Budgeted Positions** (in thousands)



Material

The material category covers all repair parts for buses, trains, track, structure and signals in the system. Material expenditures are estimated at $82.3 million in 2010, $72.8 million in 2011, $74.2 million in 2012, and $75.7 million in 2013. The decline in material expenses from 2010 to 2011 reflect the CTA's on-going supply chain improvements and close scrutiny of all material purchases. Additionally, the material expenditures have decreased as increases in Capital funds from preventative maintenance offset regular material costs. Modest increases in 2012 and 2013 represent the CTA's continued efforts to reign in material costs through supply chain improvements and close scrutiny of material purchases.

Fuel

In 2008, CTA fuel expenditures were $91.8 million for 24.1 million gallons a price per gallon of $3.81 (Exhibit 4-16). 2009 actual results show Fuel expenses of $100.5 million for 22.1 million gallons at a cost of $4.55 per gallon. In 2010, the cost per gallon is estimated at $3.16, a $1.39 decline. Additionally, consumption is anticipated to decline by 3.7 million gallons. The decrease in consumption is primarily due to service adjustments, while Strategic Fuel hedging contributed considerably to the reduction in the cost per gallon. Combined, these efforts have reduced the estimated cost for fuel in 2010 by $42.4 million. In 2011 the cost per fuel is estimated at $3.07 per gallon. Through the Strategic fuel hedging program the CTA has already secured 18 percent of its 2011 projected fuel consumption at a price of $2.82 per gallon, with a more fuel efficient bus fleet, and a reduction in service the CTA has budgeted for a $3.6 million dollar reduction in fuel costs in 2011.

Power

Electric power expenditures for the rail system are projected to decrease from $37.6 million in 2009 to $36.2 million in 2010 due to an actively managed block purchase approach that has reduced power costs through hedging. Expenditures for power are budgeted to decrease an additional $6.2 million in 2011, and then are estimated to increase by $0.6 million each year thereafter in 2012 and 2013.

Insurance and Claims

The insurance and claims expense category represents the expenditures for claims and litigation for injuries and damages that occur on CTA property or with CTA vehicles.

Exhibit 4-16: **CTA Fuel Cost per Gallon** (cost and gallons in thousands)

	2008	2009	2010	2011
Fuel Cost	$91,834	$100,500	$58,100	$54,500
Gallons	24,100	22,100	18,400	17,750
Cost Per Gallon	$3.81	$4.55	$3.16	$3.07

The CTA 2010 estimate of $43.0 million is $27.6 million higher than the actual 2009 amount, reflecting additional deposits made possible by savings generated in other areas. The amount of injury and damages provision is determined by actuaries and based on actual claims history. Expenses for Insurance and claims are $15.0 million, 30.6 million and 31.2 million for 2011, 2012, and 2013 respectively.

Purchase of Security Services

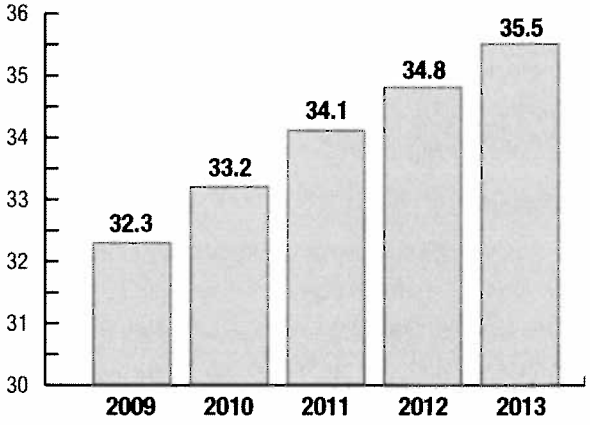
Security is strategically deployed throughout the CTA system to provide 24-hour coverage, seven days a week. Security services are provided by the City of Chicago, Evanston and the Oak Park Police departments, and contracts with private security firms for guard and canine security.

Expenditures are estimated to be $33.2 million in 2010, which is a 2.8 percent increase from 2009 (Exhibit 4-17). The 2011 budget is $34.1 million. In 2012 and 2013, security expenditures are expected to increase each year by $0.7 million. These increases represent investments made in new surveillance cameras and sensors for the rail system.

All Other Expenditures

All other expenditures include utilities, rents, maintenance & repair, advertising, commissions, consulting, insurance, and other general expenditures. For 2010, $172.4 million is estimated, which is $41.0 million more or

Exhibit 4-17: **CTA Purchase of Security Service** (dollars in millions)



31.2 percent higher than the prior year. The 2011 all other expenditures budget is projected to be $200.1 million, which is higher than the 2010 budget by $27.8 million. Expenditures are forecasted to continue to increase to $205.1 million in 2012 and to $211.3 million in 2013. All other expenditures include interest on Pension Obligation Bond (POB) required by the 2008 legislation which enabled the CTA to regain long-term solvency in its pension funds.

Deficit

System-generated revenue (fares and other revenue) cover much of the CTA's operating expense budget, with the remainder of the operating deficit covered by public funding. The operating deficits are derived from total system generated revenue minus total operating expenditures. The deficits for the 2011 budget and 2012-2013 financial plans are $735.7 million, $664.6 million and $686.2 million, respectively (Exhibit 4-6).

Funding

Public funding, available for CTA operations, is determined by and based on the RTA's revenue projection for the year. Public funding from the RTA consists of the RTA Sales Tax (RTA Sales Tax-I and II), the Public Transportation Fund (PTF-II),

the RTA Real Estate Transfer Tax (RETT), and RTA discretionary funding. Illinois Public Act 95-0708, increased the rates of the RTA sales tax rate, the PTF match, and the City of Chicago RETT, creating RTA Sales Tax II, PTF-II and RETT.

CTA funding from RTA Sales Tax-I is expected to increase from $271.9 million in 2011 to $288.6 million in 2013. RTA Sales Tax-II and PTF-II are expected to increase from $109.4 million in 2011 to $116.1 million in 2013. The RETT and the 25 percent PTF-II match on RETT combined are expected to decrease from $30.0 million in 2011 to 33.5 million in 2013. RTA discretionary funds for the CTA are expected to increase from $128.3 million in 2011 to $114.9 in 2013. Apportionments from the RTA's 15 percent share of the sales tax (Sales Tax-I) revenue and the State's public transportation fund (PTF-I) are the sources of the RTA's discretionary funds. The CTA will use $196.2 million of Federal Funds for Preventative Maintenance in 2011 with plans to use $57.8 million and $70.0 million in 2012 and 2013, respectively. CTA anticipates the need for To Be Determined Revenues of $50.0 million and $63.0 million in 2012 and 2013, respectively. Through To Be Determined Revenues and the transfer of Federal Funds to Preventative Maintenance, CTA funding will meet the budgeted operating deficit for the 2011 to 2013 financial planning years. A more detailed description of how public funds are allocated among the service boards can be found in the Region Section of this book.

Recovery Ratio

The CTA's recovery ratio equals total system-generated revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. In 2011, the CTA's recovery ratio is expected to meet the mark of 54% set by the RTA Board. The Region Section provides the detailed recovery ratio calculation.

The following factors affect the CTA recovery ratio calculation. First, in-kind security services provided by the Chicago Police Department in the amount of $22 million are included as both revenue and expenditure in the recovery ratio calculation. Second, additional security expenditures are excluded from the recovery ratio calculation. The CTA's recovery ratio was 53.1 percent in 2009 and is estimated to be 55.2 percent in 2010. In 2011, the CTA has budgeted for a 53.8% Recovery Ratio and has planned for a 61.2% and 61.1% Recovery Ratio in 2012 and 2013 respectively (Exhibit 4-6).

Exhibit 4-18: **CTA 2010 Amended Budget versus 2010 Estimate** (dollars in thousands)

	2010 Amended Budget	2010 Estimate	Variance
System-Generated Revenues			
Passenger Revenues	$521,417	$518,660	($2,757)
Reduced Fare Subsidy	32,200	28,000	(4,200)

Recovery Ratio %	51.0%	55.2%	4.2pts

2010 Budget versus 2010 Estimate

The CTA expects a balanced budget in 2010 (Exhibit 4-18).

Revenue

Calendar year 2010 operating revenues are estimated at $589.8 million and are projected to be $10.9 million or 1.8% below budget. Revenue from fares is estimated at $518.6 million which is lower than budget by $2.8 million, or 0.5 percent.

The reduced fare subsidy is the State's reimbursement to the CTA for providing discounted fares to the disabled, the elderly, and students. Revenue from the reduced fare subsidy is estimated at $28.0 million which is lower than budget by $4.2 million or 13.0 percent.

All other revenue is estimated at $43.2 million which is lower than budget by $3.9 million or 8.4 percent. Contributions from local governments of $5 million are on par with budget. The RTA Act requires the City of Chicago to contribute $3 million and Cook County to contribute $2 million annually to the operations of CTA. Revenue from Advertising, Charter, & Concessions is estimated at $18.9 million which is lower than budget by $4.0 million or 17.5 percent. Investment income is estimated at $850 thousand.

Other revenues including parking fees, sale of real estate, rentals and sale of CTA merchandise are projected to be $18.4 million which is favorable to budget by $1.0 million or 5.4 percent.

Expenditures

Calendar year 2010 operating expenditures are estimated at $1,260.1 million and are projected to be favorable to budget by $10.9 million. Expenditures for materials, insurance and claims and security services, are over budget for the year while labor, fuel, power, and other services are estimated to finish under budget due to cost containment strategies implemented to ensure that the CTA balances its budget in 2010.

Labor expenditures are projected at $835.0 million, which is $17.1 million or 2.0 percent under budget. The CTA achieved savings in this category by limiting hiring in 2010, and managing overtime.

Material expenditures in 2010 are estimated at $82.3 million, which is higher than budget by $4.6 million but $5.6 million lower than 2009 actual expenses. In 2011 material expenses will be reduced as the CTA has invested in its bus fleet and lowered its average age. The CTA's Material expenses were high this year due to charges for inventory obsolescence.

Fuel expenditures for revenue equipment are expected to be $58.1 million at the end of 2010. This is $5.8 million or 9.0 percent lower than budget. The CTA reduced fuel consumption in 2010 by reducing service. Further reductions in consumption have resulted in the closing of the Archer Garage and the use of a more fuel efficient fleet. In addition to decreasing consumption the CTA has also actively decreased the price it pays for fuel through its Fuel hedging program. Fuel Prices are projected to end the year at a net average price of $3.16 which is $1.39 per gallon less than the average price in 2009.

Electric power expenditures for the rail system are estimated to be $36.2 million, below budget by $2.0 million or 5.1 percent. At the start of 2010 the CTA's new Electric power contract began. This new Contract allowed the CTA to purchase wholesale power for its base load electricity supply in advance. This approach has yielded a blended

rate of approximately $0.087 per kilowatt hour in 2010 slightly less than what the CTA was charged on average in 2009.

Expenditures for insurance, claims and litigation for injuries and damages that occur on CTA property or with CTA vehicles are estimated at $43.0 million for 2010, $15.0 million or 53.6 percent greater than budgeted. Additional deposits were made possible by savings generated in other areas.

Security is deployed strategically throughout the system to provide 24-hour coverage, seven days a week. These services are provided by the Chicago, Evanston, and Oak Park Police departments and contracts with private security firms. Full year expenditures are estimated at $33.2 million. This is nearly even to budget. In addition to the services contracted by CTA, the Mass Transit Unit of Chicago Police Department (CPD) continues to provide services to CTA at an estimated cost of $22 million.

Statutory Compliance

The RTA Act requires that each Service Board meet special criterion, detailed in the Region Section, for their budgets to be approved. The CTA budget, as submitted, substantially meets all criteria.

Organizational Structure

The CTA organization chart is shown in Exhibit 4-19 and consists of the following departments and business units.

CTA Board

The CTA's governing arm is the Chicago Transit Board which consists of seven board members. The Mayor of Chicago appoints four board members who are subject to the approval of the City Council and the Governor. The Governor appoints three board members who are subject to the approval of the State Senate and the Mayor of Chicago.

The Citizens Advisory Board, the CTA Board Members, the Chief of Staff to the Chairman, the Secretary of the CTA Board, the President of the CTA and the Office of Inspector General report directly to the Chairman of the Board. Functionally, the General Counsel of the CTA and the Chief Financial Office both report to the Chairmen of the Board.

Office of Inspector General

The Office of Inspector General reviews and analyzes the integrity of financial, operating, and computer system activities and any other organizational activity that management requires. This office is also responsible for financial and general investigations.

The Office of the Inspector General reports directly to the Chairmen of the Board, and the Office of the President falls under its scope of potential investigative responsibilities.

Office of the President

The CTA President is the agency's chief executive and is charged with executing the policy decisions made by the CTA Board of Directors and providing direction to the CTA staff as they work to fulfill the mission and goals of the Service Board. The Chief of Staff of the President, and Chief Safety and Security Office Report directly to the President, and the President reports directly to the Chairmen of the Board.

General Counsel

General Counsel handles appellate matters, legislative affairs, corporate law, claims and tort litigation, and workers compensation matters. General Counsel functionally reports to the Chairmen of the Board and administratively reports to the Office of the President.

Chief Financial Office

Finance is responsible for Budgeting and Capital Planning, general accounting, investment support, cash management, program development, and the management and control of property, grants, investments and funding.

The Chief Financial Office functionally reports to the Chairmen of the Board, and administratively reports to the Office of the President.

Chief Technology Office

The Chief Technology Office consists of the business units of Technology and Project Management Office (PMO) & Revenue Technology, which maintain and upgrade all CTA technology infrastructure including computer hardware, application software, and communications equipment. This office is also responsible for the maintenance of fare equipment for both Bus and Rail, and for all communication system infrastructures.

The Chief Technology Office reports directly to the Office of the President.

Chief Infrastructure Office

The Chief infrastructure office includes the operating units of Chief Engineer, Power & Way and Facilities. Engineering is responsible for creation and maintenance of construction documents for CTA facilities, and reviewing and answering design requests. Power and Way inspects and maintains the rail track, including rail track circuits, switches, and vital signal relays. Power and Way is also responsible for power substations in the CTA system. The Facilities unit performs maintenance and construction of, rail stations, terminals, rail yards and other CTA facilities.

The Chief Infrastructure Office reports directly to the Office of the President.

Chief Administrative Office

The Chief Administrative Office includes, Human Resources, Employee Relations, Purchasing, Supply Chain & Business Development, Communications, and Planning. The Human Resources department is responsible for recruiting, hiring, benefit services, medical services, and program compliance. The Purchasing/Warehousing department performs inventory management. Communications is responsible for marketing, media relations, identity development, and publications. Additionally, Communications is responsible for providing customer service such as travel information, Chicago Card account maintenance, maps, brochures, fare updates, refunds, and support for onsite public forums. The planning department is responsible for developing routes and schedules that best synchronize CTA capabilities with customer demand. Planning ensures that the highest level of service is attained.

The Chief Administrative Office reports directly to the Office of the President.

Chief Operating Office

The Chief Operating Office consists of the Control Center. Bus and Rail Operations, and Bus and Rail Maintenance. The Control Center monitors passenger and facility security and maintains accident statistics and monitors environmental affairs. The Control Center operates 24 hours per day, 7 days a week. Bus and Rail Operations manage a fleet of 2,053 buses and 1,190 rail cars, respectively that cover an average of 185,000 bus miles and 188,000 rail miles every day. They employ approximately 3,700 full-time equivalent bus operators and 1,100 rail operators that provide service to the customers. Bus maintenance includes both the maintenance and regular cleaning of bus interiors and exteriors. Rail Maintenance is responsible for the maintaining the safe mechanical functioning of the CTA's trains as well as regular cleaning, heavy maintenance repairs and rebuilds of train systems

The Chief Operating Office reports directly to the Office of the President

Exhibit 4-19: **CTA Organization Chart**

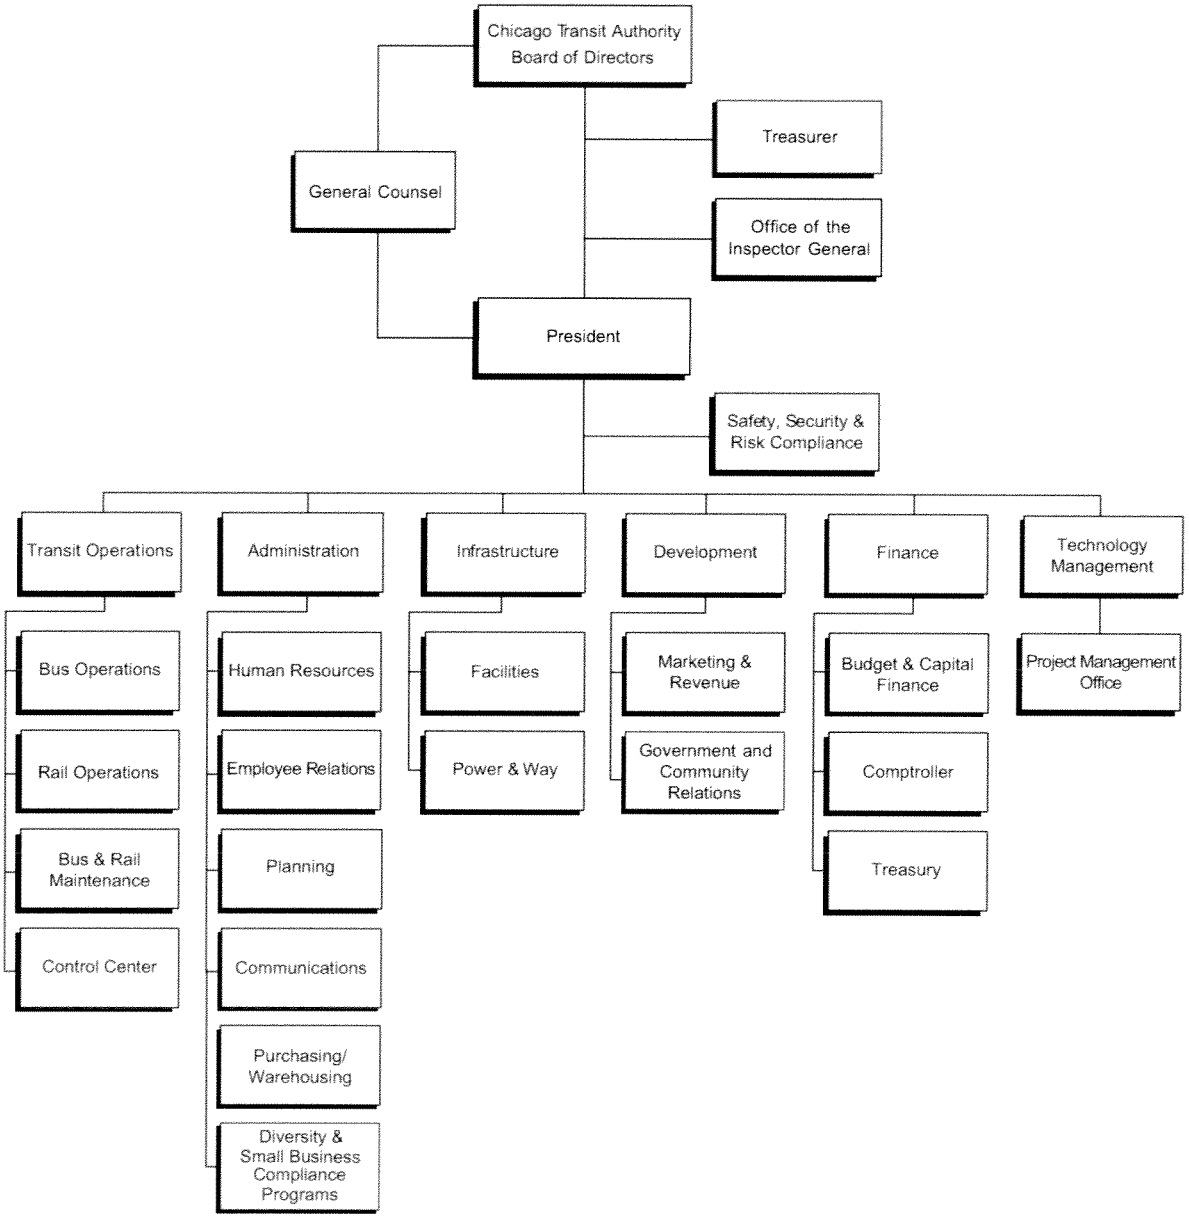

Exhibit 4-20

	CTA Monthly Performance	2010 Monthly Target	2009 Monthly Average	Jan 2010	Feb 2010	Mar 2010	Apr 2010	May 2010	Jun 2010	Jul 2010	Aug 2010	Sept 2010	Oct 2010	Nov 2010	Definition

5 Metra Operating Plan

Overview

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare collection, service levels, capital improvements, finances, passenger services, safety, and systems planning. Service is operated by private carriers under contract to Metra and by Metra directly.

Metra is governed by an eleven-member board of directors. Four of the directors are appointed by the suburban members of the Cook County Board. The chairman or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry, and Will counties each appoint one director, and the Mayor of the City of Chicago also appoints one director. The Chairman of Metra's board of directors must be one of the eleven-directors, and is appointed by the concurrence of eight directors.

In 2011, Metra will continue its efforts to contain costs by leaving positions unfilled, holding the line on cost wherever possible, reducing overtime expenses and trimming material costs. Additionally, as part of an effort to combat reduced revenues and higher expenses related to the continuing economic crisis Metra will be forced to transfer a total of $60.0 million in Federal Capital funds to the 2011 Operating Budget under Preventative Maintenance.

Service Characteristics

The Metra rail system is comprised of eleven separate lines, which run north, west, and south of the Chicago central business district. The system extends 488 route-miles to the limits of the six-county area and serves 239 local rail stations in more than 100 communities. The network itself is made up of 1,149 pieces of rolling stock, 821 bridges, more than 2,000 signals, 18 rail storage yards, and seven major maintenance facilities.

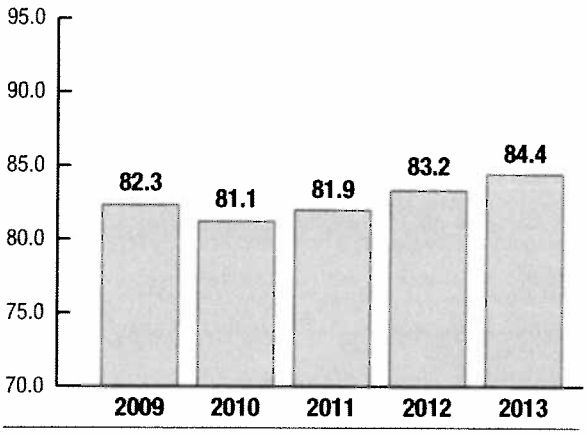
Metra's operational interface with extensive freight networks makes it one of the nation's most complex. A system of such magnitude requires continual maintenance and renewal in order to preserve operational performance, safety, and service efficiency.

Metra serves the region on routes owned by Metra or freight carriers and through the purchase of service agreements with Union Pacific and Burlington Northern Santa Fe, two of the largest freight carriers in the nation. The South Shore Line, operated by the Northern Indiana Commuter Transportation District (NICTD), is another Metra partner, providing service between Chicago and South Bend, Indiana.

Metra provides safe, reliable commuter rail service with an average weekday ridership of 307,300. Peak period ridership represents 74.8 percent of the total average weekday trips. Average scheduling speeds are 5.4 percent higher during weekday peak periods than during off-peak hours and weekend/holiday periods.

Metra's hub is located in the downtown Chicago business district. Four downtown terminals serve Metra's eleven lines. Approximately one-half of all commuter trips from the suburbs to downtown Chicago are made on Metra.

Exhibit 5-1: **Metra Ridership** (in millions) (1)



(1) Based on ticket sales. Includes free senior rides. Excludes South Shore (NICTD) service.

Exhibit 5-2: **Riders and Miles** (in millions) (1)

	2009 Actual	2010 Estimate	2011 Budget	2012 Plan	2013 Plan
Ridership (2)	82.3	81.1	81.9	83.2	84.4
Revenue Car Miles	33.7	33.2	33.1	33.2	33.1
Passenger Miles (3)	1,797.0	1,759.8	1,777.4	1,804.0	1,831.1

(1) Ridership, Revenue Car Miles, and Passenger Miles exclude South Shore (NICTD) service.
(2) Based on ticket sales. Includes free Senior rides.
(3) Based on ticket sales. Excludes Senior free rides.

Ridership

Metra's primary customer base is suburban residents who work in downtown Chicago. According to Metra's 2006 Origin-Destination Survey, 77 percent of weekday morning riders board in the suburbs and alight in downtown Chicago, and more than 90 percent of all Metra trips are for business and work purposes.

In 2009, Metra's total ridership, excluding South Shore service, totaled 82.3 million passenger trips (Exhibit 5-1), representing a 5.1 percent decrease from 2008. Metra's total ridership is projected to decline in 2010 to 81.1 million passenger trips. An increase of 3.3 million passenger trips is expected over the following three years, with an estimated total ridership of 84.4 million passenger trips in 2013. This represents a compound annual growth rate of 1.3 percent from 2010 to 2013. (Exhibit 5-2)

Over the years Metra has made concerted efforts to market off-peak and reverse commute trips. Compared to five years earlier, reverse peak travel has increased 54.6 percent, while midday and evening travel has increased 15.6 percent and 21.4 percent, respectively (Exhibit 5-3). These gains are attributable to Metra's efforts to broaden its ridership base, including the weekend ticket, enhanced off-peak service, targeted promotion of service to suburban employers, marketing travel to cultural and entertainment attractions, and Metra's Bikes on Train program. In 2011, Metra will look to improve their riders experience through the implementation of a Quiet Car Program, with a pilot program on the Rock Island Line scheduled to begin on January 10th, 2011.

Exhibit 5-3: **Average Daily Passenger Loads by Service Period** (in thousands)

	July 2005-June 2006 (1)	July 2009-June 2010 (1)	Change	% Change

Saturday	60.0	72.4	12.4	20.7
Sunday	35.0	50.2	15.2	43.4

(1) Excludes South Shore (NICTD) service.

Service Quality

Metra has identified improved service quality as one of its objectives to insuring customer satisfaction. Metra periodically conducts on-board surveys to measure various service attributes. Beyond general rider satisfaction, Metra also collects information on the service attributes that are most effective at attracting and retaining riders. This data provides direction for planning, scheduling

and marketing activities. For example, Metra's goal to provide safe, reliable, clean and on-time service is derived directly from the most important service characteristics identified through these customer surveys. In response to the changing needs of customers, Metra continuously looks for ways to expand and improve its service within financial constraints. In order to ensure customer satisfaction and efficiency Metra has implemented a number of metrics to measure efficiency and customer satisfaction.

For instance, Metra measures service reliability using on-time performance. When measuring on-time performance Metra records a delay if the train arrives at its final destination more than five minutes later than scheduled. Metra's on-time performance in 2009 was 95.7 percent (Exhibit 5-4).

Matching the supply of service to demand is another means of maintaining system efficiency. Metra measures capacity utilization train-by-train, which allows it to track daily passenger loads by service period and line in order to analyze trends. Metra monitors and reports trains with occupancy rates exceeding 95.0 percent, and uses this information to make service change decisions.

One measurement of system-wide effectiveness relates the number of passengers to the number of car miles of service, thereby calculating passengers per revenue car mile. Metra's ratio of passengers per revenue car mile is projected to increase from 2.44 in 2009 to 2.55 in 2013 (Exhibit 5-5). This 0.11 increase represents a compound annual growth rate of 1.1 percent. In the case of a new service, the number of car miles initially increases faster than the number of passengers, thereby decreasing the passenger per mile ratio. An increase in passengers per revenue car mile indicates increasingly efficient transportation practices.

Exhibit 5-4: **On-time Performance**

Year	% On-Time
2005	96.3
2006	96.3
2007	95.7
2008	95.4
2009	95.7

Exhibit 5-5: **Passengers Per Revenue Car Mile** (in millions)

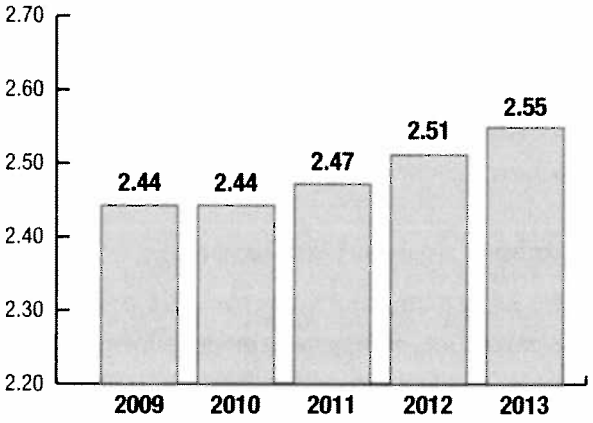

Exhibit 5-6: **Metra Cost Efficiency**

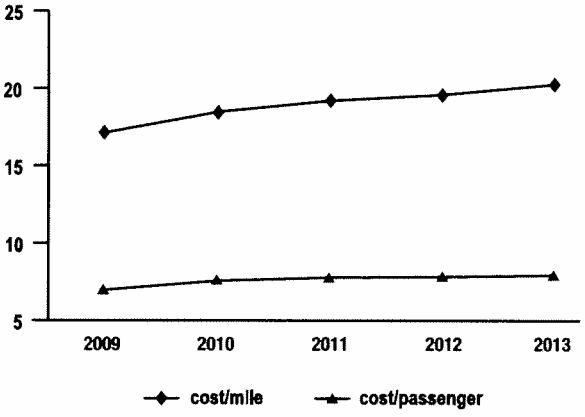

Another measurement used to evaluate whether costs are being contained and efficiency maintained is cost per revenue car mile. This measure recognizes that costs tend to vary with the amount of service provided. Metra expects that its cost per revenue car mile will increase from $17.11 in 2009 to $20.24 in 2013. This $3.29 increase represents a compound annual growth rate of 4.3 percent (Exhibit 5-6).

The cost per passenger ratio measures cost effectiveness and is designed to examine how

well vehicles are deployed to serve riders. Metra projects that its cost per passenger will increase slightly each year from 2009 to 2013. The cost per passenger ratio was $7.01 in 2009 and is projected to be $7.94 in 2013. This $0.93 increase represents a compound annual growth rate of 2.1 percent (Exhibit 5-6).

Maintenance and Modernization

Since Metra was formed in 1984, Metra has overseen a comprehensive program to improve and grow the regional commuter rail network in support of the twin objectives of core system maintenance and strategic service expansion. For the past several years Metra's budget has discussed the need for new capital funding sources.

In 2010, Metra worked with available funding to maintain the high quality of service passengers have come to know and expect. Metra has initiated the replacement of 160 Highliner cars used on the Metra Electric District with funding available from the 2010 State of Illinois Bond program. The Metra Highliner purchase will cost $585 million, and the remainder of the state capital program will be used to address a backlog of rolling stock and infrastructure projects across the region.

American Recovery and Rehabilitation Act funds (ARRA) allowed Metra to utilize $71 million toward remanufacturing its locomotives. The cost of remanufacturing a locomotive is $1.4 million compared to the $4 million cost of purchasing a new one. Metra's remanufacturing program

represents a significant costs savings program that extends the life of the equipment for 25 years. Without new sources of funding for capital in 2011 Metra riders will see reduced customer service and a decline in on time performance. Rail cars will be rehabbed less frequently and station renewal projects will be delayed. Metra is working with legislatures at the State and Federal level to insure that funding is available for the modernization and maintenance of its fleet and other assets.

Safety and Security

In an effort to provide a safe and secure environment for both customers and employees, Metra provides employee incentives to those regularly meeting safety and security goals. Key among these goals is workplace safety. A safe workplace means a safe environment for Metra passengers.

Metra's investments in staff training programs and incentive plans have resulted in substantial dividends, including higher commuter satisfaction and industry recognition. In 2010, Metra received a Bronze Harriman Award from the E.H Harriman Memorial Awards Institute for outstanding achievements in maintaining employee safety. This marks the 12th time that Metra has been so recognized for its safety record.

In 2011, Metra will continue its safety outreach programs. This year will mark the fifth year of Metra's Poster Contest, where students from throughout the region compete to create the winning designs to be displayed on Metra's

safety calendar, and distributed to over 2,000 schools. The winning design will also be displayed on Metra's monthly passes. This year's theme is "Safety First: Look, Listen and Live".

Budget And Financial Plan

The Metra budget and financial plan presented in Exhibit 5-7 meets the 2011, 2012, and 2013 funding marks and the 2011 recovery ratio mark of 55 percent set by the RTA Board. Metra was able to meet the funding level requirement set by the RTA through use of Federal Funds in the Capital Program for Preventative Maintenance in Operations. The RTA Board adopted Metra's 2011 budget and 2012-2013 financial plan on December 18, 2010.

System-Generated Revenue

Total system-generated revenue is estimated at $295.6 million in 2010, a decrease of $3.0 million from 2009. Total system-generated revenue is expected to increase to $338.2 million in 2013. The increase of $39.6 million represents a compound annual growth rate of 3.2 percent from 2010 to 2013. (Exhibits 5-7 and 5-8).

Metra's system-generated revenue has three major components: passenger revenue, reduced fare subsidy, and other revenue. In 2011,

Exhibit 5-7: **Metra 2011 Budget and 2012-2013 Financial Plan** (dollars in thousands)

	2009 Actual	2010 Estimate	2011 Budget	2012 Plan	2013 Plan

Total RTA Funding	**$309,334**	**$310,097**	**$318,146**	**$327,397**	**$337,825**
Funds Available	**$31,000**	**$22,225**	**$41,244**	**$19,297**	**$30,525**
Less Metra Capital Farebox Funds	(10,000)	(10,000)	(10,000)	(10,000)	(10,000)
Balance of Funds	**21,000**	**12,225**	**31,244**	**9,297**	**20,525**
Recovery Ratio % (1) (2)	**56.4%**	**52.7%**	**55.0%**	**55.0%**	**55.0%**

(1) Recovery ratio revenue includes credits for Senior free rides in 2008 - 2013, half year of reduced fare reimbursement not funded by the State of Illinois in 2009, and $10 million of capital farebox revenue in 2009 - 2013. Recovery ratio expenditures exclude costs related to the acquisition and use of transportation facilities, security and depreciation.

(2) In 2011 Metra's Recovery Ratio is 55 percent, meeting the mark set by the RTA.

passenger revenue of $238.9 million comprises 81.0 percent of the total revenue budget with other revenue and the reduced fare subsidy representing 18.0 percent and 1.0 percent respectively. (Exhibit 5-9)

Passenger Revenue

Passenger revenue is estimated at $238.0 in 2010, an increase of $1.9 million from 2009. Passenger revenue is expected to increase to $277.6 million by 2013. This increase of $41.5 million represents a compound annual growth rate of 4.1 percent from 2010 to 2013.

The increase in projected passenger revenues is largely due to projected ridership growth. On February 1, 2010 Metra implemented a targeted fare increase which raised one way fares 6.0 percent across all fare zones, increased the weekend fare from $5 to $7, and increased the penalty for on board ticket purchases from $2 to $3. The programs intention was to increase advanced ticket purchases of discounted 10 ride tickets and monthly tickets. (Exhibit 5-10). Metra's fare structure is presented at the end of this section (Exhibit 5-14).

Reduced Fare Subsidy

The Illinois General Assembly passed legislation in 1989 providing funds to reimburse the CTA, Metra, and Pace for the cost of providing reduced fares for the elderly, students, and persons with disabilities. The fare reimbursement is included in revenue and is contingent upon annual approval by the State. In 1999, the Assembly passed new reduced fare legislation, which doubled the reimbursement level of previous years. Metra anticipates that the state will continue to provide $3.4 million in reimbursement throughout the financial planning period.

Exhibit 5-8: **Metra System-Generated Revenue** (dollars in millions)

Link-Up	99.6	89.7	(9.9)	(9.94)
PlusBus	16.0	16.1	0.1	0.63

*Excludes South Shore (NICTD) service.

Other Revenue

The other revenue category represents 18.0 percent of Metra's total revenue for 2011. The components of this category are investment income, joint facility and lease revenue, advertising income, capital credits, and miscellaneous non fare-generated income. Other revenue is expected to increase $0.8 million from 2010 to $55.0 million in 2011. In 2013, other revenue is estimated at $57.2 million. The $1.9 million decrease between 2009 and 2013

represents a 0.8 percent compound annual rate of decline. After 2010 Metra anticipates that a moderate economic recovery will increase Other Revenues from $55.0 million in 2011 to $57.2 million in 2013.

Operating Expenditures

Total operating expenditures are estimated to increase $34.5 million from 2009 to $611.5 million in 2010. Total operating expenditures are expected to be $670.5 million in 2013. This $93.6 million increase represents an annual compound growth rate of 3.8 percent from 2009 to 2013 (Exhibit 5-11).

Metra's 2011 total operating expenditures of $634.2 million are projected to grow by $22.7 million or 3.7 percent from the 2010 estimate. In 2012 and 2013, total expenditures will increase by 2.4 percent and 3.2 percent respectively producing total expenses of $670.5 million in 2013 (Exhibit 5-7). These increases are consistent with the terms and conditions of contracts and agreements, as well as projections of market indices as applicable.

Exhibit 5-11: **Metra Operating Expenditures** (dollars in millions)

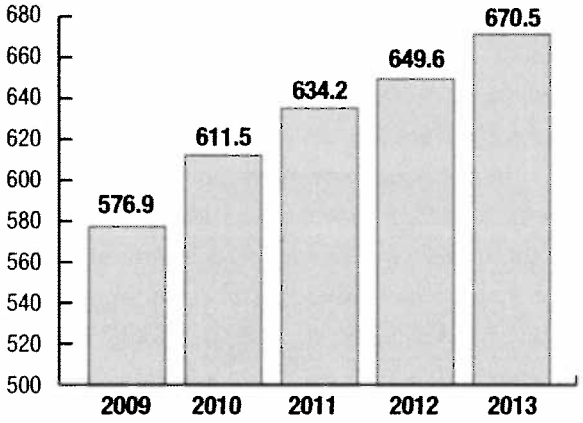

Exhibit 5-12: **Metra Operating Expenditures** - $634.2 million

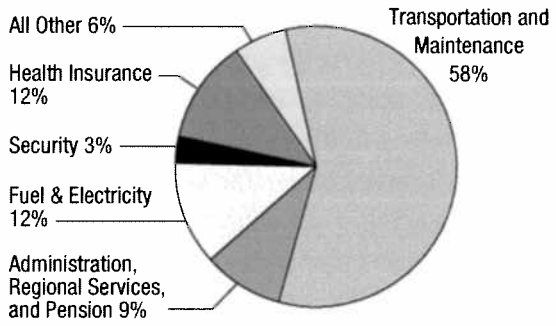

Expenditure Elements

The components of operating expenditures include transportation and maintenance, administration & regional services, pension, diesel fuel and electricity, security, health insurance and all other, which includes risk management & claims, downtown stations, credit cards, and the apprentice training program. Of total 2011 expenditures, transportation and maintenance represent 58.5 percent; administration, regional services, and pension are 9.0 percent; fuel and electricity 12.0 percent; security 2.7 percent; health insurance 11.9 percent; and all others are 5.8 percent (Exhibit 5-12).

Transportation and Maintenance

Transportation includes the functions and activities directly responsible for the operation of the commuter trains. The major functions include train and engine crew work, dispatching, tower operations, ticket sales, police and security services, employee safety, and supervisory support. The main objective of this area is to run service consistent with the published train schedules in a safe and efficient manner and in accordance with federal and state regulations.

Maintenance includes two types of activities: maintenance of way and maintenance of equipment. Maintenance of way activities include the maintenance of track, structures, communications and facilities to preserve operational safety, reduce travel times and service interruptions, and increase passenger comfort. Maintenance work is concentrated on safety inspections and short-term projects to safeguard overall track and structure conditions.

Maintenance of equipment activities include regular repairs, inspection and preventive maintenance of passenger train equipment to ensure that equipment is safe and in good working order to meet train schedules and passenger demand for seating.

Transportation and maintenance expenditures are estimated to increase $4.1 million from 2009 to $364.3 million in 2010. Transportation and maintenance expenditures are expected to reach $393.5 million in 2013. This $33.3 million increase represents a compound annual growth rate of 2.2 percent from 2009 to 2013. (Exhibit 5-7)

Administration and Regional Services

Administration activities include general support functions for the organization to ensure overall corporate goals and regulations are met. Administrative activities include human resources, labor management committee, information systems, training, accounting and other support areas. Management of Metra owned and operated rail services are also included in this category.

Metra has adopted a variety of cost-containment measures that save on administrative costs in 2011. The cost-cutting actions include, leaving positions unfilled, reducing overtime and trimming material cost whenever possible. Administration and regional services are estimated

to be $51.4 million in 2010, a decrease of $1.3 million from 2009. Administration and regional services are projected to remain almost even increasing by only $100 thousand in 2011 to $51.5 million. Then, an increase of 2.1 percent and 2.3 percent is anticipated for 2012 and 2013, respectively. For a total of $53.8 million in 2013. (Exhibit 5-7)

Pension

Metra's annual contribution to the RTA Pension Plan is determined by a third-party actuary. The pension expenditure is expected to increase 19.4% from 2009 to $5.7 million in 2010. In 2013, The pension expenditure is expected to reach $6.0 million in 2013. This $1.3 million increase represents an annual compound growth rate of 6.1 percent from 2009 to 2013.

Diesel Fuel and Electricity

Diesel fuel and electrical power are two of the most volatile components of the operating expenditures. In 2010, diesel fuel is expected to average $2.19 per gallon for a total of $54.7 million, an increase of $12.5 million or 29.6 percent from 2009. The 2011 budget based on $2.35 a gallon totals $58.8 million for the year, an increase of $4.1 million or 7.5 percent from 2010. The projected average price per gallon for diesel fuel in 2012 and 2013 are $2.33 and $2.37, respectively. In 2004 diesel fuel represented only 4.0 percent of total operating costs. In 2010, diesel fuel is estimated to represent 8.4 percent

of total operating expenses, more than double the share of 2004.

For 2011, Metra has budgeted motive power and electric utility costs to increase by $4.2 million or 5.8 percent from 2009. In 2013, combined fuel and electric power costs are projected to reach $77.6 million. This $17.1 million increase represents a compound annual growth rate of 6.4 percent from 2009 to 2013 (Exhibit 5-7)

Security

Security has become a significant concern for Metra as it seeks to safeguard riders and employees alike. This expense category includes police and contract security services as well as planning, coordination, and training with other agencies. The budget of $16.9 million in 2011 represents an increase of $0.6 million or 3.7 percent from 2010. Security expenses are budgeted to increase $0.4 million in 2012 and $0.8 million in 2013, representing a sustainable commitment to provide a secure environment to the customers and employees of Metra (Exhibit 5-7).

Health Insurance

Health insurance costs for 2011 of $75.4 million are budgeted to increase by 11.1 percent over the 2010 estimate of $67.9 million, with annual growth rates of 4.4 percent and 3.9 percent in 2012 and 2013, respectively. (Exhibit 5-7).

All Other

This expenditure category includes risk management & claims, downtown stations, credit cards, expense related to the Office of Inspector General and the Apprentice Training Program. Expenditures in this category are expected to increase from $33.7 million in 2010 to $39.7 million by 2013. This $6.0 million increase represents a compound annual growth rate of 5.6 percent (Exhibit 5-7).

Of the $6.0 million increase, risk management and claims comprise 15.0 percent rising from $14.8 million in 2010 to $15.7 million in 2013. Expenses related to Metra's Downtown stations constitute 21.7% as related expenses are anticipated to increase from $13.6 million in 2010 to $14.9 million in 2011.

On September 9, 2009 Metra inaugurated a new web site that included the acceptance of credit and debit cards for the purchase of 10-ride and monthly tickets. Expenses for credit cards are for systems and related support costs. Metra expects that credit card and related expenses will grow from $2.9 million in 2010 to $5.3 million in 2013. This $2.4 million increase represents 40.0 percent of the $6.0 million increase for all other expense from 2010 to 2013 and reflects increased expenses in response to increased customer demand for credit card transactions. In 2011, Metra has budgeted funds for an Office of Inspector General, in 2010 Metra provided $0.6 million to an outside firm to perform these duties in light of financial improprieties performed by Metra's former Executive Director. By 2013 Metra has plans to spend $1.5 million a year for this function, the $0.8 million increase represents 15.0% of the $6.0 million of all other expenses. The apprentice training program increase represents 8.3 percent of the $6.0 million increase for all other expenses, as expenses for this program are expected to increase from $1.8 million in 2010 to $2.3 million in 2013. The apprenticeship training program represents a strategic investment in human capital planning to compensate for the upcoming wave of retirement that Metra is currently facing.

Deficit

The operating deficit is calculated by subtracting total operating expenditures from total system-generated revenue. Metra's 2011 budget deficit is $336.9 million. The remaining deficit balance after a transfer of $60.0 million dollars in Federal Capital Funds to Operations is $276.9 million. This deficit is offset with statutorily allocated public funding in 2011 totaling $318.1 million to reach a balanced budget, leaving an

additional $41.2 million in Funds Available. $10.0 million of this total will be transferred to Metra's capital program (Capital farebox funds) with the balance of funds totaling $31.2 million available to pay ongoing operating costs, and continuing project commitments requiring local match and/or 100% service board funds, conditions resulting from the past three years economic downturn and state payment delays.

Funding

Public funding, available for Metra, is determined by and based on the RTA's revenue projection for the year. From the RTA, Metra receives statutorily allocated RTA Sales Tax (RTA Sales Tax-I and II) and, the Public Transportation Funds (PTF-II)

Metra funding from RTA Sales Tax-I is expected to increase from $220.7 million in 2010 to $243.5 million in 2013. RTA Sales Tax-II and PTF-II are expected to increase from $89.4 million in 2010 to $94.4 million in 2013. Metra projects that with the use of federal funds for preventative maintenance sales tax and PTF funding will exceed the amount of funds needed for operations by $22.2 million in 2010, $41.2 million in 2011, $19.3 million in 2012 and 30.5 million in 2013. As previously discussed, each year Metra will transfer $10 million of the balance remaining to its capital program with the amounts not used available to

Exhibit 5-13: **Metra 2010 Budget vs. 2010 Estimate** (dollars in thousands)

	2010 Budget (2)	2010 Estimate	Variance
System-Generated Revenue			
Passenger Revenue	$250,700	$238,000	($12,700)
Reduced Fare Subsidy	3,400	3,400	-
Investment Income	500	180	(320)
Capital Credits, Leases, etc...	56,400	54,000	(2,400)
Total Revenue	**$311,000**	**$295,580**	**($15,420)**
Operating Expenditures			
Transportation and Maintenance	$357,400	$364,300	($6,900)
Administration & Regional Services	49,400	51,400	(2,000)
Risk Mgmt. & Claims	14,900	14,800	100
Downtown Stations	14,000	13,600	400
Diesel Fuel	53,800	54,700	(900)
Security	16,700	16,300	400
Health Insurance	62,700	67,900	(5,200)

Office of Inspector General	-	600	(600)
Pension	5,700	5,652	48
Electricity	19,300	17,500	1,800
Apprentice Training Program	5,000	1,800	3,200
Total Expenditures	**603,100**	**611,452**	**($8,352)**
Operating Deficit	**$292,100**	**315,872**	**($23,772)**
Funding			
RTA Sales Tax I	$220,661	$220,661	-
RTA Sales Tax II and PTF II	89,436	89,436	-
Federal Funds	-	28,000	($28,000)
Total Funding	**$310,097**	**$338,097**	**($28,000)**
Service Board Funds Available	**$17,997**	**$22,225**	**$4,228**
Recovery Ratio % (1)	**55.0%**	**52.7%**	**-2.3%**

(1) The RTA Act requires the RTA Board to set a recovery ratio for each service board. Metra's 2010 estimate is significantly in compliance with the 55.0% mark established by the RTA.

(2) Reflects Metra's budget adopted in December 2009 by Ordinance 2009-93.

pay off pre-obligated bills or transferred to the capital program.

A more detailed description of how public funds are allocated among the service boards can be found in the Region Section of this book.

Recovery Ratio

Metra's recovery ratio equals total (system-generated) revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. In 2011 Metra's recovery ratio is 55.0 percent, matching the mark set by the RTA. The RTA Region section provides a detailed recovery ratio calculation.

Statutory Compliance

The RTA Act requires that each Service Board meet specific criteria, which are detailed in the RTA Region section, for Board approval of its budget. The Metra budget substantially meets each of these criteria.

2010 Budget Versus 2010 Estimate

Metra has estimated that their estimate will be significantly in compliance with their budget set in December 2009 at the beginning of the fiscal year. In 2010, Metra budgeted for a 55.0 percent Recovery Ratio. Due to shortfalls in revenues and unanticipated expenses during the financial year Metra estimates that its recovery ratio will be 52.7%, 2.3 points below budget. (Exhibit 5-13)

Revenue

Calendar year 2010 operating revenues are estimated at $295.6 million and are projected to be $15.4 million or 5.0 percent lower than budget. Passenger revenues are estimated to fall $12.7 million, or 5.1 percent below budget. Metra estimates that Reduced Fare Subsidy will end up even to budget by the end of the calendar year. Additionally, investment income is estimated to be 64.0 percent below budget and Capital Credits, Leases, and other revenues are estimated to be unfavorable to budget by $2.4 million or 4.3 percent.

Exhibit 5-14: **Full Fare Schedule**

	Effective Feb. 1, 2010			
Zone (1)	**One-Way (3)**	**Ten-Ride**	**Monthly**	**Weekend (2)**
A	$2.25	$18.30	$58.05	$7.00
B	$2.50	$20.00	$63.45	$7.00
C	$3.50	$28.50	$90.45	$7.00
D	$4.00	$32.30	$102.60	$7.00
E	$4.50	$36.55	$116.10	$7.00
F	$5.00	$40.40	$128.25	$7.00
G	$5.50	$43.80	$139.05	$7.00
H	$6.00	$48.05	$152.55	$7.00
I	$6.50	$51.85	$164.70	$7.00
L	$7.00	$56.10	$178.20	$7.00
K	$7.50	$56.95	$190.35	$7.00
M	$8.50	$68.45	$217.35	$7.00

(1) Fares based on traveling to/from Zone A (downtown stations).
(2) The weekend pass was raised from $5.00 to $7.00 in 2010
(3) The on-board surcharge increased from $2.00 to $3.00 in 2010.

Expenditures

Total 2010 operating expenditures are estimated at $611.5 million and are projected to be $8.4 million greater than budget resulting in an unfavorable variance of 1.4 percent.

Savings achieved in the Apprentice Training Program, Electricity, Credit Card Expenses, Security, at Downtown Stations, Risk Management & Claims, and in Pension costs, did not offset increased expenses in Transportation & Maintenance, Health Insurance, Administration & Regional Services, and Diesel Fuel.

Transportation and Maintenance expenses were unfavorable to budget by $6.9 million or 1.9 percent. Administration and Regional Services were also unfavorable to budget costing Metra $2.0 million more than budgeted or 4.0 percent. Expenses related to Risk Management and Claims were favorable to budget by $0.1 million or 0.7 percent and costs related to Downtown Stations were favorable to budget by $0.4 million or

2.9 percent favorable to what was budgeted. Diesel Fuel expenses are estimated to be $0.9 million higher than budgeted, an unfavorable variance of 1.7 percent, but security cost are expected to be 0.4 million lower than budgeted, a favorable result of 2.4 percent. Health Insurance Costs were higher than anticipated and are estimated to be 8.3 percent unfavorable to budget, a difference of $5.2 million. Credit card expenses were favorable, costing $1.3 million less than budgeted, a 31.0 percent favorable difference. Metra did not anticipate any expenses related to the Office of Inspector General when they originally created their budget in December 2009 and have incurred $0.6 million in expenses since the beginning of the year. Pension costs were very near budget with only a 0.8 percent favorable variance. Electricity costs were $1.8 million favorable or 9.3 percent, and costs associated with the Apprentice Training Program were $3.2 million less than budgeted, a 64.0 percent difference. These compensating variances resulted in an unfavorable variance in total expenses of $8.4 million, 1.4 percent unfavorable to budget.

Funding

Unfavorable results in both the revenues and expenditure categories at Metra have resulted in a net operating deficit of $315.9 million, $23.8 million unfavorable to budget. The RTA marks set at the beginning of the fiscal year allocated a total of $310.1 million to Metra. Accordingly Metra anticipated $18.0 million in funds available at the end of the year. In October of 2010, the RTA passed an ordinance that allowed Metra to transfer $28.0 million of Federal Capital Funds to Preventative Maintenance for Operations. Due to this transfer, end of the year available service board funds are estimated to be $22.2 million, $4.2 million more than budgeted.

Fare Structure

Commuter rail fares are based upon travel between designated fare zones. These zones are set at five-mile intervals beginning at each rail line's downtown Chicago station. The zone system does not apply to the South Shore fares set by the Northern Indiana Commuter Transportation District (NICTD).

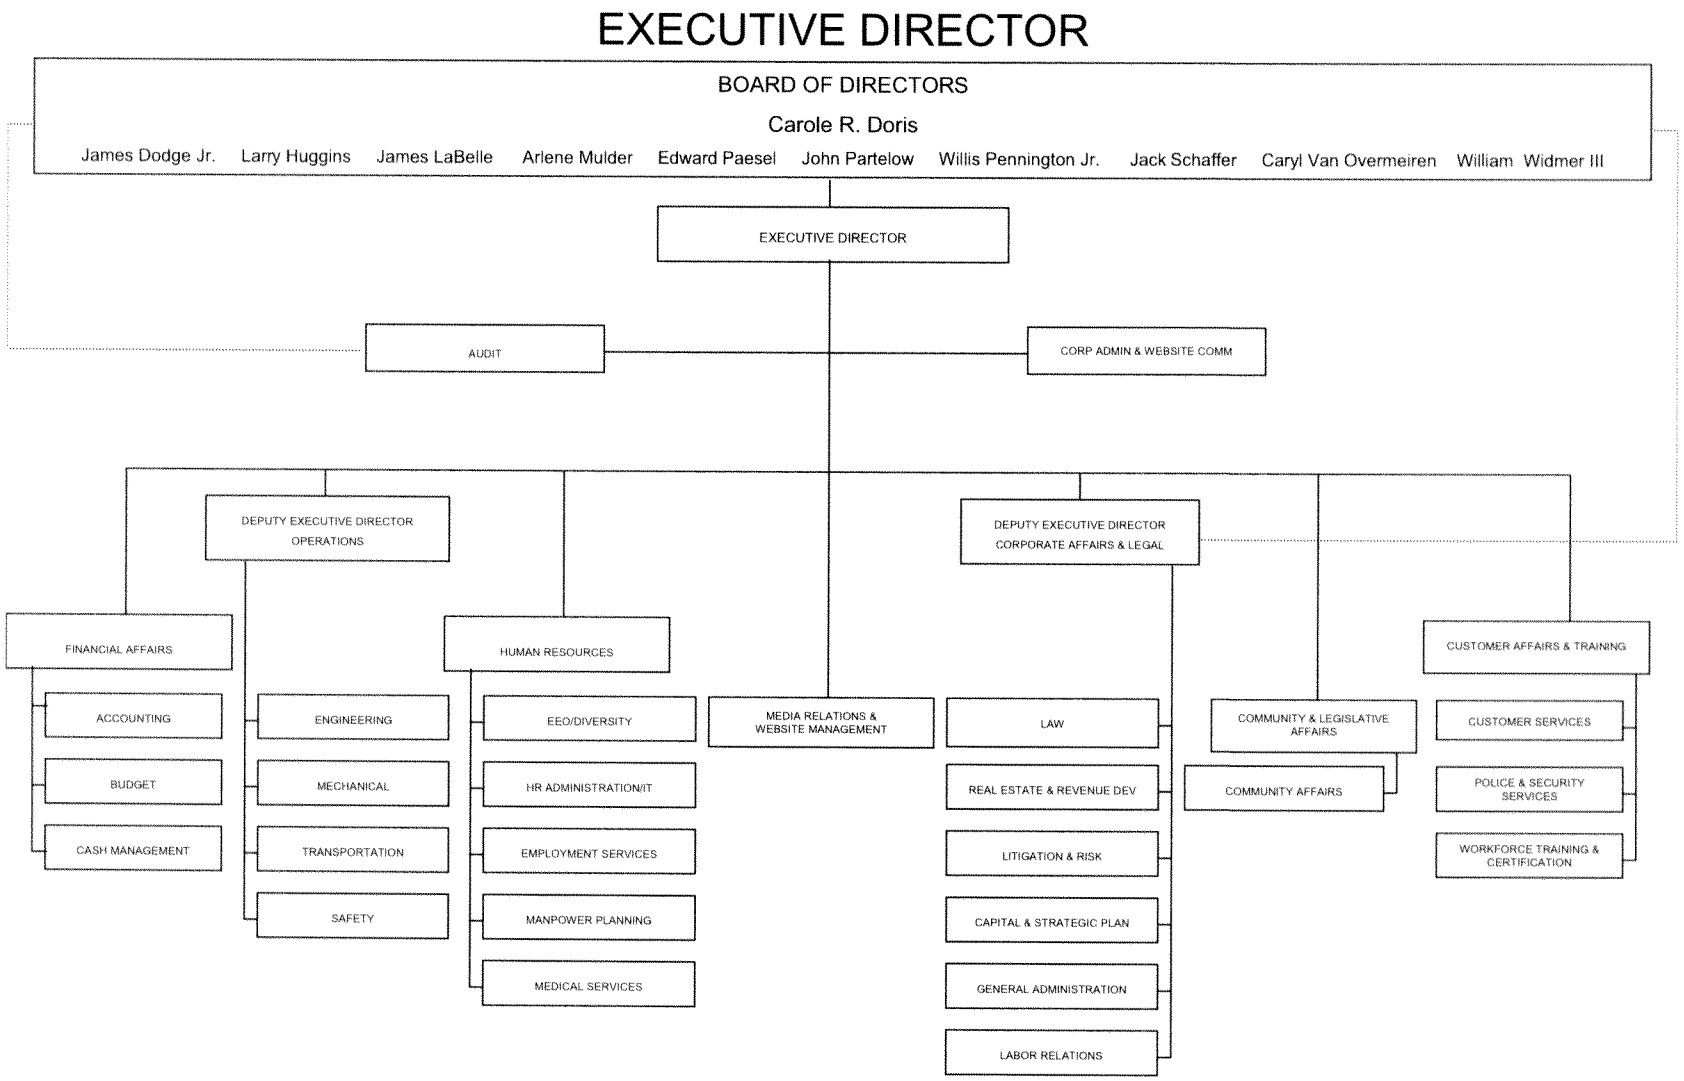
A uniform base fare is charged for travel within a zone and increments are added to this base fare as fare zone boundaries are crossed.

On February 1, 2010, Metra's increased one-way fares by $0.10 to $0.45 or about 6.0 percent (Exhibit 5-14). Despite these one-way increases, the prices of 10-ride tickets and monthly passes did not change. Accordingly, the 10-Ride ticket provides a 20 percent discount in comparison to the purchase of individual one-way fares. The cost of a weekend pass increased from $5 to $7 dollars, the first increase since the launch of this fare 18 years ago. Additionally, passengers who pay for their ticket on the train when a Metra agent is available at their boarding station pay a $3 surcharge instead of the $2 surcharge charged in 2009. These fare increases have encouraged customers to utilize Metra's multiple ticket options. In 2011 Metra does not anticipate raising fares on any of its lines.

Organizational Structure

Metra's administrative organization chart is presented in Exhibit 5-15.

Exhibit 5-15: **Metra Organization Chart**



------ Indicates a dual reporting relationship

December 3, 2009

6 Pace Operating Plan

Suburban Service

Overview

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority (RTA), and began service in 1984. A 13-member board of directors made up of current and former village presidents and mayors governs Pace.

Beginning July 1, 2006, Pace assumed operating responsibility for all ADA paratransit service in the RTA region. Pace's regional ADA paratransit service is discussed separately, later in this section.

Service Characteristics

Pace's mission is to provide efficient well-integrated transportation services that meet the travel needs of the suburban Chicago area. Effective suburban mobility comprises line-haul and community-based services that provide access between both nearby and distant origins and destinations. To attract riders in an automobile-oriented market requires coordination of infrastructure, service, information, and travel demand. To achieve this mission Pace must introduce transit options suitable for the 21st century suburban environment.

Pace covers 3,500 square miles and is the one of the largest bus services in North America. The suburban area is divided among the six counties and serves 210 communities that span walkable suburban neighborhoods, satellite cities, and rural communities. Pace service includes approximately 135 regular routes, 38 feeder routes, 16 shuttle routes, 588 van pool vehicles, and 367 paratransit and dial-a-ride buses.

In April 2002, Pace unveiled a long range comprehensive operating plan called Vision 2020 that outlines the goals and overall direction for Pace in the 21st century. The plan included "core routes," including Arterial Rapid Transit (ART) and express buses that will provide faster and more reliable service between suburban employment and residential areas, as well as high quality connections serving the suburb to city market and strengthened city to suburb job-related transportation. ART will provide premium quality, fast, frequent, and reliable service operating in mixed traffic on arterial streets with short sections of bus-only and queue by-pass lanes for congested road sections. The ART network will feature limited stops, enhanced passenger amenities, new fare payment technology, new passenger information technology, distinctive vehicles, and transit signal priority (TSP) to improve schedule adherence. The ART Feasibility Study selected six of the 24 arterial corridors identified in Vision 2020 for implementation in the next ten years: 95th Street, Dempster Street, Halsted Street, Harlem Avenue, Milwaukee Avenue, and Oak Brook/Cermak. In 2011, Pace will begin the implementation of its ART Network on Milwaukee Avenue and Dempster Street.

ART will be supported by connectors and collectors serving compact older suburban communities and newer suburban communities that comprise low density residential areas and corporate campuses. To support Pace's arterial route network as well as the local mobility of its customers, Pace is developing and implementing in selected markets community-based transit services to provide the first and last mile of a passenger trip. Pace provides a full array of community transit services: call-n-rides, flexible routes, circulators, vanpools, rideshare, municipal dial-a-rides, and shuttles. Pace will explore partnerships with existing local providers to achieve peak-hour coverage and to provide cross-boundary service in low-density areas.

Pace will enhance its partnerships with the Illinois Tollway, Metra, the RTA, and the CTA. Pace is studying corridor development, the understanding of land use patterns and market conditions, to provide congestion relief, improved regional mobility, sustainable employment access, economic development, and expanded transit

options to initiate and expanded service along the I-55, I-355, and I-90 corridors. Pace has already worked with the Tollway to develop express bus service on I-294 and expects to continue working with the Tollway as part of its managed lane program. Pace is partnering with the Southwest Conference of Mayors to study the south Harlem Corridor and plans a similar study of Cicero Avenue in 2011.

Pace will consider expanding service between remote park-and-ride facilities with improved amenities and train stations via express service on wider streets rather than meandering routes through suburban neighborhoods. Partnership with the RTA includes both collaboration on the IDOT I-55 corridor bus-on-shoulder demonstration project and applying the results of the RTA market and analysis and systems analysis work.

Pace has developed a collaborative cross-functional methodology that identifies demand in existing corridors by time of day and direction to evaluate service changes in the form of pruning underperforming route segments or time periods rather than the eliminating entire routes. This pruning process helps align legacy routes with travel demand, provide a more realistic level of service with the smallest negative impact on Pace passengers, and serves as an initial step prior to more extensive route restructuring efforts. Pace began route-restructuring initiatives in 2000 to better match service levels with demand and to improve on-time performance. To date these initiatives include Elgin, Aurora, Joliet, the North Shore, South and Southwest Cook County, and Will County. Pace is now working on initiatives in West Cook County and Lake County.

Pace's implementation of the RideShare Program in 2011 through 2013 will continue though the website www.PaceRideShare.com to match users who can share their commute by carpooling and to track the region's carpools. The website also facilitates the formation of new Pace vanpools and supports the retention of existing vanpools.

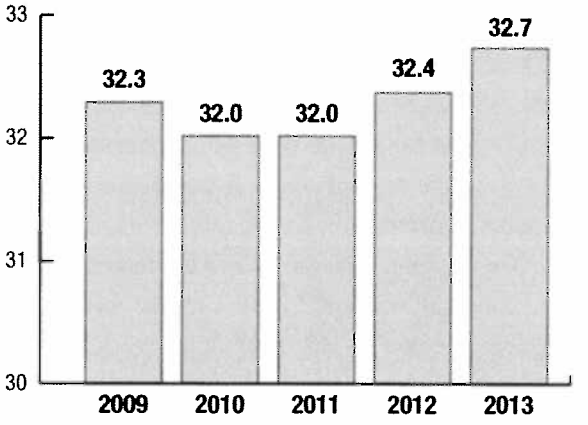
Pace's market research and analysis efforts will focus on supporting the planning and implementation of ART and express bus services. Through user and non-user surveys and analysis of market data, Pace will identify service planning opportunities that meet the needs of both commuters seeking faster and more reliable service and riders seeking local, community-based, or special-needs service. Pace's will complete its 2010 Customer Satisfaction Index (CSI) studies of fixed route, vanpool, rideshare, and paratransit service over the next two years. The objective is to evaluate service performance from the rider perspective so that transportation needs can be better met, loyalty strengthened, and ridership increased. To assist Pace in understanding demographics and travel patterns, Pace will conduct a market analysis of the Harlem corridor between Glenview and Tinley Park, studies in the West Cook and North Cook regions, and, in partnership with Lake County, an analysis of transit markets and services in that county.

Ridership

In 2009, Pace suburban service ridership was 32.3 million. Pace estimates that suburban service ridership will level off at 32.0 million in 2010 and 2011, resulting from continued high unemployment levels, the prolonged economic recession, and service reductions. Effective February 7, 2010,

Pace eliminated 15 bus routes, cut weekend service on nine, and reduced service on nine others. Pace projects suburban service ridership to increase approximately 1.1 percent annually to 32.4 million in 2012 and 32.7 million in 2013, reflecting the continued expansion of the vanpool program (Exhibit 6-1)

Exhibit 6-1: **Pace Suburban Service Ridership** (in millions)



Service Quality

As part of its effort to improve service quality, Pace has implemented a variety of performance measures. Pace provides for each performance measure the 2009 result, an estimate for 2010, a goal for 2011, and a Performance Standard. The performance measures are grouped by quality service goal: Safety, Reliability, Courtesy, Efficiency, and Effectiveness. When performance for a year exceeds the performance standard, the measurement is highlighted in green. If performance for the year falls below but within 10% of the standard, the measurement is highlighted in yellow. When performance falls below 10% of the standard, the measurement is highlighted in red. The performance measures for 2011 can be found at the end of this section (Exhibit 6-21).

Pace compares its performance to that of peer transit agencies selected by the RTA based similar service characteristics: operating in suburban areas; providing comparable amounts of service levels; and contracting with private providers for some of the service. Peer transit agencies include Long Island Bus (MTA-NY), Orange County Transportation Authority (OCTA-CA), San Mateo County Transit District SamTrans-CA), Alameda-Contra Costa Transit District (AC Transit-CA). Performance measures included operating expense per revenue hour and revenue mile (service efficiency), operating expense per passenger and passenger-mile (cost effectiveness), and passengers per revenue-hour and revenue-mile (service effectiveness), as reported by Pace and peer agencies to the Federal Transit Administration and compiled in the National Transit Database (NTD). Pace outperformed its peers in both measures of service efficiency and in operating expense per passenger-mile. Pace's operating expense per passenger ranked third lowest among its peers, while its passengers per revenue-hour was fourth highest. Pace ranked lowest in passengers per revenue-mile. Pace has a larger service area with lower population density than that of its peers.

Performance measurements and peer comparisons represent important steps toward improving service quality and increasing accountability to the public. By striving to meet or exceed performance goals and peer performance, Pace has shown that it values customer opinion and that it is working toward improved service quality.

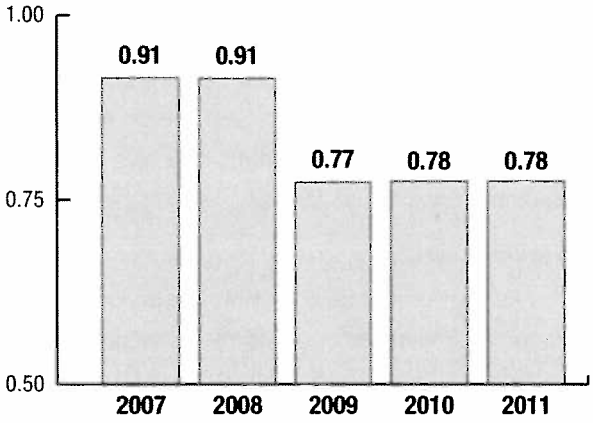
Cost Efficiency

Matching the service supply to demand is one means of achieving system effectiveness. One way to measure supply versus demand is to

relate the number of passengers to the number of miles served. Pace's passengers per mile ratio for suburban service is projected to increase from 0.77 in 2009 to 0.78 in 2010 and 2011 (Exhibit 6-2). This weak increase results from very small increases in fixed route ridership accompanied by slightly greater increases in Dial-A-Ride and Vanpool services.

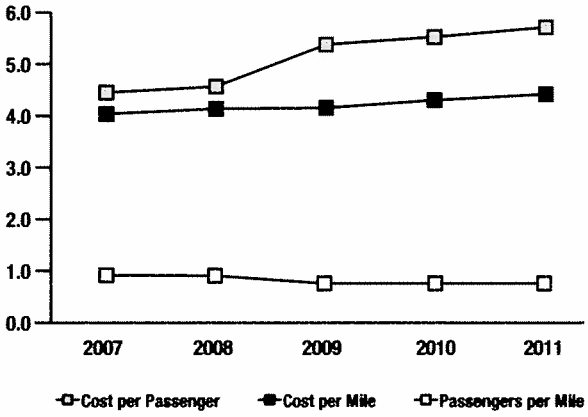
The cost per mile measurement recognizes that expenditures tend to vary with the amount of service provided (Exhibit 6-3). Suburban service cost per mile is expected to increase from $4.18 in 2009 to $4.44 in 2011. This $0.26 increase corresponds to a compound annual growth rate of 3.1 percent.

Exhibit 6-2: **Pace Suburban Service Passengers Per Mile** (1)



(1) Effective January 1, 2009, Pace no longer accepts the CTA 7-Day pass, U-Pass and Visitor/Fun passes.

Exhibit 6-3: **Pace Suburban Service Cost Efficiency**



(1) Effective January 1, 2009, Pace no longer accepts the CTA 7-Day pass, U-Pass and Visitor/Fun passes.

Capital Investment

The capital program funds the purchase and maintenance of rolling stock, support facilities and equipment (including new technologies), and project management. Nearly the entire 2011 Suburban Service capital program comprises projects needed for Pace to reach a "State of Good Repair."

Rolling Stock

In 2011, Pace intends to purchase 96 fixed route buses, of which 36 will replace buses which have exceeded their useful life and 60 will replace vehicles which have met their useful life. The latter are "Green" (hybrid electric) buses. Pace will also replace seven suburban Dial-A-Ride paratransit buses and 143 vanpool vans that have exceed their useful life. In total, these rolling stock replacements are expected to cost $61.5 million. Pace will also spend $2.0 million on bus overhaul maintenance and $5.15 million on associated capital (engines, transmissions, and other bus components assemblies), as well as $2.0 million to cover suburban service capital cost of contracting expenses.

Support Facilities & Equipment

Pace intends to spend $3.6 million on computer hardware, software, and systems, including Ride Check Plus. This software computes ridership by individual route and tracks other performance indicators. Pace will also make improvements to garages and facilities, including the HVAC at Pace South Division, renovation of Pace Heritage Division, and required site upgrades of Pace Headquarters.

Miscellaneous/Project Administration

Pace expects to receive funding to perform an alternative analysis for a "J Route" Bus Rapid Transit corridor linking Naperville, Oak Brook,

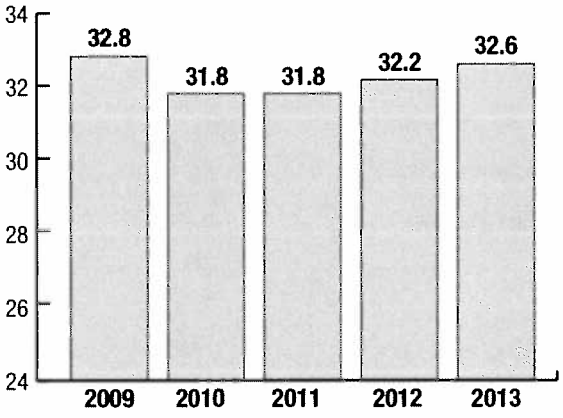
(dollar in millions)



O'Hare, and Schaumburg. Pace will also use capital funds to match existing federal grants prior to closeout and for urgent capital items not anticipated during budget preparation.

Budget and Financial Plan

The Pace suburban service budget and financial plan presented in Exhibit 6-4 meets the funding marks set by the RTA Board on September 15, 2010. Pace's 2011 budget reflects a recovery ratio of 36.0 percent for suburban service operations, meeting the mark of 36.0 percent adopted by the RTA Board on September 15, 2010.

System-Generated Revenue

In 2009, Pace's system-generated revenue from suburban service operations totaled $50.6 million. Pace projects suburban service system-generated revenue of $48.2 million in 2010, $49.8 million in 2011, $53.7 million in 2012, and $54.4 million in 2013 corresponding to a compound annual growth rate of 4.1 percent from 2010 through 2013 (Exhibit 6-5). In 2011, passenger revenue is projected to account for 63.9 percent, local share/other 27.4 percent, advertising revenue 4.7 percent, and reduced fare reimbursement 4.0 percent (Exhibit 6-6).

Passenger Revenue and Local Share

In 2009, Pace suburban service passenger revenue totaled $32.8 million. Pace expects that in 2010 suburban service will result in passenger revenue of $31.8 million. Pace projects suburban service passenger revenue of $31.8 million in 2011 will grow to $32.6 million in 2013, a $0.8 million increase corresponding to a compound annual growth rate of 1.2 percent (Exhibit 6-7). Passenger revenue includes fixed route farebox deposits (using cash, passes, and cards) and payments for Van Pool, dial-a-ride, and other services.

In 2009, Pace's local share contributions and other revenue totaled $12.6 million. Pace expects local share contributions and other revenue of

$13.1 million in 2010. Suburban service local share contributions and other revenue are projected to grow from $13.6 million in 2011 to $15.1 million in 2013, a $1.5 million increase that corresponds to a 5.4 percent compound annual growth rate.

Pace's suburban service fare structure (effective January 2009) is presented at the end of this section (Exhibit 6-10). No fare increases are scheduled for 2011. Effective January 2009, Pace raised the base fare from $1.50 to $1.75, monthly pass from $75.00 to $86.00, and Van Pool fares by 10 percent. At that time, Pace also raised the price of its other full-fare and reduced fare single-ride fares, ten-ride tickets, and passes.

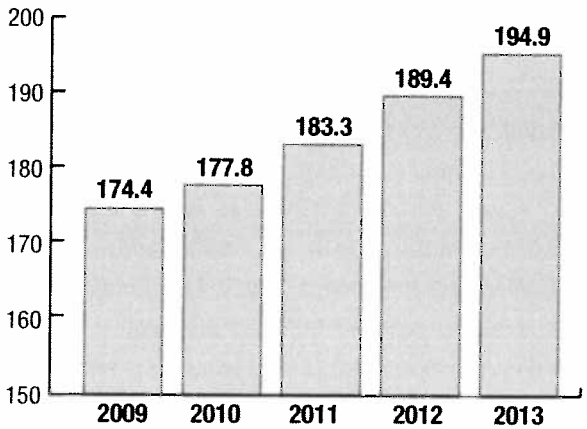
State Free Rides & Reduced Fare Reimbursement

Reimbursement from the State for free and reduced fare rides is expected to decrease from $2.4 million in 2009 to $1.3 million in 2010. The reimbursement is expected to remain at $2.0 million from 2011 through 2013.

Advertising

Advertising revenue is expected to decrease from $2.6 million in 2009 to $2.0 million in 2010. Pace projects that advertising revenue will increase from $2.3 million in 2011 to $4.5 million in 2013, a $2.2 million increase that corresponds to a 40.1 percent compound annual growth rate.

Exhibit 6-8: **Pace Suburban Service Operating Expenditures** (dollars in millions)



Investment

Investment income is expected to decrease from $0.2 million in 2009 to $0.1 million in 2010 and 2011 resulting from smaller cash balances and declining interest rates. Pace projects that investment revenue will return to $0.2 million in 2012 and 2013.

Operating Expenditures

Pace suburban service operating expenditures totaled $174.4 million in 2009. In 2010, Pace estimates suburban service operating expenditures will be $177.8 million. Pace projects suburban service operating expenditures of $183.3 million in 2011 to reach $194.9 million in 2013, an increase of $11.6 million corresponding to a compound annual growth rate of 3.1 percent from 2011 to 2013 (Exhibit 6-8). These expenditure totals include a regional ADA support credit that reflects many of the administrative and overhead costs incurred throughout Pace in support of ADA paratransit. Growth of labor/fringe benefits, health care, and fuel costs is the primary factor behind the increases in suburban service operating expenditures.

Expenditure Elements

Operating expenditure elements include labor/fringe benefits, health insurance, parts/supplies, purchased transportation, fuel, utilities, insurance/claims, other, and regional ADA support credit (Exhibit 6-4).

Labor/Fringe Benefits and Health Insurance Costs

Labor/fringe and health insurance expenditures are projected to account for 58.6 percent of total suburban service operating expenditures in 2011. Combined labor/fringe benefits and health insurance expenditures for suburban service are projected to grow from $107.4 million in 2011 to $114.7 million in 2013, a $7.3 million increase that corresponds to a 3.3 percent compound annual growth rate.

Parts/Supplies

Parts/supplies expenditures are projected to account for 1.9 percent and of total suburban service operating expenditures in 2011. These expenditures are projected to grow from $6.4 million in 2011 to $6.7 million in 2013, a $0.3 million increase that corresponds to a 2.3 percent compound annual growth rate.

Purchased Transportation

Expenditures for purchased transportation are projected to account for 13.5 percent of total suburban service operating expenditures in 2011. These expenditures are projected to grow from $24.7 million in 2011 to $26.0 million in 2013, a $1.3 million increase that corresponds to a 2.6 percent compound annual growth rate.

Fuel

In 2010, fuel expenditures are estimated to rise substantially to $15.0 million from $12.1 million in 2009, due to rising motor fuel prices. In 2011, fuel expenditures are projected to account for 8.7 percent of total suburban service expenditures. Fuel expenditures are projected to grow from $15.9 million in 2011 to $16.7 million in 2013, a $0.9 million increase that corresponds to a 2.7 percent compound annual growth rate. The 2011 budget assumes an average price of $2.18 per gallon, a $0.15 increase from estimated 2010 levels. Fuel is one of the most volatile components of Pace's budget.

Utilities

Utilities expenditures are projected to account for 1.1 percent of total suburban service operating expenditures in 2011. These expenditures are projected to remain between $2.0 million and $2.1 million through 2013.

Insurance/Claims

Insurance/claims expenditures are projected to account for 6.9 percent of total suburban service operating expenditures in 2011. These expenditures are projected to grow from $12.6 million in 2011 to $13.9 million in 2013, a $1.3 million increase that corresponds to a 5.0 percent compound annual growth rate this is consistent with national trends.

Other

Other expenditures are projected to account for 7.8 percent of total suburban service operating expenditures in 2011. These expenditures are projected to grow from $18.4 million in 2011 to $19.0 million in 2013, a $0.7 million increase corresponding to a 1.8 percent compound annual growth rate.

Regional ADA Support Credit

In 2009, Pace charged $3.6 million of administrative and overhead expenses to the regional ADA paratransit budget and expects to charge $3.9 million in 2010. Pace projects that regional ADA support credit will increase from $4.1 million in 2011 to $4.3 million in 2013.

Deficit

The operating deficits are derived from total system-generated revenue minus total operating expenditures. Pace estimates that its deficit will rise 4.7% from $123.8 million in 2009 to $129.6 million in 2010. Pace projects deficits of $133.5 million, $135.7 million, and $140.4 million in 2011, 2012, and 2013, respectively, a $6.9 million increase with a compound annual growth rate of 2.6%.

Funding

Public funding for Pace operations includes portions of the RTA Sales Tax (RTA Sales Tax-I and II) and the Public Transportation Fund (PTF-I and PTF-II), as well as federal sources.

Pace's portion of RTA Sales Tax I is expected to decrease 0.8 percent from $70.4 million in 2009 to $69.9 million in 2010. This funding is projected to increase from $72.6 million in 2011 to $77.1 million in 2013 at a compound annual growth rate of 3.0% (Exhibit 6-4). RTA Sales Tax

II & PTF II (PA95-0708) is projected to increase from $29.0 million in 2009 to $29.6 million in 2011. This funding is projected to increase from $29.6 million in 2011 to $31.5 million in 2013 at a compound annual growth rate of 3.1 percent. RTA Suburban Community Mobility Funds of approximately $18 million to $20 million are projected for 2010 through 2012. The RTA also provides South Suburban Job Access Funds in the amount of $7.5 million annually.

The RTA will provide Pace with discretionary funds at an estimated amount of $0.5 million in 2011 and $0.7 million in 2012. The RTA does not expect to provide discretionary funding for Pace in 2010 and does not plan to do so in 2013.

In addition to funds from the RTA, Pace also receives federal funds. Pace received combined Congestion Mitigation Air Quality (CMAQ), Job Access Reverse Commute (JARC), and New Freedom funds of $3.3 million in 2009 and expects to receive $2.3 million and $1.9 million in 2010 and 2011, respectively. Pace also expects to use Federal 5307 funds for operations in the amounts of $2.3 million, $2.0 million, $3.1 million, and $4.7 million from 2010 through 2013.

A more detailed description of how public funds are allocated among the service boards can be found in the Region Section of this book.

Recovery Ratio

The recovery ratio equals total (system-generated) revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments, including Advantage Program in-kind revenue and expense credit. Pace expects to achieve a recovery ratio of 36.0 percent in 2010 and to maintain this level through 2013, meeting the 36.0 percent recovery ratio mark of 36 percent set by the RTA Board on September 15, 2010.

2010 Budget Versus 2010 Estimate

Pace expects 2010 operating revenue for suburban service to finish the year $4.8 million or 9.0 percent unfavorable to budget. Passenger revenue is expected to finish the year $2.9 million or 8.4 percent below budget. High unemployment and the struggling economy have reduced ridership, while the number of free rides for seniors and people with disabilities has grown. Local share/other revenues are expected to be $1.3 million or 9.1 percent unfavorable. Financially strapped municipal governments face challenges in providing subsidies for Dial-A-Ride services. Advertising revenue is expected to finish the year $0.4 million or 16.7 percent below budget because of the economic situation, while Investment income is expected to be $0.1 million or 71.7% unfavorable because of lower than expected cash balances and continued low interest rates.

Total expenditures are expected to finish the year $4.9 million or 2.7 percent favorable to budget. Expenditures for Purchased Transportation are expected to be $3.6 million or 12.6 percent favorable because of service reductions. In February, Pace eliminated 15 bus routes, cut weekend service on nine, and reduced service on nine others. Lower than budgeted per gallon fuel prices earlier in the year and favorable fuel consumption and are expected to result in a $1.3 million or 8.0 percent favorable fuel expense. Expenditures for Insurance/Claims are expected to be $2.4 million or 24.0% unfavorable to budget because of several large claims. Expenditures for labor/fringe benefits, health insurance, parts/supplies, and utilities are each expected to be $0.5, $0.7, $0.7, and $0.2 million favorable to budget, respectively.

Pace expects a favorable funding variance of $0.4 million in 2010 primarily because of higher than budget federal CMAQ & JARC funding. This favorable funding variance combined with a favorable operating deficit of $0.1 million are

(1) Pace Suburban Service 2010 Budget approved by the RTA Board on December 17, 2009.

(2) Passenger revenue includes Fixed Route, Van Pool, Dial-A-Ride, Ride DuPage, Ride in Kane, and Other Services.

(3) Excludes Advantage Program-in-kind revenue and expense (of equal amount) that are included in Pace's recovery ratio calculation.

(4) Includes Federal CMAQ/JARC/New Freedom funds of $2.3 million.

(5) The recovery ratio calculation includes Advantage program-in-kind revenue and expense credits (of equal amount), as well as statutory and approved adjustments.

expected to result in a funding surplus of $0.5 million (Exhibit 6-9).

Statutory Compliance

Pace's proposed 2011 budget, 2012-2013 plan, and 2011 recovery ratio submitted to the RTA comply with the operations funding marks (sales tax, Public Transportation Funds, Suburban Community Mobility Funds, and South Suburban Job Access Funds provided by statute formulas, and (in 2011 and 2012) RTA discretionary funds) set by the RTA Board on September 15, 2010. These marks set the total RTA funding levels at $128.9 million in 2011, $132.6 million in 2012, and $135.8 million in 2013, and 2011 recovery ratio at 36%.

Organizational Structure

Pace is organized into four main areas: Revenue Services, Strategic Services, External Relations, and Internal Services (Exhibit 6-11). Pace's organizational structure comprises four primary elements: administration, central support, Pace-owned divisions, and regional ADA paratransit services. Within each element, employees are classified into four areas: operations, maintenance, non-vehicle maintenance and administration. These activity areas are defined by the National Transit Database reporting requirements, which apply to all public transit operators.

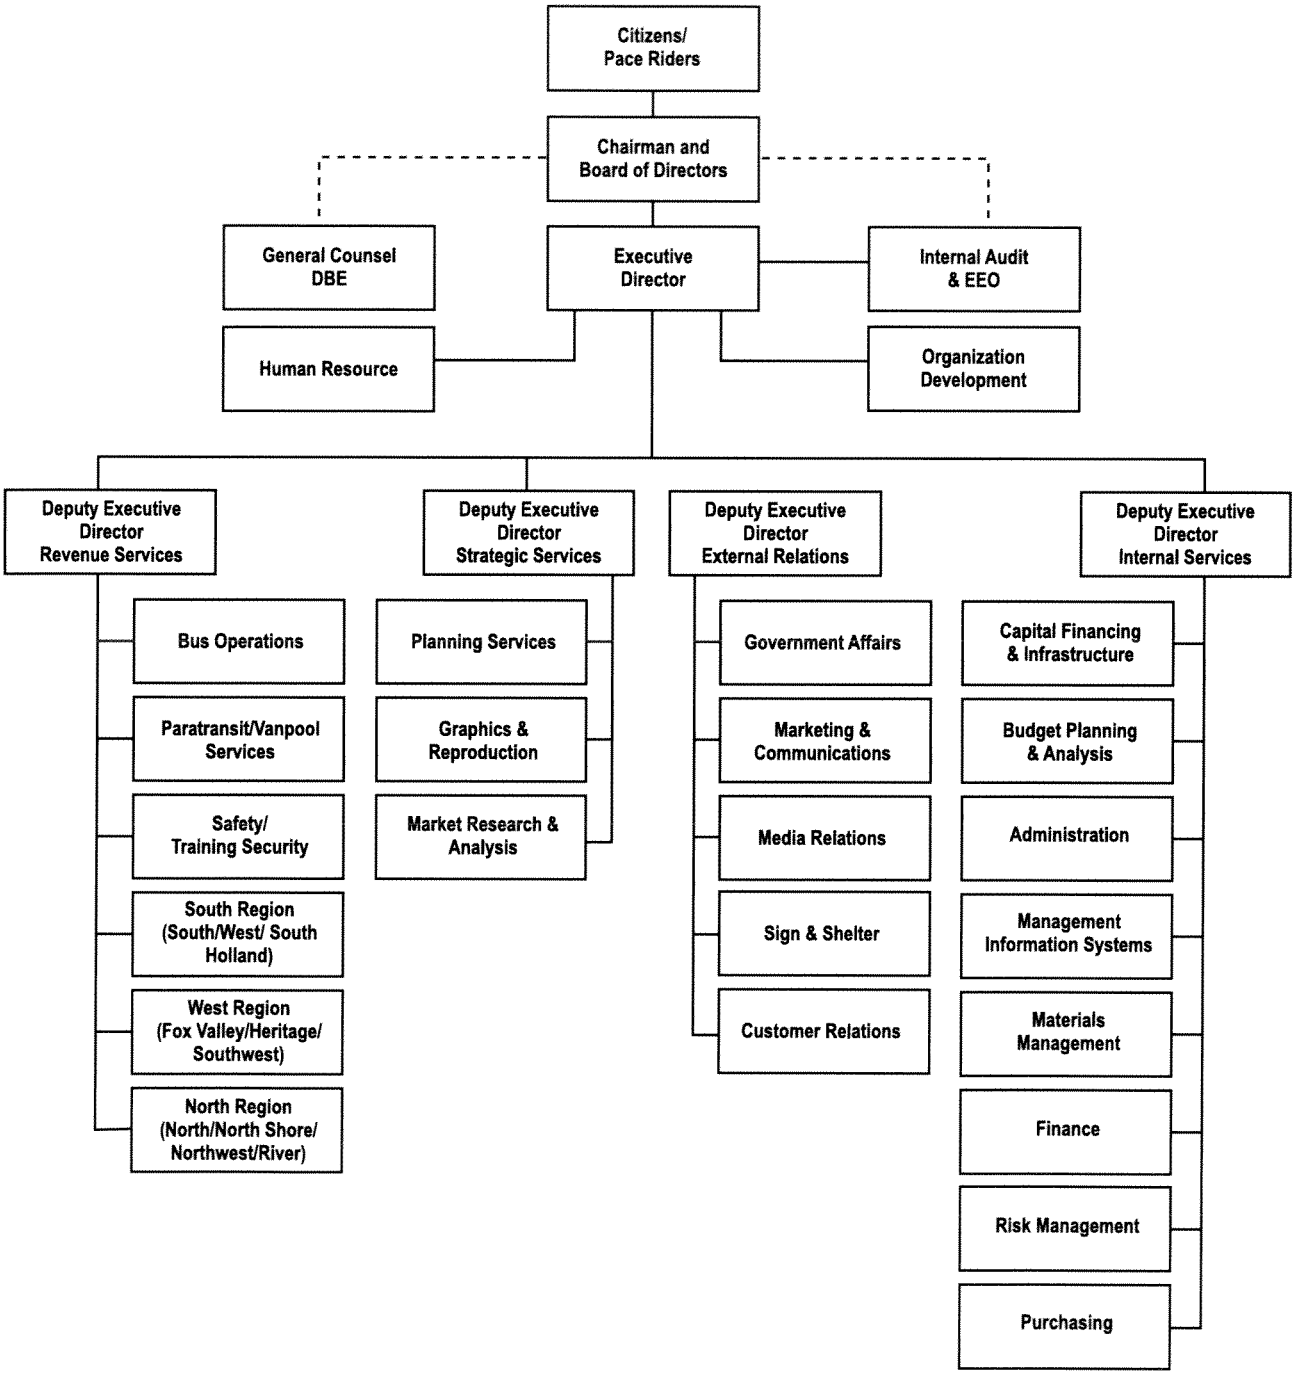
Exhibit 6-11: **Pace Organization Chart**



ADA Paratransit

Overview

Effective July 1, 2006, Pace has provided all ADA paratransit service in the RTA region.

Service Characteristics

The RTA administers a regional certification program that determines if individuals with physical or cognitive disabilities are eligible for ADA paratransit service. If eligible, passengers can arrange for travel within three quarters of a mile of Pace or CTA bus routes or CTA rail stations, as described in the Americans with Disabilities Act (ADA).

In the suburban area where Pace provides fixed route service, Pace contracts with private operators to provide ADA paratransit service. These operators drive Pace-owned lift-equipped vehicles to provide curb-to-curb service to ADA-certified passengers a month.

In the CTA service area, Pace contracts with private operators to provide ADA paratransit service in the entire city of Chicago and most of the suburbs serviced by the CTA. The operators use 566 contractor-owned vehicles to provide service to ADA-certified passengers. Pace also administers two subsidized taxi programs in the City of Chicago (the Taxi Access Program (TAP) and the Mobility Direct program) for ADA-certified passengers, although these programs are not required by the Americans with Disabilities Act.

The CTA and Pace fixed route services are described earlier in this book.

Ridership

Pace estimates that ridership will decline 1.2 percent from 2.838 million in 2009 to 2.804 million in 2010 as a result of the November 2009 fare increase (Exhibit 6-20). Pace projects that ADA paratransit ridership will increase by 2.0 percent, 3.0 percent, and 4.0 percent in 2011, 2012, and 2013, respectively, in both the CTA service area and the suburban service area (Exhibit 6-12).

Cost Efficiency

The cost per passenger measurement recognizes that expenditures tend to vary with the amount of service provided (Exhibit 6-13). Cost per passenger for Regional ADA paratransit service is projected to increase by a compound annual growth rate of 2.0 percent from $40.43 in 2009 to $43.70 in 2013. Pace projects that from 2010 to 2013 contractor costs in the CTA service area and suburban service area will grow at compound annual growth rates of 2.2 percent and 2.4 percent, respectively.

(1) This figure represents the funding described in Paragraph 7 of Ordinance 2009-74 which authorizes that the ICE funds be transferred to fund ADA paratransit operations in 2010.

(2) Actions required to balance the ADA Paratransit budget. These actions may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues, including 2011 funds from the ICE Fund (Paragraph 8 of Ordinance 2010-92). In 2012 and 2013, these actions may also include adjusting fares.

Budget And Financial Plan

The Pace ADA paratransit service budget and financial plan presented in Exhibit 6-14 meets the 2010 recovery ratio mark set by the RTA on September 15, 2010. In compliance with the RTA Act, the RTA set the ADA paratransit recovery ratio for 2010 at 10.0 percent. The RTA set the funding for ADA paratransit at $101.4 million for 2011 and set aside ICE funds that can be allocated based on Pace's certification of a funding shortfall. Funding for the following two-year planning period was set at $95.6 million for 2012 and $98.7 million for 2013. To meet these funding levels, Pace will need to implement budget/plan balancing actions that will increase revenues and/or decrease expenditures by, $9.2 million in 2010, $20.6 million in 2011, and $24.6 million in 2012.

System-Generated Revenue

In 2009, regional ADA paratransit system-generated revenue of $8.5 million comprised of passenger revenue of $7.2 million and reimbursements from the RTA for transporting paratransit applicants to assessment sites of $1.4 million (Exhibit 6-15 and Exhibit 6-16). In 2010, Pace expects regional ADA paratransit passenger revenue to increase by $1.4 million as a result of

Exhibit 6-15: **Pace ADA Paratransit Service System-Generated Revenue** (dollars in millions)

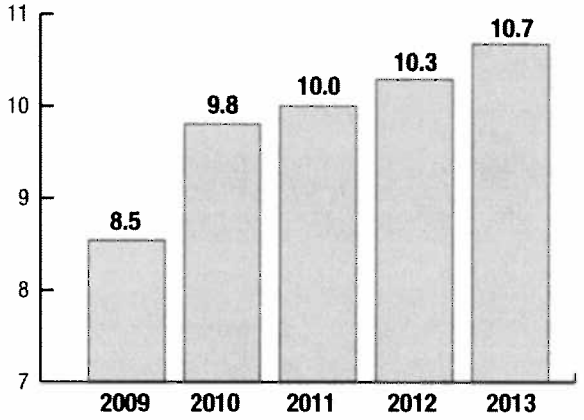

Exhibit 6-16: **Pace ADA Paratransit Farebox Revenue** (dollars in millions)

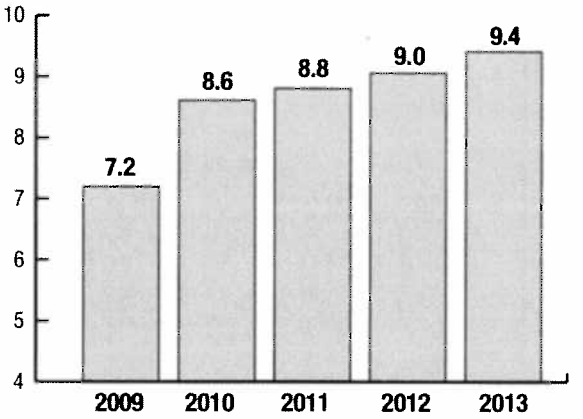
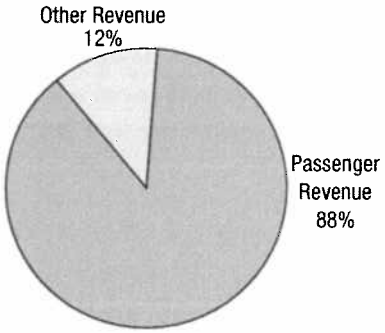


the November 2009 fare increase (Exhibit 6-20). Pace projects that passenger revenue will account for 87.8 percent of total system-generated revenue in 2011 (Exhibit 6-17). Pace projects total ADA paratransit system-generated revenue of $10.0 million in 2011, $10.3 million in 2012, and $10.7 million in 2013, corresponding to a compound annual growth rate of 3.3 percent from 2011 to 2013. These revenue figures do not incorporate required deficit reduction actions. Pace's November 2009 regional ADA paratransit fare revisions are presented at the end of this section (Exhibit 6-20).

Operating Expenditures

In 2009, regional ADA paratransit service operating expenditures totaled $114.8 million. In 2010, Pace expects total regional ADA paratransit operating expenditures to rise only 0.7 percent to $115.5 million. Pace projects total operating expenditures of $120.7 million in 2011, $126.5 million in 2012, and $133.9 million in 2013. This $19.2 million increase in operating expenditures from 2011 to 2013 represents a compound annual growth rate of 5.3 percent. Growth in purchased transportation costs, which accounts for approximately 90 percent of total expenses, is the primary factor behind these increases in operating expenditures (Exhibit 6-18).

Exhibit 6-17: **2011 Pace ADA Paratransit Revenue**–$10.0 million



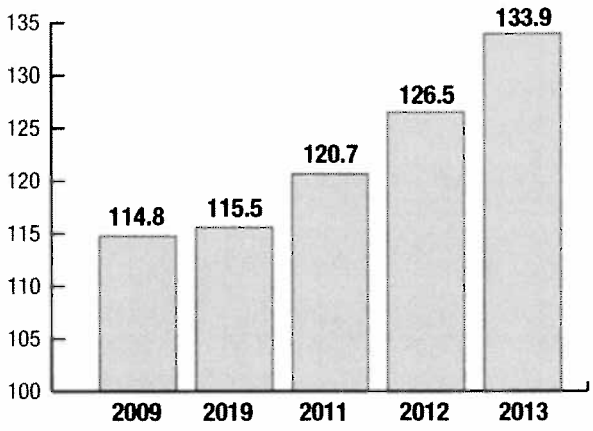
Expenditure Elements

Operating expenditure elements include labor/fringe benefits, health insurance, administrative expense, fuel, liability insurance, RTA certification, purchased transportation, and regional ADA support allocation (Exhibit 6-14). Figures for individual expenditure elements do not incorporate required budget/plan balancing actions in 2011 through 2013.

Labor/Fringe Benefits and Health Insurance Costs

Combined labor/fringe benefits and health insurance expenditures of $3.0 million are expected to account for 2.5 percent of regional ADA paratransit service operating expenditures in 2011. Labor/fringe expenses of $2.5 million

Exhibit 6-18: **Pace Total Operating Expenditures**
(dollars in millions)



in 2011 are projected to increase at a compound annual growth rate of 1.9% from 2011 to 2013. Health insurance expenditures of $0.5 million in 2011 are projected to increase at a 9.1 percent compound annual growth rate from 2011 to 2013.

Administration

Pace leases its operations center for ADA paratransit services in Metra's downtown Chicago headquarters at 547 W. Jackson Blvd. Administration expenditures of $2.3 million are projected to account for 1.9 percent of regional ADA paratransit service operating expenditures in 2011. Administrative expenditures in 2011 are projected to grow 6.4% over 2010 estimated results followed by increases of 1.2% and 1.1% in 2012 and 2013, respectively.

Fuel

Pace purchases fuel for the private operators who provide ADA paratransit service using Pace-owned vehicles in Pace's suburban service area. Fuel expenditures of $2.0 million are projected to account for 1.6 percent of regional ADA paratransit service operating expenditures in 2011. Fuel expenditures are expected to increase 23.9% in 2010, followed by increases of 6.6%, 4.9%, and 0.5% in subsequent years.

Liability Insurance

Liability insurance expenditures of $0.5 million are projected to account for 0.4 percent of regional ADA paratransit service operating expenditures in 2011. Liability insurance expenditures are projected to increase 4.6% in 2012 and 2013.

RTA Certification

RTA certification expenditures comprise the cost of transporting applicants for ADA certification to and from assessment centers. These expenditures of $1.2 million are projected to account for 1.0 percent of regional ADA paratransit service operating expenditures in 2011. RTA certification expenditures are projected to increase 2.0% in 2011 and 2012.

Purchased Transportation

Purchased transportation expenditures are projected to account for 89.1 percent of regional ADA paratransit service operating expenditures in 2011. These expenditures are projected to increase from $107.5 million in 2011 to $120.2 million in 2013, a $12.6 million increase that corresponds to a 5.7 percent compound annual

growth rate. Pace assumes that demand for both suburban and CTA service area ADA paratransit service will increase 2.0 percent in 2011, 3.0 percent in 2012 and 4.0 percent in 2013. Pace projects that from 2010 to 2013 contractor costs in the CTA service area and suburban service area will grow at compound annual growth rates of 2.2 percent and 2.4 percent, respectively.

Regional ADA Support Allocation

In 2009 Pace charged $3.6 million of administrative and overhead expenses to the regional ADA paratransit budget and expects to charge $3.9million in 2010. Pace projects that this amount will increase from $4.1 million in 2011 to $4.3 million in 2013 at a 1.9 percent compound annual growth rate.

Deficit and Funding

The operating deficits are derived from total system-generated revenue minus total operating expenditures. In 2008, Illinois Public Act 95-0708 allocated to the funding of ADA paratransit service $100 million of the revenue from the increase in the RTA sales tax rate and the increase in the portion of RTA tax revenues matched by the State Public Transfer Fund (PTF). According to the legislation, this amount will vary in future years in proportion to annual RTA sales tax collections, and funding not required for the current year deficit will be applied to regional ADA paratransit operating deficits in future years. In 2009, only $91.0 million was allocated to ADA paratransit because of the decline in sales tax revenues from 2008. In addition, $4.1 million of ICE funds, $2.1 million of RTA discretionary funds, and $9.0 million of federal funds were used to fund ADA paratransit in 2009. Based on the projections of sales tax collections in 2010, 2011, 2012, and 2013, the ADA paratransit allocations are $90.3 million, $92.9 million, and $95.6 million, and $98.7 million, respectively. In 2010, $6.9 million of RTA ICE funds are expected to fund ADA paratransit. In 2010 and 2011, additional State funding of 8.5 million per year has also been allocated for ADA paratransit operations.

The ADA paratransit funding requirement is projected to rise from $110.7 million in 2011 to $123.2 million in 2013, an increase of $12.6 million corresponding to a compound annual growth rate of 5.5 percent. In 2010, the funding level is projected to match the corresponding operating deficit without balancing actions. However, in 2011, 2012, and 2013 budget/plan balancing actions of $9.4 million, $20.6 million, and $24.6 million are assumed.

Recovery Ratio

The recovery ratio equals total system-generated revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. The RTA Act requires that regional ADA paratransit service meet a recovery ratio of 10 percent. In 2009 through 2013, Pace's projected recovery ratio for regional ADA paratransit service is 10 percent. These recovery ratios are reached by exempting from the recovery ratio calculation a portion of costs incurred in paying ADA paratransit contractors for their capital expenses.

2010 Budget Versus 2010 Estimate

Pace expects that 2010 regional ADA paratransit service operating revenue will be on par with the budget. Greater than budget Other revenue is expected to compensate for a shortfall in passenger revenue. (Exhibit 6-19)

Total expenditures for 2010 are expected to be favorable to budget even after taking into account the balancing actions of $5.6 million assumed in the 2010 budget. Expenditures for purchased transportation are expected to be favorable to budget by $8.3 million (7.5 percent) as a result of reduced ridership. Health insurance, Fuel, Insurance, and Other expenditures are expected to be unfavorable by $0.1 million (32.6 percent), $0.2

Exhibit 6-19: **Pace Regional ADA Paratransit Service 2010 Budget vs. 2010 Estimate** (dollars in thousands)

	2010 Budget	2010 Estimate	Variance
System Generated Revenue			
Passenger Revenue	$ 9,095	$ 8,601	$ (494)
Other Revenue	661	1,197	536
Total Revenue	**$ 9,756**	**$ 9,798**	**$ 42**
Operating Expenditures			
Labor/Fringes	$ 2,500	$ 2,486	$ 14

Additonal State Funding	8,500	8,500	-
Total Deficit Funding	**$ 107,500**	**$ 105,726**	**$ (1,774)**
Recovery Ratio	*10.0%*	*10.0%*	-

(1) Actions required to balance the ADA Paratransit budget. These actions may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues.

(2) This figure represents the funding described in Paragraph 7 of Ordinance 2009-74 which authorizes that the ICE funds be transferred to fund ADA paratransit operations.

million (9.1 percent), $0.1 million (24.9 percent), and $0.7 million (26.1 percent).

Total funding for 2009 is expected to be $1.8 million (1.7 percent) less than budget, reducing the contribution of RTA ICE funds. Funding from RTA sales tax II and PTF II, and State Funding are expected to match budget.

Statutory Compliance

Pace's 2011 budget and 2012 and 2013 plans meet the regional ADA paratransit operating funding marks (sales tax, Public Transportation Funds, and, in 2011, Additional State funding) set by the RTA Board on September 16, 2010. These marks set the total level of RTA funding at $110.6 million in 2011, $116.2 million in 2012 and $123.2 million in 2013. However, in each year funding the deficit requires budget balancing actions, which may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues. In 2011, budget balancing actions may include an allocation of the ICE Fund pursuant to paragraph 8 of RTA Ordinance 2010-92. In 2012 and 2013, budget balancing actions may also include adjusting fares. Pace's ADA paratransit projected recovery ratio of 10.0 percent in 2011 complies with the recovery ratio marks set by the RTA Board on September 16, 2010.

Exhibit 6-20: **Fare Structure**

	2009 Fare	Current Fare (1)

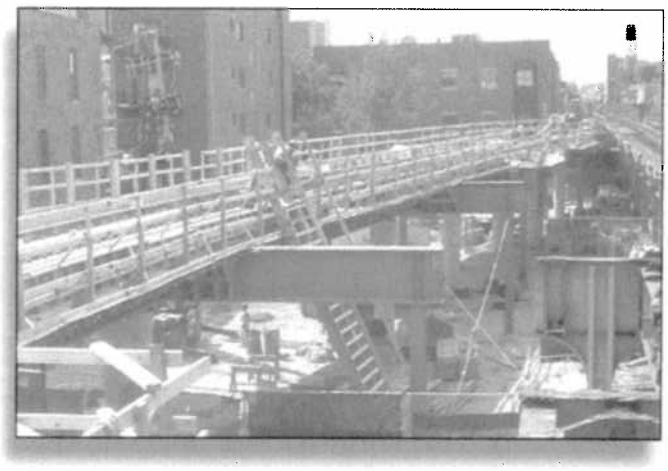
7 Capital Program



Regional Overview

The RTA Act requires that the capital expenditures of the CTA, Metra and Pace be subjected to continuing review so that the RTA may budget and expend funds available to the region with maximum efficiency. The RTA Board must adopt a five-year capital program every year. The RTA's five-year capital program describes the nature, location, and budget by project and by fiscal year of all anticipated Service Board capital improvements. Public hearings are held in each county in the northeastern Illinois region to inform the public and government officials of the RTA's capital development plans.

The RTA emphasizes the need to preserve and enhance the RTA system's valuable infrastructure. This includes bringing the system's $42.1 billion in assets to a state of good repair and extending or expanding service when demand is justified and funding available. This translates into a need of over $1.4 billion per year just to maintain and preserve the existing system.

Source of Funds

On September 15, 2010, the RTA adopted preliminary capital funding marks for 2011-2015. Since then, the RTA received proposals for funds controlled by the Service Boards, then adopted the budget on December 16, 2010. The funding sources for the RTA capital program include the U.S. Department of Transportation's Federal Transit Administration (FTA), the Illinois Department of Transportation (IDOT), the RTA, and the Service Boards. Of the estimated $4,355 million of new funding sources for 2011-2015, State funds account for $2,312 million or 53 percent, federal funding accounts for $1,385 million or 32 percent, CTA bond proceeds account for $430 million or 10 percent,

Exhibit 7-1: **RTA 2011-2015 Capital Program Marks** (dollars in millions)

Service Board Capital Funding	**CTA**	**Metra**	**Pace**	**Pace ADA**	**Total**

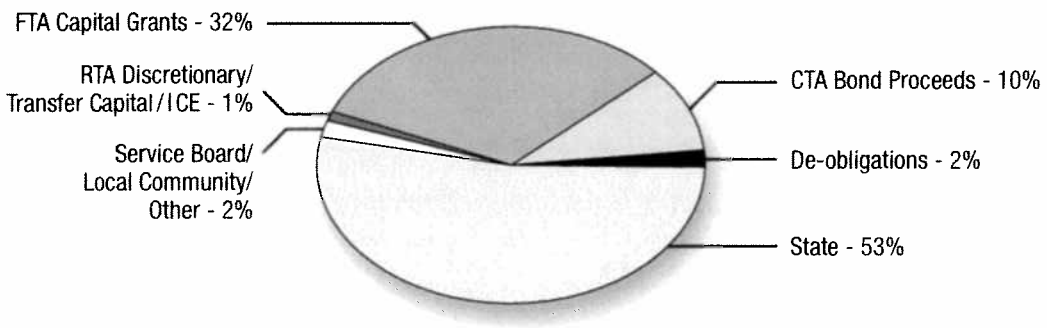
CTA Bond Proceeds	430	-	-	-	430
Total Service Board Available	**2,243**	**1,747**	**333**	**32**	**4,355**

Exhibit 7-2: **RTA 2011-2015 Capital Program Marks** - $4,355 million



Service Board and other funds account for $97 million or 2 percent, de-obligations from 2010 account for $77 million or 2 percent and RTA funds account for $53 million or 1 percent (Exhibits 7-1 and 7-2).

The total estimated capital funds available for capital projects in 2011 are $859.2 million. This amount reflects a $250.6 million transfer of federal funds to operations for CTA, Metra and Pace and $67.2 million transfer of federal funds for CTA debt repayment. At this time, the final federal appropriation figures for 2011 have not been determined. Once this amount has been established, the capital program will be adjusted to reflect the available funding. Of the estimated $859.2 million of new funding sources for 2011, State funds account for $574.5 million or 67 percent, federal funding accounts for $125.5 million or 15 percent, de-obligations from 2010 account for $77.2 million or 9 percent, RTA funds account for $53.1 million or 6 percent and Service Board and other funds account for $28.9 million or 3 percent (Exhibits 7-3 and 7-4).

Despite the challenging economic times, critical progress was made in 2010 on our capital investment needs.

The State of Illinois actually approved two measures – a "jump start" capital plan in April 2009 and a full Five-Year Capital Plan in May 2009. Combined, these two programs provided the RTA system with $2.7 billion in capital funds. Encouraged by the release of State Bond funds in 2010, the balance of the full $2.7 billion State Bond program is distributed equally over the next four years from 2011 to 2014. These funds will allow us to reduce the capital maintenance backlog that and replace aging trains, buses, track, stations and other infrastructure to improve the reliability of the system.

Exhibit 7-3: **Capital Funding in 2011** (dollars in thousands)

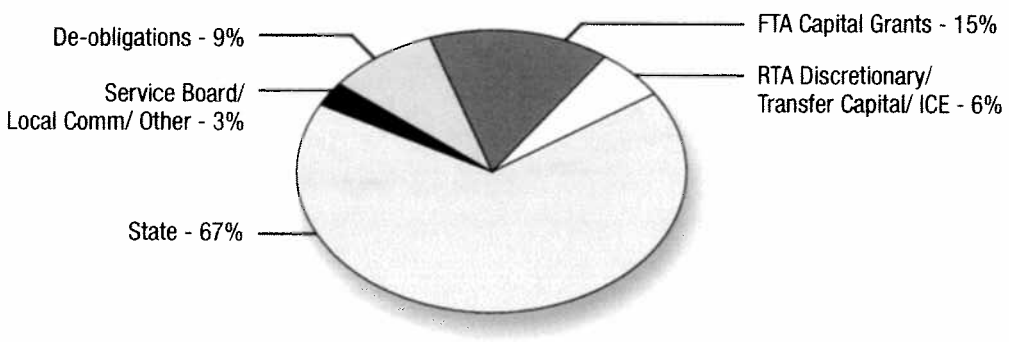
Exhibit 7-4: **Capital Funding in 2011** - $859.2 million



On July 21, 2010, Governor Pat Quinn announced the State's intention to award more than $500 million of the Illinois Jobs Now funds towards mass transit infrastructure statewide. This funding included $442.7 million for the RTA for capital projects to be implemented by the CTA, Metra and Pace and is included in the 2010 Capital Program.

Use of Funds

The primary emphasis of the 2011 Capital Program is to continue efforts to bring the system's assets to a state of good repair. When replacing worn out items, it is imperative to utilize modern technologies that often result in improved functionalities of equipment, facilities and rolling stock. In addition, a balanced capital program is responsive to customer needs and shifting markets by including investment in system expansion. For the 2011 Capital Program, 97 percent of the budget is allocated to capital projects that maintain the existing infrastructure. While the current funding level does not satisfy all needs, an appropriate balance of investment is achieved in light of the current condition of the RTA system.

Investments in the capital program can also be broken down by various asset categories. Exhibits 7-5 and 7-6 show that $2.2 billion or 53 percent of the program is spent on rolling stock and $820 million or 19 percent for track and structure which are considered to have the greatest direct impact on transit users. Substantial investment in other infrastructure is also critical to maintaining safe, reliable transportation services.

CTA Overview

The proposed projects in the CTA's portion of the 2011-2015 Capital Program total $2.2 billion. The CTA's portion of the Capital Program continues the rehabilitation and replacement of their capital assets. The percentage for the general categories of capital improvements of the total program are: 56 percent for rolling stock,

Exhibit 7-5: **2011-2015 Capital Program Uses** (dollars in millions)

Asset Category	CTA	Metra	Pace	Pace ADA	Total

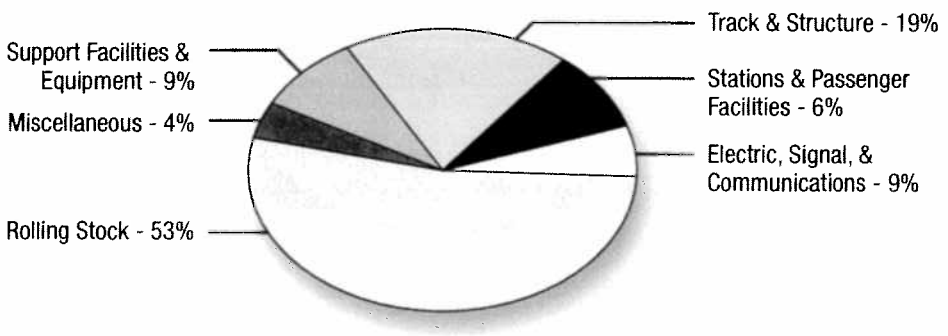
Exhibit 7-6: **2011-2015 Capital Program Uses** - $4,355 million

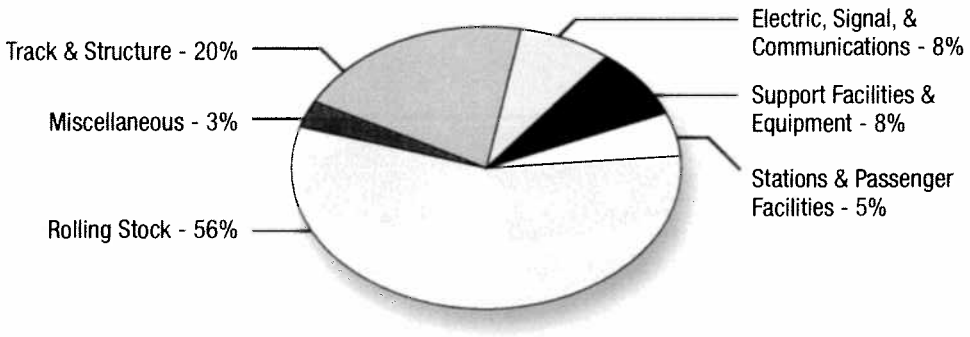


20 percent for track and structure, 8 percent for electric, signal and communications, 8 percent for support facilities and equipment, 5 percent for stations and passenger facilities and 3 percent for miscellaneous. The general categories of capital improvements comprising the CTA's portion of the Capital Program are illustrated in Exhibit 7-7.

Highlights of projects included in the CTA's proposed 2011-2015 Capital Program:

- $464 million for the repair of track and structure
- $430 million for the purchase of 300 rail cars
- $320 million for the purchase of a minimum of 150 buses
- $246.3 million for the rehabilitation and overhaul of rail cars
- $190 million for the rehabilitation and overhaul of buses
- $172.4 million for the improvement of facilities
- $104.8 million for the rehabilitation of rail stations
- $103.1 million to complete the purchase of 406 rail cars

Exhibit 7-7: **CTA Five-Year Assets by Category** - $2.2 billion



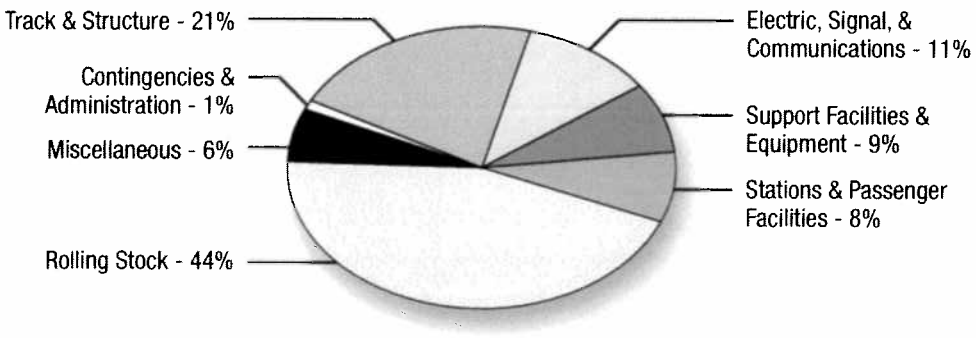
Metra Overview

Metra's portion of the proposed 2011-2015 Capital Program totals $1.7 billion. During this five-year period, Metra will continue to renew its extensive commuter rail infrastructure and replace aging rolling stock. The percentage for the general categories of capital improvements of the total program are: 44 percent for rolling stock, 21 percent for track and structure, 11 percent for electric, signal, and communications, 9 percent for support facilities and equipment, 8 percent for stations and passenger facilities and 7 percent for miscellaneous, contingencies and administration. The general categories of capital improvements comprising Metra's portion of the Capital Program are illustrated in Exhibit 7-8.

Highlights of projects included in Metra's proposed 2011-2015 Capital Program are:

- $466.3 million to purchase 160 bi-level cars for the Electric District
- $230.6 million for bridge rehabilitation and renewal
- $191.3 million for the rehabilitation of commuter rail cars
- $122.8 million for the construction and renewal of yards, shops and facilities
- $121.1 million for station rehabilitation and improvement
- $102 million for the installation of Positive Train Control (PTC) system
- $66.9 million for the rehabilitation and improvement of locomotives

Exhibit 7-8: **Metra Five-Year Assets by Category** - $1.7 billion



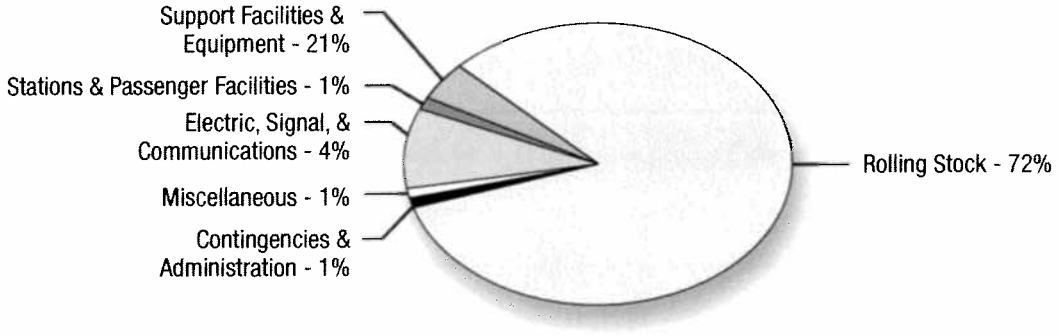
Pace Overview

Pace's portion of the proposed 2011-2015 Capital Program totals $333.5 million. A majority of the funding is provided for the replacement of rolling stock. The percentage for the general categories of capital improvements of the total program are: 72 percent for rolling stock, 4 percent for electric, signal and communications, 21 percent for support facilities and equipment, 1 percent for stations and passenger facilities and 2 percent for miscellaneous, contingencies and administration. The general categories of capital improvements comprising Pace's portion of the Capital Program are illustrated in Exhibit 7-9.

Highlights of projects included in Pace's proposed 2011-2015 Capital Program are:

- $158.8 million for the purchase of 284 fixed route buses
- $31.6 million for improvements to garages and facilities
- $27.9 million for the purchase of vans and community vehicles
- $20 million for the purchase of a replacement farebox system
- $19.2 million for the purchase of 238 paratransit vehicles
- $16 million for the purchase of computer hardware and software systems
- $10 million for bus overhaul

Exhibit 7-9: **Pace Five-Year Assets by Category** - $333 million



Pace ADA Overview

Pace ADA's portion of the proposed 2011-2015 Capital Program totals $31.7 million. All of the funding is provided for the purchase of 276 Paratransit vehicles.

Exhibit 7-10: **CTA Five-Year Capital Program** (dollars in thousands)

Capital Impact on Operations

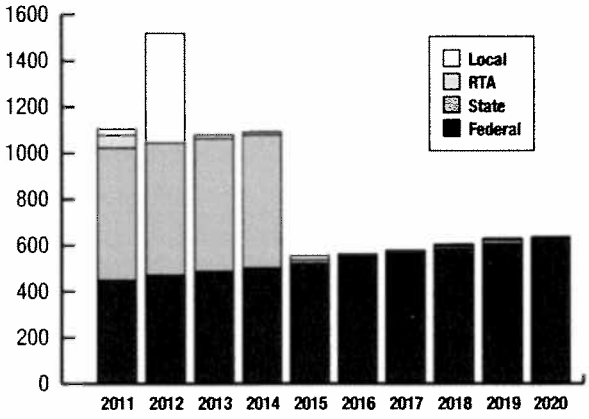
As part of its oversight function the RTA is charged with providing assessments of the Service Board's Capital Projects and Plans as well as an assessment of the condition of the Service Board's Capital Assets. Pursuant to Ordinance 2009-92 the RTA, after consultation with the Service Boards must annually prepare and adopt a Five-Year Capital Program that includes each capital improvement undertaken by or on behalf of a Service Board. In addition, to the Five Year Plan, PA 95-0708 established the need for the development of a Ten Year Capital Plan.

The estimated value of transit capital assets in Northeastern Illinois is $42.1 billion. With an average useful life of 25 years, over $1.4 billion in constant dollars should be spent annually just to maintain the system in a state of good repair. Between 2011 and 2020 when inflation is considered, the total costs of maintaining the regions system in a state of good repair will be $18.7 billion. Currently, $8.3 billion has been budgeted to Capital Programs for the 2011-2020 Ten Year Plan. $1.4 billion of Capital funds have already been committed to debt service for bonds issued by the CTA, and $398.1 million is programmed to be transferred out for operating expenses between 2011 and 2015. The current Ten-Year Capital Program leaves approximately $6.4 billion in funds available for the 2011-2020 period, 34.5 percent of the total replacement need.

Capital Funds Available for Ten Year Plan

As Exhibit 7-10 indicates there are four sources of funding that are dedicated to capital program expenditures in the region, Federal, State, RTA and Local. In the RTA's Ten Year plan $443.2 million in Federal Capital Grants are expected to be made available to the RTA in 2011. By 2020 Federal Capital Grants are planned to increase to $623.8 million a compound annual growth rate of 3.5 percent, reflecting long term historic trends.

Exhibit 7-11: **Capital Program Funds Available** (in millions)



State funding includes the $2.3 billion available in the State's bond program, appropriated in 2009 and allocated through 2014. An additional $112.5 million of State funds are allocated through the ten year planning period via Illinois Department of Transportation (IDOT). RTA funds include discretionary bonds issued by the agency totaling $53.1 million in 2011. Local funds total $566.8 between the years 2011 and 2020. $136.8 million of local funds consists of Service Board money that Metra allocates to Capital Programs from farebox revenues each year, capital funding provided to the region from local communities and additional funds by the other service boards. In 2012, the CTA will issue a $430.0 million dollar bond of which the proceeds will be used for the purchase of new 5000 series rail-cars.

Exhibit 7-12: **Capital Funding vs. Annual Replacement Needs** (in millions)

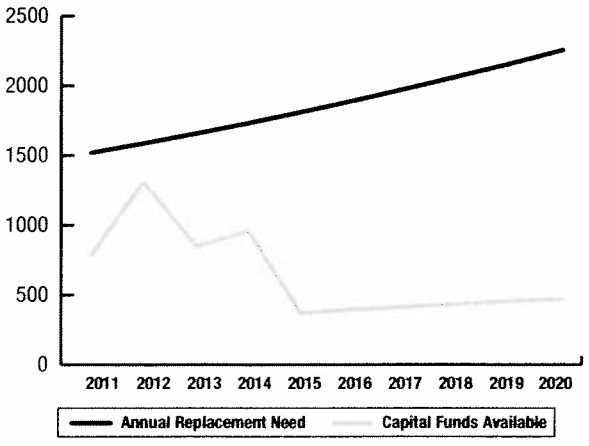


Exhibit 7-13: **Cost/Vehicle Mile and Average Age of Fleet**

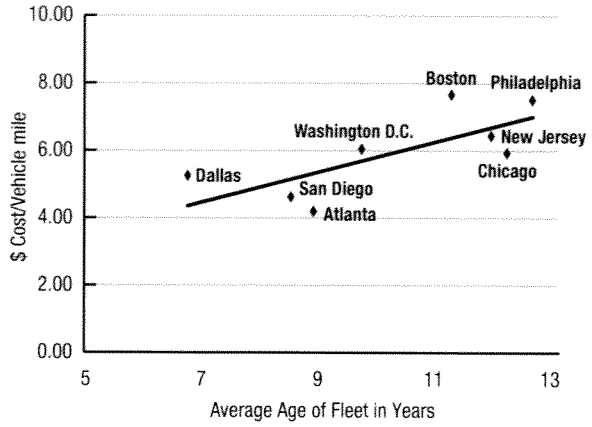


The total available funds in 2011 for capital projects are approximately $1.1 billion, short of the annual replacement need for a state of good repair. In 2011, $67.2 million of Capital funds are dedicated to debt service and an additional $250.6 million is programmed for transfers to operations. After these deductions from the capital programs the total amount of undesignated capital funds available in 2011 equals $782.0 million, a $740.9 million shortfall of the actual replacement need for a state of good repair for the year 2011 (not including de-obligations). In August 2010, a Capital Asset Condition Assessment was completed that showed the regions total backlog at $13.8 billion dollars. After 2011 the total backlog will be approximately $14.6 billion. In 2012, nearly $1.5 billion is available for Capital Programs which is only $105.1 million short of the annual replacement need, but with $115.5 million designated for debt service, and an additional $57.8 million programmed for transfers to operations, the undesignated capital funds available fall to $1.3 billion, $278.5 million less than the amount needed to meet the annual replacement need for a state of good repair. By the end of 2012 the region anticipates a total backlog of over $14.8 billion.

As demonstrated in Exhibit 7-11, funding available from State and local sources in the years 2011 through 2014 are critical to funding the capital program. In 2012, a bond issued by the CTA for the purchase of new 5000 series rail cars, will increase capital funding for the region to $278.5 million less than the annual replacement need. In 2013 the amount of funding available for Capital is below the annual replacement need by $812.7 million, and $776.3 million in 2014. In 2015, when funding from the state bonding program is no longer available, capital money is almost exclusively provided from the federal level, with an average of 96.4 percent of all capital funding coming from the federal government between the years of 2014 and 2020.

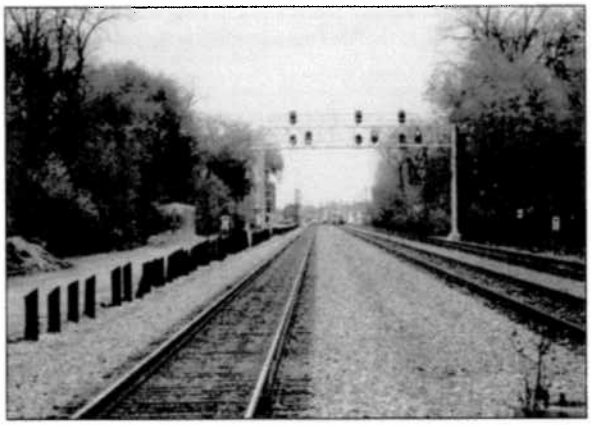
As Exhibit 7-12 shows, during the 2011 to 2020 period the region never quite meets its annual replacement need. In 2012 with the anticipated bond issuance by the CTA of $430 million, capital funding is sufficient to pay for 82.5% of the annual replacement need. With the absence of locally generated borrowing in 2013 and 2014, the region can only meet 51.1 percent, and 55.3 percent of its annual replacement need, respectively. When State funding is no longer projected in 2015, the situation becomes critical, as the amount of funding available would only meet 20.4 percent of the regions annual replacement need.

Lack of funding for Capital Improvements is further exacerbated by two factors, capital transfers to the operating budget, and increased operating costs associated with an aging vehicle fleet.

In recent years increasing amounts of capital funds have been diverted to operating budgets. In the past ten years $794.7 million has been diverted from capital funding to the operating budget. An additional $408.1 million has been budgeted for the 2011-2013 period. Allowing additional transfers of scarce resources will only exacerbate the capital shortfalls. As the region continues to transfer funds from its Capital Programs Budget to its Operating Budget it further delays needed replacement expenditures. Delaying

replacement, results in increased operating expenditures.

By examining the average life of a fleet across peer groups we can see that as the average life of a region's fleet increases the Operating and Maintenance Costs increase as well (Exhibit 7-13). Conversely, if the average age of a fleet decreases, we can expect to see significant savings in operating and maintenance.



Ballast, track, and signal upgrade at Metra's Milwaukee West line

Capital Impact on Maintenance Operations

By investing in Capital and rolling stock the Service Boards save money on their operating budget, evidence would also indicate that as the fleet ages it becomes increasingly expensive to maintain. By meeting its annual replacement need,

Exhibit 7-14: **CTA Capital Impact on Operations** (includes only some of the major programs)

Bus Projects Mid-life Overhaul of Buses ($25.1 million)	· Improve service reliability · Increase customer satisfaction · Enhance safety
Rail Projects Railcar Overhaul & Mid Life Rehabilitation and replacement ($71.9 million)	· Increase fleet reliability · Potential reductions in maintenance and operating costs · Reduce average age of fleet from 26 to 25 years
Repair Track and Structures ($124.4 million)	· Raise travel speeds by reducing slow zone restrictions · Enhance safety · Improve on-time performance · Increase customer satisfaction
System Wide Improvements Implement Security & Communication Projects ($31.3 million)	· Enhance safety and customer satisfaction · Improve communications and efficiencies · Deter theft on trains and platforms

Exhibit 7-15: **Metra Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock Replace Bi-Level Electric Commuter Rail Cars ($171.9 million)	· Maintain on-time performance · Reduce maintenance cost · Enhance safety · Increase customer satisfaction
Track and Structure Rehabilitation of Bridges ($38.6 million)	· Preserve uninterrupted service – higher on-time performance · Improve vertical clearances · Improve traffic flow and pedestrian safety
Electrical Signal & Communication Signal system upgrade ($17.1 million)	· Improve travel times resulting in higher on-time performance · Enhance safety
Stations and Passenger Facilities Rehabilitate/improve/construct stations ($37.0 million)	· Increase other revenue by providing more commercial and retail space

the region could save money on their operating expenditures. Ultimately though, if the region continues to use capital expenditures to fund its operating budget, and fails to meet both vehicular and non-vehicular Capital annual replacement needs, operating costs will continue to rise making it difficult to continue to provide service at current levels.

Impact of Capital Expenditures on the 2011 Operating Budget

CTA

The proposed 2011 Capital Program for CTA totals $392.7 million divided among the following: Bus Projects $50.5 million; Rail Projects $230.4 million; System Wide Projects of $111.8. Additionally, the CTA in 2011 will perform Rail Car Overhauls & Mid-life rehabilitations in total of $71.9 million dollars, combined with the receipt of 30 new rail cars in 2011, the average age of the fleet will be reduced from 26 to 25 years, potentially reducing maintenance and operating costs.

Metra

The proposed 2011 Capital Program for Metra totals $383.5 million divided among the following: Rolling Stock $203.9 million; Track & Structure $54.0 million; Electrical, Signal & Communications $41.3 million; Support Facilities and Equipment $20.3 million; Stations and Passenger Facilities $40.3 million; and Miscellaneous $23.7 million.

NABI bus - Pace Rapid Transit project

Pace

The proposed 2011 Capital Program for Pace totals $78.3 million divided among the following: Rolling Stock $68.6 million; Support Facilities & Equipment $7.3 million; Miscellaneous, Contingencies & Administration $2.5 million. In 2010, Pace spent $55.4 million to purchase 96 fixed route buses which could potentially reduce the average age of their fixed buses from 7.5 to 6.5 years resulting in potential savings in operating and maintenance costs for 2011.

The RTA will continue to work more cooperatively with the service boards to identify the impact of capital expenditures on their operating budgets. As it attempts to mitigate the effects of an aging fleet and meet its annual replacement need.

Exhibit 7-16: **Pace Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock Purchase of 96 fixed route accessible buses ($55.4 million)	· Potential reductions in maintenance and operating costs · Improved travel time · Enhance safety · Lower fuel consumption · Reduce average age of buses from 7.5 to 6.5 years
Support Facilities and Equipment Improvement to Garages/Facilities ($3.3 million	· Savings in the operating budget associated with lower building maintenance costs
Miscellaneous/Project Administration Project Administration ($0.8 million)	· Provides capital fund for staff time spent on the administration of grants · Reduces operating expenses by equal amount

8 Appendices

Exhibit 8-1: **2011 Business Plan Calendar (dates listed are in 2010)**

2011 Business Plan Calendar

DATE	REQUIREMENTS
20-May	RTA Finance Committee and Board meet to discuss and consider the release of the Business Plan Call for the 2011 Annual Budget and Two-Year (2012-2013) Financial Plan.
25-Jun	RTA staff provides economic indicators and preliminary public funding estimates to the Service Boards.
17-Jul	RTA holds Community and County outreach meetings to review legislative actions and collect suggestions for consideration in business plan development.
Aug	Service Boards submit initial Budget, Two-Year Financial Plans, and Five-Year Capital Programs proposals to the RTA
2 - 3-Aug	During the August RTA Board meeting the RTA Executive Director reports on the status of the Service Boards' Budget and Financial Plan submittals for the upcoming year.
Aug-Sep	The RTA Executive Director prepares the finance and ordinance information required to: (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the budget recovery ratio for the upcoming year for each Service Board, (3) set the preliminary capital program amounts for the upcoming five years.
15-Sep	RTA Finance Committee and Board meet to discuss and consider adoption of ordinances which (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the budget recovery ratio for the upcoming year for each Service Board, and (3) set the preliminary capital program amounts for the upcoming five years.
Sep-Oct	RTA evaluates the Service Boards' current year performance for consistency with the adopted budget and provides guidance to the Service Boards to use in completing their proposed Annual Budget and Two-Year Financial Plan.
Sep-Oct	Service Boards release their proposed Budget and Two-Year Financial Plan to the RTA, the public, and present to the Counties in the region.
Oct-Nov	RTA Executive Director reviews the Service Boards' proposed Budget and Two-Year Financial Plan and provides comments to the Service Boards.
21-Oct	RTA Board Committees and the RTA Board review the proposed RTA Agency Budget.
15-Oct	Service Board budget proposals, adopted by their Board, are submitted to the RTA not later than November 15.
16 - 30-Nov	RTA staff prepares consolidated Budgets and Two-Year Financial Plans for public review and comment.
18-Nov	During the RTA Board Meeting the Chairman of the RTA Board and/or the Chairman of the RTA Board Finance Committee approve the release of the proposed Budget and Two-Year Financial Plan.
Nov-Dec	RTA presents operating and capital program information to the Counties in the region.
1-Dec	RTA proposed Budget, Two-Year Financial Plan, and Five-Year Capital Program is made available for public review and comment.
Dec	RTA holds public hearings in December on the proposed RTA Budget and Two-Year Financial Plan.
17-Dec	RTA Finance Committee and Board meet to discuss and consider adoption of ordinances which (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the budget recovery ratio for the upcoming year for each Service Board, and (3) set the capital program amounts for the upcoming five years. The RTA Finance Committee and Board also meet to discuss and consider the release of the Business Plan Call for the longer-term Ten-Year (2011- 2020) Financial Condition assessment. The RTA Executive Director reports to the RTA Board the adequacy of the Service Boards' Part II Business Plan submittals for its review and discussion at the December 17, 2009 RTA Board meeting.

Exhibit 8-2.1: **RTA Community Meetings/Budget Hearings Schedule**

The RTA sought public input regarding the 2011 budget and provided updates on state and federal capital funding while reviewing recommended projects for RTA funding programs. RTA Board members offered opening remarks followed by RTA senior staff who conducted presentations on the Budget. Attendees had the opportunity to make public comment.

Exhibit 8-2.2: **RTA 2011 Budget hearing and Webinars**

The Regional Transportation Authority (RTA) hosted its final public budget hearing and two webinars for the 2011 budget in December of 2010. The budgets for the CTA Metra and Pace were reviewed and a general outlook for the transit system and key agency initiatives were presented. Attendees had the opportunity to participate in a Q&A session where RTA staff received comment and responded to questions.

Budget Hearing
Monday, December 6th
6:00 pm
RTA Headquarters Bldg.
175 W. Jackson Blvd., Chicago
Suite 2200

The RTA Board Room is ADA accessible and attendees requiring reasonable accommodation were asked to call 312-913-3153.

Budget Hearing Webinar
Tuesday, December 7th
12:00 pm to 1:00 pm

Wednesday, December 8th
2:00pm to 3:00 pm

Webinar attendees could reserve a seat at www.RTAchicago.com and after registration they would receive a confirmation email containing instructions about joining the webinar.

Public Hearing Overview

Section 4.01 of the RTA Act directs the RTA to hold public hearings on its annual consolidated budget and financial plan, prior to Board consideration of the ordinance adopting the budget and plan. This year the RTA held thirteen public hearings from August 23rd through September 1st and one on December 6th. It also hosted two webinars in December. The hearings in August took place as follows: five in the City of Chicago (north, east, south, west and central), three in suburban Cook (north, south and west), and one each in Lake, Will, DuPage, Kane and McHenry counties. The hearing in December took place at the RTA headquarters in downtown Chicago. The meetings were publicized in press releases issued to the media, paid ads in newspapers across the region, e-mails and calls to Partners for Transit, the RTA's InTransit newsletter, a special communication to elected officials, as well as through the Service Boards, at reduced fare presentations, and on RTA, all service boards and many Partners For Transit websites. The hearing schedules are detailed in Exhibit 8.2.1 and 8.2.2

At these meetings, the RTA briefed the public on the proposed RTA 2011 Budget, the proposed Program of Projects, the Illinois Jobs Now projects, a review of the 2010 budget and a current assessment of the economic conditions and status as it relates to the RTA.

Presenters included Executive Director Joseph G. Costello and RTA senior management who were joined by RTA board members at all the hearings. Presentations were also given to all County Boards in the service area.

The main category of the public hearing comments centered around expand/enhance (more/new services) with two close seconds: infrastructure (repair/replace) and coordination. Expand/enhance received 22 comments with infrastructure and coordination receiving 13 and 12 respectively. Webinar questions centered on streams of revenue (e.g. State's nonpayment, impact of Seniors Ride Free Program, federal reauthorization, strategies for more funding, vehicle-miles-traveled tax, etc. Court reporters were present to take testimony at all public hearings. Transcripts are on file with RTA.

In addition to the hearings, the budget documents and actual presentation were posted on RTA websites and announced through RTA's social media network as well as other methods in order to broaden public access. The RTA Board voted to approve the 2011 transit system budget at its December 16th meeting.

Glossary

Accessible—As defined by FTA, a site, building, facility, or portion thereof that complies with defined standards and that can be approached, entered, and used by persons with disabilities.

Accessible Service—A term used to describe service that is accessible to non-ambulatory riders with disabilities. This includes fixed-route bus service with wheelchair-lifts or dial-a-ride service with wheelchair lift-equipped vehicles.

ADA (The Americans with Disabilities Act of 1990)—This federal act requires many changes to transit vehicles, operations and facilities to ensure that people with disabilities have access to jobs, public accommodations, telecommunications, and public services, including public transit.

ADA Paratransit Service—Non-fixed-route paratransit service utilizing vans and small buses to provide pre-arranged trips to and from specific locations within the service area to certified participants in the program.

Administration Expenditure—Expenditures for labor, materials and fees associated with general office functions, insurance, safety, legal services, and customer services.

Agency Fund—This fiduciary fund accounts for the assets held by the RTA in a trustee capacity or as an agent for the CTA, Metra, and Pace, rather than for the RTA's own programs. (Of the four types

of fiduciary funds [Agency funds, pension (and other employee benefit] funds, investment trust funds, and private-purpose funds), the RTA uses only the first two.)

Ambulatory Disabled—A person with a disability that does not require the use of a wheelchair. This would describe individuals who use a mobility aid other than a wheelchair or have a visual or hearing impairment.

Appropriation—A legal procedure that permits a specified amount of funds for a given operating or capital purpose to be expended; the RTA appropriates funds for expenditures.

Balanced Budget—A budget in which expected revenues equal expected expenses during a fiscal period.

Bond Refinancing/Refunding—is the payoff and re-issuance of bonds, to obtain better interest rates and/or bond conditions which results the defeasance of the old debt.

Budget—Funds allocated by the RTA Board for a particular purpose; each year the RTA Board approves a budget document for the following year. Funds are allocated either by "programming" them or by "appropriating" them.

Budget Marks—The Regional Transportation Authority Act, as amended in 1983, requires the RTA to advise each of its Service Boards by September 15 of each year of its required revenue recovery ratio for the subsequent year, and the public funding estimated to be available for the next three years. These figures are referred to as budget marks.

Bus Bunching—A traffic scenario in which more than one bus arrives at the same time. This phenomenon is a subject of several CTA initiatives aimed at reducing service problems through improved field management of traffic and schedules.

Bus Rapid Transit (BRT)—BRT combines the quality of rail transit and the flexibility of buses. It can operate on exclusive transitways, High Occupancy Vehicle (HOV) lanes, expressways, or ordinary streets. A BRT system combines intelligent transportation systems technologies, priority for transit, cleaner and quieter vehicles, rapid and convenient fare collection, and integration with land use policies.

Capacity Utilization—The percentage of seats occupied in a train or bus at a given point in time.

Capital—Funds that finance construction, renovation, and major repair projects or the purchase of machinery, equipment, buildings, and land.

Capital Expenditure—Expenditures that acquire, improve, or extend the useful life of any item with an expected life of three or more years and a value of more than $5,000, e.g., rolling stock, track and structure, support facilities and equipment, and stations and passenger facilities.

Car Mile or Vehicle Mile—A single bus, rapid transit car, or commuter rail car traveling one mile.

Circuit Breaker Program—The Illinois Department on Aging's Circuit Breaker program provides assistance to low income senior citizens and persons with disabilities. Illinois residents with a qualifying disability who meet the income eligibility requirements of the Circuit Breaker program are eligible for free rides on regularly scheduled fixed-route public transit service.

CMAP (The Chicago Metropolitan Agency for Planning)—Formed in 2005, CMAP integrates planning for land use and transportation in northeastern Illinois. The new organization combined the region's two previously separate transportation and land-use planning organizations -- Chicago Area Transportation Study (CATS) and the Northeastern Illinois Planning Commission (NIPC) -- into a single agency.

CMAQ (Congestion Mitigation/Air Quality) Grant—A federal grant program designed to support transportation projects that reduce traffic congestion.

Cost Per Mile—Operating expense divided by vehicle miles for a particular program or in total.

Cost Per Passenger—Operating expense divided by ridership for a particular program or in total.

CTA (Chicago Transit Authority)—The CTA operates bus and rapid transit service in the City of Chicago and several suburbs. The CTA was created by state legislation and began operations in 1947.

Dead-Head—The time when a transit vehicle is traveling toward a yard, shop, or the start of a run but is not in revenue service. Car miles include dead-head miles.

Debt Service—The payment of interest on and the repayment of principal on long-term borrowed funds according to a predetermined payment schedule.

Defeasance of Bonds—a technique used to discharge older high-rate debt prior to maturity with new securities bearing lower interest rates.

Deficit—For a particular Service Board, the difference between system-generated revenues and system operating expenses. The deficit is sometimes referred to as the "public funding requirement." The RTA's current practice is to provide operating funds to each Service Board equivalent to their budgeted deficit for the year as opposed to the actual deficit. For the RTA, its deficit or surplus equals total revenues (sales tax, PTF, interest, and other income) less operating funding, debt service, technology, and capital funding (RTA capital and RTA discretionary funding of Service Board capital).

Depreciation—Expiration in the service life of fixed assets, other than wasting assets, attributable to wear and tear, deterioration, action of the physical elements, inadequacy, and obsolescence. The portion of the cost of a fixed asset, other than a wasting asset, charged to expense during a particular period.

Dial-A-Ride Service—Paratransit service that requires the user to call ahead and schedule service.

Discretionary Funds—Funds that the RTA allocates, at its discretion, to the Service Boards. These funds include the PTF and a portion of the 15 percent of the RTA Sales Tax.

Elderly—A term used to describe individuals who are 65 years of age or older. This age is used to qualify for the RTA Senior Citizen Reduced Fare Card. Note that some paratransit services define elderly individuals at an age other than 65.

Express Bus (or route)—A suburban or intercity bus that operates a portion of its route without stops or with a limited number of stops.

Favorable Performance—In a comparison of actual results to budgeted levels, favorable performance describes the situation in which expenditures are less than budget or revenue exceeds budget.

Farebox Revenue—Revenue obtained from passengers and other fare subsidies except the state reduced fare subsidy program. Also referred to as "system-generated" revenue.

Fares—The amount charged to passengers for use of various services.

Feeder Bus Services—Pace bus routes that serve Metra stations.

Financial Plan—In addition to an annual budget, the RTA Act, as amended in 1983, requires the RTA and its Service Boards to develop a financial plan for the two years subsequent to the upcoming budget year. In combination with the annual budget, this provides a three-year projection of expenses, revenues, and public funding requirements.

Fiscal Year—The calendar year is the fiscal year for the RTA, CTA, Metra, and Pace. The fiscal year of the State of Illinois extends from July 1 through June 30 of the following year. The fiscal year of the federal government extends from October 1 through September 30 of the following year.

Fixed-Route Service—Buses that operate according to fixed schedules and routes.

Flexible Funds—Federal funds made available by TEA-21 that can be used for various transportation projects, including both highway and

mass transit projects. Allocation of these funds is at the discretion of state and local agencies.

Fringes (Fringe Benefit Expenditures)—Pay or expenditures to or on behalf of employees in addition to salaries and wages, including sick pay, vacation pay, pension contributions, life and health insurance, unemployment and workers' compensation, social security costs, and other programs.

FTA (Federal Transit Administration)—The FTA is the federal agency that helps cities and communities provide mobility to their citizens. Through its grant programs, FTA provides financial and planning assistance to help plan, build, and operate rail, bus, and paratransit systems. Since 1988, the only FTA funding available to the RTA has been for capital projects.

Full Funding Grant Agreement (FFGA)—The FTA is required to use a FFGA to prove financial assistance for new start projects. The FTA also has the discretion to use an FFGA in awarding federal assistance for other major capital projects. The FFGA defines the project, including cost and schedule; commits to a maximum level of federal financial assistance (subject to appropriation); establishes the terms and conditions of federal financial participation; covers the period of time for completion of the project; and helps to manage the project in accordance with federal law. The FFGA assures the grantee of predictable federal financial support for the project (subject to appropriation) while placing a ceiling on the amount of that federal support.

Full-Time Equivalent Position (FTE)—A measurement equal to one staff person working a full-time work schedule for one year.

Fund Balance—The cumulative difference between revenues and expenses over the life of a fund. The excess of funding over deficit for a given period of time. In this document, the fund balance refers to the unreserved/undesignated funds in the Agency and general fund.

Funding Formula—A specific formula used to determine a subsidy level.

General Long Term Debt Account Group (GLTDAG)—This account group is not a fund but a separate list of certain long-term liabilities of the general government. Debt normally is recorded at its face value, without premium or discount. Additions to and deletions from GLTDAG are disclosed in the notes to the financial statements.

General Fund—The operating fund that is used to account for all financial resources and normal recurring activities except for those required to be accounted for in another fund.

General Obligation Bonds (GO Bonds)—are bonds that are legally backed by the full faith, and credit of the issuing government. The government is legally obligated to use its full taxing power, if necessary, to repay the debt.

Gross Domestic Product (GDP)—Reported by the Bureau of Economic Analysis, this measure of economic activity is the sum of the market values of all of the final goods and services produced in the United States in a year.

Grants—Moneys received from local, federal, and state governments to provide capital or operating assistance.

Headway—The time span between service vehicles (bus or rail) on a specified route.

Illinois FIRST—A group of legislation passed by the Illinois Legislature to fund capital improvements for the state's infrastructure, roads, schools and transit.

Infrastructure—The physical assets of the RTA system, e.g., rail lines and yards, power distribution, signaling, switching, and communications equipment, passenger stations, information systems, and roadways, upon which the continuance and growth of transit depend.

In-Kind Service—These services are provided at no cost to a Service Board.

For example, the City of Chicago provides free of charge dedicated security forces to the CTA.

Innovation, Coordination and Enhancement (ICE) Fund—A fund created to award grants to the Service Boards, transportation agencies, and local governments, for short-term, lower-cost projects and service enhancements.

Intelligent Bus System (IBS)—A bus communications system that uses advanced technology to monitor and improve performance on various levels. Pace's new bus communications system includes radio voice and data communications, Computer-Aided Dispatching (CAD) and Global Positioning Satellite (GPS)-based Automatic Vehicle Location (AVL) functions.

Intelligent Transportation Systems (ITS)—The application of advanced sensor, computer, electronics, and communication technologies and management strategies in an integrated manner to increase the safety and efficiency of the surface transportation system. ITS is a national effort designed to promote the use of advanced technologies in multimodal transportation.

Interest—The charge for borrowing money, typically expressed as an annual percentage rate.

ISTEA (Intermodel Surface Transportation Efficiency Act of 1991)—ISTEA amended the Federal Transit Act introducing new sources of flexible funds and increasing the funding authorized for public transit.

Joint Self Insurance Fund (JSIF)—The RTA provides excess liability insurance to protect the self-insurance programs maintained by the CTA, Metra, and Pace. The service boards are obligated to reimburse the JSIF for any damages paid plus a floating interest rate.

Labor Expenditure—The cost of wages and salaries (including overtime) to employees for the performance of their work.

Line Item—An appropriation that is itemized on a separate line in a budget.

Linked Trip—A single, one-way trip without regard for the number of vehicles boarded to make the trip (i.e., a home-to-work trip taken by boarding a bus, to a train, to another bus represents one linked trip or three unlinked trips)

Maintenance Expenditure—Expenditures for labor, materials, services, and equipment used to repair and service transit and service vehicles and facilities.

Metra—The Commuter Rail Division of the RTA responsible for all rail public transit service with the exception of those services provided by the CTA. Metra was created in 1983 by an amendment to the RTA Act.

Mobility Limited—An individual who has a physical impairment, including impaired sensory, manual, or speaking abilities that result in functional limitations.

Modified Accrual Basis—A type of accounting whereby revenue and other financial resource increments (e.g., bond issue proceeds) is recognized when they become both "measurable" and "available" for finance expenditures of the current period. "Available" means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures (e.g., debt service payments and a number of specific accrued liabilities) are only recognized when payment is due because it is only at that time that they normally are liquidated with expendable available financial resources.

Moving Beyond Congestion—Jointly with the Chicago Transit Authority, Metra and Pace, the Regional Transportation Authority is leading a strategic planning effort to maintain, enhance and expand the northwestern Illinois region's transit system and to solve the current transit funding challenge, ensure financial viability and accountability, and meet the region's growing and changing transportation needs.

New Initiative—A new program or service that the RTA may approve separately from the Agency's or a Service Board's regular budget. The RTA may attach special criteria to measure the success of a new initiative.

Non-Ambulatory Disabled—A person who has a disability that requires use of a wheelchair.

Operating Assistance—Financial assistance for transit operations (as opposed to capital) expenditures. Such aid may originate with federal, state, or local governments.

Operating Budget—The planning of revenue and expenditures for a given period of time to maintain daily operations.

Off-Peak—Non-rush hour time periods.

Pace—The Suburban Bus Division of the RTA responsible for all non-rail suburban public transit service with the exception of those services provided by the CTA. On July 1, 2006, Pace assumed operating responsibility for all ADA paratransit service in the RTA region. Pace was created in 1983 by an amendment to the RTA Act.

Paratransit Service—Any transit service that is not conventional fixed-route bus or rail service, including Dial-A-Ride, fixed-route deviation, shared-ride taxicab, and vanpool services.

Passenger Mile—A single passenger traveling one mile.

Peak Period—Morning or evening rush hour.

Principal—The amount borrowed or the amount still owed on a loan, separate from the interest.

Positive Budget Variance (PBV)—Calculated as the difference between a Service Board's budgeted and actual deficit, a positive budget variance results when the actual deficit is less than budgeted. Since the RTA funds the budgeted deficit, a PBV represents available funds for the Service Boards.

Program (verb)—To commit funds, for a given capital purpose, without necessarily appropriating these funds for expenditure. When the RTA Board passes its official budget document, certain funds are "programmed" so that they may be obligated (i.e., contracts signed) during the upcoming year; these funds may be expended during the upcoming or subsequent years.

Program (noun)—Groupings of expenditure accounts with related expenditures (i.e., operations, maintenance, administration, and capital program).

Public Transportation Fund(s) (PTF)—Each month the state transfers from its General Revenue Fund an amount equal to 25 percent of the RTA Part I Sales Tax collected in the previous month. All funds deposited in the RTA's General Fund are used at its discretion for the benefit of the Service Boards.

Public Funding—Funding received from the RTA. Generally refers to funding for Service Board operating expenditures.

Purchase of Paratransit Service—The amount of money paid to contractors to provide door-to-door transportation to certified participants in the ADA paratransit Service program.

Recovery Ratio—System-generated revenues divided by system operating expenditures as allowed by the RTA Act. This ratio is calculated for each of the Service Boards and for the RTA region as a whole. The RTA Act mandates that the RTA region attain an annual recovery ratio of at least 50 percent for mainline service. For ADA paratransit service, the Act requires a 10% recovery ratio in 2008 and 12% thereafter.

Reduced Fares—Discounted fares for children age 7-11, grade and high school students (with CTA ID), seniors 65 and older (with RTA ID), and riders with disabilities (with RTA ID) except paratransit riders.

Revenue Car Mile—Car mile during which the vehicle is in revenue service (i.e., picking up and/or dropping off passengers).

Reverse Commute—City-to-suburb commute. This phrase refers to the fact that most riders commute from the suburbs to the city.

Ridership (unlinked passenger trips)—Each passenger counted each time that person boards a vehicle.

Rolling Stock—Public transportation vehicles including commuter rail cars, locomotives, rapid transit cars, buses, and vans.

RTA Sales Tax (PART I)—1 percent in Cook County, 0.25 percent in the collar counties of DuPage, Kane, Lake, McHenry and Will. 85 percent of the sales tax is fully distributed to the Service Boards by the RTA according to formulas established by the RTA Act. Fifteen percent of the sales tax is retained by the RTA, a portion of which is distributed to the Service Boards at the RTA's discretion.

SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users)—Signed into law on August 10, 2005, this legislation provides $286.4 billion in guaranteed funding for federal surface transportation programs through federal fiscal year (FFY) 2009 of which $52.6 billion is for federal transit programs over six years.

SCIP (Strategic Capital Improvement Program) Bonds—The RTA was authorized under the RTA Act to issue $500 million of bonds for public transportation projects approved by the Governor of the State as part of the RTA's Strategic Capital Improvement Program (SCIP). Effective January 1, 2000, the Act was amended to authorize the RTA to issue an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004.

Series B Bonds—State Transportation Bonds used as all or a portion of the local share required to match federal funds for public transportation capital projects.

Service Boards—The term refers to the region's three transit operators: CTA, Metra and Pace.

Signal Priority—Transit signal priority either gives or extends a green signal to transit buses under certain circumstances to reduce passenger travel times, improve bus schedule adherence, and reduce bus operating costs.

Special Service—A transportation service, as defined by the FTA, specifically designed to serve the needs of persons who, by reason of disability, are unable to use mass transit systems designed for the use of the general public.

State Financial Assistance (SFA)—Subject to appropriation by the State, this assistance reimburses the debt service expenses of the RTA's Strategic Capital Improvement Program (SCIP) bonds.

Statutory Funds Designated for Capital or Transfer Capital—The difference between a Service Board's statutory Funding and its budgeted or actual deficit, whichever is greater. These funds, which are over and above operating needs, are generally used for capital purposes. Metra is the only Service Board that has generated by statute funds for capital in more than a decade.

Subscription Service—Special services for users who ride on a frequent and regular basis and follow a prescribed schedule (a minimum of three times per week between the same origin and destination).

Subsidy—Funds received from another source that are used to cover the cost of a service or program that is not self-supporting.

System-Generated Revenue (Total Operating Revenue)—Total revenue generated from operations includes farebox revenue, local subsidies, state fare subsidies, advertising, interest and all other income (excludes RTA and federal subsidies).

Taxi Access Program (TAP)—Certified participants in the ADA paratransit service program can purchase taxi vouchers valued at up to $13.50, at a reduced price to pay for one-way taxi rides that originate within the City of Chicago.

TEA-21 (The Transportation Equity Act for the 21st Century)— Signed into law on June 9, 1998, this legislation provided a six-year reauthorization of the federal transit program and the necessary contract authority needed to fully fund the fiscal year 1998 obligation limitations contained in the fiscal year 1998 Department of Transportation Appropriations Act.

T-FLEx (Transit Finance Learning Exchange)—A strategic alliance of transit agencies formed to leverage mutual strengths and

continuously improve transit finance leadership, development, training practices, and information sharing. Its purpose is to transform the finance function into a value-added business partner within each transit authority. Members meet twice annually in a facilitated workshop environment to develop and share best practices in active roundtable work sessions.

TOD (Transit-Oriented Development or Transit-Oriented Design)— Mixed use development of residential, office and retail uses within walking distance of a transit station or bus route.

Total Vehicle Miles—The sum of all miles operating by passenger vehicles, including mileage when no passengers are carried.

Unreserved Fund Balance—The balance of funds that have not been reserved, designated or programmed into the budget, financial plan, or capital program.

Vanpool—Pace's VIP (Vanpool Incentive Program) is a service where a group of 5 to 15 people commute to and from work together in a Pace-owned van.

Supplemental Data

National Economic Projections

The Gross Domestic Product (GDP) is the value of the output of goods and services produced by labor and property located in the United States. Exhibit 8-3 highlights the annual real GDP growth from 2006 through 2011. The GDP growth steadily declined from 2.8 percent in 2006 to negative 2.5 percent in 2009. The Congressional Budget Office expects that GDP will rebound and increase 2.5 percent in 2010 and increase an additional 3.1 percent in 2011.

Exhibit 8-4 shows the U.S. annual unemployment rate from 2006 through 2011. The annual average unemployment rate remained stable at 4.6 percent in 2006 and 2007, and then increased to 5.7 percent in 2008. The national unemployment rate climbed to 9.3 percent in 2009 and reached a high of 9.6 percent in 2010. The unemployment rate is expected to fall just below 2009 levels to 9.2 percent in 2011.

Exhibit 8-5 shows the annual growth of the U.S. Consumer Price Index (CPI) from 2006 through 2011. The CPI annual growth rate decreased from 3.2 percent in 2006 to 2.8 percent in 2007. CPI annual growth jumped to 4.1 percent in 2008. It is expected that the growth will drop to 1.6 percent in 2010 and hold steadily at 1.6 percent in 2011.

Source: US Department of Commerce, Congressional Budget Office

RTA Region

The following sections summarize population and employment trends in the six-county RTA region. These trends have a significant impact on public transportation ridership, as well as sales tax revenue.

Population

As shown in Exhibit 8-6, the population of the RTA region grew by 4.4 percent (from 8.1 million to 8.4 million) between 2000 and 2009. Population growth in the RTA region grew at a slower pace than the overall population of the United States, which

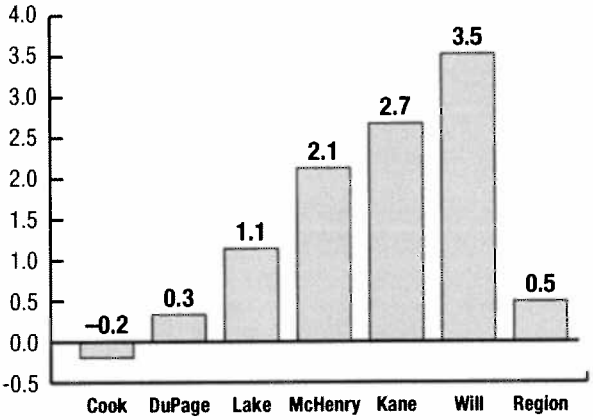
Exhibit 8-7: **RTA Region Population Annualized Growth Rates 2000-2009** (in percent)



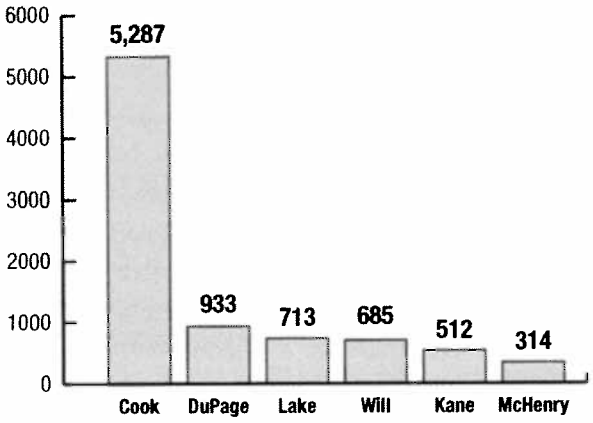
Source: United States Census Bureau

increased by 9.1 percent during this period.

Since 2000, most of the region's population growth has occurred in the collar counties. Exhibit 8-7 illustrates the annualized population growth rates for each of the region's six counties between 2000 and 2008. The highest growth rate occurred in Will County, where the population has increased at an annual rate of 3.5 percent. The population of Kane and McHenry counties grew at annual rates of 2.7 percent and 2.1 percent, respectively, while the population of Lake and DuPage counties increased at annual rates of 1.1 percent and 0.3 percent, respectively. Cook County experienced a population decline at an annual rate of 0.2 percent. During the 10-year period, the population of the entire RTA region grew at an annual rate of 0.5 percent.

In 2009, Cook County accounted for 63 percent of the 8.4 million people living in the RTA region. DuPage County's population comprised 11 percent

Exhibit 8-8: **RTA Region Population Distribution by County - 2009** (in thousands)



Source: United States Census Bureau

of the region, followed by Lake County and Will County (8 percent each), Kane County (6 percent), and McHenry County (4 percent). The population distribution for 2009 is illustrated in Exhibit 8-8.

Employment

Exhibit 8-9 provides a comparison of the national unemployment rate, the unemployment rate in the State of Illinois, and the unemployment rates in each of the counties of the RTA region from 2006 to 2010. Between 2006 and 2010, the unemployment rate in Illinois increased from 4.5 percent to 9.2 percent. In 2009, the unemployment rate reached 10.1 percent in Illinois, 0.8 percentage points higher than the national unemployment rate of 9.3 percent. Illinois is beginning to show some signs of a modest recovery, in November of 2010 the unemployment rate of 9.2 percent was 0.9

Exhibit 8-9: **Unemployment Rates** (in percent)

	2006	2007	2008	2009	Nov. 2010*
United States	4.6	4.6	5.8	9.3	9.3

Source: U.S. Department of Commerce-Bureau of Economic Analysis

percent lower than the Illinois average last year, and 0.1 percent lower than the national average in 2010.

In 2010, the Illinois state-wide unemployment rate exceeded those of most of the counties of the RTA region except Cook and Lake. Among the six counties in the RTA region, DuPage County's November 2010 unemployment rate of 7.1 percent was the lowest in the region, while Lake County's rate of 9.5 percent was the highest in the region.

Suburban jurisdictions have led the region in Labor Force growth since 1990. In 2000 employment in the five collar counties accounted for 35.8 percent of the RTA regions total. Cook County, which in 2000 accounted for 64.2 percent of the region's employment, accounted for 60.5 percent of employment in 2009. Regional employment has increased from 4.2 million in 2000 to 4.3 million in 2009 a 1.2 percent increase (Exhibit 8-10).

The trends in employment by economic sector in the RTA region are illustrated in Exhibit 8-11. The Professional and Business Services sectors experienced the greatest loss during the 2000 to 2009 period. In 2009, Professional and Business Services comprised 16.4 percent of employment, Trade, Transportation and Utilities were 24.8 percent, manufacturing 16.4 percent, Government 17.1 percent, and Leisure and Hospitality were 9.9 percent. Combined, Natural Resources and Mining, Construction, Information, and Other Services comprised the remaining 13.8 percent.

The RTA region has experienced steady growth in per capita personal income. Within the region, per capita personal income was higher than the US average in Cook, DuPage, and Lake Counties with Lake and Dupage having the highest level in the six county region in 2008 and Kane and Will counties having the lowest, as illustrated in Exhibit 8-12.

Sales Tax Trends

In April 2008, the RTA sales tax increased from the equivalent of one percent on retail sales in Cook County and one quarter percent on retail sales in the collar counties to the equivalent of one and one quarter percent on retail sales in Cook County and one half percent on retail sales in the collar counties. Also in 2008, a real estate transfer tax of three tenths of one percent was imposed in the City of Chicago to fund the CTA. Sales tax collections grew from $650 million in 2000 to $894 million in 2009. Between 2000 and 2003, sales tax collections fluctuated between $650 and $655

(1) In April 2008 legislation was enacted that modified and increased the percentage of sales tax collected in the region.

million. From 2004 to 2006, sales tax collections increased from $676 million to $747 million. In 2008, sales tax collections increased 22.4 percent from $753 million to $921 million, due to the April 2008 sales tax increase. In 2009, largely due to the economic recession, the sales tax collections decrease 3.0 percent from 2008. The percentage of sales tax collected by Cook County decreased from 84 percent in 2007 to 77 percent in 2009 a 7.0 percent decrease from before the 2008 legislation was enacted. (Exhibit 8-13 and 8-14)

Ridership Trends

Total RTA ridership increased each year in 2000 and 2001 despite a decline in Pace ridership during this period. Reflecting the overall downturn in the economy, total RTA ridership declined in both 2002 and 2003. Metra and Pace lost riders in 2002, while all three Service Boards lost riders in 2003 versus prior year. Regional ridership changed little from 2003 to 2004 reflecting stagnant ridership on all three Service Boards. In 2005, however, all three Service Boards achieved significant ridership gains as the economy rebounded and gas prices climbed. Regional ridership continued to grow in 2006 and 2007. In 2008 ridership grew 4.9 percent representing the largest percentage of growth in

the past ten years. In 2009, Ridership decreased 2.3 percent the most in the past ten years, as each service board experienced a decline in ridership. (Exhibit 8-15 and 8-16)

Other Trends

Service Board Expenditures (Exhibit 8-17 and 8-18) show a steady increase each year from 2000 to 2009. Expenditures increased at a compound annual growth rate of 4.4% during this period. Service Board Fare Box Revenues increased at a compound annual growth rate of 2.7% between 2000 and 2009. (Exhibits 8-19 and 8-20)

Letter from the Executive Director

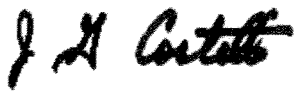
A vibrant and reliable public transit system provides vast economic, environmental, and quality of life benefits to the region and the state. The RTA system, like many private businesses and public agencies, has been struggling to deal with the declining economy since the 2008 financial crisis began. Therefore, the RTA's role as the fiscal oversight manager of the three operating agencies is more critical than ever.

As we deal with budget shortfalls, it is important to retain our focus on our customers and their needs. The RTA works to develop coordination among public transit services in the region that optimize our capital investments, increase operational efficiencies, and enhance the customers' experience. We have partnered with the Service Boards - - CTA, Metra, and Pace - - on a variety of initiatives that require collaborative efforts. In cooperation with the Service Boards, we advanced the development of a regional asset condition assessment that documents the funding needed to bring our infrastructure into a state of good repair over the next ten years. With funding from the Federal Transit Administration, we are developing a capital prioritization tool to assist in the programming of strategic capital investments. We are working with the Service Boards to implement a five-year plan for traffic corridor optimization, improve transit technologies that can provide riders with regional real-time travel information and trip planning, and improve signage in downtown locations to help customers navigate the transition between commuter rail and other transit services. Development of a regional open fare payment system is underway that will make the system easier to access for both regular and occasional users of our service. And, we are currently administering a region-wide customer satisfaction survey that will assist in the development of action plans that respond to customers' priorities.

The RTA operating and capital budgets represent the difficult balance between funding realities and operating needs. We are pleased that the budgets submitted from each of the Service Boards do not rely on the fiscally unsustainable use of capital funds for operations. While the operating budgets include cost saving measures, they also depend on a significant fare increase at Metra and potential union concessions to a new labor contract to be negotiated at the CTA. The capital program emphasizes state of good repair investments, but cannot address the full needs outlined by the asset condition report. As a region, we must continue to work for additional sources of funding to support the tremendously valuable regional resource we have -- one that has been built over a century of vision, planning, and investment.

The RTA and Service Boards remain committed to provide our customers with the best possible service.

Sincerely,



Joseph G. Costello

Executive Director, Regional Transportation Authority

1 Introduction

Regional Transportation Authority

Guide

The outline below is presented as a guide to the organization of the RTA 2012 Budget, Two-Year (2013-2014) Financial Plan, and Five-Year (2012-2016) Capital Program. In reading this document it is important to note that the information provided reflects the Region's funding and service conditions when the RTA Board adopted Ordinance 2011-79 on December 15, 2011, which approved the 2012 budgets and 2013-2014 financial plans of the Service Boards, the Agency, and the Region as a whole. It is also important to note that the funding marks (public funds to cover operating deficits) for each Service Board were set on September 14, 2011. The Service Boards include the Chicago Transit Authority (CTA), Metra commuter rail, Pace suburban bus, and Pace regional ADA paratransit service. The book is divided into the following nine chapters.

1. **Introduction** provides a guide to the overall structure of this document, a regional economic outlook, RTA's strategic plan, vision and goals, key budget issues, governance including the budget process and the 2012 budget ordinance (2011-79), and the 2011 GFOA Distinguished Budget Presentation Award.

2. **Budget in Brief** provides a snapshot of the RTA's role and summarizes the key elements of the 2012 budget.

3. **RTA** is divided into four major categories: Region Operating Plan (RTA, CTA, Metra, and Pace Suburban Service and ADA Paratransit Service consolidated budget and plan); Agency Operating Plan (budget and financial plan); Goals and Performance Measures; and Reference (RTA bonds and fund types).

4. **CTA** includes service characteristics, operating plans, budget and financial plan details, and organizational structure.

5. **Metra** includes service characteristics, operating plans, budget and financial plan details, and organizational structure.

6. **Pace Suburban Service** includes service characteristics, operating plans, budget and financial plan details, and organizational structure.

7. **Pace Regional ADA** includes service characteristics, operating plans, budget and financial plan details, and organizational structure.

8. **Capital** provides an overview and details of the capital program of each of the Service Boards (CTA, Metra, and Pace) and the capital impact on operations.

9. **Appendices** include the budget call calendar, budget hearing schedule, glossary, the schedules of the 2012 budget ordinance (2011-79), and supplemental ridership, sales tax, and demographic data.

Regional Economic Outlook

Like most organizations, the RTA has been struggling in the wake of the 2008 financial crisis. More recent economic trends have provided some indication of a slowly improving economy, and the RTA remains cautiously optimistic about 2012.

Unemployment in the region remains high but trended downward in the last couple months of 2011. The seasonally adjusted regional unemployment rate in December 2011 was 10.2%, a decrease of 0.3 percentage points from the end of the third quarter. Compared to prior year, regional unemployment was 1.0 percentage point higher. Nationally, the Congressional Budget Office (CBO) estimates that the 2011 unemployment rate of 9.2% will drop 1.0 percentage point to 8.2% by the end of 2012.

The RTA has further defined its strategic priorities and identified the values that define our purpose and mission.

Real US Gross Domestic Product (GDP) is expected to increase by 3.1% by the end of 2011 and in 2012 it is expected to increase another 2.8%. An analysis of National Gross Domestic Product and Regional Income Growth can be found in the appendix of this document.

The price of fuel also has a significant impact on the region's ridership. In December 2011 the average cost for a gallon of gas in the region was $3.37, about $0.49 lower than at the end of the previous quarter, but $0.25 higher than in December of 2010.

In 2008, when gasoline prices were at an all time high and before the economic recession took hold in the latter part of that year, the RTA system provided 657 million rides. In 2009 the system saw a 2.5% decrease in ridership followed by a further 0.9% decline in 2010. There have been encouraging signs of ridership growth in 2011 with an expected region-wide 1.3% increase over 2010 levels. In 2012, the Service Boards have budgeted for 647 million rides, a 0.7% increase in ridership over the 2011 estimate of 642 million.

Strategic Plan, Vision Statement, and Goals

In 2012, the Regional Transportation Authority will release its five-year 2012-2016 strategic plan, "The Way Forward" (http://rtachicago.com/index.php?Itemid=455).

While the vision for the region has stayed the same, the RTA has further defined its strategic priorities and identified the values that define our purpose and mission.

OUR MISSION

The RTA will ensure financially sound, comprehensive, coordinated public transportation for the Northeastern Illinois region.

OUR VISION

The Northeastern Illinois region will have a world-class public transportation system that is safe, reliable, sustainable, convenient, affordable, and is the keystone of the region's growing business opportunities, thriving job market, clean air, and livable communities.

OUR VALUES

Core values help us define our purpose and mission:

- **Accountability** – We will protect the public interest by ensuring financially sound, quality public transportation.
- **Transparency** – We will communicate openly and honestly.
- **Innovation** – We will seek out and implement innovative solutions.
- **Collaboration** – We will engage our stakeholders and partners on a regular basis to advance common goals.
- **Integrity** – We carry out our mission in a manner that is fair, ethical and honest.

STRATEGIC PRIORITIES

With limited resources and dire needs, all the region's efforts must be both strategic and focused. The RTA and Service Boards laid out the following strategic priorities in 2011.

- **Strategic Capital Investment:** Reduce operating costs by identifying capital projects that reduce operating expenditures.
- **Economies of Scale:** Identify coordinated purchasing efforts with the Service Boards and other government agencies that achieve cost savings and improve efficiency.
- **Maximize Use of System:** Maximize the use of the existing system by better tapping travel markets that have potential to use transit by streamlining and coordinating services when and where the system is not functioning at capacity.
- **Enhanced Customer Experience:** Focus on targeted capital- and technology-related projects in a coordinated fashion to modernize and enhance the customer experience through improved service performance and customer connections.
- **Coordinated Government Affairs, Marketing and Outreach:** Coordinate customer information and increase coordination and leveraging of partners and other stakeholders.

The Service Boards maintain separate management and, exercise control over all operations including the passenger fare structure.

Critical Developments and Key Budget Issues

The RTA has identified several critical developments in the 2012 Budget, 2013-2014 Financial Plan and Five-Year Capital Program.

OPERATIONS FUNDING WITHOUT CAPITAL TRANSFERS

In the 2011 Budget, the RTA planned to transfer more than $175 million from the capital program to operations in order to sustain fares and service at current levels. The CTA's 2011 amended budget included $113.2 million in transfers from capital to operations. To meet its operations funding needs, Metra budgeted $60.0 million of transfers in 2011, and planned for additional transfers of $25.0 million in 2012 and 2013. Pace projected that Suburban Service operations would require $2.0 million, $3.1 million, and $4.7 million of federal capital funds in 2011, 2012, and 2013, respectively. For the 2012 budget, the RTA is pleased to report that the budgets submitted by each of the Service Boards do not rely on the fiscally unsustainable practice of using capital funds for operations.

METRA FARE INCREASES

The Metra budget includes a proposed fare increase, effective February 1, 2012, that will average 25.1%. This increase in the price of fares may result in the loss of some ridership at Metra. A detailed account of the Metra fare increase can be found in the Metra chapter of this document.

CTA LABOR

A key assumption in the CTA's 2012 budget is anticipated savings from work rule relief as the CTA undertakes labor negotiations with its unionized employees. Labor is by far the CTA's largest expense, representing about 70% of total costs. A half-year credit of $80.0 million for work rule changes is applied in 2012 in anticipation of successful labor negotiations, resulting in a 2.0% decrease in labor expense for the year. In 2013 and 2014, the CTA has planned for savings of $160.0 million each year. Fare increases and/or service reductions may become necessary if these labor savings are not realized.

ADA LEGISLATION

In 2011, the RTA Act was amended to ensure full funding of the ADA paratransit deficit, which is estimated at $115.0 million in 2012. This legislation further stipulated that the ADA paratransit deficit would be fully funded in future years. The 2012 Pace ADA paratransit funding budget is based on a number of

assumptions critical in order to stay within the $115.0 million public funding level established. First, ridership growth is estimated to grow at a rate of about 5%, when the experience over the last few years has been somewhat higher. Demand for the service contributes heavily to the program cost. It will be challenging for Pace to achieve the productivity improvements necessary to meet their budgeted expense level. A defining factor in their success will be achieving increases in the rate of shared rides. In accordance with the 2011 legislation, future available funding for Pace ADA should increase at a rate that is more consistent with historical trends.

SALES TAX DIVERSION

The RTA system relies on sales tax for almost 40% of its total revenue. In an attempt to ensure it receives all sales tax it is due, the RTA filed a lawsuit against the villages of Channahon and Kankakee in August 2011 claiming the towns are acting as tax shelters for local retailers thereby diverting sales taxes from the six-county area where a portion goes to the RTA. These businesses operate retail services in the six-county region and benefit from services provided by local governments including police, fire, public works and transit.

The RTA will also be working diligently this year to pass legislation that clarifies the tax code and permanently ends these tax schemes in a manner that preserves the right of municipalities to engage in legitimate economic development activities.

IMPACT OF THE RECESSION ON PUBLIC FUNDING GROWTH

In 2008, before the start of the financial crisis, funding and reform legislation enacted in P.A. 95-0708 increased RTA public funding from sales tax, the state public transportation fund (PTF), and the City of Chicago's Real Estate Transfer Tax (RETT). For 2012, sales tax revenue is expected to increase 2.8% from 2011. Combined public funding from sales tax, PTF and RETT of $1,334.1 million in 2012 is $323.3 million or 19.5% lower than what was projected in 2008 before the economic downturn. Between 2008 and 2011, the RTA projected that the region would receive a total of approximately $6.1 billion dollars from these various sources. Including the 2011 estimate, the RTA has received about $1.2 billion or about 20% less than what was projected in 2008. The RTA and the Service Boards have had to adjust their strategic priorities in accordance with economic realities.

EXPENSE GROWTH

From 2010 to 2014, the combined operating expense for the region is projected to increase at a compound annual growth rate of 2.2%. In 2012, expenses are budgeted to remain relatively flat from prior year, decreasing about 0.3% to $2.539 billion. In 2010 total operating expense for the region was $2.436 billion. Total expenses are estimated to increase by 4.5% in 2011 to $2.546 billion. By 2014 total expenses are anticipated to reach $2.660 billion.

INSUFFICIENT CAPITAL FUNDING

With capital assets valued at $142.2 billion (as measured in terms of replacement value), the RTA system requires constant investment of capital dollars to both maintain and improve the region's transit infrastructure and rolling stock. In 2010, a Capital Asset Condition Assessment was completed. It placed the RTA region's 10-year capital need at $24.6 billion, comprised of $13.8 billion of backlog costs, $6.9 billion of normal replacement costs, and $3.9 billion of capital maintenance costs.

Current 10-year projections of capital funding sources total $7.8 billion or only 32% of the documented capital need over the same period. The current State of Illinois capital funding programs extend only through 2014 and are not yet fully appropriated. With no State follow-up program identified, capital funding for the RTA region drops to dangerously low levels after 2014. The RTA system is in need of a dedicated source of capital funding. In addition, the RTA's capital funding projections assume steady growth of federal capital funding, an outcome with considerable uncertainty due to the vagaries of future Congressional support and action.

In the 2012 to 2016 Five-Year Capital Program, the total amount of funding available is $3.9 billion. When the $750.8 million of debt service for the repayment of principal and interest on bonds issued for capital purposes is included, total capital funds are equal to $4.6 billion dollars. Of this $4.6 billion, $520.0 million was provided by the CTA from bond proceeds for the purchase of its new Bombardier 5000 series rail cars. The repayment of principal and interest on debt constitutes 16.2% of the $4.6 billion in available capital funding.

TRANSIT ASSET MANAGEMENT

The RTA has been at the forefront of Asset Management and State of Good Repair research for almost four years. In 2011, the FTA awarded the RTA $800,000 towards the development of its Transit Asset Management (TAM) Project with the intent that it be used as a national model. The development of this program will allow the RTA to better allocate limited funding for the region's transportation assets; integrate the Service Boards' asset needs with the region's five-year capital planning and annual budgeting processes; enhance the asset inventory and prioritization processes; and use the Capital Decision Support Tool to create a more robust TAM system.

Governance

The RTA was established in 1974 upon approval of a referendum in its six-county Northeastern Illinois region. The operating responsibilities of the RTA are set forth in the RTA Act. The RTA is a unit of local government, body politic, political subdivision and Municipal Corporation of the State of Illinois.

As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services as well as a planning and funding agency. However, in 1983, the Illinois General Assembly reorganized the structure and funding of the RTA. The reorganization placed all operating responsibilities with three Service Boards—the Chicago Transit Authority (CTA) and two operating divisions of the RTA, a Commuter Rail Division (Metra) and a Suburban Bus Division (Pace)—each with its own independent board of directors. These divisions conduct operations and purchase service from private carriers. The RTA became exclusively responsible for funding, financial oversight, and regional planning and programs.

In reviewing this document it is important to note that the Service Boards operate within the RTA region, but are separate legal entities. The Board of Directors of each Service Board is completely independent of the RTA Board. The RTA Board controls neither the selection nor the appointment of any Service Board director or its management. Furthermore, directors of the CTA, Metra, and Pace are prohibited from serving on more than one entity's board of directors, including that of the RTA.

The corporate authority and governing body of the RTA is the 16-member RTA Board of Directors. Fifteen directors are appointed from within the six-county region: five directors by the Mayor of the City of Chicago, one director by the president of the Cook County Board; four directors by the suburban members of the Cook County Board; and one director each from DuPage, Kane, Lake, McHenry and Will appointed by the Chairman or Executive of each County Board. The chairman of the RTA Board, its 16th member, is elected by at least 12 of the 15 appointed members.

To administer the Agency's statutory requirements, the Board hires officers and staff. One of its officers, who must be approved by the Board, is the Executive Director. The Executive Director executes the Board's policy decisions and staffs the Agency to carry out its mission and goals.

The RTA Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA's system as a whole (apart from ADA Paratransit service) achieves an annual "system-generated revenue recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of the operation of transportation services other than ADA Paratransit service. The Service Boards achieve their required recovery ratios by establishing fares and related revenue to cover the required percentage of their proposed expenditures. By statute, the

recovery ratio for ADA Paratransit service has been set at 10%. The RTA is responsible for supervising the budgets and financial performance of the CTA, Metra, and Pace.

The Service Boards are considered fiscally independent of the RTA. Although the RTA reviews the budgets of the CTA, Metra and Pace, approval of the budgets is mandated by State statute if such budgets meet specified recovery ratios.

The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters including ownership of assets, relations with federal and state transportation funding agencies, and the preparation of their operating budgets. They are also responsible for the purchase of services and approval of contracts relating to their operations.

The CTA, Metra and Pace provide services to different geographic areas within the six-county region. The CTA provides rail and bus service to the City of Chicago and 40 nearby suburbs within Cook County. Metra provides transit service to the six-county area, with the majority of the transit riders residing in the suburbs and commuting to the City of Chicago. Pace's primary service area for bus, dial-a-ride, and vanpool service is the suburbs of the six-county region, with some service to areas within the City of Chicago. Pace also operates region-wide ADA paratransit service.

The RTA Act establishes the RTA as the primary public body with authority to apply for and receive grants, loans, and other funds from the state or the federal government for public transportation programs in Cook, DuPage, Kane, Lake, McHenry and Will counties ("northeastern Illinois"). The RTA is responsible for the allocation of certain federal, state and local funds to finance both the operating and capital needs of public transit in the six-county region.

The Act confers upon the RTA Board powers to prescribe regulations requiring that the Service Boards submit to the RTA such information as the RTA may require. The Board has statutory authority to establish by rule or regulation financial, budgetary, or fiscal requirements for the system.

In addition to its annual budget and financial plan responsibilities, each year the RTA is required to prepare and adopt a five-year capital program. The RTA also conducts market research and coordinates planning for public transportation in northeastern Illinois. The RTA funds the development of new types of service, both in the suburbs and in the City of Chicago, on a demonstration basis.

Budget Process

As previously discussed, the Act requires that the RTA Board of Directors approve an annual budget, a two-year financial plan, and a five-year capital program. The budget calendar and statutory oversight and budget amendment requirements govern this process. The essential aspects of the budget calendar are outlined below. A detailed calendar is provided in the Appendices (Exhibit 9-1).

BUDGET CALENDAR

By July 1 of each year, the State Office of Management and Budget (OMB) is to submit to the RTA an estimate of revenue to be collected from taxes for the next fiscal year.

Between May and September of each year the RTA and the Service Boards execute a "business plan call process" that includes RTA estimates of revenue to be collected from taxes and other sources and the Service Boards' own preliminary estimates for the capital plan and operating revenues and expenditures during the planning period.

Based on this information and its own economic assessments, the RTA estimates tax receipts and revenue from other sources. "The Board shall, not later than September 15 prior to the beginning of the Authority's next fiscal year," advise each Service Board of the amounts estimated to be available during the upcoming fiscal year and following two years. The Board is also required to advise the Service Boards of

the times when the amounts will be available and the next year's cost recovery ratio.

Between September 15 and November 15, each Service Board must prepare and publish a comprehensive annual budget, program document and a two-year financial plan. "The proposed budget and financial plan shall be based on the RTA's estimate of funds to be available to the Service Boards, by or through the Authority, and shall conform in all respects to the requirements established by the Authority." Before submitting the budget to the RTA, the Service Boards must hold at least one public hearing in each of the counties in which it provides service and must hold at least one meeting with the affiliated county boards. After considering the comments from these meetings, it must formally adopt the budget prior to submitting it to the RTA on November 15. The RTA Act requires that the budgets submitted by each Service Board not project or assume receipt of revenue greater than that set in the estimates provided by the RTA.

The RTA must then hold at least one public hearing in the metropolitan region and one meeting with each county board on the proposed budget. Twenty days prior notice is required for the public hearing. The public hearing schedule for the 2012 budget may be reviewed in the Appendices chapter (Exhibits 9-2.1 and 9-2.2).

After conducting these hearings and taking into consideration public comment, the RTA Board must adopt (with 12 votes) a budget that meets the statutory criteria. If the RTA does not find that a Service Board budget meets the criteria set forth under the Act, the Board shall, five working days after the start of the Service Board's fiscal year, adopt a budget and financial plan meeting these criteria. The RTA, CTA, Metra, and Pace all report on a calendar-year basis.

STATUTORY REQUIREMENTS

The RTA Act sets forth seven statutory criteria for Board approval of the budget and financial plan of each Service Board. These seven criteria are as follows:

Balanced Budget

Such budget and plan shall show a balance between (a) anticipated revenue from all sources, including operating subsidies, and (b) the costs of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness.

Cash Flow

Such budget and plan shall show cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenditures as incurred.

Recovery Ratio

Such budget and plan shall provide for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of such Service Board which allow the Service Board to meet its required recovery ratio.

Assumptions

Such budget and plan are based upon and use assumptions and projections which are reasonable and prudent.

Financial Practices

Such budget and plan shall be prepared in accordance with sound financial practices as determined by the RTA Board.

Strategic Plan

Such budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

Other Requirements

Such budget and plan shall meet such other financial, budgetary, or fiscal requirements that the RTA Board may by rule or regulation establish.

OVERSIGHT

After adoption of the operating budget, the RTA Board has continuing oversight powers concerning the budget and the financial condition of each Service Board and the region as a whole. The RTA monitors the budgetary and operations performance of the Service Boards on a monthly basis to ensure compliance with their budget and recovery ratio. On a quarterly basis, the following oversight is conducted:

- After the end of each fiscal quarter, each Service Board must report to the RTA "it's financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction" for that quarter. If in compliance, the RTA Board so states and approves each Service Board's compliance by adopted resolution.

- If "in the judgment of the Board" these results are not substantially in accordance with the Service Board's budget for that period, "the Board shall so advise the Service Board" and it "shall, within the period specified by the Board, submit a revised budget incorporating such results."

- Once a Service Board submits the revised budget plan, the RTA must determine if it meets the seven statutory budget criteria necessary to pass an annual budget. If not, the RTA does not release any funds to the Service Board(s) except for the statutory allocation of taxes.

- If a Service Board submits a revised budget and plan which shows that the statutory budget criteria will be met "within a four quarter period," the RTA "shall continue to release funds to the Service Board." The RTA may require the Service Board to submit a revised budget and plan that shows that the budget criteria "will be met in a time period less than four quarters."

AMENDMENT

When prudent, the operating budget is amended due to shifts in the economic climate, governmental funding programs or new projects. Depending on the type of request, the proposed amendment may be presented to one or more of the RTA Board Committees for approval. However, the Board's Finance Committee must approve all proposed amendments before they are recommended to the RTA Board. The RTA Board ultimately approves or disapproves all proposals. If approved, the RTA and Service Board budgets are amended to include all changes and actual results are then monitored against the amended budget.

OPERATIONS FUNDING

The RTA provides operating funds to each Service Board equivalent to its budgeted deficit for the year as opposed to funding the actual deficit. This policy encourages cost efficiencies by the Service Boards and allows them to retain any budgeted funds that are not expended. Such funds are generally referred to as a positive budget variance, or PBV. However, the depletion of the RTA's fund balance due to the economic downturn, prevents the RTA from providing additional funding to the Service Boards in the event that revenues decline below estimated levels, and therefore the practice of funding at budget has been suspended for the 2012 fiscal year.

FUND BALANCE

In 1998, the RTA Board adopted an ordinance establishing a minimum level on the unreserved and undesignated fund balance. The ordinance affirms that the annual budget adopted by the RTA each year will reflect a year-end unreserved and undesignated fund balance of its general fund equal to or greater than 5% of the RTA's total operating expenditures for that year. If actual sales tax receipts or other RTA revenue falls short of the amounts reflected in the annual budget, then the succeeding year's annual budget and two-year financial plan will provide for the replacement of any shortfall in the unreserved and undesignated balance of the RTA general fund, by no later than the end of the three-year planning period.

The RTA established this policy to maintain financial stability in order to carry out the RTA's legislative mandates to plan, fund and oversee public transportation in the region. The purpose of the ordinance was to

formalize a practice of maintaining a level of financial resources available for funding during unfavorable economic periods. In the 2012 and 2013-2014 planning period, due to the difficult economic environment, the RTA Board deferred this policy in favor of a policy that slowly builds a 5% fund balance over a longer period of time.

Financial Policies

CAPITAL EXPENDITURE POLICIES

The RTA Five-Year Capital Program is adopted by the RTA after affirmative vote of at least 12 RTA Directors, after consultation with the Service Boards, and after holding a minimum of three public hearings in Cook County and one public hearing in each of the other counties in the metropolitan region. Preparation of the RTA's capital budget is guided by the following policies found in the RTA Act.

A five-year program for capital improvements is updated annually. Each capital improvement to be undertaken by or on behalf of a Service Board should meet the criteria set in the Strategic Plan and be consistent with any sub-regional or corridor plan adopted by the RTA.

In reviewing proposals for improvements to be included in a Five Year Capital Program, the RTA may give priority to improvements that are intended to bring public transportation facilities into a state of good repair.

The Five-Year Capital Program shall also identify capital improvements to be undertaken by a Service Board, a transportation agency, or a unit of local government and funded by the Authority from amounts in the Innovation, Coordination, and Enhancement Fund.

FIXED ASSETS POLICIES

The RTA sets a fixed asset capitalization threshold of no less than $5,000 for any capital item(s). Capital assets are recorded at historical cost (or fair market value at the time of donation, if donated) and have a useful life of at least two years following the date of acquisition. Any acquisitions during the year are considered acquired at the beginning of that year for the purpose of computing depreciation.

Description	Useful life
Furniture and Equipment	5 years
Computer Equipment	5 years
Leasehold improvements	Life of the lease

GENERAL OBLIGATION BOND POLICIES

The RTA's policy states that bonds should be payable from all revenue and all other funds received or held by the RTA that lawfully may be used for retiring the debt. Exceptions to this are amounts in the Joint Self-Insurance Fund (JSIF) and amounts required to be held or used with respect to separate ordinance obligations. The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State of Illinois. In addition, RTA Sales Tax must be 2.5 times greater than the debt service requirement. If, for any reason, the RTA has not made the required monthly debt service payment, the trustee is to deduct it from the receipts. If all payments have been made, the funds are made available to the RTA for regular use. Under the Act, the CTA, Metra and Pace fare box receipts and funds on hand will not be used for payment of debt service.

INVESTMENT POLICIES

The RTA's policy complies with Illinois law, addresses safety of principal, liquidity of funds, rate of return, public trust, and Investments in Local and Disadvantaged Institutions. It further permits investments and prescribes safekeeping, collateralization, and reporting requirements.

The RTA policy establishes the following objectives:

- **Safety of Principal** – Every investment will be made with safety as the primary and overriding concern. Each investment transaction shall en-

sure that loss of capital, whether from credit or market risk, is minimized.

- **Liquidity** - Maturity and marketability aspects of investments should be coordinated with the anticipated cash flow needs of the RTA.

- **Rate of Return** - A secondary objective is to seek the highest return on investments consistent with preservation of principal and prudent investment principles.

- **Public Trust** - The RTA and its officers should avoid any investment transaction or practice which in appearance may impair public confidence in its stewardship of public funds.

- **Investments in Local and Disadvantaged Institutions** - Locally owned and disadvantaged business financial institutions contribute to economic development of the RTA service area. The RTA recognizes its interest in the vitality of the local economy by investing in local, minority, and female (if any) owned financial institutions.

OPERATING BUDGET POLICIES

The RTA operating budget and two-year financial plan approval process is based on the following guidelines:

- Adoption requires an affirmative vote of at least 12 RTA Directors following at least one public hearing in the metropolitan region and meetings with the county board or its designee of each of the several counties in the metropolitan region.

- The Service Boards (CTA, Metra, and Pace) prepare and publish, for public hearing and comment, a comprehensive budget document that is to conform to the RTA "marks." RTA marks include the recovery ratio for the annual budget, operations funding for the annual budget and two-year financial plan, and the five-year capital program.

- All funds are required to balance. The total budgeted revenues must equal the sum of budgeted expenditures for each fund. Revenue sources include sales tax, state funds (e.g. Public Transportation Funds, State Financial Assistance, and Free Rides/Reduced Fare Reimbursement) and other revenue.

- The adopted budget should reflect a year-end unreserved and undesignated fund balance of its general fund equal to or greater than 5% of the RTA's total operating expenditures for the year. If the amount is below 5%, the financial plan must show full replenishment by the end of the current planning cycle. This financial policy was deferred in the 2012 budget and in the 2013-2014 financial planning years becuase of the economic downturn.

- The combined revenue from RTA operations should cover at least 50% of the system operating costs. ADA Paratransit service revenues should cover at least 10% of the operating costs.

PENSION FUNDING POLICIES

The RTA, Metra, and Pace are required to contribute the amounts necessary to fund the benefits of their respective employees in the Plan using the projected unit credit actuarial method. Employer contribution and the income it earns through investments are used to operate the Plan and to pay benefits. Assets are valued recognizing a portion of both realized and unrealized gains and losses in order to avoid wide swings in actuarially determined funding requirements from year to year.

RTA ORDINANCE NO. 2011-79

APPROVING THE 2012 BUDGETS AND 2013-2014 FINANCIAL PLANS OF THE SERVICE BOARDS, ADOPTING THE 2012 BUDGET AND PROGRAM OF THE AUTHORITY, APPROPRIATING FUNDS FOR THE 2012 BUDGETS, ALLOCATING CERTAIN REVENUES OF THE RTA TO THE SERVICE BOARDS, ADOPTING THE FIVE-YEAR CAPITAL PROGRAM, AND TAKING CERTAIN OTHER ACTIONS WITH RESPECT TO THE BUDGET AND PROGRAM FOR FISCAL YEAR 2012

WHEREAS, Section 4.01 of the Regional Transportation Authority Act (the "Act") directs the Board of Directors of the Regional Transportation Authority (the "RTA Board") to (i) appropriate money to perform the purposes of the Regional Transportation Authority (the "RTA" or the "Authority") and provide for payment of debts and expenses of the RTA, (ii) take action with respect to the budget and two-year financial plan of each of the Chicago Transit Authority (the "CTA"), the Commuter Rail Division of the Regional Transportation Authority ("Metra"), the Suburban Bus Division of the Regional Transportation Authority ("Pace", and, together with the CTA and Metra, collectively, the "Service Boards" and each, individually, a "Service Board"), as provided for in Section 4.11 of the Act, and (iii) adopt an Annual Budget and Two-Year Financial Plan for the RTA that includes the annual budget and two-year financial plan of each Service Board that has been approved by the RTA;

WHEREAS, pursuant to Section 4.11 of the Act, the RTA Board adopted Ordinance 2011-58 on September 14, 2011, identifying the amounts of funds estimated to be available to each Service Board for operations during fiscal year 2012 and the two following fiscal years;

WHEREAS, pursuant to Section 4.11 of the Act, each Service Board has submitted its proposed fiscal year 2012 budget and proposed 2013-2014 financial plan to the RTA for its review;

WHEREAS, pursuant to Section 4.01(a) of the Act, the RTA has held at least one public hearing in the metropolitan region, and met with the county board or its designee of each of the several counties in the metropolitan region, with respect to its proposed annual budget and two-year financial plan, and considered the proposed budgets and financial plans of the Service Boards and the public comments with respect to those budgets and financial plans;

WHEREAS, Section 4.11 of the Act authorizes and directs the RTA to review the budgets and financial plans of the Service Boards for approval;

WHEREAS, pursuant to Sections 4.01(a) and 4.11(d) of the Act, the budgets and financial plans of the Service Boards shall contain estimated expenses for contributions to be made with respect to pension and other employee benefits, and the Service Boards are required to present to the RTA budgets prepared in such detail as prescribed by the Board, which have been prepared on both an accrual and a cash flow basis, and that fairly present the condition of any pension plan or trust for health care benefits with respect to retirees established by the Service Board and describes the plans of the Service Boards to meet the requirements of Sections 4.02a and 4.02b;

WHEREAS, pursuant to Sections 4.02a and 4.02b of the Act, the RTA shall continually review the payment of the required employer contributions to affected pension plans and if at any time the RTA determines that a Service Board's payment of any portion of the required contributions to an affected pension plan is more than one month overdue, it shall as soon as possible pay the amount of those overdue contributions to the trustee of the affected pension plan on behalf of that Service Board out of moneys otherwise payable to that Service Board under Section 4.03.3, and the RTA shall thereafter have no liability to the Service Board for amounts paid to the trustee of the affected pension plan, and if the RTA's payment of such contributions is similarly overdue it shall pay such overdue amount out of its administrative expenses;

WHEREAS, Section 4.10 of the Act prohibits the RTA from releasing funds, other than those allocated by statute, to the CTA in any fiscal year unless a unit or units of local government in Cook County (other than the CTA) enters or enter into an Agreement with the CTA to make a monetary contribution for such year of at least $5,000,000 for public transportation;

WHEREAS, pursuant to Section 4.03.3 of the Act, the RTA has established public funding levels in 2012 through 2014 for the Suburban Community Mobility Fund and the Innovation, Coordination, and Enhancement Fund (the "ICE Fund") that change proportionately with the percentage change in RTA estimated sales tax receipts;

WHEREAS, pursuant to Section 2.01d of the Act, the RTA has established public funding levels in 2012 through 2013 for the ADA Paratransit Fund;

WHEREAS, pursuant to Section 4.11(a) of the Act, the RTA Board shall review the interim 2012 results for the provision of Regional ADA Paratransit service operations, and the written report of the Executive Director related thereto, no later than September 15, 2012, and shall amend the 2012 budgets of the Authority and the Service Boards to provide for additional funding for the provision of ADA Paratransit services, if needed;

WHEREAS, the RTA will reimburse the purchase of excess liability and terrorism insurance by the RTA system's Loss Financing Plan to provide system protection against catastrophic loss;

WHEREAS, pursuant to Section 2.01b of the Act, the Authority shall each year adopt a Five-Year Capital Program that shall include each capital improvement to be undertaken by or on behalf of a Service Board; provided that the Authority finds that the improvement meets any criteria for capital improvements contained in the Strategic Plan, is not inconsistent with any subregional or corridor plan adopted by the Authority, and can be funded within amounts available with respect to the capital and operating costs of such improvement;

WHEREAS, pursuant to Section 2.01b of the Act, the RTA has conducted public hearings with respect to proposed Five-Year Capital Program and considered comments resulting from such hearings;

WHEREAS, the Five-Year Capital Program included with this Ordinance is based on capital program submittals from the Service Boards, and if the RTA Board makes any amendments to the estimates of capital funding available based on subsequent federal or state actions, the Service Boards will be required to adjust their capital programs to reflect such revised estimates;

WHEREAS, shortfalls in transit operating funding have necessitated the transfer of federal capital funds to cover operating costs, but such transfers are unsustainable over the long term and the priority need to maintain the existing system and bring it towards a state of good repair, as identified in the RTA Moving Beyond Congestion Strategic Plan and the Illinois Auditor General Management and Performance Audit;

WHEREAS, the RTA has previously authorized the use of federal capital funds by the Service Boards to pay preventive maintenance expenses in 2012 and 2013, and under the 2012 budgets and 2013-2014 financial plans submitted by the Service Boards such transfers are not included;

WHEREAS, unfavorable economic conditions have required the RTA to deplete its fund balance to provide funds to the Service Boards, and to allocate, rather than reserve, financial resources in an effort to preserve operating stability in prior years;

WHEREAS, unfavorable economic conditions have created the need to waive, for purposes of the adoption of the 2012 Budget and 2013-2014 Financial Plan, the provision of the RTA Funding Policy adopted by Ordinance No. 98-15 that requires that the RTA Annual Budget and Two-Year Financial Plan show a year-end unreserved and undesignated fund balance equal to 5% of the RTA general fund expenditures by no later than the end of the three-year planning period ("the Fund Balance Policy");

WHEREAS, the waiver of the Fund Balance Policy and the depletion of the RTA's fund balance prevents the RTA from providing additional operating funding to the Service Boards in the event that revenues decline below estimated levels, and therefore the RTA funding policy adopted by Ordinance 91-9 (the "Fund to Budget Policy") must be waived for the 2012 fiscal year;

WHEREAS, the RTA held a special Finance Committee meeting on December 5th, 2011 to review the details of the Service Boards' budgets and were given commitments from the Service Boards that they will maintain balanced budgets despite the fiscal challenges outlined in the budgets they submitted to the RTA; and

WHEREAS, the RTA Board has determined that it is in the best interest of the RTA to take the following actions in order to carry out its powers and duties under the Act.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF DIRECTORS OF THE REGIONAL TRANSPORTATION AUTHORITY THAT:

ARTICLE I - INCORPORATION OF PREAMBLES

The preambles of this ordinance are hereby incorporated into this text as if set out herein in full.

ARTICLE II - APPROVAL OF BUDGETS AND FINANCIAL PLANS

Section One:
Service Board Budgets and Financial Plans

1.1 In compliance with the Act, the RTA has received and reviewed the proposed budgets for 2012 and financial plans for 2013 and 2014, of each of the Service Boards.

1.2 With respect to the proposed budget and financial plan submitted by the CTA (as summarized in Schedule I-B), based on the commitment provided by the CTA President that the CTA will prepare and execute an alternate plan to balance its budget if the full amount of the projected labor concessions presented in its budget are not achieved by July 1,2012, without resorting to transfers of funding from its capital program to preventive maintenance, issuing debt instruments, or seeking additional funds from the RTA, and subject to the CTA either (i) achieving labor concessions by July 1, 2012 that will result in the projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in CTA's "Total Operating Expenses" on Schedule I-B, or (ii) submitting a revised budget to the RTA for review and approval by July 1, 2012, that reflects savings from labor concessions included in a collective bargaining agreement executed in 2012 and/or the implementation of fare increases, service cuts, or other measures to reduce operating costs or increase system-generated revenues, as may be necessary to establish a balance between anticipated revenues from all sources and the costs of providing services for fiscal years 2012, 2013 and 2014, the RTA finds as follows:

(a) the CTA budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the CTA budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the CTA budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of CTA sufficient to allow CTA to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the CTA budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the CTA budget and plan has been prepared in accordance with sound financial practices;

(f) the CTA budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the CTA budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.3 With respect to the proposed budget and financial plan submitted by Metra (as summarized in Schedule I-B), the RTA finds as follows:

(a) the Metra budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Metra budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Metra budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Metra sufficient to allow Metra to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Metra budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the Metra budget and plan has been prepared in accordance with sound financial practices;

(f) the Metra budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established;

(g) the Metra budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.4 With respect to the proposed budget and financial plan submitted by Pace for Suburban Service (as summarized in Schedule I-B), and subject to Pace taking budget balancing actions in 2014 as noted in Schedule I-B, the RTA finds as follows:

(a) the Pace Suburban Service budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Pace Suburban Service budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Pace Suburban Service budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Pace sufficient to allow Pace to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Pace Suburban Service budget and plan is based upon and employs assumptions and

projections which are reasonable and prudent;

(e) the Pace Suburban Service budget and plan has been prepared in accordance with sound financial practices;

(f) the Pace Suburban Service budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the Pace Suburban Service budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.5 With respect to the proposed budget and financial plan submitted by Pace for ADA Paratransit service (as summarized in Schedule I-B), and subject to Pace taking budget balancing actions in 2013 and 2014 as reflected in Schedule I-B, the RTA finds as follows:

(a) the Pace ADA Paratransit service budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Pace ADA Paratransit service budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Pace ADA Paratransit service budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Pace sufficient to allow Pace to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Pace ADA Paratransit service budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the Pace ADA Paratransit service budget and plan has been prepared in accordance with sound financial practices;

(f) the Pace ADA Paratransit service budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the Pace ADA Paratransit service budget and plan is consistent with the goals and objectives adopted by the Authority in the Strategic Plan.

1.6 Pursuant to Section 4.11 of the Act, the 2012 budgets and 2013-2014 financial plans for Metra and Pace, as presented in the attached Schedule I-B, are hereby approved. The 2012 budget and 2013-2014 financial plan for the CTA as presented in the attached Schedule I-B are conditionally approved, based on the commitment provided by the CTA President that the CTA will prepare and execute an alternate plan to balance its budget if the full amount of the projected labor concessions presented in its budget are not achieved by July 1 without resorting to transfers of funding from its capital program to preventive maintenance, issuing debt instruments, or seeking additional funds from the RTA, and subject to the CTA either (i) achieving labor concessions by July 1, 2012 that will result in the projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in CTA's "Total Operating Expenses" on Schedule I-B, or (ii) submitting a revised budget to the RTA for review and approval by July 1, 2012, that reflects savings from labor concessions included in a collective bargaining agreement executed in 2012 and/or the implementation of fare increases, service cuts, or other measures to reduce operating costs or increase system-generated revenues, as may be necessary

to establish a balance between anticipated revenues from all sources and the costs of providing services for fiscal years 2012, 2013 and 2014.

1.7 As authorized by Section 4.11 of the Act, the RTA Board hereby directs that, no more than 30 days after each fiscal quarter, each Service Board is directed to report to the RTA its financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction, as of the end of and for such quarter, for review by the RTA for conformity with the approved budget for such period. CTA is further directed to include in its first quarter report an update regarding the status of its labor negotiations, as well as a detailed plan to balance its 2012 budget and 2013-2014 financial plan, including any projected fare increases or service cuts, in the event that it does not achieve the projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in Schedule I-B. CTA is further directed to include in its second quarter report an update on its labor negotiations and, in the event it has not achieved concessions sufficient to meet the projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in Schedule I-B, an affirmation that it has implemented the cost savings and/or revenue enhancing measures outlined in the plan submitted with its first quarter report, along with a description of any deviations therefrom.

Section Two:

RTA Budget and Financial Plan

The RTA Board has received and reviewed the 2012 Budget and Financial Plan of the Authority as summarized in Schedule I-A. The 2012 Budget and Financial Plan are hereby approved and the RTA Board finds as follows:

(a) The 2012 budget and financial plan shows a balance between anticipated revenues from all sources and anticipated expenses, including the funding of operating deficits and the discharge of encumbrances incurred in prior periods and payment of principal and interest on outstanding indebtedness when due, as summarized in Schedule I-A.

(b) The 2012 budget and financial plan shows cash balances sufficient to pay with reasonable promptness all obligations and expenses as incurred, as summarized in Schedule I-E.

(c) The 2012 budget and financial plan shows that the level of fares and charges for public transportation provided by, or under grant or purchase of service contracts of, the Service Boards is sufficient to cause the aggregate of all projected system-generated revenues from such fares and charges received in 2012, apart from ADA Paratransit services, to equal at least fifty percent (50%) of the aggregate cost of providing such public transportation in 2012, and at least ten percent (10%) for ADA Paratransit service in 2012, as required by the Act, and as summarized in Schedule I-C.

(d) The 2012 budget and financial plan are based on and employ assumptions and projections which are reasonable and prudent.

(e) The budgeted "administrative expenses" of the RTA for 2012, as defined in Section 4.01(c) of the Act, do not exceed the maximum administrative expenses permitted for 2012.

(f) The 2012 budget and financial plan are consistent with the goals and objectives adopted by the Authority in the Strategic Plan.

ARTICLE III - ADOPTION OF THE FIVE-YEAR CAPITAL PROGRAM

Section One:

Adoption of the Five-Year Capital Program

The RTA Board hereby adopts the Five-Year Capital Program Revenues and Expenditures attached as

Schedule II-A and Schedule II-B, subject to continuing review by the RTA.

Section Two:

Prohibition on Capital Projects Not Included in the Program

Pursuant to Section 4.01(h) of the Act, no Service Board shall undertake any capital improvement which is not identified in the Five-Year Capital Program.

Section Three:

Applications for Federal and State Capital Grants, Loans and Other Funds

In accordance with Section 4.02(b) of the Act, each Service Board is directed to provide notice to the RTA of its intent to file any application for federal or state capital grants, loans or other funds prior to making any such application, and to file a copy of any such application with the RTA. No Service Board shall apply for or receive any capital grant or loan unless it is identified in the RTA Five-Year Program and is consistent with the RTA Strategic Plan.

Section Four:

Prohibition on Use of Federal Capital Funds for Preventive Maintenance

Federal capital funds shall not be used by a Service Board to fund preventive maintenance expenses in its operating budget unless the RTA Board determines, based on adequate information supplied by the Service Board, that such use will not have a materially adverse impact on the state of good repair of such Service Board's capital assets.

ARTICLE IV - APPROPRIATION OF FUNDS AND CERTAIN OTHER ACTIONS

Section One:

Appropriation for Each Service Board

The following amounts for 2012 are appropriated for payment to each Service Board from the enumerated sources of funds and for the specified objects and purposes.

1.1 Statutory RTA Taxes

There is appropriated from the taxes collected under Section 4.03, to each Service Board for expenditure pursuant to the 2012 budget approved for such Service Board in Article II, the amount required by Sections 4.03.3(a) and 4.03.3(b) of the Act. The estimated amount of each appropriation is specified as Part I Sales Tax Allocation on Schedule I-D.

After receipt by the RTA of the proceeds of taxes imposed pursuant to Section 4.03 of the Act, the Executive Director of the RTA shall provide for the payment to each Service Board the specified appropriation.

1.2 Statutory RTA Sales Taxes and Public Transportation Funds

(a) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and public transportation fund receipts received pursuant to Section 4.09 of the Act, to Pace for expenditure for ADA Paratransit Services, the amount required by Section 4.03.3(c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Total for ADA Paratransit Service on Schedule I-D.

(b) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and public transportation fund receipts received pursuant to Section 4.09 of the Act to Pace for expenditure for Suburban Community Mobility, the amount required by Section 4.03.3(c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Suburban Community Mobility Funding to Pace on Schedule I-D.

(c) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and public transportation fund receipts received pursuant to Section 4.09 of the Act, to the Innovation, Coordination and Enhancement (ICE) Fund the amount required by Section

4.03.3(c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Innovation, Coordination & Enhancement on Schedule I-D. Pursuant to Ordinance 2011-58, 2012 funds in the ICE Fund shall be reserved for potential expenditure by Pace for ADA Paratransit service.

The RTA Board directs Pace to provide to the RTA any information requested by the Executive Director that is, in the judgment of the Executive Director, necessary to estimate the difference between (i) the projected final 2012 operating deficit of ADA Paratransit service and (ii) the total amount of funding from all sources estimated to be available for 2012 operations of ADA Paratransit service (such difference, the "Shortfall Amount"). The Shortfall Amount shall be established by the Executive Director after reviewing the 2012 ADA Paratransit service operating deficit estimate included in Pace's budget submission in September 2012, and, after being approved by the Chairman of the RTA Board and the Chairman of the Finance Committee of the RTA Board, shall be submitted to the RTA Board together with a certification from Pace that additional funds equal to the Shortfall Amount are necessary for 2012 ADA Paratransit service operations. Such certification shall be accompanied by a report describing Pace's efforts to implement reasonable and appropriate cost savings and revenue raising measures related to ADA Paratransit service.

(d) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and public transportation fund receipts received pursuant to Section 4.09 of the Act to each Service Board for expenditure pursuant to the Budget approved for such Service Board in Article II, the amount required by Section 4.03.3(c). The estimated amount of each appropriation is specified as Part II Allocation; Remaining Balance to Service Boards in Schedule I-D.

After receipt by the RTA of the proceeds of taxes imposed pursuant to Section 4.03 of the Act, and Public Transportation Fund receipts pursuant to Section 4.09 of the Act, the Executive Director of the RTA shall provide for the payment to each Service Board the specified appropriation.

1.3 Free and Reduced Fare Reimbursement

There is appropriated, for expenditure by each Service Board pursuant to the 2012 Budget approved in Article II, amounts received from the State of Illinois for reimbursement of revenues lost from providing free or reduced fare rides.

After receipt by the RTA of such funds from the State of Illinois, the Executive Director shall provide for the payment to each Service Board its proportionate share of the proceeds estimated to be received from the State as identified on Schedule I-A; provided that such funds shall not be distributed to the CTA unless and until a unit or units of local government in Cook County (other than the CTA) enters or enter into an agreement with the CTA to make a monetary contribution for such year of at least $5,000,000 for public transportation.

1.4 Discretionary Funds of the RTA – Public Transportation Fund, 15% Sales Tax, Other RTA Revenues

(a) There is appropriated, for expenditure by each Service Board pursuant to the 2012 Budget approved in Article II, the lesser of (i) the amounts specified as "RTA Discretionary Funds" and any amounts specified on Schedule I-B from other receipts and revenues of the RTA, and (ii) so much as may be necessary that the actual amounts appropriated for each Service Board under paragraphs 1.1 and 1.2 of this section equal the amounts specified as "Total RTA Funding for Operations" on Schedule I-B; provided that such appropriation to the CTA is conditioned upon the CTA either (i) achieving labor concessions by July 1, 2012 that will result in the

projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in CTA's "Total Operating Expenses" on Schedule I-B, or (ii) submitting a revised budget to the RTA by July 1, 2012, that reflects savings from labor concessions included in a collective bargaining agreement executed in 2012 and/or the implementation of fare increases, service cuts, or other measures to reduce operating costs or increase system generated revenues as may be necessary to establish a balance between anticipated revenues from all sources and the costs of providing services for fiscal years 2012, 2013 and 2014.

(b) There is appropriated, for expenditure by Pace pursuant to the amount specified as RTA South Suburban Community Job Access Funds on Schedule I-B from other receipts and revenues of the RTA.

(c) There is appropriated, for expenditure by Metra for projects, as specified on Schedule II-B, and pursuant to the first year of the Five-Year Capital Program approved in Article II, the amounts specified as "Transfer Capital RTA Capital Reserve Funds to Metra" on Schedule I-A from other receipts and revenues of the RTA.

Subject to receipt by the RTA of sufficient proceeds of taxes imposed pursuant to Section 4.03 of the Act, and from the Public Transportation Fund receipts pursuant to Section 4.09 of the Act, the Executive Director is hereby directed to provide for the payment of such funds described in paragraphs (a), (b) and (c) as soon as may be practicable upon their receipt provided that each Service Board is in compliance with the requirements of Section 4.11 of the Act and this Ordinance; provided that, no such funds shall be distributed to the CTA unless and until a unit or units of local government in Cook County (other than the CTA) enters or enter into an agreement with the CTA to make a monetary contribution for such year of at least $5,000,000 for public transportation; provided further, that, no such funds shall be paid to the CTA on or after June 1, 2012, unless the CTA has either (i) achieved labor concessions that will result in the projected "Savings from Labor Reform and Work Rule Changes" in 2012, 2013 and 2014 as reflected in CTA's "Total Operating Expenses" on Schedule I-B, or (ii) held public hearings with respect to such service cuts and fare increases as are necessary to establish a balance between anticipated revenues from all sources and the costs of providing services for fiscal years 2012, 2013 and 2014.

Section Two:

Appropriation to the Regional Transportation Authority

In 2012 there is appropriated, for expenditure for the operating purposes of the RTA (the "Agency") the amounts specified on Schedule I-A as "Agency Administration and Other", "RTA Regional Services and Programs", and "RTA Agency Regional Capital Program", pursuant to the 2012 Budget approved in Article II, from other receipts and revenues of the RTA.

In 2012 there is appropriated for transfer from the RTA's Fund Balance to the Joint Self Insurance Fund (JSIF), funds to reimburse the insurance premium and associated fees for liability and terrorism insurance for the RTA System's Loss Financing Plan the amount specified on Schedule I-A as "RTA Joint Self-Insurance Fund (JSIF) Funding".

The Executive Director is authorized to transfer up to 10% from and among each of the items shown in Schedule I-A for 2012 as "Agency Administration and Other", "RTA Regional Services and Programs", and "Regional Technology and Agency Capital".

ARTICLE V - GENERAL

Section One:

Implementation and Dissemination

The Executive Director is authorized and directed to take appropriate action to implement and enforce this

Ordinance and to prepare and disseminate the 2012 Annual Budget and Program of the RTA in accordance with the Act and the policies established herein.

Section Two:
Organization of the RTA

The Executive Director shall organize the staff of the Authority, shall allocate their functions and duties, and shall fix compensation and conditions of employment. The Executive Director shall develop, and modify as may be necessary, Agency policies regarding travel, business and relocation expenses.

Section Three:
Fund Balance Policy

The provisions of the Fund Balance Policy adopted by Ordinance 98-15 are hereby waived for the 2012 budget and 2013-2014 Financial Plans.

Section Four:
Fund to Budget Policy

The provisions of the Fund to Budget Policy are hereby waived for the 2012 fiscal year.

Section Five:
Non-Waiver of RTA Authority

Nothing in this Ordinance is intended to or shall have the effect of (i) creating an obligation on the part of the RTA to provide funding to the Service Boards in excess of their respective statutorily allocated portions of the proceeds from taxes and State funds actually received by the RTA, nor (ii) waiving any discretion the RTA may have under law to amend the amounts appropriated to the Service Boards under the Ordinance, subject to compliance by the Service Boards with terms and conditions established by the RTA. Furthermore, nothing in this Ordinance is intended to or shall have the effect of waiving any discretion the RTA may have under law to subject to review the determinations made in this Ordinance, including, but not limited to, setting recovery ratios for the Service Boards, establishing exclusions or inclusions of certain revenues or expenditures from the calculation of such recovery ratios, or determining the allowable uses of federal, state or local funds.

Section Six:
Executive Director's Authority to Apply for Additional Funds

The Executive Director, and his or her designee, is authorized and directed to execute and file applications on behalf of the RTA with the United States Department of Transportation ("USDOT"), Federal Transit Administration ("FTA"), the Illinois Department of Transportation ("IDOT"), and any other funding agency (collectively the "Funding Agencies") for any monies available for funding of the RTA Annual Budget. The Executive Director, and his or her designee, is authorized to furnish such additional information, assurances, certifications and amendments as the funding agencies may require in connection with such applications or the projects. The Executive Director, and his or her designee, is authorized and directed on behalf of the RTA to execute and deliver grant agreements and all subsequent amendments thereto between the RTA and the funding agencies. Further, the Executive Director, and his or her designee, is authorized and directed to take such action as the he or she deems necessary or appropriate to implement, administer, and enforce said agreements and all subsequent amendments thereto on behalf of the RTA.

Section Seven:
Direction to File this Ordinance with Public Officials.

The Executive Director is authorized and directed to file the 2012 Budget and Program and a copy of this Ordinance with the Governor of Illinois, the Illinois General Assembly, the Comptroller of the State of Illinois, the Mayor of the City of Chicago and the Auditor General of the State of Illinois, along with an appropr ate certification that this budget and program meet the requirements of the Act.

Schedules to Ordinance 2011-79 can be found in the Appendices under Exhibit 9-24.

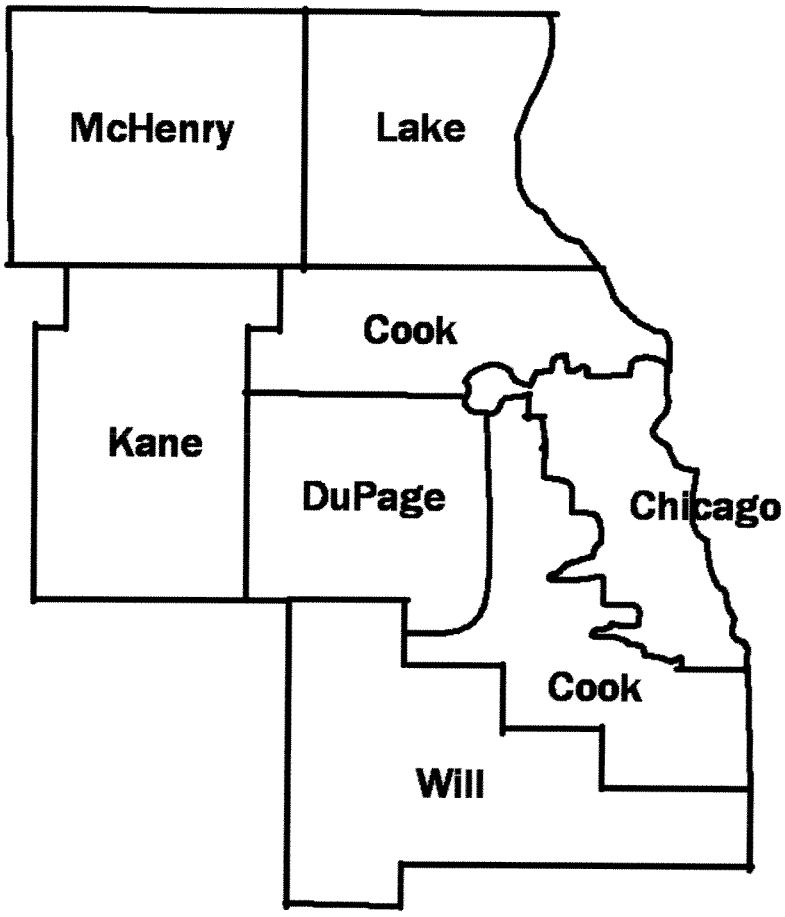
The GFOA Distinguished Budget Presentation Award

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation award to the Regional Transportation Authority, Illinois for its annual budget for the fiscal year beginning January 1, 2011.

In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.

2 Budget in Brief



Overview

The Regional Transportation Authority (RTA or "Agency") provides funding, planning, and fiscal oversight for regional bus and rail operations in the six-county Northeastern Illinois region as set forth by the RTA Act. The Act designates the Agency as the primary public body in the region to secure funds for public transportation. The Agency is authorized to impose taxes in the region, issue debt, and is responsible for the allocation of federal, state, and local funds to finance both the operating and capital needs of public transportation in the region.

The RTA Board of Directors governs the Agency. Three independent Service Boards, the Chicago Transit Authority (CTA), Metra commuter rail, and Pace suburban bus, have operational responsibility for public transportation within the six-county region and are governed by their own separate boards of directors. The CTA provides bus and rapid transit rail service in the City of Chicago and neighboring suburbs. Metra provides commuter rail service throughout the six-county region. Pace provides bus service within the suburbs and between the suburbs and the City of Chicago, and also provides ADA Paratransit service for the entire region (Exhibit 2-1).

Each year, the RTA Board must adopt an annual budget, two-year financial plan, and a five-year capital program for each Service Board. The principal features of this process are outlined in the following paragraphs. In September, the RTA Board approves the "marks" for each Service Board. The marks include the required recovery ratio for the annual budget and projected operations funding levels for the annual budget, two-year financial plan, and the five-year capital program. The marks guide the Service Boards' budgetary process. Each Service Board prepares and publishes, for public hearing and comment, a comprehensive budget document that is to conform to the RTA marks. After considering public comment, the CTA, Metra, and Pace board members adopt their respective budgets. In November, those budgets are forwarded to the RTA, which consolidates the Agency and the Service Board budgets into a proposed RTA budget document. The RTA Board releases this document for public hearing and comment before adoption in December.

Exhibit 2-1: **RTA Organization Structure**

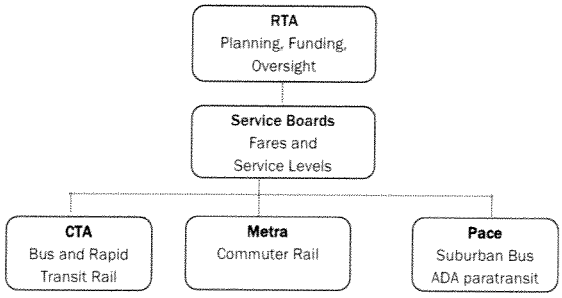


Exhibit 2-2: **Financial Relationship and Responsibilities of the RTA and Service Boards**

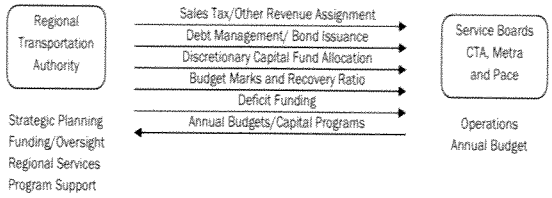

Exhibit 2-2 illustrates the principal responsibilities and interactions between the Agency and Service Boards in the annual budget and capital program process.

Service Characteristics

There are more than 8 million residents in the six-county Northeastern Illinois region, an area that covers 3,749 square miles. The RTA system includes more than 6,000 buses, rail cars, and locomotives, plus over 700 vanpool vehicles serving customers on more than 350 routes through approximately 380 stations. In 2011, the regional public transportation system provided nearly 652 million rides including close to 3.5 million ADA paratransit trips.

The combined assets of the RTA system have a replacement value of $142.2 billion. With an average asset life of over 25 years, the RTA system needs more than $1 billion in capital funds each year just to keep the existing infrastructure in good repair.

Exhibit 2-3: **RTA Statement of Revenues and Expenditures** - General and Agency Funds (dollars in thousands)

	2011 Estimate	2012 Budget
Public Funding		
RTA Sales Tax (Part I)	717,007	737,060
RTA Sales Tax (Part II)	254,044	261,158
State Public Transportation Funds - Part I (PTF)	179,246	184,265
State PTF (Part II)	123,294	123,609
State Financial Assistance (ASA/AFA)	123,000	130,071
State Funding for ADA & Debt Service per MOU	18,700	-
State Reduced Fare Reimbursement	33,570	33,570
RTA Capital Project Reserves	-	15,690
RTA Agency Revenue	17,600	18,220
Total Revenue	**$ 1,466,461**	**$ 1,503,643**
Operating Expenditures		
RTA Total Funds for CTA Operations	546,144	588,581
RTA Total Funds for Metra Operations	333,328	337,478
RTA Total Funds for Pace Suburban Service Operations	134,413	139,250
RTA Total Funds for ADA Paratransit Service Operations	115,149	115,000
RTA Funding for Innovation, Coordination, and Enhancement (ICE)	2,011	10,159
State Reduced Fare Reimbursement	33,570	33,570
Agency Administration, Regional Services/Programs	33,651	35,204

Beginning Balance	7,318	26,375
Change in Fund Balance	31,937	4,711
Change in Funds Reserved	(7,500)	
Use of RTA Funds for JSIF	(5,380)	(5,000)
Ending Unreserved/Undesignated Fund Balance	**$ 26,375**	**$ 26,086**
% of Total Operating Expenditures	2.2%	2.1%
System-Generated Revenue Recovery Ratio	**53.4%**	**51.0%**
ADA Paratransit Recovery Ratio	10.0%	10.0%

Operating Budget

A statement of agency revenues and expenses for 2011 and the 2012 budget is presented in Exhibit 2-3, and subsequent paragraphs summarize line item information. A combined statement of RTA system revenues and expenses from 2010 through 2014 is contained in the Region section.

OPERATING REVENUES

In 2012, total RTA revenues are projected at $1.504 billion. This represents an increase of $37.2 million or 2.5% over the 2011 estimate of $1.466 billion. RTA Sales Tax (Part I and Part II) of $998.2 million accounts for 66% of total revenue, with receipts provided by the State's matching Public Transportation Fund (PTF) totaling $307.9 million or 21% of total revenues. The remaining 13% includes $130 million or 9% from a State Financial Assistance initiative to pay

the debt service on RTA Strategic Capital Investment Program (SCIP) bonds issued for Service Board Capital investment. The State also is expected to provide partial reimbursement for reduced fare and free ride programs of nearly $34 million or 2%. In 2011, the State, by means of a Memorandum of Understanding (MOU) between the Illinois Department of Transportation (IDOT), the RTA, and the three Service Boards (CTA, Metra, and Pace), provided $19 million of funding for ADA paratransit service and the debt service on bonds issued by the RTA in order to provide capital funding to the CTA. In 2012 the funds provided by the MOU are no longer available. The remaining balance of $34 million or 2% is RTA Agency revenues which include receipts for sales tax interest, investment income, and grant funds for agency sponsored initiatives. RTA Agency revenues also include RTA Capital Project Reserves which will be transferred to Metra's Capital Reserve Fund and to the Agency's Regional Capital Program. Exhibit 2-4 illustrates the share of agency revenue by funding source.

PUBLIC FUNDING

Sales Tax is the primary source of revenue for the RTA. The tax is authorized by Illinois statute, imposed by the RTA in the six-county region of Northeastern Illinois, and collected by the State. Receipts are disbursed by formulas detailed in the RTA Act. 85% of the RTA sales tax (Part I) collected in the region, established by statute prior to amendatory legislation in 2008, is allocated to the Service Boards. The RTA receives the remaining 15%. All receipts of RTA sales tax (Part II) authorized by legislation passed in 2008 are allocated for Service Board operations after the funding of distinct initiatives such as the ADA Paratransit fund, the RTA Innovation, Coordination, and Enhancement (ICE) Fund, and the Suburban Community and Mobility Fund (SCMF). The 2011 sales tax estimate and the 2012 budget year sales tax projections provided in Exhibit 2-3 were developed in August 2011 after assessing state and regional economic data and national forecasts.

In accordance with the RTA Act, the State Treasurer is authorized and required to transfer from the State

Exhibit 2-4: **2012 RTA Revenue** - $1,504 million

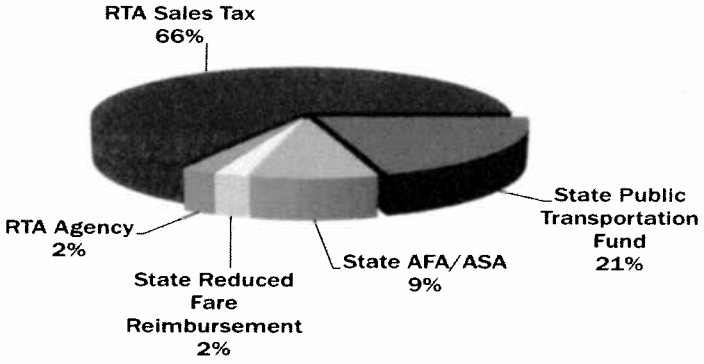

Exhibit 2-5: **2012 RTA Expenditures** - $1,499 million

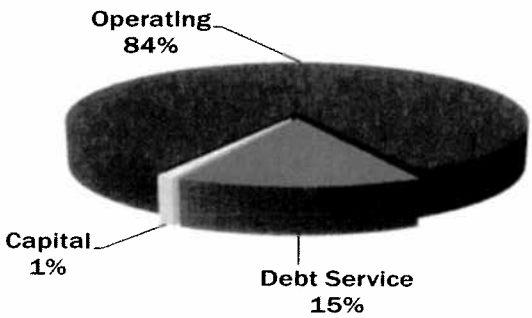

of Illinois General Revenue Fund revenue identified in this document as Public Transportation Funds (PTF – Part I and Part II). PTF Part I receipts are equal to 25% of net revenues realized from Part I Sales Tax, and flow directly to the RTA. These funds are allocated at the discretion of the RTA Board for Service Board operations and/or capital program initiatives. PTF Part II receipts, from the amendatory legislation passed in 2008, are matched as follows: Part I sales tax (5%), Part II sales tax (30%), and Chicago real estate transfer tax (RETT) (30%). PTF revenue provided by the 2008 legislation is designated for certain operations and programs before formulaic distribution to the Service Boards; complete details regarding sales tax, public transportation funds, and RETT are provided in the RTA chapter of this document.

RTA Sales Tax (Part I) and Public Transportation Funds (Part I)

The traditional RTA sales tax (identified in this document as RTA Sales Tax – Part I) has been the major source of funding for public transportation in Northeastern Illinois for nearly three decades. As previously discussed, 85% of these RTA sales tax receipts are apportioned to the Service Boards by statutory formula. Budgeted receipts for 2012 are $737 million.

State Public Transportation Funds (PTF Part I) from Part I sales taxes are based on a formula tied to Part I sales tax results. The fund provides the RTA with a 25% match of Part I sales tax proceeds, which means that for every four dollars collected in Part I sales tax the RTA receives an additional dollar in PTF Part I. Budgeted receipts for 2012 are $184 million.

RTA Sales Tax (Part II), PTF (Part II), and Real Estate Transfer Tax

In 2008, State legislation increased the RTA sales tax rate throughout the region, increased the portion of RTA sales tax revenues matched by PTF, and increased the real estate transfer tax (RETT) in the City of Chicago. The revenue from RETT, which is collected by the City of Chicago, flows directly to the CTA and thus is not included in the RTA statement of revenues and expenditures (Exhibit 2-3). However, PTF II funds associated with RETT, by statute, flow through the RTA and are included in the RTA statement of revenues and expenditures. The 2012 budget for Part II sales tax and PTF Part II are $261 million and $124 million, respectively.

State Financial Assistance

This revenue source is state-authorized assistance to reimburse the debt service expenses for RTA Strategic Capital Improvement Program (SCIP) bonds. Subject to the appropriation of funds, the RTA will continue to be eligible to receive State Financial Assistance (ASA and AFA) payments. Projected receipts for 2011 and 2012 are $123 million and $130 million, respectively.

Reduced Fare and Free Ride Reimbursement

This operating assistance is partial reimbursement from the State to the Service Boards for the fare discounts and free ride programs they provide which are mandated by law. This includes discounts to students, elderly, and disabled riders as well as free ride programs for seniors and disabled persons who qualify under the State's Circuit Breaker Program. The funds are distributed by the State through the RTA and then to the Service Boards. The budget for 2012 is close to $34 million, remaining unchanged from receipts expected in 2011.

RTA Capital Project Reserves

The 2012 RTA regional capital program budget includes strategic priority initiatives which reflect collaborative work with the Service Boards to increase ridership, reduce costs, and increase revenues, while simultaneously focusing on improving customer service. The total regional capital program funding needs are $11 million, which include items such as regional transit signal priority, regional integration of real time travel information and trip planning, interagency signage expansion, and downtown connection improvements. Another $5 million from the RTA Capital Project Reserves has been allocated to capital programs at Metra for 2012.

RTA Agency Revenue

This RTA revenue category includes sales tax interest, investment income, transit benefit program revenue, and grant funds from state and local agencies for regional coordination and technology initiatives which help defray the cost of these Agency sponsored programs. Total receipts are budgeted at $18.2 million for 2012, 3.5% higher than the 2011 estimate.

TOTAL EXPENDITURES

Total RTA expenditures (operating, debt service and capital) for 2012 are budgeted at $1.499 billion. This amount is $64.4 million or 4.5% higher than the 2011 estimate of $1.434 billion. Operating expenses of $1.259 billion account for 84% of the expenditures, 15% or $224 million is used to cover the debt service on RTA bonds issued on behalf of the Service Boards for their capital programs and working cash borrowing needs, and $16 million or 1% is used to fund capital programs (see Exhibit 2-5).

OPERATIONS FUNDING

The RTA's primary expense is the funding of Service Board operating deficits.

The RTA Board establishes "marks" for each Service Board to use in its proposed budget and program. The marks are established in September for the next fiscal (calendar year) period. Operating marks include a recovery ratio and operating fund projections for the upcoming budget year and subsequent two-year financial planning period. Operating deficits are primarily funded by RTA sales tax, the State's PTF, and the City of Chicago's RETT. Other sources include federal

(1) Metra will receive $1.2 million in Homeland Security Operating Grants in 2012 and Pace will receive approximately $1.3 million operating grants related to the CMAQ/JARC/New Freedom Federal Programs.

funds, local program funds, and judicious use of fund balances.

RTA funds for operations are budgeted at $1.190 billion in 2012. Of this total amount, CTA will require 49%, Metra 28%, Pace Suburban Service 12%, and Pace regional ADA paratransit service 10%. Another 1% will be used for Innovation, Coordination, and Enhancement (ICE) projects across the region (see Exhibit 2-6). The source of all funds and the amount of funds used to balance each Service Board's 2012 operating deficit (see Exhibit 2-7) are discussed in more detail in subsequent paragraphs.

CTA

The CTA's 2012 operating deficit funding plan calls for public funding totaling $616.6 million. This figure includes statutory Part I and Part II sales tax (sales tax based on formulas set by state law) totaling $412.9 million, $168.7 million from RTA discretionary funds (Part I sales tax and PTF funds the RTA receives for operating and capital expenditures as set forth by state law), $28 million from the City of Chicago RETT, and the corresponding 25% or $7 million statutory Part II PTF from the RETT. (Note: City of Chicago RETT funds flow directly from the City to the CTA and therefore are not included in the revenue or funding figures in Exhibit 2-3).

Metra

Metra's 2012 operating deficit funding is budgeted at $333.2 million. Metra will receive $338.7 million in funding which include Sales Tax and PTF receipts of $246.9 and $90.6 million, respectively. Metra will also receive $1.2 million in Homeland Security grants for security purposes. The combined Federal and RTA statutory funds total $338.7 million, exceeding the operating deficit of $333.2 million by $5.5 million. Of this remaining balance, $5 million will be transferred to the capital program under Metra's capital farebox initiative. The rest will be available to pay for ongoing operating expenditures or continuing capital project commitments.

Pace Suburban Service

Pace's funding to cover its Suburban Service operating deficit in 2012 is budgeted at $140.5 million. Pace will receive statutory funds totaling nearly $136.3 million including $108.4 million from sales tax and PTF and $27.8 million for Suburban Community Mobility and South Suburban Job Access initiatives. Another $3.0 million will be funded from RTA Discretionary Funds. The remaining $1.3 million will be sourced from Federal funds for the New Freedom, Congestion Mitigation / Air Quality (CMAQ), and Job Access Reverse Commute (JARC) initiatives.

Pace ADA Paratransit Service

Beginning in 2008, the annual funding for ADA Paratransit service was established at $100 million and indexed to the annual change in sales tax receipts. The subsequent decrease in sales tax receipts during the financial crisis, combined with increased demand for ADA paratransit service, resulted in chronic funding problems. In 2011, legislation recognized this shortfall and re-established ADA paratransit funding at $115 million for 2012. Furthermore, the legislation provided that tha ADA paratransit operating deficit would be fully funded in future years by the RTA, within the context of the budget process. In order to achieve a balanced budget with $115 million of public funding, Pace has made two critical 2012 budget assumptions: ridership growth will be modest at only 5%, and operating efficiency will need to increases significantly. These efficiencies are expected to be achieved through implementation of an Individual Voice Response (IVR) system which will notify customers by phone prior to pick up. This is expected to significantly reduce vehicle dwell time. In addition, planners will be provided more time to solve the next day's scheduling problem because of an earlier cutoff of reservations hours, contributing to more effective daily scheduling solutions.

Innovation, Coordination, and Enhancement (ICE) Funding

The Innovation, Coordination, and Enhancement (ICE) program, established as part of the 2008 Mass Tran-

sit Reform Legislation, offers operating and/or capital funding for projects that provide cost-effective ways to enhance the coordination and integration of public transportation. The ICE fund was also to be used to develop and implement innovations to improve the quality and delivery of public transportation. In 2011, given the adverse economic conditions in recent years and the shortfall in ADA Paratransit funding, an emergency was declared by the RTA Board with respect to the ICE funds, some of which have been reserved for allocation to Pace for funding ADA Paratransit operations. Due to the legislation which increased ADA paratransit funding, 2012 ICE funds budgeted at $10.2 million are expected to again be available for their intended use.

Reduced Fare / Free Ride Programs

State reduced fare and free ride reimbursements are received as revenue by the RTA, as previously described, and flow to the Service Boards to help defray the cost of reduced fare and free ride programs. The 2012 projected reimbursement level of $34 million remains unchanged from expected 2011 receipts.

Agency Administration, Regional Services & Programs

Agency administration expense is comprised of on-going RTA expenditures in the execution of its funding and financial oversight responsibilities. Budgeted 2012 expenses total $35.2 million and are $1.6 million higher than the 2011 estimate. This is due solely to expenses associated with new RTA federally funded projects; there is no RTA salary increase included in the 2012 budget.

The RTA coordinates and funds several region-wide initiatives that bring together public transportation services.

The RTA coordinates and funds several region-wide initiatives that bring together public transportation services. These programs include system maps, local advertising, the transit benefit program, the Travel Information Center (TIC), ADA certification, reduced fare permit programs, and the Customer Service Center. In addition, the RTA supports continued demand for technical assistance initiatives and coordination programs that encourage transit oriented improvements in the region. Programs supported include various community planning and sub-regional programs.

DEBT SERVICE AND CAPITAL EXPENDITURES

Total expenditures in this category are projected to increase from $236.3 million in 2011 to $239.7 million in 2012, an increase of 1.5%. This is largely due to an increase in regional technology and capital spending on behalf of the RTA and the transfer of $4.7 million of RTA capital reserve funds to Metra's capital reserve fund.

PRINCIPAL AND INTEREST

Principal and interest (debt service) expenditures in the 2012 budget total $224 million. Payments cover the debt incurred on bonds (authorized by the State) which help pay for Service Board capital projects, and pay for the occasional issuance of working cash notes to cover extended accounts receivable cycles from the State.

Regional Technology and Agency Programs

The 2012 regional capital budget of $11.0 million continues the RTA's commitment to fund region-wide capital and technology driven initiatives. These funds will be used to pay for the implementation of transit signal priority projects, interagency signage expansion to improve way finding between Service Boards, and initiatives to increase regional integration of real-time information and trip planning.

Transfer Capital

Since 1995, the RTA has transferred a portion of its reserve funds to region-wide capital or operating initiatives. In 2012 the RTA is allocating $4.7 million of its reserve funds for Metra capital purposes. Additionally, the statutory apportionment of sales tax to a Service Board can exceed its operating needs. When this occurs, the Service Board retains the funds for their capital program. Over the years, Metra has been the only Service Board that has been able to retain such funds for capital investment.

In 2007, the RTA also provided funds to Pace to purchase additional ADA paratransit vehicles.

FUND BALANCE

In 1998, the RTA Board adopted an ordinance establishing a 5% minimum level in the unreserved and undesignated fund balance, as a percent of total operating expenditures for the year. If the amount is below 5%, the financial plan must achieve replenishment by the end of the current three-year planning cycle. The purpose of the ordinance was to formalize a practice of maintaining a level of available financial resources for funding during unfavorable economic periods. The policy proved its value as sluggish economic conditions over the past several years limited growth of sales tax receipts.

However, continued uncertainty in the economic environment necessitated the continuance of a waiver of this requirement during the 2012-2014 planning cycle. With the economy beginning to shows signs of recovery, the RTA Board hopes to reinstate the fund balance policy for the 2013-2015 financial planning periods. The fund balance in 2012 is projected to remain nearly unchanged at about $26 million which is 2.1% of total operating expenditures.

Beginning Balance

The beginning fund balance is the amount of funds in the undesignated and unreserved General Fund after the previous year's results have been audited and the accounting records are closed. All statements in this document reflect 2010 actual results for the 2011 beginning balance.

Change in Fund Balance

Total RTA revenues less total RTA expenses produce an annual change to the fund balance. When revenues exceed expenses, the difference is added to the fund balance. If expenses exceed revenues, the fund balance is reduced by the deficit amount. Estimates indicate that revenues will exceed expenses in 2012 by $4.7 million before allocating $5 million to fund the region's Joint Self Insurance Fund (JSIF). This will result in a slight decrease in the fund balance to $26.1 million at the end of 2012.

RECOVERY RATIO

The RTA Act requires the RTA Board to set a recovery ratio for the next fiscal (calendar) year for each Service Board. The RTA Act further requires that the combined revenues from RTA operations cover at least 50% of the system's operating cost (excluding ADA paratransit service). The RTA's system revenue recovery ratio for 2011 is estimated at over 53%, and is projected at 51% for 2012. A breakdown of this calculation is provided at the end of the RTA chapter.

In meeting the 50% recovery ratio, the RTA Act requires that the revenue figures include all receipts consistent with generally accepted accounting principles with certain specific exceptions. Therefore, the revenue figure used to determine whether the RTA system meets this 50% requirement includes not only all of the items contained in the recovery ratio for the Service Board budgets, but also the net gain on lease and leaseback transactions. The Act further requires a recovery ratio for ADA paratransit service of 10% and the 2012 budget meets this stipulation.

Exhibit 2-8: **2012 Sources and Uses of Funds**
(dollars in millions)

Sources of Funds	Total

ICE/JSIF & Fund Balance	20
Total Uses	**$ 2,544**

Source and Use of Funds

Each chapter of this 2012 budget book presents the sources of funds (public funding and/or operating revenues) and the uses (expenditure) of funds for the individual Service Board operations. The following paragraphs and Exhibits 2-8 through 2-11 summarize the sources and uses of these funds in the 2012 budget.

In 2012, total revenue estimates of $2.544 billion include $998 million in receipts from RTA sales tax, State funding totaling $438 million, Service Board operating revenues of $1.043 billion, and other revenue totaling $64 million ($2 million from Federal Grants, $28 million from RETT, and miscellaneous RTA revenue of $34 million).

The uses of $2.544 billion in funds include $2.249 billion for Service Board operations, $35 million for RTA operations and initiatives, $224 million for debt service, $16 million for capital programs, and $19 million for ICE and JSIF funding.

Capital Program

2012 capital program funds adopted by the RTA Board on December 15, 2011 total $1.352 billion comprised of Federal grants of $477 million, State funds of $505 million, and RTA and Service Board funds of $575 million. The CTA issued bonds in 2011 for the purchase of new rail cars and should receive proceeds for this program in 2012 equal to $520 million. Lowering the funds available for asset investment in 2012 are funds to pay the debt service on bonds issued for capital programs, an amount for the year which totals $205 million.

Capital funding for the 2012-2016 five-year program totals $3.887 billion (see Exhibit 2-12). The planned use of these funds includes $1.491 billion or 38% for rolling stock, $988 million or 26% for track and structure, $529 million or 14% for signals and communications, $361 million or 9% for support facilities and equipment, $387 million or 10% for stations and passenger facilities, and $132 million or 3% for other (contingencies, administration and miscellaneous programs). Please reference the Capital chapter for program details and the capital program impact on region-wide operations.

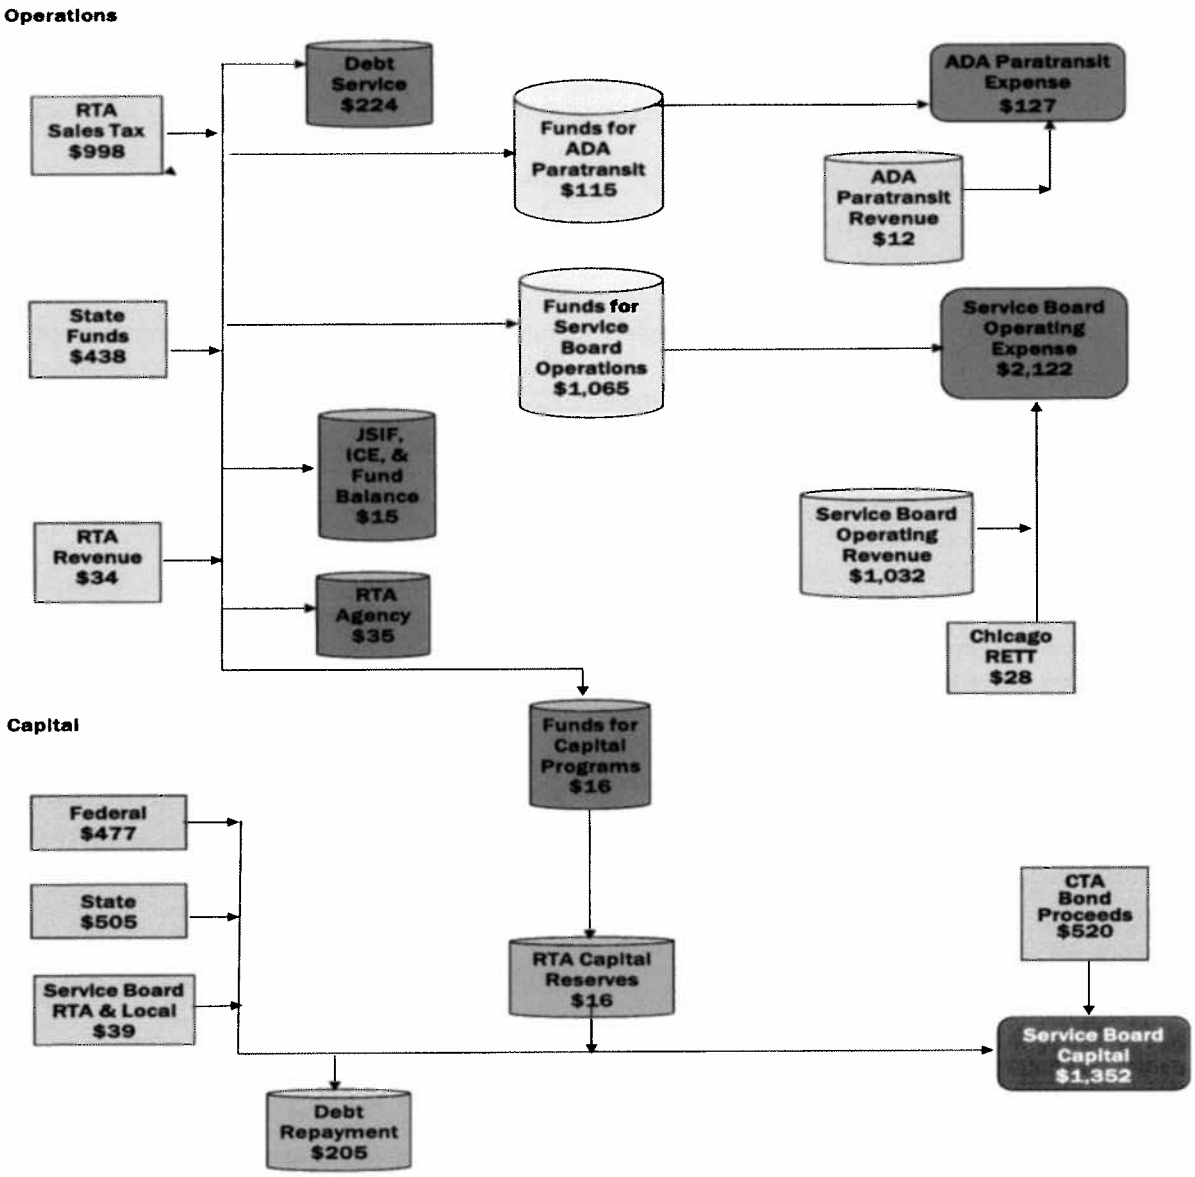

Exhibit 2-12: **2012-2016 Capital Program Uses** - $3,887 million

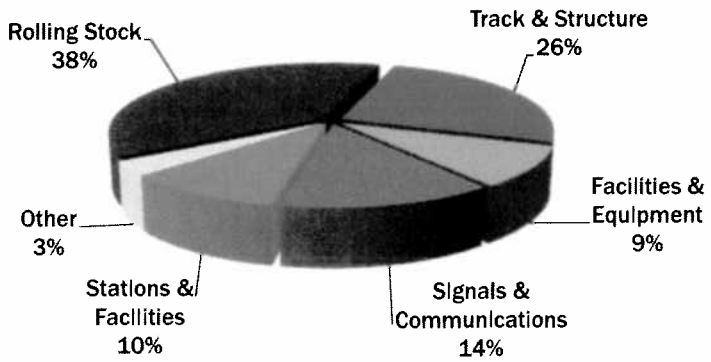

3 RTA

Region Operating Plan

Budget and Financial Plan

The RTA must prepare and publish a document every year that includes a one-year operating budget, a two-year financial plan, and a five-year capital program that meet specific statutory requirements. This document fulfills this responsibility. Exhibit 3-1 provides the RTA region's statement of revenue and expenditures for 2010-2014. Throughout this document, 2010 is actual data, 2011 is an estimate of year-end results, 2012 is the operating budget, and 2013-2014 represent the two-year financial plan.

RIDERSHIP

As shown in Exhibit 3-2, regional transit ridership is projected to increase by 0.7% in 2012, to 646.6 million trips. The regional 2012 ridership increase is modest due to weakness in the job market, a reduction in senior trips due to modification of the free-ride program, and some loss in Metra ridership attributable to the fare increase. CTA and Pace Suburban Service both project ridership gains of 0.9%, and Pace ADA paratransit anticipates continued ridership growth of 5.0% in 2012.

40% of the RTA's system revenues come from a regional sales tax. For 2012, sales tax revenue is expected to increase 2.8%.

REVENUE

As shown in Exhibit 3-1, total revenue for the RTA region is expected to decrease by 2.8% in 2012 to $2.543 billion. An increase in operating revenue will be more than offset by a decrease in public funding. Total revenue is then projected to increase to $2.601 billion in 2013 and $2.668 billion in 2014.

Operating Revenue

As shown in Exhibit 3-3, Service Board operating revenue is the largest revenue source for the RTA region, comprising over 40% of all revenue. In 2012, the RTA system expects an operating revenue increase of $82.0 million or 8.5%, to $1.043 billion, followed by increases of 3.0% and 2.2% in 2013 and 2014, respectively. Operating revenues consist of system-generated revenue such as passenger fares, concessions, advertising, etc. and also include the state reimbursement for reduced fares. This operating assistance program is a partial reimbursement from the State of Illinois to the Service Boards for discounts mandated by law such as those for students, elderly, and disabled individuals. This State funding source is estimated at $33.6 million annually from 2012 through 2014.

The 2012 increase in operating revenue is driven by Metra's proposed fare increase, modest growth in ridership at the other Service Boards, and the annualized impact of the modification of the senior ride free program implemented in September 2011. While about 85% of operating revenue comes from passenger fares, the Service Boards will continue to grow other operating revenue sources such as the sale of advertising space and branding opportunities.

Public Funding

Exhibit 3-3 also shows that almost 40% of the RTA's system revenues come from a regional sales tax, and its projection is a critical part of the budget process. As the economy slowly recovered in 2011, sales tax collections exceeded budget projections and are estimated to finish the year with a 4.2% increase over 2010. For 2012, sales tax revenue is expected to increase 2.8% to $998.2 million, followed by 2.8% increases in both 2013 and 2014.

Although growth in sales tax receipts is projected, overall public funding will decrease by $156 million to $1.500 billion in 2012. This decrease is due to both the expiration of temporary state funding agreements, and more significantly, the Service Boards' suspension of the unsustainable practice of transferring capital funds to cover operating expenses. The decrease in public funding more than offsets the aforementioned increase in operating revenues, resulting in a net decrease in total revenues available to fund RTA system operations in 2012 of $73.7 million or 2.8%, to $2.544 billion.

Exhibit 3-1: **2012 Region Statement of Revenues and Expenses** (dollars in thousands)

Total Revenues less Total Expenses	**$ 137,687**	**$ 71,663**	**$ 4,788**	**$ 7,187**	**$ 8,420**

(1) Service Board Revenues include State Reduced Fare Reimbursement. Public Funding excludes State Reduced Fare Reimbursement.

(2) Adjusted in 2011 through 2014 to reflect the total of the Service Board estimates of annual Reduced Fare Reimbursement which exceeded the RTA annual estimate by $401 thousand. Other RTA Revenue includes income from financial transactions and investments, sales tax interest, and revenues from RTA programs and projects.

(3) Additional revenue and/or funding needed to cover projected ADA Paratransit expenses.

Sales Tax (Part I and Part II)

The RTA Sales Tax (Part I and II) is authorized by Illinois statute and imposed by the RTA in the six-county Northeastern Illinois region. The RTA Sales Tax is collected by the Illinois Department of Revenue, paid to the Treasurer of the State of Illinois, and held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are paid directly to the RTA monthly, without appropriation, by the State Treasurer on the order of the State Comptroller.

Part I of the RTA sales tax (Sales Tax I) is the equivalent of 1% on sales in Cook County and 0.25% on sales in DuPage, Kane, Lake, McHenry, and Will Counties (the collar counties). Sales Tax I in Cook County is 1% on

Exhibit 3-2: **RTA Regional Ridership By Service Board** (in millions)

	2010 Actual	2011 Estimate	2012 Budget
CTA	516.8	524.4	529.2
Metra	81.4	81.7	80.8
Pace	32.3	32.6	32.9
ADA	3.3	3.5	3.7
Region	633.8	642.2	646.6

Exhibit 3-3: **2012 RTA System Revenues ($2,543.5 million)**

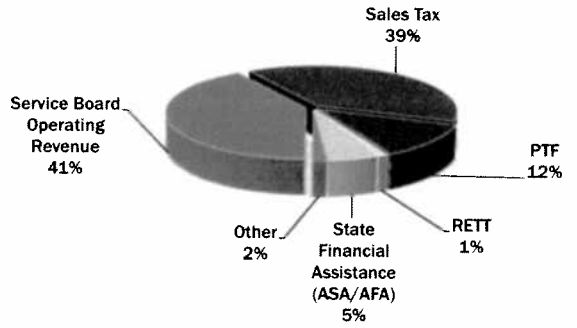

Exhibit 3-4: **Distribution of RTA Part I Sales Tax**

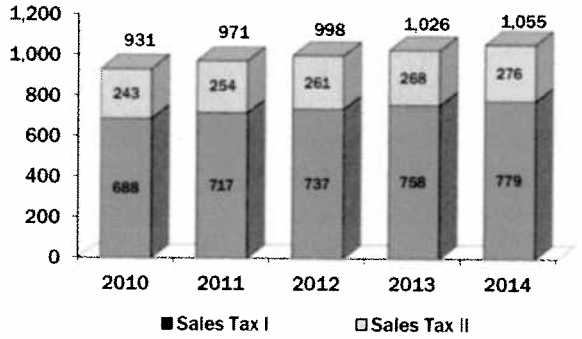
	Distributed to			
Collected In	CTA	Metra	Pace	Total
Chicago	100%	0%	0%	100%
Suburban Cook	30%	55%	15%	100%
Collar Counties	0%	70%	30%	100%

food and drugs and 0.75% on general merchandise, with the State of Illinois then providing a "replacement" amount to the RTA equivalent to 0.25% of general merchandise sales. The RTA retains 15% of Sales Tax I and distributes the remaining 85% to the Service Boards according to the formula specified in the RTA Act (Exhibit 3-4).

Public Act 95-0708 (P.A. 95-0708) was enacted in January 2008 and established RTA Sales Tax Part II (Sales Tax II). This legislation increased the RTA sales tax from 1% in Cook County to 1.25% and the sales tax in the collar counties from 0.25% to 0.75%. The collar county tax increase is divided evenly between the RTA and the county where the tax is collected. Thus, the rate of the sales tax that the RTA receives from the collar counties doubled (from 0.25% to 0.50%).

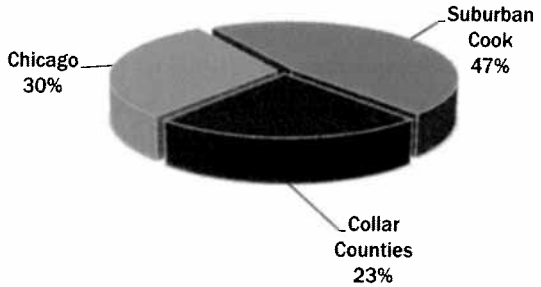
Exhibit 3-5: **RTA Sales Tax** (dollars in millions)



As shown in Exhibit 3-5, total sales tax revenues are projected to increase from $931 million in 2010 to $971 million in 2011. In 2012, 2013, and 2014, total sales tax revenues are estimated to increase by 2.8% annually, reaching $1.055 billion in 2014.

Sales tax projections are made by examining economic trends at a national, state and regional level. From a geographic standpoint, the City of Chicago is expected to account for 30% of sales tax collected in 2012, suburban Cook 47%, and the collar counties 23% (Exhibit 3-6). RTA Ordinance 2011-079 Schedule I-D (in the Appendix) contains a detailed accounting of the source and distribution of funds provided by the new legislation. Exhibit 3-7 shows the resulting distribution of the 2012 RTA sales tax to the transit agencies. In 2012, the $998.2 million in RTA sales tax will be distributed as follows: the CTA 38%, Metra 31%, Pace Suburban Service 12%, Pace ADA Paratransit Service 8%, and the RTA 11%.

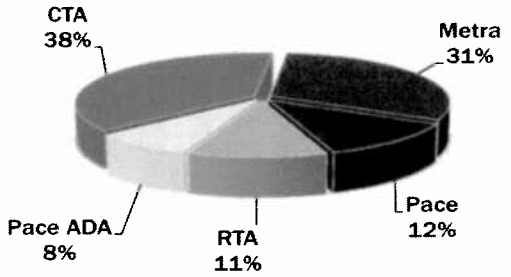
Exhibit 3-6: **2012 RTA Sales Tax By Source Region ($998 million)**



Public Transportation Fund (PTF I and II) and Real Estate Transfer Tax (RETT)

PTF revenues are paid to the RTA upon State appropriation. In accordance with the RTA Act, the State

Exhibit 3-7: **2012 RTA Sales Tax Distribution ($998 million)**



P.A. 95-0708 also increased the real estate transfer tax (RETT) in the City of Chicago by 0.3%, which yields $3 in public funding for the CTA for every $1,000 paid for a property. This funding flows directly from the City of Chicago to the CTA. However, PTF funds associated with the RETT (i.e., 30% of the RETT) flow through the RTA and by statute become part of Service Board funding. PTF I is the equivalent of 25% of Sales Tax I, which for 2012 is projected to be $184.3 million.

PTF II is the equivalent of 5% of Sales Tax I, 30% of Sales Tax II, and 30% of the RETT. The 2012 projected amount is $123.6 million. By statute, the CTA receives five sixths of the 30% PTF on the RETT. The remaining PTF II revenues are combined with Part II sales tax revenues and designated for certain operations and programs before formulaic allocation to the Service Boards. Money set aside before Service Board allocations comprises funding for the Suburban Community Mobility Fund (SCMF), Innovation, Coordination, and Enhancement (ICE) initiatives, and ADA Paratransit operations. By statute, SCMF and ICE funding increases or decreases by the annual change in sales tax collections, with 2008 set as the base year. For 2012, SCMF is projected at $20.3 million and ICE at $10.2 million. Due to new legislation in 2012, the ADA Paratransit Fund will be stepped up to $115.0 million for 2012 and adequately funded to meet ADA paratransit funding requirements in future years. After these three allocations, the remaining balance of the combined Sales Tax II and PTF II revenue is allocated as follows: CTA 48%, Metra 39%, and Pace Suburban Service 13%.

None of the PTF revenue is payable to the RTA until the Agency certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the RTA Act.

State Financial Assistance (SFA)

This revenue source is a state-authorized assistance to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds. SFA has two components: Additional State Assistance (ASA) for SCIP I bonds and Additional Financial Assistance (AFA) for SCIP II bonds. Subject to the appropriation of funds by the State of Illinois, the RTA will continue to be eligible to receive these State Financial Assistance (SFA) payments. In 2012, the RTA expects to receive $130.1 million of this funding from the State of Illinois.

State Funding for Debt Service and ADA per MOU

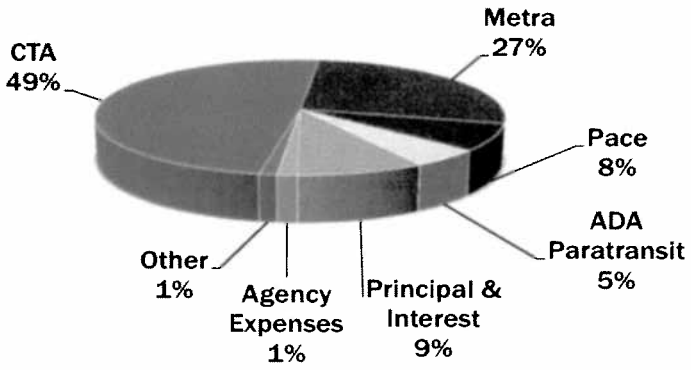
In November 2009, the RTA, the Service Boards, and the Illinois Department of Transportation (IDOT) executed a Memorandum of Understanding (MOU) in order to prevent a passenger fare increase. The MOU prescribed that the RTA issue general obligation bonds to provide approximately $83 million of capital funding to the CTA in both 2010 and 2011. The MOU also prescribed that IDOT enter into a grant agreement with the RTA to fund Pace ADA Paratransit service in the amount of $8.5 million in State fiscal years 2010 and 2011. This State funding did not extend beyond 2011, resulting in a decrease in public funding of over $100 million in 2012.

Federal Funds and Other RTA Revenue

For 2012 and beyond, the Service Boards have committed to discontinuing the practice of transferring money from federal capital funds to support their operating needs. As a result, in 2012 there is a decrease in public funding of over $100 million relative to prior years leaving federal funding in support of operating expenses at $2.5 million. A $1.2 million Homeland Security Grant for Metra and $1.3 million in CMAQ/JARC/New Freedom funding for Pace comprise the federal funding total.

The RTA maintains an assigned Capital Reserve Fund within the RTA general fund. In 2012, $15.7 million of the RTA Capital Reserve Fund will be allocated to fund capital projects.

Exhibit 3-8: **2012 Regional Expenses ($2,538.7 million)**



The Other RTA Revenue category generally consists of sales tax interest, investment income, and Agency revenue. Illinois pays interest on sales tax receipts to the RTA from the time of collection until it is disbursed to the RTA. The RTA then disburses the interest on Part I sales tax receipts to the Service Boards based on the same formula used to allocate the Part I sales tax receipts. RTA investment income is dependent on available cash balances and prevailing market rates. Other revenue also includes fees charged to employers for RTA Fare Checks that help offset the costs of administering the program, as well as matching funds obtained under federal, state and local programs for RTA regional planning, development, and new technology efforts. In total, other RTA revenue of $18.2 million is expected annually during the 2012-2014 planning cycle.

EXPENSES

As shown in Exhibit 3-1, total expenses for the RTA region are expected to decrease by 0.3% in 2012 to $2.539 billion, followed by increases of 2.2% and 2.6% in 2013 and 2014, respectively.

Service Board Operating Expenses

Expenses for Service Board operations, which comprise 89% of total expenses, are projected to decrease by 0.9% in 2012 and then increase by 3.1% and 2.8% in 2013 and 2014, respectively. The CTA has projected a 5.1% decrease in 2012 operating expenses, which included $80 million of anticipated work rule relief and a $71.7 million decrease in other expenses. This decrease reflects the substitution of the Pension Obligation Bond (POB) debt service reserve fund with a bond insurance policy. Proceeds from the liquidated reserve fund were applied as a credit to expenses. Metra and Pace Suburban Service expenses will increase by 5.7% and 5.1%, respectively and Pace ADA paratransit expenses are projected to be flat.

Agency and regional expenses, including debt service and capital project funding, are expected to increase by 4.6% in 2012, decrease by 5.1% in 2013, and increase by 0.4% in 2014. Exhibit 3-8 shows the distribution of total RTA expenditures for 2012.

Service Board Operations Funding

The RTA's primary expenditure is the funding of the Service Boards' operating deficits. An operating deficit is the difference between a Service Board's operating revenue (farebox and other revenue sources such as advertising) and operating expenditures. It may also be referred to as the funding requirement. Exhibit 3-9 displays the RTA expenditures for Service Board operations excluding ADA paratransit (discussed later in this section) for 2010 to 2014. Total Service Board operations funding by the RTA for 2012 will be $1.065 billion and is expected to reach $1.120 billion in 2014. Projected growth from 2010 to 2014 of RTA operations funding to the Service Boards (excluding ADA paratransit) follows. RTA funding for CTA (including PTF from RETT) is expected to increase from $496.2 million in 2010 to $619.4 million in 2014, a compound

annual growth rate of 5.7%. RTA funding for Metra is expected to increase from $319.4 million in 2010 to $354.6 million in 2014, a compound annual growth rate of 2.6%. RTA funding for Pace's Suburban Service (including Suburban Community Mobility Funds and South Suburban Job Access funds) is expected to increase from $129.3 million in 2010 to $146.0 million in 2014, a compound annual growth rate of 3.1%.

Exhibit 3-10 shows the 2010 to 2014 RTA funding levels for ADA Paratransit service. Funding from the RTA was $104.5 million in 2010 and $115.1 million in 2011, which included $7.9 million of ICE funds. As mentioned earlier, legislation in 2011 stepped up the ADA Paratransit Fund level to $115.0 million for 2012 and ensured adequate funding of all ADA paratransit requirements in future years. As a result, RTA funding levels of $120.8 million and $126.8 million are projected for 2013 and 2014, respectively.

Total funding for the 2012 through 2014 financial plan is provided in Schedule I-B of Ordinance 2011-079 (see Appendix Exhibit 9-24). A detailed discussion of each Service Board's revenues and expenditures is provided in the CTA, Metra, Pace, and Pace ADA sections of this document.

Suburban Community Mobility Fund

As provided by P.A. 95-0708, the Suburban Community Mobility Fund (SCMF), including interest and earnings, shall be used by the RTA to provide grants to Pace for operating transit services that enhance suburban mobility including, but not limited to, demand-response services, ride sharing, vanpooling, service

Exhibit 3-10: **ADA Paratransit Funding** (dollars in millions)

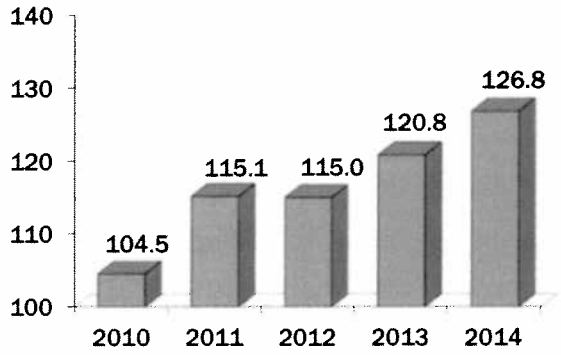


Exhibit 3-9: **RTA Operations Funding (dollars in millions)**

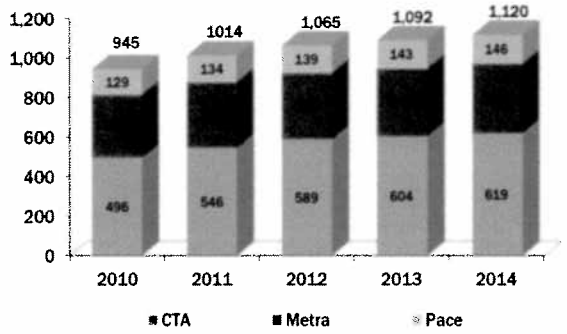

coordination, centralized dispatching, call taking, reverse commuting, service restructuring, and bus rapid transit (BRT). Each year, the RTA shall deposit into this fund an amount that increases or decreases with the percentage change in sales tax receipts. This change is indexed from the 2008 statutory base year amount of $20 million. The SCMF included in RTA funding for Pace Suburban Service operations will increase by 2.8% in 2012 to $20.3 million. SSJA funding then increases to $20.9 million in 2013 and $21.5 million in 2014, proportional to the projected 2.8% increase in sales tax for those years.

South Suburban Job Access Fund

Another provision of P.A. 95-0708 is the establishment of the South Suburban Job Access Fund (SSJA) to provide financial resources to Pace, in cooperation with the RTA, for the development of operating programs that enhance access to job markets for residents in south suburban Cook County. SCMF funding was set at $3.75 million in 2008, increasing to $7.5 million annually thereafter.

Reduced Fare / Free Ride Program Reimbursement

State reimbursement for reduced fare and free ride programs is received as revenue by the RTA and flows directly to the Service Boards to help defray a portion of the revenue lost in providing mandated free and reduced fare service. Reimbursement in the amount of $33.6 million is expected annually from 2012 through 2014.

Region and RTA Agency Expenses

Comprising 11% of total expenses, Region and Agency Expense is expected to increase by 4.6% in 2012 to $290.1 million, before decreasing in 2013 to $275.4 million. Debt service is by far the largest component of this category.

Principal and Interest

Principal and interest payments reflect the RTA's expenditures and projected expenditures for debt service on RTA SCIP and non-SCIP bonds that finance Service Board capital projects. The amount also reflects debt service costs for RTA working cash notes required because of delays in receipts from the State, which are several months in arrears. In 2012, principal and interest payments are expected to total $224.0 million comprised of $84.3 million towards principal and $139.7 million of interest. That amount is projected to stay constant in 2013 and 2014. Additional bond information is provided in the reference section at the end of this chapter.

Agency Administration, Regional Services and Programs

Spending for Agency administration, regional services, and regional programs is discussed further in the Agency section of this chapter. Expenditures for 2012 are expected to be $35.2 million, increasing at an annual growth rate of 2.0% to $35.9 million in 2013 and $36.6 million in 2014.

Agency Capital and Transfer Capital

For 2012, Agency Capital and Transfer Capital is expected to increase 54% to $15.7 million. This amount is comprised of two components - the transfer of capital funds to the Service Boards - and the RTA Agency Regional Capital Program. For 2012, $4.7 million of RTA Capital Reserve Funds will be transferred to Metra for capital uses. The remaining $11.0 million in this category is associated with the Regional Capital program and is used to fund region-wide capital-driven technology enhancements. Like regional technical assistance programs, the regional technology programs are coordinated efforts with other state and local agencies, reducing RTA funding requirements. At the end of the year, any funds that have not been spent are reserved.

ICE Fund and JSIF

P.A. 05-0708 also established the ICE fund for Innovation, Coordination, and Enhancement. Like the $20 million SCMF, the $10 million base amount of the ICE fund changes at the same rate as regional sales tax collection changes. ICE funds are appropriated with the affirmative vote of 12 RTA directors for operating or capital grants or loans to the Service Boards, transportation agencies, or units of local government that advance the goals and objectives of the RTA's Strategic Plan. However, if the RTA Board determines that an emergency exists, then by an affirmative vote of 12 members, funds may be used for urgent operating or capital needs.

In 2011, the majority of the ICE fund was used to fund ADA paratransit operations. For the 2012 budget, the ICE fund has been set at $10.2 million and is expected to increase to $10.4 million in 2013 and $10.7 million in 2014.

Premium payments for the Joint Self Insurance Fund (JSIF) are also a regional expense of the RTA agency. The amount reserved for this in 2012 is $5.0 million. The RTA provides excess liability insurance to protect the self-insurance programs maintained by the Service Boards. The Service Boards are obligated to reimburse the fund for any damages paid plus interest.

FUND BALANCE

In 1998, the RTA Board adopted an ordinance establishing a minimum level in the unreserved and undesignated fund balance of 5% of total operating expenditures. Fund balance policy details are outlined in the Introduction Chapter. The purpose of the ordinance was to formalize a practice of maintaining a minimum level of financial resources available for funding during unfavorable economic periods. Exhibit 3-11 shows the projected ending fund balances for 2010 through 2014.

Beginning Balance

The beginning balance is the amount of funds in the undesignated and unreserved fund balance after the previous year's results have been audited and the accounting books are closed. All statements in this document reflect negative $27.9 million as the 2010 beginning balance.

Change In Fund Balance / Ending Fund Balance

Total RTA revenue less total RTA expenditures represents the annual change in fund balance. When revenue exceeds expenditures, the gain is added to the fund balance. If expenditures exceed revenue, the deficit reduces the fund balance. Premium payments for the Joint Self Insurance Fund (JSIF) are deducted from RTA's fund balance. Positive changes in fund balance for 2010 and 2011 produced higher ending fund balances for those years. In 2012, the JSIF premium payment of $5.0 million will be slightly more than the positive change in fund balance of $4.7 million, resulting in a decrease in ending fund balance to $26.1 million. Continued positive changes in fund balances are projected for 2013 and 2014, resulting in a steady increase in the projected ending balance to $34.1 million in 2014. However, this equates to only 2.6% of total operating expenditures, falling short of the 5% requirement. The RTA Board voted to suspend the fund balance policy in 2012 in favor of a plan to build the fund balance over a longer period, due to the difficult economic environment.

Exhibit 3-11: **Ending Fund Balance** (dollars in millions)

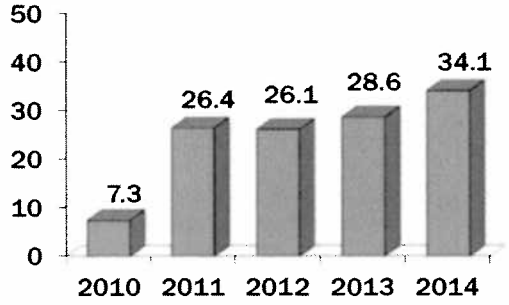

Exhibit 3-12: **2012 RTA and Service Board Recovery Ratio Marks**

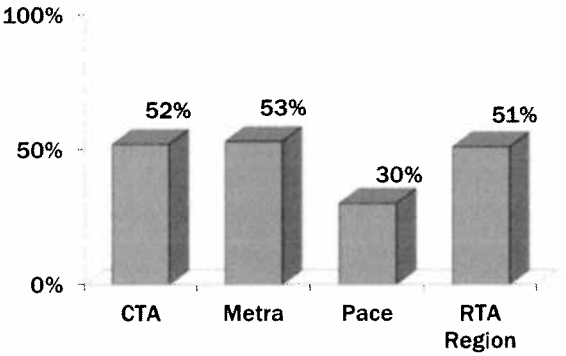

RECOVERY RATIO

The RTA Act requires the RTA Board to set a recovery ratio for the next fiscal year for each Service Board. The RTA Act further requires that the combined revenue from RTA operations cover at least 50% of the system operating cost excluding ADA paratransit service. The RTA's operating revenue recovery ratio in 2012 is projected to be 51% or 1 percentage point above the mandated 50%. This result is contingent upon the CTA, Metra, and Pace achieving their recovery ratio marks of 52%, 53% and 30%, respectively (Exhibit 3-12).

In meeting the 50% recovery ratio, the RTA Act requires that the revenue figures include all receipts consistent with generally accepted accounting principles, with certain specified exceptions. Detail of this calculation is provided in Exhibit 3-64 at the end of this section. In their adopted budgets, the Service Boards were able to exceed the recovery ratio marks set by the RTA, resulting in a regional recovery ratio which is higher than the 51% projection.

2011 Budget versus 2011 Estimate

Total RTA estimated revenue of $1.466 billion is favorable to budget by $75.2 million. Sales tax and Public Transportation Fund receipts are expected to exceed budget by more than 6% due to a slowly improving local economy.

Total RTA estimated operating expenditures of $1.435 billion are above budget by $56.1 million, reflecting combined increased distribution of sales tax revenue to Service Boards of $65.2 million due to higher sales tax receipts mentioned above. Offsetting this are 2011 RTA ICE fund expenditures which are expected

Exhibit 3-13: **RTA Statement of Revenues and Expenditures - General & Agency Fund** (dollars in thousands)

(1) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT). (2) Includes PTF on the City of Chicago Real Estate Transfer Tax (RETT) and RTA discretionary funds available for region-wide capital or operating initiatives transferred to the CTA for preventive maintenance in the operating budget. (3) Includes Suburban Community Mobility Funds (SCMF) and South Suburban Job Access (SSJA) funds. (4) Includes additional IDOT funding of $8.5 million per MOU. (5) Further actions are required to balance the ADA Paratransit budget, which may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues, including 2011 funds from the ICE Fund that may be allocated pursuant to Paragraph 7 of Ordinance 2010-74. (6) The 2011 budget amount reflects regional services expenses budgeted as a net number. (7) Funding from the State (IDOT) for Debt Service per MOU. (8) RTA funds to purchase excess liability and terrorism insurance to provide protection against catastrophic loss.

to be $7.3 million less than in the 2011 budget. State reduced fare reimbursements are also expected to be $1.7 million favorable to budget. RTA Agency expense will closely match budget.

The net of these results is a positive change in fund balance of $31.9 million, which exceeds the budget by $19.1 million. However, additional funding and reserve requirements of $7.5 million relative to budget will result in the projected 2011 ending fund balance to be $26.4 million, favorable to budget by $13.3 million (Exhibit 3-13).

Capital Program

When the budget was approved, the 2012-2016 capital program funding marks totaled $3.887 billion. When federal, state or local appropriation figures change, the resulting Service Boards' capital programs may not match the program marks. When this occurs, the RTA Board considers ordinances that incorporate all changes and bring the Service Board programs in balance with the marks. Detailed Service Board program information is provided in the Capital Section of this document.

Agency Operating Plan

Budget and Financial Plan

The RTA Agency budget was developed within the same parameters as those of the Service Boards. RTA staff utilized the budget calendar and guidelines in the Business Plan Call adopted by the Board in June, as well as the marks set in September. Staff focused on ensuring that the budget included sufficient resources for it to carry out its mission as the funding, planning, and oversight agency for transit in Northeastern Illinois, while at the same time doing so in the most cost-effective manner.

The RTA Agency used a priority based budgeting approach that concentrated on the "Regional Priorities Initiative" in the process of developing the 2012 budget.

The RTA Agency used a priority based budgeting approach that concentrated on the "Regional Priorities Initiative" in the process of developing the 2012 budget. The RTA has launched a series of five key priority initiatives intended to advance a collective vision for the region's transit system. The 2012 budget uses these priorities as a foundation.

- **Strategic Capital Investment** - Develop a strategic capital approach focused on identifying capital projects that could result in reductions in operating expenditures.
- **Economies of Scale** - Harness the RTA's and Service Boards' purchasing power to achieve cost savings and improved efficiency.
- **Maximize Use of the Transit System** - Provide a system-wide approach to improving coordination among services, access to reverse commute markets, and use of weekend and evening services.
- **Enhance the Customer Experience** - Focus on targeted capital and technology-related projects, interagency and way-finding signage, e-signage, service information, and fare payment coordination to best serve transit customers.
- **Coordinate Government Affairs, Marketing, and Outreach** - Create a unified marketing, outreach, and government affairs agenda among the RTA and Service Boards to improve customer communications and increase coordination and leveraging of partners and other stakeholders.

The RTA Agency budget and financial plan presented in Exhibit 3-14 meets the funding marks set by the RTA Board on September 14, 2011.

OPERATING REVENUE

The 2012 operating budget includes operating revenue of $3.4 million from the transit benefit program, reduced fare and free ride program, and RTA initiatives funded by federal grants. This amount is $1.6 million or 83% higher than the 2011 estimate due to successfully securing increased levels of FTA and CMAQ funding for various RTA initiatives, such as Transit Asset Management (TAM) and Chicagoland Commute Options Program. In 2013 and 2014, estimated revenues reflect 2% growth each year (Exhibit 3-15).

PUBLIC FUNDING

The 2012 Agency budget is a no growth budget. In 2012, the total budgeted public funding required for the RTA Agency is $31.8 million, the same level as the 2011 estimate based on year-to-date actual results, and is 1.9% lower than the 2011 budget. Public funding projections also increase by 2% in both 2013 and 2014 (Exhibit 3-16).

Public funding provides 90% of the total RTA Agency revenue with the remaining 10% generated from operating revenue (Exhibit 3-17).

OPERATING EXPENDITURES

In 2012, total expenses of $35.2 million are projected to be $1.6 million higher than the 2011 estimate, reflecting expenses associated with the new RTA federally funded grant projects. In 2012, net expenses (total expenses minus operating revenue) of $31.8 million are projected to be slightly lower than the 2011 estimate as the result of the strategic development of a no-growth budget. There is no salary increase in-

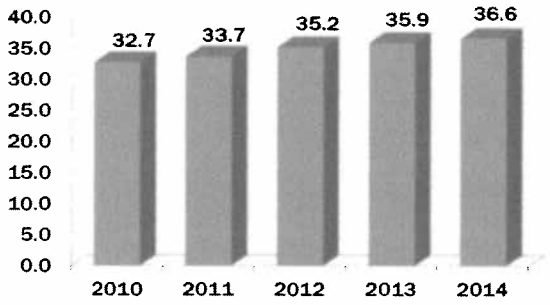
cluded in the 2012 budget. Estimated total 2013 and 2014 expenses reflect a 2% annual increase over the 2012 level consistent with inflation as well as revenue estimates (Exhibit 3-18).

Expenditure Elements

The Agency operating expense category includes administrative expenses required to operate the Agency, as well as regional programs focused on advancing public transit initiatives. Regional programs, which account for more than half of the Agency budget, include

Exhibit 3-18: **RTA Agency Operating Expense** (in millions)



the Travel Information Center (TIC), ADA Certification program, Reduced Fare and Free Ride Program, Customer Service Center, Transit Benefit program, Corridor and Community Planning programs, Transit Asset Management program, and various other initiatives.

Personnel

Personnel related costs, such as salaries, pension, health care, training, and other personnel items are projected to account for 40% or $14.3 million of total agency operating expenditures in 2012.

Professional Services

Professional services, which includes audit fees and consulting fees for Project Management Oversight (PMO), Rail Safety Oversight (RSO), Legal, and Government Affairs, represent 9% or $3.2 million of the total operating expense budget in 2012.

Purchased Service for Regional Programs

Direct operations costs of the TIC, ADA Certification program, ADA Travel Training program, Transit Benefit program, and Reduced Fare & Free Ride programs are projected to account for 25% or $8.7 million of the agency operating expenditures in 2012.

Office Services

Rent, utilities, maintenance, telephone and various office and computer supplies represent 11% or $3.7 million of the total operating expense budget in 2012.

Programs and Projects

The remaining 15% or $5.3 million of the agency operating expenditures are dedicated for various agency and grant funded projects, such as Chicagoland Commute Options, Capital Asset Condition Assessment, Transit Asset Management, Customer Market Research, I-90 Infrastructure Planning Support and Service Planning, various Community Planning Programs, Capital Program Prioritization Tool, and implementation of the IT Strategic Plan.

Exhibit 3-19 illustrates the Agency Operating Expense break down by category.

Agency Statutory Cap

In 1985, a statutory cap for administrative spending was set at $5 million, with a growth rate of 5% per year. The 2012 cap on Agency administrative expens-

Total Baseline Operating Expense	**$ 29,093**	**$ 28,893**	**$ 199**
Grant Funded and Multi Year Projects	2,730	2,799	(70)
Agency Programs	1,958	1,958	-
Total Programs and Projects	**$ 4,687**	**$ 4,757**	**($ 70)**
Total Expenses	$ 33,780	$ 33,651	$ 129
Net Results	-	-	-

es is $18.7 million. The 2012 RTA Agency budget is below this cap with expenses for regional services and programs, including grant-funded projects, totaling $18.7 million thus leaving administrative expenses of less than $16.5 million. True administrative expenses are far lower, however, when adjusted for agency support of the regional programs.

NET RESULTS

RTA Agency net results are zero for 2012 through 2014 indicating revenues are equal to expenses (Exhibit 3-14).

2011 Budget versus 2011 Estimate

In 2011, Agency expenditures were budgeted at $33.8 million and are expected to be slightly under budget at year end (Exhibit 3-20).

Organization

The 2012 RTA Agency budget includes 122 positions with new staff requests, excluding the 16 paid RTA Board members. With Service Boards, the total 2012 budgeted regional staffing is 15,157 (Exhibit 3-21). Decreases in Service Board staffing levels over the three-year period are primarily related to service reductions implemented by CTA in 2010 and additional CTA staff reductions. The increase in Pace staffing in 2012 reflects initiatives to add a few new starts and pilot programs to its service.

RTA Agency Organizational Structure Changes

In order to further improve the Agency's efficiencies and better align functions as the Agency focuses on the Regional Priorities Initiative, the Agency made some organizational changes by restructuring some departments and management oversight effective November 11, 2011.

Exhibit 3-21: **Budgeted Positions** (2010 and 2011 departments' counts were adjusted to reflect 2012 reorganization)

	2010	2011	2012	2012 vs. 2011
Executive Office (excluding RTA Board)	3	3	3	-
Audit	3	3	4	1
Communications	12	12	11	(1)
Finance & Performance Management	23	27	30	3
Government & Community Affairs	2	4	5	1
Human Resources	2	3	3	-
Information Technology	8	8	8	-
Legal	8	9	9	-
Planning	49	47	49	2
Total RTA Staffing Plan	**110**	**116**	**122**	**6**
CTA	9,479	9,377	9,206	(171)
Metra	4,331	4,331	4,331	-
Pace	1,471	1,471	1,498	27
Total Service Boards Staffing Plan	**15,281**	**15,179**	**15,035**	**(144)**
Total Region Staffing Plan	**15,391**	**15,295**	**15,157**	**(138)**

The Agency's new functional organizational chart is presented in Exhibit 3-22.

- **Administrative Services Department** was eliminated with staff and functions consolidated into other departments.

- **Executive Office** includes the RTA Board of Directors, the Executive Director, the Secretary to the Authority, and a Project Specialist who serves different departments on various administrative tasks.

- **Audit Department** consisting of internal and external audit, reports to the Board functionally and administratively to the Executive Director. This department was strengthened with the addition of a Deputy Executive Director position to head the department.

- **Finance and Performance Management Department** has been restructured to better serve and oversee the Agency and the Service Boards' operating and capital financial functions. The Agency's Chief Financial Officer now oversees the Budget, Performance & Business Analysis; Programming, Oversight & Compliance; Controller; and Treasury divisions.

- **Communications Department** now also includes programs operated by the RTA that interface with our customers. These programs are Customer Service and Travel Information Center (TIC).

- **Government and Community Affairs Department** has been restructured with added responsibilities. The department is now also responsible for community relations and public outreach functions, which were transferred from Communications.

- **Human Resources Department**, which was part of the Administrative Services Department, now reports directly to the Executive Director.

- **Information Technology Department** now is a separate department, as a recommendation of the recently concluded Information Technology Strategic Plan (ITSP) by an outside expert, and will be led by a Chief Information Officer reporting directly to the Executive Director.

- **Legal Department** now includes Procurement and Contracting Division as well.

- **Planning Department** includes Strategic Planning & Policy; Local Planning & Programs; Regional Coordination; and Regional Accessibility. Regional Accessibility was created in early 2011 within

Exhibit 3-22: **RTA Organizational Chart**

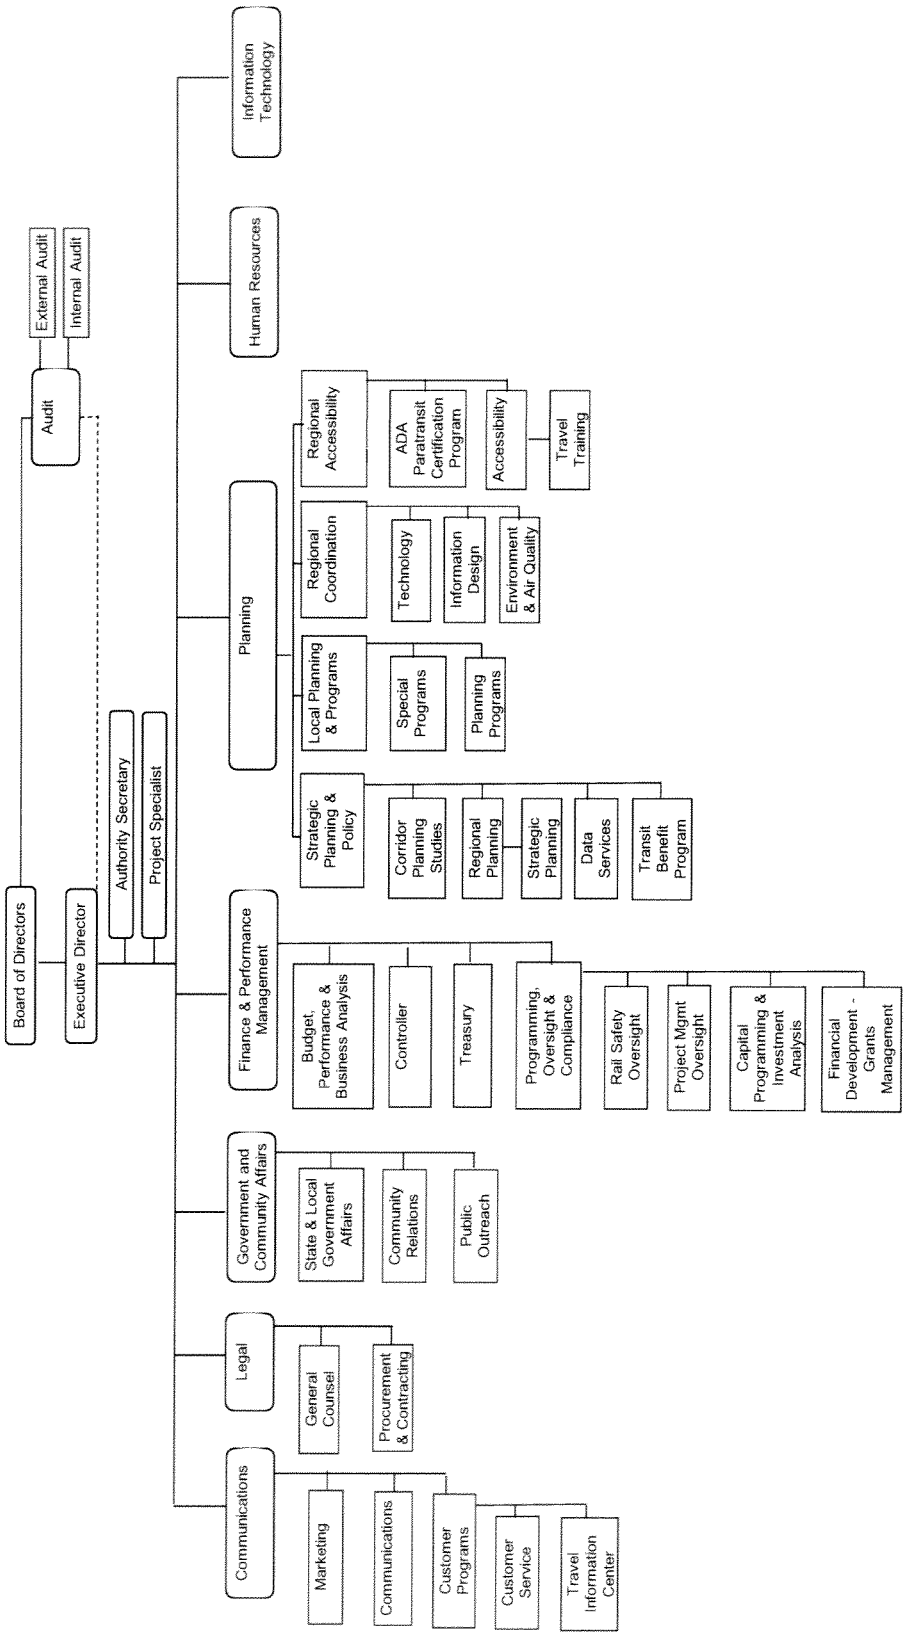

Exhibit 3-23: **2012 Agency Operating Expenses by Department** (in thousands)

	2012 Budget
Operating Revenue	
Miscellaneous Revenue	150
Transit Benefit Revenue	1,322
Grants for Multi Year Projects	1,959
TOTAL REVENUES	$ 3,430
Operating Expenses	
Executive Office	1,455
Audit	1,023
Communications	7,445
Finance & Performance Management	6,925
Government & Community Affairs	1,854
Human Resources	499
Information Technology	2,433
Legal	1,757
Planning	11,814
TOTAL EXPENSES	$ 35,203
PUBLIC FUNDING (Expenses - Revenues)	$ 31,773

the Planning Department and includes Travel Training and ADA Certification Programs. Transit Benefit Program has also been added to the department's function.

These changes did not affect the Agency's overall expense budget, but costs have been redirected to reflect the budget and goals of the new department structures. Available new in-house resources now take on initiatives previously carried out by contract, offsetting those costs with more effective services. This change includes activities such as travel training, to increase mainline service usage and decrease ADA Paratransit service dependency, ADA certification, and customer services.

Flexibility was included in the 2012 budget to hire additional positions. However, the RTA is committed to a no-growth budget and will add additional staff positions only when justified through other cost savings or to advance the Regional Priorities Initiative.

Exhibits 3-23 and 3-24 provide a breakdown of the Agency expenses by department. The next pages describe each department briefly and highlight its main initiatives in 2012.

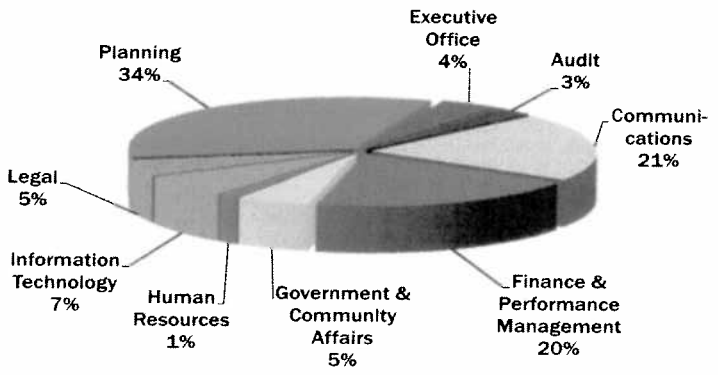
Executive Office

This department includes the RTA Board of Directors and organizations that support the RTA Chairman and Board of Directors, and it oversees and directs day-to-day agency activities.

The RTA Board of Directors consists of 15 members and a chairman. The RTA Board has the statutory authority to establish, by rule or regulation, the financial, budgetary, or fiscal requirements for the region's public transit system. The RTA Board and its committees set policy, authorize funding levels for the Service Boards, approve operating budgets and capital programs, consider matters relating to RTA operations and compliance with the ADA Act, supervise audits, and consider planning studies and capital program investments. The Board has four standing committees that review and recommend policy to the entire Board.

The Executive Director executes the policy decisions of the RTA Board and staffs the Agency to administer its statutory mission and implement Board policy. The Executive Director informs and assists the RTA Chair-

Exhibit 3-24: **2012 Agency Operating Expenses by Department - $35.2 million**



man and the Board in the development of policy, and is the principal contact with executive staffs of the CTA, Metra, and Pace to ensure effective administration of the RTA's regional planning and oversight responsibilities. The Secretary to the Authority provides Board and executive support functions by assisting with the information, documentation, and logistical needs of the RTA Board and the Executive Director.

In 2012, the Executive Office is focused on advancing the Regional Priorities Initiative, through the work programs of each department.

The Regional Priorities Initiative includes the following five program areas:

- Strategic Capital Investment
- Economies of Scale
- Maximize Use of the Transit System
- Enhance the Customer Experience
- Coordinate Government Affairs, Marketing, and Outreach

Audit

This department consists of two functional areas, External Audit and Internal Audit, both of which report to the Board functionally and administratively to the Executive Director.

The RTA has certain audit authority over the CTA, Metra and Pace to ensure that they are operating efficiently and effectively. Over the past years, the exercise of this authority has included numerous audits (such as the CTA Rail System Safety Program and ADA Paratransit Service Changes). The RTA's authority was strengthened as part of the amendments to the RTA Act in 2008.

The department's internal review and audit mission is to provide an independent, objective assurance and consulting activity designed to add value and improve the operations of the RTA. The internal audit function shall be functionally independent of all RTA operations and should be regarded as an internal consulting service for the RTA. Independence is essential to enable the internal audit function to accomplish its purpose.

Departmental Priorities:

- **Oversight of RTA and Service Boards**
  - » Safeguard public funds, property, assets and resources against waste, loss and unauthorized use;
  - » Support the RTA's role of effectively and efficiently managing the agency and establishing an effective system of internal fiscal and administrative controls to provide assurance resources are utilized efficiently and in compliance with applicable laws;
  - » Assist the RTA in its oversight responsibilities through conducting financial, management and compliance audits and reviews at the three Service Boards and RTA; and
  - » Provide management consulting services pertaining to specific programs and systems administered by the RTA.

- **Planned External Audit Activities**
  - » Complete audits that are in process including an Executive Compensation Review of CTA, Pace, and RTA and Triennial ADA Financial, Compliance, Performance Audit.
  - » Conduct planned audits on the reduced fare reimbursement program and capital grant close out process.
  - » Other planned projects include follow-up to the Metra executive compensation review and work with the Circuit Ride Free/Reduced Fare Program Task Force.

- **Five-Year Service Board Audit Program**
  Complete the development of a Five-Year Service Board Audit Program. This new program came about as a result of the 2008 RTA Reform Legislation which requires the RTA to audit the three Service Boards at least once every five years. The primary components of this effort include developing a risk assessment model, conducting a risk assessment, and then developing a five year audit plan, the results of which will be used to develop subsequent RTA External Audit Work plans. A majority of the resources in the 2012 RTA Budget allocated for External Audit activities will be dedicated to priority audits identified as a result of the risk

assessment process and will be included in the 2012 RTA External Audit Work plan.

- **Planned Internal Audit Activities**
  Fulfill duties related to the Inspector General, RTA Ethics Officer, and Whistleblower Hotline. Additional audit activities include conducting close-out audits of major third party service providers and Consolidated Technical Assistance Program (CTAP) grants, providing assessment of internal controls, and reviewing expenditures.

Communications

As a result of restructuring some departments, the Communications Department now provides management in communications and marketing for each of the RTA's programs and initiatives. The Communications Department is also responsible for the management and operation of programs that directly serve regional customers including Customer Service, Travel Information Center (TIC), and Free Ride programs. The Communications Department has key responsibilities in the Regional Priorities Initiative work programs related to the Coordinate Government Affairs, Marketing, and Outreach; Maximize Use of the System; and Enhance the Customer Experience strategies. The department also collaborates with the Service Boards to promote their services and programs.

Departmental Priorities:

- **Maximize Use of the System / Coordinate Government Affairs, Marketing and Outreach**
  - » Coordinate marketing efforts with the Service Boards for programs that help increase transit ridership, such as Clean Air Commuter Challenge, Green Transit Plan as well as those that will enhance the customer experience such as multi-modal trip planning, real-time information, Bus on Shoulder, and maps and way-finding.
  - » Implement the Chicagoland Commute Options Program to develop Transit Demand Management (TDM) strategies that reduce traffic congestion by providing incentives for sustainable travel choices and increased use of public transportation services. The 2012 budget includes $1.2 million for the program's expense, funded in part with a $1.0 million CMAQ grant.

- **Enhance the Customer Experience**
  Centralize the Customer Service operations between the RTA, CTA, Metra and Pace. The initial goal identified is to create one unified Customer Service telephone number to be used when calling each of the four agencies. Having a single telephone number for our customers to call will eliminate the need to contact four different agencies regarding customer service related issues.

- **Conduct Management Review of Travel Information Center (TIC)**
  Develop a Task Force comprised of RTA staff members from each department to complete a business and management review of the entire TIC operation. This review will be comprehensive to determine how the TIC can be re-structured to create value and better serve RTA customers. The current operating cost of the center is $4.0 million.

- **Provide Effective Management of Reduced Fare Programs following Senior Ride Free Transition**
  Support the ongoing operation of both the Senior and People with Disabilities Circuit Ride Free programs following the successful transition, in September 2011, from the all-encompassing Senior Ride Free program to a program that is now means tested with the Department on Aging's Circuit Breaker program.

Finance and Performance Management

The Finance Department was consolidated with part of the Research, Analysis and Policy Development Department in January 2011 to form the Finance and Performance Management Department. In November 2011, the department was further restructured to better serve and oversee the Agency and the Service Boards' operating and capital financial functions. The department now includes the following divisions: Budget, Performance & Business Analysis; Programming, Oversight & Compliance; Controller, and Treasury Di-

visions. The Finance and Performance Management Department has key responsibilities in the Strategic Capital Investment area of the Regional Priorities Initiative.

Departmental Priorities:

- **Strategic Capital Investment**
  - » Develop a Capital Decision Prioritization Support Tool to evaluate and prioritize projects for inclusion in the Capital Program. The Decision Tool will use criteria necessary to focus capital efforts on improvements that will bring the region's infrastructure toward a State of Good Repair (SOGR).
  - » Undertake business transformation efforts aimed at reducing operating costs and leveraging funds for capital investment, including the development of a tool to assess the operating impacts of capital projects.
  - » Develop a comprehensive Transit Asset Management (TAM) system by leveraging RTA and Federal Transit Authority (FTA) resources. The FTA reviewed the Regional Transit Authority's Transit Asset Management procedures, and was impressed to such an extent that it awarded RTA with a grant of $850,000 to complete its efforts including its Asset Condition Assessment and its Asset Prioritization Decision Tool, and documenting such so that it may be utilized by other Transit Agencies across the nation.
  - » Develop creative financing solutions to support efforts to bring the region's transportation assets, including those of CTA, Metra, and Pace, into a State of Good Repair (SOGR). Financing options to be pursued, beyond traditional instruments, include public and private partnerships and TIFIA (Transportation Infrastructure Finance Innovation Act) loans that permit borrowing at rates available to the federal government.

- **Maximize Use of Transit System**
  Continue to examine the transit capacity utilization for the region as a whole and by service mode. Perform analysis that compares regional and sub-regional results, by peak and off-peak hours, to major peers and to prior years. Identify the impact of transit capacity utilization on farebox revenues.

- **Enhance the Annual Budget Process**
  Incorporate other planning, funding, and oversight processes into the budget process, such as estimated impacts from the Regional Priorities Initiative; operational impact related to capital projects in the RTA system capital program; cash flow and borrowing costs related to cash management requirements to address State funding delays; and RTA system performance measures. Continue to improve the quality of the Service Boards' ten-year business plans.

- **Continue Development of the Performance Measurement Program**
  - » Measure and monitor key performance elements of the transit system at the regional, sub-regional, and strategic levels that are consistent with the Agency's strategic plan. Continue the development of the Regional and Sub-regional Report Cards.
  - » Work with the Service Boards and other stakeholders to develop the performance measurement process further by establishing regional and sub-regional performance standards to ensure that the system operates efficiently and meets the demands of the public.

- **Conduct Customer Satisfaction Research**
  Coordinate a customer satisfaction survey involving CTA, Metra, and Pace with data that can be aggregated to provide a regional perspective on how the RTA system is meeting the mobility needs of the region's residents. Incorporate the results of customer satisfaction research into the regional and subregional performance measurement programs.

- **Manage the State Bond Capital Program**
  Continue improving the execution of the capital program to reflect RTA reform legislation mandates and Office of the Auditor General (OAG) recommendations with the objective of ensuring that the Service Boards are managing their capital

funds effectively and efficiently. To assist the RTA staff in fulfilling its project management oversight function, consultant services are necessary. The 2012 budget includes $400,000 for these professional services.

- **Continue to Provide Rail Safety Oversight of the CTA Rapid Transit System**
  Administer the Rail Safety Oversight (RSO) Program for the CTA's rapid transit system as required by the FTA and State. RTA will continue its State Safety Oversight (SSO) responsibilities including responding to and investigating accidents and management of hazards. $170,000 is budgeted for external resources for Rail Safety Oversight in 2012.

- **Provide Liquidity for the Service Boards and the RTA**
  The region's cash receipts from various State programs that provide funding for mass transit operations in the Chicago metropolitan area have been delayed as a result of the State's challenging financial situation. To improve the predictability of cash flows, a $400 million short-term borrowing facility is managed by the RTA to provide funding to the Service Boards and the RTA in the absence of State payments. RTA will need to pursue legislative and financial solutions as $300 million of this authority is set to expire in 2012.

- **Continue the Development of Reporting and Monitoring Tools for Service Board Financials**
  Improve upon the Monthly Financial Report and the "Dashboard" Presentation. Utilize quarterly performance measures, timely economic analysis, and feedback from the CTA, Pace, and Metra staff to both represent and monitor the financial condition of the Service Boards.

- **Enhance and Manage the Integrated Management System**
  Strengthening cost control and effective workflow management processes that assist RTA in building stronger oversight of the region's public transportation system continues to be a priority. The integrated management system enhancements include dashboards, Human Resource Management (HRM) self-service, robust business and financial analysis reporting, and future flexibility to interface electronically with the Service Boards for financial, operational, and capital project data.

Government and Community Affairs

This newly restructured department is responsible for developing and promoting the RTA's federal, state and local government affairs agenda and promoting transit within the community. Among these roles, the department has key responsibilities in the Regional Priorities Initiative work programs related to the Coordinate Government Affairs, Marketing, and Outreach area.

Departmental Priorities:

- **Coordinate Government Affairs, Marketing, and Outreach**
  - » Establish a national campaign to advocate directly with state and federal legislators to promote increases in state and federal funding for State of Good Repair needs. The need for capital funding to address State of Good Repair needs is critical. The region has suffered many years of deferred maintenance, while ridership has reached historical highs.
  - » Work with elected officials and civic leaders to strengthen RTA's connections within the six county region.

- **Advocate for Stable State Funding**
  Advocate forcefully on the important role that transit plays in our region's economy. Not only should transit funding not be reduced, but it should be provided to the transit agencies in a reliable and consistent manner from the State of Illinois to allow the transit agencies to make long term plans.

Human Resources

As a result of reorganization within the agency, the Human Resources Department now directly reports to the Executive Director.

The Human Resources staff works to fulfill its mission to deliver high-quality, responsive services to ensure the agency has the necessary talent and resources to achieve its strategic goals. The Human Resources Department provides a variety of consulting services to employees, board members, and retirees such as: recruitment and retention, performance management, benefits and compensation, employee relations, wellness and employee morale activities, and organizational development.

Departmental Priorities:

- Provide training to ensure awareness and education on sexual harassment and workplace violence prevention;
- Address ways to offer a competitive total compensation package to enhance the ability to recruit and retain qualified individuals while managing our salary and benefit costs;
- Identify methods to improve the recruitment and selection of qualified, diverse candidates in the midst of low turnover and a competitive job market;

Information Technology

In support of the Agency's mission and vision, the Information Technology (IT) Department has developed a 2011 Information Technology Strategic Plan (ITSP). The 2011 ITSP provides a high-level picture of the full range of current RTA business activities. It addresses the trends in public transportation business and technology practices. It outlines strategies for renewing and improving competitive business and technical practices. Finally, the plan provides a series of initiatives and organizational changes designed to expedite improvement and productivity gains.

As part of the recommendation of the ITSP, the IT Department now directly reports to the Executive Director and will be headed by a Chief Information Officer.

Departmental Priorities:

- **Implement the Five-Year IT Strategic Plan**
  - » Ensure that the Agency, Service Boards, and, most importantly, transit customers, receive the utmost benefit from technology tools. Information Technology has had a significant impact on society and business in recent history. As both the speed of information and the adoption of technology have increased, customers and employees look for IT driven solutions and answers. As a result, IT has become a powerful conduit for carrying out the mission of an organization and delivering value to the customer.
  - » Transform, over a five year period, the process, systems, networks, operations support, and governance of the information technology used to meet the current and future business needs of the RTA. The change must occur without disruption of existing business plans and schedules. Therefore, additional resources will be required to drive the transformation and align the changes to enhance planned strategic RTA priorities where possible. The transformation of the IT support organization and governance models are of the highest priority and should begin immediately with the approval of the IT Strategic Plan. The 2012 budget includes $1.0 million to implement the IT Strategic Plan.

Legal

The Legal Department provides legal advice and counsel to the RTA Board, Executive Director, and staff regarding the statutory and regulatory provisions governing the Authority. It also oversees all RTA transactions and litigation. In addition, as part of the RTA organizational changes, the Procurement and Contracting Division now reports to the General Counsel. In this new role the department has key responsibilities related to the Economies of Scale area of the Regional Priorities Initiative.

Departmental Priorities:

- **Economies of Scale**
  Play a lead role in the Economies of Scale initiative related to merging the service and supply needs of the RTA and the Service Boards. The RTA has developed an internet site to share information and coordinate procurement projects with the Service Boards. This forum promotes comparison methods and enables agencies to benchmark their results against their peers. Therefore, the four agencies are able to coordinate their procurement of commonly used supplies and services to attract greater competition.

- **Pursue Sales Tax Litigation and Legislation**
  Continue litigation against companies and municipalities who unlawfully divert sales tax revenues out of the RTA region through sham sales offices. These schemes cost the RTA system tens of millions of dollars each year, depriving transit of the resources needed to operate in a difficult economic environment. In addition to direct legal action in the courts, RTA's Legal Department and outside counsel are working closely with the Government and Community Affairs Department to draft and analyze various pieces of legislation that have been proposed to clarify sales tax sourcing rules and end the diversionary schemes. The proposed 2012 budget includes $0.5 million in legal fees for various litigation and legislation matters.

- **Review and Update Loss Financing Plan/Joint Self-Insurance Fund**
  Oversee the regional Loss Financing Plan/Joint Self-Insurance Fund (the "Fund"). In recent years, the Fund has expanded the level of insurance coverage it purchases on behalf of the Service Boards, but the Service Boards continue to purchase additional coverage above and below the level of protection provided by the Fund. Staff will investigate the possibility of further consolidating regional insurance programs within the Fund, and will propose a redrafting of the Fund agreement, to which all four regional transit agencies are party, in order to update and clarify the procedures for acquiring insurance coverage and borrowing monies from the Fund to cover large losses.

Planning

The Planning Department consists of four principal organizational areas. Three areas, Strategic Planning & Policy, Local Planning & Programs, and Regional Coordination provide strategic, regional, sub-regional, and corridor planning and coordination with the Service Boards. The fourth area, Regional Accessibility, is responsible for the ADA Paratransit Certification Program and Accessibility & Travel Training Program. The Planning Department has key responsibilities in the Maximize Use of System and Enhance Customer Experience areas of the Regional Priorities Initiative.

Departmental Priorities:

- **Strategic Capital Investment**
  Work with the Service Boards to implement a Regional Transit Signal Priority Network that allows buses to have longer, more frequent green lights resulting in improved efficiency and travel times. The 2012 Capital Program includes $8.0 million as the local match for a $32.0 million CMAQ grant.

- **Maximize Use of Transit System**
  - » Develop a "Mobility Management" approach to maximize use of the system and enhance the customer experience including communicating information and coordinating transportation services so that customers can readily identify and use appropriate and available transportation options. This initiative will include Interagency Signage Expansion at $800,000 and Downtown Connections Interagency Information Improvement at $100,000.
  - » Develop Regional Service Planning Guidelines and on-going market and service development work for specific corridors (e.g., I-90, I-290, Elgin O'Hare West Bypass, and I-55) centered on identifying the appropriate service strategy and level of transit investment for various markets in the region with the objective of ensuring that the region

is providing adequate and sustainable access to transit by rightsizing service.

- **Enhance Customer Experience**
  - » Develop a regional fare model that will assess the impacts of fare policy on revenue and ridership across all three service operators and use these outputs to inform policy-related discussions and decisions in an effort to develop a universal fare payment system. The RTA received a $340,000 United Work Program (UWP) FTA grant to undertake this work.
  - » Improve Regional Real-Time Travel Information by implementing "one-stop shopping" web and mobile phone applications, including integration of Bus Tracker, Train Tracker, and Pace travel information on a single web page. The 2012 budget includes $2.0 million for integration of real time trip planning information and $50,000 for a regional Real Time Transit web page.
  - » Redesign the Transit Benefit Program to simplify use, increase participation, and attract new riders.

- **Develop Technology Tools**
  Use technology to streamline processes, provide more information, and allow customers, the Service Boards, and RTA employees better tools to use the transit system and accomplish their needs. In addition to work on the Regional Priorities Initiative, work will also be done to upgrade the ADA certification database, Geographic Information System (GIS) for internal planning, and the Regional Transit Asset Management System.

- **Implement Recommendations of ADA Paratransit Certification Review**
  Expand the mail-in recertification program and implement other efficiencies recommended in the recently completed ADA Paratransit Certification program review. The 2012 budget includes $6.1 million for the entire ADA Paratransit Certification program.

- **Implement Local Transit Improvement and Transit Oriented Development Plans**
  Identify and fill service gaps and provide public transportation service that maximizes (appropriate) use of the system while enhancing the customer experience. We will fund new Community Planning Programs at $0.7 million that will also ensure access to the system by planning for more coordinated land use and development in and around the existing transit infrastructure.

- **Identify Appropriate Service Strategies for Regional Markets**
  - » Ensure that the region is providing adequate and sustainable access to transit by rightsizing service.
  - » Develop the Regional Service Planning Guidelines and on-going market and service development work for specific corridors (e.g., I-90, I-290, EOWB and I-55).
  - » Support infrastructure and service planning on the I-90 corridor. The 2012 budget includes $200,000 for this effort.

Goals and Performance Measures

Background

In February 2007, the Regional Transportation Authority released its five-year strategic plan entitled Moving Beyond Congestion (MBC). This joint planning process between the RTA and the three Service Boards achieved several important milestones, including the establishment of a shared vision and goals for the region, a detailed analysis of the current status of the transit network, and a long-term evaluation and assessment of the infrastructure and operational needs of the system.

In January 2008, the Illinois General Assembly enacted significant amendments to the RTA Act, which mandated an ongoing strategic planning process, the establishment of goals, and measurement of performance. In response to the new legislation, the RTA joined in partnership with each of the Service Boards to enact a resolution in February 2009 that would revise the goals and objectives of the MBC Strategic Plan in order to satisfy all requirements of the amended RTA Act.

Vision

The RTA, CTA, Metra, and Pace share a common vision for the region: That the RTA system is a world-class public transportation system that is affordable, reliable and safe, and is the keystone of the region's growing business opportunities, thriving job market, clean air, and livable communities.

Goals and Objectives

The table on next page identifies the current regional goals and objectives. The Goals explain what the RTA Region needs to accomplish in order to realize its vision and the Objectives identify how the RTA region will meet its goals.

The executive director and staff of the RTA are committed to working with the Service Boards, their staffs, and local and state elected officials in order to achieve the objectives in the Plan, promote investment in the region's transit system, and ensure that the system operates efficiently and in a coordinated fashion throughout the region.

The RTA has developed an update to the Strategic Plan for the years 2012 - 2016 entitled The Way Forward. It will be released in 2012 and is a continuation of the vision and goals identified in the Moving Beyond Congestion Plan. It outlines an implementation framework of strategic priorities that focus on our customers and their needs as the region also deals with difficult financial constraints.

To achieve the objectives of the Strategic Plan and as part of the RTA's oversight function to support the evaluation and management of the region's public transit system, the RTA has identified five major areas for performance analysis: Service Coverage, Service Efficiency and Effectiveness, Service Delivery, Service Maintenance and Capital Investment, and Service Level Solvency. Each major area has several corresponding performance measures.

- **Service Coverage** - monitors both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.

- **Service Efficiency and Effectiveness** - evaluates the level of resources spent on delivery service in relation to the level of service and the extent to which passengers are using that service.

- **Service Delivery** - reflects the quality of the service delivered.

- **Service Maintenance and Capital Investment** - indicates the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

- **Service Level Solvency** - assesses financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

RTA Regional Goals and Objectives

MBC Goal	Objectives
Provide Transportation Options and Mobility Provide attractive, high-quality, innovative transit choices that link people to jobs and facilitate the use of transit for other trips. Transit use in our region is the broadest measure of the success of the transit system.	• Increase the use of public transportation for commuting • Increase the use of public transportation for other purposes • Increase the amount of transit service provided and serve more of the region's travel markets using innovative approaches, as appropriate • Take advantage of highway pricing strategies and promote preferential treatment of transit • Provide quality transit service that is fast, clean, safe and reliable • Provide affordable transit service • Increase the ease of connection between different transit providers by coordinating service, fares, information and physical connections • Ensure appropriate consideration of regional equity principles
Ensure Financial Viability The sustained financial viability of public transportation is essential to the region's effective multi-modal transportation system. The transit agencies need to manage operating costs, make sound investment decisions and implement the capital program in a timely manner.	• Manage the growth of operation costs • Select investments which maximize returns to the region • Progress towards achieving a state of good repair while making appropriate investments to enhance and expand the transit system • Implement the capital program in a timely manner • Ensure a fair allocation of passenger revenue from interagency trips across service providers • Where appropriate, engage in joint efforts with private interests that contribute resources and add value to the transit system
Enhance Livability and Economic Vitality An effective transit system makes many contributions to an economically vibrant and livable region. Though transit's role is secondary, not primary, in achieving this goal.	• Mitigate the growth in highway congestion • Improve our environment by reducing total transportation emissions and energy consumption • Coordinate transit with development to encourage concentrated growth near transit services • Provide mobility for aging populations and people with disabilities • Provide employers with access to a broader workforce
Demonstrate Value In order to fulfill its valuable role in our region, transit requires the support of key constituencies and the public at large.	• Realize additional operations support through legislative action • Achieve adequate capital funding to move the system towards a state of good repair and undertake selective expansions • Manage transit operations so that they are cost and service effective • Create and sustain public understanding of the benefits of public transportation

Regional and Sub-Regional Performance Measures

In 2009 the RTA began reporting performance at a region-wide level by aggregating data from each of the Service Boards – CTA, Metra, and Pace – to arrive at an assessment of regional performance. In 2010, the RTA continued reporting at a regional level and introduced a new sub-regional performance report that analyzes performance at the Service Board and mode level. For both the regional and sub-regional reports, performance is analyzed over a five-year period using data from the Federal Transit Administration's National Transit Database (NTD), RTA financial reports, and operating reports from the three Service Boards. The sub-regional report provides a more detailed level of analysis that helps interpret trends observed at the regional level and provides a means of assessing areas of strength and weakness in the delivery of specific services. Regional and sub-regional performance reports are posted on the RTA website and presented to the RTA Board of Directors. The most recent reports cover the period 2006-2010 using NTD data published in November 2011.

The RTA has also developed a set of companion reports to the regional and sub-regional reports that are based on an analysis of peer groups. At the regional level, the peers selected represent the transit systems that serve the ten largest metropolitan regions in the country. Regional peer reporting began in 2009. At the sub-regional level, the peer analysis is conducted at the mode level with five peers selected for each mode in the RTA system – urban bus, heavy

rail, commuter rail, suburban bus, vanpool, and ADA paratransit. In 2010, the selection of modal peers was completed and work began on the development of the sub-regional peer report, which was completed and reported to the RTA Board of Directors in Spring 2011.

A full report of the performance measures at the regional and sub-regional levels can be found on the RTA website at http://rtachicago.com/initiatives/performance-measures.html (these reports cover the period of 2006 to 2010 and are based on NTD data.) The following report contains highlights from these reports, as well as projected measures for 2011 and 2012.

In 2010, the RTA began to develop a set of strategic measures. The purpose of the strategic level measures is to focus on broader societal outcomes in the economy, environment, and social/political community to assess how transit is positively impacting the quality of life for members of the region. The measures will necessarily involve factors that are out of the direct control of the RTA and Service Boards because of their broader scope, but are ones for which public transportation plays a significant contributing role. The strategic measures also become a way to link RTA goals with those of other regional stakeholders including planning organizations, other transportation departments, and units of local and state government. The strategic measures will be used to monitor progress in the goals and objectives outlined in the *Moving Beyond Congestion Strategic Plan*. The first strategic performance measures report is scheduled to be released in 2012.

Service Coverage

These performance measures monitor both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.

Vehicle Revenue Miles

Vehicle Revenue Miles are the amount of service provided as measured in miles driven by vehicles while in service. At the regional level, the systemwide vehicle revenue miles were projected to increase 1.2% between 2010 and 2011 and another 1% in 2012 (Exhibit 3-25). CTA and Metra Vehicle miles are projected to remain stable in 2012 with no changes in service levels. Pace Suburban Service vehicle miles will increase by 1.9% in 2012 as Pace adds a few new starts and pilot programs to its service. Pace ADA is projected to increase by 5% following the 2012 increase in ridership (Exhibit 3-26).

Exhibit 3-25: **Systemwide Vehicle Revenue Miles** (millions)

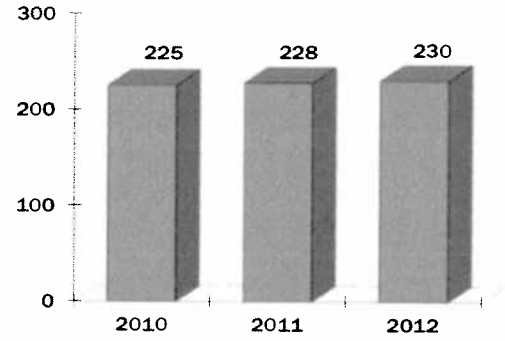


Exhibit 3-26: **Service Boards Vehicle Revenue Miles** (millions)

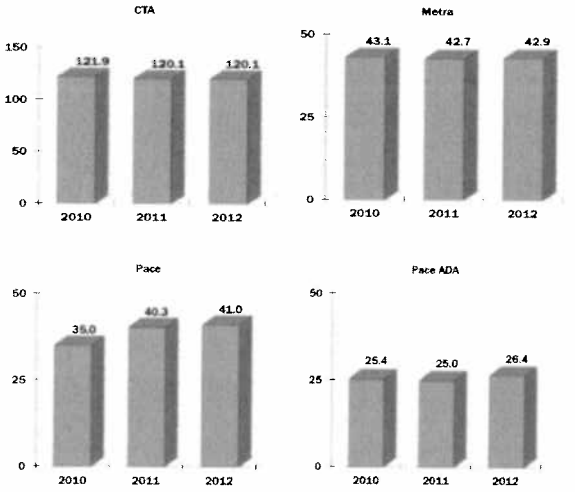

Unlinked Passenger Trips

Unlinked Passenger Trips, or Ridership, provides the number of times passengers board buses and trains including transfers from one bus or train to another in order to complete their trips. As demonstrated in the data below, Ridership was projected to grow 1.1% in 2011 and another 0.7% in 2012 as a result of stabilization occurring in the regional economy (Exhibit

3-27). CTA projects ridership to continue this modest level of growth with an increase of 0.9% in 2012. Metra is projecting a 1.1% decline in 2012 due to the proposed fare increase and the expiration of the senior's ride free program. Pace Suburban Service also projects less than 1% growth similar to CTA, while ADA trips are projected to continue their recent trend of higher growth and increase by 5% in 2012 (Exhibit 3-28).

Exhibit 3-27: **Systemwide Unlinked Passenger Trips** (millions)

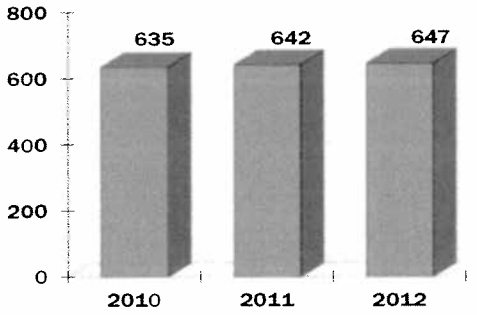

Exhibit 3-28: **Service Boards Unlinked Passenger Trips** (millions)

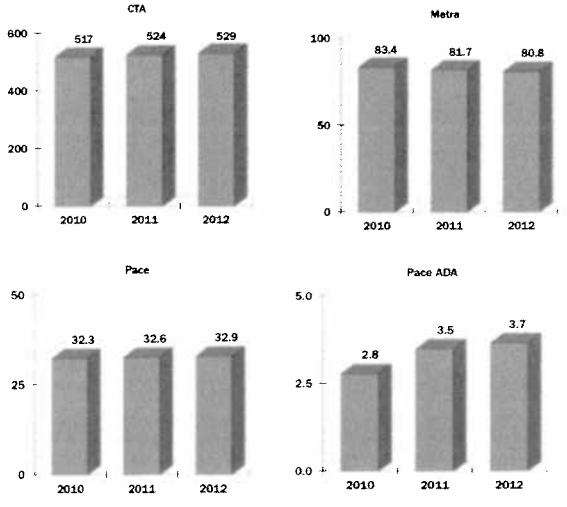

Service Efficiency and Effectiveness

These performance measures evaluate the level of resources spent for delivering services as well as the extent to which passengers are using public transit.

Operating Cost per Passenger Trip

Operating Cost per Passenger Trip illustrates both the cost of providing a trip and also the gap between the established fare and the cost of providing an individual trip. The projected performance figures provided in Exhibits 3-29 and 3-30 indicate that the cost of providing one unlinked passenger trip is expected to increase 36 cents or 11.4% between 2010 and 2011, an increase that exceeds the projected change in the CPI, which increased by 2% over the same period. In 2012, operating cost per trip is projected to decline 5 cents or 1.4% as a result of increased ridership and a small 0.3% decrease in expenses. The decrease in regional costs is led by a projected decrease in CTA expenses from labor union concessions on work rules and wages. Pace ADA has also budgeted a 2012 decrease in cost per trip as a result of initiatives to keep expense growth at a lower rate than ridership growth.

Exhibit 3-29: **Systemwide Operating Cost per Unlinked Passenger Trip**

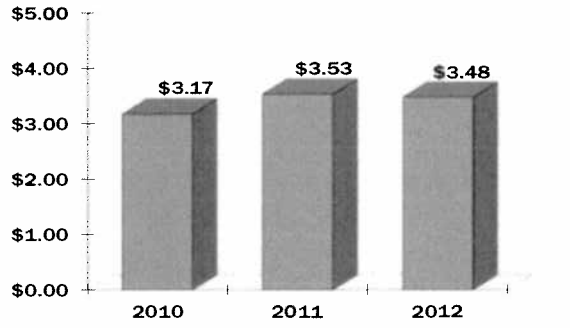

Exhibit 3-30: **Service Boards Operating Cost per Unlinked Passenger Trip**

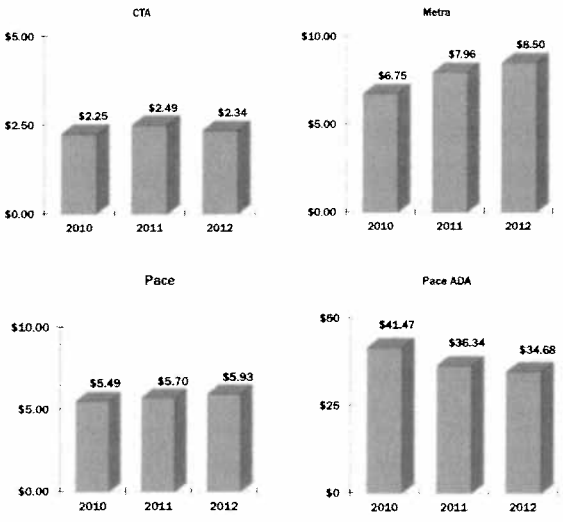

Exhibit 3-31: **Systemwide Operating Cost per Vehicle Revenue Mile**

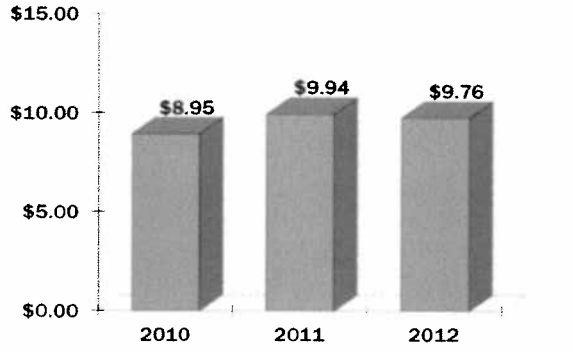

Exhibit 3-32: **Service Boards Operating Cost per Vehicle Revenue Mile**

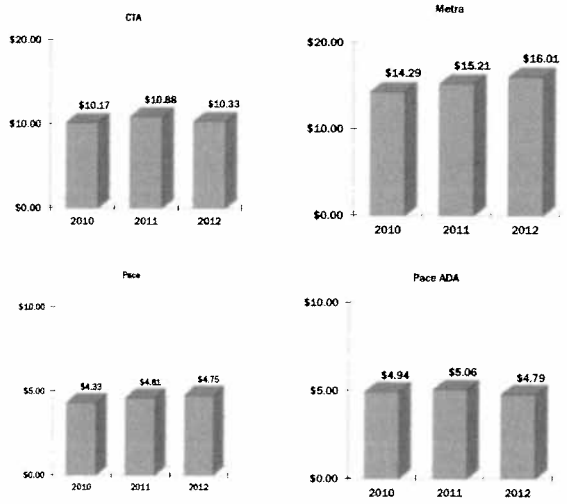

Operating Cost per Vehicle Revenue Mile

Operating Cost per Vehicle Revenue Mile takes total operating costs and divides it by the cumulative sum of the miles traveled by transit vehicles while in revenue service. Projected values for this performance measure are shown in Exhibits 3-31 and 3-32. At the regional level, it cost about $8.95 to operate one transit vehicle one mile in 2010. This figure was estimated to increase 11.1% in 2011 to $9.94, coinciding with decreased vehicle service miles primarily at CTA, followed by a budgeted decrease of 1.8% in 2012 to end at $9.76 per mile. CTA's operating cost per vehicle revenue mile was $10.17 in 2010 and was expected to reach $10.88 by year-end 2011, resulting from the afore-mentioned service cuts. In 2012, cost per mile is projected to decline 5.1% to $10.33 proportionate to the budgeted 5% reduction in operating costs. Metra's operating cost per vehicle revenue mile was $14.29 in 2010 and was estimated to reach $15.21 in 2011, a 6.5% increase, and increase another 5.3% in 2012 to reach $16.01. Metra service levels are budgeted to remain stable in 2012. Pace, at $4.33 in 2010, projected a 6.5% increase for 2011 to end at $4.61 followed by a 2.8% gain in 2012 to end at $4.75 per vehicle revenue mile. Pace ADA, at $4.94 per mile in 2010, projected a 2.5% increase for 2011, to end at $5.06, followed by a 5.3% decrease for 2012, to end at $4.79 per mile, resulting from projected service demand increases as costs are kept under tighter control through productivity initiatives.

Service Delivery

This objective reflects the quality of the service delivered and focuses on customer service and safety.

On-Time Performance

Each Service Board defines on-time performance differently but it is generally understood to represent the percentage of times a transit vehicle departs from and/or arrives at a location within a certain number of minutes after or before the scheduled time. The data presented here is actual past performance rather than projected future year data. As demonstrated in the actual reported data in Exhibits 3-33 to 3-34 (on following page), there was a large gain in on-time performance in 2009 of four percentage points and a decrease of one percentage point in 2010. CTA Bus and Pace Bus have made significant improvements in on-time performance since 2007.

Major Safety and Security Incidents per 100,000 Passenger Trips

This performance measure demonstrates the rate of reportable safety and security incidents per 100,000 unlinked passenger trips. Overall for the region, the incident rate is very low and declined in both 2009 and 2010. For the three years reported, CTA incidents remained fairly stable, with an increase of one incident for bus and four fewer incidents on rail for 2010. Metra reported nine more incidents in 2010, but has a very low incident rate, second only to Pace's dial-a-ride service, which had no reportable incidents

Exhibit 3-33: **Systemwide On-Time Performance**

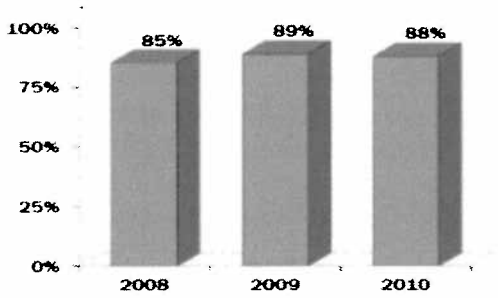

Exhibit 3-34: **Service Boards On-Time Performance**

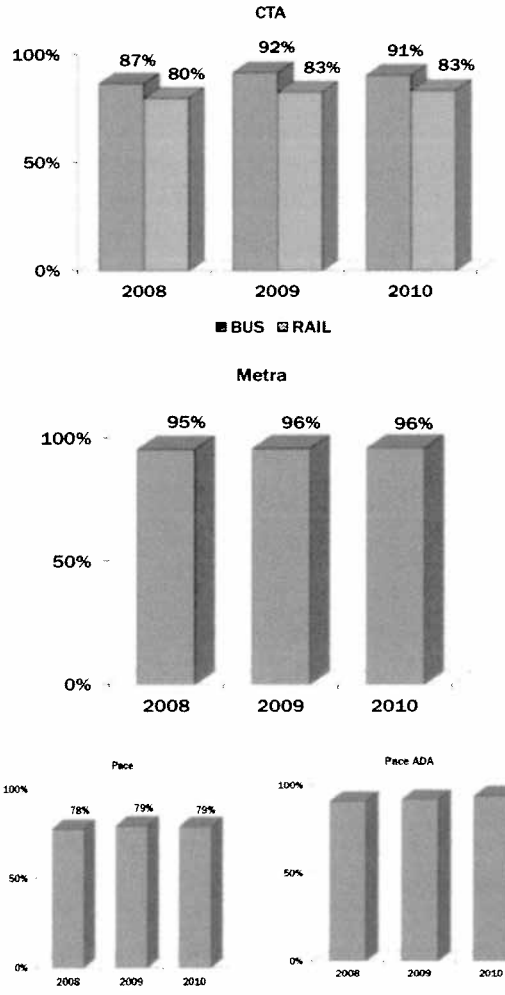

in 2010. On an aggregated basis, Pace's reportable incidents have decreased each year and are 37% fewer than 2008. Pace ADA has also seen consistent decreases, with 2010 having 56% fewer reportable incidents than in 2008 (Exhibit 3-35 and 3-36).

Exhibit 3-35: **Systemwide Major Safety and Security Incidents per 100,000 Passenger Trips**

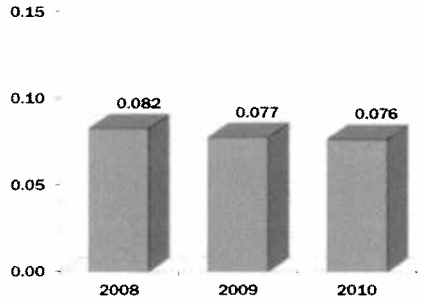

Exhibit 3-36: **Service Boards Major Safety and Security Incidents per 100,000 Passenger Trips**

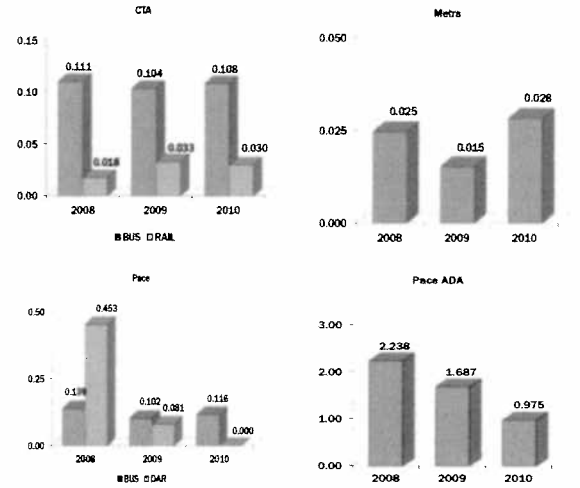

Service Maintenance and Capital Investment

The measures associated with this objective demonstrate the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

Miles Between Major Mechanical Failures

This measure takes the average distance that vehicles travel in revenue service uninterrupted by mechanical failures that prevent them from completing a scheduled trip or from starting the next scheduled trip. At the regional level, miles between failures have shown steady improvement through 2010. CTA bus leads this indicator with a 17.5% increase in 2010 and steady growth over the last three years resulting from their bus replacement program. CTA rail also saw improvement of 23% over the last five years, despite an 11% drop in 2010. Metra's performance has declined from

its high of 2006 as a result of the aging of the fleet. Pace Bus also experienced a decline in performance in 2010 for this measure (Exhibit 37-38).

Exhibit 3-37: **Systemwide Miles Between Major Mechanical Failures** (thousands)

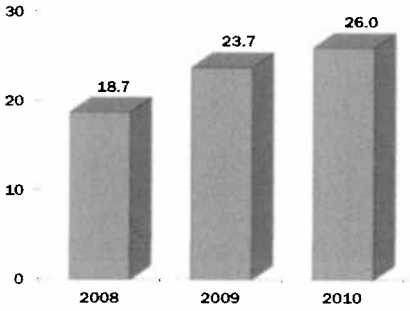

Exhibit 3-38: **Service Boards Miles Between Major Mechanical Failures** (thousands)

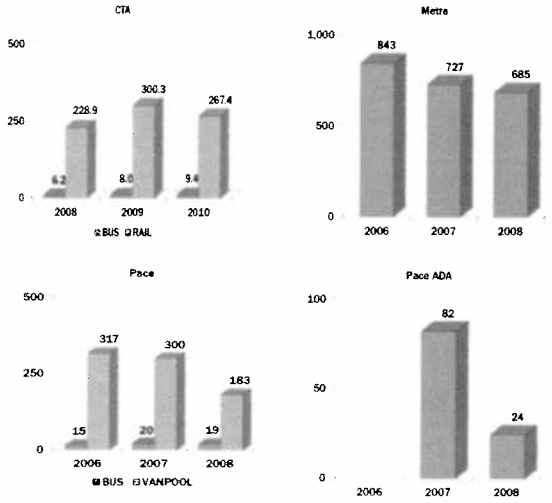

Percent of Vehicles Beyond Useful Life

This measure shows the percentage of vehicles in the total active vehicle fleet beyond their minimum useful life, as defined by the Federal Transit Administration (FTA). The FTA defines useful life as 4 years for automobiles or vans, 12 years for buses, and 25 years for rail cars. Due to limited capital funding, vehicles usually exceed their useful life before actually being retired. After a steady decline through 2008 in the percentage of vehicles beyond useful life, there was a slight increase for the region in 2009 from 28% to 29%, followed by a decrease to 26% as CTA eliminated nearly 300 of its older vehicles in 2010. Pace also retired 66 buses in 2010 decreasing the average

Exhibit 3-39: **Systemwide Percent of Vehicles Beyond Useful Life**

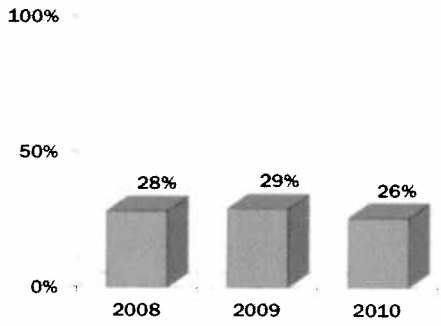

Exhibit 3-40: **Service Boards Percent of Vehicles Beyond Useful Life**

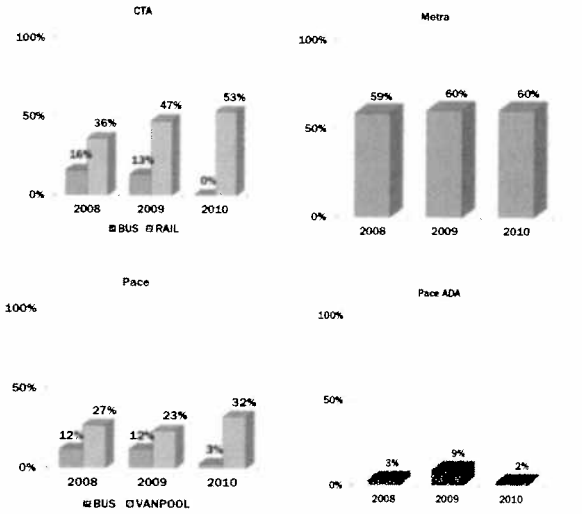

age of their fleet. Metra has not added vehicles to its fleet since 2005 contributing to its average fleet age of 27.9 years in 2010. Metra undertakes extensive maintenance programs to keep its locomotives and cars in service and operating safely longer than the FTA guidelines (Exhibit 3-39 and 3-40).

Service Level Solvency

These measures assess financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

Capital Program Funding

This indicator demonstrates the amount of capital funds available to finance maintenance, enhancement, and expansion of the transit system infrastructure. The systemwide figure represents actual data for the new funding available to Service Boards for the

Exhibit 3-41: **Systemwide Capital Program Funding** (millions)

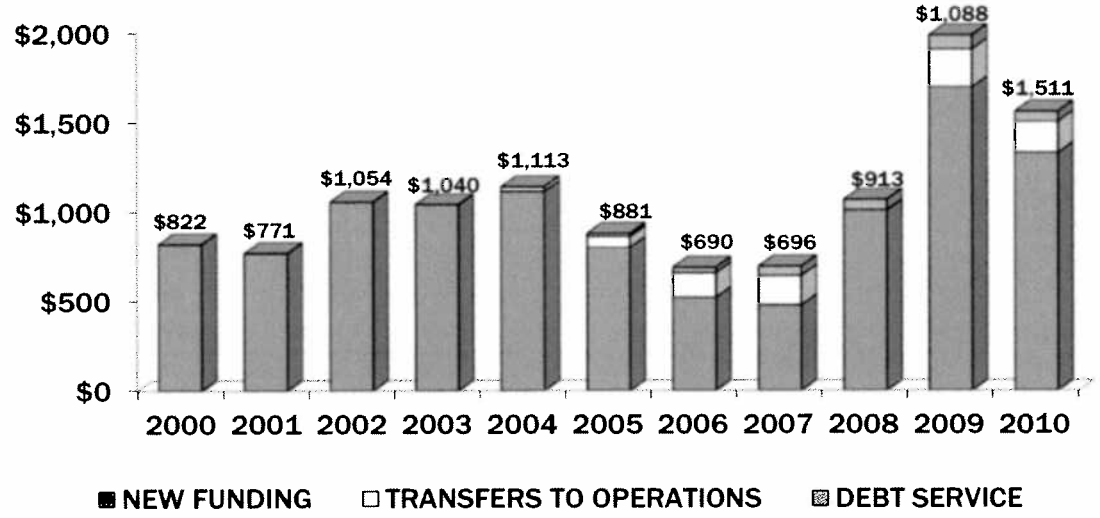

Exhibit 3-42: **Service Boards Capital Program Funding** (millions)

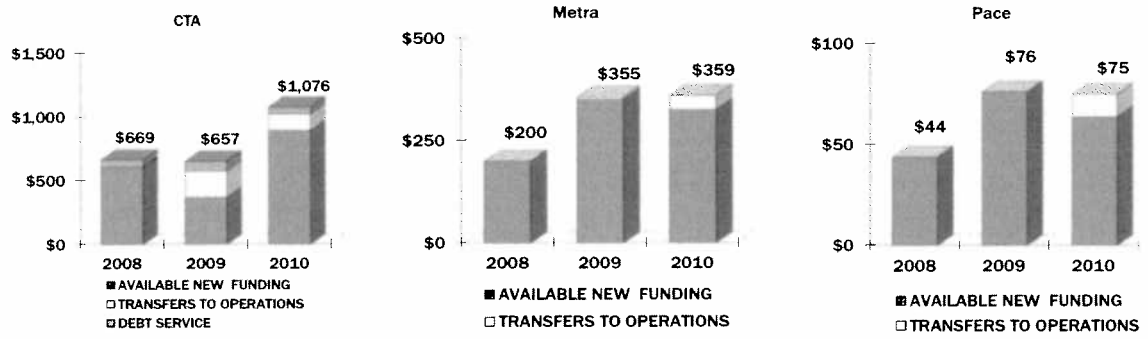

past ten years and does not include de-obligated or re-appropriated funds that become available. Funding levels for all three Service Boards benefited from the American Recovery and Reinvestment Act passed in February 2009. Total available new capital funding in 2010 was at its highest level of the past ten years, an increase of 61% as compared to 2009. CTA saw the largest gains in available new funding, with 2010 more than doubling the amount available in 2009, the result of a new bond issue that provided a $471 million gain for the agency, while Metra and Pace both saw decreases in funding levels. Both agencies saw significant increases in the amount of funding diverted to fund operations; Metra transferred almost six times the amount diverted in 2009, transferring $35 million in 2010. Pace, which had not had to transfer capital funds to operations since 2007, diverted $11 million in 2010, 15% of their new capital funding for the year (Exhibit 3-41 and 3-42).

Fare Revenue per Passenger Trip

Fare Revenue per Passenger Trip is the total fare revenue divided by the total number of passenger trips, providing the average fare that a passenger pays. The projected performance measures below indicate that fare revenue per trip was expected to rise $0.01 in 2011 and another $0.09 in 2012. The increase in 2012 is due to the planned Metra fare increase, primarily, and to the modification of the Seniors Ride Free Program to means test seniors for free-fare eligibility and require others to pay a reduced rather than free fare. The change in the senior fare program was implemented in September 2011. The CTA increase of $.02 per passenger trip in fare revenue is partially a result of the higher increase projected in rail ridership compared to bus ridership. The CTA's base fare for rail is $2.25 and for bus it is $2.00. Metra's fare revenue per trip is projected to increase by 25.9% in 2012 as a

result of the fare increase, with some revenue growth also due to an increase in senior revenue. Pace's fare revenue per trip is projected to increase by about 1% in 2012 related to the revenue gain from the change to the senior free-ride program (Exhibit 3-43 and 3-44).

Exhibit 3-43: **Systemwide Fare Revenue per Unlinked Passenger Trip**

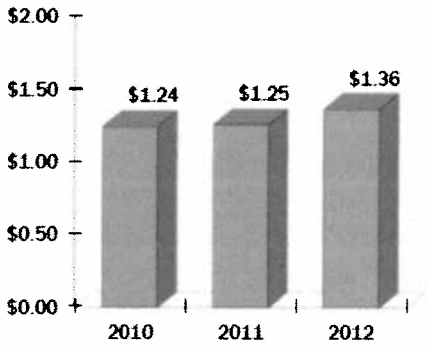

Exhibit 3-44: **Service Boards Fare Revenue per Unlinked Passenger Trip**

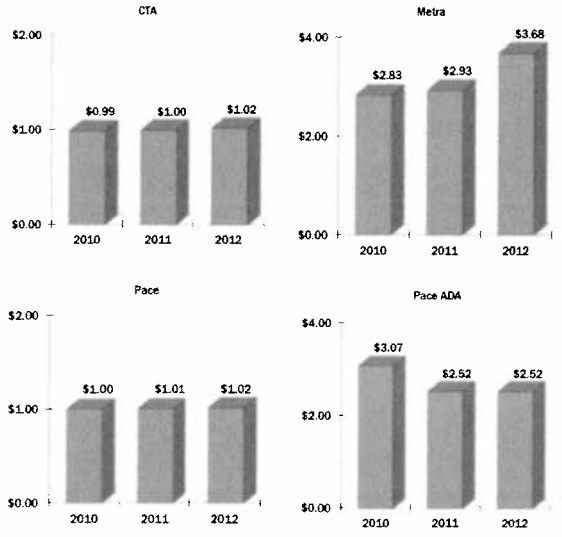

RTA Performance Measures

The Regional Transportation Authority (RTA), in addition to fiscal oversight responsibilities to its Service Boards, houses several customer service programs that are critical to promoting and facilitating the use of mass transit in the Chicago region.

- The Information Technology (IT) department actively manages RTA's website content and activity and has seen consistent growth in terms of total website visits, unique visitors to the sites, and page views.

- RTA's ADA Paratransit Certification Program determines an individual's functional abilities and limitations for using fixed route services; ADA Paratransit is provided for customers whose disability or health condition may prevent them from using the CTA and/or Pace fixed route services for some or all of their travel. Individuals who are interested in using ADA Paratransit service must apply and be found eligible according to ADA guidelines; demand for such services has increased dramatically and is expected to escalate into the near future.

- The RTA Travel Training Program aims to educate individuals and groups on the use of public transportation to encourage individual mobility and freedom while reducing the burden on regional paratransit services; this program has experienced significant growth, which is a win-win situation for individuals and service providers.

- The Travel Information Center provides Chicagoland residents with all types of customer assistance and information, both on the phone and in person at a walk-in location near CTA headquarters.

- The RTA/CTA Transit Benefit Fare Program helps companies and their employees take advantage of tax law changes to reduce commuting costs while supporting clean air and reducing traffic congestion. Employers can provide employees with up to $125 a month ($1,500 a year) for transit or vanpool commuting expenses as tax-free benefits in accordance with the Transportation Equity Act of the 21st Century (TEA-21) and Section 132(f) of the IRS Code. With this program, employers can purchase CTA Transit Cards, Chicago Cards and/or RTA Fare Checks that the RTA delivers to enrolled companies.

Information Technology

The general RTA website experienced 1.9 million page views in 2010 and 1.7 million page views in 2011 (Exhibit 3-45). In addition to the general website, IT manages the goroo trip planning site, which provides users with schedule, fare, and other pertinent information for CTA, Metra, and Pace and even offers driving and biking directions. The goroo site experienced nearly 8 million page views in 2010 and 12.6 million page views in 2011 (Exhibit 3-46). Visits to the Regional Transportation Authority Mapping and Statistics (RTAMS) site, a data warehouse for planning and financial information on the regional transit system, grew from 57,000 page views in 2010 to 103,000 in 2011 (Exhibit 3-47).

Exhibit 3-45: **RTA Website Visits**

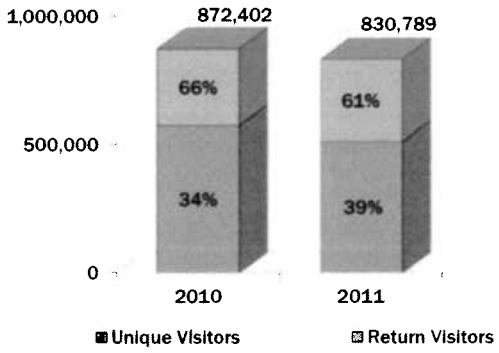

Exhibit 3-46: **goroo Website Visits**

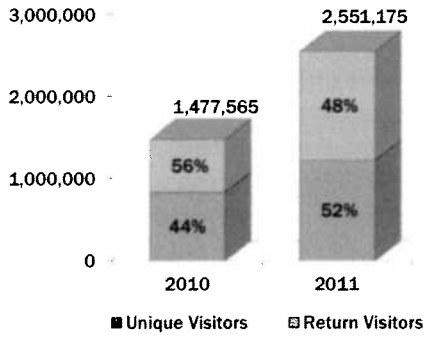

Exhibit 3-47: **RTAMS Website Visits**

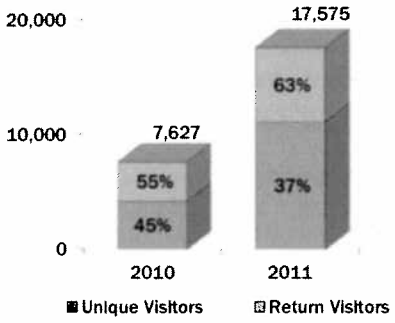
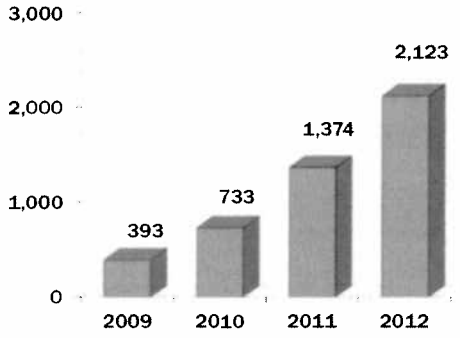


RTA Travel Training Program

The RTA offers travel training to individuals who are eligible for ADA Paratransit and want to learn how to use fixed route or commuter rail services. Once travel training is requested, a Travel Trainer works with an individual one-on-one to develop a training plan tailored to the individual's unique travel needs. Trainers can practice specific trips, practice maneuvering on buses or trains with a wheelchair or other mobility device, or simply provide an orientation to the accessibility features offered on buses and trains. Travel Training requests and completions have steadily grown from 2009 levels and are anticipated to have more than quadrupled by year-end 2012 (Exhibit 3-48).

Exhibit 3-48: **RTA Travel Training Program: Total Individuals Served**



ADA Paratransit Certification Program

Residents with a disability that prevents them from using the fixed-route Pace bus or CTA bus or train services may be eligible for RTA ADA Paratransit service. ADA Paratransit is a shared ride, advanced reserva-

Exhibit 3-49: **ADA Paratransit Eligible Riders**

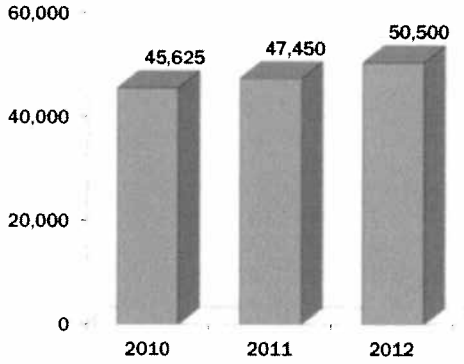


Exhibit 3-50: **ADA Paratransit Certification Applications**

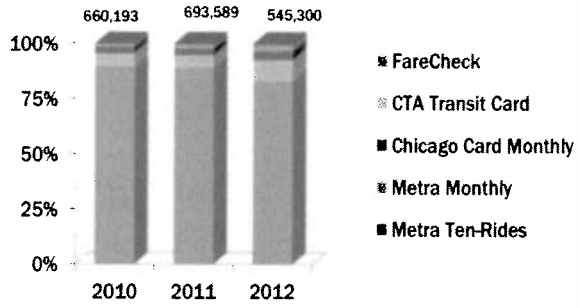

Exhibit 3-52: **Value of Transit Benefit Fare Media Sold**

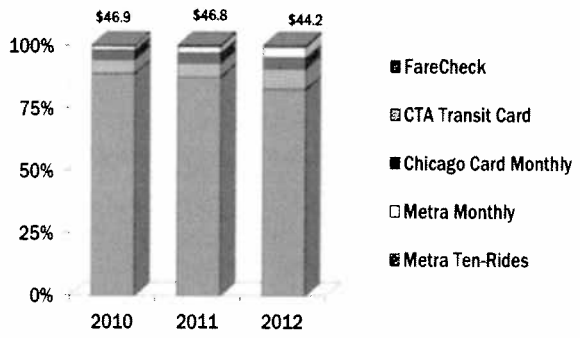

tion, origin-to-destination service for persons with disabilities who are unable to use the regular fixed-route public transit service because of their disability. Eligibility is determined after a resident submits an application and undergoes an in-person interview which may include a mock transit trip to help the evaluator determine travel abilities and physical limitations. 2012 certification applications are projected to be nearly 24% higher than in 2010, with a 10% increase in riders determined to be eligible for ADA Paratransit services.

RTA Transit Benefit Fare Program

The RTA Transit Benefit Fare Program helps employees and employers save money on transit. IRS Section 132(f) allows for employees to have up to $125 a month (was $230 for 2010) deducted pre-tax to pay for transit or vanpool commuting expenses. Fare options include Chicago Card monthly pass reloads, CTA Transit Cards, Fare Checks, Metra monthly passes, and Metra 10-ride passes. 2012 estimates reflect reductions in the number and value of transit benefits from prior years as there are plans to discontinue some of the fare media offered in the program. In addition, Fare Check amounts will be down in 2012, despite the increase in Metra fares, due to the change in the federal maximum being reduced from $230 per month to $125 per month. Lastly, the increase in pre-paid debit cards being used for Transit Benefits, combined with an increase in Metra monthly sales, is expected to result in a decline in Fare Check sales for 2012 (Exhibit 3-51 and 3-52).

RTA Customer Service Programs

The RTA issues Reduced Fare Cards for elderly residents as well as persons with disabilities. Applicants undergo a screening process and possibly an interview to determine eligibility for a reduced fare card. With the elimination of the Seniors Ride Free Program in September 2011, applications for Reduced Fare Cards quadrupled in 2010; 2012 estimates are expected to be nearly double 2010 levels (Exhibit 3-53).

RTA's Customer Service Center experienced a significant increase in phone and walk-in activity due to the Seniors Ride Free transition, with a doubling of phone

Exhibit 3-53: **Reduced Fare Cards Issued**

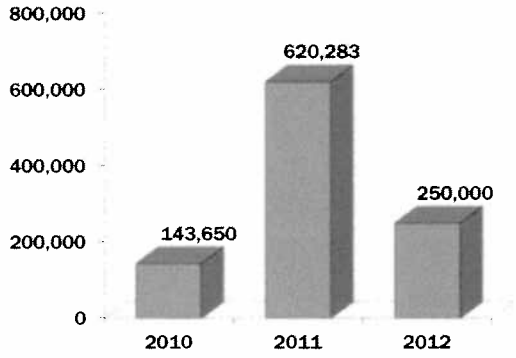

Exhibit 3-54: **Customer Service Center Volume**

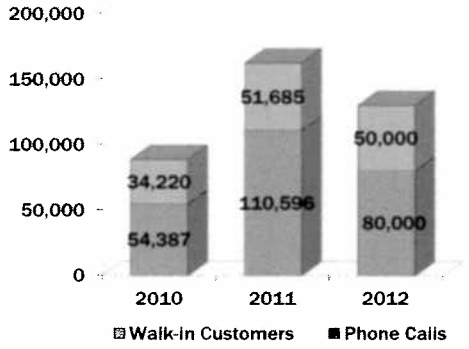

calls in 2011. Walk-ins to the Customer Service Center were significantly higher during several weeks around the Seniors Ride Free transition, so much so that accurate numbers are not available for that time period. The Customer Service Center is expected to answer 80,000 phone calls and see approximately 50,000 people in 2012 (Exhibit 3-54).

Reference

RTA Bonds

Much of the information in this section is sourced from the RTA's Comprehensive Annual Financial Report (CAFR). Since the 2011 CAFR is not yet available, the most recent financial data, through 2010, is shown.

The bonds issued by the RTA carry a rating of "AA+" from Standard & Poor's, AA from Fitch IBCA, and "Aa3" from Moody's Investors Service, Inc. These represent solid investment grade ratings. The RTA has the distinction of being one of the highest rated public transportation agencies in the United States.

All bonds are general obligations of the RTA to which the full faith and credit of the RTA are pledged. These general obligation bonds, with a balance of $2,260.2 million as of December 31, 2010, are divided into two types: $1,497.2 million in Strategic Capital Improvement Program (SCIP) bonds and $763.0 million in RTA bonds (Exhibits 3-55 and 3-56). The following paragraphs briefly discuss each outstanding bond issue.

In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also is-

sued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001-2002, in the aggregate amount of $4 million, Series 1991A Bonds, maturing November 1 in the years 2002-2006, 2008 and 2011, in the aggregate amount of $29 million, Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million and Series 1993B Bonds, maturing June 1 in the years 2004-2009, 2013 and 2023, in the aggregate amount of $47 million.

In August 1999, the RTA issued $299 million in General Obligation Bonds, Series 1999, to provide funds to refund in advance of maturity the RTA's outstanding Series 1992A Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $114 million, Series 1993A Bonds, maturing June 1 in the years 2009 and 2013, in the aggregate amount of $10 million, Series 1994A Bonds, maturing June 1 in the years 2006-2009, 2012, 2015 and 2024, in the aggregate amount of $143 million and Series 1994C Bonds, maturing June 1 in the year 2025, in the aggregate amount of $22 million.

In June 2000, the RTA issued $260 million in General Obligation Bonds, Series 2000A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In April 2001, the RTA issued $100 million in General Obligation Bonds, Series 2001A, to pay the costs of

acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In March 2001, the RTA issued $38 million in General Obligation Bonds, Series 2001B, to provide funds to refund in advance of maturity the RTA's outstanding series 1993A Bonds, maturing June 1 in the years 2004-2008, in the aggregate amount of $38 million.

In March 2002, the RTA issued $160 million in General Obligation Bonds, Series 2002A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In June 2002, the RTA issued $200 million in General Obligation Bonds, Series 2002B, to provide interim funding, as needed for a portion of the costs in connection with the reconstruction and expansion of rapid transit facilities operated by the CTA and to fund other public transportation projects.

In May 2003, the RTA issued $260 million in General Obligation Bonds, Series 2003A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In January 2003, the RTA issued $150 million in General Obligation Bonds, Series 2003B, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In October 2004, the RTA issued $260 million in General Obligation Bonds, Series 2004A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005-2025, in the aggregate amount of $147 million.

In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

In January 2010, the RTA issued $62.2 million in General Obligation Bonds, Series 2010A, to finance a portion of the costs incurred in connection with the

construction, acquisition, repair and replacement of certain public transportation facilities.

In January 2010, the RTA issued $112.9 million in General Obligation Bonds, Series 2010B, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

To Issue additional bonds the projected RTA Sales Tax must be at least 2.5 times the projected total debt service requirement. As shown in Exhibit 3-57 and 3-58 over the last ten years, actual sales tax receipts have met this test. Any differences between debt service amounts presented and amounts shown in general purpose financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

The RTA and its Service Boards have put an emphasis on making sure that the bond proceeds are spent in a timely and efficient manner. Exhibit 3-59 highlights recent bond issues with the largest project-to-date expenditures.

Fund Accounting

The accounts of the RTA are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are separated in its own set of accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled.

GOVERNMENTAL FUND TYPES

The RTA's governmental fund types are the General Fund, Debt Service Fund and Capital Projects Fund (Exhibit 3-60).

General Fund

The General Fund is the general operating fund of the RTA. It is used to account for all financial transactions that are not specifically required to be accounted for in another fund such as the Agency Fund. The General and the Agency Funds are the only two funds that have annual budgets. Exhibit 3-61 shows the 2012 budget for these funds.

Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs. The interest earned is generated from the funds being held for payment to the bondholders. The difference between the transfer and payment expenditures reflects the year-over-year timing variance.

Capital Projects Fund

IIn 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of SCIP bonds, and to have a maximum of $500 million RTA bonds outstanding. The Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of the bond issues. The first Capital Projects Fund was established in 1990 with the issue of $100 million of RTA bonds to fund capital projects at the Service Boards. The RTA allocated the proceeds from the bonds issued under the General Assembly's authorization as follows: 50 percent for CTA capital projects; 45 percent for Metra capital projects; and 5 percent for Pace capital projects. Projects included in approved five-year capital programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

Effective January 1, 2000, the RTA Act was amended to authorize the issuance of an additional $260 million of SCIP Bonds in each year for the period of 2000 through 2004 and to issue and have outstanding an additional $300 million of non-SCIP Bonds. These amounts have been issued.

(1) Reconciliation of Budgetary basis to GAAP basis.

(2) Before reserves and designations.

PROPRIETARY FUND

Proprietary Funds are used for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has only one Proprietary (Enterprise) Fund—the Joint Self-Insurance Fund.

Joint Self-Insurance Fund

The Joint Self-Insurance Fund is used to finance claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. This fund is reported as an enterprise fund since the predominant participants are outside of the RTA.

FIDUCIARY FUND TYPES

Fiduciary Funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's Fiduciary Funds consist of an Agency Fund and a Pension Trust Fund.

Agency Fund

The Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra, and Pace, including Retailers' Occupation and Use Tax (sales tax), interest on this tax, reduced fare reimbursement

grants, and federal operating assistance grants. Sales tax revenues are recorded in the fund and are equally offset by expenditures recording the pass through to the Service Boards.

Pension Trust Fund

The Pension Trust Fund is used to account for all accumulation of resources for, and payments of, retirement benefits to employees participating in the RTA Pension Plan and Trust.

Basis of Budgeting

The basis of budgeting refers to the conventions for the recognition of costs and revenues in budget development and in establishing and reporting appropriations. The RTA's annual budget and related appropriations are prepared on the modified accrual basis of accounting in conformity with generally accepted accounting principles, except for capital grants/expenditures and debt service payments. Modified accrual basis is a type of accounting whereby revenue and other financial resource increments (e.g., bond issue proceeds) are recognized when they become both "measurable" and "available" for finance expenditures of the current period. Capital grants/expenditures are budgeted for on a project basis, which normally exceed one year. Debt service payments are budgeted as transfers from the General Fund.

Although appropriations are adopted for individual line items, the legal level of control is restricted to total appropriations/expenditures and total administration (statutory cap) appropriations/expenditures. Management has the authority to exceed any line appropriation without Board approval, provided it does not exceed the legal levels of control. It has been the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the Budget Ordinance. However, due to the unfavorable economic conditions in recent years and the depletion of funds in the undesignated/unreserved fund balance to preserve operating stability, the RTA waived its fund to budget policy for the 2012 fiscal year.

Exhibit 3-62: **2010 Reconciliation of Budgetary Basis to GAAP Basis Accounting** (dollars in thousands)

	General Fund
Excess of expenditures over revenues and other financing use-budgetary basis	40,370
Adjustments	
Capital grant expenditures incurred in current year but considered in prior years' budgets	(6,660)
Capital grant expenditures expected to be incurred in future years but considered in current year budget	11,721
RTA capital expenditures expected to be incurred in future years but considered in current year operating budget	(210)
Budgetary basis to GAAP basis adjustment	**$ 4,851**
Net Change in Fund Balance - GAAP basis	45,221
Net Changes in Reserves	(37,903)
Net Change in Unreserved, Undesignated Fund Balance	**$ 7,318**

Budgetary reporting is balanced with accounting records on a monthly basis and is fully reconciled to the accounting system on an annual basis in the Comprehensive Annual Financial Report and for the annual Municipal Bond Disclosure Reports required by the Securities and Exchange Commission (Exhibit 3-62 and 3-63).

(1) The RTA Act permits certain revenue and expense adjustment for the recovery ratio calculation. The RTA, by means of ordinance, allows supplementary adjustments for Service Board calculations, but such adjustments are reversed to determine the system-generated revenue recovery ratio for the region, which by statute must be at least 50%. Service Board adjustments include amounts that result in calculations that equal the "marks" set by the RTA. (2) CTA adjustments to revenue include in-kind revenue for security services provided by the Chicago Police Department (CPD). Expense adjustments include in-kind costs for the CPD equal to the revenue credit, and credit for security, pension obligation debt service and some grant revenues. (3) Metra revenue reflects circuit ride free credits; expense adjustment credits include security, depreciation and transportation facility leases. (4) Pace revenue adjustments include in-kind ADvAntage program charges; expense adjustments include in-kind ADvAntage program charges. (5) Regional revenue adjustments include a credit for a CTA lease transaction. (6) In 2008 the region was provided a $200 million expense exclusion toward the regional recovery ratio in an effort to accommodate the increased funding associated with state legislation that increased the percentage of sales tax collected by the RTA. The exclusion was set to decrease by $40 million dollars each year and expire completely in 2013. In 2012 the temporary statutory expense exclusion is $40.0 million (7) Expense adjustments include credits for capital costs incurred in providing contracted services (capital cost of contracting).

4 CTA Operating Plan

Overview

The Chicago Transit Authority (CTA) was created by the Illinois State legislature in 1945 and began operations in 1947. It became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator and is governed by a seven-member Chicago Transit Board.

A new State funding package, established by legislation in 2008, increased the percentage of State sales tax dedicated to mass transit and gave authority to the City of Chicago to increase the Real Estate Transfer Tax (RETT) to support the CTA. Unfortunately, the economic recession has had a significant impact on these funds; revenues from sales tax and the RETT have been hit hard by the effect of reduced consumer spending. Additionally, the recession has impacted the rate at which the State of Illinois has made payments to the RTA and subsequently the rate at which the RTA can make payments to the CTA.

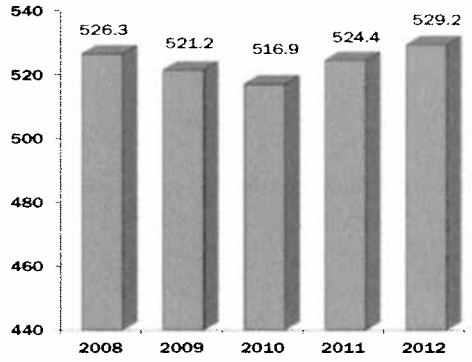
Building on its success in 2011, the CTA will continue to hold the line on costs in 2012 without the need for increases in fares or reductions in service.

In order to balance its 2011 budget, the CTA eliminated personnel and instituted hiring delays. The CTA also budgeted for the transfer of over $196.0 million in capital funds to operations. This allowed the CTA to avoid a fare increase and/or service reductions, having already reduced service in 2010. A borrowing agreement that the RTA reached with the State of Illinois in 2009 enabled the CTA to avoid fare increases in 2010 and 2011.

Building on its success in 2011, the CTA will continue to hold the line on costs in 2012 without the need for increases in fares or reductions in service. Unlike in 2011, the CTA does not plan to transfer any funding from capital to operations. However, the 2012 budget is built on the expectation of labor and work-rule reform. A fare increase or service reductions may become necessary during 2012 if successful labor negotiations do not occur.

CTA's total expenses rose in 2011 due to increases in labor, fuel, power and security expenses. In 2012, the CTA expects its total expenses to return to near 2010 levels. In the "other services" category, $71.7 million of the expense reduction occurs in 2012 only, as the CTA applies their liquidated debt service reserve fund toward the "other services" category. The CTA was able to substitute a bond insurance policy for the reserve fund, allowing them to liquidate the fund. A half-year credit of $80.0 million for work rule changes is applied in 2012 in anticipation of successful labor negotiations, which would result in a 2.0% decrease in labor expenses. If no contract savings are realized, the CTA projects a 6.8% increase in labor expenses for 2012. Other savings for 2012 include a $5.3 million decrease in electric power expenses due to a renegotiated contract. Net results for the 2012 budget and 2013 through 2014 plan show zero balances, with revenues equal to expenses.

Exhibit 4-1: CTA **Ridership** (in millions)



Service Characteristics

The CTA operates the second largest public transportation system in the United States with average weekday ridership on its bus and rail system of 1.7 million. The CTA's service area encompasses 322 square miles in the City of Chicago and 40 surrounding suburbs.

Bus operations provide 1,781 buses traveling over 140 routes covering 1,959 miles, with approximately 11,493 bus stops. Rail service on eight lines is provided by 1,200 train cars traveling over 224 miles of track.

RIDERSHIP

Total ridership for 2012 is budgeted at 529.2 million trips (Exhibit 4-1). This is 0.9% or 4.8 million trips higher than estimated 2011 ridership. Bus ridership is budgeted at 306.3 million trips in 2012. This is 0.2% or 700,000 trips higher than estimated 2011 ridership. Rail ridership is budgeted at 222.9 million trips in 2012, 1.9% or 4.2 million trips more than estimated 2011 ridership (Exhibit 4-2).

Average weekday ridership in 2011 was about 1.7 million, while Saturday and Sunday average ridership was nearly 1.1 million and 760 thousand, respectively. In 2012, average weekday ridership is projected to grow slightly, but to remain around 1.7 million. Saturday average ridership is expected to remain around 1.1 million, while Sunday average ridership is budgeted to increase slightly to 766 thousand (Exhibit 4-3). Total vehicle miles are expected to remain stable in 2012 at 120.1 million (Exhibit 4-4).

SERVICE QUALITY

The CTA has continued to work on improving the core components of its business that impact its customers directly. Some of its efforts include the implementation of performance management initiatives that ensure the delivery of safe, clean, on-time, courteous, and efficient service; the restructuring and consolidation of customer service and customer communications providing timely and accurate information to the riders; and concrete repairs made to improve the safety of bus turnarounds and rail stations.

As part of its effort to improve service quality, the CTA has implemented a variety of performance measures. These measures support a significant effort by the CTA to improve service quality. Grouped by quality service objective, the CTA provides for each performance measure the average monthly 2010 result, a 2011 monthly target, 2011 monthly results, and a definition of the performance measure. When applicable, the performance measure is associated with a specific department. The quality objectives include Ridership, On-Time, Efficient, Safe, Clean, and Courteous service. When performance for a month exceeds the monthly target, the measurement is highlighted in green. If performance for the month falls below but within 10% of the target, the measurement is highlighted in yellow. When performance falls below 10% of the target, the measurement is highlighted in red. Performance measure targets yet to be established are highlighted in gray. The monthly performance measures published on the CTA's website through November 2011 can be found at the end of this section (Exhibit 4-20).

Business units and departments are responsible for certain performance measures. For instance, the Bus Operations unit is responsible for the "% of Big Gap Intervals" measurement which records the number of bus intervals that are double the scheduled interval. In 2010, the Bus Operations Department enhanced its 2010 on-time performance by communicating goals and performance to everyone from managers to operators, while providing a platform for reporting

Exhibit 4-2: **CTA Annual Ridership By Mode** (in millions)

	2008	2009	2010	2011	2012
Bus	328.2	318.6	306.0	305.7	306.3
Rail	198.1	202.6	210.8	218.7	222.9
Total Ridership	526.3	521.2	516.8	524.4	529.2

Exhibit 4-3: **CTA Average Daily Ridership** (in thousands)

	2008	2009	2010	2011	2012
Weekday	1,679	1,658	1,633	1,665	1,676
Saturday	1,048	1,058	1,049	1,075	1,091
Sunday	725	748	732	758	766

Exhibit 4-4: **CTA Ridership and Miles** (Riders and Miles in thousands)

	2008 Actual	2009 Actual	2010 Actual	2011 Estimate	2012 Budget
Ridership (1)	526,336	521,242	512,180	524,388	529,227
Vehicle Miles	136,190	136,034	122,679	120,131	120,081
Passengers Per Mile	3.9	3.8	4.2	4.4	4.4

(1) Ridership in annual inlinked trips.

issues and brainstorming solutions. As indicated in Exhibit 4-20, the CTA was able to keep "% of Big Gap Intervals" performance measure at or below the 5% target every month of the year of 2011.

The use of performance measures ensures high levels of service quality and increases accountability to the public. By creating these performance targets and striving to meet or exceed them and delegating responsibility for the performance measures to specific departments and units, the CTA has shown that it values customer opinion and that it is working toward improved service quality and greater accountability.

CHALLENGES

Despite signs that the nation may be pulling out of the deep recession that began in 2008, the economy is expected to remain sluggish in 2012. The CTA's primary revenue sources are very sensitive to the health of the economy. In addition to significantly lower public funding, the CTA is also faced with higher costs in several areas. Labor costs make up the largest portion of the CTA's budget. In 2011, the CTA's unionized employees received contractual wage increases resulting in an over $66.3 million increase in labor expenses compared to the prior year. The CTA worked to mitigate these increases in 2011 by eliminating vacancies, controlling hiring, and strictly managing overtime. In 2012, the CTA expects to re-negotiate its labor contracts and has budgeted $80 million less in operating expenses contingent on work-rule reforms.

CAPITAL INVESTMENTS

The CTA spent $429 million in capital expenditures in 2010 and $540 million in 2011. The CTA is expected to spend a total of $455 million on capital expendi

tures in 2012, a 15.8% decrease from 2011 (Exhibit 4-5).

Since 2008, the CTA has diverted $554 million in capital funds to operations in order to fill budget gaps. As a result, the CTA has severely underfunded its capital program. In 2012, the CTA has pledged to stop diverting capital funds and will use all available capital funds to reinvest in the system. In 2012, the CTA will begin modernizing northern portions of the Red and Purple Lines. These northern Red Line stations, in particular, are in vital need of improvements. They are among the oldest stations in the system and are not ADA accessible. Also in 2012, the CTA proposes to spend $47.7 million to improve security. Measures include doubling the number of security cameras across the rail system and inserting cameras on rail cars. Between 2012 and 2016, the CTA will perform mid-life bus overhaul, rail-car overhaul and mid-life rehabilitation, upgrade power distribution and signals on the Red, Brown, Orange and Green Lines, rehabilitate rail stations, improve information technology, and begin projects using CMAQ, JARQ, UWP and ICE funding.

Exhibit 4-5: **CTA Capital Statistics** (dollars in thousands)

	2008	2009	2010	2011	2012
CTA Total Capital Expenditures	**$ 940,749**	**$ 671,952**	**$ 428,500**	**$ 540,490**	**$ 455,305**
CTA Bus Vehicles	2,093	2,053	1,782	1,782	$1,782
Average Age of Buses (in years)	5.6	4.7	4.3	5.3	6.3
CTA Rail Cars	1,190	1,190	1,190	1,200	1,200
Average Age of Rail Cars (in years)	25.0	26.0	27.0	25.0	21.0
Bus Routes Offering Lift Service	154	154	150	141	141
ADA Accessible Stations	85	85	85	88	87

In late 2010, the CTA requested that the RTA suspend a financial policy that requires a Service Board to use less than 50.0% of capital funding for debt service. The CTA wished to issue bonds in 2012 totaling $430 million and use the funding to exercise one of two options in their contract to purchase approximately 706 rail cars. The RTA Board recognized that this represented a unique opportunity for the CTA to purchase rail cars at a dramatically reduced price and suspended the financial policy which was created in a previous ordinance. The action taken by the RTA Board temporarily redacted the policy that limited the use of capital funds for debt service to 50% in favor of one that increased that limit to 60%. Thanks to these actions, the CTA was able to purchase these cars at the current price of approximately $1.4 million per car versus an estimated price of $2.5 million per car if the CTA had to rebid the contract. Further, if the CTA did not replace the existing cars in a timely fashion, they would need to perform life extending rehabilitations at approximately $1.2 million per car. The current estimate is that the temporary increase in the debt limit will run through 2019. Starting in 2012, the CTA will purchase the remaining 300 rail cars in this contract.

Bus System

In 2011, the CTA operated a fleet of approximately 1,782 buses, which made 19,709 weekday trips on 140 routes, providing almost 960 thousand rides on a typical weekday. Between 2006 and 2009 the CTA purchased 1,293 new buses. All buses delivered since 2007 have clean diesel engines and particulate filters that meet EPA emissions standards, and the entire bus fleet is ADA accessible and air-conditioned. The continued investment in the bus fleet reduced the average age of the bus fleet from 9.4 years to 5.2 years in 2011.

The bus vehicle overhaul program continues to improve service through regular replacement of major mechanical components subject to extensive wear. In 2012, bus mid-life overhaul activities are programmed for $22.5 million, and total $54.4 million during the period from 2013-2016. With overhauls, the fleet will demonstrate increased reliability and fewer instances of expensive breakdown-based repair.

Also in 2012, the CTA plans to replace its Nova 40-foot buses that have reached the end of their useful service life. Between 2012 and 2016, the CTA will spend $166.2 million to purchase vehicles equipped with clean propulsion technologies such as low floor, hybrid diesel-electric buses which achieve 20% greater fuel efficiency than standard diesel buses.

Rail System

The CTA has committed to an aggressive slow zone rehabilitation schedule. In 2010, the monthly average for slow zones on CTA's rail system was 9.7% of track, down from the system's peak in 2008 when 22.3% of track was in a slow zone.

The proposed Capital Improvement Plan (CIP) schedules $207.0 million in 2012 to fix right-of-ways, ties, rail and structure, to reduce slow zone imposition and therefore maintain operating speeds. An additional $443.3 million is budgeted from 2013-2016 to continue systematic rehabilitation of the CTA right of way.

The CTA has funded and ordered 706 new rail cars from the Bombardier 5000-Series. Each rail car will be equipped with seven network security cameras. These rail cars also include glow-in-the-dark strips on floors and improved door sensors. Each car meets or exceeds ADA compliance standards. These railcars will replace the aging 2200-Series and 2400-Series fleet placed into service in 1969 and which have far exceeded their expected service lives of 25 years.

In 2011, the CTA implemented Train Tracker. The project tracks CTA trains in real time and provides customers estimated train arrival times for all 143 rail stations. The CTA implemented Bus Tracker in 2008 to much success.

System-Wide Improvements

The CTA continues to invest in new technology to further improve service and safety. The CTA operates over 1,500 desktop computers that link into local area networks for efficient data transfer and team analysis. The CTA's proposed Capital Improvement Program allocates $7.1 million in 2012 for software and hardware upgrades. In 2011, the CTA provided $10.0 million to enhance its security and surveillance network by expanding camera coverage and police presence at its rail stations; 3,500 security cameras were installed at 143 rail stations. The new system integrates state-of-the-art, high-definition digital cameras which are capable of capturing facial recognition and displaying six times the detail of analog cameras in real time.

In 2011, the CTA unveiled the first of 400 LED signs to be installed at select bus shelters. The project will be completed by September 2012. Also in 2012, 100 CTA rail stations will receive a comprehensive facelift which includes better lighting, rehabilitation of station escalators and elevators, replacement of station roofs and canopies, and upgraded passenger public address systems.

Exhibit 4-6: **CTA 2012 Budget and 2013-2014 Financial Plan** (dollars in thousands)

	2010 Actual	2011 Estimate	2012 Budget	2013 Plan	2014 Plan
Operating Revenues					
Passenger Revenue	509,180	523,660	540,000	545,940	551,945

Power	28,208	30,236	24,977	25,077	29,633
Insurance & Claims	43,000	15,000	31,200	31,824	32,460
Purchase of Security Services	33,319	35,988	36,803	37,907	39,423
All Other	167,240	197,746	126,036	225,433	236,682
Total Operating Expenses	$ 1,239,050	$ 1,306,451	$ 1,240,291	$ 1,263,515	$ 1,287,227
Net Results	**$ 56,623**	-	-	-	-
Recovery Ratio % (1)	**56.6%**	**55.2%**	**59.6%**	**59.9%**	**59.4%**

(1) Recovery Ratio is calculated by dividing Operating Revenues by Operating Expenses. The calulation includes in-kind revenues and expenses for security services provided by the City of Chicago and some grant revenues, it excludes security and POB debt service expneses.

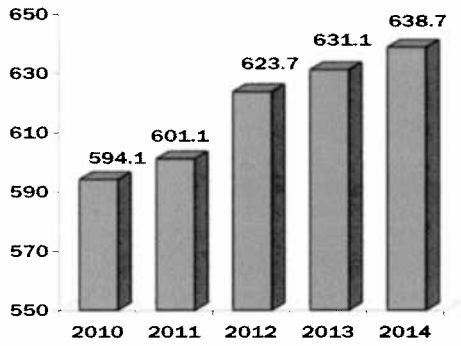
Budget and Financial Plan

The CTA's 2012 budget and 2013 and 2014 financial plan were approved by the RTA Board on December 15, 2011, in accordance with the 2012 marks set by the RTA on September 15, 2011. The CTA's operating funding marks were set at $588.6 million for 2012, $603.8 million for 2013, and $619.4 million for 2014. The CTA has budgeted for a recovery ratio of 59.6% in 2012, 7.6 percentage points above the RTA approved recovery ratio mark of 52.0% The CTA's Budget and Financial Plan, which includes the recovery ratio, is presented in Exhibit 4-6. The following section portrays the outlook for the 2012-2014 planning period.

OPERATING REVENUE

Operating revenue is expected to increase from $594.1 million in 2010 to $638.7 million in 2014, an increase of $44.6 million over the four-year period, or a compound annual growth rate of 1.8% (Exhibit 4-7). Operating revenue includes passenger revenue, reduced fare reimbursement, and other revenue. In 2012, passenger revenue comprises 44% of the CTA's total revenue, which includes public funding. The reduced fare subsidy and other revenue account for 2% and 4% of total revenue, respectively (Exhibit 4-8). In 2013, the CTA anticipates a $7.4 million increase in operating revenues over the 2012 budget, and in 2014 revenues are expected to increase an additional $7.6 million over 2013, a 1.2% increase.

Exhibit 4-7: **CTA Operating Revenue** (dollars in millions)

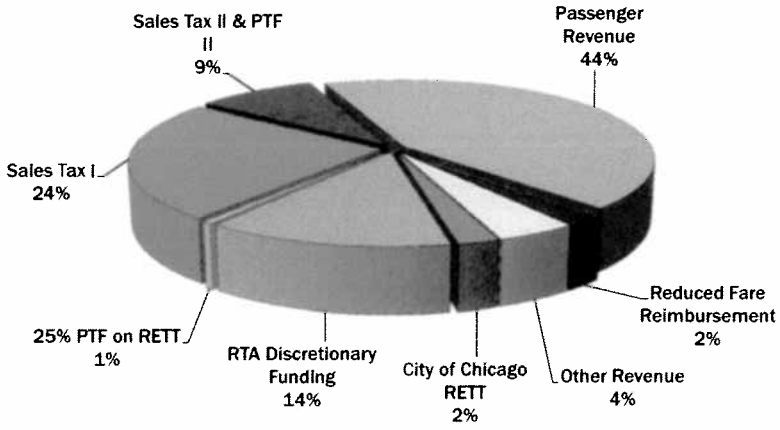


Passenger Revenue

Passenger revenue is estimated to increase from $509.2 million in 2010 to $523.7 million in 2011, an increase of $14.5 million or 3% as ridership increased due to a modest economic recovery (Exhibit 4-9).

Passenger revenue is budgeted at $540.0 million in 2012, $6.3 million or 3.1% higher than the 2011 estimate, reflecting continued modest economic recovery and the modification of the senior ride free program in September 2011. In 2013 and 2014, passenger revenue is anticipated to increase an additional 1.1% each year. The revenue increase is expected to come from increases in ridership. The CTA fare structure is shown in Exhibit 4-10.

Exhibit 4-8: **CTA 2012 Total Revenues ($1,240.3 million)**



State Free Rides & Reduced Fare Subsidy

The Illinois General Assembly passed legislation in 1989 that provided funds to reimburse the CTA for the cost of providing reduced fares for the elderly, students, and the disabled. Fare reimbursement is included as revenue and became available in July 1989. However, in 2009 the State eliminated a portion of the funding for this program thereby providing only $28.2 million. For 2011-2014, CTA assumes that the program will continue to be funded at $28.0 million.

Other Revenue

This category includes advertising, charters, concessions, contributions from local governments, investment income, and other revenue (Exhibit 4-11). Also included are essential contributions from the City of Chicago and Cook County. Annual funds provided by the City are $3.0 million, and the County contributes an additional $2.0 million. Other revenue was $56.6 million in 2010 and is expected to fall in 2011 and then increase to $58.8 million by 2014. The economic recession impacted the CTA's efforts to increase advertising, charters and concessions revenues, as corporations have been forced to reduce their spending in these activities. Accordingly, the 2012-2014 plan shows other revenues increasing 3.0% each year as the economy begins to recover.

Exhibit 4-9: **CTA Average Fare Calculation** (revenue and ridership in thousands)

	2008	2009	2010	2011	2012
Passenger Revenue	$ 471,099	$ 505,713	$ 509,180	$ 523,660	$ 540,000
System Ridership	526,336	521,241	516,872	524,388	529,227
Average Fare	$0.90	$0.97	$ 0.99	$ 1.00	$1.02

Exhibit 4-10: **CTA Fare Structure**

	Full	Reduced(1)	Comments
Basic Cash Fare (Bus)	**$2.25**	**$1.00**	**No transfers allowed**
Transit Card (Rail)	$2.25	$0.85	
Chicago Card (Rail)	$2.25	None	
Chicago Card (Bus)	$2.00	None	
Transit Card (Bus)	$2.00	$0.85	
First Transfer W/Fare Card	$0.25	$0.15	Allow two add'l rides within two hours of issue. Transfers are not valid for travel in reverse direction on the route of issue.
Passes			
1-day	$5.75	None	
7-day (CTA only)	$23.00	None	
7-day (CTA/Pace)	$28.00	None	7-Day CTA/Pace Pass valid on CTA and Pace non-premium/ subscription routes.
30-day	$86.00	$35.00	
Visitor Passes			
1-day	$5.75	None	
3-day	$14.00	None	
Link-up Pass	$39.00	None	Sold by Metra; use with Metra monthly ticket.
Express Surcharge	$0.25	$0.25	Downtown on bus routes 2, 6, 14, and 147.
Rush Shuttle Fares	$1.00	None	To/from downtown Metra stations during rush hour.
128 Soldier Field Express	$1.00	$0.50	
154 Wrigley Field Express	$6.00		Per carload.

(1) Reduced fares are for children 7 through 11 years old and students with CTA riding permits.

PUBLIC FUNDING

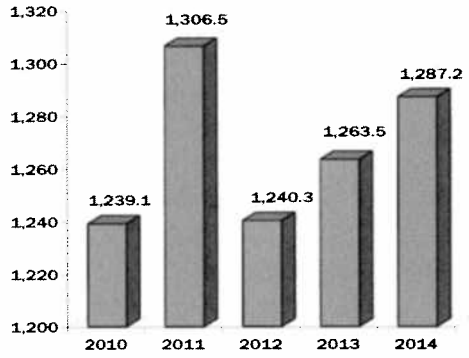
Public funding, available for CTA operations, is determined by and based on the RTA's revenue projection for the year. Public funding from the RTA consists of the RTA Sales Tax (RTA Sales Tax-I and II), the Public Transportation Fund (PTF-II), the City of Chicago Real Estate Transfer Tax (RETT), and RTA discretionary funding. Illinois Public Act 95-0708 increased the rates of the RTA sales tax, the PTF match, and the City of Chicago RETT, creating RTA Sales Tax II, PTF-II and RETT.

CTA funding from RTA Sales Tax-I is expected to increase from $301.4 million in 2012 to $318.5 million in 2014. RTA Sales Tax-II and PTF-II are expected to increase from $111.5 million in 2012 to $115.3 million in 2014. The RETT and the 25% PTF-II match on RETT combined are expected to increase from $35.0 million in 2011 to $36.4 million in 2014. RTA discretionary funds for the CTA are expected to increase from $168.7 million in 2012 to $178.3 in 2014. Apportionments from the RTA's 15% share of the sales tax (Sales Tax-I) revenue and the State's public transportation fund (PTF-I) are the sources of the RTA's discretionary funds. The CTA used $90.0 million of federal funds for preventative maintenance in 2010 and used a projected $48.2 million in 2011. The CTA did not budget the transfer of funds for preventative maintenance in 2012- 2014. Additionally, the CTA will no longer receive $83.0 million from the State in associated with the 2009 State Fare Agreement.

OPERATING EXPENDITURES

Total operating expenditures are forecasted to increase from $1,239.1 million in 2010 to $1,287.2 million in 2014. This $48.1 million increase represents a 1.0% compound annual growth rate (Exhibit 4-12).

Exhibit 4-12: **CTA Total Operating Expenditures** (dollars in millions)



For 2012, operating expenditures are estimated at $1,240.3 million. This is a $66.2 million, or 5.1%, reduction from 2011 estimates and is only $1.1 million greater than 2010 actual expenditures. The decrease in total expenses is largely due to the $80.0 million the CTA expects to save from labor reform and work rule changes and the $78.0 million the CTA received by liquidating their debt service reserve, shown in the "other services" category in 2012. These savings are expected to mitigate increased labor, fuel and insurance and claims costs.

Financial projections for the years 2013 and 2014 show increased operating expenditures at $1,263.5 million and $1,287.2 million, respectively. The 2013 financial projection represents an increase of 1.9% over the 2012 budget, and the 2014 financial projection represents an increase of 1.9% over the 2013 financial plan.

Expenditure Elements

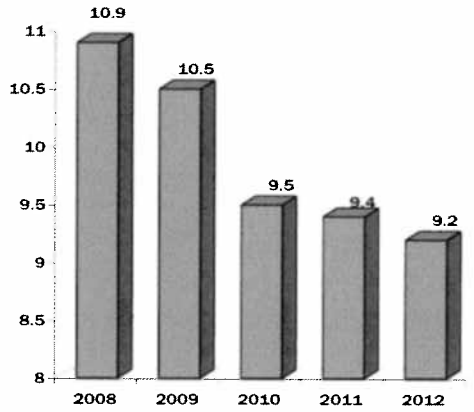
2012 operating expenditure elements include labor, material, fuel, power, insurance & claims, security, and other costs. Labor expenditures, including fringe benefits, represent 71.2% of the CTA's total expendi-

Exhibit 4-11: **All Other Revenue** (dollars in thousands)

	2010 Actual	2011 Forecast	2012 Budget	2013 Plan	2014 Plan
All Other Revenues:					
Advertising, Charter, & Concessions	22,609	19,436	22,802	23,486	24,191
Investment Income	627	394	867	893	920
Contribution from Local Govt. Units	5,000	5,000	5,000	5,000	5,000
All Other Revenue	28,397	24,619	27,013	27,823	28,658
Total All Other Revenues	$ 56,633	$ 49,449	$ 55,682	$ 57,202	$ 58,769

tures. This figure includes the $80.0 million savings from labor reform and work rule changes. Base wages represent about two thirds of that total, while fringe benefits, which are primarily medical insurance and pension costs, represent the remaining one third. Materials, used primarily for maintenance, are 5.8% of total expenditures. Fuel and power represent 7.4% of the CTA's expenditures. Security and insurance & claims represent 5.5% of total spending. Other expenditures comprise the remaining 10.2%. The other expenditure category includes items such as leases, utilities, and contractual services (Exhibit 4-13).

Exhibit 4-15: **CTA Budgeted Positions** (in thousands)



The CTA continues to reduce the number of budgeted positions in 2012, eliminating 200 positions that were budgeted in 2011 (Exhibit 4-15).

Labor Costs

Labor expenditures are expected to decrease from $835.1 million in 2010 to $808.4 million in 2014, contingent on $160.0 million savings in 2013 and 2014 from the labor reform and work rule changes. This $26.7 million decrease represents a compound annual decline of -0.81% (Exhibit 4-14). Labor expenditures for 2011 are estimated at $901.4 million or $66.3 million more than prior year. The higher labor expense is a result of previously negotiated wage increases and higher fringe benefit costs. When savings from labor reform and work rule changes are factored in, labor expenses are budgeted to decrease by $18.3 million in 2012 over the 2011 estimate, and then decrease by an additional 8.9% in 2013.

Material

The material category covers all repair parts for buses, trains, track, structure and signals in the system. Material expenditures are estimated at $67.9 million in 2011, $71.5 million in 2012, $73.6 million in 2013, and $75.8 million in 2014. Material expenses in 2011 are forecasted to be $4.8 million, or 6.7%, lower than budgeted. This reflects the CTA's increased investment in its bus fleet which lowered the average age of the fleet and lowered maintenance costs as a result.

Exhibit 4-13: **2012 CTA Operating Expenditures** - $1,240 million

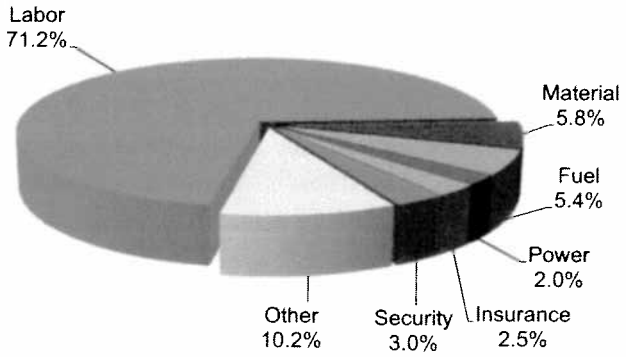


Exhibit 4-14: **CTA Labor Expense Growth** (in thousands)

	2010	2011	2012	2013	2014
Labor Expense	$ 835,143	$ 901,392	$ 883,075	$ 804,406	$ 808,406
% Change from Prior Year	(2.5%)	7.9%	(2.0%)	(8.9%)	0.5%

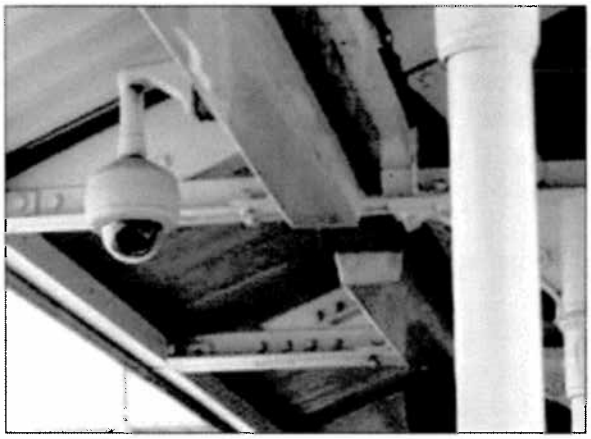
Modest increases in 2012, 2013 and 2014 represent the CTA's continued efforts to rein in material costs through supply chain improvements and close scrutiny of material purchases.

Fuel

In 2009, CTA fuel expenditures were $104.4 million for 22.9 million gallons, a price per gallon of $4.55 (Exhibit 4-16). 2010 actual results show fuel expenses of $52.1 million for 19.2 million gallons at a cost of $2.71 per gallon. In 2011, the cost per gallon is estimated at $3.18, a $0.47 increase from 2010 average costs but $0.26 less than the 2011 market price. At the same time, consumption is anticipated to decline in 2011 by 940 thousand gallons. The decrease in consumption is primarily due to service adjustments in 2010. In 2012, the cost of fuel is budgeted at $3.50 per gallon. As a result, fuel costs are budgeted at $66.7 million. This represents an increase of $8.5 million, or 14.7%, over the 2011 revised budget. Through the strategic fuel hedging program the CTA has already secured 26.3% of its 2012 projected fuel consumption.

Power

Electric power expenditures for the rail system increased from $28.2 million in 2010 to $30.2 million in 2011. This increase is largely due to higher power consumption as a result of severe storms and lower-than-usual temperatures in early 2011. Expenditures are budgeted at $25.0 million in 2012, a $5.3 million decrease from the 2011 estimate. This decrease is the result of a re-negotiated power contract effective January 1, 2012. Power expenditures are estimated to increase by $0.1 million in 2013. Expenditures are expected to increase by $4.5 million in 2014, following the end of the current power contract in 2013.



Insurance and Claims

The insurance and claims expense category represents the expenditures for claims and litigation for injuries and damages that occur on CTA property or with CTA vehicles.

The amount of injury and damages provision is determined by actuaries and based on actual claims history. The CTA's estimate of $15.0 million in 2011 is $28.0 million less than 2010 actual expenditures for insurance and claims. Additional deposits in 2010 allowed for lower-than-normal expenditures in 2011. Proposed expenditures for 2012 are $31.2 million, a $16.2 million increase from 2011. Expenses for insurance and claims in 2013 and 2014 are $31.8 million and $32.5 million, respectively.

Purchase of Security Services

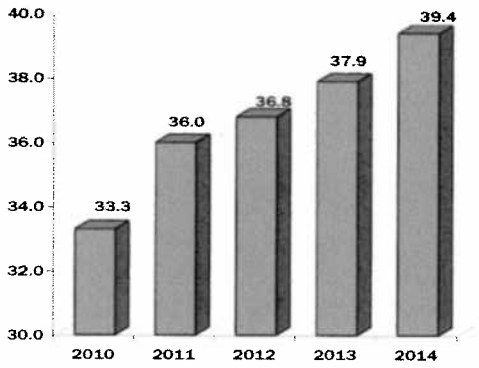
Security is strategically deployed throughout the CTA system to provide 24-hour coverage, seven days a week. Security services are provided by the City of Chicago, Evanston and the Oak Park police departments, and contracts with private security firms for guard and canine security.

Exhibit 4-16: **CTA Fuel Cost per Gallon** (Cost and Gallons in thousands)

	2009	2010	2011	2012
Fuel Cost	$ 104,377	$ 52,063	$ 58,166	$ 66,707
Gallons	22,940	19,240	18,300	19,059
Cost Per Gallon	$4.55	$2.71	$3.18	$3.50

Expenditures are estimated to be $36.0 million in 2011, an 8.0% increase from 2010 (Exhibit 4-17). This increase is due to the expansion of security cameras and personnel at bus depots and across the rail system. The 2012 budget for security services is $36.8 million, a 2.3% increase over 2011. In 2013 and 2014, security expenditures are expected to increase by $1.1 million and $1.5 million, respectively.

Exhibit 4-17: **CTA Purchase of Security Service** (in millions)



All Other Expenditures

All other expenditures include utilities, rents, maintenance & repair, advertising, commissions, consulting, insurance, and other general expenditures. For 2011, $197.7 million is estimated for other services. This reflects an increase of $30.5 million, or 18.2%, from 2010. In 2012, these expenditures are projected to fall to $126.0 million—a 36.3% decrease. This sharp reduction of costs reflects the $78.0 million applied to "other services" in 2012 from the CTA's liquidated debt service fund. Expenditures are forecasted to once again increase in 2013 and 2014 to $225.4 million and $236.7 million, respectively.

NET RESULTS

System-generated revenue (fares and other revenue) cover much of the CTA's operating expense budget, with the remainder of the operating deficit covered by public funding. The operating deficits are derived from total system generated revenue minus total operating expenditures. The deficits for the 2012 budget and 2013-2014 financial plans are $616.6 million, $632.4 million and $648.5 million, respectively (Exhibit 4-6). For the 2012 budget and 2013 and 2014 plans, public funding is equal to the deficit. Net results for the 2012 budget and 2013 through 2014 plan show zero balances, with revenues equal to expenses. Any remaining funding in excess of the operating deficit is transferred from operations to capital at the CTA.

RECOVERY RATIO

The CTA's recovery ratio equals total system-generated revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. In 2011, the CTA's recovery ratio is expected to meet the mark of 54.0% set by the RTA Board. The Region chapter provides the detailed recovery ratio calculation (Exhibit 3-57).

The following factors affect the CTA recovery ratio calculation. First, in-kind security services provided by the Chicago Police Department in the amount of $22.0 million are included as both revenue and expenditure in the recovery ratio calculation. Second, additional security expenditures are excluded from the recovery ratio calculation. The CTA's recovery ratio was 56.6% in 2010 and is estimated to be 55.2% in 2011. In 2012, the CTA has budgeted for a 59.6% recovery ratio and has planned for a 59.9% and 59.4% recovery ratio in 2013 and 2014, respectively (Exhibit 4-6).

2011 Budget versus 2011 Estimate

The CTA expects a balanced budget in 2011 (Exhibit 4-18).

OPERATING REVENUE

Calendar year 2011 operating revenues are estimated at $601.1 million and are projected to be $11.1 million, or 1.8%, below budget. Revenue from fares is estimated at $523.7 million, which is equal to budget.

The reduced fare subsidy is the State's reimbursement to the CTA for providing discounted fares to the disabled, the elderly, and students. Revenue from the reduced fare subsidy is estimated at $28.0 million, which is also equal to budget.

Total other revenues are estimated to be $49.5 million, $11.1 million or 18.4% unfavorable to budget. The RTA Act requires the City of Chicago to contribute $3.0 million and Cook County to contribute $2.0 million annually to the operations of CTA. Contributions from local governments of $5.0 million are on par with budget. Revenue from advertising, charter, & concessions are estimated at $19.4 million which is greater than budget by $0.5 million or 2.7%. Investment income is estimated at $394 thousand, which is unfavorable to budget by $456 thousand or 53.6%. All other revenue is estimated at $24.6 million which is lower than budget by $11.2 million or 31.3%. Other revenues include parking fees, sale of real estate, rentals and sale of CTA merchandise.

PUBLIC FUNDING

Calendar year 2011 public funding is estimated at $705.3 million and is projected to be less than budget by $30.3 million. Public funding available through the RTA is estimated at $574.1 million, exceeding budget by $30.7 million. This increase is largely due to greater than expected sales tax collections across the region. Increased funding from the RTA, together with lower than expected expenditures in 2011, allowed the CTA to transfer less funds than expected from capital for

Exhibit 4-18: **CTA 2011 Budget vs 2011 Estimate** (dollars in thousands)

	2011 Budget	2011 Estimate	Variance

Recovery Ratio %	**54.6%**	**55.2%**	**0.6 points**

preventive maintenance. Transfers from capital are estimated at $48.2 million, which is favorable to budget by $65.0 million.

EXPENDITURES

Calendar year 2011 operating expenditures are estimated at $1,306.5 million and are projected to be favorable to budget by $31.3 million. Expenditures for fuel, power and security services are over budget for the year while labor, material and other services are estimated to finish under budget due to cost containment strategies implemented to ensure that the CTA balances its budget in 2011.

Labor expenditures are projected at $901.4 million, which is $29.8 million or 3.2% under budget. The CTA achieved savings in this category by limiting hiring in 2011 and implementing mid-year personnel reductions.

Material expenditures in 2011 are estimated at $67.9 million, which is lower than budget by $4.8 million and $12.2 million lower than 2010 actual expenses. The CTA will continue to improve its supply chain processes to ensure that only required quantities are being purchased and that the CTA is getting the best price possible.

Fuel expenditures are expected to be $58.2 million at the end of 2011. This is $3.7 million or 6.8% higher than budget. While consumption levels went down in 2011, costs went up due to higher fuel prices. In addition to decreasing consumption levels, the CTA continues to actively work to decrease the price it pays for fuel through its fuel hedging program. Fuel prices are projected to end the year at a net average price of $3.18 per gallon, which is $0.47 higher than the average price in 2010.

Electric power expenditures for the rail system are estimated to be $30.2 million in 2011, over budget by $166 thousand or 0.6%. This increase is explained by higher consumption levels in early 2011 due to severe weather and storms. The CTA began a new electric power contract in early 2010. This contract allowed the CTA to purchase wholesale power for its

base load electricity supply in advance. This approach has yielded a blended rate of approximately $0.071 per kilowatt hour in 2011. The CTA negotiated a new electric power contract beginning January 1, 2012. In 2012, the CTA expects this block purchase approach to yield a blended rate of $0.064 per kilowatt hour in 2012.

Expenditures for insurance, claims and litigation for injuries and damages that occur on CTA property or with CTA vehicles are estimated at $15.0 million for 2011, which is equal to budget.

Security is deployed strategically throughout the system to provide 24-hour coverage, seven days a week. These services are provided by the Chicago, Evanston, and Oak Park police departments and contracts with private security firms. Full year expenditures are estimated at nearly $36.0 million. This is $1.9 million, or 5.5% above budget. This increase in costs over budget is the result of an increase in security personnel stationed across the system. In addition to the services contracted by CTA, the Public Transportation Unit of Chicago Police Department (CPD) continues to provide services to CTA at an estimated cost of $22.0 million.

NET RESULTS

In 2011, the operating deficit is estimated to be $705.3 million. This is favorable to budget by $20.2 million. Net results for 2011 shows a zero balance with transfers from capital of $48.2 million (Exhibit 4-18). Having zero net results is preferable to having a positive balance and higher transfers from capital to

operations. It is the policy of the CTA that any available funding in excess of the operating deficit is transferred to its capital program at the end of the fiscal year. Estimated results show that the CTA will end 2011 with total revenues equal to expenses but with a $65.0 million reduction in transfers from capital to operations. In 2011, the CTA's recovery ratio is expected to be 55.2%, which is 0.6 points favorable to budget.

Statutory Compliance

The RTA Act requires that each Service Board meet the six criteria detailed in the Region Chapter for their budgets to be approved. The CTA budget, as submitted, substantially meets all criteria.

Organizational Structure

The CTA organization chart is shown in Exhibit 4-19 and consists of the following divisions.

CTA Board

The CTA's governing arm is the Chicago Transit Board which consists of seven board members. The Mayor of Chicago appoints four board members who are subject to the approval of the City Council and the Governor. The Governor appoints three board members who are subject to the approval of the State Senate and the Mayor of Chicago.

The Citizens Advisory Board, the CTA Board Members, the Chief of Staff to the Chairman, the Secretary of the CTA Board, the President of the CTA and the Office of Inspector General report directly to the Chairman of the Board. Functionally, the General Counsel of the CTA and the Chief Financial Officer both report to the Chairman of the Board.

Office of Inspector General

The Office of Inspector General reviews and analyzes the integrity of financial, operating, and computer system activities and any other organizational activity that management requires. This office is also responsible for financial and general investigations.

The Office of the Inspector General reports directly to the Chairman of the Board, and the Office of the President falls under its scope of potential investigative responsibilities.

President

The CTA President is the agency's chief executive and is charged with executing the policy decisions made by the CTA Board of Directors and providing direction to the CTA staff as they work to fulfill the mission and goals of the Service Board. The Chief of Staff of the President reports directly to the President, and the President reports directly to the Chairman of the Board.

Legislative Affairs

Legislative Affairs coordinates agency outreach and represents the CTA and its interests before local, state and national government.

Planning

The planning department is responsible for developing routes and schedules that best synchronize CTA capabilities with customer demand. Planning ensures that the highest level of service is attained.

Transit Operations

Transit Operations consists of Bus Operations, Rail Operations, and Bus and Rail Maintenance, the Control Center, and Scheduling & Service Planning. Bus and Rail Operations manage a fleet of 1,783 buses and 1,200 rail cars, respectively that cover an average of 185,000 bus miles and 188,000 rail miles every day. They employ approximately 3,700 full-time equivalent bus operators and 1,100 rail operators that provide service to the customers. Bus maintenance includes both the maintenance and regular cleaning of bus interiors and exteriors. Rail Maintenance is responsible for maintaining the safe mechanical functioning of the CTA's trains as well as regular cleaning, heavy maintenance repairs and rebuilds of train systems. The Control Center monitors passenger and facility security, maintains accident statistics, and monitors

environmental affairs. The Control Center operates 24 hours per day, 7 days a week.

Infrastructure

Infrastructure includes the operating units of Engineer, Power & Way and Facilities. Engineering is responsible for creation and maintenance of construction documents for CTA facilities, and reviewing and answering design requests. Power and Way inspects and maintains the rail track, including rail track circuits, switches, and vital signal relays. Power and Way is also responsible for power substations in the CTA system. The Facilities unit performs maintenance and construction of rail stations, terminals, rail yards and other CTA facilities.

Administration

Administration includes Human Resources & Employee Relations, Purchasing & Warehousing, Technology and DBE/EEO/ADA Compliance. The Human Resources department is responsible for recruiting, hiring, benefit services, medical services, and program compliance. The Purchasing/Warehousing department performs inventory management. Technology maintains and upgrades all CTA technology infrastructure including computer hardware, application software, and communications equipment. This office is also responsible for the maintenance of fare equipment for both Bus and Rail, and for all communication system infrastructures.

Finance

Finance is responsible for budgeting and capital planning, general accounting, investment support, cash management, program development, and the management and control of property, grants, investments and funding.

Finance functionally reports to the Chairman of the Board, and administratively reports to the President.

Law

Law handles appellate matters, corporate law, claims and tort litigation, and workers' compensation matters.

The law department functionally reports to the Chairman of the Board and administratively reports to the President.

Communications

Communications is responsible for marketing, media relations, identity development, and publications. Additionally, Communications is responsible for providing customer service such as travel information, Chicago Card account maintenance, maps, brochures, fare updates, refunds, and support for onsite public forums.

Security & Safety

Security & Safety administers the Destination Safety program with aims to reduce employee and third party accidents and injuries.

5 Metra Operating Plan

Overview

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare collection, service levels, capital improvements, finances, passenger services, safety, and systems planning. Service is operated by private carriers under contract to Metra and by Metra directly.

Metra is governed by an eleven member Board of Directors. Four of the directors are appointed by the suburban members of the Cook County Board. The chairman or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry, and Will counties each appoint one director, and the Mayor of the City of Chicago also appoints one director. The Chairman of Metra's board of directors must be one of the eleven directors, and is appointed by the concurrence of eight directors.

The network itself is made up of 1,434 pieces of rolling stock, 821 bridges, more than 2,000 signals, 24 rail yards and seven major maintenance facilities.

In 2012, Metra will continue its efforts to contain costs by cutting professional service contracts, reducing printing costs, changing the way signal crews are deployed, introducing a new warranty tracking system, and covering some expenses with new federal grants. In 2011, Metra was forced to transfer a total of $60.0 million in federal capital funds to the 2011 Operating Budget under preventive maintenance. In 2012, the Metra Board and staff agreed that the continued transfer of funds from capital to operations is not a sustainable practice, and that reliance on these transfers inhibits Metra's ability to maintain its fleet and infrastructure. After identifying a variety of expense cuts and new sources of revenue, Metra was still left with a $53.6 million gap between operating revenues and expenses for 2012. After careful deliberation with the Metra Board and its Citizen Advisory Board, executive staff made the decision to not decrease service but increase fares by an average of 25.1%.

Service Characteristics

The Metra rail system is comprised of eleven separate lines, which run north, west, and south of the Chicago central business district. The system extends 488 route-miles to the limits of the six-county area and serves 241 local rail stations in more than 100 communities. The network itself is made up of 1,434 pieces of rolling stock, 821 bridges, more than 2,000 signals, 24 rail yards, and seven major maintenance facilities. Metra's interface with extensive freight networks makes it one of the nation's most complex operations. A system of such magnitude requires continual maintenance and renewal in order to preserve operational performance, safety, and service efficiency.

Metra serves the region on routes owned by Metra or freight carriers and through purchase of service agreements with Union Pacific and Burlington Northern Santa Fe, two of the largest freight carriers in the nation. The South Shore Line, operated by the Northern Indiana Commuter Transportation District (NICTD), is another Metra partner, providing service between Chicago and South Bend, Indiana.

Metra provides safe, reliable commuter rail service with an average weekday ridership of over 300,000. Peak period ridership represents 75.0% of the total average weekday trips. Average scheduling speeds are 5.7% higher during weekday peak periods than during off-peak hours and weekend/holiday periods. Metra's hub is located in the downtown Chicago business district. Four downtown terminals serve Metra's eleven lines.

RIDERSHIP

Metra's primary customer base is suburban residents who work in downtown Chicago. According to Metra's

2006 Origin-Destination Survey, 77.0% of weekday morning riders board in the suburbs and alight in downtown Chicago, and more than 90.0% of all Metra trips are for business and work purposes.

In 2010, Metra's total ridership, excluding South Shore service, totaled 81.4 million passenger trips (Exhibit 5-1), representing a 1.1% decrease from 2009. Metra's total ridership is estimated to increase in 2011 to 81.7 million passenger trips. An increase of 1.6 million passenger trips is expected over the following three years, with an estimated total ridership of 83.2 million passenger trips in 2014. This represents a compound annual growth rate of 0.6% from 2010 to 2014 (Exhibit 5-2).

Over the years Metra has made concerted efforts to market off-peak and reverse commute trips. Compared to five years earlier, reverse peak travel has increased 17.6%, while midday and evening travel has decreased 1.4% and 5.1%, respectively (Exhibit 5-3). Reverse peak gains are attributable to Metra's efforts to broaden its ridership base, targeted promotion of service to suburban employers, marketing travel to cultural and entertainment attractions, and Metra's Bikes on Trains program. In 2012, Metra will continue to work with the RTA and Pace to identify potential areas for reverse commute focus. Elmhurst and Wheaton along the Union Pacific West Line are currently being evaluated as possible markets for service refinement as well as increased corporate outreach.

Metra is also working to improve the customer experience by collaborating with the RTA, CTA, and Pace to provide web-based, real-time arrival information by July 1st, 2012. Additionally, Metra is working with the RTA to improve coordinated interagency signage, service, and connection information at its downtown locations. Looking forward, Metra will be working with the RTA, CTA, and Pace to implement an "account-based" regional fare payment system to provide fare acceptance via personal credit, debit, and pre-paid cards on all fixed-route services in the region.

(3) Based on ticket sales. Excludes Senior free rides.

SERVICE QUALITY

Metra has identified improved service quality as one of its objectives to ensuring customer satisfaction. Metra periodically conducts on-board surveys to measure various service attributes. Beyond general rider satisfaction, Metra also collects information on the service attributes that are most effective at attracting and retaining riders. This data provides direction for planning, scheduling and marketing activities. For example, Metra's goal to provide safe, reliable, clean, and on-time service is derived directly from the most important service characteristics identified through customer surveys. In response to the changing needs of customers, Metra continuously looks for ways to expand and improve its service within financial constraints. In order to ensure customer satisfaction and efficiency, Metra has implemented a number of metrics to measure efficiency and customer satisfaction.

For instance, Metra measures service reliability using on-time performance. When measuring on-time performance Metra records a delay if the train arrives at its final destination six or more minutes later than scheduled. Metra's on-time performance in 2010 was 95.9% (Exhibit 5-4).

Matching the supply of service to demand is another means of maintaining system efficiency. Metra measures capacity utilization train-by-train, which allows it to track daily passenger loads by service period and line in order to analyze trends. Metra monitors and reports trains with occupancy rates exceeding 95.0%, and uses this information to make service change decisions.

One measurement of system-wide effectiveness relates the number of passengers to the number of car miles of service, thereby calculating passengers per revenue car mile. Metra's ratio of passengers per revenue car mile is projected to increase from 1.89 in 2010 to 1.94 in 2014 (Exhibit 5-5). This 0.05 increase represents a compound annual growth rate of 0.7%. In the case of a new service, the number of car miles initially increases faster than the number of passengers, thereby decreasing the passenger per mile ratio. An increase in passengers per revenue car mile indicates increasingly efficient transportation practices.

Exhibit 5-4: **On-Time Performance**

Year	% On-Time
2006	96.3
2007	95.7
2008	95.4
2009	95.7
2010	95.9

Exhibit 5-5: **Passengers per Revenue Car Mile** (in millions)

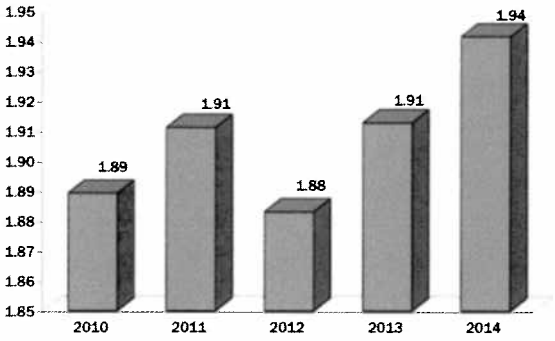

Exhibit 5-6: **Metra Cost Efficiency**

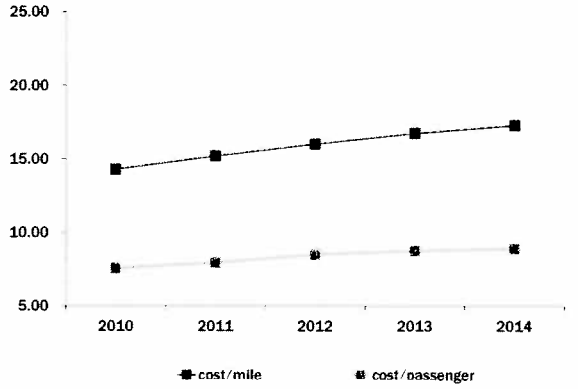

Cost per revenue car mile is another measurement used to evaluate whether costs are being contained and efficient. This measure recognizes that costs tend to vary with the amount of service provided. Metra expects that its cost per revenue car mile will increase from $14.29 in 2010 to $17.30 in 2014. This $3.01 increase represents a compound annual growth rate of 4.9% (Exhibit 5-6).

The cost per passenger ratio measures cost effectiveness and is designed to examine how well vehicles are deployed to serve riders. Metra projects that its cost per passenger will increase slightly each year

from 2010 to 2014. The cost per passenger ratio was $7.57 in 2010 and is projected to be $8.91 in 2014. This $1.34 increase represents a compound annual growth rate of 4.2% (Exhibit 5-6).

MAINTENANCE AND MODERNIZATION

Since its formation in 1983, Metra has overseen a comprehensive program to improve and grow the regional commuter rail network in support of the twin objectives of core system maintenance and strategic service expansion. For the past several years Metra's budget has discussed the need for new capital funding sources.

In 2010, Metra worked with available funding to maintain the high quality of service passengers have come to know and expect. Metra has initiated the replacement of 160 Highliner cars used on the Metra Electric District with funding available from the 2010 State of Illinois Bond program. The Metra Highliner purchase will cost $585.1 million, and the remainder of the state capital program will be used to address a backlog of rolling stock and infrastructure projects across the region.

American Recovery and Reinvestment Act funds (ARRA) allowed Metra to utilize $71.0 million toward remanufacturing its locomotives. The cost of remanufacturing a locomotive is $1.7 million compared to the $4.0 million cost of purchasing a new one. Metra's remanufacturing program represents a significant cost savings program that extends the life of the equipment an estimated 25 years. Without new sources of funding for capital, Metra riders will see reduced customer service and a decline in on time performance. Rail cars will be rehabbed less frequently and station renewal projects will be delayed. Metra is working with legislatures at the State and Federal level to ensure that funding is available for the modernization and maintenance of its fleet and other assets.

SAFETY AND SECURITY

In an effort to provide a safe and secure environment for both customers and employees, Metra provides employee incentives to those regularly meeting safety and security goals. Key among these goals is workplace safety. A safe workplace means a safe environment for Metra passengers.

In 2012, Metra will continue its safety outreach programs. This year will mark the sixth year of Metra's Poster Contest, where students from throughout the region compete to create the winning designs to be displayed on Metra's safety calendar which is distributed to over 2,000 schools. The winning design will also be displayed on Metra's monthly passes.

Budget and Financial Plan

The Metra budget and financial plan presented in Exhibit 5-7 meets the 2012, 2013, and 2014 funding marks and the 2012 recovery ratio mark of 53.0% set by the RTA Board. Metra was able to meet the funding level requirement set by the RTA by increasing fares, by an average of 25.1%. The RTA Board adopted Metra's 2012 budget and 2013-2014 financial plan on December 15, 2011.

REVENUES

Total revenues are composed of two major parts, operating revenues and public funding.

Total operating revenue was estimated at $296.4 million in 2011, equal to 2010 levels. Total operating revenue is expected to increase to $390.7 million in 2014. The increase of $94.3 million represents a compound annual growth rate of 7.1% from 2010 to 2014 (Exhibits 5-7 and 5-8).

Metra's operating revenue has three major components: passenger revenue, reduced fare subsidy, and other revenue. In 2012, passenger revenue of $297.6 million comprises 43% of the total revenue budget with other revenue and the reduced fare subsidy representing 7.6% and 0.5% respectively (Exhibit 5-9).

Metra's total public funding is expected to decrease by $54.6 million in 2012, largely due to Metra's decision to discontinue the unsustainable practice of transferring capital funds to operations. Total public funding is anticipated to increase by $7.9 million from 2010 to 2014, a compound annual growth rate of 0.6%. Public funding is composed of three main parts: RTA Sales Tax I, RTA Sales Tax II & PTF II, and funds made available to Metra by the Department of Homeland Security. In 2012, RTA Sales Tax I comprised 35.7% of total revenues. Combined Sales Tax II and PTF II were 13.1% of total revenues, and the $1.2 million grant from the Department of Homeland Security constituted 0.2% of total revenues.

Exhibit 5-7: **Metra 2012 Budget and 2013-2014 Financial Plan** (dollars in thousands)

	2010 Actual	2011 Estimate	2012 Budget	2013 Plan	2014 Plan
Operating Revenues					
Passenger Revenue	239,500	239,000	297,600	319,000	332,600

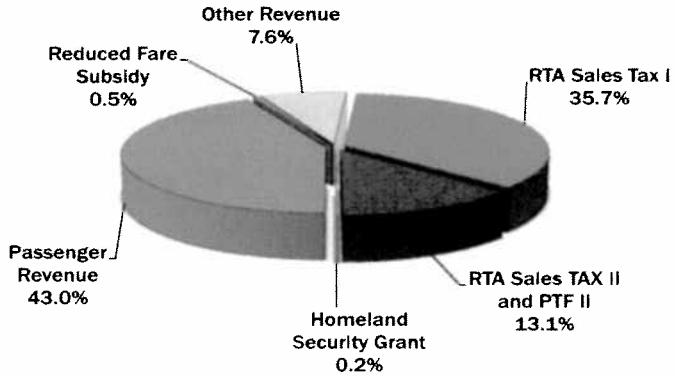
Total Revenues	$ 644,299	$ 689,728	$ 692,278	$ 723,136	$ 746,483
Expenses					
Transportation	158,000	162,900	170,500	177,000	182,000
Maintenance of Way	103,100	101,200	104,900	108,500	111,700
Maintenance of Equipment	105,759	109,200	113,500	117,300	120,000
Risk Mgmt., Insurance, Claims and Related	13,400	14,600	18,400	19,000	19,600
Administration and Regional Services	54,900	52,600	60,000	62,200	64,100
Downtown Stations	13,700	13,900	14,500	15,000	15,500
Diesel Fuel/Electricity	73,800	94,500	96,200	103,700	106,700
Pension/Health Insurance	72,300	78,302	83,500	89,200	94,600
Other	20,841	22,600	25,300	26,200	27,200
Total Expenses	$ 615,800	$ 649,802	$ 686,800	$ 718,100	$ 741,400
Net Results (1)	$ 28,499	$ 39,926	$ 5,478	$ 5,036	$ 5,083
Recovery Ratio %	52.3%	53.0%	54.7%	55.6%	55.9%

(1) Positive Net Results are either transferred to capital or added to cash reserves to help build a cash balance equal to six weeks of operational expenses, consistent with the Office of the Auditor General's Recommendation. In 2011, Metra anticipates transferring $10.0 million dollars to capital from operation. In 2012-2014, Metra anticipates transferring $5.0 million each year to capital form operations.

Exhibit 5-9: **2012 Metra Total Revenues** - $692.3 million



Passenger Revenue

Passenger revenue is estimated at $239.0 million in 2011, a decrease of $0.5 million from 2010. Passenger revenue is expected to increase to $332.6 million by 2014. This increase of $93.1 million represents a compound annual growth rate of 8.6% from 2010 to 2014.

The increase in projected passenger revenues is largely due to Metra's fare increase scheduled to take effect on February 1, 2012. A comparison of Metra's fare structure is presented at the end of this section (Exhibit 5-14). In preparation of its fare increase Metra developed a set of guiding principles:

- Consider regular fare adjustments that ensure a balanced budget, keep pace with inflation, and avoid significant, infrequent fare increases;
- No longer divert capital-eligible funds to the operating budget;

Exhibit 5-8: **Metra Operating Revenue** (dollars in millions)

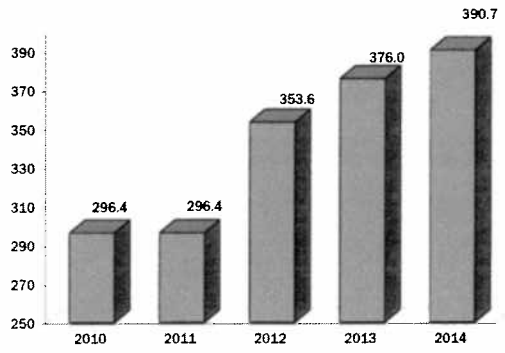


Exhibit 5-10: **Ticket Sales by Ticket Type*** (in thousands)

	July 2009-June 2010	July 2010-June 2011	Change	% Change

PlusBus	16.1	16.7	0.6	3.7

*Excludes South Shore (NICTD) service.

- Acknowledge the total cost and value of providing services;
- Maintain a fair pricing structure that maximizes revenues;
- Review fare media to improve fare collection and simplify overall collection activities and reconciliation;
- Minimize on-train and overall transaction costs;
- Recognize that convenience has a value;
- Equalize fare differentials by zone over time;
- Evaluate fare policies of sister agencies and peers.

Reduced Fare Subsidy

The Illinois General Assembly passed legislation in 1989 providing funds to reimburse the CTA, Metra, and Pace for the cost of providing reduced fares for the elderly, students, and persons with disabilities. The fare reimbursement is included in revenue and is contingent upon annual approval by the State. In 1999, the State Assembly passed new reduced fare legislation, which doubled the reimbursement level of

previous years. Metra anticipates that the State will continue to provide $3.4 million in reimbursement throughout the financial planning period.

Other Revenue

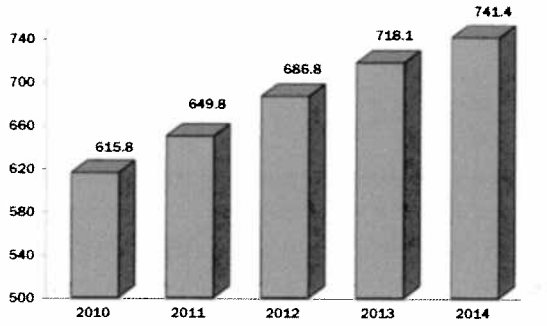
The other revenue category represents 7.6% of Metra's total revenue for 2012. The components of this category are investment income, joint facility and lease revenue, advertising income, capital credits, and miscellaneous non fare-generated income. Other revenue is expected to decrease $1.4 million from 2011 to $52.6 million in 2012. In 2014, other revenue is estimated at $54.7 million. The $1.2 million increase between 2010 and 2014 represents a compound annual growth rate of 0.6%.

Public Funding

Public funding available for Metra is determined by and based on the RTA's revenue projection for the year. From the RTA, Metra receives statutorily allocated RTA Sales Tax (RTA Sales Tax-I and II) and the Public Transportation Funds (PTF-II).

Metra funding from RTA Sales Tax-I is expected to increase from $230.5 million in 2010 to $260.9 million in 2014. RTA Sales Tax-II and PTF-II are expected to increase from $89.4 million in 2010 to $93.7 million in 2014. Although Metra used $28.0 million of federal funds for preventative maintenance in 2010 and estimates the use of an additional $60.0 million in 2011, Metra has budgeted to discontinue this unsustainable process in 2012 and in the 2013 and 2014 planning years. Additionally, Metra anticipates receiving $1.2 million in operating grants from the Department of Homeland Security each year between 2012 and 2014. A more detailed description of how public funds are allocated among the Service Boards can be found in the RTA chapter of this book.

Exhibit 5-11: **Metra Total Operating Expenses** ((dollars in millions)



OPERATING EXPENDITURES

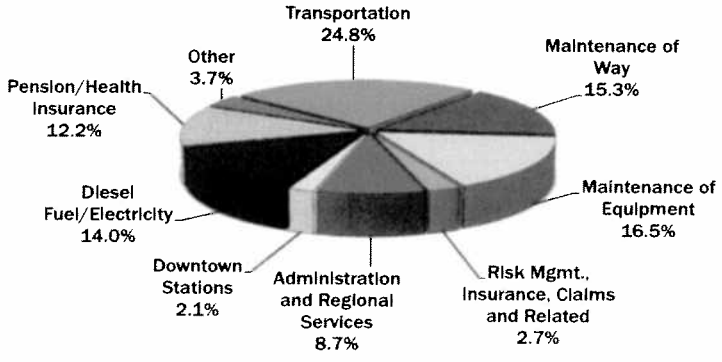
Total operating expenditures are estimated to increase $34.0 million from 2010 to $649.8 million in 2011. Total operating expenditures are expected to be $741.4 million in 2014. This $125.6 million increase represents an annual compound growth rate of 4.7% from 2010 to 2014 (Exhibit 5-11).

Metra's 2012 total operating expenditures of $686.8 million are projected to grow by $37.0 million or 5.7% from the 2011 estimate. In 2012 and 2013, total expenditures will increase by 4.6% and 3.2% respectively, producing total expenses of $741.4 million in 2014 (Exhibit 5-7).

Expenditure Elements

The components of operating expenditures include transportation, maintenance of way, maintenance of

Exhibit 5-12: **2012 Metra Expenses** - $686.8 million



equipment, risk management & claims, administration & regional services, downtown stations, diesel fuel and electricity, pension & health insurance, and all other, which includes security, credit cards and internet charges, Inspector General charges and the apprentice training program. Of total 2012 expenditures, transportation represents 24.8%; maintenance of way, 15.3%; maintenance of equipment, 16.5%; risk management insurance, claims and related are 2.7%; administration and regional services are 8.7%; downtown stations are 2.1%; fuel and electricity, 14%; pension/health insurance, 12.2%; and other is 3.7% (Exhibit 5-12).

Transportation

Transportation includes the functions and activities directly responsible for the operation of the commuter trains. The major functions include train and engine crew work, dispatching, tower operations, ticket sales, police and security services, employee safety, and supervisory support. The main objective of this area is to run service consistent with the published train schedules in a safe and efficient manner and in accordance with federal and state regulations. Transportation expenditures were estimated to increase $4.9 million from 2010 to $162.9 million in 2011. By 2014, transportation expenditures are expected to reach $182.0 million. This $24.0 million increase represents a compound annual growth rate of 3.6% from 2010 to 2014 (Exhibit 5-7).

Maintenance

Maintenance of way activities include the maintenance of track, structures, communications and facilities to preserve operational safety, reduce travel times and service interruptions, and increase passenger comfort. Maintenance work is concentrated on safety inspections and short-term projects to safeguard overall track and structure conditions. Maintenance of way expenditures are estimated to decrease $1.9 million from 2010 to $101.2 million in 2011. Expenditures are expected to reach $111.7 million in 2014. This $8.6 million increase represents a compound annual growth rate of 2.0% from 2010 to 2014 (Exhibit 5-7).

Maintenance of equipment activities include regular repairs, inspection and preventive maintenance of passenger train equipment to ensure that this equipment is safe and in good working order to meet train schedules and passenger demand for seating. Maintenance of equipment is estimated to increase $3.4 million from 2010 to $109.2 million in 2011. Expenditures in this category are expected to reach $120.0 million in 2014. This $14.2 million increase represents a compound annual growth rate of 3.2% from 2010 to 2014 (Exhibit 5-7).

Risk Management, Insurance, Claims & Related

Risk management, insurance, claims & related costs for 2012 of $18.4 million was budgeted to increase by 9.0% over the 2011 estimate of $14.6 million, with annual growth rates of 3.3% and 2.3% in 2013 and 2014, respectively (Exhibit 5-7).

Administration and Regional Services

Administration activities include general support functions for the organization to ensure overall corporate goals and regulations are met. Administrative activities include human resources, labor management committee, information systems, training, accounting and other support areas. Management of Metra owned and operated rail services are also included in this category.

Metra has adopted a variety of cost-containment measures for administration in 2012. The cost-cutting actions include leaving positions unfilled, reducing overtime, and trimming material cost whenever possible. Administration and regional services are estimated to

be $52.6 million in 2011, a decrease of $2.3 million from 2010. Administration and regional services are projected to increase by $7.4 million or 14.1% in 2012 to $60.0 million. Then, increases of 3.7% and 3.1% is anticipated for 2013 and 2014, respectively. Total administration and regional expenses are anticipated to reach $64.1 million in 2014 (Exhibit 5-7).

Downtown Stations

Expenditures related to Metra's downtown stations are expected to increase by 4.3% from 2011 to $14.5 million in 2012. In 2014, costs associated with operating Metra's Downtown Chicago stations are expected to reach $15.5 million. This $1.8 million increase represents an annual compound growth rate of 3.1% from 2010 to 2014.

Diesel Fuel and Electricity

Diesel fuel and electrical power are two of the most volatile components of Metra's operating expenditures. In December 2010, Metra budgeted its average fuel price for 2011 at $2.35. The estimated fuel price in 2011 is closer to $3.06, 29.9% higher than Metra's original budget. As a result of this higher fuel price Metra was forced to amend its budget. In 2012, diesel fuel is expected to average $3.12 per gallon for a total of $78.0 million, an increase of $1.6 million or 2.1% from the 2011 estimate. In an effort to reduce the volatility associated with rising fuel prices Metra was able to lock in a fuel rate with its vendor for 75% of their total gallons for the year at a cost of $3.06 per gallon. Using an estimated $3.22 per gallon for the remaining fuel, anticipated to be purchased at market price, Metra's budgeted fuel price for 2012 is $3.12. The 2014 budget based on $3.60 a gallon totals $90.1 million for the year, an increase of $33.4 million or 58.9% from 2010. The projected average price per gallon for diesel fuel in 2013 and 2014 are $3.40 and $3.60, respectively. In 2004 diesel fuel represented only 4% of total operating costs. In 2011, diesel fuel is estimated to represent 11.8% of total operating expenses, nearly triple the share of 2004.

For 2012, Metra has budgeted motive power and electric utility costs to increase by $0.1 million from 2011.

By 2014, combined fuel and electric power costs are projected to reach $106.7 million. This $32.9 million increase represents a compound annual growth rate of 9.7% from 2010 to 2014 (Exhibit 5-7).

Pension / Health Insurance

Pension and health insurance expenses combined are budgeted to increase 6.7% from 2011 to $83.5 million in 2012. In 2014, this combined category is budgeted at $94.6 million. Between 2010 and 2014 Metra anticipates a growth of $22.3 million, a compound annual growth rate of 7%. Metra's annual contribution to the RTA Pension Plan is determined by a third-party actuary. The pension expenditure is expected to increase 12.0% to $5.8 million in 2011. Pension expenditures will increase further to $6.5 million in 2012. In 2014, pension expenses are expected to reach $7.1 million. The $1.4 million increase between 2010 and 2014 represents an annual compound growth rate of 5.6%. Health insurance costs of $77.0 million for 2012 are budgeted to increase by 6.2% over the 2011 estimate of $72.5 million. Health insurance costs are expected to increase by 7.0% and 6.2% in 2013 and 2014, respectively (Exhibit 5-7).

All Other

This expenditure category includes expenses associated with security, credit cards and internet charges, Office of the Inspector General and the Apprentice Training Program. Expenditures in this category are expected to increase from $20.8 million in 2010 to $27.2 million by 2014. This $6.4 million increase

represents a compound annual growth rate of 6.9% (Exhibit 5-7).

Security has become a significant concern for Metra as it seeks to safeguard riders and employees alike. This expense category includes police and contract security services as well as planning, coordination, and training with other agencies. In 2012, security expenses represent 70.0% of the expenses in the other category. Expenses related to Metra's security expenses are anticipated to increase by 6.6% to $17.7 million in 2012 from the 2011 estimate. Between 2010 and 2014 Metra's security expense will increase from $16.3 million to $18.9 million, a compound annual growth rate of 3.8%, representing a sustainable commitment to provide a secure environment to the customers and employees of Metra. Part of Metra's security expense will be somewhat offset by grants received from the Department of Homeland Security between 2012 and 2014 (Exhibit 5-7).

On September 9, 2009, Metra inaugurated a new web site that included the acceptance of credit and debit cards for the purchase of 10-ride and monthly tickets. Credit card support costs related in 2012 represent about 20.9% of the other expense category. Metra expects that credit card and related expenses will grow from $2.3 million in 2010 to $5.6 million in 2014. This $3.3 million increase represents a compound annual growth rate of 24.9%.

In 2010, Metra created an Internal Office of Inspector General to investigate potential misuse of funds and hired the contractor of Hillard Heintze to assist them in this role. In 2010, Metra expended $0.7 million dollars in this function and in 2011 the State amended the State Officials and Employee Ethics Act, transferring the role of Inspector General at Metra to the Office of Executive Inspector General for the Agencies of the Illinois Governor (OEIG). This transfer occurred on July 1st, 2011. As a result, Metra expended $0.4 million for this function and does not anticipate spending any further funds on this initiative in the 2012 budget or 2013-2014 financial plan.

The apprentice training program represents 9.1% of the other category expenses in 2012. Expenses for this program are expected to increase from $1.5 million in 2010 to $2.7 million in 2014. This $1.2 million increase represents a compound growth rate of 15.1%. The apprenticeship training program represents a strategic investment in human capital planning to compensate for the upcoming wave of retirement that Metra is currently facing.

NET RESULTS

Net results are calculated by adding total operating revenues and public funding together and subtracting total expenses. Metra's 2012 budgeted net results are $5.5 million. The remaining funds, after a transfer of $5.0 million dollars to their capital program, are $0.5 million. In 2010 and 2011, Metra used remaining funds to either transfer funds to capital or add to cash, consistent with the Office of the Auditor General's recommendation. In 2012-2014, Metra anticipates transferring $5.0 million each year to capital from operations.

RECOVERY RATIO

Metra's recovery ratio equals total system-generated revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. In 2012, Metra's recovery ratio is 54.7%, 1.7% higher than what was required in the marks set by the RTA. The RTA chapter provides a detailed recovery ratio calculation (Exhibit 3-57).

Statutory Compliance

The RTA Act requires that each Service Board meet seven criteria, which are detailed in the RTA chapter, for Board approval of its budget. The Metra budget substantially meets each of these criteria.

2011 Budget versus 2011 Estimate

Due to unexpectedly high fuel prices throughout 2011, Metra amended its budget in November of 2011. The following information examines Metra's 2011 estimate against their 2011 Amended Budget. In 2011, Metra budgeted for a 55.0% Recovery Ratio. Due to shortfalls in revenues and unanticipated expenses

during the financial year Metra estimated that its recovery ratio would be 53.0%, 2.0 points below budget (Exhibit 5-13).

OPERATING REVENUE

Calendar year 2011 operating revenues are estimated at $296.4 million and are projected to be $0.9 million or 0.3% lower than budget. Passenger revenues are estimated to be $0.1 million higher than budget. Metra estimated that the reduced fare subsidy would end up even to budget by the end of the calendar year. Other revenues are estimated to be $1.0 million or 1.8% unfavorable to budget.

PUBLIC FUNDING

Metra's public funding figures were not impacted by the amended budget. The RTA marks set at the beginning of the fiscal year allocated a total of $318.1 million to Metra. Additionally, Metra used $60.0 million in federal transfers from capital to bridge its budget deficit. Sales tax revenues were higher than what was originally projected in the budget and Metra estimates a favorable variance in Sales Tax I, Sales Tax II and PTF II. Consistent with the RTA's estimates Metra has anticipated that Sales Tax I will come in $10.9 million or 4.5% higher than budget. Sales Tax II and PTF II are projected to come in $4.3 million or 4.6% higher than budget. In October of 2010, the RTA passed an

Exhibit 5-13: **Metra 2011 Budget vs. 2011 Estimate** (dollars in thousands)

	2011 Original Budget	2011 Amended Budget	2011 Estimate	Variance

Expenses				
Transportation	160,600	159,700	162,900	(3,200)
Maintenance of Way	103,800	103,400	101,200	2,200
Maintenance of Equipment	106,800	107,751	109,200	(1,449)
Risk Mgmt., Insurance, Claims and Related	15,000	14,900	14,600	300
Administration and Regional Services	51,500	49,800	52,600	(2,800)
Downtown Stations	14,000	14,000	13,900	100
Diesel Fuel/Electricity	76,400	93,900	94,500	(600)
Pension/Health Insurance	81,202	81,202	78,302	2,900
Other	24,900	23,800	22,600	1,200
Total Expenses	$ 634,202	$ 648,453	$ 649,802	(1,349)
Net Results (1)	**$ 41,244**	**$ 26,993**	**$ 39,926**	**$ 12,933**
Recovery Ratio % (2)	**55.0%**	**55.0%**	**53.0%**	**-2.0%**

(1) Positive results in Net Results are either transferred to capital or added to cash reserves to help build a cash balance equivalent to six weeks of operating expenses, consistent with the Office of the Auditor General's recommendation. In 2011, Metra anticipates transferring $10.0 million to capital from operations.(2) The RTA Act requires the RTA Board to set a recovery ratio for each service board. Metra's 2011 estimate is 2.0 percentage points less than budget but due to higher than anticipated public funding results Metra's Revenues- Expenses are significantly higher than the amended budget and just 3.3 percent lower than the original budget. Metra's Recovery Ratio was not amended to reflect the amended budget.

ordinance that allowed Metra to transfer $60.0 million of Federal Capital Funds to Preventive Maintenance for Operations. Due to this transfer, end of the year available Service Board funds are estimated to be $39.9 million, $12.9 million more than budgeted but $1.3 million less than the original budget. End of the year available funds will either be transferred back to capital or used to help Metra build a cash balance equivalent to six weeks of operating expenses.

EXPENDITURES

Total 2011 operating expenditures are estimated at $649.8 million and are projected to be $1.3 million greater than budget, resulting in an unfavorable variance of 0.2%.

Savings achieved in the maintenance of way, risk management, insurance, claims & related, downtown stations, pension/health insurance, and other, did not offset increased expenses in transportation, maintenance of equipment, administration & regional services, and diesel fuel.

Transportation expenses were unfavorable to budget by $3.2 million or 2%. Maintenance of way expenses were favorable to budget by $2.2 million or 2.1%, but maintenance of equipment expenses were unfavorable to budget by $1.4 million or 1.3%. Risk management, insurance and claims were favorable to budget by $0.3 million or 2% but administration & regional services were unfavorable to budget by $2.8 million or 5.6%. Expenses related to downtown stations were favorable to budget by $0.1 million or 0.7%. Diesel fuel/electricity expenses were estimated to be $0.6 million higher than budgeted, an unfavorable variance of 0.6%. Pension/health insurance costs were lower than anticipated and are estimated to be 3.6% favorable to budget, a difference of $2.9 million. Other Expenses are anticipated to be $1.2 million or 5% favorable to budget.

Fare Structure

Commuter rail fares are based upon travel between designated fare zones. These zones are set at five-mile intervals beginning at each rail line's downtown Chicago station. The zone system does not apply to the South Shore fares set by the Northern Indiana Commuter Transportation District (NICTD).
A uniform base fare is charged for travel within a zone and increments are added to this base fare as fare zone boundaries are crossed.

On February 1, 2012, Metra will increase one-way fares by $0.50 on zones A and B and by $0.75 on Zones C-M (Exhibit 5-14). Under the prior fare structure, ten-ride tickets were equal to a little over eight one-way tickets and monthly passes were equal to less than 26 one-way tickets. Under the fare structure effective February 1, 2012, ten-ride tickets are equal to about nine one-way tickets and monthly passes are equal to about 28.5 one-way tickets. The cost of a weekend pass remained at $7.00, and passengers who pay for their ticket on the train when a Metra agent is available at their boarding station will continue to pay a $3.00 surcharge. Metra has also made some changes to its ticket policies which are provided below.

- The length of time a one-way ticket will be considered valid has changed from one year to 14 days;
- Refunds will no longer be given for one-way tickets;
- The ten-ride ticket discount was reduced from 20% to 10% and therefore refunds on this ticket will be given with up to nine rides used and will be refundable for up to 3 months from the date of purchase;
- The monthly ticket will only be valid through the end of the month;
- Refunds on ten-ride and monthly fare media will include handling fees, including $5.00 for ten-ride tickets and $10.00 for monthly tickets;
- Young adult fares (12-17 years old) on weekends and holidays will be eliminated;
- All ticket prices will be rounded to the nearest quarter.

Organizational Structure

Metra's administrative organization chart is presented in Exhibit 5-15.

Exhibit 5-14: **New Fare Structure**

Full Fare Schedule

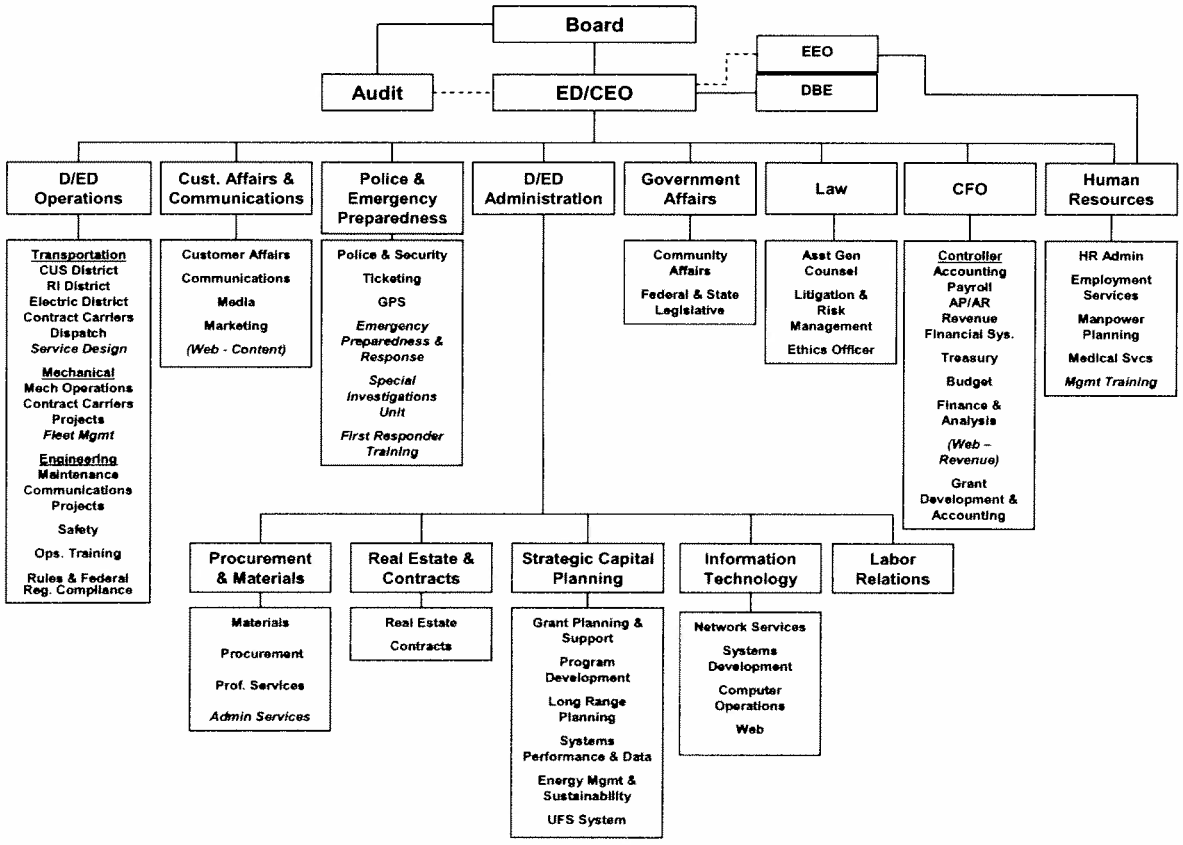
Effective February 1, 2010					Effective February 1, 2012				
Zone (1)	One-Way (3)	Ten-Ride	Monthly	Weekend (2)	Zone (1)	One-Way (3)	Ten-Ride	Monthly	Weekend (2)
A	$2.25	$18.30	$58.05	$7.00	A	$2.75	$24.75	$78.25	$7.00
B	$2.50	$20.00	$63.45	$7.00	B	$3.00	$27.00	$85.50	$7.00
C	$3.50	$28.50	$90.45	$7.00	C	$4.25	$38.25	$121.00	$7.00
D	$4.00	$32.30	$102.60	$7.00	D	$4.75	$42.75	$135.25	$7.00
E	$4.50	$36.55	$116.10	$7.00	E	$5.25	$47.25	$149.50	$7.00
F	$5.00	$40.40	$128.25	$7.00	F	$5.75	$51.75	$163.75	$7.00
G	$5.50	$43.80	$139.05	$7.00	G	$6.25	$56.25	$178.00	$7.00
H	$6.00	$48.05	$152.55	$7.00	H	$6.75	$60.75	$192.25	$7.00
I	$6.50	$51.85	$164.70	$7.00	I	$7.25	$65.25	$206.50	$7.00
J	$7.00	$56.10	$178.20	$7.00	L	$7.75	$69.75	$220.75	$7.00
K	$7.50	$56.95	$190.35	$7.00	K	$8.25	$74.25	$235.00	$7.00
M	$8.50	$68.45	$217.35	$7.00	M	$9.25	$83.25	$263.50	$7.00

(1) Fares based on traveling to/from Zone A (downtown stations).

(2) The weekend pass was raised from $5.00 to $7.00 in 2010

(3) The on-board surcharge increased from $2.00 to $3.00 in 2010

Exhibit 5-15: **Metra's Organizational Chart**



6 Pace Suburban Service Operating Plan

Overview

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority (RTA), and began service in 1984. A 13-member Board of Directors made up of current and former village presidents and mayors governs Pace.

Beginning July 1, 2006, Pace assumed operating responsibility for all ADA paratransit service in the RTA region. Pace's regional ADA paratransit service is discussed in a separate chapter.

Service Characteristics

Pace's mission is to provide efficient well-integrated transportation services that meet the travel needs of the suburban Chicago area. Effective suburban mobility comprises line-haul and community-based services that provide access between both nearby and distant origins and destinations. To attract riders in an automobile-oriented market requires coordination of infrastructure, service, information, and travel demand. To achieve this mission, Pace must introduce transit options suitable for the 21st century suburban environment.

Pace service includes approximately 139 regular routes, 38 feeder routes, 16 shuttle routes, 711 vanpool vehicles, and 372 paratransit vehicles.

Pace covers 3,688 square miles and is one of the largest bus services in North America. The suburban area is divided among six counties and serves 284 communities that span walkable suburban neighborhoods, satellite cities, and rural communities. Pace service includes approximately 139 regular routes, 38 feeder routes, 16 shuttle routes, 711 vanpool vehicles, and 372 paratransit vehicles.

In April 2002, Pace unveiled a long range comprehensive operating plan called Vision 2020 that outlines the goals and overall direction for Pace in the 21st century. The plan included "core routes," including Arterial Rapid Transit (ART) and express buses that will provide faster and more reliable service between suburban employment and residential areas, as well as high quality connections serving the suburb to city market and strengthened city to suburb job-related transportation. ART will provide premium quality, fast, frequent, and reliable service operating in mixed traffic on arterial streets with short sections of bus-only and queue by-pass lanes for congested road sections. The ART network will feature limited stops, enhanced passenger amenities, new fare payment technology, new passenger information technology, distinctive vehicles, and transit signal priority (TSP) to improve schedule adherence. The ART Feasibility Study selected six of the 24 arterial corridors identified in Vision 2020 for implementation in the next ten years: 95th Street, Dempster Street, Halsted Street, Harlem Avenue, Milwaukee Avenue, and Oak Brook/Cermak. In 2011, Pace began the implementation of its ART Network on Milwaukee Avenue and Dempster Street.

ART will be supported by connectors and collectors serving compact older suburban communities and newer suburban communities that comprise low density residential areas and corporate campuses. To support Pace's arterial route network as well as the local mobility of its customers, Pace is developing and implementing in selected markets community-based transit services to provide the first and last mile of a passenger trip. Pace provides a full array of community transit services: call-n-rides, flexible routes, circulators, vanpools, rideshare, municipal dial-a-rides, and shuttles. Pace will explore partnerships with existing local providers to achieve peak-hour coverage and to provide cross-boundary service in low-density areas.

Pace will enhance its partnerships with the Illinois Tollway, Metra, CTA, and the RTA. Pace is studying corridor development, land use patterns, market conditions, ways to provide congestion relief and improve regional mobility, sustainable employment access, economic development, and expanded transit options along the I-55, I-355, and I-90 corridors. Pace has already worked with the Tollway to develop express bus service on I-294 and expects to continue working with the Tollway as part of its managed lane program. Pace is partnering with the Southwest Conference of Mayors to study the south Harlem Corridor and plans a similar study of Cicero Avenue in 2012.

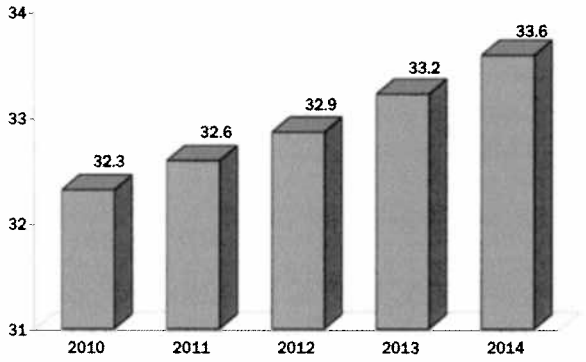
Pace will consider expanding service between remote park-and-ride facilities with improved amenities and train stations via express service on wider streets rather than meandering routes through suburban neighborhoods. Partnership with the RTA includes both collaboration on the IDOT I-55 corridor bus-on-shoulder demonstration project and applying the results of the RTA market analysis and systems analysis work.

Pace has developed a collaborative cross-functional methodology that identifies demand in existing corridors by time of day and direction to evaluate service changes in the form of pruning underperforming route segments or time periods rather than eliminating entire routes. This pruning process helps align legacy routes with travel demand, provides a more realistic level of service while minimizing the impact on Pace passengers, and serves as an initial step prior to more extensive route restructuring efforts. Pace began route-restructuring initiatives in 2000 to better match service levels with demand and to improve on-time performance. To date these initiatives include Elgin, Aurora, Joliet, the North Shore, South and Southwest Cook County, and Will County. Pace is now working on initiatives in West Cook County and Lake County.

Pace's implementation of the RideShare Program in 2011 through 2013 will continue via the website www.PaceRideShare.com which matches users who can share their commute by carpooling and also tracks the region's carpools. The website also facilitates the formation of new Pace vanpools and supports the retention of existing vanpools.

Pace's market research and analysis efforts will focus on supporting the planning and implementation of ART and express bus services. Through user and non-user surveys and analysis of market data, Pace will identify service planning opportunities that meet the needs of both commuters seeking faster and more reliable service and riders seeking local, community-based, or special-needs service. Pace will complete a Customer Satisfaction Survey (CSS) of fixed route, vanpool, rideshare, and paratransit service in 2012 and 2013. The objective is to evaluate service performance from the rider perspective so that transportation needs can be better met, loyalty strengthened, and ridership increased. To assist in understanding demographics and travel patterns, Pace will conduct a market analysis of the Harlem corridor between Glenview and Tinley Park, studies in the West Cook and North Cook regions, and, in partnership with Lake County, an analysis of transit markets and services in that county.

Exhibit 6-1: **Pace Suburban Service Ridership** (in millions)



RIDERSHIP

Effective February 7, 2010, Pace eliminated 15 bus routes and reduced service on 18 others. Pace Suburban Service ridership was 32.3 million in 2010 and is expected to finish 2011 at 32.6 million. Pace estimates that 2012 Suburban Service ridership will increase by only 0.9% to 32.9 million due to continued high unemployment levels, the prolonged economic recession, and previous service reductions. Pace projects that Suburban Service ridership will increase approximately 1.1% annually to 33.2 million in 2013 and 33.6 million in 2014, reflecting the continued expansion of the vanpool program (Exhibit 6-1).

Marketing Strategies

Pace's 2012 marketing strategy implementation will emphasize non-rider research, with the goal of better understanding why potential customers choose not to ride Pace. A renewed focus on reducing the barriers to riding may encourage non-riders to at least try Pace service. Other areas of marketing emphasis will include promotion of the newly operating bus-on-shoulder routes 755 and 855, new route 895 from the south suburbs to Schaumburg, and newly established

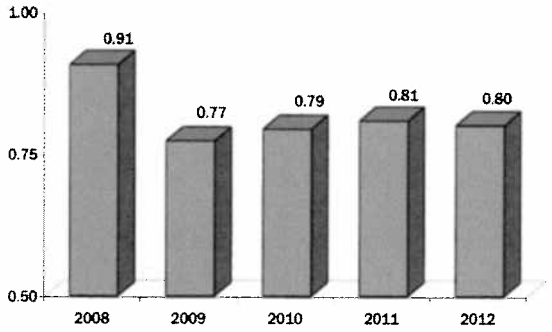
call-n-ride projects in Kane and DuPage counties. Previous marketing outreach efforts to disabled and student groups will also continue in 2012. The use of onboard audio advertisements, which were implemented on a trial basis in 2011, will be expanded system-wide in 2012 in order to boost advertising revenue.

Service Quality

As part of its effort to improve service quality, Pace has formulated a variety of performance measures. For each performance measure, Pace has provided a performance standard, the 2010 result, an estimate for 2011, and a projection for 2012. The performance measures are grouped by quality service area: Safety, Reliability, Courtesy, Efficiency, and Effectiveness. When performance for a year exceeds the performance standard, the measurement is highlighted in green. If performance for the year falls below but within 10% of the standard, the measurement is highlighted in yellow. When performance falls more than 10% below the standard, the measurement is highlighted in red. The performance measures for 2012 can be found at the end of this section (Exhibit 6-13).

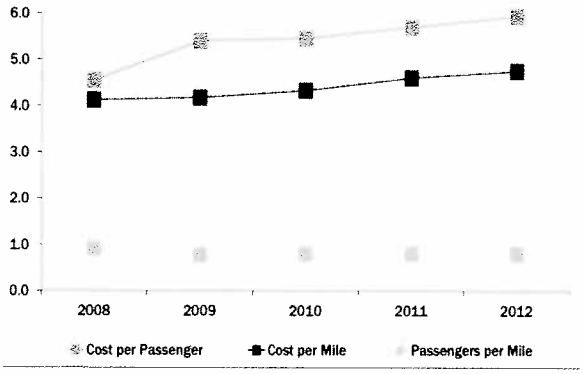
Pace compares its performance to that of peer transit agencies selected by the RTA based on similar service characteristics: operating in suburban areas, providing comparable amounts of service, and contracting with private providers for some of the service. Peer transit agencies include Long Island Bus (MTA-NY), Orange County Transportation Authority (OCTA-CA), San Mateo County Transit District (SamTrans-CA), and Alameda-Contra Costa Transit District (AC Transit-CA). Performance measures include operating expense per vehicle revenue hour (service efficiency), operating expense per passenger trip and per passenger mile (service effectiveness), and passenger trips per vehicle revenue hour and per vehicle revenue mile (service coverage), as reported by Pace and peer agencies to the Federal Transit Administration and compiled in the National Transit Database (NTD). Pace outperformed all of its peers in both operating expense per vehicle revenue hour and operating expense per passenger mile. Pace ranked fourth among its peers in operating expense per passenger trip. Pace ranked fifth in both measures of service coverage primarily because Pace has a very large service area with lower population density than that of its peers.

Exhibit 6-2: **Pace Suburban Service Passengers per Mile** (in millions) (1)



(1) Effective January 1, 2009, Pace no longer accepts the CTA 7-Day pass, U-Pass and Visitor/Fun passes.

Exhibit 6-3: **Pace Suburban Service Cost Efficiency** (1)



(1) Effective January 1, 2009, Pace no longer accepts the CTA 7-Day pass, U-Pass and Visitor/Fun passes.

Performance measurements and peer comparisons represent important steps toward improving service quality and increasing accountability to the public. By striving to meet or exceed performance goals and peer performance, Pace has shown that it is working toward improved service quality and higher customer satisfaction.

Cost Efficiency

Matching the service supply to demand is one means of achieving system effectiveness. One way to measure supply versus demand is to relate the number of passengers to the number of miles served. Pace's passengers per mile ratio for Suburban Service is pro-

jected to increase from 0.79 in 2010 to 0.81 in 2011 and then decrease to 0.80 in 2012 (Exhibit 6-2). This stagnant trend is due to a period of only slight ridership growth and relatively stable service levels.

The operating cost per vehicle revenue mile measurement recognizes that expenditures tend to vary with the amount of service provided (Exhibit 6-3). Suburban Service cost per mile is expected to increase from $4.33 in 2010 to $4.75 in 2012. This $0.42 increase corresponds to a compound annual growth rate of 4.7%, and is being driven by steady increases in labor, health care, and fuel expenses while vehicle revenue miles are projected to increase by only 0.9% over the same period.

CAPITAL INVESTMENT

The capital program funds the purchase and maintenance of rolling stock, support facilities and equipment (including new technologies), and project management. Nearly the entire 2012 Suburban Service capital program of $89.3 million comprises projects needed for Pace to reach a "State of Good Repair."

Rolling Stock

In 2012, Pace intends to purchase 137 fixed route buses which will replace buses which have reached or exceeded their useful life, which is generally accepted to be 12 years. In total, these rolling stock replacements are expected to cost $64.2 million. Pace will also spend $1.5 million on bus overhaul maintenance, $1.6 million on associated capital (engines, transmissions, and other bus components assemblies), and $3.1 million on diesel engine retrofits, bringing the total 2012 rolling stock-related capital program to $70.4 million.

Support Facilities & Equipment

Pace plans to spend $6.0 million on improvements to garages and facilities. Pace also intends to spend $3.8 million on computer hardware, software, and systems, including Ride Check Plus. This software computes ridership by individual route and tracks other performance indicators. Also in this category, Pace will spend $0.8 million on the purchase of maintenance equipment, non-revenue vehicles, and five ticket vending machines for use at UPS. Finally, $0.2 million has been allocated to purchase miscellaneous office equipment for the garages and headquarters, bringing the total 2012 support facilities capital program to $10.8 million.

Miscellaneous/Project Administration

Rounding out the Suburban Service 2012 capital program, Pace expects to receive funding of $0.8 million for the purchase of passenger shelters, $1.1 million for project administration, and a $0.2 million provision for unanticipated capital needs.

Budget and Financial Plan

The Pace Suburban Service budget and financial plan presented in Exhibit 6-4 meets the funding marks set by the RTA Board on September 14, 2011. Pace's 2012 budget reflects a recovery ratio of 30.0% for Suburban Service operations, meeting the mark adopted by the RTA Board on September 14, 2011.

OPERATING REVENUE

In 2010, Pace's system-generated revenue from Suburban Service operations totaled $51.6 million. Pace projects Suburban Service operating revenue of $52.6 million in 2011, $54.5 million in 2012, $55.3 million in 2013, and $56.1 million in 2014 corresponding to a compound annual growth rate of 2.1% from 2010 through 2014 (Exhibit 6-5). Pace projects

Exhibit 6-4: **Pace Suburban Service 2012 Budget and 2013-2014 Financial Plan** (dollars in thousands)

	2010 Actual	2011 Estimate	2012 Budget	2013 Plan	2014 Plan

Recovery Ratio % (4)	**36.0%**	**36.0%**	**30.0%**	**30.0%**	**30.0%**

(1) Passenger revenue includes fixed route, vanpool, Dial-A-Ride, Ride DuPage, Ride in Kane, and other services.

(2) Excludes Advantage Program in-kind revenue and expense (of equal amount) that are included in Pace's recovery ratio calculation.

(3) The negative net result in 2014 will be handled with budget balancing actions that may include service adjustments, a fare increase, cost efficiencies, or additional revenue.

(4) The recovery ratio includes Advantage program in-kind revenue and expense credits (of equal amount), as well as statutory and approved adjustments. The recovery ratio in 2012 meets the 30% mark set for Pace by the RTA Board on September 15, 2011.

that operating revenue will account for only 28.0% of total Suburban Service revenue in 2012 (Exhibit 6-6).

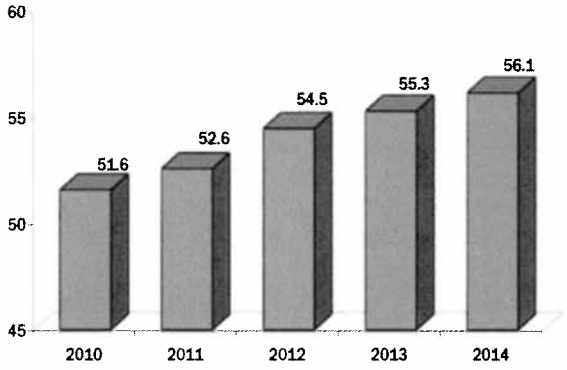
Passenger Revenue and Local Share

In 2010, Pace Suburban Service passenger revenue totaled $32.3 million. Pace expects that 2011 Suburban Service passenger revenue will total $32.8 million. Pace projects that Suburban Service passenger revenue of $33.4 million in 2012 will grow to $34.2 million in 2014, corresponding to a compound annual growth rate of 1.2% (Exhibit 6-7). Passenger revenue includes fixed route farebox deposits (using cash, passes, and cards) and payments for vanpool, Dial-a-Ride, and other services.

In 2010, Pace's local share contributions and other revenue totaled $16.9 million. Pace expects local share contributions and other revenue of $17.2 million in 2011. Suburban Service local share contributions and other revenue are projected to grow from $18.5 million in 2012 to $19.4 million in 2014, a $0.9 million increase that corresponds to a 2.4% compound annual growth rate.

Pace's Suburban Service fare structure (effective January 2009) is presented at the end of this section (Exhibit 6-11). No fare increases are scheduled for 2012. Effective January 2009, Pace raised the base fare from $1.50 to $1.75, monthly pass from $75.00 to $86.00, and vanpool fares by 10%. At that time, Pace also raised the price of its other full-fare and reduced fare single-ride tickets, ten-ride tickets, and passes.

Exhibit 6-5: **Pace Suburban Service System-Generated Revenue**
(dollars in millions)



State Free Rides & Reduced Fare Reimbursement

Reimbursement from the State for free and reduced fare rides is expected to increase from $2.4 million in 2010 to $2.6 million in 2011. The reduced fare reimbursement is expected to remain at $2.6 million from 2012 through 2014.

Advertising

Advertising revenue is expected to increase from $3.9 million in 2010 to $4.3 million in 2011. Pace projects that advertising revenue of $4.4 million in 2012 will remain at that same level in 2013 and 2014.

Investment

2010 investment income of $0.1 million is expected to remain nearly constant for 2011 and 2012, and

Exhibit 6-6: **2012 Pace Suburban Service Revenue - $195.0 million**

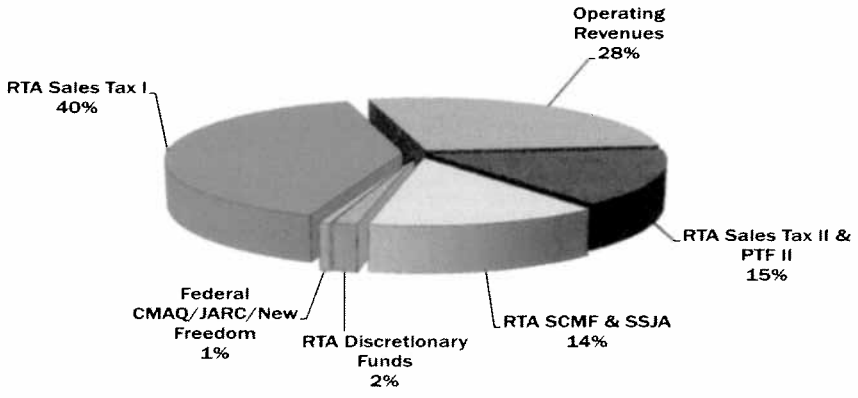


Exhibit 6-7: **Pace Suburban Service Passenger Revenue**
(dollars in millions)

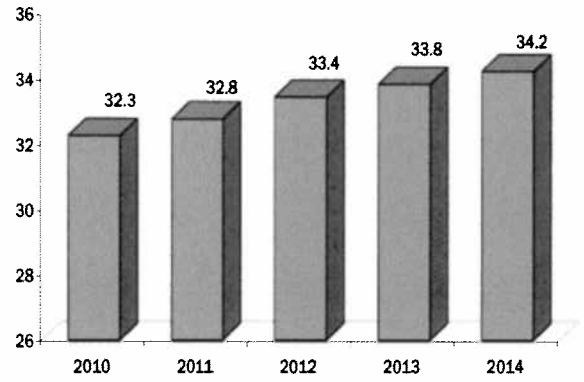

Exhibit 6-8: **Pace Suburban Service Operating Expenditures**
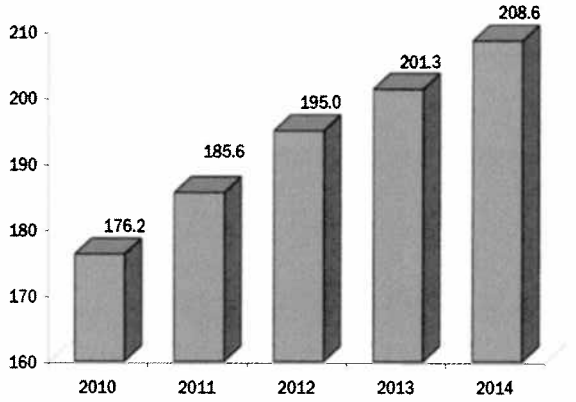
(dollars in millions)



then increase to $0.2 million in 2013 and $0.3 million in 2014.

PUBLIC FUNDING

Public funding for Pace operations includes portions of the RTA Sales Tax (RTA Sales Tax I and II) and the Public Transportation Fund (PTF I and PTF II), as well as federal sources.

Pace's portion of RTA Sales Tax I is expected to increase 4.2% from $73.1 million in 2010 to $76.1 million in 2011. This funding is projected to increase from $78.2 million in 2012 to $82.7 million in 2014 at a compound annual growth rate of 2.8% (Exhibit 6-4). RTA Sales Tax II & PTF II (PA95-0708) is projected to increase from $29.8 million in 2010 to $31.0 million in 2011. After decreasing to $30.2 million in 2012, this funding is projected to increase to $31.2 million in 2014 at a compound annual growth rate of 1.7%. RTA Suburban Community Mobility Funds of approximately $20.0 million to $21.0 million are projected for 2012 through 2014. The RTA also provides South Suburban Job Access Funds in the amount of $7.5 million annually.

The RTA did not provide discretionary funding to Pace in 2010 and 2011. The RTA will provide Pace with discretionary funds at an estimated amount of $3.0 million in 2012, $3.1 million in 2013, and $3.2 million in 2014. A more detailed description of how public funds are allocated among the Service Boards can be found in the Region section of this book.

In addition to funds from the RTA, Pace also receives federal funds. Pace received combined Congestion Mitigation Air Quality (CMAQ), Job Access Reverse Commute (JARC), and New Freedom funds of $2.7 million in 2010 and expects to receive $2.2 million, $1.3 million, $1.2 million, and $1.3 million in 2011 through 2014, respectively. Pace used $2.0 million in Federal 5307 funds for operations in 2010 and expects to use $2.0 million of these same type of funds in 2011. No such funds are projected to be used in 2012, and then Federal 5307 funds are again projected for operations in the amount of $2.2 million and $3.4 million in 2013 and 2014, respectively.

OPERATING EXPENDITURES

Operating expenditure elements include labor/fringe benefits, health insurance, parts/supplies, purchased transportation, fuel, utilities, insurance/claims, and other (Exhibit 6-9). The 'other' category includes the regional ADA support credit as an offset. Growth of labor/fringe benefits, health care, and purchased transportation is the primary factor behind the increase in Suburban Service operating expenditures.

Labor/Fringe Benefits and Health Insurance Costs

Labor/fringe and health insurance expenditures are projected to account for 58.7% of total Suburban Service operating expenditures in 2012. Combined labor/fringe benefits and health insurance expenditures for suburban service are projected to grow from $114.6 million in 2012 to $123.9 million in 2014, a $9.3 mil-

lion increase that corresponds to a 4.0% compound annual growth rate.

Parts/Supplies

Parts/supplies expenditures are projected to account for 3.2% of total suburban service operating expenditures in 2012. These expenditures are projected to grow from $6.3 million in 2012 to $7.0 million in 2014, a $0.7 million increase that corresponds to a 4.8% compound annual growth rate.

Purchased Transportation

Expenditures for purchased transportation are projected to account for 15% of total Suburban Service operating expenditures in 2012. These expenditures are projected to grow from $29.2 million in 2012 to $31.5 million in 2014, a $2.3 million increase that corresponds to a 3.8% compound annual growth rate.

Fuel

In 2011, fuel expenditures are estimated to rise substantially to $21.1 million from $15.1 million in 2010, due to rising fuel prices. In 2012, fuel expenditures are projected to account for 11.5% of total Suburban Service expenditures. Fuel expenditures are budgeted at $22.5 million in 2012 and are expected to remain flat through 2014. The 2012 budget assumes an increase in average fuel price per gallon of 6.7%. The price per gallon is then expected to remain constant through 2014 due to contract pricing.

Utilities

Utilities expenditures are projected to account for 1.0% of total Suburban Service operating expenditures in 2012. These expenditures are projected to remain between $1.9 million and $2.1 million through 2014.

Insurance/Claims

Insurance/claims expenditures are projected to account for 4.5% of total Suburban Service operating expenditures in 2012. These expenditures are projected to grow from $8.8 million in 2012 to $9.7 million in 2014, an increase of $0.9 million that corresponds to a 5% compound annual growth rate this is consistent with national trends.

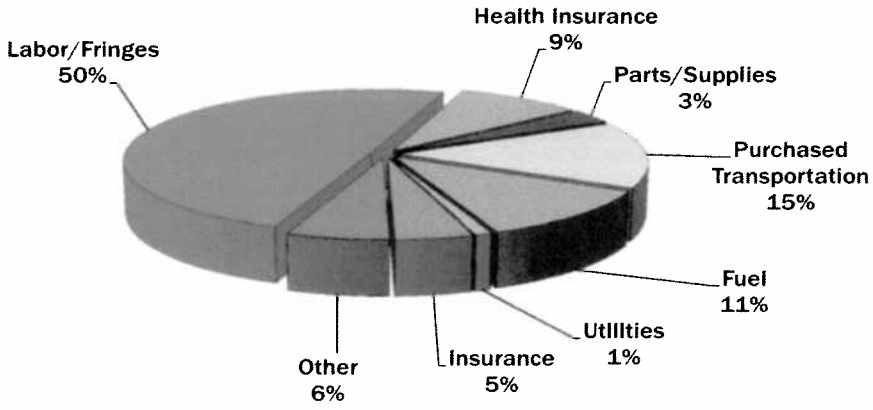
Other

Other expenditures are projected to account for 6% of total Suburban Service operating expenditures in 2012. These expenditures are projected to grow from $11.7 million in 2012 to $12.0 million in 2014, a $0.3 million increase corresponding to a 1.3% compound annual growth rate. The regional ADA support credit discussed below is included in the other expense category shown in Exhibit 6-4.

Regional ADA Support Credit

In 2010, Pace charged $2.9 million of administrative and overhead expenses to the regional ADA paratran-

Exhibit 6-9: **2012 Pace Suburban Service Expenses - $195.0 million**



sit budget and expects to charge $3.9 million in 2011. Pace projects that the regional ADA support credit will increase from $4.0 million in 2012 to $4.2 million in 2014.

NET RESULTS

Net results are calculated by adding total operating revenues and public funding together and subtracting total expenses. The operating deficits are derived from total operating revenue minus total operating expenditures. Pace estimates that its deficit will rise 6.7%, from $124.7 million in 2010 to $133.0 million in 2011. Pace projects deficits of $140.5 million, $146.0 million, and $152.5 million in 2012, 2013, and 2014, respectively, a $12.0 million increase with a compound annual growth rate of 4.2%. For 2012 and 2013 Pace anticipates a balanced budget with total revenues equal to total expenses. In 2014, Pace has identified a negative net result which they intend to fix with budget balancing actions. These action may include, but are not limited to, fare increases, cost efficiencies, service reductions, and/or additional revenues.

RECOVERY RATIO

The recovery ratio equals total operating revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments, including Advantage Program in-kind revenue and expense credit. Pace expects to achieve a recovery ratio of 36.0% in 2011 and to achieve a 30.0% recovery ratio mark for 2012 through 2014. This meets the recovery ratio mark set by the RTA Board on September 14, 2011.

2011 Budget versus 2011 Estimate

Pace expects 2011 operating revenue for Suburban Service to finish the year $2.8 million or 5.6% favorable to budget. Passenger revenue is expected to finish the year $0.9 million or 3.0% favorable to budget. Improved operational performance and a brightening employment picture have increased ridership above budgeted levels.

Local share and other revenues such as advertising and investment income are expected to be $1.3 million or 7.9% favorable to budget. The state reduced fare reimbursement is expected to be favorable to budget by $0.6 million.

Total expenditures are expected to finish the year $2.3 million or 1.3% unfavorable to budget. Expenditures for purchased transportation are expected to be $2.8 million or 11.3% favorable to budget. Despite favorable fuel consumption, per gallon fuel prices have been much higher than budgeted and are expected to result in a $5.2 million or 33.1% unfavorable fuel expense. Expenditures for labor/fringe benefits are expected to be $1.9 million or 2.1% unfavorable to budget, and health care expenses are also expected to be unfavorable, by $0.2 million or 1.0%. Expenditures for parts/supplies, utilities, insurance, and other expenses are expected to be $0.2, $0.1, $3.1, and $4.4 million favorable to budget, respectively.

Pace expects a favorable funding variance of $5.2 million in 2011 primarily because of higher RTA sales tax receipts. This favorable funding variance, combined with an operating deficit which is favorable to budget by $0.5 million, are expected to result in a funding surplus of $5.7 million (Exhibit 6-10).

Statutory Compliance

Pace's proposed 2012 budget, 2013-2014 plan, and 2011 recovery ratio submitted to the RTA comply with the operations funding marks set by the RTA Board on September 14, 2011. These marks include sales

tax, Public Transportation Fund, Suburban Community Mobility Funds, and South Suburban Job Access Funds provided by statutory formulas, and RTA discretionary funds. These marks set the total RTA funding levels at $139.3 million in 2012, $142.6 million in 2013, and $146.0 million in 2014, and set the 2012 recovery ratio at 30%.

*Effective January 1, 2006, the CTA discontinued issuing or accepting cash transfers.

Organizational Structure

Pace is organized into four main areas: Revenue Services, Strategic Services, External Relations, and Internal Services (Exhibit 6-12). Pace's organizational structure comprises four primary elements: administration, central support, Pace-owned divisions, and regional ADA paratransit services. Within each element, employees are classified into four areas: operations, vehicle maintenance, non-vehicle maintenance, and administration. These activity areas are defined by the National Transit Database reporting requirements, which apply to all public transit operators.

7 Pace ADA Paratransit Service Operating Plan

Overview

Effective July 1, 2006, Pace began providing all ADA paratransit service in the RTA region.

Service Characteristics

The RTA administers a regional certification program that determines if individuals with physical or cognitive disabilities are eligible for ADA paratransit service. If eligible, passengers can arrange for travel within three quarters of a mile of Pace or CTA bus routes or CTA rail stations, as described in the Americans with Disabilities Act (ADA).

In the suburban area where Pace provides fixed route service, Pace contracts with private operators to provide ADA paratransit service. These operators drive Pace-owned lift-equipped vehicles to provide curb-to-curb service to ADA-certified passengers.

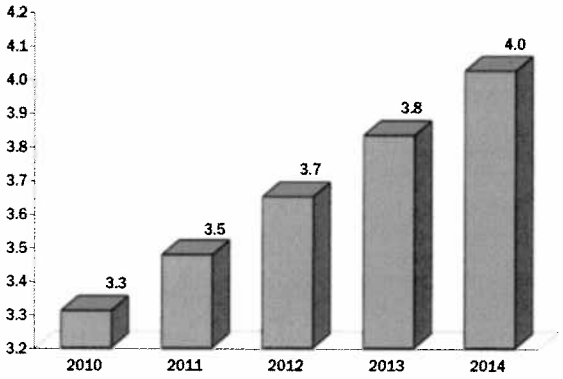
In the CTA service area, Pace contracts with private operators to provide ADA paratransit service in the entire City of Chicago and most of the suburbs serviced by the CTA. The operators use 614 contractor-owned vehicles to provide service to ADA-certified passengers. Pace also administers two subsidized taxi programs in the City of Chicago, the Taxi Access Program (TAP) and the Mobility Direct program, for ADA-certified passengers, although these programs are not required by the Americans with Disabilities Act.

The CTA and Pace fixed-route services are described earlier in this book.

Ridership

Pace estimates that ridership will increase 5.0% from 3.3 million in 2010 to 3.5 million in 2011. Pace projects that ADA paratransit ridership will increase by 5.0% per year in 2012 through 2014, in both the CTA service area and the suburban service area (Exhibit 7-1).

Exhibit 7-1: **Pace Regional ADA Paratransit Ridership** (in millions)



Cost Efficiency

The cost per passenger measurement recognizes that expenses tend to vary with the amount of service provided (Exhibit 7-2). Cost per passenger for Regional ADA paratransit service is projected to increase by 4.5% to $36.34 in 2011. Pace anticipates increased efficiency in 2012 due to several initiatives, including contract negotiations to freeze provider pricing, reduced reservations hours, and use of an Interactive Voice Response system to notify riders and reduce vehicle dwell times. As a result, the 2012 cost per passenger is expected to decrease by 4.6%, to $34.68, before increasing again by 1.7% and 2.8% in 2013 and 2014, respectively.

Budget and Financial Plan

The Pace ADA paratransit service 2012 budget and two-year financial plan presented in Exhibit 7-3 meets

Exhibit 7-2: **Pace ADA Paratransit Cost Efficiency** (dollars)

(1) Actions required to balance the ADA Paratransit budget. These actions may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues. In 2013 and 2014, these actions may also include adjusting fares.

the funding marks set by the RTA Board on September 14, 2011. In compliance with the RTA Act, the RTA set the ADA paratransit recovery ratio for 2012 at 10.0%.

OPERATING REVENUE

In 2010, regional ADA paratransit operating revenue of $10.5 million included $8.4 million in passenger revenues and $2.2 million in other revenues (Exhibit 7-4 and 7-5). This other revenue includes reimbursements from the RTA for transporting paratransit applicants to assessment sites of $1.3 million and additional revenue such as Medicaid reimbursements. In 2011, Pace expects regional ADA paratransit passenger revenue to increase by 4.6% as ridership continues to grow and fares remain unchanged after the 2009 increase. Pace projects that operating revenue will account for only 9.0% of total ADA paratransit revenue in 2012 (Exhibit 7-6). Pace projects total ADA paratransit operating revenue of $11.6 million in 2012, $11.8 million in 2013, and $12.3 million in 2014, representing a compound annual growth rate of 3.3% from 2012 to 2014. These revenue figures do

Exhibit 7-4: **Pace ADA Paratransit Operating Revenue**
(dollars in millions)

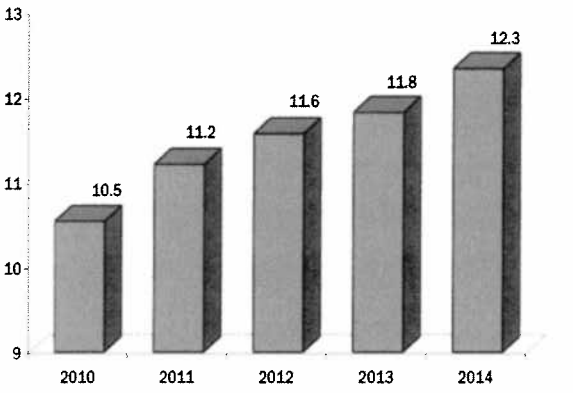

Exhibit 7-5: **Pace ADA Paratransit Farebox Revenue**
(dollars in millions)

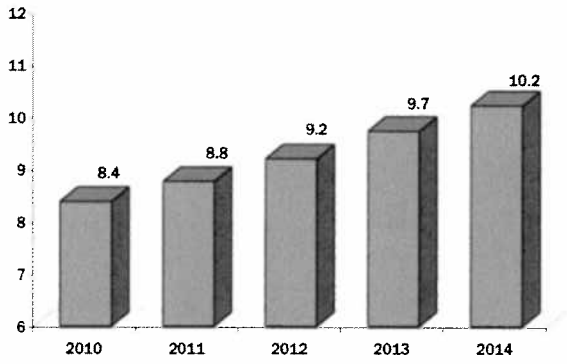

Exhibit 7-6: **Pace ADA Paratransit Revenue** - $126.6 million

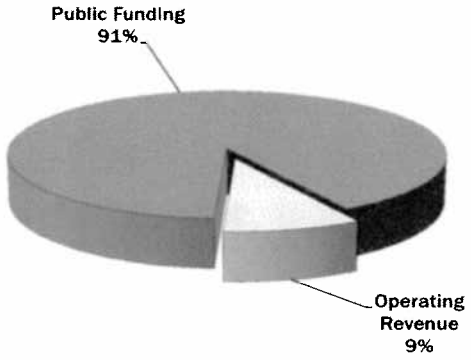


not incorporate required budget balancing actions in 2013 and 2014. Pace's current regional ADA paratransit fare structure is shown in Exhibit 7-7.

OPERATING EXPENDITURES

In 2010, regional ADA paratransit service operating expenses totaled $115.1 million. In 2011, Pace expects total regional ADA paratransit operating expenses to increase by 9.8% to $126.4 million. Pace projects total operating expenses to remain nearly flat in 2012 at $126.6 million due to increased operating efficiency and contract re-negotiations, but then increase to $135.1 million in 2013, and $145.9 million in 2014. This $19.3 million increase in operating expensesfrom 2012 to 2014 represents a compound annual growth rate of 7.4%. Growth in purchased transportation costs, which accounts for approximately 90% of total expenses, is the primary factor behind these increases in operating expenses (Exhibit 7-8).

EXPENDITURE ELEMENTS

Operating expenses elements include labor/fringe benefits, health insurance, administrative expenses, fuel, liability insurance, RTA certification trip costs, purchased transportation, and regional ADA support allocation (Exhibit 7-3). Figures for individual expense elements do not incorporate required budget balancing actions in 2013 and 2014.

Labor/Fringe Benefits and Health Insurance Costs

Combined labor/fringe benefits and health insurance expenditures of $3.0 million are expected to account for 2.3% of regional ADA paratransit service operating expenditures in 2012. Labor/fringe expenses are projected to increase at a compound annual growth rate of 2.8% from 2012 to 2014. Health insurance expenses of $0.3 million in 2012 are projected to increase at a 9.0% compound annual growth rate from 2012 to 2014.

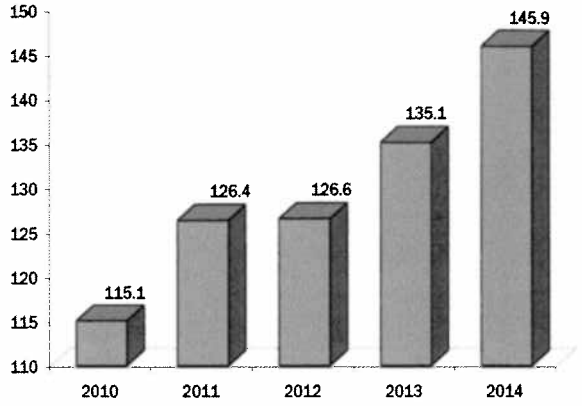
Administration

Pace leases its operations center for ADA paratransit services in Metra's downtown Chicago headquarters at 547 W. Jackson Blvd. Administration expenses of $2.0 million are projected to account for 1.6% of regional ADA paratransit service operating expenses in 2012. Administrative expenses are projected to grow at a compound annual growth rate of 1.7% from 2012 to 2014.

Exhibit 7-7: **Fare Structure**

	Current Fare
CTA SERVICE AREA	
ADA Paratransit	$3.00
Taxi Access Program and Mobility Direct	$5.00
PACE SERVICE AREA	
ADA Paratransit	$3.00

Exhibit 7-8: **Pace ADA Paratransit Operating Expenditures**
(dollars in millions)



Fuel

Pace purchases fuel for the private operators who provide ADA paratransit service using Pace-owned vehicles in Pace's suburban service area only. After an increase of 37.1% for fuel expenditures in 2011, this expense is expected to increase by 6.3% in 2012 but then remain nearly flat in 2013 and 2014. Fuel expenditures of $2.8 million in 2012 are projected to account for 2.2% of regional ADA paratransit service operating expenditures.

Liability Insurance

Liability insurance expenses of $0.3 million are projected to account for 0.3% of regional ADA paratransit service operating expenditures in 2012. Liability insurance expenditures are projected to increase at a compound annual growth rate of 4.9% in 2013 and 2014.

RTA Certification

RTA certification expenses comprise the cost of transporting applicants for ADA certification to and from assessment centers. These expenses of $1.4 million are projected to account for 1.1% of regional ADA paratransit service operating expenditures in 2012. RTA certification expenditures are projected to increase at a compound annual growth rate of 1.6% in 2013 and 2014.

Purchased Transportation

Purchased transportation expenses are projected to account for 89.4% of regional ADA paratransit service's operating expenses in 2012. These expenses are projected to increase from $113.2 million in 2012 to $132.0 million in 2014, an $18.8 million increase that corresponds to an 8% compound annual growth rate. Pace assumes that demand for both suburban and CTA service area ADA paratransit service will increase 5.0% each year from 2012 through 2014. Pace projects that from 2012 to 2014 contractor rates in the CTA and Suburban Service areas will grow at compound annual growth rates of 1.9% and 3.1%, respectively.

Regional ADA Support Allocation

In 2010 Pace charged $2.9 million of administrative and overhead expenses to the regional ADA paratransit budget and expects to charge $3.9 million in 2011. Pace projects that this amount will continue to increase, from $4.0 million in 2012, to $4.2 million in 2014, representing a compound annual growth rate of 2.8%.

FUNDING AND OPERATING DEFICIT

In 2008, Illinois Public Act 95-0708 allocated $100.0 million to the funding of ADA paratransit service from the increase in the RTA sales tax rate and the increase in the portion of RTA tax revenues matched by the State Public Transportation Fund (PTF). According to the legislation, this amount was then indexed to the

annual change in RTA sales tax collections. Sales tax collections subsequently decreased with the economic recession while ADA ridership increased, resulting in chronic funding shortfalls.

In 2011, the RTA Act was again amended to increase funding for ADA paratransit to $115.0 million for 2012, and to guarantee full funding in subsequent years. Funding for the following two-year planning period was set at $120.8 million for 2013 and $126.8 million for 2014, an annual increase of 5.0% which is commensurate with Pace's assumed ADA paratransit ridership growth. To meet these funding levels, Pace will need to implement budget balancing actions which will increase revenues and/or decrease expenses by $2.6 million in 2013 and $6.8 million in 2014.

2011 Budget versus 2011 Estimate

Pace expects that 2011 regional ADA paratransit service operating revenue will be favorable to budget by $1.2 million, primarily due to increased Medicaid reimbursements (Exhibit 7-9). Passenger revenue is expected to be at budget despite an increase in ridership, due to decreased use of the higher-fare Taxi Access Program relative to budget projections.

Total expenditures for 2011 are expected to be unfavorable to budget by $5.7 million. Unfavorable variances are expected in purchased transportation and fuel, totaling $6.7 million. This is expected to be partially offset by favorable variances in health insurance, administrative expenses, liability insurance, and the regional ADA support allocation.

Total funding for 2011 is expected to be favorable to budget by $4.5 million, driven by a $5.9 million favorable variance in sales tax receipts. This positive variance results in an ICE fund requirement of $7.9 million to balance the 2011 budget, which is $1.4 million less than was anticipated.

NET RESULTS

Net results are calculated by adding total operating revenues and public funding together and subtracting total expenses. The operating deficit is calculated by subtracting total operating expenditures from total operating revenue. For 2012, the Pace ADA paratransit operating deficit is projected at $115.0 million, which matches the 2012 ADA paratransit funding level, producing a balanced budget, or a net result of zero, provided that previously mentioned operating efficiencies can be achieved as intended.

For 2012, the Pace ADA paratransit operating deficit is projected at $115.0 million, which matches the 2012 ADA paratransit funding level, producing a balanced budget.

RECOVERY RATIO

The recovery ratio equals total operating revenue, with statutory and approved adjustments, divided by total operating expenses, with statutory and approved adjustments. The RTA Act requires that regional ADA paratransit service meet a recovery ratio of 10%. For each year from 2010 through 2014, Pace's projected recovery ratio for regional ADA paratransit service is projected to meet this statutory requirement. These recovery ratios are reached by exempting from the recovery ratio calculation a portion of costs incurred in paying ADA paratransit contractors for their capital expenses.

Statutory Compliance

Pace's 2012 budget and 2013 and 2014 plans meet the regional ADA paratransit operating funding marks (sales tax, Public Transportation Funds) set by the RTA Board on September 14, 2011. These marks set the total level of RTA funding at $115.0 million in 2012, $120.8 million in 2013 and $126.8 million in 2014. However, meeting the 2012 funding mark will require improved operating efficiency as previously noted. In 2013 and 2014, funding the deficit requires budget balancing actions of $2.6 and $6.8 million respectively, which may include, but are not limited to, adjusting service, implementing further efficiencies, reducing operating costs, and identifying additional funds or revenues. Pace's ADA paratransit projected recovery ratio of 10.0% in 2012 complies with the recovery ratio marks set by the RTA Board on September 14, 2011.

(1) Actions required to balance the ADA Paratransit budget. These actions may include, but are not limited to, adjusting service, implementing efficiencies, reducing operating costs, and identifying additional funds or revenues, including the 2011 ICE fund.

8 Capital Program

Regional Overview

The RTA Act requires that the capital expenditures of the CTA, Metra, and Pace be subjected to continuing review so that the RTA may budget and expend funds available to the region with maximum efficiency. The RTA Board must adopt a five-year capital program every year. The RTA's five-year capital program describes the nature, location, and budget (by project and by fiscal year) of all anticipated Service Board capital improvements. Public hearings are held in each county in the Northeastern Illinois region to inform the public and government officials of the RTA's capital development plans.

The RTA emphasizes the need to preserve and enhance the RTA system's valuable infrastructure, which includes bringing the system's $142.2 billion in assets (as measured in terms of replacement value) to good condition and extending or expanding service where demand is present and funding available. The funding need is over $1 billion per year just to maintain and preserve the existing system without adressing the backlog.

Source of Funds

On September 14, 2011, the RTA Board adopted preliminary federal and state capital funding marks for 2012-2016. Subsequently, the RTA received proposals for funds controlled by the Service Boards and then the RTA Board adopted the 2012 RTA system budget on December 15, 2011. The funding sources for the RTA capital program include the U.S. Department of Transportation's Federal Transit Administration (FTA), the Illinois Department of Transportation (IDOT), the RTA, and the Service Boards. Of the estimated $3.887 billion of available funding sources for 2012-2016, federal funding accounts for $1.571 billion or 40%, state funds account for $988.8 million or 26%, carryover funds from 2011 account for $695.3 million or 18%, CTA bond proceeds account for $520.0 million or 13%, Service Board and other funds account for $96.8 million or 3%, and RTA funds account for $15.7 million or less than 1% (Exhibits 8-1 and 8-2).

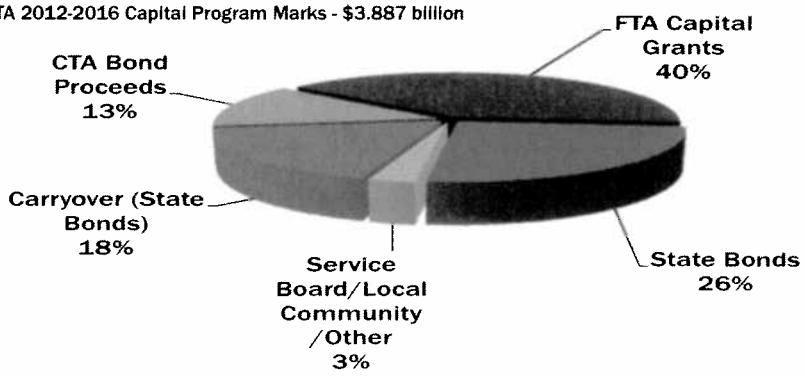
Exhibit 8-2: **RTA 2012-2016 Capital Program Marks - $3.887 billion**



The total estimated capital funds available for capital projects in 2012 are $1.352 billion. This amount reflects a $205.5 million transfer of federal funds for CTA debt repayment. At this time, the final federal appropriation figures for 2012 have not been determined. Once this amount has been established, the capital program will be adjusted to reflect the available funding. Of the estimated $1.352 billion of available funding sources for 2012, CTA bond proceeds account for $520.0 million or 39%, state funds account for $397.5 million or 29%, federal funding accounts for $271.8 million or 20%, carryover funds from 2011 account for $108.0 million or 8%, Service Board and other funds account for $39.0 million or 3%, and RTA funds account for $15.7 million or 1% (Exhibits 8-3 and 8-4).

Despite the challenging economic times, critical progress was made in 2011 on our capital investment needs.

The State of Illinois approved two measures – the "Jump Start" capital bill in April 2009 and the "Illinois Jobs Now" capital bill in July 2009. Combined, these two programs provide the RTA system with $2.7 billion in capital funds. With these funds, the RTA will be able to replace aging trains, buses, track, stations and other infrastructure and improve the reliability of the system.

Later, in July of 2010, Governor Pat Quinn announced the state's intention to award $442.7 million of the "Illinois Jobs Now" funds towards mass transit infrastructure that specifically included funding for the RTA capital projects to be implemented by the CTA, Metra, and Pace. These funds were included in the 2010 Capital Program. In addition, $1.008 billion was awarded to the CTA and Metra in 2011. Nevertheless, there is uncertainty regarding the timing of the availability of the balance of the $2.7 billion originally appropriated for the program in 2009. A portion of these funds are dependent on bond authorizations that have yet to

Exhibit 8-3: **Capital Funding in 2012** (dollars in thousands)

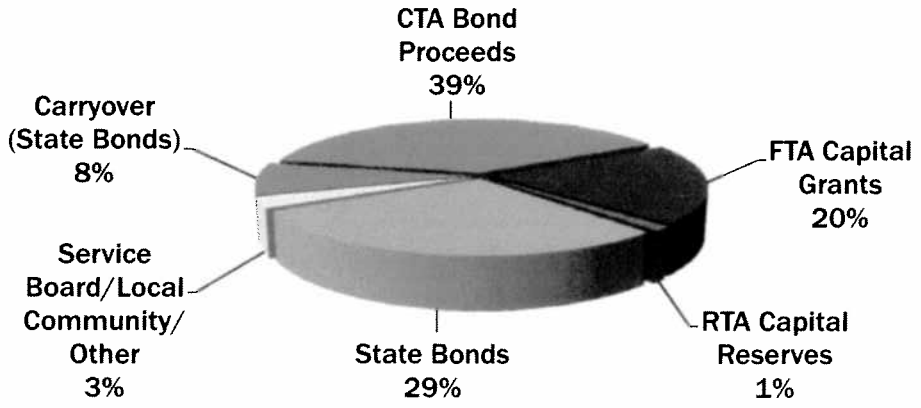
Exhibit 8-4: **Capital Funding in 2012** - $1.352 billion



pass the General Assembly. In addition, sources for debt service on some of the bond funds depend on the new revenues for the State's General Revenue Fund. However, encouraged by the award of State Bond funds through this year, the balance of the full $2.7 billion State Bond program is distributed over the remaining three years, 2012-2014.

Use of Funds

The primary emphasis of the 2012 Capital Program is to continue efforts to bring the system's assets to a State of Good Repair. When replacing worn out items, it is imperative to utilize modern technologies that often result in improved functionality of equipment, facilities, and rolling stock. In addition, a balanced capital program is responsive to customer needs and shifting markets by including investment in system expansion. For the 2012 Capital Program, 93% of the budget is allocated to capital projects that maintain the existing infrastructure. While the current funding level does not satisfy all needs, an appropriate balance of investment is achieved in light of the current condition of the RTA system.

Investments in the 2012-2016 Capital Program can be broken down by various asset categories. Exhibits 8-5 and 8-6 show that $1.49 billion or 38% of the program is spent on rolling stock and $987 million or 25% for track and structure, which are considered to have the greatest direct impact on transit users. Substantial investment in other infrastructure is also critical to maintaining safe, reliable transportation services.

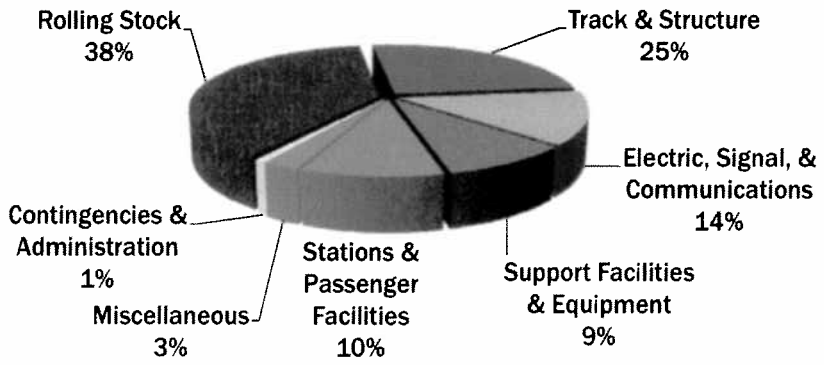
Exhibit 8-6: **2012-2016 Capital Program Uses** - $3.887 billion



CTA Overview

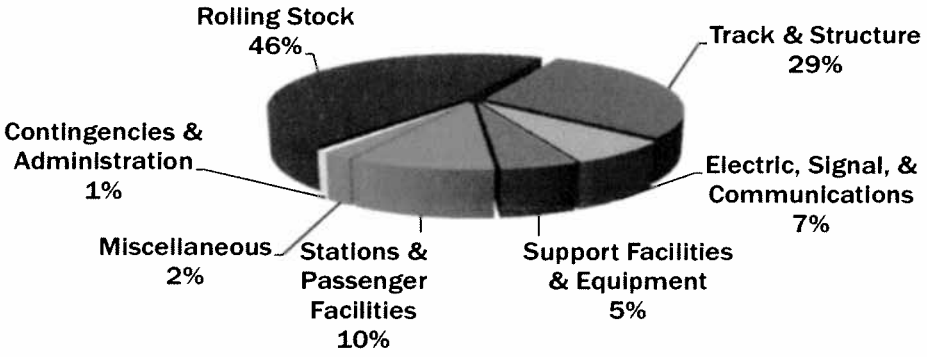
The proposed projects in the CTA's portion of the 2012-2016 Capital Program total $2.3 billion and continue the rehabilitation and replacement of their capital assets. The percentages for the general categories of capital improvements of the total program are: 46% for rolling stock, 29% for track and structure, 10% for stations and passenger facilities, 7% for electric, signal and communications, 5% for support facilities and equipment, and 3% for miscellaneous, contingencies and administration. The general categories of capital improvements comprising the CTA's portion of the Capital Program are illustrated in Exhibit 8-7.

A complete schedule of the CTA's Five-Year Capital Program can be found in the Appendices (Exhibit 9-24)

Highlights of projects included in the CTA's proposed 2012-2016 Capital Program are:

- $650.3 million for the repair of track and structure
- $508.1 million for the purchase of 706 rail cars
- $248.0 million for the rehabilitation and overhaul of rail cars
- $221.0 million for the rehabilitation of rail stations
- $199.7 million for the purchase of buses
- $103.4 million for the improvement of facilities
- $93.7 million to implement security and communication projects
- $76.9 million to perform mid-life bus overhauls
- $68.0 million to replace or upgrade power distribution and signals

Exhibit 8-7: **CTA 2012-2016 Program Uses - $2.256 billion**



Metra Overview

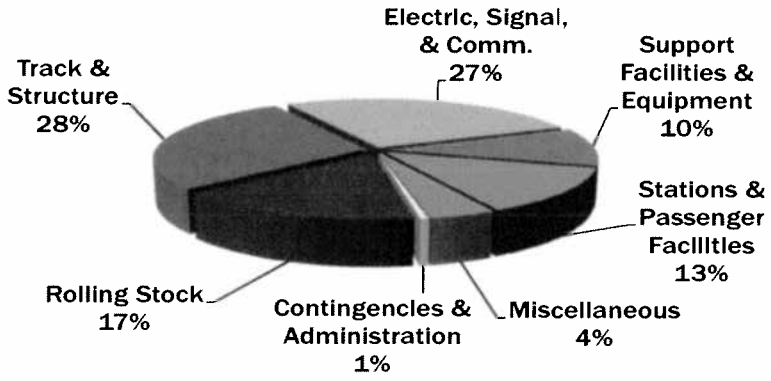
Metra's portion of the proposed 2012-2016 Capital Program totals $1.2 billion. During this five-year period, Metra will continue to renew its extensive commuter rail infrastructure and renew aging rolling stock. The percentage for the general categories of capital improvements of the total program are: 28% for track and structure, 27% for electric, signal, and communications, 17% for rolling stock, 13% for stations and passenger facilities, 10% for support facilities and equipment, and 5% for miscellaneous, contingencies, and administration. The general categories of capital improvements comprising Metra's portion of the Capital Program are illustrated in Exhibit 8-8.

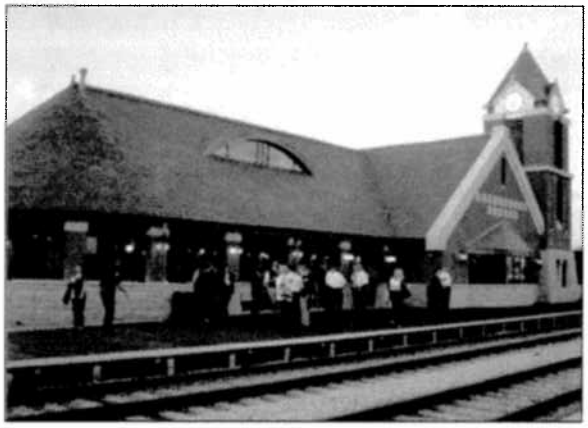
A complete schedule of Metra's Five-Year Capital Program can be found in the Appendices (Exhibit 9-24)

Highlights of projects included in Metra's proposed 2012-2016 Capital Program are:

- $252.9 million for bridge rehabilitation and renewal
- $222.4 million for the installation of Positive Train Control (PTC) system
- $140.1 million for station rehabilitation and improvement
- $85.6 million for the rehabilitation of commuter rail cars
- $65.1 million for locomotive improvements
- $60.5 million to improve yards, shops and facilities
- $59.2 million to upgrade the signal system
- $49.5 million to upgrade financial systems

Exhibit 8-8: **Metra 2012-2016 Program Uses - $1.205 billion**





Pace Overview

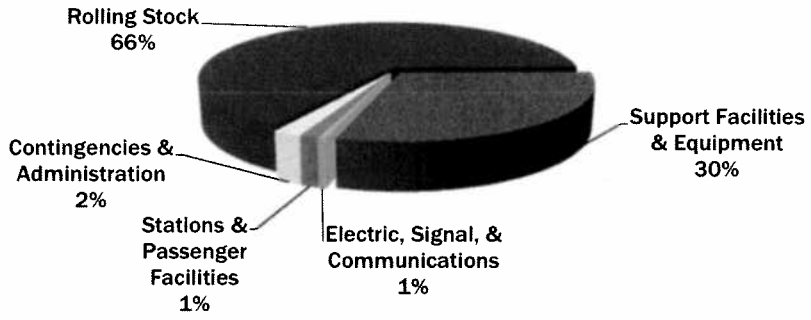
Pace's portion of the proposed 2012-2016 Capital Program totals $380 million. A majority of the funding is provided for the replacement of rolling stock. The percentage for the general categories of capital improvements of the total program are: 66% for rolling stock, 30% for support facilities and equipment, 2% for contingencies and administration, 1% for electric, signal and communications, and 1% for stations and passenger facilities. The general categories of capital improvements comprising Pace's portion of the Capital Program are illustrated in Exhibit 8-9.

A complete schedule of Pace's Five-Year Capital Program can be found in the Appendices (Exhibit 9-24)

Highlights of projects included in Pace's proposed 2012-2016 Capital Program are:

- $142.1 million for the purchase of 413 fixed route buses
- $58.0 million to construct Northwest Cook County bus garage
- $20.0 million for the purchase of a replacement farebox system
- $13.8 million for the purchase of computer hardware and software systems
- $13.4 million for diesel engine retrofits
- $11.8 million for the purchase of 148 paratransit vehicles
- $9.5 million for bus overhauls

Exhibit 8-9: **Pace 2012-2016 Capital Program Uses** - $380 million



Pace ADA Overview

Nearly all of the capital costs associated with the delivery of Pace ADA service relate to vehicles, which are provided by the contractor for most of the service areas. Thus, Pace ADA's portion of the proposed 2012-2016 Capital Program totals only $75 thousand provided for support facilities and equipment. The source of this funding is to be determined. The general categories of capital improvements comprising Pace ADA's portion of the Capital Program are illustrated in Exhibit 8-10.

A complete schedule of Pace ADA's and the RTAs Five-Year Capital Program can be found in the appendices (Exhibit 9-24)

Exhibit 8-10: **Pace ADA 2012-2016 Capital Program Uses** - $75 thousand

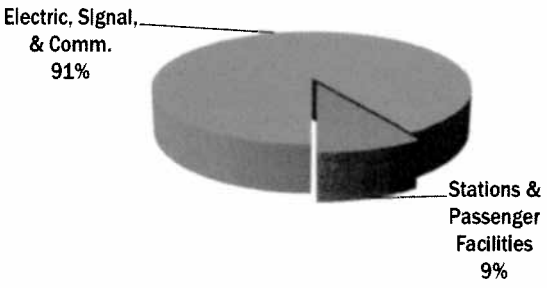
RTA Overview

The RTA's portion of the proposed 2012-2016 Capital Program totals $46.4 million. The largest expenditure relates to the implementation of transit signal priority projects where FTA capital grants represent 80% of funding or $32 million. The general categories of capital improvements comprising the RTA's portion of the Capital Program are illustrated in Exhibit 8-11.

Highlights of projects included in RTA's proposed 2012-2016 Capital Program are:

- $40 million to implement Transit Signal Priority (TSP) projects
- $4.2 million to provide for improvements at 19 priority transit transfer locations
- $2.0 million to provide for regional integration of real time information and trip planning
- $100 thousand to implement downtown Chicago interagency connection improvements
- $50 thousand to implement a regional real time transit web page

Exhibit 8-11: **RTA 2012-2016 Capital Program Uses** - $46 million



Capital Impact on Operations

As part of its oversight function, the RTA is charged with providing assessments of the Service Board's Capital projects and plans as well as an assessment of the condition of the Service Board's capital assets. Pursuant to Ordinance 2009-92, the RTA, after consultation with the Service Boards, must prepare and adopt a Five-Year Capital Program annually that includes each capital improvement undertaken by or on behalf of a Service Board. In addition to the Five-Year Plan, the RTA Act established the need for the development of a Ten-Year Capital Plan.

The estimated value of transit capital assets in northeastern Illinois is $142.2 billion, as measured in terms of replacement value..

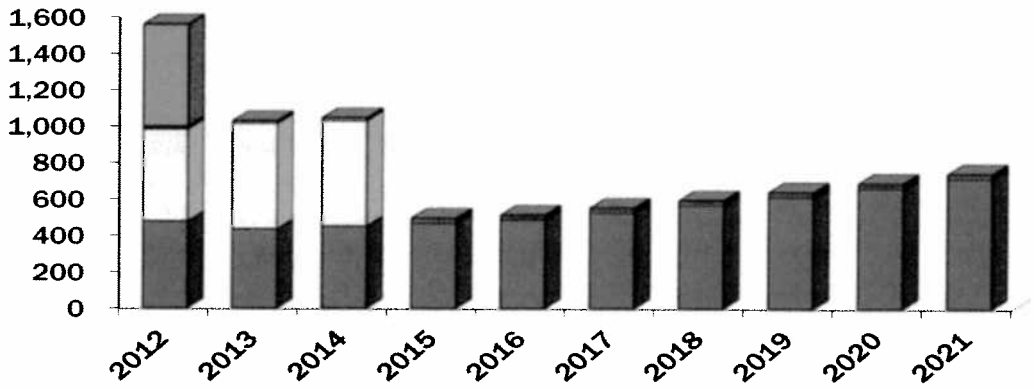
The estimated value of transit capital assets in northeastern Illinois is $142.2 billion, as measured in terms of replacement value. Achieving and maintaining a State of Good Repair will require $24.6 billion of capital investment over the next ten years. During this same time frame, however, total funding to support capital infrastructure is projected at $9.0 billion. Since $1.2 billion of capital funds have already been committed to debt service for bonds issued by the CTA, the current Ten-Year Capital Program leaves approximately $7.8 billion in net funding available for the 2012-2021 period, 31.7% of the total replacement need.

CAPITAL FUNDS AVAILABLE FOR THE TEN-YEAR PLAN

As Exhibit 8-12 indicates, there are four sources of funding that are dedicated to capital program expenditures in the region; federal, state, RTA and local. In the RTA's ten-year plan, $477.3 million in federal capital grants are expected to be made available to the RTA in 2012. By 2021 federal capital grants are planned to increase to $592.7 million, a compound annual growth rate of 2.5%, reflecting long term historic trends. State funding includes the $1.1 billion available in the State's bond program, appropriated in 2009 and allocated through 2014. RTA capital reserve funds total $15.7 million in 2012. Local funds total $689.3 million between the years 2012 and 2021. These local funds consist of Service Board money that Metra allocates to capital programs from farebox revenues each year, capital funding provided to the region by local communities, and additional funds from the other Service Boards. In 2011 the CTA issued $520 million in bonds, the proceeds of which are included in the 2012 Capital Plan and will be used for the purchase of new 5000 series rail-cars.

The total available funds in 2012 for capital projects are approximately $1.352 billion, a $1.767 billion shortfall from the annual replacement needed to achieve a State of Good Repair and address the backlog. It is important to note that in 2012 and beyond,

Exhibit 8-12: **Capital Program Funds Available** (in millions)



the Service Boards have discontinued their previous practice of diverting capital funds to cover operating expenses. In August 2010, a Capital Asset Condition Assessment was completed that placed the region's total capital backlog at $13.8 billion. By the end of 2012 the region anticipates a total backlog to achieve a State of Good Repair of over $14.8 billion.

As shown in Exhibit 8-12, the funding available from state and local sources in the years 2012 through 2016 is critical to executing the capital program. In 2012, a bond issued by the CTA for the purchase of new 5000 series rail cars will increase capital funding for the region. In 2013 and beyond, the amount of funding available for capital is below the annual replacement need, including back log, by $1.5 to $2.1 billion per year.

CAPITAL FUNDING VS. ANNUAL REPLACEMENT NEED

As Exhibit 8-13 shows, from 2012 to 2021 the region's projected capital funding falls far below the region's replacement need in each year of the period. In 2012, with the bond issuance by the CTA of $520 million, capital funding is sufficient to pay for about 67% of the annual replacement need. With the absence of locally generated borrowing in 2013 and beyond, that level falls to less than 30% of the replacement need.

Lack of funding for capital improvements is further exacerbated by the region's aging vehicle fleet. As the average life of a region's fleet increases, the fleet's operating and maintenance costs increase as well. Conversely, if the average age of a fleet decreases because of capital spending, one can expect to see

Exhibit 8-13: **Capital Funding vs. Annual Replacement Need** (in millions)

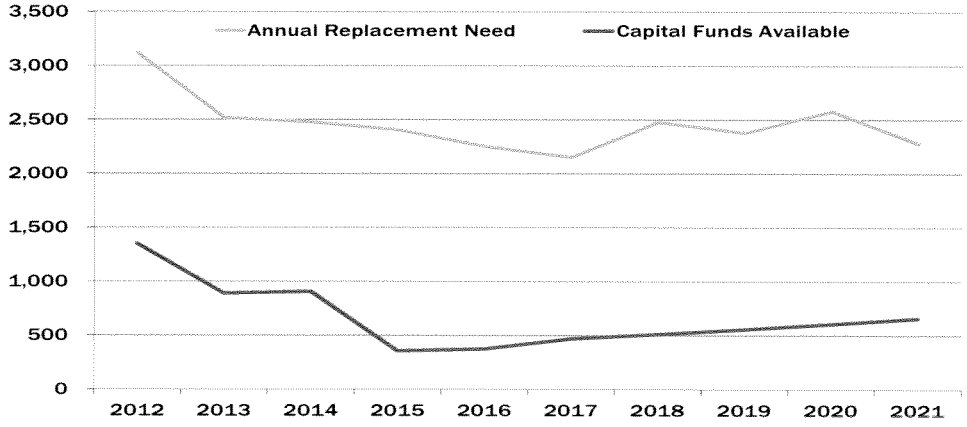


Exhibit 8-14: **CTA 2012 Capital Impact on Operations** (includes only some of the major programs)

Bus Projects	
Bus mid-life overhaul ($22.5 million) Purchase replacement buses ($21.9 million)	• Improve service reliability • Increase customer satisfaction • Enhance safety
Rail Projects	
Railcar mid-life overhaul ($82.4 million) Purchase replacement railcars ($470.1 million) Repair track and structures ($207.0 million)	• Increase fleet reliability • Reduce maintenance and operating costs • Raise travel speeds by reducing slow zone restrictions • Enhance safety • Improve on-time performance • Increase customer satisfaction
System-wide Improvements	
Implement security & communication projects ($47.7 million)	• Enhance safety and customer satisfaction • Improve communications and efficiencies

significant savings in operating and maintenance expense.

If the region fails to meet both vehicular and non-vehicular capital annual replacement needs, operating and maintenance costs will continue to rise, making it difficult to continue to provide service at current levels.

IMPACT OF CAPITAL EXPENDITURES ON THE 2012 OPERATING BUDGET

CTA

The proposed 2012 Capital Program for CTA totals $972.9 million divided among the following: bus projects $51.5 million; rail projects $836.0 million; system wide projects of $85.4 million. Specific capital projects in support of lower operating costs include rail car and bus mid-life overhauls. The capital program provides for the purchase of new rail cars and buses in 2012, which will decrease the average age of the vehicle fleet, significantly reducing maintenance and operating costs. Details on the CTA's Capital Program can be found in the appendices (Exhibit 9-24).

Metra

The proposed 2012 Capital Program for Metra totals $249.4 million divided among the following: rolling stock $43.1 million; track & structure $51.4 million; electrical, signal & communications $81.5 million; support facilities and equipment $18.6 million; stations and passenger facilities $43.0 million; and miscellaneous, contingencies & administration $11.8 million. Projects include locomotive improvements and railcar overhauls, which will extend service lines and reduce operating costs. Details on the Metra's Capital Program can be found in the appendices (Exhibit 9-24).

Pace

The proposed 2012 Capital Program for Pace totals $83.3 million divided among the following: rolling stock $70.4 million; support facilities & equipment $10.8 million; miscellaneous, contingencies & administration $1.3 million. Pace plans to continue the replacement of fixed-route buses in 2012, with a purchase of 137 buses during the year. This will lower the average age of their 688 bus fleet from 7.2 years to 5.8 years, significantly reducing annual operating expenses. Details on Pace's Capital Program can be found in the appendices (Exhibit 9-24).

Exhibit 8-15: **Metra 2012 Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock	
Provide locomotive improvements ($22.5 million) Rehabilitate bi-level commuter cars ($12.1 million)	• Maintain on-time performance • Reduce maintenance cost • Enhance safety • Increase customer satisfaction
Track & Structure	
Rehabilitation of bridges ($31.9 million)	• Preserve uninterrupted service – better on-time performance • Improve vertical clearances • Improve traffic flow and pedestrian safety
Electrical Signal & Communication	
Install positive train control system ($64.5 million)	• Improve travel times resulting in improved on-time performance • Enhance safety
Stations and Passenger Facilities	
Rehabilitate and improve stations ($38.0 million)	• Increase other revenue by providing improved commercial and retail space

Exhibit 8-16: **Pace 2012 Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock	
Purchase of fixed-route buses ($64.2 million)	• Reduced maintenance and operating costs • Improved travel time • Enhanced safety • Lower fuel consumption
Support Facilities and Equipment	
Improvement to garages/facilities ($6.0 million)	• Lower building maintenance costs

The RTA continues to work with the Service Boards to identify the impact of capital expenditures on their operating budgets as it attempts to mitigate the effects of an aging fleet and meet its annual replacement need. Currently, the RTA is developing a Decision Support Tool to set forth the process and establish criteria necessary to focus capital efforts on improvements that are intended to bring the region's infrastructure toward a State of Good Repair. The RTA is also undertaking a study to improve and standardize techniques to estimate the operating cost impact of capital projects. These efforts will ensure the allocation of available financial resources to yield the greatest return to RTA customers and taxpayers.

9 Appendices

Exhibit 9-1: **2012 Business Plan Calendar** (dates listed are in 2011)

2012 Business Plan Calendar

Date	Requirements
23-Jun	RTA Finance Committee and Board meet to discuss and consider the release of the 2012 Business Plan Call, which includes the preparatory funding estimates for the Service Boards' 2012 Annual Budget, Two-Year (2013-2014) Financial Plan, and Five-Year (2012-2016) Capital Program.
30-Jul	The RTA and Service Board Finance Departments reach consensus on the operating and capital funds to be recommended for RTA Board adoption in August which include: the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, the budget recovery ratio for the upcoming year for each Service Board, and the preliminary capital program amounts for the upcoming five years not later than July 30.
18-Aug	RTA Finance Committee and Board meet to discuss and consider adoption of ordinances which (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the budget recovery ratio for the upcoming year for each Service Board, and (3) set the preliminary capital program amounts for the upcoming five years.
30-Sep	Service Boards release their proposed Budget, Two-Year Financial Plan, and Five-Year Capital Programs to the RTA and the public. Information requirements in the proposed Budget, Two-Year Financial Plan, and Five-Year Capital Program document shall be provided to the RTA on supplemental schedules not later than September 30.
Oct-Nov	The Service Boards hold public hearings on their proposed Budget, Two-Year Financial Plan, and Five-Year Capital Programs, and present these proposals to each of the six counties in the region.
20-Oct **17-Nov**	During the RTA Board Meeting in October and/or in November the Service Boards present their proposed Budget, Two-Year Financial Plan and Five-Year Capital Program to the RTA Board.
15-Nov	Service Board budgets, Two-Year Financial Plans, and Five-Year Capital Program proposals, adopted by their Boards, are submitted to the RTA not later than November 15.
16-30-Nov	RTA staff prepares consolidated Budgets, Two-Year Financial Plans, and Five-Year Capital Programs for public review and comment.
17-Nov	RTA Board Committees and the RTA Board review the proposed RTA 2012 Agency Budget. During the RTA Board Meeting the Chairman of the RTA Board and/or the Chairman of the RTA Board Finance Committee approve the release of the proposed RTA Budget, Two-Year Financial Plan, and Five-Year Capital Program.
Nov-Dec	RTA presents operating and capital program information to each of the six counties in the region.
1-Dec	RTA proposed Budget, Two-Year Financial Plan, and Five-Year Capital Program is made available for public review and comment.
Dec	RTA holds public hearings in December on the proposed RTA Budget, Two-Year Financial Plan, and Five-Year Capital Program.
15-Dec	RTA Finance Committee and Board meet to discuss and consider adoption of ordinances which (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the budget recovery ratio for the upcoming year for each Service Board, and (3) set the capital program amounts for the upcoming five years.

Public Hearing Overview

Section 4.01 of the RTA Act directs the RTA to hold public hearings on its annual consolidated budget and financial plan, prior to Board consideration of the ordinance adopting the budget and plan. This year, for the first time, the RTA participated in each of the public hearings held by the CTA, Metra, and Pace. These hearings gave the public a more unified presentation of the region's transit system and a clearer understanding of the respective roles of the Service Boards and the RTA. In 2011, the RTA participated in twenty-three hearings in total in October and November, and seven hearings in December. The RTA participated in twelve Pace hearings in October: three in the City of Chicago (north, south, southwest), four in suburban Cook (north, west, south and southwest), and one each in Lake, Will, DuPage, Kane and McHenry counties. The RTA participated in eight Metra hearings in November: one in the City of Chicago, two in suburban Cook (north, south), and one each in Lake, Will, DuPage, Kane and McHenry counties. The RTA participated in three CTA hearings in November: one on the South Side of the City of Chicago, one on the West Side, and one in the West Loop.

The RTA also held its own budget meetings in December: three in Cook County and one in each of the five other counties. The meetings were publicized in press releases issued to the media, paid ads in newspapers across the region, e-mails and calls to Partners for Transit, the RTA's InTransit newsletter, a special communication to elected officials, as well as through the Service Boards, at reduced fare presentations, and on RTA, all Service Boards and many Partners For Transit websites. The hearing schedules are detailed in Exhibits 9-2.1 and 9-2.2.

At these meetings, the RTA briefed the public on the proposed RTA 2012 Budget, the proposed Program of Capital Projects, the Illinois Jobs Now projects, a review of the 2011 budget and a current assessment of the economic conditions and status as it relates to the RTA. Presenters included Executive Director Joseph G. Costello, RTA senior management, and RTA Finance Department Staff, who were joined by RTA board members. Presentations were also given to all County Boards in the service area.

Public hearing comments were primarily focused on the need to expand and enhance service, changes to ADA paratransit reservation hours, the upcoming labor negotiations and the use of JARQ funds for service expansion. Court reporters were present to take testimony at all public hearings. Transcripts are on file with RTA.

In addition to the hearings, the budget documents and actual presentation were posted on RTA websites and announced through RTA's social media network as well as other methods in order to broaden public access. The RTA Board voted to approve the 2012 transit system budget at its December 15th meeting.

Exhibit 9-2.1: **RTA Community Meetings/Budget Hearings Schedule**

The RTA sought public input regarding the 2012 budget and provided updates on state and federal capital funding while reviewing recommended projects for RTA funding programs. RTA Board members offered opening remarks followed by RTA senior staff who conducted presentations on the Budget. Attendees had the opportunity to make public comment.

SCHEDULE OF PUBLIC HEARINGS

PACE

Cook County (North) - Monday, October 17th
4:00 - 6:00 pm
Pace Headquarters Board Room
550 W. Algonquin Rd., Arlington Heights

Lake County - Monday, October 17th
4:00 - 6:00 pm
Waukegan Public Library, Bradbury Room
128 N. County St., Waukegan

Will County - Tuesday, October 18th
4:30 - 6:00 pm
Joliet Public Library, Meeting Room B
150 N. Ottawa St., Joliet

McHenry County -Tuesday, October 18th
4:30 - 6:00 pm
Crystal Lake Municipal Complex, Council Chambers
100 W. Woodstock St., Crystal Lake

Kane County - Wednesday, October 19th
4:30 - 6:00 pm
Kane County Government Center Auditorium,
Ground Floor
719 S. Batavia Ave., Geneva

Cook County (Southwest) - Wednesday, October 19th
4:30 - 6:00 pm
Oak Lawn Village Hall Auditorium
9446 S. Raymond, Oak Lawn

Cook County (West) - Thursday, October 20th
4:00 - 6:00 pm
Howard Mohr Community Center
7640 Jackson Blvd., Forest Park

City of Chicago (North) – Monday, October 24th
11:00 am - 1:00 pm
Sulzer Regional Library
4455 N. Lincoln, Chicago

City of Chicago (Southwest) - Wednesday, October 26th
3:00 - 5:00 pm
Arturo Valezquez Westside Technical Institute
2800 S. Western Ave., Chicago

DuPage County – Wednesday, October 26th
4:30 - 6:00 pm
DuPage County Government Center Auditorium
421 N. County Farm, Wheaton

Cook County (South) – Thursday, October 27th
4:30 - 6:00 pm
Homewood Village Hall, Board Room
2020 Chestnut Rd., Homewood

City of Chicago (South) - Thursday, October 27th
7:00 - 9:00 pm
Olive Harvey College, Cafeteria
10001 S. Woodlawn, Chicago

METRA

McHenry County - Wednesday, November 2nd
4:00 - 7:00 pm
Woodstock City Hall, City Council Chambers
121 W. Calhoun St., Woodstock

Kane County - Wednesday, November 2nd
4:00 - 7:00 pm
Geneva City Hall, City Council Chambers
22 S. First St., Geneva

Cook County (South) - Wednesday, November 2nd
4:00 - 7:00 pm
Homewood Village Hall, Board Room
2020 Chestnut Rd., Homewood

Cook County (North) - Wednesday, November 2nd
4:00 - 7:00 pm
Arlington Heights Village Hall, Board Room
33 S. Arlington Heights Rd., Arlington Heights

DuPage County - Thursday, November 3rd
4:00 - 7:00 pm
Clarendon Hills Village Hall, Board Room
1 N. Prospect Ave., Clarendon Hills

Lake County - Thursday, November 3rd
4:00 - 7:00 pm
Grayslake Village Hall, Board Room
10 S. Seymour, Grayslake

Will County - Thursday, November 3rd
4:00 - 7:00 pm
Joliet City Hall, Council Chambers
150 W. Jefferson St., Joliet

City of Chicago - Thursday, November 3rd
4:00 - 7:00 pm
Metra Headquarters
547 W. Jackson Blvd., Chicago

CTA

City of Chicago (West Side) - Wednesday, November 2nd
6:00 pm
Westinghouse College Prep
3223 W. Franklin Blvd, Chicago

City of Chicago (West Loop) - Monday, November 7th
6:00 pm
CTA Headquarters
567 W. Lake St., Chicago

City of Chicago (South Side) - Thursday, November 10th
6:00 pm
Kennedy King College
6301 S. Halsted St., Chicago

Exhibit 9-2.2: **RTA 2012 Budget Hearings**

The Regional Transportation Authority (RTA) hosted its final public budget hearings for the 2012 budget in December of 2011. The budgets for the CTA, Metra and Pace were reviewed and a general outlook for the transit system and key agency initiatives were presented. Attendees had the opportunity to participate in a Q&A session where RTA staff received comment and responded to questions.

SCHEDULE OF BUDGET HEARINGS

Cook County (South) - Monday, December 5th
5:30 pm
South Suburban Mayors & Managers
1906 W. 174th St., East Hazel Crest

Cook County (North) - Tuesday, December 6th
5:00 pm
Pace Headquarters, Board Room
550 W. Algonquin Rd., Arlington Heights

Kane County - Tuesday, December 6th
6:00 pm
Centre of Elgin, Pioneer Room
100 Symphony Way, Elgin

Will County - Tuesday, December 6th
4:30 pm
Joliet City Hall, Conference Room 1
150 W. Jefferson St., Joliet

Lake County - Thursday, December 8th
6:00 pm
University Center of Lake County
1200 University Center Dr., Grayslake

Cook County (City of Chicago) - Friday, December 9th
2:00 pm
RTA Headquarters, Board Room
175 W Jackson Blvd., Suite 1650, Chicago

DuPage County - Monday, December 12th
6:00pm
DuPage County Bldg., Auditorium
421 N. County Farm Rd., Wheaton

McHenry County - Monday, December 12th
5:30 pm
Woodstock Administration Bldg., Conference Room A
667 Ware Rd., Woodstock

Glossary

Accessible—As defined by FTA, a site, building, facility, or portion thereof that complies with defined standards and that can be approached, entered, and used by persons with disabilities.

Accessible Service—A term used to describe service that is accessible to non-ambulatory riders with disabilities. This includes fixed-route bus service with wheelchair lifts or dial-a-ride service with wheelchair lift-equipped vehicles.

ADA (The Americans with Disabilities Act of 1990)—This federal act requires changes to transit vehicles, operations and facilities to ensure that people with disabilities have access to jobs, public accommodations, telecommunications, and public services, including public transit.

ADA Paratransit Service—Non-fixed-route paratransit service utilizing vans and small buses to provide prearranged trips to and from specific locations within the service area to certified participants in the program.

Administration Expenditure—Expenditures for labor, materials and fees associated with general office functions, insurance, safety, legal services, and customer services.

Agency Fund—This fiduciary fund accounts for the assets held by the RTA in a trustee capacity or as an agent for the CTA, Metra, and Pace, rather than for the RTA's own programs. (Of the four types of fiduciary funds [Agency funds, pension (and other employee benefit funds), investment trust funds, and private-purpose funds], the RTA uses only the first two.)

Ambulatory Disabled—A person with a disability that does not require the use of a wheelchair. This would describe individuals who use a mobility aid other than a wheelchair or have a visual or hearing impairment.

Appropriation—A legal procedure that permits a specified amount of funds for a given operating or capital purpose to be expended; the RTA appropriates funds for expenditures.

ASA/AFA—State-authorized assistance. Additional State Assistance (ASA) and Additional Financial Assistance (AFA) are issued for SCIP bonds (see SCIP bonds).

Balanced Budget—A budget in which expected revenues equal expected expenses during a fiscal period.

Bond Refinancing/Refunding—is the payoff and reissuance of bonds, to obtain better interest rates and/or bond conditions which results in the defeasance of the old debt.

Budget—Funds allocated by the RTA Board for a particular purpose; each year the RTA Board approves a budget document for the following year. Funds are allocated either by "programming" them or by "appropriating" them.

Budget Marks—The Regional Transportation Authority Act, as amended in 1983, requires the RTA to advise each of its Service Boards by September 15 of each year of its required revenue recovery ratio for the subsequent year, and the public funding estimated to be available for the next three years. These figures are referred to as budget marks.

Bus Bunching—A traffic scenario in which more than one bus arrives at the same time. This phenomenon is a subject of several CTA initiatives aimed at reducing service problems through improved field management of traffic and schedules.

Bus Rapid Transit (BRT)—BRT combines the quality of rail transit and the flexibility of buses. It can operate on exclusive transit ways, High Occupancy Vehicle (HOV) lanes, expressways, or ordinary streets. A BRT system combines intelligent transportation systems technologies, priority for transit, cleaner and quieter

vehicles, rapid and convenient fare collection, and integration with land use policies.

Capacity Utilization—The percentage of seats occupied in a train or bus at a given point in time.

Capital—Funds that finance construction, renovation, and major repair projects or the purchase of machinery, equipment, buildings, and land.

Capital Expenditure—Expenditures that acquire, improve, or extend the useful life of any item with an expected life of three or more years and a value of more than $5,000, e.g., rolling stock, track and structure, support facilities and equipment, and stations and passenger facilities.

Car Mile or Vehicle Mile—A single bus, rapid transit car, or commuter rail car traveling one mile.

Circuit Breaker Program—The Illinois Department on Aging's Circuit Breaker program provides assistance to low income senior citizens and persons with disabilities. Illinois residents with a qualifying disability who meet the income eligibility requirements of the Circuit Breaker program are eligible for free rides on regularly scheduled fixed-route public transit service.

CMAP (The Chicago Metropolitan Agency for Planning)—Formed in 2005, CMAP integrates planning for land use and transportation in Northeastern Illinois. The new organization combined the region's two previously separate transportation and land-use planning organizations -- Chicago Area Transportation Study (CATS) and the Northeastern Illinois Planning Commission (NIPC) -- into a single agency.

CMAQ (Congestion Mitigation/Air Quality) Grant—A federal grant program designed to support transportation projects that reduce traffic congestion, and/or improve air quality.

Cost per Mile—Operating expense divided by vehicle miles for a particular program or in total.

Cost per Passenger—Operating expense divided by ridership for a particular program or in total.

CTA (Chicago Transit Authority)—The CTA operates bus and rapid transit service in the City of Chicago and several suburbs. The CTA was created by state legislation and began operations in 1947.

Deadhead—The time when a transit vehicle is traveling toward a yard, shop, or the start of a run but is not in revenue service. Car miles include dead-head miles.

Debt Service—The payment of interest on and the repayment of principal on long-term borrowed funds according to a predetermined payment schedule.

Defeasance of Bonds—a technique used to discharge older high-rate debt prior to maturity with new securities bearing lower interest rates.

Depreciation—Expiration in the service life of fixed assets, other than wasting assets, attributable to wear and tear, deterioration, action of the physical elements, inadequacy, and obsolescence. The portion of the cost of a fixed asset, other than a wasting asset, charged to expense during a particular period.

Dial-A-Ride Service—Paratransit service that requires the user to call ahead and schedule service.

Discretionary Funds—Funds that the RTA allocates, at its discretion, to the Service Boards. These funds include the PTF and a portion of the 15% of the RTA Sales Tax.

Elderly—A term used to describe individuals who are 65 years of age or older. This age is used to qualify for the RTA Senior Citizen Reduced Fare Card. Note that some paratransit services define elderly individuals at an age other than 65.

Express Bus (or route)—A suburban or intercity bus that operates a portion of its route without stops or with a limited number of stops.

Favorable Performance—In a comparison of actual results to budgeted levels, favorable performance describes the situation in which expenditures are less than budget or revenue exceeds budget.

Farebox Revenue—Revenue obtained from passengers.

Fares—The amount charged to passengers for use of various services.

Feeder Bus Services—Pace bus routes that serve Metra stations.

Financial Plan—In addition to an annual budget, the RTA Act, as amended in 1983, requires the RTA and its Service Boards to develop a financial plan for the two years subsequent to the upcoming budget year. In combination with the annual budget, this provides a three-year projection of expenses, revenues, and public funding requirements.

Fiscal Year—The calendar year is the fiscal year for the RTA, CTA, Metra, and Pace. The fiscal year of the State of Illinois extends from July 1 through June 30 of the following year. The fiscal year of the federal government extends from October 1 through September 30 of the following year.

Fixed-Route Service—Buses that operate according to fixed schedules and routes.

Flexible Funds—Federal funds made available by TEA-21 that can be used for various transportation projects, including both highway and mass transit projects. Allocation of these funds is at the discretion of state and local agencies.

Fringes (Fringe Benefit Expenditures)—Pay or expenditures to or on behalf of employees in addition to salaries and wages, including sick pay, vacation pay, pension contributions, life and health insurance, unemployment and workers' compensation, social security costs, and other programs.

FTA (Federal Transit Administration)—The FTA is the federal agency that helps cities and communities provide mobility to their citizens. Through its grant programs, FTA provides financial and planning assistance to help plan, build, and operate rail, bus, and paratransit systems. Since 1988, the only FTA funding available to the RTA has been for capital projects.

Full Funding Grant Agreement (FFGA)—The FTA is required to use a FFGA to prove financial assistance for new start projects. The FTA also has the discretion to use an FFGA in awarding federal assistance for other major capital projects. The FFGA defines the project, including cost and schedule; commits to a maximum level of federal financial assistance (subject to appropriation); establishes the terms and conditions of federal financial participation; covers the period of time for completion of the project; and helps to manage the project in accordance with federal law. The FFGA assures the grantee of predictable federal financial support for the project (subject to appropriation) while placing a ceiling on the amount of that federal support.

Full-Time Equivalent Position (FTE)—A measurement equal to one staff person working a full-time work schedule for one year.

Fund Balance—The cumulative difference between revenues and expenses over the life of a fund. The excess of funding over deficit for a given period of time. In this document, the fund balance refers to the unreserved/undesignated funds in the Agency and general fund.

Funding Formula—A specific formula used to determine a subsidy level.

General Long Term Debt Account Group (GLTDAG)—This account group is not a fund but a separate list of certain long-term liabilities of the general government. Debt normally is recorded at its face value, without premium or discount. Additions to and deletions from GLTDAG are disclosed in the notes to the financial statements

General Fund—The operating fund that is used to account for all financial resources and normal recurring activities except for those required to be accounted for in another fund.

General Obligation Bonds (GO Bonds)—are bonds that are legally backed by the full faith, and credit of the issuing government. The government is legally obligated

to use its full taxing power, if necessary, to repay the debt.

Gross Domestic Product (GDP)—Reported by the Bureau of Economic Analysis, this measure of economic activity is the sum of the market values of all of the final goods and services produced in the United States in a year.

Grants—Moneys received from local, federal, and state governments to provide capital or operating assistance.

Headway—The time span between service vehicles (bus or rail) on a specified route.

Illinois FIRST—A group of legislation passed by the Illinois Legislature to fund capital improvements for the state's infrastructure, roads, schools, and transit.

Infrastructure—The physical assets of the RTA system, e.g., rail lines and yards, power distribution, signaling, switching, and communications equipment, passenger stations, information systems, and roadways, upon which the continuance and growth of transit depend.

In-Kind Service—These services are provided at no cost to a Service Board. For example, the City of Chicago provides free of charge dedicated security forces to the CTA.

Innovation, Coordination and Enhancement (ICE) Fund—A fund created to award grants to the Service Boards, transportation agencies, and local governments, for short-term, lower-cost projects and service enhancements.

Intelligent Bus System (IBS)—A bus communications system that uses advanced technology to monitor and improve performance on various levels. Pace's new bus communications system includes radio voice and data communications, Computer-Aided Dispatching (CAD) and Global Positioning System (GPS)-based Automatic Vehicle Location (AVL) functions.

Intelligent Transportation Systems (ITS)—The application of advanced sensor, computer, electronics, and communication technologies and management strategies in an integrated manner to increase the safety and efficiency of the surface transportation system. ITS is a national effort designed to promote the use of advanced technologies in multimodal transportation.

Interest—The charge for borrowing money, typically expressed as an annual percentage rate.

ISTEA (Intermodel Surface Transportation Efficiency Act of 1991)—ISTEA amended the Federal Transit Act introducing new sources of flexible funds and increasing the funding authorized for public transit.

JARC (Job Access Reverse Commute)/New Freedom— JARC is a federally funded program that provides operating and capital assistance for transportation services planned, designed, and carried out to meet the transportation needs of eligible low-income individuals and of reverse commuters regardless of income. The New Freedom program provides new public transportation services and public transportation alternatives beyond those required by the Americans with Disabilities Act (ADA).

Joint Self Insurance Fund (JSIF)—The RTA provides excess liability insurance to protect the self-insurance programs maintained by the CTA, Metra, and Pace. The Service Boards are obligated to reimburse the JSIF for any damages paid plus a floating interest rate.

Labor Expenditure—The cost of wages and salaries (including overtime) to employees for the performance of their work.

Line Item—An appropriation that is itemized on a separate line in a budget.

Linked Trip—A single, one-way trip without regard for the number of vehicles boarded to make the trip (e.g., a home-to-work trip taken by boarding a bus, to a train, to another bus represents one linked trip or three unlinked trips).

Maintenance Expenditure—Expenditures for labor, materials, services, and equipment used to repair and service transit and service vehicles and facilities.

Metra—The Commuter Rail Division of the RTA responsible for all rail public transit service with the exception of those services provided by the CTA. Metra was created in 1983 by an amendment to the RTA Act.

Mobility Limited—An individual who has a physical impairment, including impaired sensory, manual, or speaking abilities that result in functional limitations.

Modified Accrual Basis—A type of accounting whereby revenue and other financial resource increments (e.g., bond issue proceeds) are recognized when they become both "measurable" and "available" for finance expenditures of the current period. "Available" means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures (e.g., debt service payments and a number of specific accrued liabilities) are only recognized when payment is due because it is only at that time that they normally are liquidated with expendable available financial resources.

Moving Beyond Congestion—In 2008 jointly with the Chicago Transit Authority, Metra and Pace, the Regional Transportation Authority lead a strategic planning effort to maintain, enhance and expand the Northeastern Illinois region's transit system and to solve the current transit funding challenge, ensure financial viability and accountability, and meet the region's growing and changing transportation needs.

Net Results—The difference between total revenue (including public funding) and total expenses. Sometimes referred to as the "change in fund balance."

New Initiative—A new program or service that the RTA may approve separately from the Agency's or a Service Board's regular budget. The RTA may attach special criteria to measure the success of a new initiative.

Non-Ambulatory Disabled—A person who has a disability that requires use of a wheelchair.

Operating Assistance—Financial assistance for transit operations (as opposed to capital) expenditures. Such aid may originate with federal, state, or local governments.

Operating Budget—The planning of revenue and expenditures for a given period of time to maintain daily operations.

Operating Deficit—For a particular Service Board, the difference between system-generated revenues and system operating expenses. The deficit is sometimes referred to as the "public funding requirement." The RTA's current practice is to provide operating funds to each Service Board equivalent to their budgeted deficit for the year as opposed to the actual deficit. For the RTA, its deficit or surplus equals total revenues (sales tax, PTF, interest, and other income) less operating funding, debt service, technology, and capital funding (RTA capital and RTA discretionary funding of Service Board capital).

Off-Peak—Non-rush hour time periods.

Pace—The Suburban Bus Division of the RTA responsible for all non-rail suburban public transit service with the exception of those services provided by the CTA. On July 1, 2006, Pace assumed operating responsibility for all ADA paratransit service in the RTA region. Pace was created in 1983 by an amendment to the RTA Act.

Paratransit Service—Any transit service that is not conventional fixed-route bus or rail service, including Dial-a-Ride, fixed-route deviation, shared-ride taxicab, and vanpool services.

Passenger Mile—A single passenger traveling one mile.

Peak Period—Morning or evening rush hour.

Principal—The amount borrowed or the amount still owed on a loan, separate from the interest.

Positive Budget Variance (PBV)—Calculated as the difference between a Service Board's budgeted and actual deficit, a positive budget variance results when the actual deficit is less than budgeted. Since the RTA funds the budgeted deficit, a PBV represents available funds for the Service Boards.

Program (verb)—To commit funds, for a given capital purpose, without necessarily appropriating these funds for expenditure. When the RTA Board passes its official budget document, certain funds are "programmed" so that they may be obligated (i.e., contracts signed) during the upcoming year; these funds may be expended during the upcoming or subsequent years.

Program (noun)—Groupings of expenditure accounts with related expenditures (e.g., operations, maintenance, administration, and capital program).

Public Transportation Fund(s) (PTF) —Each month the state transfers from its General Revenue Fund an amount equal to 30% of the RTA Sales Tax collected in the previous month.

Public Funding—Funding received from the RTA. Generally refers to funding for Service Board operating expenditures.

Purchase of Paratransit Service—The amount of money paid to contractors to provide door-to-door transportation to certified participants in the ADA paratransit service program.

Recovery Ratio—System-generated revenues divided by system operating expenditures with exclusions as allowed by the RTA Act. This ratio is calculated for each of the Service Boards and for the RTA region as a whole. The RTA Act mandates that the RTA region attain an annual recovery ratio of at least 50% for mainline service. For ADA paratransit service, the Act requires a 10% recovery ratio.

Reduced Fares—Discounted fares for children age 7-11, grade and high school students (with CTA ID), seniors 65 and older (with RTA ID), and riders with disabilities (with RTA ID) except paratransit riders.

Revenue Car Mile—Car mile during which the vehicle is in revenue service (i.e., picking up and/or dropping off passengers).

Reverse Commute—City-to-suburb commute. This phrase refers to the fact that most riders commute from the suburbs to the city.

Ridership (unlinked passenger trips)—Each passenger counted each time that person boards a vehicle.

Rolling Stock—Public transportation vehicles including commuter rail cars, locomotives, rapid transit cars, buses, and vans.

RTA Sales Tax (PART I)—1% in Cook County, 0.25% in the collar counties of DuPage, Kane, Lake, McHenry and Will. 85% of the sales tax is fully distributed to the Service Boards by the RTA according to formulas established by the RTA Act. 15% of the sales tax is retained by the RTA, a portion of which is distributed to the Service Boards at the RTA's discretion.

SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users)—Signed into law on August 10, 2005, this legislation provides $286.4 billion in guaranteed funding for federal surface transportation programs through federal fiscal year (FFY) 2009 of which $52.6 billion is for federal transit programs over six years.

SCIP (Strategic Capital Improvement Program) Bonds—The RTA was authorized under the RTA Act to issue $500 million of bonds for public transportation projects approved by the Governor of the State as part of the RTA's Strategic Capital Improvement Program (SCIP). Effective January 1, 2000, the Act was amended to authorize the RTA to issue an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004.

Series B Bonds—State Transportation Bonds used as all or a portion of the local share required to match federal funds for public transportation capital projects.

Service Boards—The term refers to the region's three transit operators: CTA, Metra and Pace.

Signal Priority—Transit signal priority either gives or extends a green signal to transit buses under certain circumstances to reduce passenger travel times,

improve bus schedule adherence, and reduce bus operating costs.

Special Service—A transportation service, as defined by the FTA, specifically designed to serve the needs of persons who, by reason of disability, are unable to use mass transit systems designed for the use of the general public.

State Financial Assistance (SFA)—Subject to appropriation by the State, this assistance reimburses the debt service expenses of the RTA's Strategic Capital Improvement Program (SCIP) bonds.

Statutory Funds Designated for Capital or Transfer Capital—The difference between a Service Board's statutory funding and its budgeted or actual deficit, whichever is greater. These funds, which are over and above operating needs, are generally used for capital purposes. Metra is the only Service Board that has generated statutory funds for capital in more than a decade.

Subscription Service—Special services for users who ride on a frequent and regular basis and follow a prescribed schedule (a minimum of three times per week between the same origin and destination).

Subsidy—Funds received from another source that are used to cover the cost of a service or program that is not self-supporting.

System-Generated Revenue (Total Operating Revenue) —Total revenue generated from operations includes farebox revenue, local subsidies, state fare subsidies, advertising, interest and all other income (excludes RTA and federal subsidies).

Taxi Access Program (TAP)—Certified participants in the ADA paratransit service program can purchase taxi vouchers valued at up to $13.50 at a reduced price of $5.00 to pay for one-way taxi rides that originate within the City of Chicago.

TEA-21 (The Transportation Equity Act for the 21st Century)— Signed into law on June 9, 1998, this legislation provided a six-year reauthorization of the federal transit program and the necessary contract authority needed to fully fund the fiscal year 1998 obligation limitations contained in the fiscal year 1998 Department of Transportation Appropriations Act.

T-FLEx (Transit Finance Learning Exchange)—A strategic alliance of transit agencies formed to leverage mutual strengths and continuously improve transit finance leadership, development, training practices, and information sharing. Its purpose is to transform the finance function into a value-added business partner within each transit authority. Members meet twice annually in a facilitated workshop environment to develop and share best practices in active roundtable work sessions.

Transit Priority Initiatives— In 2011, the RTA launched a series of five key priority initiatives intended to advance a collective vision for the region's transit system.

TOD (Transit-Oriented Development or Transit-Oriented Design) — Mixed use development of residential, office and retail uses within walking distance of a transit station or bus route.

Total Vehicle Miles—The sum of all miles operating by passenger vehicles, including mileage when no passengers are carried.

Unreserved Fund Balance—The balance of funds that have not been reserved, designated or programmed into the budget, financial plan, or capital program.

Vanpool—Pace's VIP (Vanpool Incentive Program) is a service where a group of 5 to 15 people commute to and from work together in a Pace-owned van.

Supplemental Data

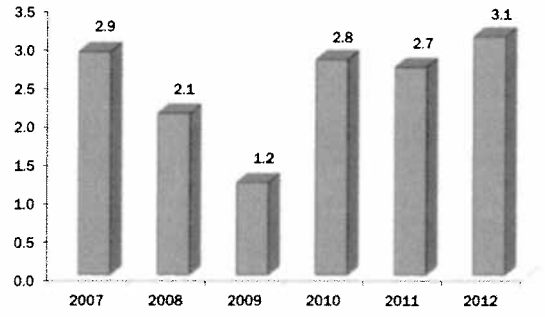
National Economic Projections

The Gross Domestic Product (GDP) is the value of the output of goods and services produced by labor and property located in the United States. Exhibit 9-3 highlights the annual real GDP growth from 2007 through 2012. GDP grew 2.9% in 2007, only to fall in 2008 and again in 2009. GDP growth increased from 1.2% in 2009 to 2.8% in 2010. GDP growth slowed slightly in 2011 to 2.7%, but overall remained stable. The Congressional Budget Office (CBO) expects GDP growth to increase in 2012 to 3.1 percent.

Exhibit 9-4 shows the U.S. annual unemployment rate from 2007 through 2012. The annual average unemployment rate was 4.6% in 2007, and then increased to 5.8% in 2008. The national unemployment rate climbed to 9.3% in 2009 and reached a high of 9.6% in 2010. The unemployment rate fell in 2011 to 8.9%. It is expected to remain around 9.0% in 2012 according to the CBO.

Exhibit 9-5 shows the annual growth of the U.S. Consumer Price Index (CPI) from 2007 to 2012. The CPI annual growth increased from 2.8% in 2007 to 3.8% in 2008. CPI decreased in 2009 to negative 0.4%. Positive growth returned in 2010 and the CPI grew by 3.2% in 2011. CPI is expected to continue to grow by 2.7% in 2012.

Exhibit 9-3: **U.S. Real Gross Domestic Product** (percent change)



Source: US Department of Commerce, Congressional Budget Office

RTA Region

The following sections summarize population and employment trends in the six-county RTA region. These trends have a significant impact on public transportation ridership, as well as sales tax revenue.

POPULATION

As shown in Exhibit 9-6, the population of the RTA region grew by 2.8% (from 8.1 million to 8.3 million) between 2000 and 2010. Population growth in the RTA region grew at a slower pace than the overall population of the United States, which increased by 9.7% during this period.

Since 2000, most of the region's population growth has occurred in the collar counties. Exhibit 9-7 illustrates the annualized population growth rates for each of the region's six counties between 2000 and 2010. The highest growth rate occurred in Will County, where the population has increased at an annual

Source: United States Census Bureau

rate of 3.4%. The population of Kane and McHenry counties grew at annual rates of 2.7% and 1.9%, respectively, while the population of Lake and DuPage counties increased at annual rates of 1.0% and 0.2%, respectively. Cook County experienced a population decline at an annual rate of 0.4%. During the 10-year period, the population of the entire RTA region grew at an annual rate of 0.3%.

In 2010, Cook County accounted for 62% of the 8.3 million people living in the RTA region. DuPage County's population comprised 11% of the region, followed by Lake County and Will County (8% each), Kane County (6%), and McHenry County (4%). The population distribution for 2010 is illustrated in Exhibit 9-8.

EMPLOYMENT

Exhibit 9-9 provides a comparison of the national unemployment rate, the unemployment rate in the State of Illinois, and the unemployment rates in each of the counties of the RTA region from 2008 to 2012. Between 2008 and 2012 the unemployment rate in Illinois increased from 6.5% to 9.4%. In 2010, the unemployment rate reached 10.3% in Illinois, 0.7 percentage points higher than the national unemployment rate of 9.6%. Illinois is beginning to show some signs of a modest recovery. In January 2012 the unemployment rate of 9.4% was 0.4 points lower than in 2011. However, Illinois' unemployment rate in January 2012 was still 1.1 percentage points higher than the national average.

In January 2012, the Illinois state-wide unemployment rate was lower than all of the counties in the RTA region except DuPage County. Among the six counties in the RTA region, DuPage County's unemployment rate of 7.6% was the lowest in the region, while Lake County's rate of 10.7% was the highest in the region. Suburban jurisdictions have led the region in labor force growth since 1990. In 2000, employment in the five collar counties accounted for 35.8% of the RTA region's total. Cook County, which accounted for 64.2% of the region's employment in 2000, accounted for 60.4% of employment in 2010. Regional employment

has increased 1.6% from 4.2 million in 2000 to 4.3 million in 2010 (Exhibit 9-10).

The trends in employment by economic sector in the RTA region are illustrated in Exhibit 9-11. The Manufacturing sector experienced the greatest loss during the 2000 to 2010 period while the Health Care and Social Assistance sector experienced the greatest increase in employment. In 2010, State and Local Government (13.6%), Professional and Business Services (11.7%), Health Care and Social Assistance (11.5%), Retail Trade (10.1%), Leisure and Hospitality (9.1%) and Manufacturing (8.1%) made up the largest share of employment in all industries.

The RTA region has experienced steady growth in per capita personal income. Within the region, per capita personal income was higher than the US average in Cook, DuPage, and Lake Counties. Lake and DuPage had the highest levels of per capita personal income in the six county region in 2009, while Kane and McHenry had the lowest, as illustrated in Exhibit 9-12.

SALES TAX TRENDS

In April 2008, the RTA sales tax increased from the equivalent of 1.0% on retail sales in Cook County and 0.25% on retail sales in the collar counties to the equivalent of 1.25% on retail sales in Cook County and 0.5 % percent on retail sales in the collar counties. Also in 2008, an additional real estate transfer tax of three tenths of one percent was imposed in the City of Chicago to fund the CTA. Sales tax collections grew from $650 million in 2000 to $931 million in 2010. Between 2000 and 2003, sales tax collections fluctuated between $650 and $655 million. From 2004 to 2006, sales tax collections increased from $676 million to $747 million. In 2008, sales tax collections increased 22.4% from $753 million to $921 million, due to the April 2008 sales tax increase. In 2009, largely due to the economic recession, the sales tax collections decreased 3%. However, sales tax increased 4% in 2010 to $931 million, exceeding sales tax collections from 2008 (Exhibits 9-13 and 9-14).

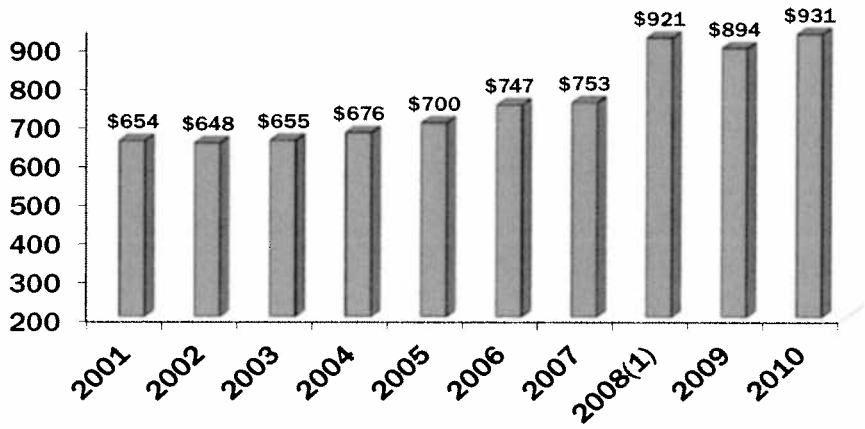
Exhibit 9-14: **Sales Tax Collections 2001-2010** (dollars in millions)



RIDERSHIP TRENDS

Total RTA ridership in 2001 was 601 million despite a decline in Pace ridership during this period. Reflecting the overall downturn in the economy, total RTA ridership declined in both 2002 and 2003. Metra and Pace lost riders in 2002 and all three Service Boards lost riders in 2003 versus 2002. Regional ridership changed little from 2003 to 2004 reflecting stagnant ridership on all three Service Boards. In 2005, however, all three Service Boards achieved significant ridership gains as the economy rebounded and gas prices climbed. Regional ridership continued to grow in 2006 and 2007. In 2008 ridership grew 4.9% representing the largest percentage of growth in the past ten years. In 2009, ridership decreased 2.3%, the most in the past ten years, as each Service Board experienced a decline in ridership. The system continued to lose ridership in 2010, but at a much slower rate than in 2009. Ridership bounced back in 2011 to 647 million riders, just 1.0% below 2008 ridership levels (Exhibits 9-15 and 9-16).

As demonstrated in Exhibit 9-17, regional ridership trends closely with regional jobs. A correlation analysis of the 12-month moving average number of jobs, versus the 12-month moving average of ridership confirmed that there is a strong positive correlation between ridership growth and job growth during periods of increasing job growth. During times of job decline the results are more mixed, with a strong positive correlation occurring between July 2001 and August

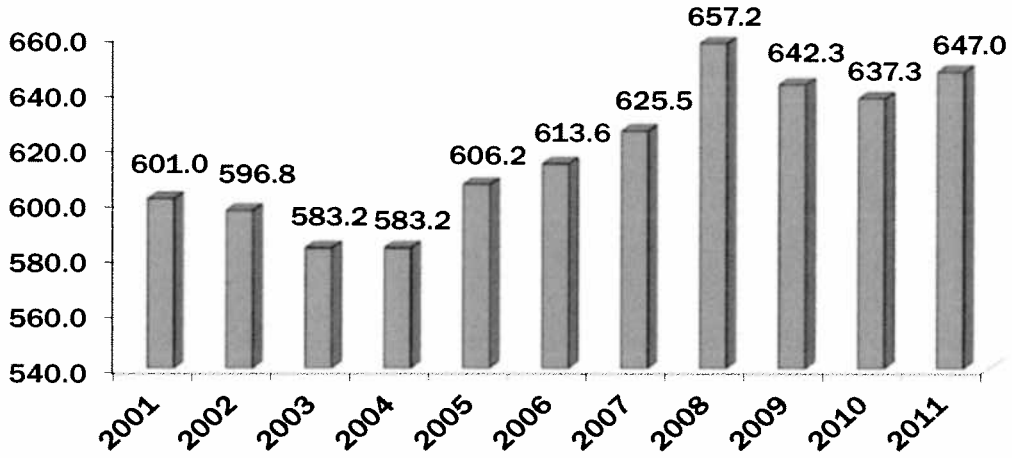
Exhibit 9-16: **RTA Ridership** (in millions)



2004, but no correlation was observed in the period between July 2008 and December 2010, where steep job declines occurred as a result of the financial crisis. Regional fuel prices have an impact on ridership as well. Potential riders are attracted to public transportation as increases in the cost of fuel make driving less economical. The average price for a gallon of gas in the region in 2011 was $3.94 per gallon, $0.80 higher than in 2010 (Exhibit 9-18).

OTHER TRENDS

Service Board Expenditures (Exhibits 9-19 and 9-20) show a steady increase each year from 2001 to 2011. Expenditures increased at a compound annual growth rate of 4.6% during this period. Service Board farebox revenues increased at a compound annual growth rate of 2.9% between 2001 and 2011 (Exhibits 9-21 and 9-22).

SYSTEM CHARACTERISTICS

Other Funding			
Budget/Plan Balancing Actions (4)	-	2,550	6,797
Total Other Funding	**-**	**2,550**	**6,797**
Total Funding for Operations	**115,000**	**123,300**	**133,585**
Net Results	**0**	**0**	**0**

(1) Funds that exceed the operating deficit of a Service Board (except for ADA Paratransit service) are retained by the Service Board and reserved for the capital program unless approved for operating use by the RTA Board. (2) Capital Cost of Contracting for rolling stock. (3) The negative result in 2014 will be handled with budget balancing actions that may include service adjustments, a fare increase, cost efficiencies, or additional revenue. (4) Unspecified revenue (fares, State or RTA funding sources) included in 2013 and 2014 to balance the budget.

Schedule I-C

Recovery Ratio %

	2012 Budget
CTA	
Recovery Ratio %	52.0%
Metra	
Recovery Ratio %	53.0%
Pace Suburban Service	
Recovery Ratio %	30.0%
Total System-Generated Revenue Recovery Ratio %	51.0%
Pace ADA Paratransit	
Recovery Ratio %	10.0%

The RTA Act allows certain expenditures to be excluded from the recovery ratio calculation including security, depreciation, CTA's pension obligation bonds, and facility leases. Metra's calculation includes capital farebox revenue. The total system-generated revenue recovery ratio includes a statutory expense credit of $40 million.

Joseph G. Costello
Executive Director

Letter from the Executive Director

2012 marked a promising year of ridership growth and expense stability in our regional transportation system. The RTA system will finish the year with the highest level of ridership in over 20 years; ridership growth that had stalled and dipped following the financial crisis of 2008 began to trend upward again in 2011 and 2012 as the economy slowly improved. High gasoline prices further encouraged people to consider use of public transportation and leave their cars at home. In 2012, annual ridership is projected to reach 663.4 million trips, an increase of 11% over the year 2000. The year was capped by the successful conclusion of labor negotiations with the CTA's trade and operating unions, agreements that will help reduce the long-term trajectory of expense growth in the region.

The RTA has continued to work collaboratively with the Service Boards on the Regional Priorities Initiative – a strategic focus on improvements in efficiency and service enhancements for our customers. The first ever region-wide customer satisfaction survey, completed in 2011, told us that riders place a high priority on safety, customer information and communications, and knowledgeable employees able to assist them. These customer priorities represent key goal areas for the Service Boards and RTA operating programs. Advancements are occurring on regional trip planning technology and real-time travel information, interagency signage at key connection points between the CTA, Metra, and Pace, a new fare payment system on the CTA and Pace that will improve flexibility and convenience, a capital prioritization tool that will assist in the selection of capital investments to advance the system's State of Good Repair and reduce operating costs, expansion of the successful Bus on Shoulder program on the I-55/Stevenson Expressway, and development of transit signal priority treatments for appropriate bus corridors. Ongoing capital investments in rolling stock and infrastructure have contributed to the modernization of our system and improved the riding experience for our customers.

For the second year in a row, the Service Boards' operating budgets do not borrow from capital to fund operating programs, a mark of progress in fiscal responsibility and sustainability. Yet, the modest and halting pace of the economic recovery has created a challenging operating environment. The budgets of CTA and Metra incorporate reductions in the discounts for multi-trip fare instruments to achieve balanced budgets. The RTA continues to pursue funding for capital needs, our greatest single challenge at this point, as we strive to bring our aging infrastructure toward a State of Good Repair. The RTA has also initiated a study to review the allocation of public funding, to ensure that operating and capital funding is distributed equitably among the Service Boards.

The 2013 business plans represent the dedicated efforts of the Service Boards and RTA to move the region forward in a positive direction of cost containment, modernization, and responsiveness to customer priorities.

Sincerely,

Joseph G. Costello

Executive Director, Regional Transportation Authority

Regional Transportation Authority

Guide

The outline below is presented as a guide to the organization of the RTA 2013 Budget, Two-Year (2014-2015) Financial Plan, and Five-Year (2013-2017) Capital Program. The information provided reflects the Region's funding and service conditions when the RTA Board adopted Ordinance 2013-01 on January 16, 2013, which approved the 2013 budgets and 2014-2015 financial plans of the Service Boards, the Agency, and the Region as a whole. The funding "marks" (public funds to cover operating deficits) for each Service Board were set on October 10, 2012. The Service Boards include the Chicago Transit Authority (CTA), Metra commuter rail, Pace Suburban Bus Service, and Pace Regional ADA Paratransit service. The book is divided into the following 10 chapters.

1. **Introduction** provides a guide to the overall structure of this document, a regional economic outlook, the RTA's strategic plan, vision and goals, critical developments and key budget issues in 2013, a governance section that includes the budget process, financial policies, the 2013 budget ordinance (2013-01), and the 2012 GFOA Distinguished Budget Presentation Award.

2. **Regional Summary** provides a snapshot of the consolidated regional budget for RTA, CTA, Metra, and Pace.

3. **RTA** is divided into three major sections: RTA Operating Plan (sources and uses of RTA operating funds); Agency Operating Plan (budget and financial plan of the RTA Agency); and Reference (RTA bonds and fund types).

4. **CTA** provides information about the service characteristics, operating plans, budget and financial plan details, and organizational structure of the CTA.

5. **Metra** provides information about the service characteristics, operating plans, budget and financial plan details, and organizational structure of Metra.

6. **Pace Suburban Service** provides information about the service characteristics, operating plans, budget and financial plan details, and organizational structure of Pace Suburban Service.

7. **Pace Regional ADA** provides information about the service characteristics, operating plans, budget and financial plan details, and organizational structure of Pace ADA Paratransit Service.

8. **Performance Measures** provides an introduction to the regional goals and objectives for the RTA Region, an overview of the five major areas of performance analysis which chart achievement of these goals, and the newly implemented RTA Agency measures.

9. **Capital** provides an overview and details of the capital program of each of the Service Boards (CTA, Metra, and Pace) and the capital impact on operations.

10. **Appendices** include the budget call calendar, budget hearing schedule, glossary, and supplemental ridership, sales tax, demographic data, and schedules for the 2013 budget ordinance.

Regional Economic Outlook

2012 marked a promising year of ridership growth and expense stability in the RTA Region. An improving economy has provided higher than budgeted funding levels and contributed to improved ridership.

In 2013, unemployment in the region is anticipated to remain high, but lower than what was experienced in 2012. The seasonally adjusted regional unemployment rate in December 2012 was 8.9%, an increase of 0.2 percentage points from the end of the third quarter. Compared to prior year, regional unemployment was 1.2 percentage points lower. The Congressional Budget Office (CBO) estimates that the 2012 national unemployment rate of 8.1% will drop 0.2 percentage points to 7.9% in 2013.

In 2013, the Regional Transportation Authority will be updating its strategic plan titled "The Way Forward".

Real Gross Domestic Product (GDP) in the Nation is expected to increase by 2.3% by the end of 2012 and in 2013 it is expected to increase another 1.4%. An analysis of National Gross Domestic Product and Regional Personal Income Growth can be found in the appendices of this document.

The price of fuel has a significant impact on the region's ridership. In December 2012 the average cost for a gallon of gas in the region was $3.46, about $0.78 lower than at end of the third quarter and $0.05 lower than in December of 2011.

In 2012, the RTA system provided 666 million rides. Significant ridership growth may have been partially impacted by favorable weather conditions in the beginning of the year. The first quarter average temperature in the region was nearly seven degrees warmer than the ten year average, resulting in higher than anticipated ridership results. In 2013, the Service Boards have budgeted for a combined 652 million rides, a 1.7% decrease in ridership over the 2012 estimate of 663 million, due to changes fare policies at the CTA and Metra, and a major reconstruction project planned on the southern branch of the CTA's Red Line.

Strategic Plan, Vision Statement, and Goals

In 2013, the Regional Transportation Authority will be updating its strategic plan. The current strategic plan, *"Moving Beyond Congestion,"* can be found on the RTA website along with an implementation update titled *"The Way Forward"* (available here: http://rtachicago.com/about-the-rta/strategic-plan.html). Revisions to the strategic plan will be based on customer input from a survey that was launched on December 19, 2012 and a series of workshops with RTA staff, the Service Boards, and regional stakeholders. The RTA received over 1,500 responses from members of the general public, stakeholders, and elected officials. The input from this survey is being used to help inform revisions to the Plan's Vision and Goals. The draft Vision and Goals are presented below.

OUR MISSION

The RTA will ensure financially sound, comprehensive, coordinated public transportation for the Northeastern Illinois Region.

OUR VISION

A world-class regional public transportation system that is socially, financially, and environmentally sustainable, providing a foundation for the region's prosperity.

OUR GOALS

- Provide valuable, accessible and attractive transportation options.
- Ensure financial viability.
- Promote a green, livable and prosperous region.
- Advocate for and be a trusted steward of public transportation.

OUR VALUES

Core values help us define our purpose and mission:

- **Accountability** - We will protect the public interest by ensuring financially sound, and quality public transportation.
- **Transparency** - We will communicate openly and honestly.
- **Innovation** - We will seek out and implement innovative solutions.
- **Collaboration** - We will engage our stakeholders and partners on a regular basis to advance common goals.
- **Integrity** - We carry out our mission in a manner that is fair, ethical and honest.

REGIONAL PRIORITIES

With limited resources and dire needs, all the region's efforts must be both strategic and focused. The RTA and Service Boards laid out the following regional priorities in 2011.

- **Strategic Capital Investment:** Reduce operating costs by identifying capital projects that reduce operating expenditures.
- **Economies of Scale:** Identify coordinated purchasing efforts with the Service Boards and other government agencies that achieve cost savings and improve efficiency.
- **Maximize Use of System:** Maximize the use of the existing system by better tapping travel markets that have potential to use transit and streamline coordinated services when and where the system is not functioning at capacity.
- **Enhanced Customer Experience:** Focus on targeted capital and technology-related projects in a coordinated fashion to modernize and enhance the customer experience through improved service performance and customer connections.
- **Coordinated Government Affairs, Marketing and Outreach:** Coordinate customer information and increase coordination and leveraging of partners and other stakeholders.

Critical Developments and Key Budget Issues

The RTA has identified several critical developments in the 2013 Budget, 2014-2015 Financial Plan and Five-year Capital Program.

FUNDING OPERATIONS WITHOUT CAPITAL TRANSFERS

In 2013 the RTA is pleased to report that the budgets submitted by each of the Service Boards do not rely on capital transfers to operations, for the second year in a row.

Long term disinvestment in the region's capital program has resulted in higher operating costs, and deferring investment in capital infrastructure results in higher replacement costs in the out years. In the 2011 Budget, the region's Service Boards planned to transfer more than $250 million from the capital program to operations in order to maintain fares and service levels. The CTA's budget included $113.2 million in transfers from capital to operations in 2011. Metra budgeted $60.0 million worth of transfers in 2011 and planned for transfers of $25.0 million in 2012 and 2013. Ultimately, in 2011, the Service Boards transferred a total of $95.0 million in federal capital funds to operations. Since then, the region has made great strides in its effort to curtail this unsustainable practice. In 2012, the Service Boards estimated that they would not need any transfers from capital to operations, and in 2013 the RTA is pleased to report that the budgets submitted by each of the Service Boards do not rely on capital transfers to operations, for the second year in a row.

SYSTEM RENEWAL BOND PROGRAM

Achieving a State of Good Repair (SGR) is the region's top priority. Maintaining bus and train infrastructure is essential to providing safe, reliable service. However, the level of capital investment necessary to achieve and maintain a SGR is massive and continues to grow.

The RTA's current projection of the amount of funds required to bring the region's assets to a SGR over the next ten years is $31 billion. Projected funding from the State and Federal government is expected to be less than what is necessary for required annual investments in system renewal. While the RTA and Service Boards work toward a long-term solution, the RTA continues to advance new and creative strategies to meet those challenges which affect the system today.

To that end, Chairman Gates and the RTA staff have proposed a $2.5 billion capital bond program dedicated to SGR, with bond debt service to be paid with RTA sales tax revenue. This program will go toward the renewal and rehabilitation of vehicles, track and structure, and customer-impacting transit facilities. By introducing this new bond program, the RTA could help close the capital funding gap and keep our backlog of capital needs from growing. To achieve this bond program, the RTA requires a change in State law to increase its bonding authority. Concurrently, the RTA has proposed a plan to streamline the Service Board funding formula, resulting in a more transparent regional allocation of public funds for operating and capital support.

CTA FARE POLICY ADJUSTMENT

In 2013, the CTA is reducing the discounts that they currently provide on all pass options. The 1-Day Pass will increase from $5.75 to $10.00. The 3-Day Pass will increase from $14 to $20, the 7-Day Pass will increase from $23 to $28, and the 30-Day Pass will increase from $86 to $100. Additionally, the CTA will increase their reduced fare passes, bringing them in line with the statutorily intended level of 50% of full fare. Student fare prices will decrease about 12%, and in mid-2013 the CTA will impose a $2.75 surcharge for individuals that purchase a full fare card at the O'Hare Blue Line station. Otherwise, base fare prices for both rail and bus will remain unchanged. These pricing adjustments are expected to increase CTA's average passenger fare by $0.14 in 2013, resulting in $62.3 million of additional passenger revenue.

METRA FARE POLICY ADJUSTMENT

Metra's Board approved a change to the 10-ride ticket policy as part of the 2013 Budget. The new price of a ten-ride will be equal to ten full rides. There will no longer be a one-ride discount embedded in the price. Roughly 25% of Metra customers use the 10-ride ticket. Metra is estimating that this change will generate an additional $8.3 million in fare revenue for 2013.

VENTRA™ SYSTEM

Starting in 2013, the CTA and Pace are transitioning to Ventra™, a convenient new payment system that will let riders use a single fare card for regional transit throughout the Chicago area. The new system will allow riders to use their own credit or debit card to pay for transportation. Alternatively, customers may use the Ventra card, which can handle both transit and retail transactions. The new system will make commuting easy and seamless, providing a convenient new way to access and pay for train and bus rides on CTA and Pace beginning in the summer of 2013.

The transition to Ventra™ requires customers who currently have an RTA Ride Free, Reduced Fare or Disabled Reduced Fare permit to use a new permit later this year. Existing customers will have to do nothing as the new Ventra™ compatible permits will be sent to the address on file at no cost to them.

CTA LABOR

The CTA began reaching agreements with its labor unions in the beginning of the fourth quarter of 2012. On December 16, 2012 the CTA ratified an agreement with the Amalgamated Transit Union, its largest union. As a result, the CTA labor budget for 2013 is $6.0 million or 0.6% lower than the 2012 estimate. More importantly, the labor agreements provide certainty to the projected increases in the CTA's labor budget, allowing the CTA to bend the cost curve and relieve projected structural deficits in the financial planning years.

CTA RED LINE RECONSTRUCTION PROJECT

From mid-May to mid-October 2013 the southern branch of the CTA Red Line (south of Roosevelt) will be closed for renewal. Everything in the track bed including ties, rail, third rail, ballasts, and drainage systems will be replaced. The 5-month closure is anticipated to unfavorably impact the nearly 48,000 rides taken along the Red Line on an average weekday. The CTA anticipates that travel times will improve by up to 20 minutes between the 95th/Dan Ryan and Roosevelt Stations, once the project is complete. Additionally, the CTA will save $75 million when compared to performing the construction over four years on weekends only. The $75 million in savings will be reinvested into the project to provide new elevators, station improvements, and alternative service throughout the construction period.

ADA LEGISLATION

In 2011, the RTA Act was amended to ensure that ADA Paratransit was fully funded. The RTA Act requires the RTA to review the current year's ADA Paratransit expenses and determine if there will be sufficient funds available to balance its expenses. In 2013, Pace ADA projected its public funding need to be $136.3 million, and public funding to support that expense level was included in the funding marks. The RTA will review whether this funding is sufficient in the middle of the fiscal year and determine if additional allocations will be necessary.

FUND BALANCE

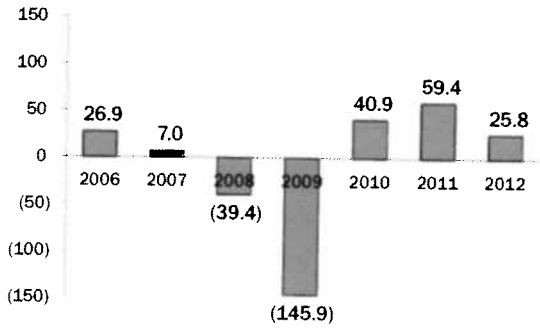
In 1998, the RTA Board adopted an ordinance establishing a minimum level on the unreserved and undesignated or unassigned fund balance. The ordinance affirms that the annual budget adopted by the RTA each year will reflect a year-end unreserved and undesignated fund balance of its general fund equal to or greater than 5% of the RTA's total operating expenditures for that year. If actual sales tax receipts or other RTA revenue fall short of the amounts reflected in the annual budget, then the succeeding year's annual budget and two-year financial plan will provide for the replacement of any shortfall in the unreserved and undesignated balance of the RTA general fund, by no later than the end of the three-year planning period. In the 2013 budget and 2014-2015 planning period, the RTA Board suspended this policy in favor of one that slowly builds a 5% fund balance over a longer period of time, due to the difficult economic environment following the 2008 financial crisis.

EXPOSURE TO SALES TAX VOLATILITY

Since almost 40% of total RTA operating revenue comes from sales tax, an accurate forecast is critical to an effective budget process. Volatility of sales tax receipts resulting from the 2008 financial crisis and ensuing recovery has complicated this effort in recent years. Exhibit 1-1 shows the variance of actual sales tax receipts from budgeted levels since 2006. Positive variances during the strong economic growth years of 2006 and 2007 were followed by severe shortfalls in 2008 and 2009. These shortfalls were addressed in part by liquidating the RTA fund balance which met its purpose of buffering against downturns. The financial downturn of 2009 and the resulting lack of adequate reserves in the RTA fund balance led to conservative sales tax forecasts for 2010 and 2011, producing positive variances once again when sales tax receipts came in higher than was forecasted. 2012 will also finish with a significant but smaller surplus of sales tax receipts (Exhibit 1-1).

Until the RTA fund balance has been restored to a level that can provide a sufficient cushion against potential revenue shortfalls, sales tax growth forecasts that err on the conservative side will continue to represent the prudent course of action.

Exhibit 1-1: **Variance of Actual Sales Tax from Budget**
(dollars in millions)



SALES TAX DIVERSION LITIGATION

In an attempt to ensure it receives all sales tax it is due, the RTA filed a lawsuit against the villages of Channahon and Kankakee in August 2011 claiming the towns are acting as tax shelters for local retailers thereby diverting sales taxes from the six-county area where a portion goes to the RTA. These businesses operate retail services in the six-county region and benefit from services provided by local governments including police, fire, public works, and transit. In early 2013, the RTA filed another lawsuit against the City of Sycamore, alleging that a revenue sharing agreement they have with United and American Airlines has deprived Chicago and Cook County taxpayers, as well as public transportation agencies, of nearly $300 million over the last seven years.

In 2012, the RTA worked with State legislatures to pass Public Act 097-0976 which requires local governments to electronically submit a report to the Illinois Department of Revenue that provides detailed information on any existing or new agreements to share or rebate any portion of retailers' occupation taxes generated by retail sales of tangible personal property.

Before considering rate increases or any other revenue options that would burden our transit riders, the RTA is committed to identifying and collecting all of the sales tax revenues rightfully owed for the support of our transportation system.

PA 097-0976 goes a long way in identifying those municipalities and business that perform these types of revenue sharing activities.

INSUFFICIENT CAPITAL FUNDING

In 2012, the RTA completed the first annual update of the Capital Asset Condition Baseline Assessment published in 2010. This update reflects the current physical conditions and 10-year capital reinvestment needs of the region's transit assets as of December 31, 2011. The main report findings include a 36% increase on the SGR backlog needs from $13.8 to $18.7 billion, and a 26% increase on the 10-year total capital SGR needs from $24.6 to $31.1 billion. Increases are primarily due to more precision in estimation methods, improved data, additional assets reported and the completion of necessary inventory records. With capital asset valued at $151.2 billion (as measured in terms of replacement value), the RTA system requires constant investment of capital dollars to both maintain and improve the region's transit infrastructure and rolling stock.

Current 10-year projections of capital funding sources total $5.9 billion, or only 19% of the documented capital need over the same period. The current State of Illinois capital funding programs extend only through 2014 and are not yet fully appropriated. Without a State capital bond program identified beyond 2014, capital funding for the RTA region drops to dangerously low levels. The RTA system is in need of a dedicated source of capital funding. In addition, the RTA's capital funding projections assume steady growth of federal capital funding, an outcome with considerable uncertainty due to the vagaries of future congressional support and action. The shortage of capital funds needed to support the RTA system will continue to present challenges with regard to achieving a SGR. In fact, without additional funding, our system's infrastructure will move further from that goal as the system slowly continues to deteriorate.

In the 2013 to 2017 Five-Year Capital Program the total amount of funding available is $3.7 billion. When the $685.2 million of debt service for the repayment of principal and interest on bonds issued for capital purposes is included, total capital expenditures are equal to $4.4 billion dollars. Of this $4.4 billion $1.1 billion was provided by the CTA and Pace from bond proceeds for capital projects. In total, over the course of the five year capital plan the percentage of bond proceeds to capital expenditures is 25.1%. The repayment of principal and interest constitutes 15.7% of total capital expenditures. In 2013, when $175 million of the $1.1 billion in bond proceeds are recognized, the proportion of bond proceeds to total capital funding is 16% (Exhibit 9-1).

TRANSIT ASSET MANAGEMENT (TAM)

The RTA, in cooperation with the Service Boards, developed the Capital Decision Prioritization Support Tool (Decision Tool) to assess and prioritize transit capital investments and SGR needs within the parameters of regional funding and long-term strategic objectives. The Decision Tool is intended to provide an objective perspective on regional re-investment needs to better inform regional decision-making. The RTA's Update of the Capital Asset Condition Assessment and the development of the Decision Tool align well with the Federal Transit (FTA) TAM guidelines and the FTA's decision tool requirements, referred to as TERM-lite. The RTA, therefore, is well advanced in compliance with future MAP-21 requirements.

The RTA has been at the forefront of Transit Asset Management and SGR research for nearly 5 years.

In 2012, the RTA received Federal Unified Work Program (UWP) funding that will enable the further development of the Capital Decision Prioritization Support Tool for Enhancement and Expansion prioritization analysis. While currently focused solely on the assessment of regional reinvestment (SGR) needs (i.e., preservation of the existing stock of transit assets), the Decision Tool will also help the region identify an optimal balance between replacing aging infrastructure (maintain); improving the throughput, reliability, and safety of existing services (enhance); and adding new capacity to improve system performance (expand) – all within the confines of limited financial resources. At a more detailed level, the Decision Tool will assist the RTA and the region to establish priorities within each of these types of needs (e.g., prioritizing between different asset replacement projects) while integrating the Service Boards asset needs with the region's five-year capital planning and annual budgeting process.

SERVICE BOARD BONDING

The 2013 Capital Program includes $1.1 billion in Bond Proceeds issued by the Service Boards. The CTA intends to issue $1.0 billion in bonds over the next five years with issuances of $175 million, $380 million and $445 million in 2013, 2014, and 2015, respectively. Pace received authorization from the State to issue $100 million in bonds for specific projects. Pace's five-year capital program includes $72 million in bond proceeds in 2014, $25 million in 2015, and $3 million in 2016. As part of its oversight responsibility, the RTA will monitor the Service Boards' issuances and ensure that all financial plans are based on reasonable assumptions.

Governance

The RTA was established in 1974 upon approval of a referendum in its six-county Northeastern Illinois region. The operating responsibilities of the RTA are set forth in the RTA Act. The RTA is a unit of local government, body politic, political subdivision and Municipal Corporation of the State of Illinois.

As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services as well as a planning and funding agency. However in 1983, the Illinois General Assembly reorganized the structure and funding of the RTA. The reorganization placed all operating responsibilities with three Service Boards—the Chicago Transit Authority (CTA) and two operating divisions of the RTA, a Commuter Rail Division (Metra) and a Suburban Bus Division (Pace)—each with its own independent board of directors. These divisions conduct operations and purchase service from private carriers. The RTA became exclusively responsible for funding, financial oversight, and regional planning and programs.

In reviewing this document it is important to note that the Service Boards operate within the RTA region, but are separate legal entities. The board of directors of each Service Board is completely independent of the RTA Board. The RTA Board does not control the selection or the appointment of any Service Board director or its management. Furthermore, directors of the CTA, Metra, and Pace are excluded from serving on more than one entity's board of directors, including that of the RTA.

The corporate authority and governing body of the RTA is the 16-member RTA Board of Directors. Fifteen

directors are appointed from within the six-county region: five directors by the Mayor of the City of Chicago, one director by the president of the Cook County Board; four directors by the suburban members of the Cook County Board; and one director each from DuPage, Kane, Lake, McHenry and Will appointed by the Chairman or Executive of the County Board. The chairman of the RTA Board, its 16th member, is elected by at least 12 of the 15 appointed members. To administer the Agency's statutory requirements, the Board hires officers and staff. One of its officers, who must be approved by the Board, is the Executive Director. The Executive Director executes the Board's policy decisions and staffs the Agency to carry out its mission and goals.

The RTA Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA's system as a whole (apart from ADA Paratransit service) achieves an annual "system-generated revenue recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of the operation of transportation services other than ADA Paratransit service. The Service Boards achieve their required recovery ratios by establishing fares and related revenue to cover the required proportion of their proposed expenditures. By statute, the recovery ratio for ADA Paratransit service has been set at 10%. The RTA is responsible for supervising the budgets and financial performance of the CTA, Metra, and Pace.

The Service Boards are considered fiscally independent of the RTA, but the RTA is mandated to review the budgets of the CTA, Metra and Pace and ensure that their budgets meet the specified recovery ratios.

The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters including ownership of assets, relations with federal and state transportation funding agencies, and the preparation of their operating budgets. They are also responsible for the purchase of services and approval of contracts relating to their operations.

The CTA, Metra, and Pace provide services to different geographic areas within the six-county region. The CTA provides rail and bus service to the City of Chicago and 40 nearby suburbs within Cook County. Metra provides transit service to the six-county area, with the majority of the transit riders residing in the suburbs and commuting to the City of Chicago. Pace's primary service area for bus, dial-a-ride, and vanpool service is the suburbs of the six-county region, with some service to areas within the City of Chicago. Pace is also responsible for region-wide ADA Paratransit service.

The RTA Act establishes the RTA as the primary public body with authority to apply for and receive grants, loans, and other funds from the state or the federal government for public transportation programs in Cook, DuPage, Kane, Lake, McHenry and Will counties ("Northeastern Illinois"). The RTA is responsible for the allocation of certain federal, state and local funds to finance both the operating and capital needs of public transit in the six-county region.

The Act confers upon the RTA Board powers to prescribe regulations requiring that the Service Boards submit to the RTA such information as the RTA may require. The Board has statutory authority to establish by rule or regulation financial, budgetary, or fiscal requirements for the system.

In addition to its annual budget and financial plan responsibilities, each year the RTA is required to prepare and adopt a five-year capital program. The RTA also conducts market research and coordinates planning for public transportation in Northeastern Illinois. The RTA funds the development of new types of service, both in the suburbs and in the City of Chicago, on a demonstration basis.

The 2008 legislation, which broadened the responsibilities of the RTA, called for the development and continued review of a region-wide strategic plan. As part of the strategic plan the RTA, in conjunction with the Service Boards, develops a ten-year prospective analysis of the regions financial condition.

Budget Process

As previously discussed, the Act requires that the RTA Board of Directors approve an annual budget, a two-year financial plan, and a five-year capital program. The budget calendar and statutory oversight and budget amendment requirements govern this process. The essential aspects of the budget calendar are outlined below. A detailed calendar is provided in the Appendices (Exhibit 10-1).

BUDGET CALENDAR

Between May and September of each year the RTA and the Service Boards execute a "business plan call process" that includes RTA estimates of revenue to be collected from taxes and other sources and the Service Boards' own preliminary estimates for the capital program and operating revenues and expenditures during the planning period.

Based on this information, "The Board shall, not later than September 15 prior to the beginning of the Authority's next fiscal year," advise each Service Board of the amounts of funding estimated to be available during the upcoming fiscal year and following two years. The Board is also required to advise the Service Boards of the times when the amounts will be available and the next year's cost recovery ratio.

Between September 15 and November 15, each Service Board must prepare and publish a comprehensive annual budget, a two-year financial plan, and a five-year capital program. "The proposed budget and financial plan shall be based on the RTA's estimate of funds to be available to the Service Boards, by or through the Authority, and shall conform in all respects to the requirements established by the Authority." Before submitting the budget to the RTA, a Service Boards must hold at least one public hearing in each of the counties in which it provides service and must hold at least one meeting with the affiliated county boards. After considering the comments from these meetings, it must formally adopt the budget prior to submitting it to the RTA on November 15. The RTA Act requires that the budgets submitted by each Service Board not project or assume receipt of public funding greater than that set in the estimates provided by the RTA.

The RTA must hold at least one public hearing in the metropolitan region and one meeting with each county board on the proposed budget. Twenty days prior notice is required for the public hearing. The public hearing notice and results for the 2012 budget may be reviewed in the Appendices Section (Exhibits 10-2.1 and 10-2.2).

After conducting these hearings and taking into consideration the comments, the RTA Board must adopt (with 12 votes) a budget that meets the statutory criteria. If the RTA does not find that a Service Board budget meets the criteria set forth under the Act, and the Service Board does not submit a revised budget that meets the criteria, the Board shall, adopt a budget and financial plan meeting these criteria. The RTA, CTA, Metra, and Pace all report on a calendar-year basis.

AMENDMENT

When prudent, the operating budget is amended due to shifts in the economic climate, governmental funding programs or new projects. Depending on the type of request, the proposed amendment may be presented to one or more of the RTA Board Committees for approval. However, the Board's Finance Committee must approve all proposed amendments before they are recommended to the RTA Board. The RTA Board ultimately approves or disapproves all proposals. If approved, the RTA and Service Board budgets are amended to include all changes and actual results and are then monitored against the amended budget.

STATUTORY REQUIREMENTS

The RTA Act sets forth seven statutory criteria for Board approval of the budget and financial plan of each Service Board. These seven criteria are as follows:

Balanced Budget

Such budget and plan shall show a balance between (a) anticipated revenue from all sources, including

operating subsidies, and (b) the costs of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness.

Cash Flow

Such budget and plan shall show cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenditures as incurred.

Recovery Ratio

Such budget and plan shall provide for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of such Service Board which allow the Service Board to meet its required recovery ratio. The combined revenue from RTA operations should cover at least 50% of the system operating costs. ADA Paratransit service revenues should cover at least 10% of the operating costs.

Assumptions

Such budget and plan are based upon and use assumptions and projections, which are reasonable and prudent.

Financial Practices

Such budget and plan shall be prepared in accordance with sound financial practices as determined by the RTA Board.

Strategic Plan

Such budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

Other Requirements

Such budget and plan shall meet such other financial, budgetary, or fiscal requirements that the RTA Board may by rule or regulation establish.

OVERSIGHT

After adoption of the operating budget, the RTA Board has continuing oversight responsibility concerning the budget and the financial condition of each Service Board and the region as a whole. The RTA monitors the budgetary and operations performance of the Service Boards on a monthly basis to ensure compliance with their budget and recovery ratio. On a quarterly basis, the following oversight is conducted:

- After the end of each fiscal quarter, each Service Board must report to the RTA "it's financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction" for that quarter. If in compliance, the RTA Board so states and approves each Service Board's compliance by adopted resolution.

- If "in the judgment of the Board" these results are not substantially in accordance with the Service Board's budget for that period, "the Board shall so advise the Service Board" and it "shall, within the period specified by the Board, submit a revised budget incorporating such results."

- Once a Service Board submits the revised budget plan, the RTA must determine if it meets the seven statutory budget criteria necessary to pass an annual budget. If not, the RTA does not release any moneys to the Service Board(s) except for the statutory allocation of taxes.

- If a Service Board submits a revised budget and plan which shows that the statutory budget criteria will be met "within a four quarter period," the RTA "shall continue to release funds to the Service Board." The RTA may require the Service Board to submit a revised budget and plan that shows that the budget criteria "will be met in a time period less than four quarters."

Financial Policies

OPERATIONS FUNDING

Ordinance 91-9 (the "Fund to Budget Policy) required that the RTA provide operating funds to each Service Board equivalent to its budgeted deficit for the year. In the event that a Service Board's public funding receipts proved to be lower than budget the RTA would allocate a portion of its Fund Balance to make up the difference. This policy encouraged cost efficiencies by the Service Boards and allowed them to retain any budgeted funds that were not expended. Such funds were generally referred to as a positive budget variance (PBV), and pursuant to Ordinance 91-9 must be used for capital purposes, unless a specific exception was provided by the RTA Board. The 2010 budget ordinance (2009-93) provided such an exception for Metra.

However, depletion of the RTA's fund balance during the economic downturn prevents the RTA from providing additional funding to the Service Boards should revenues decline below estimated levels. As a result, the fund to budget policy was waived in 2009 and has been waived each year since the economic downturn. With the fund to budget policy waived, the current policy in place ("Fund to Actuals") allocates sales tax receipts and their corresponding state match in accordance with the statutory funding formula. The portion of funding allocated at the discretion of the RTA Board is still distributed at budget. Under this policy positive budget variances experienced by the Service Boards are still dedicated for capital purposes unless a specific exception is granted by the RTA Board.

FUND BALANCE

In 1998 the RTA Board adopted Ordinance 98-15, establishing a minimum level on the unreserved and undesignated or unassigned fund balance. The ordinance affirms that the annual budget adopted by the RTA each year will reflect a year-end unreserved and undesignated fund balance of its general fund equal to or greater than 5% of the RTA's total operating expenditures for that year. If actual sales tax receipts or other RTA revenue falls short of the amounts reflected in the annual budget, then the next year's annual budget and two-year financial plan will provide for the replacement of any shortfall in the unreserved and undesignated balance of the RTA general fund, by no later than the end of the three-year planning period.

The RTA established this policy to maintain financial stability in order to carry out the RTA's legislative mandates to plan, fund, and oversee public transportation in the region. The purpose of the ordinance was to formalize a practice of maintaining a level of financial resources available for funding during unfavorable economic periods. Since 2009 the fund balance policy was waived for every budget except in 2011 and has been deferred for the 2013 budget and 2014–2015 financial plans as well.

CAPITAL EXPENDITURES

The RTA Five-Year Capital Program is adopted by the RTA after an affirmative vote of at least 12 RTA Directors, after consultation with the Service Boards, and after holding a minimum of three public hearings in Cook County and one public hearing in each of the other counties in the metropolitan region. Preparation of the RTA's capital budget is guided by the following policies found in the RTA Act.

A five-year program for capital improvements is updated annually. Each capital improvement to be undertaken by or on behalf of a Service Board should meet the criteria set in the Strategic Plan and be consistent with any sub-regional or corridor plan adopted by the RTA.

In reviewing proposals for improvements to be included in a Five Year Capital Program, the RTA may give priority to improvements that are intended to bring public transportation facilities into a State of Good Repair (SGR).

The Five Year Capital Program shall also identify capital improvements to be undertaken by a Service Board, a transportation agency, or a unit of local government and funded by the Authority from amounts in the Innovation, Coordination, and Enhancement Fund.

At times, shortfalls in transit operating funding necessitated the transfer of federal capital funds to cover operating costs. In 2007, the RTA Board, having found such transfers unsustainable over the long term and given the need to maintain the existing system and bring it towards a SGR, Ordinance 2007-48 established a financial policy that disallowed the transfer of capital funds to operations. Under this ordinance, federal capital funds should not be used by a Service Board to fund operating expenses unless the RTA Board determined based on adequate information supplied by the Service Board, that such use would not have a materially adverse impact on the state of repair of the Service Board's capital assets. The RTA Board, having been provided sufficient information and having identified a sufficient need to transfer funds from capital to operations, allowed the Service Boards to transfer funds from capital to operations in every year from 2009 to 2011. The 2012 and the 2013 budget exclude the transfer of capital funds to operations.

FIXED ASSETS

As part of its accounting policies, the RTA sets a fixed asset capitalization threshold of no less than $5,000 for any capital item(s). Capital assets are recorded at historical cost (or fair market value at the time of donation, if donated) and have a useful life of at least two years following the date of acquisition. Any acquisitions during the year are considered acquired at the beginning of that year for the purpose of computing depreciation.

Description	Useful life
Furniture and Equipment	5 years
Computer Equipment	5 years
Leasehold improvements	Life of the lease

GENERAL OBLIGATION BONDS

Pursuant to the Note General Ordinance (Ordinance 85-39), adopted August 8, 1985, bonds should be payable from all revenue and all other funds received or held by the RTA that lawfully may be used for retiring the debt. Exceptions to this are amounts in the Joint Self-Insurance Fund (JSIF) and amounts required to be held or used with respect to separate ordinance obligations. The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State of Illinois. In addition, RTA Sales Tax must be 2.5 times greater than the debt service requirement. If RTA has not made the required monthly debt service payment, then the trustee is to deduct it from the receipts. If all payments have been made, then the funds are made available to the RTA for regular use.

INVESTMENT

The RTA's investment policy complies with Illinois law, addresses safety of principal, liquidity of funds, rate of return, public trust, and investments in local and disadvantaged institutions. It further permits investments and prescribes safekeeping, collateralization, and reporting requirements.

The RTA policy establishes the following objectives:

- **Safety of Principal** – Every investment will be made with safety of principal as the primary and overriding concern. Each investment transaction shall ensure that loss of capital, whether from credit or market risk, is minimized.

- **Liquidity** – Maturity and marketability aspects of investments should be coordinated with the anticipated cash flow needs of the RTA.

- **Rate of Return** – A secondary objective is to seek the highest return on investments consistent with preservation of principal and prudent investment principles.

- **Public Trust** – The RTA and its officers should avoid any investment transaction or practice which in appearance may impair public confidence in its stewardship of public funds.

- **Investments in Local and Disadvantaged Institutions** – Locally owned and disadvantaged business financial institutions contribute to economic development of the RTA service area. The RTA

recognizes its interest in the vitality of the local economy by investing in local, minority, and female owned financial institutions.

The RTA's investment policy was last modified in 2005 to exclude certain investments allowed for by Illinois law, but deemed too risky by RTA staff, and increase the frequency of investment reporting to the RTA Board.

PENSION FUNDING

By statute, the RTA, Metra, and Pace are required to contribute the amounts necessary to fund the benefits of their respective employees in the plan using the projected unit credit actuarial method. Employer contribution and the income it earns through investments are used to operate the Plan and to pay benefits. Assets are valued recognizing a portion of both realized and unrealized gains and losses in order to avoid wide swings in actuarially determined funding requirements from year to year.

RTA ORDINANCE NO. 2013-01

APPROVING THE 2013 BUDGETS AND 2014-2015 FINANCIAL PLANS OF THE SERVICE BOARDS, ADOPTING THE 2013 BUDGET AND PROGRAM OF THE AUTHORITY, APPROPRIATING FUNDS FOR THE 2013 BUDGETS, ALLOCATING CERTAIN REVENUES OF THE RTA TO THE SERVICE BOARDS, ADOPTING THE FIVE-YEAR CAPITAL PROGRAM, AND TAKING CERTAIN OTHER ACTIONS WITH RESPECT TO THE BUDGET AND PROGRAM FOR FISCAL YEAR 2013

WHEREAS, Section 4.01 of the Regional Transportation Authority Act (the "Act") directs the Board of Directors of the Regional Transportation Authority (the "RTA Board") to (i) appropriate money to perform the purposes of the Regional Transportation Authority (the "RTA" or the "Authority") and provide for payment of debts and expenses of the RTA, (ii) take action with respect to the budget and two-year financial plan of each of the Chicago Transit Authority (the "CTA"), the Commuter Rail Division of the Regional Transportation Authority ("Metra"), the Suburban Bus Division of the Regional Transportation Authority ("Pace", and, together with the CTA and Metra, collectively, the "Service Boards" and each, individually, a "Service Board"), as provided for in Section 4.11 of the Act, and (iii) adopt an Annual Budget and Two-Year Financial Plan for the RTA that includes the annual budget and two-year financial plan of each Service Board that has been approved by the RTA;

WHEREAS, pursuant to Section 4.11 of the Act, the RTA Board adopted Ordinance 2012-69 on October 10, 2012, identifying the amounts of funds estimated to be available to each Service Board for operations during fiscal year 2013 and the two following fiscal years;

WHEREAS, pursuant to Section 4.11 of the Act, each Service Board has submitted its proposed fiscal year 2013 budget and proposed 2014-2015 financial plan to the RTA for its review;

WHEREAS, pursuant to Section 4.01(a) of the Act, the RTA has held at least one public hearing in the metropolitan region, and met with the county board or its designee of each of the several counties in the metropolitan region, with respect to its proposed annual budget and two-year financial plan, and considered the proposed budgets and financial plans of the Service Boards and the public comments with respect to those budgets and financial plans;

WHEREAS, Section 4.11 of the Act authorizes and directs the RTA to review the budgets and financial plans of the Service Boards for approval;

WHEREAS, pursuant to Sections 4.01(a) and 4.11(d) of the Act, the budgets and financial plans of the Service Boards shall contain estimated expenses for contributions to be made with respect to pension and other employee benefits, and the Service Boards are required to present to the RTA budgets prepared in such detail as prescribed by the Board, which have been prepared on both an accrual and a cash flow basis, and that fairly present the condition of any pension plan or trust for health care benefits with respect to retirees established by the Service Board and describes the plans of the Service Boards to meet the requirements of Sections 4.02a and 4.02b;

WHEREAS, pursuant to Sections 4.02a and 4.02b of the Act, the RTA shall continually review the payment of the required employer contributions to affected pension plans and if at any time the RTA determines that a Service Board's payment of any portion of the required contributions to an affected pension plan is more than one month overdue, it shall as soon as possible pay the amount of those overdue contributions to the trustee of the affected pension plan on behalf of that Service Board out of monies otherwise payable to that Service Board under Section 4.03.3, and the RTA shall thereafter have no liability to the Service Board for amounts paid to the trustee of the affected pension plan, and if the RTA's payment of such contributions is similarly overdue it shall pay such overdue amount out of its administrative expenses;

WHEREAS, Section 4.10 of the Act prohibits the RTA from releasing funds, other than those allocated by statute, to the CTA in any fiscal year unless a unit or units of local government in Cook County (other than the CTA) enters or enter into an Agreement with the CTA to make a monetary contribution for such year of at least $5,000,000 for public transportation;

WHEREAS, pursuant to Section 3A.09 (e) of the Act, and subject to approval by the Authority and the specific bond issuance parameters set forth in the Act, Pace has the authority to borrow money for the purposes of (i) constructing a new garage in the northwestern Cook County suburbs, (ii) converting the South Cook garage in Markham to a Compressed Natural Gas facility, (iii) constructing a new paratransit garage in DuPage County, and (iv) expanding the North Shore garage in Evanston to accommodate additional indoor bus parking;

WHEREAS, pursuant to Section 4.03.3 of the Act, the RTA has established public funding levels in 2013 through 2015 for the Suburban Community Mobility Fund and the Innovation, Coordination, and Enhancement Fund (the "ICE Fund") that change proportionately with the percentage change in RTA estimated sales tax receipts;

WHEREAS, pursuant to Section 2.01d of the Act, the RTA has established public funding levels in 2013 through 2015 for the ADA Paratransit Fund;

WHEREAS, pursuant to Section 4.11(a) of the Act, the RTA Board shall review the interim 2013 results for the provision of Regional ADA Paratransit service operations, and the written report of the Executive Director related thereto, no later than September 15, 2013, and shall amend the 2013 budgets of the Authority and the Service Boards to provide for additional funding for the provision of ADA Paratransit services, if needed;

WHEREAS, the RTA will reimburse the purchase of excess liability and terrorism insurance by the RTA system's Loss Financing Plan to provide system protection against catastrophic loss;

WHEREAS, pursuant to Section 2.01b of the Act, the Authority shall each year adopt a Five-Year Capital Program that shall include each capital improvement to be undertaken by or on behalf of a Service Board; provided that the Authority finds that the improvement meets any criteria for capital improvements contained in the Strategic Plan, is not inconsistent with any sub-regional or corridor plan adopted by the Authority, and can be funded within amounts available with respect to the capital and operating costs of such improvement;

WHEREAS, pursuant to Section 2.01b of the Act, the RTA has conducted public hearings with respect to the proposed Five-Year Capital Program and considered comments resulting from such hearings;

WHEREAS, the Five-Year Capital Program included with this Ordinance is based on capital program submittals from the Service Boards, and if the RTA Board makes any amendments to the estimates of capital funding available based on subsequent federal or state actions, the Service Boards will be required to adjust their capital programs to reflect such revised estimates;

WHEREAS, pursuant to Section 4.01 (h) of the Act, no Service Board shall undertake any capital improvement which is not identified in the Five-Year Capital Program;

WHEREAS, shortfalls in transit operating funding have necessitated the transfer of federal capital funds to cover operating costs, but such transfers are unsustainable over the long term and the priority need is to maintain the existing system and bring it toward a State of Good Repair, as identified in the RTA Strategic Plan and the Illinois Auditor General Management and Performance Audit;

WHEREAS, the RTA has previously authorized the use of federal capital funds by the Service Boards to pay preventive maintenance expenses in 2013, and under the 2013 budgets and 2014-2015 financial plans submitted by the Service Boards such transfers are not included;

WHEREAS, unfavorable economic conditions have required the RTA to deplete its fund balance to provide funds to the Service Boards, and to allocate, rather than reserve, financial resources in an effort to preserve operating stability in prior years;

WHEREAS, unfavorable economic conditions have created the need to waive, for purposes of the adoption of the 2013 Budget and 2014-2015 Financial Plan, the provision of the RTA Funding Policy adopted by Ordinance No. 98-15 that requires that the RTA Annual Budget and Two-Year Financial Plan show a year-end unreserved and undesignated fund balance equal to 5% of the RTA general fund expenditures by no later than the end of the three-year planning period ("the Fund Balance Policy");

WHEREAS, the waiver of the Fund Balance Policy and the depletion of the RTA's fund balance prevents the RTA from providing additional operating funding to the Service Boards in the event that revenues decline below estimated levels, and therefore the RTA funding policy adopted by Ordinance 91-9 (the "Fund to Budget Policy") must be waived for the 2013 fiscal year;

WHEREAS, RTA working cash borrowing was used to fill shortfalls in funding provided by public subsidies to the Service Boards in 2011; and, pursuant to Section 4.09 of the Act, the proceeds of such borrowings distributed to the Service Boards are projected to be repaid in 2013 with the proceeds of subsequent working cash borrowing;

WHEREAS, the RTA held a special Finance Committee meeting on December 5th, 2012 to review the details of the Service Boards' budgets and were given assurances by the Service Boards that the assumptions used to develop their budgets are reasonable and will enable them to maintain balanced budgets; and

WHEREAS, the RTA Board has determined that it is in the best interest of the RTA to take the following actions in order to carry out its powers and duties under the Act.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF DIRECTORS OF THE REGIONAL TRANSPORTATION AUTHORITY THAT:

ARTICLE I - INCORPORATION OF PREAMBLES

The preambles of this ordinance are hereby incorporated into this text as if set out herein in full.

ARTICLE II - APPROVAL OF BUDGETS AND FINANCIAL PLANS

Section One:
Service Board Budgets and Financial Plans

1.1 In compliance with the Act, the RTA has received and reviewed the proposed budgets for 2013 and financial plans for 2014 and 2015, of each of the Service Boards.

1.2 With respect to the proposed budget and financial plan submitted by CTA (as summarized in Schedule I-B), the RTA finds as follows:

(a) the CTA budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the CTA budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the CTA budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of CTA sufficient to allow CTA to meet or exceed its

required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the CTA budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the CTA budget and plan has been prepared in accordance with sound financial practices;

(f) the CTA budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the CTA budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.3 With respect to the proposed budget and financial plan submitted by Metra (as summarized in Schedule I-B), the RTA finds as follows:

(a) the Metra budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Metra budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Metra budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Metra sufficient to allow Metra to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Metra budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the Metra budget and plan has been prepared in accordance with sound financial practices;

(f) the Metra budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established;

(g) the Metra budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.4 With respect to the proposed budget and financial plan submitted by Pace for Suburban Service (as summarized in Schedule I-B), the RTA finds as follows:

(a) the Pace Suburban Service budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Pace Suburban Service budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Pace Suburban Service budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Pace sufficient to allow Pace to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Pace Suburban Service budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the Pace Suburban Service budget and plan has been prepared in accordance with sound financial practices;

(f) the Pace Suburban Service budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the Pace Suburban Service budget and plan is consistent with the goals and objectives adopted by the RTA in the Strategic Plan.

1.5 With respect to the proposed budget and financial plan submitted by Pace for ADA Paratransit service (as summarized in Schedule I-B), and subject to Pace taking budget balancing actions in 2014 and 2015 as reflected in Schedule I-B, the RTA finds as follows:

(a) the Pace ADA Paratransit Service budget and plan shows a balance between (i) anticipated revenues from all sources, including operating subsidies and application of Service Board fund balances, and (ii) the cost of providing the services specified and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

(b) the Pace ADA Paratransit Service budget and plan shows cash balances, including the proceeds of any anticipated cash flow borrowing, sufficient to pay with reasonable promptness all costs and expenses as incurred;

(c) the Pace ADA Paratransit Service budget and plan provides for a level of fares or charges and operating or administrative costs for the public transportation provided by or subject to the jurisdiction of Pace sufficient to allow Pace to meet or exceed its required system-generated revenue recovery ratio, as set forth in Schedule I-C;

(d) the Pace ADA Paratransit Service budget and plan is based upon and employs assumptions and projections which are reasonable and prudent;

(e) the Pace ADA Paratransit Service budget and plan has been prepared in accordance with sound financial practices;

(f) the Pace ADA Paratransit Service budget and plan meets the other financial, budgetary, or fiscal requirements that the RTA has established; and

(g) the Pace ADA Paratransit Service budget and plan is consistent with the goals and objectives adopted by the Authority in the Strategic Plan.

1.6 Pursuant to Section 4.11 of the Act, the 2013 budgets and 2014-2015 financial plans for CTA, Metra and Pace, as presented in the attached Schedule I-B, are hereby approved.

1.7 As authorized by Section 4.11 of the Act, the RTA Board hereby directs that, no more than 30 days after each fiscal quarter, each Service Board is required to report to the RTA its financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction, as of the end of and for such quarter, for review by the RTA for conformity with the approved budget for such period.

Section Two:

RTA Budget and Financial Plan

The RTA Board has received and reviewed the 2013 Budget and Financial Plan of the Authority as summarized in Schedule I-A. The 2013 Budget and Financial Plan are hereby approved and the RTA Board finds as follows:

(a) The 2013 budget and financial plan shows a balance between anticipated revenues from all sources and anticipated expenses, including the funding of operating deficits and the discharge of encumbrances incurred in prior periods and payment of principal and interest on outstanding indebtedness when due, as summarized in Schedule I-A.

(b) The 2013 budget and financial plan shows cash balances sufficient to pay with reasonable promptness all obligations and expenses as incurred, as summarized in Schedule I-E.

(c) The 2013 budget and financial plan shows that the level of fares and charges for public transportation provided by, or under grant or purchase of service contracts of, the Service Boards is sufficient to cause the aggregate of all projected system-generated revenues from such fares and charges received in 2013, apart from ADA Paratransit services, to equal at least fifty percent (50%) of the aggregate cost of providing such public transportation in 2013, and at least ten percent (10%) for ADA Paratransit service in 2013, as required by the Act, and as summarized in Schedule I-C.

(d) The 2013 budget and financial plan is based on and employs assumptions and projections which are reasonable and prudent.

(e) The budgeted "administrative expenses" of the RTA for 2013, as defined in Section 4.01 (c) of the Act, do not exceed the maximum administrative expenses permitted for 2013.

(f) The 2013 budget and financial plan are consistent with the goals and objectives adopted by the Authority in the Strategic Plan.

ARTICLE III - ADOPTION OF THE FIVE-YEAR CAPITAL PROGRAM

Section One:

Adoption of the Five-Year Capital Program

The RTA Board has received and reviewed the 2013-2017 Five-Year Capital Program presented by the Service Boards. The RTA Board is requiring that any capital projects planned by Pace to be funded from the proceeds of a bond issuance must have an RTA Board approved bond financing plan prior to issuance of the bonds that includes: (i) information on the size of the issuance, (ii) the impact that the debt payment will have on the Operating Budget, Two-Year Financial Plan, and the Capital Program, (iii) whether the debt repayment plan will utilize a level debt service plan, capitalize any interest, or defer principal payments into out years, (iv) evidence that the cost of borrowing will be less than or equal to the cost for an identical transaction with RTA as the borrower; (v) establish whether a reserve fund will be included and if so, how it will be funded, (vi) establish what the term of maturity of the bonds will be, (vii) identify additional costs associated with financing of the bonds including financial advisor costs, underwriting costs, bond insurance cost (if any) and other associated costs, (viii) if applicable, a request to use negotiated issuance rather than a competitive bid process and (ix) a summary of compliance with requirements stipulated by other governing statutes.

The RTA Board hereby adopts the Five-Year Capital Program Revenues and Expenditures attached as Schedule II-A and Schedule II-B, subject to continuing review by the RTA.

Section Two:

Prohibition on Capital Projects Not Included in the Program

Pursuant to Section 4.01 (h) of the Act, no Service Board shall undertake any capital improvement which is not identified in the Five-Year Capital Program.

Section Three:

Applications for Federal and State Capital Grants, Loans and Other Funds

In accordance with Section 4.02 (b) of the Act, each Service Board is directed to provide notice to the RTA of its intent to file any application for federal or state capital grants, loans or other funds prior to making any such application, and to file a copy of any such application with the RTA. No Service Board shall apply for or receive any capital grant or loan unless it is identified in the RTA Five-Year Program and is consistent with the RTA Strategic Plan.

Section Four:

Prohibition on Use of Federal Capital Funds for Preventive Maintenance

Federal capital funds shall not be used by a Service Board to fund preventive maintenance expenses in its operating budget unless the RTA Board determines, based on adequate information supplied by the Service Board, that such use will not have a materially adverse impact on the State of Good Repair of such Service Board's capital assets.

ARTICLE IV - APPROPRIATION OF FUNDS AND CERTAIN OTHER ACTIONS

Section One:

Appropriation for Each Service Board

The following amounts for 2013 are appropriated for payment to each Service Board from the enumerated sources of funds and for the specified objects and purposes.

1.1 Statutory RTA Taxes

There is appropriated from the taxes collected under Section 4.03, to each Service Board for expenditure pursuant to the 2013 budget approved for such Service Board in Article II, the amount required by Sections 4.03.3 (a) and 4.03.3 (b) of the Act. The estimated amount of each appropriation is specified as Part I Sales Tax Allocation on Schedule I-D.

After receipt by the RTA of the proceeds of taxes imposed pursuant to Section 4.03 of the Act, the Executive Director of the RTA shall provide for the payment to each Service Board the specified appropriation.

1.2 Statutory RTA Sales Taxes and Public Transportation Funds

(a) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and Public Transportation Fund receipts received pursuant to Section 4.09 of the Act, to Pace for expenditure for ADA Paratransit Services, the amount required by Section 4.03.3 (c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Total for ADA Paratransit Service on Schedule I-D.

(b) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and Public Transportation Fund receipts received pursuant to Section 4.09 of the Act to Pace for expenditure for Suburban Community Mobility, the amount required by Section 4.03.3 (c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Suburban Community Mobility Funding to Pace on Schedule I-D.

(c) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and Public Transportation Fund receipts received pursuant to Section 4.09 of the Act, to the Innovation, Coordination and Enhancement (ICE) Fund the amount required by Section 4.03.3 (c). The estimated amount of the appropriation is specified as Part II Allocation; RTA Innovation, Coordination & Enhancement on Schedule I-D.

The RTA Board directs Pace to provide to the RTA any information requested by the Executive Director that is, in the judgment of the Executive Director, necessary to estimate the difference between (i) the projected final 2013 operating deficit of ADA Paratransit

service and (ii) the total amount of funding from all sources estimated to be available for 2013 operations of ADA Paratransit Service (such difference, the "Shortfall Amount"). The Shortfall Amount shall be established by the Executive Director after reviewing the 2013 ADA Paratransit service operating deficit estimate included in Pace's budget submission in September 2013, and, after being approved by the Chairman of the RTA Board and the Chairman of the Finance Committee of the RTA Board, shall be submitted to the RTA Board together with a certification from Pace that additional funds equal to the Shortfall Amount are necessary for 2013 ADA Paratransit service operations. Such certification shall be accompanied by a report describing Pace's efforts to implement reasonable and appropriate cost savings and revenue raising measures related to ADA Paratransit Service.

(d) There is appropriated from taxes imposed pursuant to Section 4.03 of the Act and Public Transportation Fund receipts received pursuant to Section 4.09 of the Act to each Service Board for expenditure pursuant to the Budget approved for such Service Board in Article II, the amount required by Section 4.03.3 (c). The estimated amount of each appropriation is specified as Part II Allocation; Remaining Balance to Service Boards in Schedule I-D.

After receipt by the RTA of the proceeds of taxes imposed pursuant to Section 4.03 of the Act, and Public Transportation Fund receipts pursuant to Section 4.09 of the Act, the Executive Director of the RTA shall provide for the payment to each Service Board the specified appropriation.

1.3 Free and Reduced Fare Reimbursement

There is appropriated, for expenditure by each Service Board pursuant to the 2013 Budget approved in Article II, amounts received from the State of Illinois for reimbursement of revenues lost from providing free or reduced fare rides.

After receipt by the RTA of such funds from the State of Illinois, the Executive Director shall provide for the payment to each Service Board its proportionate share of the proceeds estimated to be received from the State as identified on Schedule I-A; provided that such funds shall not be distributed to the CTA unless and until a unit or units of local government in Cook County (other than the CTA) enters or enter into an agreement with the CTA to make a monetary contribution for such year of at least $5,000,000 for public transportation.

1.4 Discretionary Funds of the RTA – Public Transportation Fund, 15% Sales Tax, Other RTA Revenues

(a) There is appropriated, for expenditure by each Service Board pursuant to the 2013 Budget approved in Article II, the lesser of (i) the amounts specified as "RTA Discretionary Funds" and any amounts specified on Schedule I-B from other receipts and revenues of the RTA, and (ii) so much as may be necessary that the actual amounts appropriated for each Service Board under paragraphs 1.1 and 1.2 of this section equal the amounts specified as "Total RTA Funding for Operations" on Schedule I-B.

(b) There is appropriated, for expenditure by Pace pursuant to the amount specified as RTA South Suburban Job Access Funds on Schedule I-B from other receipts and revenues of the RTA.

(c) There is appropriated, for expenditure by Metra for projects, as specified on Schedule II-B, and pursuant to the first year of the Five-Year Capital Program approved in Article II, the amounts specified as "Transfer Capital RTA Capital Reserve Funds to Metra" on Schedule I-A from RTA Regional Capital Project Reserves.

(d) There is appropriated, for expenditure by CTA for projects, as specified on Schedule II-B, and pursuant to the first year of the Five-Year

Capital Program approved in Article II, the amounts specified as "Transfer Capital RTA Capital Reserve Funds to CTA" on Schedule I-A from RTA Regional Capital Project Reserves.

Subject to receipt by the RTA of sufficient proceeds of taxes imposed pursuant to Section 4.03 of the Act, and from the Public Transportation Fund receipts pursuant to Section 4.09 of the Act, the Executive Director is hereby directed to provide for the payment of such funds described in paragraphs (a), (b), (c) and (d) as soon as may be practicable upon their receipt provided that each Service Board is in compliance with the requirements of Section 4.11 of the Act and this Ordinance.

Section Two:
Appropriation to the Regional Transportation Authority

In 2013 there is appropriated, for expenditure for the operating purposes of the RTA (the "Agency") the amounts specified on Schedule I-A as "Agency Administration and Other" and "RTA Regional Services and Programs", pursuant to the 2013 Budget approved in Article II, from other receipts and revenues of the RTA.

In 2013 there is appropriated for transfer from the RTA's Fund Balance to the Joint Self Insurance Fund (JSIF), funds to reimburse the insurance premium and associated fees for liability and terrorism insurance for the RTA System's Loss Financing Plan the amount specified on Schedule I-A as "RTA Joint Self-Insurance Fund (JSIF) Funding."

The Executive Director is authorized to transfer up to 10% from and among each of the items shown in Schedule I-A for 2013 as "Agency Administration and Other" and "RTA Regional Services and Programs".

ARTICLE V - GENERAL

Section One:
Implementation and Dissemination

The Executive Director is authorized and directed to take appropriate action to implement and enforce this Ordinance and to prepare and disseminate the 2013 Annual Budget and Program of the RTA in accordance with the Act and the policies established herein.

Section Two:
Organization of the RTA

The Executive Director shall organize the staff of the Authority, shall allocate their functions and duties, and shall fix compensation and conditions of employment. The Executive Director shall develop, and modify as may be necessary, Agency policies regarding travel, business and relocation expenses.

Section Three:
Fund Balance Policy

The provisions of the Fund Balance Policy adopted by Ordinance 98-15 are hereby waived for the 2013 budget and 2014-2015 Financial Plans.

Section Four:
Fund to Budget Policy

The provisions of the Fund to Budget Policy are hereby waived for the 2013 fiscal year.

Section Five:
Non-Waiver of RTA Authority

Nothing in this Ordinance is intended to or shall have the effect of (i) creating an obligation on the part of the RTA to provide funding to the Service Boards in excess of their respective statutorily allocated portions of the proceeds from taxes and State funds actually received by the RTA, nor (ii) waiving any discretion the RTA may have under law to amend the amounts appropriated to the Service Boards under the Ordinance, subject to compliance by the Service Boards with terms and conditions established by the RTA. Furthermore, noth-

ing in this Ordinance is intended to or shall have the effect of waiving any discretion the RTA may have under law to subject to review the determinations made in this Ordinance, including, but not limited to, setting recovery ratios for the Service Boards, establishing inclusions or exclusions of certain revenues or expenditures from the calculation of such recovery ratios, or determining the allowable uses of federal, state or local funds.

Section Six:

Executive Director's Authority to Apply for Additional Funds

The Executive Director, and his or her designee, is authorized and directed to execute and file applications on behalf of the RTA with the United States Department of Transportation ("USDOT"), Federal Transit Administration ("FTA"), the Illinois Department of Transportation ("IDOT"), and any other funding agency (collectively the "Funding Agencies") for any monies available for funding of the RTA Annual Budget. The Executive Director, and his or her designee, is authorized to furnish such additional information, assurances, certifications and amendments as the Funding Agencies may require in connection with such applications or the projects. The Executive Director, and his or her designee, is authorized and directed on behalf of the RTA to execute and deliver grant agreements and all subsequent amendments thereto between the RTA and the Funding Agencies. Further, the Executive Director, and his or her designee, is authorized and directed to take such action as he or she deems necessary or appropriate to implement, administer, and enforce said agreements and all subsequent amendments thereto on behalf of the RTA.

Section Seven:

Direction to File this Ordinance with Public Officials.

TThe Executive Director is authorized and directed to file the 2013 Budget and Program and a copy of this Ordinance with the Governor of Illinois, the Illinois General Assembly, the Comptroller of the State of Illinois, the Mayor of the City of Chicago and the Auditor General of the State of Illinois, along with an appropriate certification that this budget and program meet the requirements of the Act.

Schedules to Ordinance 2013-01 can be found in the Appendices under Exhibit 10-23.

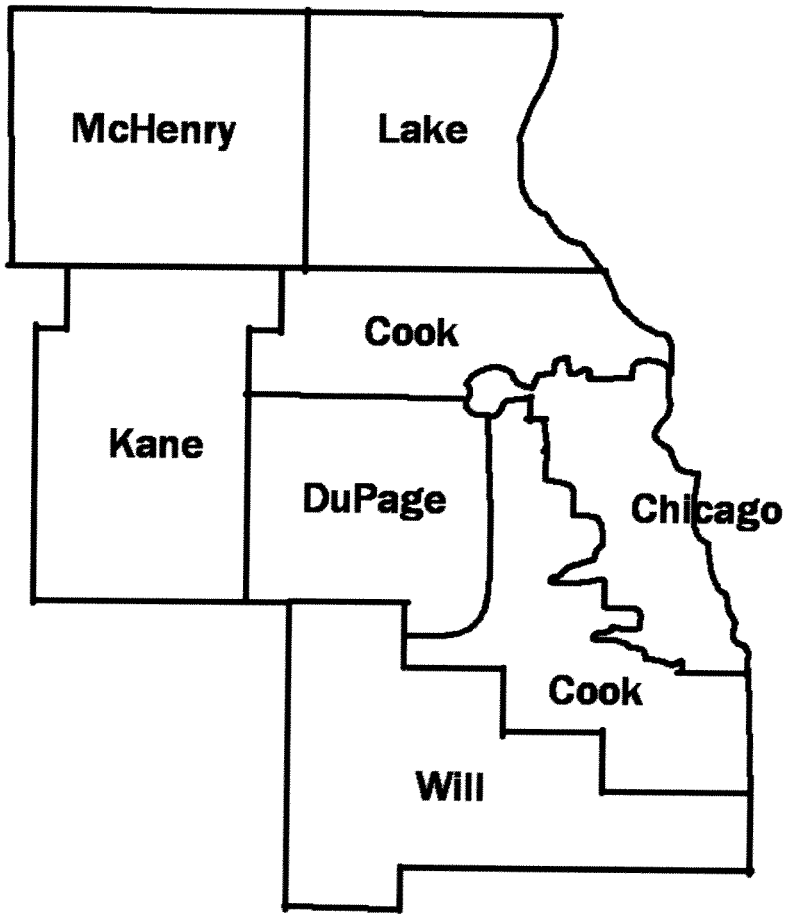
GFOA Distinguished Budget Presentation Award

The Government Finance Officers Association of the United States and Canada (GFOA) presented an award of Distinguished Presentation to the Regional Transportation Authority, Illinois for its annual budget for the fiscal year beginning January 1, 2012.

In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communication device.

The award is valid for a period of one year only. We believe our current budget book continues to conform to program requirements, and we are submitting it to the GFOA to determine its eligibility for another award.

2 Regional Summary



Overview

The Regional Transportation Authority (RTA or "Agency") provides funding, planning, and fiscal oversight for regional bus and rail operations in Northeastern Illinois as set forth by the RTA Act, as amended. The RTA's six-county region encompasses the Illinois counties of Cook, DuPage, Kane, Lake, McHenry, and Will. The Act designates the RTA as the primary public body in the region to secure funds for public transportation. The RTA is authorized to impose taxes in the region, issue debt, and is responsible for the allocation of federal, state and local funds to finance both the operating and capital needs of public transportation in the region.

The RTA Board of Directors governs the Agency. Three independent Service Boards, the Chicago Transit Authority (CTA), Metra, and Pace, have operational responsibility for public transportation within the six-county region and are governed by their own separate boards of directors (Exhibit 2-1). The CTA provides bus and heavy rail service in the City of Chicago and 35 neighboring suburbs. Metra provides commuter rail service throughout the six-county region. Pace provides bus service within the suburbs and between the suburbs and the City of Chicago, and also provides Dial-a-Ride, vanpool, and ADA Paratransit service for the entire region.

Each year, the RTA Board must adopt an annual budget, two-year financial plan, and five-year capital program for each Service Board. The principal features of this process are outlined in the following paragraphs. The RTA Act requires the RTA Board to approve the funding "marks" for each Service Board by September 15th. The marks include the projected funding levels for the annual operating budget, two-year financial plan, and the five-year capital program, and also stipulate the required recovery ratio for each Service Board's annual budget.

Exhibit 2-1: **RTA & Service Board Structure**

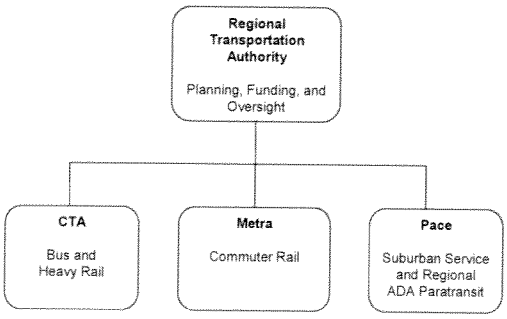


Exhibit 2-2: **Financial Relationship and Responsibilities of the RTA and Service Boards**

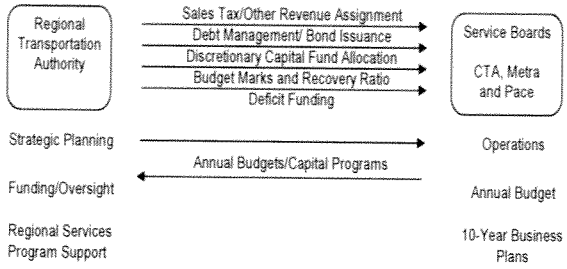

The marks guide the development of the Service Boards' budgets. Each Service Board prepares and publishes, for public hearing and comment, a proposed budget and capital program document that conforms to the RTA marks. After considering public comment, the CTA, Metra, and Pace board members adopt their respective budgets. In November, the adopted budgets are submitted to the RTA, which consolidates the Agency and the Service Board budgets into a proposed RTA regional budget and capital program document. The RTA Board releases this document for public hearing and comment before considering the regional budget for adoption in December. Exhibit 2-2 illustrates the principal responsibilities and interactions between the RTA and Service Boards in the annual budget and capital program process.

Service Characteristics

The six-county Northeastern Illinois region has more than 8.3 million residents and spans 3,749 square miles. The RTA system includes more than 6,000 buses, rail cars, and locomotives, plus over 700 vanpool vehicles. The system provides almost two million rides per day on more than 350 routes through approximately 380 stations, as shown in Exhibit 2-14. The combined assets of the RTA system, including the CTA subway tunnels, have a replacement value of over $151 billion. With an average asset life of over 25 years, the RTA system needs more than $1 billion in capital funds each year just to keep the existing infrastructure in a State of Good Repair.

SERVICE LEVEL CHANGES

Changes in 2013 RTA service levels will be relatively minor. CTA implemented a de-crowding initiative in December 2012 which reallocated some bus service to other bus and rail routes. Metra service levels will be unchanged in 2013. Pace Suburban Service plans modest service expansions of existing Call-n-Ride, express bus, and vanpool services, while Pace Regional ADA Paratransit will expand existing service as necessary to meet customer demand. In total, these service level changes are projected to increase RTA system vehicle revenue miles by 3.4% in 2013.

RIDERSHIP

Following two consecutive years of strong ridership growth in 2011 and 2012, the RTA system is projecting a ridership decrease of 1.7% to 651.9 million rides in 2013 (Exhibit 2-3). CTA ridership is expected to decrease by 2.4% due to both a fare increase and a major track reconstruction project on the southern end of the Red Line. Metra expects nearly flat ridership due to a price increase on the 10-ride ticket. Pace Suburban Service expects ridership growth of 3.9%, driven by modest service expansions and continued promotion of its vanpool programs. Finally, Pace Regional ADA Paratransit expects strong ridership growth of 5.9% for its service, somewhat lower growth than in recent years.

Budget and Financial Plan

Exhibit 2-4 displays the consolidated 2013 RTA regional operating budget and two-year financial plan adopted by the RTA Board on January 16th, 2013. Actual and estimated results for 2011 and 2012 are included for comparison purposes. This comprehensive view of the RTA system operating budget includes all Service Board operating revenues and expenses, all RTA revenues and expenses, and all public funding for the region. The RTA expects combined 2013 operating revenues and public funding to slightly exceed operating expenses, resulting in a balanced budget. The regional financial plans for 2014 and 2015 are also projected to be balanced.

Exhibit 2-3: **RTA Ridership By Service Board** (in millions)

	2011 Actual	2012 Estimate	2013 Budget
CTA	532.0	542.8	529.6
Metra	82.7	81.4	81.5
Pace	33.7	35.4	36.8
ADA Paratransit	3.5	3.8	4.0
Region	**651.9**	**663.4**	**651.9**
Change:	+2.9%	+1.8%	-1.7%

OPERATING REVENUE

Service Board operating revenue comprises 41.8% of total regional revenues for 2013 (Exhibit 2-5), with public funding providing the balance of required revenue for the system. Operating revenue of $1.144 billion is expected in 2013, an increase of 7.2% from 2012. Operating revenue growth is then projected to slow to 4.6% and 3.3% in 2014 and 2015, respectively.

About 85% of operating revenue comes from passenger fares, but significant amounts are also generated by Service Board advertising and concessions, and by a State reimbursement to the Service Boards to partially offset the cost of providing mandatory free ride and reduced fare programs. The State Reduced Fare Reimbursement, although a public funding source, is presented with operating revenue because it represents a replacement of passenger fare revenue. Exhibit 2-6 displays the growth in operating revenue by Service Board for 2013, driven by fare increases at CTA and Metra, and by ridership at Pace and ADA Paratransit. In-depth discussions of operating revenues are contained in the RTA and Service Board chapters.

PUBLIC FUNDING

Public funding, comprising the remaining 58.2% of total regional revenues, is projected at $1.591 billion in 2013, representing an increase of 3.6% from 2012 as the economy continues to recover and generate increasing sales tax receipts. A regional sales tax, imposed at a rate of 1.25% in Chicago and Suburban Cook County and at a rate of 0.5% in the five collar counties, is the RTA's primary public funding source

(1) Service Board Revenues include State Reduced Fare Reimbursement. Public Funding excludes State Reduced Fare Reimbursement.

(2) Beginning in 2012, statutorily required local contributions from the City of Chicago and Cook County will be reclassified from Operating Revenue to Public Funding.

(3) Funds for Service Board or RTA Regional Capital Projects available from funds related to legal settlements from debt service deposit agreements, reprogrammed funds from completed RTA-funded projects, and 2011 RTA discretionary positive budget variance that has been designated for capital use by the RTA Board.

(4) Adjusted in 2012 to reflect the total of the Service Board estimates of annual Reduced Fare Reimbursement which was $262 thousand less than the RTA 2012 estimate. Other RTA Revenue includes income from financial transactions and investments, sales tax interest, and revenues from RTA programs and projects.

(5) Additional revenue and/or funding needed to cover projected ADA Paratransit expenses.

Exhibit 2-5: **2013 Regional Revenues** - $2.735 billion

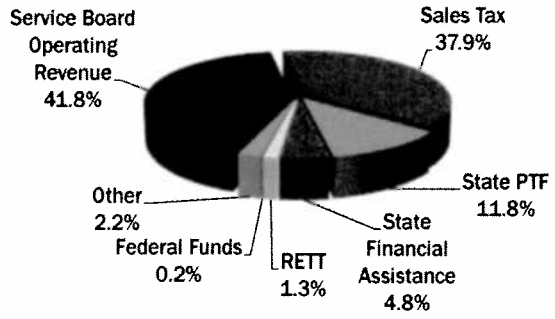

Exhibit 2-6: **2013 Operating Revenue Growth by Service Board**

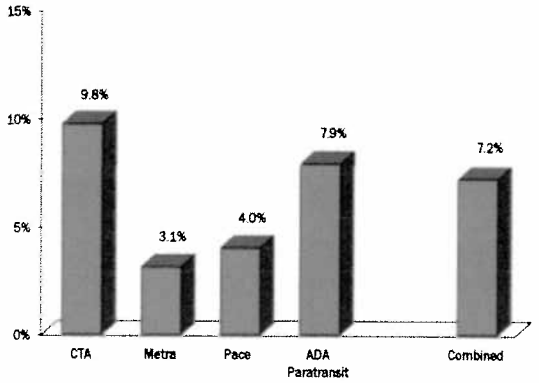

Exhibit 2-7: **Primary RTA Public Funding Sources**

RTA Sales Tax Part I: The original RTA sales tax, levied at 1.0% in Cook County and 0.25% in the collar counties of DuPage, Kane, Lake, McHenry, and Will. 85% of Sales Tax I receipts are distributed to the Service Boards according to a statutory formula. The remaining 15% of Sales Tax I is initially retained by the RTA to fund regional and agency expenses before being allocated at the discretion of the RTA Board.

RTA Sales Tax Part II: Authorized by the 2008 funding reform, an additional sales tax of 0.25% in all six counties of the RTA region. Sales Tax II is distributed to the Service Boards according to a statutory formula after deducting funding for ADA Paratransit, the Pace Suburban Community Mobility Fund (SCMF), and the RTA Innovation, Coordination, and Enhancement (ICE) Fund.

Real Estate Transfer Tax (RETT): The 2008 funding reform also increased the City of Chicago RETT by $1.50 per $500 of property transferred, and dedicated this additional tax revenue to directly fund CTA operating expenses.

Public Transportation Fund (PTF) Part I: PTF Part I is State-provided funding comprised of a 25% match of Sales Tax I receipts. 100% of PTF I is retained by the RTA and combined with Sales Tax I to form the basis of discretionary funding.

Public Transportation Fund (PTF) Part II: PTF Part II, authorized by the 2008 funding reform, is State-provided funding equal to a 5% match of Sales Tax I receipts and a 30% match of Sales Tax II receipts and RETT receipts. PTF II is distributed to the Service Boards by a statutory formula.

State Financial Assistance: State-provided assistance to reimburse the RTA's debt service on Strategic Capital Improvement Program (SCIP) bonds. It consists of two components; Additional State Assistance (ASA) and Additional Financial Assistance (AFA).

State Reduced Fare Reimbursement: State-provided reimbursement to the Service Boards, via the RTA, to partially offset the cost of providing reduced fare and free ride programs mandated by law, including those for students, seniors, and disabled persons.

for transit operations, accounting for almost 38% of total regional revenues. Sales tax receipts are expected to total $1.037 billion in 2013, an increase of 2.75% from 2012.

The second largest source of public funding is the Public Transportation Fund (PTF), generated by a 30% State of Illinois match of RTA sales tax and Chicago Real Estate Transfer Tax receipts. The State also provides additional financial assistance which is associated with RTA debt service, and additional funding for ADA Paratransit service. Rounding out the public funding sources for operations are the Real Estate Transfer Tax (RETT) in the City of Chicago only, which directly funds CTA operations, a small amount of federal funding, local contributions, and RTA-generated revenue from regional programs and investments. The RTA's primary public funding sources are summarized in Exhibit 2-7. An in-depth discussion of public funding, including details of the 2008 funding reform and the methods of allocation to the Service Boards, is included in the RTA chapter.

Exhibit 2-8: **2013 Regional Expenses** - $2.729 billion

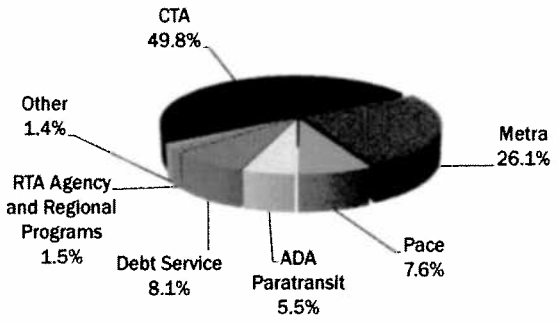

Exhibit 2-9: **2013 Operating Expense Growth by Service Board**

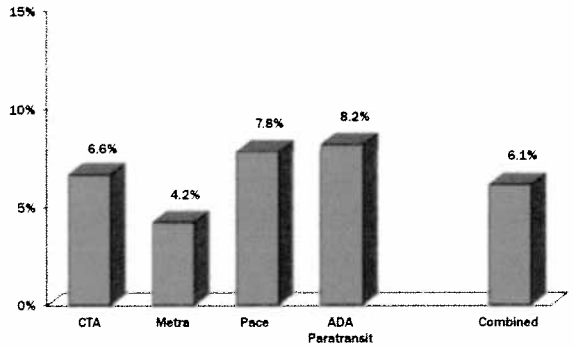

EXPENDITURES

Total regional expenses for 2013 are projected at $2.729 billion, an increase of 5.4% over 2012. Regional expense growth is then projected to slow to 2.7% and 3.2% in 2014 and 2015, respectively. Service Board operating expenses represent the largest component of total regional expense at $2.428 billion or 89.0%, followed by debt service at 8.1%, RTA Agency and Regional Programs at 1.5%, and Other expenses at 1.4% (Exhibit 2-8). The Other category includes regional expenses for Innovation, Coordination, and Enhancement (ICE), the Joint Self-Insurance Fund (JSIF), and RTA funds designated for Service Board capital use.

Service Board operating expenses are projected to increase by 6.1% in 2013, as shown in Exhibit 2-9. CTA's operating expense growth of 6.6% is being driven by a snapback in their Other expense category, which was temporarily reduced in 2012 by the liquidation of their Pension Obligation Bond reserve fund. Modest expense growth of 4.2% at Metra is resulting from contractual wage adjustments and increases in fuel and maintenance expenses. Pace Suburban Service's sharp expense growth of 7.8% is being driven by significant service expansions and new technology requirements (funded partly by grant revenues), while ADA Paratransit expense growth of 8.2% is resulting from continued strong demand for its service, coupled with contractor price increases.

Exhibit 2-10: **Budgeted Positions - RTA Region**

	2012 Budget	2013 Budget	Change
CTA	9,206	9,381	+1.9%
Metra	4,331	4,331	+0.0%
Pace	1,498	1,549	+3.4%
RTA Agency	122	119	-2.5%
Region Total	**15,157**	**15,380**	**+1.5%**

Exhibit 2-10 displays the total budgeted positions for the Service Boards, RTA, and region as a whole, which are expected to increase by 1.5% in 2013. In-depth discussions of operating expenses and all other regional expenses are included in the Service Board and RTA chapters.

Five-Year Capital Program

The 2013-2017 capital program adopted by the RTA Board on January 16th, 2013 contains $4.374 billion of funding for capital projects. Funding sources as a percent of the total capital funding, as shown in Exhibit 2-11, are as follows: Federal funding 51.2%, CTA bond proceeds 22.9%, State funding 17.5%, carryover from 2012 funding 3.2%, Pace bond proceeds 2.3%, Service Board and local funds 2.2%, and RTA funds 0.7%.

The planned uses of these funds by asset category are shown in Exhibit 2-12, with rolling stock represent-

Exhibit 2-11: **2013-2017 Capital Funding** - $4.374 billion

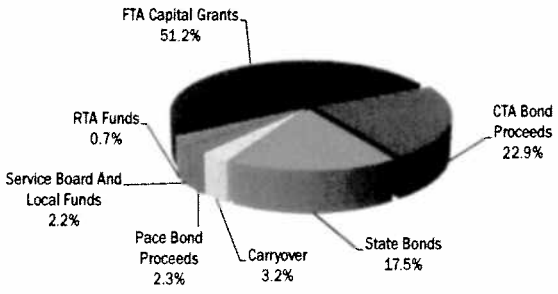

Exhibit 2-12: **2013-2017 Capital Uses** - $4.374 billion

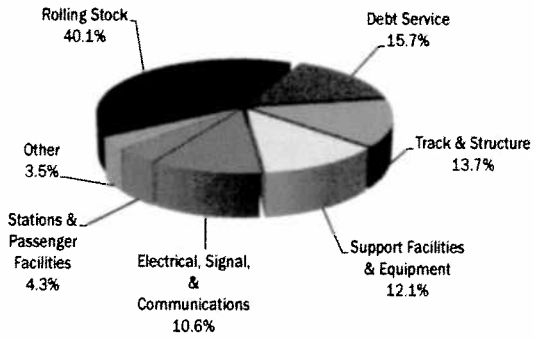


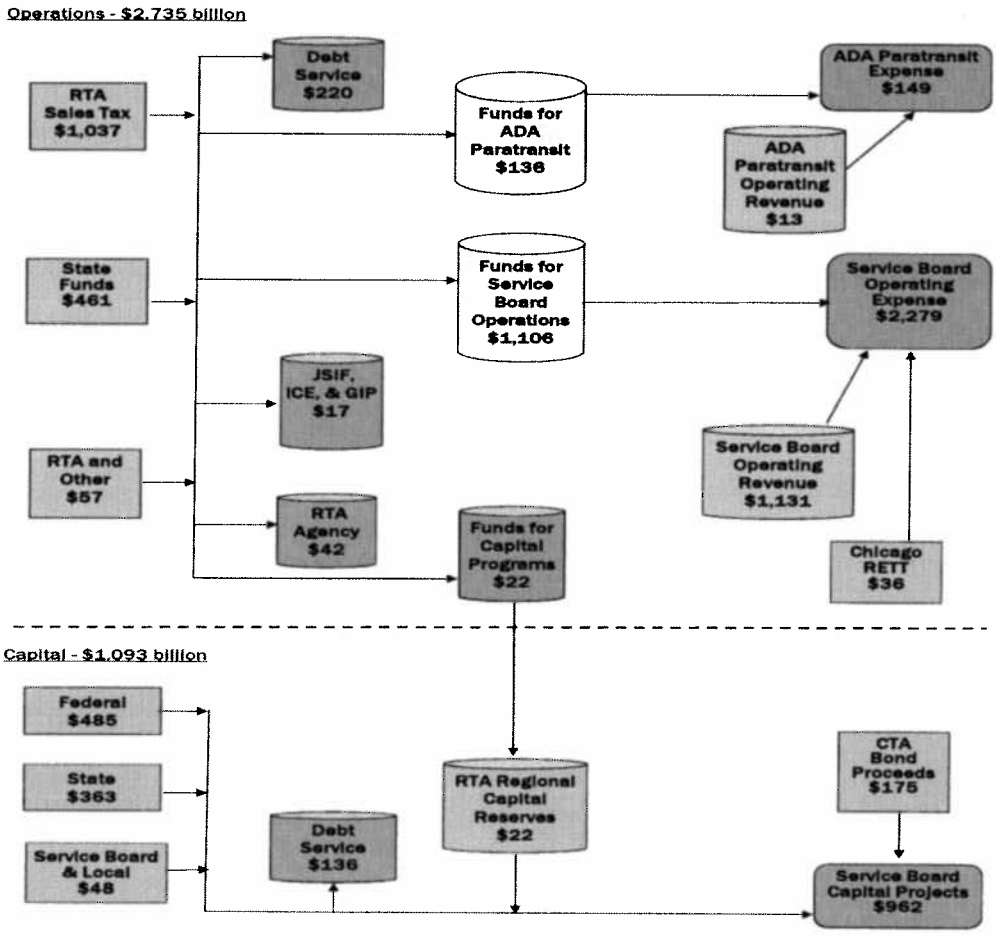
ing the largest area of capital investment at $1.754 billion or 40.1% of expenditures. The other planned expenditures and their percent of the total program are as follows: track and structure $599 million or 13.7%, support facilities and equipment $529 million or 12.1%, electrical, signal, and communications $464 million or 10.6%, stations and passenger facilities $190 million or 4.3%, and other $153 million or 3.5%. Finally, payment of debt service accounts for the remaining $685 million or 15.7%.

$1.093 billion of the $4.374 billion five-year program is planned for expenditure in 2013. Please reference the Capital chapter for further details on the 2013 and five-year capital programs and how they will impact region-wide operations.

Sources and Uses of Funds

Exhibit 2-13 summarizes the flow of the RTA system's 2013 operating and capital funds. Public funding of $1.591 billion and operating revenues of $1.144 billion, shown in dark green, combine to cover Service Board and ADA Paratransit operating expenses of $2.428 billion and other regional expenses of $301 million, shown in red. In 2013, the marks process allocated funds from prior years' RTA positive budget

Exhibit 2-13: **2013 Sources and Uses of Funds** - in millions



variances to the Service Boards for capital purposes, with $22 million provided for the CTA and Metra capital programs.

In addition to the $22 million of capital reserves from the RTA, the 2013 capital program is funded by $485 million of Federal funding, $363 million of State funding, $48 million of Service Board and local funding, and $175 million of CTA bond proceeds, shown in dark green. Debt service of previous and 2013 bond issues will consume $136 million of the total funding, leaving $962 million of funding available for Service Board capital projects in 2013.

3 RTA

RTA Operating Plan

Overview

This section focuses on the sources and uses of RTA operating funds. In addition to its planning and oversight roles, a critical function of the RTA is to receive and distribute operating funding to the three Service Boards which provide public transportation within the six-county Northeastern Illinois region: CTA, Metra, and Pace.

Budget and Financial Plan

Exhibit 3-1 displays a five-year view of the RTA's operating funding. The 2013 budget and 2014-2015 two-year financial plan are presented, and 2011 actual and 2012 estimated figures are included for comparison purposes. Unlike Exhibit 2-4 in the regional summary chapter, this view of the RTA's finances excludes the Service Boards' operating revenues and operating expenses, and focuses solely on those funds which are handled by the RTA.

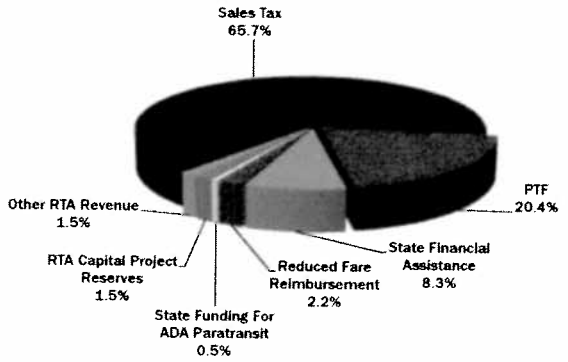
The 2013 budget anticipates $1.578 billion of funding for RTA operations, an increase of 3.4% over the 2012 estimate.

RTA FUNDING SOURCES

The 2013 budget anticipates $1.578 billion of funding for RTA operations, an increase of 3.4% over the 2012 estimate. Funding is then projected to increase to $1.599 billion in 2014 and $1.649 billion in 2015. A regional sales tax comprises almost two-thirds of RTA operating funding, and the State Public Transportation Fund (PTF), which is based on sales tax receipts, represents another one-fifth of the funding (Exhibit 3-2). Thus, an accurate forecast of sales tax receipts is critical to the integrity of the RTA budget process.

Again, these projections only include funds handled by the RTA, and thus exclude some sources that fund the Service Boards directly, such as federal funding, local contributions, and Chicago's Real Estate Transfer Tax (RETT), a portion of which directly funds CTA operations. A detailed discussion of the individual RTA funding sources for 2013 follows.

Exhibit 3-2: **2013 RTA Funding Sources** - $1.578 billion



Sales Tax

The RTA Sales Tax (Part I and II) is authorized by Illinois statute and imposed by the RTA throughout the six-county Northeastern Illinois region, but at differing rates in order to recognize the differing levels of transit service provided. The RTA Sales Tax is collected by the Illinois Department of Revenue, paid to the Treasurer of the State of Illinois, and held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are paid directly to the RTA monthly, without appropriation, by the State Treasurer on the order of the State Comptroller.

As shown in Exhibit 3-3, following an estimated increase of 3.4% in 2012, total sales tax revenues are projected to increase by 2.75% to $1.037 billion in 2013. This forecast of somewhat lower growth than 2012 was based on federal, state, and regional sources, which all suggested that economic activity would slow in 2013. In 2014 and 2015, RTA sales tax revenues are estimated to increase by higher

(1) In accordance with a 2009 Memorandum of Understanding, State funding was guaranteed for two years and then set to end based on conditions defined in the MOU, which were achieved within the guarantee period, ending funding after 2011.

(2) Funds for Service Board or RTA Regional Capital Projects available from funds related to legal settlements from debt service deposit agreements, reprogrammed funds from completed RTA-funded projects, and 2011 RTA discretionary positive budget variance.

(3) Pace Suburban Service funding includes SCMF and SSJA.

(4) Pace ADA Paratransit Service funding excludes budget balancing actions in 2014 and 2015.

Exhibit 3-4: **2013 RTA Sales Tax I By Source** - $765.1 million

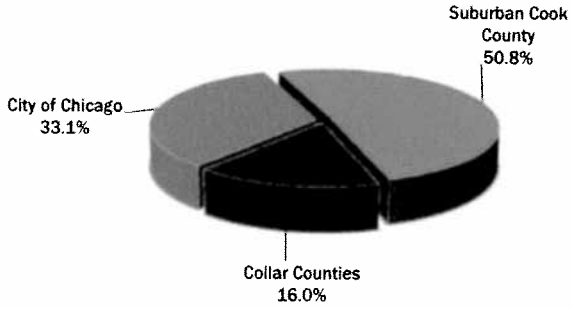

Exhibit 3-5: **Distribution of RTA Part I Sales Tax**

Collected in	Distributed to CTA	Metra	Pace	Total
City of Chicago	100%	0%	0%	100%
Suburban Cook County	30%	55%	15%	100%
Collar Counties	0%	70%	30%	100%

Exhibit 3-6: **2013 RTA Sales Tax II By Source** - $271.5 million

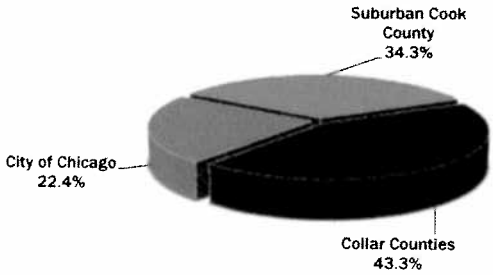

Exhibit 3-7: **Distribution of RTA Part II Sales Tax**

Collected in	Distributed to (after special uses) CTA	Metra	Pace	Total
City of Chicago	48%	39%	13%	100%
Suburban Cook County	48%	39%	13%	100%
Collar Counties	48%	39%	13%	100%

rates of 3.2% and 3.5%, respectively, again consistent with economic projections, and are forecast to reach $1.107 billion in 2015.

Part I of the RTA Sales Tax ("Sales Tax I") is the equivalent of 1% on sales in Cook County and 0.25% on sales in DuPage, Kane, Lake, McHenry, and Will Counties (the "collar counties"). More specifically, Sales Tax I in Cook County is 1% on food and drugs and 0.75% on general merchandise, with the State of Illinois then providing a replacement amount to the RTA equivalent to 0.25% of general merchandise sales. Sales Tax I receipts for 2013 are projected at $765.1 million. Actual sales tax receipts for 2011 were used to forecast the geographic source of projected Sales Tax I collections in 2013. Suburban Cook County produced the largest share of Sales Tax I at 50.8%, followed by the City of Chicago at 33.1%, and finally the collar counties at 16.0% (Exhibit 3-4). The share of Sales Tax I sourced from Chicago has been increasing steadily since 2002, when it was 30.2%. The RTA retains 15% of Sales Tax I and distributes the remaining 85% to the Service Boards according to a formula specified in the RTA Act (Exhibit 3-5) which ties the geographic source of the sales tax to the relevant service provider(s).

Public Act 95-0708 (P.A. 95-0708) was enacted in January 2008 and established the RTA Sales Tax Part II ("Sales Tax II"). This legislation increased the RTA sales tax rate from 1% in Cook County to 1.25% and the sales tax rate in the collar counties from 0.25% to 0.75%. The collar county tax increase is divided evenly between the RTA and the county where the tax is collected. Thus, the rate of the sales tax that the RTA receives from the collar counties doubled (from 0.25% to 0.50%). Sales Tax II receipts for 2013 are projected at $271.5 million.

From a geographic standpoint, the collar counties account for the largest share of Sales Tax II collections, at 43.3%, followed by suburban Cook County and the City of Chicago (Exhibit 3-6). Sales Tax II differs from Sales Tax I in that it is distributed to the Service Boards independent of where it was collected. However, prior to Service Board distribution, deductions are made from Sales Tax II to provide funding for ADA Paratransit, Pace's Suburban Community Mobility Fund (SCMF), and the RTA's Innovation, Coordination, and Enhancement (ICE) fund. Legislation passed in 2011 requires the RTA to fully fund the ADA Paratransit operating deficit each year. In the 2013 budget, $127.8 million of Sales Tax II has been designated to fund ADA Paratransit. By statute, the SCMF (originally $20 million) and the ICE fund (originally $10 million) increase or decrease by the annual change in sales tax collections, with 2008 set as the base year. For 2013, the SCMF is projected at $21.1 million and the ICE fund at $10.6 million. After these three deduc-

tions, the entire remaining balance of Sales Tax II is allocated to the Service Boards by statutory formula (Exhibit 3-7), with CTA receiving 48%, Metra 39%, and Pace 13%.

Public Transportation Fund

In accordance with the RTA Act, the State Treasurer is authorized and required to transfer from the State of Illinois' General Revenue Fund an amount equal to 30% of the revenue realized from the RTA sales tax and 30% of the revenue realized from the RTA's portion of the Real Estate Transfer Tax (RETT) in the City of Chicago. These Public Transportation Fund (PTF) receipts are indexed to increase or decrease at a rate equal to the growth or decline of both sales tax and RETT. PTF revenues are payable to the RTA upon State appropriation. However, none of the PTF revenues are actually paid to the RTA until the Agency certifies to the Governor, the State Comptroller, and the Mayor of the City of Chicago that it has adopted a budget and two-year financial plan as called for by the RTA Act.

Like sales tax, PTF is characterized as Part I or Part II, with PTF Part II created by the 2008 funding reform. PTF I is the equivalent of 25% of Sales Tax I, and is projected to be $191.3 million for 2013, an increase of 2.75% from 2012. 100% of PTF I, along with 15% of Sales Tax I, is initially retained by the RTA to cover expenses for regional debt service, the RTA Agency and Regional Programs, the South Suburban Job Access (SSJA) fund, and Joint Self-Insurance Fund (JSIF) premiums. The remainder is then allocated at the discretion of the RTA Board upon the review and approval of each Service Board's annual budget.

P.A. 95-0708 also increased the Real Estate Transfer Tax (RETT) in the City of Chicago by 50%, yielding $1.50 in CTA operating funding for every $500 of property purchase price. The RETT is projected at $36.2 million for 2013. Since this funding flows directly from the City of Chicago to the CTA, it is not included as an RTA funding source in Exhibit 3-1. However, PTF funds associated with the RETT (i.e. 30% of the RETT) do flow through the RTA.

PTF II is comprised of 5% of Sales Tax I, 30% of Sales Tax II, and 30% of the RETT. The 2013 projected amount of PTF II is $130.6 million, an increase of 2.8% from the 2012 estimate. By statute, the CTA receives five-sixths (25 percentage points) of the 30% PTF on the RETT. The remaining PTF II revenues are distributed to the Service Boards in the same proportions as Sales Tax II.

Schedule I-D of RTA Ordinance 2013-01 (found in the Appendices) contains a detailed accounting of the source and distribution of all Part I and Part II funding components for the 2013 budget and 2014-2015 financial plan.

State Financial Assistance (SFA)

This RTA funding source is state-authorized assistance to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds. State Financial Assistance has two components: Additional State Assistance (ASA) for SCIP I bonds and Additional Financial Assistance (AFA) for SCIP II bonds. Subject to the appropriation of funds by the State of Illinois, the RTA will continue to be eligible to receive these State Financial Assistance payments. In 2013, the RTA expects to receive $130.2 million of this funding from the State of Illinois.

State Reduced Fare Reimbursement

This funding source provides partial reimbursement from the State to the Service Boards for the fare discounts and free ride programs they provide which are mandated by law. The reimbursement includes discounts for students, elderly, and disabled riders as well as free ride programs for seniors and disabled persons who meet income eligibility requirements. These funds are provided by the State of Illinois and distributed through the RTA to the Service Boards. The projected amount for 2013 is $34.1 million, unchanged from 2012.

State Funding for ADA Paratransit

Originally established by a Memorandum of Understanding (MOU) in November of 2009, this funding,

designated for ADA Paratransit, has been provided by the State of Illinois in the amount of $8.5 million for each year since 2010. This funding is projected to continue at this same level in 2013 through 2015.

RTA Regional Capital Project Reserves

This funding source is comprised of RTA funds set aside for Service Board capital purposes. $22 million of RTA funds, mostly generated by excess 2011 sales tax and PTF receipts, were transferred into this reserve fund in 2012, with $15 million designated for CTA and $7 million designated for Metra. In addition, almost $1 million of proceeds related to legal settlements from debt service deposit agreements is held in this reserve to provide funding for the Grant Incentive Program (GIP). Accordingly, RTA Regional Capital Project Reserves are projected at $22.9 million for 2013.

Other RTA Revenue

Other RTA Revenue is projected at $23.4 million for 2013. This funding source consists of investment income, sales tax interest, and Agency revenue, comprised of both Agency operating revenue and grants for regional projects. Investment income is dependent on available cash balances and prevailing market rates. In addition, the State of Illinois pays interest on RTA sales tax receipts from the time of collection until receipts are disbursed to the RTA. The RTA then disburses 85% of the interest on Part I Sales Tax receipts to the Service Boards based on the same geographic formula used to allocate the Part I Sales Tax. Agency revenue includes advertising revenue from the RTA website and fees charged to employers for RTA Fare Checks that help offset the costs of administering that program. Agency revenue also includes matching grants obtained under federal, state and local programs for RTA regional planning, development, and technology efforts.

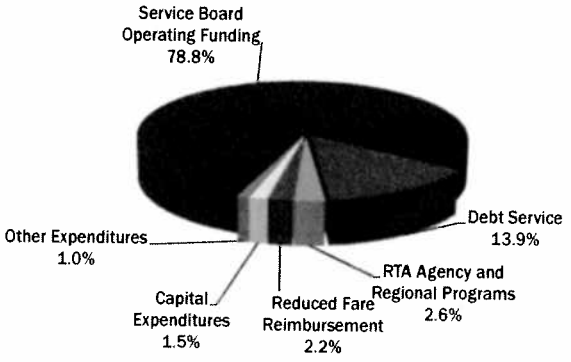
In total, other RTA revenue of $23.4 million is anticipated for the 2013 budget, increasing by 1.0% and 1.5% in 2014 and 2015, respectively.

EXPENDITURES

The 2013 budget projects that RTA expenses will increase by 2.6% over the 2012 estimate to $1.578 billion, exactly in balance with funding sources. Expenses are then projected to increase to $1.595 billion in 2014 and $1.641 billion in 2015, and are expected to be lower than funding in both of those years, producing a modest projected increase in the RTA fund balance.

Funding of Service Board operations represents the largest category of RTA expenses at 78.8%, followed by regional debt service at 13.9%, RTA Agency and Regional Programs at 2.6%, pass through of the State Reduced Fare Reimbursement at 2.2%, capital expenditures at 1.5%, and other expenses at 1.0% (Exhibit 3-8). A detailed discussion of the individual RTA expenses for 2013 follows.

Exhibit 3-8: **2013 RTA Expenses** - $1.578 billion



Service Board Operating Funding

The RTA's primary expenditure is the funding of the Service Boards' operating deficits. An operating deficit is the difference between a Service Board's operating revenue (farebox and other revenue sources such as advertising) and its operating expenditures. It may also be referred to as the funding requirement. Exhibit 3-9 displays the RTA expenses for Service Board operations for 2011 to 2015. Total RTA operating funding for the Service Boards in 2013 is projected at $1.243 billion and is expected to reach $1.320 billion in 2015. The compound annual growth rate of RTA's funding for Service Board operations across the five-year period is 3.9%.

Exhibit 3-9: **RTA Expenses for Service Board Operations** (dollars in millions)

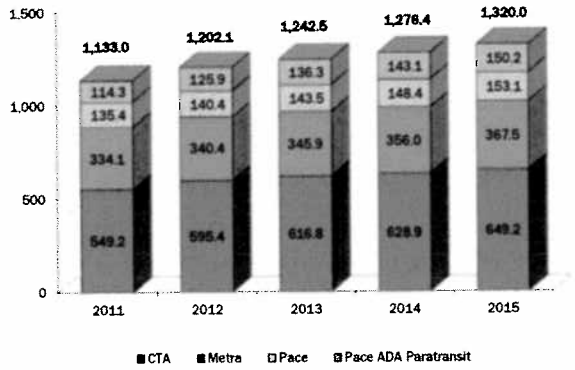


Exhibit 3-10 shows how 2013 RTA funding for operations relates to each Service Board's projected operating deficit. A detailed discussion of each Service Board's operating revenues and expenditures is provided in the CTA, Metra, Pace, and Pace ADA Paratransit chapters.

CTA will require $658.0 million of public funding to balance their budget, of which $616.8 million will be provided by the RTA. In addition to statutory sales tax and PTF, CTA will receive $181.0 million of RTA discretionary funding. The RTA's discretionary funds are sourced from PTF I and the RTA's share of Sales Tax I. After covering expenses for regional debt service, the RTA Agency and Regional Programs, South Suburban Job Access (SSJA), and JSIF premiums, any remaining funds are allocated at the discretion of the RTA Board, typically to provide operating funding for the Service Boards and/or to increase the RTA fund balance. For 2013, all available discretionary funding is being allocated to Service Board operations, with 98% going to the CTA and 2% going to Pace. External to the RTA, the RETT and $5 million of local contributions provided by the City of Chicago and Cook County round out CTA's required deficit funding.

Metra will require $347.1 million of public funding to balance their budget, of which $345.9 million will be provided by the RTA. Metra will not receive any RTA discretionary funding and will rely solely on statutory sales tax and PTF and a small amount of federal funding.

Pace Suburban Service will require $148.6 million of public funding to balance their budget, of which $143.5 million will be provided by the RTA. In addition to statutory funding, Pace will receive $3.7 million of RTA discretionary funding, an increase of 23% over 2012. Pace also receives RTA funding from two dedicated funds established by P.A. 95-0708. The Suburban Community Mobility Fund (SCMF) provides grants to Pace for operating transit services that enhance suburban mobility including, but not limited to: demand-response services, ride sharing, vanpooling, service coordination, centralized dispatching, reservations, reverse commuting, service restructuring, and bus rapid transit (BRT). The South Suburban

Exhibit 3-10: **2013 Service Board Operating Funding** (dollars in thousands)

Service Board	CTA	Metra	Pace Suburban Service	Pace ADA Paratransit	Total

Federal Funds	-	1,200	5,062	-	6,262
Local Contributions	5,000	-	-	-	5,000
Total Funding for Operations	**$ 658,044**	**$ 347,140**	**$ 148,596**	**$ 136,267**	**$ 1,290,047**

Job Access (SSJA) fund provides financial resources to Pace for the development of operating programs that enhance access to job markets for residents in southern Cook County. SCMF for 2013 is projected at $21.1 million, while SSJA is a fixed amount of $7.5 million. Federal funding of $5.1 million rounds out Pace's required deficit funding.

Finally, Pace Regional ADA Paratransit will require $136.3 million of public funding to balance their 2013 budget, with $127.8 million sourced from Sales Tax II and PTF II and $8.5 million provided by the State of Illinois via the RTA.

Innovation, Coordination, and Enhancement Fund

P.A. 95-0708 also established an RTA fund for Innovation, Coordination, and Enhancement (ICE). Like the $20 million SCMF, the $10 million base amount of the ICE fund changes at the same rate as regional sales tax collections. ICE funds are appropriated with the affirmative vote of 12 RTA directors for operating and capital grants or loans to the Service Boards, transportation agencies, or units of local government that advance the goals and objectives of the RTA Strategic Plan. However, if the RTA Board determines that an emergency exists, then by an affirmative vote of 12 members, funds may be used for urgent operating or capital needs. For the 2013 budget, the ICE fund is projected at $10.6 million and is forecast to increase to $10.9 million in 2014 and $11.3 million in 2015.

State Reduced Fare Reimbursement

State of Illinois funding for reduced fare and free ride programs is received as revenue by the RTA and passes through to the Service Boards as an expenditure to help defray a portion of the operating revenue lost in providing mandated free and reduced fare programs. Expenditures in the amount of $34.1 million are expected annually from 2013 through 2015.

RTA Agency and Regional Programs

Expenditures for Agency and Regional Programs for 2013 are projected at $41.7 million, representing 2.6% of total RTA expenses. This category is further subdivided into Agency expenses of $18.4 million, Regional Services expenses of $14.6 million, and Regional Projects expenses of $8.7 million. A detailed discussion is contained in the Agency Operating Plan section of this chapter.

Principal and Interest

Principal and interest payments, the second largest category of RTA expenses, reflect the RTA's expenditures for debt service on RTA SCIP and non-SCIP bonds that finance Service Board capital projects. The amount also includes debt service costs for RTA working cash notes required because of delays in receipts of PTF and financial assistance from the State, which are running up to six months in arrears. In 2013, principal and interest payments are expected to decrease by 1.8% to $220.0 million, an amount that is projected to remain constant in 2014 and 2015. Additional bond information is provided in the Reference section of this chapter.

Transfer Capital and Grant Incentive Program

For 2013, $22 million is budgeted to be transferred from RTA Capital Reserves to both CTA ($15 million) and Metra ($7 million) for capital purposes. The funding for these transfers, largely from 2011 excess sales tax and PTF receipts, was authorized in the marks ordinance passed by the RTA Board on October 10, 2012. The RTA Grant Incentive Program, which provides matching funds to assist in the Service Boards' applications for discretionary grants, is budgeted at $1.6 million for 2013, and increases to $1.8 million in 2014 and 2015.

Joint Self-Insurance Fund

The RTA provides excess liability insurance to protect the self-insurance programs maintained by the Service Boards. The Service Boards are obligated to reimburse the fund for any damages paid plus interest. Premium payments for the Joint Self-Insurance Fund (JSIF) in 2013 are budgeted at $5.0 million, an amount which is projected to be unchanged for 2014 and 2015.

FUND BALANCE

In 1998, the RTA Board adopted an ordinance establishing a minimum level in the unreserved and undesignated fund balance of 5% of total RTA operating expenditures. The intent of the ordinance was to maintain a minimum level of financial resources to be available for supplemental operating funding during unfavorable economic periods. Specific details of this policy are contained in the Introduction chapter. Exhibit 3-11 shows the projected RTA fund balances for 2011 through 2015.

Beginning Balance

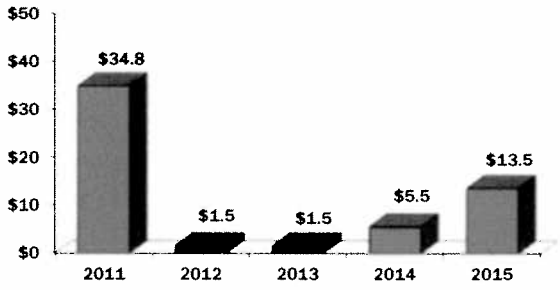
The beginning balance is the amount of funds in the undesignated and unreserved fund balance after the previous year's financial results have been audited and the accounting books have been closed. The beginning balance for 2011 was $7.3 million.

Change In Fund Balance / Ending Fund Balance

Total RTA revenues less total RTA expenditures equal the annual change in fund balance. When revenues exceed expenditures, the surplus increases the fund balance. When expenditures exceed revenues, the deficit reduces the fund balance. The RTA fund balance increased to $34.8 million in 2011 as sales tax, PTF, and other RTA funding sources exceeded budgeted levels. In 2012, the fund balance is estimated to decrease to $1.5 million due to the re-allocation of the 2011 RTA positive budget variance for regional and Service Board capital purposes.

In the funding marks approved on October 10, 2012, the RTA Board allocated all available discretionary funding in 2013 to the Service Boards, keeping the projected fund balance unchanged at $1.5 million. However, in 2014 and 2015 the Board set aside $4 million and $8 million, respectively, of discretionary funding towards the fund balance, resulting in a projected ending balance of $13.5 million in 2015, representing 1.0% of total operating expenditures.

Exhibit 3-11: **RTA Ending Fund Balance** (dollars in millions)



This gradual increase in the RTA fund balance was planned in order to avoid a sharp reduction in Service Board discretionary funding. Restoration of the 5% minimum fund balance will be a key financial goal of the RTA in upcoming years.

RECOVERY RATIO

The RTA Act requires the RTA Board to set a system-generated revenue recovery ratio for each Service Board for the upcoming fiscal year. This recovery ratio equals total operating revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. The RTA Act further requires that the combined system revenue from RTA operations equal at least 50% of the system operating cost, excluding Pace ADA Paratransit service. This 50% regional result is contingent upon the CTA, Metra, and Pace achieving their recovery ratio marks of 52%, 53%, and 30%, respectively (Exhibit 3-12). Each Service Board's 2013 budgeted recovery ratio meets or exceeds their required mark, and as a result the RTA system-generated revenue recovery ratio for 2013 is expected to be 55.9%, exceeding the statutory requirement by a significant margin.

Exhibit 3-12: **2013 Service Board and RTA Recovery Ratios**

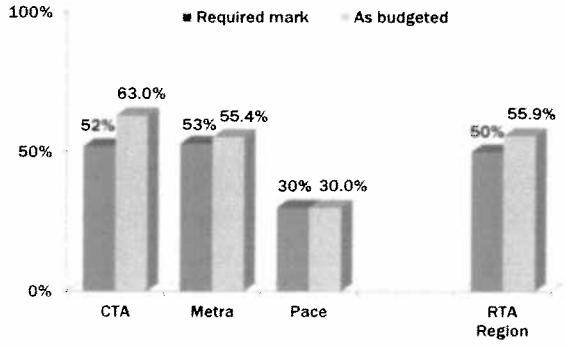


Exhibit 3-13: **RTA Statement of Revenues and Expenses - 2012 Estimate vs. 2012 Budget** (dollars in thousands)

	2012 Budget	2012 Estimate	Variance

Other Funding & Reserves	-	(22,000)	(22,000)
Ending Balance	**$ 26,087**	**$ 1,500**	**$ (24,587)**
Ending Balance as % of Total Expenses for Operations	**2.1%**	**0.1%**	**-2.0%**
Regional Recovery Ratio	**51.0%**	**56.6%**	**5.6%**

(1) Funds for Service Board or RTA Regional Capital Projects available from funds related to legal settlements from debt service deposit agreements, reprogrammed funds from completed RTA-funded projects, and 2011 RTA discretionary positive budget variance.

In meeting the 50% recovery ratio, the RTA Act requires that the revenue figures include all receipts consistent with generally accepted accounting principles, with certain allowed exceptions. Detail of this calculation is provided in Exhibit 3-34 at the end of this chapter.

2012 Budget versus 2012 Estimate

A comparison of the 2012 RTA operating budget to the revised estimate of 2012 results is shown in Exhibit 3-13.

RTA FUNDING SOURCES

Total RTA funding sources of $1.526 billion are favorable to budget by $22.0 million. Sales Tax I and II and PTF I receipts are expected to exceed budget by 1% due to a slowly improving local economy. PTF II is expected to exceed budget by a wider margin of 2.8%, since part of PTF II is based on the RETT, which performed strongly in 2012 as the housing and commercial real estate markets improved. State funding for ADA Paratransit of $8.5 million was appropriated after the 2012 budget was adopted, resulting in a favorable variance of the same amount. Other RTA revenue has increased $8.0 million from budget as additional grants for regional projects have been received. The only unfavorable funding variance is $10.5 million of RTA Capital Project Reserves, as less reprogrammed funds from other RTA projects were available than had been anticipated.

EXPENDITURES

Total 2012 RTA estimated expenses of $1.537 billion are unfavorable to budget by $33.1 million. Combined RTA expenses for CTA, Metra, and Pace Suburban Service operations are $10.9 million unfavorable to budget due to the distribution of the favorable sales tax and PTF receipts mentioned above. Due to increased ridership, ADA Paratransit required $10.9 million of additional operating expenditures, comprised of $8.5 million of State funding and $2.4 million from the RTA. Agency Expense and Regional Programs are $8.4 million unfavorable to budget as the additional grant funding mentioned above is expended on regional projects. Small unfavorable variances also exist in ICE fund expenditures (due to higher sales tax) and the State Reduced Fare Reimbursement as higher State funding is passed through to the Service Boards. Estimated debt service, capital expenditures, and JSIF premiums are unchanged from the 2012 budget. Finally, the Grant Incentive Program (GIP) was initiated by the RTA after the 2012 budget had been adopted, so $2.2 million of expense for this program appears as an unfavorable budget variance.

FUND BALANCE

When the 2011 books were closed, the beginning unreserved / undesignated fund balance for 2012 was restated higher, by $8.4 million, to $34.8 million. However, the unfavorable 2012 RTA expense variance discussed above exceeds the favorable 2012 RTA funding variance discussed above by $11.0 million, producing an unfavorable variance in the change in fund balance of the same amount. The transfer of $22.0 million to Regional Capital Reserves, not anticipated in the 2012 budget, also transpired during the year, producing a further decrease in the fund balance. The net effect of these changes is a projected 2012 ending fund balance of $1.5 million, unfavorable to budget by $24.6 million.

Agency Operating Plan

Budget and Financial Plan

The RTA Agency advanced a priority based budgeting approach in 2013 that concentrated on the "Regional Priorities Initiative" and the key Agency initiatives that advance the RTA's core mission as the funding, planning, and oversight agency for transit in Northeastern Illinois. These initiatives reflect the RTA's collaborative work with the Service Boards to increase ridership, reduce costs, and increase revenues, while simultaneously focusing on improving customer service.

The 2013 Operating budget was developed in two parts. The first part is the RTA Agency Administrative Budget, the second part is the RTA Regional Programs Budget.

Since the 2008 recession, the RTA has worked hard to hold the line on expenses. Between 2008 and 2012, public funding to the Agency grew by only 0.4%, with the RTA experiencing no or negative growth in funding in 2008, 2009, and 2012. For 2013, the RTA increased its funding growth equal to the Service Boards' funding growth of 3.8% for a total budgeted public funding amount of $32.97 million.

Consistent with the priority based approach, the 2013 Operating budget was developed in two parts. The first part is the RTA Agency Administrative Budget, which includes the core agency expenses for staff, facilities, information technology, office services, and professional services to support the funding, planning and oversight mission of the RTA Agency. The second part is the RTA Regional Programs Budget, which includes Regional Services provided directly to the public by the RTA such as the ADA Paratransit Certification Program, RTA Travel Training Program, Travel Information Center, Customer Service Center, Reduced Fare and Transit Benefit Programs. The FTA and State required Rail Safety Oversight Program for CTA Rail is also included. The Regional Programs Budget also includes all of the RTA's grant funded programs, as well as RTA funded regional studies and initiatives.

Separating the operating budget into these two parts lends greater transparency to the central funding, planning, and oversight functions of the RTA and specific areas of budget growth.

As detailed in the following section, the RTA Agency Operating Budget emphasizes growth in the Regional Programs Budget, which increases by 4.9% while the Administrative Budget increases by only 2.9%. The end result is a budget that is truly representational of the RTA's mission in the region.

The RTA Agency budget and financial plan presented in Exhibit 3-14 meets the funding marks set by the RTA Board on October 10, 2012.

OPERATING REVENUE

The 2013 operating budget includes operating revenue (Administrative and Regional Programs) of $8.7 million from the transit benefit program, reduced fare and free ride program, New Freedom (NF), Job Access Reverse Commute (JARC) programs, and RTA initiatives funded by federal grants. This amount is $3.1 million or 26.5% lower than the 2012 estimate due to fewer NF and JARC programs. In 2014 and 2015, estimated revenues reflect an increase of 3.2% and 3.5% respectively (Exhibit 3-15).

Agency Administrative Operating Revenue

Agency Administrative Operating Revenue from marketing and advertising is projected to be $8.3 thousand in 2013.

Regional Services Revenue

Total Regional Services revenue of $1.2 million represents 3% of the total operating revenue. Customer Service and Fare Program revenue is projected to be $105,000, slightly higher than the 2012 estimate. Transit Benefit Program revenue of $1.1 million is projected to be 20% less than in 2012 as it transitions to a debit card based system.

Regional Programs Grant Revenue

Total Regional Programs grant revenue of $7.5 million represents 18% of the total operating revenue. It includes grants from Job Access Reverse Commute

Exhibit 3-14: **Agency 2013 Budget and 2014-2015 Financial Plan** (dollars in thousands)

OPERATING BUDGET

	2011 Actual	2012 Estimate	2013 Budget	2014 Plan	2015 Plan

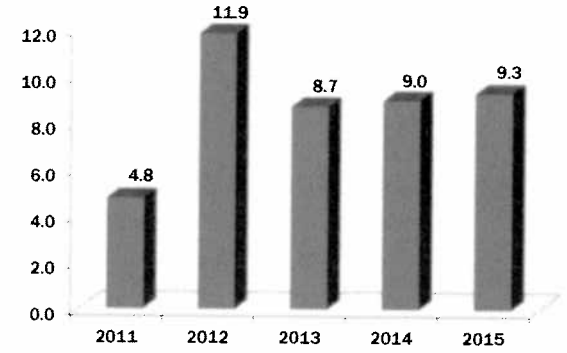

Exhibit 3-16: **RTA Agency Public Funding** (in millions)

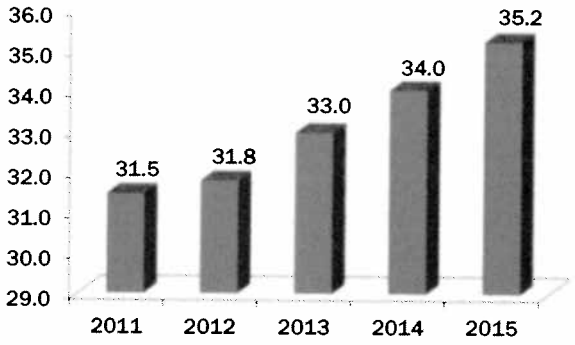


(JARC), New Freedom, and Unified Work Program (UWP) federal funding programs. These grants are directed toward regional programs that will advance the Regional Priorities Initiative. The level of grant funding is about 28% or $3.0 million lower than last year.

PUBLIC FUNDING

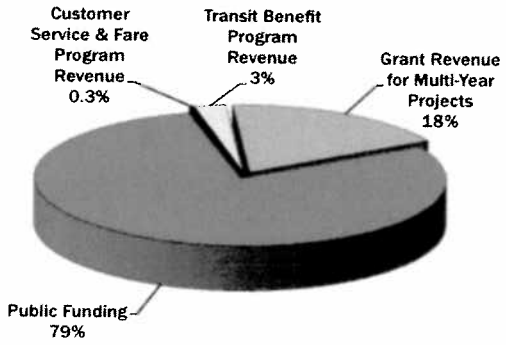
The 2013 Agency budget includes a 3.8% growth over the 2012 budget. In 2013, the total budgeted public funding required for the RTA Agency is $32.97 million. Public funding projections also increase by 3.2% and 3.5% in 2014 and 2015 respectively (Exhibit 3-16).

Public funding provides 79% of the total RTA Agency revenue with the remaining 21% generated from operating revenue (Exhibit 3-17).

OPERATING EXPENDITURES

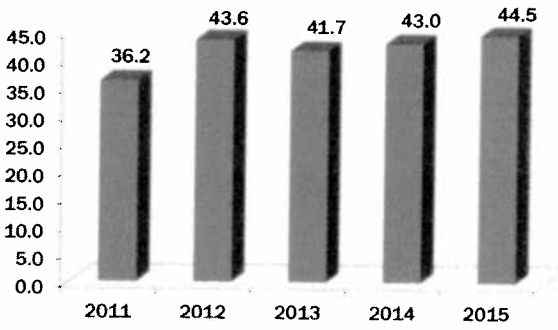
The 2013 operating budget includes total operating expense (Administrative and Regional Programs) of $41.7 million (Exhibit 3-18). The RTA Agency Administrative Budget includes core agency expenses for staff, facilities, information technology, office services, and professional services and accounts for 44% of RTA Agency expenses or $18.4 million. The RTA Regional Programs Budget includes $14.6 million for Regional Services provided directly to the public by the RTA such as ADA Paratransit Certification Program, RTA Travel Training Program, Travel Information Center, Customer Service Center, Reduced Fare and Transit Benefit Programs, as well as the FTA and State required Rail Safety Oversight Program for CTA Rail. The Regional Programs Budget also includes all of the RTA's grant funded programs, as well as RTA funded regional studies and initiatives $8.7 million. The Regional Programs budget comprises the remaining 56% of the operating budget expenses or $23.3 million.

Exhibit 3-17: **2013 RTA Agency Revenue - $41.7 million**



The RTA Agency Operating Budget emphasizes growth in the Regional Programs and goals outlined by the Regional Priorities Initiative, which increases by 4.9% while the Administrative Budget increases by only 2.9% over the 2012 budget. The Operating Budget includes a 2.5% increase for eligible staff salaries below the senior staff level, the first salary increase since 2009.

Exhibit 3-18: **RTA Agency Operating Expense** (in millions)



Expenditure Elements

Administrative Expenses

Personnel

Personnel related costs, such as salaries, pension, health care, training and other personnel items represent 29% of the total expense budget. This amount represents a 1.5% increase over the 2012 budget primarily due to a modest salary increase.

Professional Services

Professional services, which include audit fees, financial advisory services, Project Management Oversight (PMO), legal and legislative consulting fees, represent 9% of the total expense budget and reflect a 60% increase over the 2012 estimate as a result of higher PMO for CTA infrastructure projects, increased level of external audit consulting fees, and higher legal fees for the ongoing sales tax litigation.

Office Services and IT Programs

Rent, utilities, maintenance, telephone, various general office and computer supplies, and IT capital initiatives account for 6% of the total operating costs and reflect a 30% decrease in 2013 as projected costs for IT capital initiatives under the Agency Programs category will be funded from an IT capital reserve built over the period 2009-2012 for implementation of the IT Strategic Plan. Funding these initiatives over the past several years rather than the current year's public funding level allows us to focus on supporting other priority areas.

Regional Programs Expenses

Regional Services

In the Agency budget, $14.6 million or 35% of the overall operating expenses are programmed for Regional Services or customer focused operations including direct costs to run these programs as well as RTA staff personnel costs. In 2013, this category will experience strong growth of 12% over the 2012 estimate.

Rail Safety Oversight

Rail Safety Oversight of $150,000 is 0.4% of the total operating expense budget and reflects an increase of $129,000 due to the federal triennial review in 2013. This amount does not include Rail Safety Oversight staffing costs, which are included as part of our oversight budget in the Finance and Performance Management Department.

Transit Benefit Program

Transit Benefit Program related expenses represent 2% or $0.6 million in our budget reflecting a 27% increase over the 2012 estimate due to the upgrade of the program to an electronic platform and debit card application.

Customer Service and Fare Programs

Customer service and fare programs of $6.3 million represent 15% of the total operating expenses and include the Customer Service Center operation at the CTA building, the TIC operation at the Metra build-

ing, and the Reduced Fare and Free Ride Programs. This category includes a 10% increase over the 2012 estimate due to the transition to the new CTA open fare payment system for Free and Reduced Fare passengers.

Regional Accessibility

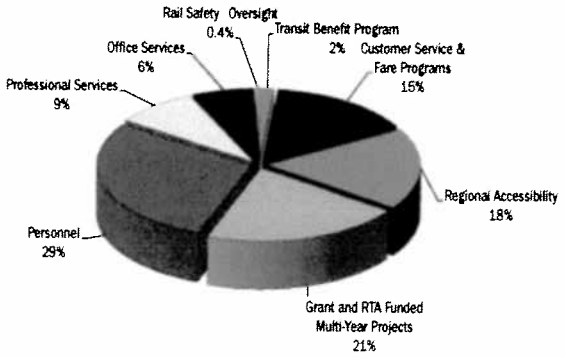
In the Agency budget 18% or $7.5 million is programmed to cover direct operations costs as well as personnel related costs of the ADA Paratransit Certification Program and RTA Travel Training program. This category shows a 10% increase reflecting an increase for the ADA Paratransit Certification program over the 2012 estimate due to a higher number of applicants.

Grant and RTA Funded Programs

Grant and RTA funded multi-year project expenses of $8.7 million represent 21% of the overall operating expense budget and reflect an overall decrease of 31% over 2012. This category includes Job Access Reverse Commute (JARC), New Freedom (NF), and Unified Work Program (UWP) federal funding programs as well as RTA funded initiatives such as Customer Satisfaction Survey, Capital Asset Condition Assessment, Capital Decision Prioritization Support Tool, and Market Analysis. The federal funding awarded for these programs is a decrease, therefore the initiatives that the RTA can fund through these programs has also decreased. The personnel costs to administer these programs are included in the Agency Administration Budget.

JARC and NF programs total $6.5 million, which is 16% of the total operating expenses and reflect a 23% decrease over 2012.

Exhibit 3-19: 2013 **RTA Agency Operating Expenses by Category** - $41.7 million



UWP federal funded programs of $1.5 million represent 3% of the total operating expenses. This category includes funding to enhance the Capital Decision Prioritization Support Tool, funds for market analysis, I-90 corridor service planning, and various community planning initiatives. The total federal funded programs in 2013 is 54% less than in 2012.

RTA funded programs of $0.7 million are 2% of the overall operating expenses and reflect a 19% decrease over 2012. Funds for Capital Asset Condition Assessment, Customer Satisfaction Survey, and Regional Transit Asset Management are budgeted in this category for 2013.

Exhibit 3-19 illustrates the Agency Operating Expense break down by category.

Agency Statutory Cap

In 1985, a statutory cap for administrative spending was set at $5 million, with a growth rate of 5% per year. The 2013 cap on Agency administrative expenses is $19.6 million. The 2013 RTA Agency proposed budget is below this cap with expenses for regional services and programs, including grant-funded projects, totaling $23.3 million thus leaving administrative expenses of less than $18.4 million or 6.3% below the statutory cap level. True administrative expenses are far lower, however, when adjusted for agency support of the regional programs.

* 2011 and 2012 budget headcounts are restated among departments to reflect organizational changes and to be comparable to the 2013 budget.

Organization

The Agency's 2012 budget included a staffing plan of 122 positions as a result of the 2011 organizational changes, which restructured some departments to improve Agency efficiencies and better align functions. The proposed plan for 2013 is 119 positions, which is lower than the 2012 plan by 3 positions (Exhibit 3-21). Decreases occurred in the Finance and Performance Management Department resulting in three less positions, a decrease of one position in the Government and Community Affairs Department, and a decrease of one position in the Planning Department. The Audit and Information Technology (IT) Departments are adding one new position each as a result of restructuring both departments during 2012. The decrease of one position in the Planning Department reflects a position transferred to the IT Department.

The Agency's functional organizational chart is presented in Exhibit 3-22. Exhibits 3-23 and 3-24 provide a breakdown of the Agency operating budget by department. The next pages describe each department briefly and highlight its main initiatives in 2013.

EXECUTIVE OFFICE

This department includes the RTA Board of Directors and organizations that support the RTA Chairman and Board of Directors, and it oversees and directs day-to-day agency activities.

The RTA Board of Directors consists of 15 members and a chairman. The RTA Board has the statutory authority to establish, by rule or regulation, the financial, budgetary, or fiscal requirements for the region's public transit system. The RTA Board and its committees set policy, authorize funding levels for the Service Boards, approve operating budgets and capital programs, consider matters relating to RTA operations and compliance with the American with Disabilities Act of 1990 (ADA), supervise audits, and consider planning studies and capital program investments. The Board has four standing committees - Planning and Administration, Finance, Audit, and Compensation and Human Resources - that review and recommend policy to the entire Board.

The Executive Director executes the policy decisions of the RTA Board and staffs the Agency to administer its statutory mission and implement Board policy. The Executive Director informs and assists the RTA Chairman and the Board in the development of policy, and is the principal contact with executive staffs of the CTA, Metra, and Pace to ensure effective administration of the RTA's regional planning and oversight responsibilities. The Secretary to the Authority provides Board and executive support functions by assisting with the information, documentation, and logistical needs of the RTA Board and the Executive Director.

Exhibit 3-22: **RTA Organizational Chart**

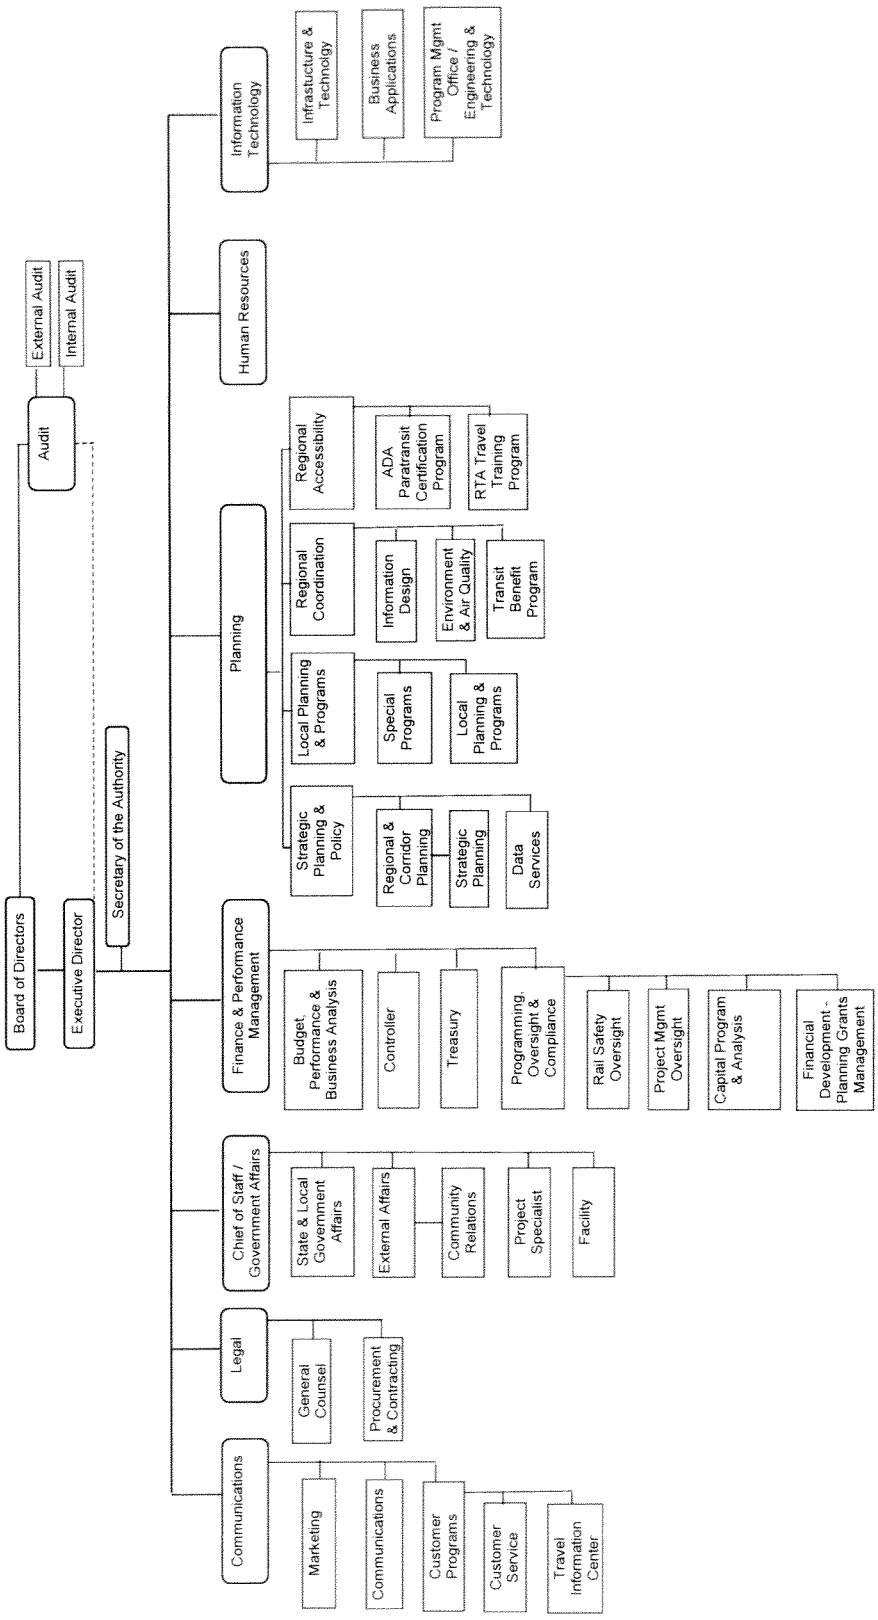

Exhibit 3-23: **2013 Agency Operating Expenses and Revenues by Department** (in thousands)

	Expense	Revenue	2013 Budget
Executive Director's Office and RTA Board	1,347		1,347
Audit	1,523		1,523
Chief of Staff / Gov't & Community Affairs	2,355		2,355
Communications and Customer Service	7,077	113	6,964
Finance & Performance Management	6,496	256	6,240
Human Resources	894		894
Information Technology	1,348		1,348
Legal	1,956		1,956
Planning and Regional Accessibility	18,695	8,346	10,348
TOTAL	$ 41,690	$ 8,716	$ 32,974

Total Administration is estimated to be slightly over budget due to higher personnel and office expenses and lower than expected advertising revenue.

Total Regional Programs are expected to be slightly under budget due to lower than expected ADA Paratransit Certification Program expense.

RTA Agency net results are zero for 2012 indicating revenues are equal to expenses

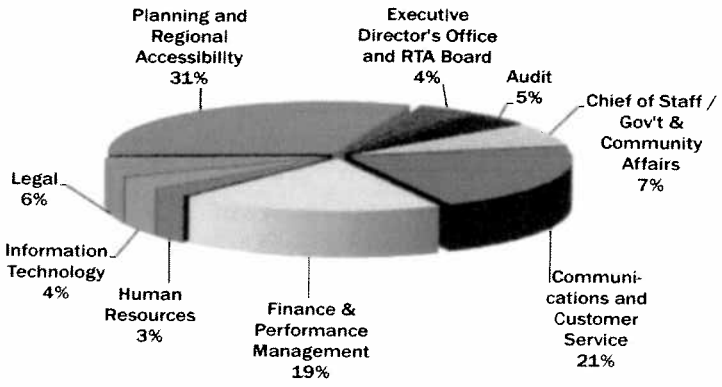
Regional Priorities Initiative

The RTA Agency budget, through the work plans of each department, is focused on supporting advancement of the Regional Priorities Initiative. As the region continues to recover from the economic recession, it is essential that the RTA focus on identifying areas for cost savings and improving efficiency while maintaining a commitment to enhancing public transit in the region. The RTA launched a series of five key priority initiatives in 2011 intended to advance a collective vision for the region's transit system.

The 2013 budget continues to use these priorities as a foundation:

- **Strategic Capital Investment** - Develop a strategic capital approach focused on identifying capital projects that could result in reductions in operating expenditures.
- **Economies of Scale** - Harness the RTA's and Service Boards' purchasing power to achieve cost savings and improved efficiency.
- **Maximize Use of the Transit System** - Provide a system-wide approach to improving coordination among services, access to reverse commute markets, and use of weekend and evening services.
- **Enhance the Customer Experience** - Focus on targeted capital and technology-related projects, interagency and way-finding signage, e-signage, service information, and fare payment coordination to best serve transit customers.

Exhibit 3-24: **2013 Agency Operating Budget by Department - $32.97 million**



- **Coordinate Government Affairs, Marketing, and Outreach** - Create a unified marketing, outreach, and government affairs agenda among the RTA and Service Boards to improve customer communications and increase coordination and leveraging of partners and other stakeholders.

AUDIT

This department was restructured in 2012 and the two functional areas, External Audit and Internal Audit are under the direction of a Deputy Executive Director of Audit who reports to the Board functionally and administratively to the Executive Director. The RTA has certain audit authority over the CTA, Metra and Pace to ensure that they are operating efficiently and effectively. The RTA's authority was strengthened as part of the amendments to the RTA Act in 2008.

The department's internal review and audit mission is to provide an independent, objective assurance and consulting activity designed to add value and improve the operations of the RTA. The internal audit function shall be functionally independent of all RTA operations and should be regarded as an internal consulting service for the RTA. Independence is essential to enable the internal audit function to accomplish its purpose.

Departmental Priorities:

- **Safeguarding Public Funds**
  - » Safeguard public funds, property, assets and resources against waste, loss and unauthorized use.

- **Supporting RTA's Role**
  - » Support the RTA's role of effectively and efficiently managing the agency and establishing an effective system of internal fiscal and administrative controls to provide assurance resources are utilized efficiently and in compliance with applicable laws.
  - » Ensure that adequate audit testing is performed on key departments and processes of the RTA and ensure recommendations made by internal and external auditors are implemented by the appropriate RTA staff.
  - » Maintain an adequate ethics training system for RTA employees and Board members.
  - » Ensure compliance with the requirements of the Ethics Act.

- **Oversight of RTA and Service Boards**
  - » Assisting the RTA in its oversight responsibilities by conducting financial, management and compliance audits and reviews at the three Service Boards and RTA.
  - » Based upon the 2013 Audit Plan and Annual Risk Assessment, conduct audits and/or reviews in areas identified as critical to the achievement of selected objectives and expectations and which enhance risk assurances. Several key audits for 2013 are the Cash & Treasury Review, and the Real Estate & Facilities Management Review.

- **Management Consulting Services**
  - » Perform selected consulting projects at management's request.
  - » Based upon the Annual Risk Assessment and Management's requests, review selected functions, activities, processes and procedures, and any newly developed systems before implementation to ensure adequate controls are in place and the necessary objectives are met.

CHIEF OF STAFF / GOVERNMENT AND COMMUNITY AFFAIRS

Starting in July 2012, the Government and Community Affairs Department's Senior Deputy Executive Director became the Chief of Staff and took on additional responsibilities working with all of the RTA staff to assist the Executive Director in furthering and executing the vision of the Chairman and Board. The Chief of Staff ensures RTA goals are being met and assists in determining long and short-term key initiatives as well as in daily operational issues. Effective October 2012, the Chief of Staff also oversees all facilities related functions for the RTA.

The Government and Community Affairs team is responsible for developing and promoting the RTA's

federal, state, and local government affairs agenda and promoting transit within the region. Among these roles, the department has key responsibilities in the Regional Priorities Initiative work programs related to the Coordinate Government Affairs, Marketing, and Outreach priority initiative.

Departmental Priorities:

- **State Government Affairs**
  - » Continue to advocate for state funding, both operating and capital.
  - » Work to pass legislation to stop the use of sales tax diversion schemes.
  - » Pass other legislation to advance the goals of the RTA.

- **Federal Government Affairs**
  - » Work with public relations team to develop a national campaign to increase funding for State of Good Repair work.

- **Community Affairs**
  - » Obtain public input by holding public hearings/meetings to communicate progress regarding the strategic plan, budgets, and capital programs, and to ensure processes are transparent.
  - » Coordinate and develop meeting agendas for Regional Citizens Advisory Board (RCAB) and ensure the Advisory Board is being well utilized.

- **Coordinate Government Affairs, Marketing, and Outreach**
  - » Establish a national campaign to advocate directly with state and federal legislators to promote increases in state and federal funding for State of Good Repair needs.
  - » Work with elected officials and civic leaders to strengthen RTA's connections within the six country region.

- **Strategic Capital Investment**
  - » Advance a $2.5 billion System Renewal Bond Program to bring the system into a State of Good Repair. This program will go toward the renewal and rehabilitation of vehicles, track and structure, and customer-impacting transit facilities.

- **Chief of Staff**
  - » Coordinate training of all staff on topics ranging from discrimination to procurement ethics. Continue to work on staffing issues and support needs.

COMMUNICATIONS

The Communications and Customer Service Department conducts communications efforts and marketing for each of the RTA's programs and initiatives. The Communications Department is also responsible for the management and operation of programs that directly serve regional customers including Customer Service, Travel Information Center (TIC), Reduced Fare, and Free Ride programs. The Communications Department has key responsibilities in the Regional Priorities Initiative work programs related to the Coordinate Government Affairs, Marketing, and Outreach; Maximize Use of the System; and Enhance the Customer Experience strategies. The department also collaborates with the Service Boards to promote their services and programs.

Departmental Priorities:

- **Enhance the Customer Experience**
  - » Support Planning Department initiatives targeted on technology related projects, service information, and fare payment coordination, all in an effort to best serve RTA customers.
  - » Promote RTA trip planner and any new features as the region's preferred travel resource that offers multi-modal trip planning.

- **Coordinate Government Affairs, Marketing, and Outreach**
  - » Communicate and publicize campaign led by Government and Community Affairs to educate stakeholders about the importance of the transit system to the region and encourage advocacy to influence legislators to commit stable and sufficient long-term funding.

  - » Campaign to promote transit and increase ridership in the RTA six-county region through the use of radio, billboards, car cards, exterior bus signage, bus wrap, events, ads, brochures, and press releases.
  - » Increase awareness in agencies offerings and promote a variety of transportation services and programs. Increase ridership with a strategic approach, promoting cost savings, services and programs.

- **Provide Customer Service and Support Reduced Fare/Ride Free Programs**
  - » Continue to evaluate improvements to Customer Service such as a centralizing customer service operations between the ADA, TIC, and Reduced Fare call centers and streamlining their operations.
  - » As part of the RTA Fare Program Transition, oversee the replacement of free and reduced fare cards with a new card compatible with the open fare system being implemented by CTA and Pace.

FINANCE AND PERFORMANCE MANAGEMENT

The Finance and Performance Management department is responsible for regional and agency budget development and analysis, regional performance measurement reporting, issuance of financial statements, capital program oversight, rail safety and program management oversight, and asset and debt management. It includes the following divisions: Budget, Performance & Business Analysis; Programming, Oversight & Compliance; Controller, and Treasury Divisions. The Finance and Performance Management Department has key responsibilities in the Strategic Capital Investment area of the Regional Priorities Initiative.

Departmental Priorities:

- **RTA Regional Budget Development and Financial Reporting**
  - » Develop sales tax forecasts and funding marks for Service Board operating budgets.
  - » Develop the consolidated regional Business Plan of the RTA, CTA, Metra, and Pace including Annual Operating Budget, Two-Year Financial Plan, and Five-Year Capital Program.
  - » Prepare monthly and quarterly reports for RTA Board analyzing regional ridership and financial performance.
  - » Conduct ongoing monitoring of RTA Agency budget performance.

- **Performance Measurement Reporting and Analysis**
  - » Work with the Service Boards to assess performance results and identify critical areas for management consideration.
  - » Implement a regional customer satisfaction measurement program.

- **Business Analysis of Regional Transportation Services**
  - » Develop and maintain a Ten-Year Financial Plan.
  - » Analyze strategies for increasing efficiency and effectiveness and improving long-term financial condition of the region.

- **Strategic Capital Investment**
  - » Continue development of a Capital Decision Prioritization Support Tool to evaluate and prioritize projects for inclusion in the Capital Program.
  - » Continue the annual update to the Capital Asset Condition Assessment collaboratively with the Service Boards to provide capital data input for the Capital Decision Prioritization Support Tool and Transit Asset Management (TAM) projects.
  - » Undertake business transformation efforts aimed at reducing operating costs and leveraging funds for capital investment, including the development of a tool to assess the operating cost impacts of capital projects.
  - » Develop a comprehensive Transit Asset Management (TAM) system by leveraging RTA and Federal Transit Authority (FTA) resources.

- **Rail Safety Oversight**
  - » Administer the Rail Safety Oversight (RSO) Program for the CTA's rapid transit system as required by the FTA and State. RTA will continue its State Safety Oversight (SSO) responsibilities including responding to and investigating accidents and management of hazards.

- **Project Management Oversight**
  - » Provide continuing oversight of Service Board capital projects to ensure capital funding is expended with maximum effectiveness and efficiency.
  - » Complete Project Management Oversight (PMO) reports to document Service Board efforts to maintain a State of Good Repair, including detailed scope, schedule, and budget information.
  - » With the Illinois Department of Transportation, provide "On-Site Construction Quality Assurance Services" for Chicago Transit Authority Dan Ryan Track Renewal project and other infrastructure projects to ensure timely concurrences, mitigate costly claims and change orders and ensure adherence to project baselines.

- **Capital Program Development and Grants Management**
  - » Facilitate capital grants issuance and administration and ensure compliance with all applicable federal, state and local regulations, grant contract amendments, and scope modifications.
  - » Work with the Illinois Department of Transportation and the Service Boards to manage the State Bond-funded program, prepare quarterly project status reports, and ensure compliance of the third party contracts with the applicable federal and state laws. Facilitate the reimbursement process between IDOT, RTA, and the Service Boards.
  - » Contribute to the development and financing of the RTA Bond program, analyze and monitor RTA Bond expenditures, calculate and monitor average useful life of assets.
  - » Review, analyze and process all capital project requisitions, prepare monthly requisition activity reports, and monitor expenditures.

- **Planning Grants Management**
  - » Manage all FTA grant applications and conduct all FTA grant reporting on a quarterly basis within the FTA's Internet-accessible grant application system.
  - » Monitor and process all Service Boards' requisitions for Reduced fare and ADA paratransit grant reimbursements administered by IDOT.
  - » Facilitate Intergovernmental Agreement (IGA) and Technical Service Agreement (TSA) creation as it relates to Planning Department projects.

- **Issuance of Financial Statements**
  - » Issue audited Comprehensive Annual Financial Report (CAFR), Popular Annual Financial Report (PAFR), Single Audit (OMB Circular A-133), Special-Purpose Combining Financial Statements, and Pension and Joint Self Insurance Fund (JSIF) Annual Reports for Board approval.

- **Conduct On-going Accounting Activities**
  - » Record, analyze, reconcile and maintain operating activities in the general ledger.
  - » Perform and process payroll, accounts payables, accounts receivables and other accounting functions.
  - » Analyze and adopt new GASB's as required from the GFOA for the CAFR to improve accounting and financial reporting for public.

- **Integrated Management System**
  - » Maintain and enhance the Integrated Management System (GP and Share Point) that provides information and analysis and promotes optimal efficiency.

- **Asset Management and Debt Management**
  - » Monitor and manage the RTA's investment assets and oversee and reduce Agency debt.

- **Liquidity Management**
  - » Manage the RTA's payment obligations and monitor the payment of State obligations to the RTA.

HUMAN RESOURCES

The Human Resources staff works to deliver high-quality, responsive services to ensure the agency has the necessary talent and resources to achieve its strategic goals. The Human Resources Department provides a variety of consulting services to employees, board members, and retirees such as: recruitment and retention, performance management, benefits and compensation, employee relations, wellness and employee morale activities, and organizational development.

Departmental Priorities:

- **Recruitment**
  - » Identify methods to improve the recruitment and selection of qualified, diverse candidates in the midst of low turnover and a competitive job market.

- **Training**
  - » Provide compliance training on the prevention of sexual harassment, discrimination, and workplace violence.
  - » Develop and implement a HR communication strategy to inform employees of benefits, practices and procedures in order to make sound decisions.

- **Policies and Procedures**
  - » Update and issue employee handbook.
  - » Increase the use of technology to perform transactional HR functions.

INFORMATION TECHNOLOGY

RTA leadership developed an Information Technology Strategic plan (ITSP), which included organizational and infrastructure assessments during the later part of 2012. The plan recognized an urgent need to restructure ITS operations and implement an infrastructure that will enable quick delivery of value-added business, application, employee, and network services. As a result of the reorganization, the department is under the leadership of a new Chief Information officer (CIO) and was restructured to functional areas: Infrastructure and Technical, which consists of network, systems administration, and help desk; Business Applications; Program Management Office/ Engineering & Technology.

Department Mission

To deliver customer-focused, efficient and effective information technology services that enable the RTA to achieve its core mission of ensuring a financially sound, comprehensive and coordinated public transportation system in the Northeastern Illinois region.

Department Goals

- Provide strategic planning and leadership on RTA technology investments.
- Ensure overall quality, reliability, availability, and security of RTA information systems for both employees and the traveling public.
- Identify and pursue opportunities for maximizing RTA performance through consolidation, economies of scale, and cost efficiencies.

Departmental Priorities:

- **Implement the Five-Year IT Strategic Plan**

- **Optimize Enterprise Operations**
  - » Build a resilient, secure and scalable IT infrastructure.
  - » Enhance employee productivity tools.
  - » Reduce operating expenses.

- **Optimize Business Operations**
  - » Enhance investment decision-making with data analytics.
  - » Utilize strategic sourcing opportunities.
  - » Establish regional standards and guidelines.
  - » Share solutions with Service Boards and other partner agencies.

- » Provide travelers with better tools to use transit.
- » Enhance investment decision-making with data analytics.

- **Optimize Information Technology Operations**
  - » Reorganize and migrate organization towards service delivery.
  - » Coordinate technology deployments.
  - » Improve IT processes and automate workflows.

LEGAL

The Legal Department provides legal advice and counsel to the RTA Board, Executive Director, and staff regarding the statutory and regulatory provisions governing the Authority; it also oversees all RTA transactions and litigation. In addition, the Procurement Division reports to the General Counsel. In this role the department has key responsibilities related to the Economies of Scale area of the Regional Priorities Initiative.

Departmental Priorities:

- **Provide Strategic Legal Counsel**
  - » Draft and review board documents, inter-agency agreements and procurement documents.
  - » Respond to inquiries from internal clients such as the RTA Board and provide Agency counsel.
  - » Continue to pursue Sales Tax Litigation against companies and municipalities who unlawfully divert sales tax revenues out of the RTA region.

- **Ensure Compliance with Federal and State Regulations**
  - » Administer Disadvantage Business Enterprise (DBE) Program.
  - » Implement Minority and Women Business Enterprise (M/WBE) Program.
  - » Implement a new Small Business Enterprise Program.
  - » Manage the Eligibility Review Board process (administrative appeals of ADA Paratransit Certification denials).

- **Investigate Equal Employment Opportunity (EEO) Complaints**
  - » Provide counsel to complainants and alleged offenders.
  - » Recommend resolution of complaints.

- **Provide training for RTA Board members and staff**

- **Deliver Efficient Procurement Services**
  - » Overhaul the procurement process.
  - » Increase staff training and improve timeline for delivery of routine and recurring services.

- **Records Administration**
  - » Manage contract with outside vendor providing records storage.
  - » Conduct periodic inventory review.

PLANNING

The Planning Department consists of four principal organizational areas. Three areas, Strategic Planning & Policy, Local Planning & Programs, and Regional Coordination provide strategic, regional, sub-regional and corridor planning and coordination with the Service Boards. The fourth area, Regional Accessibility, is responsible for the ADA Paratransit Certification Program and Accessibility & RTA Travel Training Program. The Planning Department has key responsibilities in the Maximize Use of System and Enhance Customer Experience areas of the Regional Priorities Initiative.

Departmental Priorities:

- **Enhance Customer Experience**
  - » Focus on targeted capital and technology related projects, inter-agency and way-finding signage, E-signage, service improvements (such as Wi-Fi), service information (such as "expanded bus tracker" type) and fare payment coordination all in an effort to best serve RTA customers.

- » Advance a Regional Fare Policy that addresses interagency, operational, revenue and customer facing issues related to the implementation of the Open Fare Payment system.

- **Maximize Use of Transit System**
  - » Maximize the use of the existing system by better tapping travel markets that have potential to use transit when and where the system is not running at capacity.
  - » Build on the strategic planning work conducted for the Northeastern Illinois Transportation Demand Management (TDM) project to implement a regional Transit Demand Management Setup, "Chicago Commute Options," which works with employers and employees to consider travel options beyond single occupancy vehicle trips.

- **Regional Accessibility**
  - » Manage, oversee, and perform daily program operation tasks related to the eligibility determination aspects of the certification process.
  - » Provide program management activities related to ADA and accessibility-related issues for all modes, particularly ADA paratransit.
  - » Work with Pace operations staff to analyze options for increasing the use of fixed route service in lieu of ADA paratransit service, particularly by customers who have conditional eligibility.
  - » Implement a Mobility Services Program to coordinate and centralize information about available transportation resources throughout the six-county region (including local and regional programs) and to educate the public – particularly people with disabilities, older adults, and other transportation disadvantaged populations – about what transportation resources exist and how to identify and use the least-cost option to meet their travel needs.

- **Local Technical Assistance**
  - » Manage the Community Planning and technical assistance programs and oversee 20 active planning grants and 22 projects, with 7 to 9 new projects initiated in 2013.
  - » Manage the Job Access Reverse Commute / New Freedom (JARC/NF) and ICE programs; oversee approximately 50 active operating, capital, and mobility management grants.
  - » Manage Transit Oriented Development (TOD) working group and the development of TOD strategic plan through partnerships with South Suburban Mayors and Managers Association (SSMMA), Metropolitan Planning Council (MPC), Urban Land Institute (ULI), and Chicago Metropolitan Agency for Planning (CMAP).

- **Transit Signal Priority**
  - » Project Management of $40 million Congestion Mitigation and Air Quality (CMAQ) grant for Transit Signal Priority (TSP) to CTA, Pace, IDOT and local transportation departments.

- **Transit Benefit Program**
  - » Administration and marketing of the Transit Benefit Program.
  - » Oversee the upgrade of the program to an electronic platform.

- **Corridor Studies**
  - » Evaluation of the I-55 Bus-on-Shoulder Pilot program and on-going analysis to support change in parameters to the pilot and prepare for two-year before and after study.
  - » Provide data analysis and leadership briefings for miscellaneous corridor studies. Projects include: Illiana, Cook DuPage Corridor, Chicago Union Station, Circle Interchange, Elgin O'Hare Western Bypass (EO-WB), I-55 Managed Lane, Southeast Service (SES), CTA Western/Ashland Bus Rapid Transit (BRT), CTA Red Line Extension, J-Line, Pace Arterial Rapid Transit (ART) Milwaukee, and CTA Red/Purple Modernization.

Reference

RTA Bonds

Much of the information in this section is sourced from the RTA's Comprehensive Annual Financial Report (CAFR). Since the 2012 CAFR is not yet available, the most recent financial data, through 2011, is presented.

The bonds issued by the RTA carry a rating of "AA" from Standard & Poor's, "AA" from Fitch IBCA, and "Aa3" from Moody's Investors Service, Inc. These represent solid investment grade ratings. The RTA has the distinction of being one of the highest rated public transportation agencies in the United States.

All bonds are general obligations backed by the full faith and credit of the RTA. These general obligation bonds, with a balance of $2.177 billion as of December 31, 2011, are divided into two types: $1.454 billion in Strategic Capital Improvement Program (SCIP) bonds and $723.3 million in general RTA bonds (Exhibits 3-25 and 3-26). The following paragraphs briefly discuss each outstanding bond issue in sequence.

In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source for paying costs of the Capital Program for the Service Boards.

In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for

rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001-2002, in the aggregate amount of $4 million, Series 1991A Bonds, maturing November 1 in the years 2002-2006, 2008 and 2011, in the aggregate amount of $29 million, Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million and Series 1993B Bonds, maturing June 1 in the years 2004-2009, 2013 and 2023, in the aggregate amount of $47 million.

In August 1999, the RTA issued $299 million in General Obligation Bonds, Series 1999, to provide funds to refund in advance of maturity the RTA's outstanding Series 1992A Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $114 million, Series 1993A Bonds, maturing June 1 in the years 2009 and 2013, in the aggregate amount of $10 million, Series 1994A Bonds, maturing June 1 in the years 2006-2009, 2012, 2015 and 2024, in the aggregate amount of $143 million and Series 1994C Bonds, maturing June 1 in the year 2025, in the aggregate amount of $22 million.

In June 2000, the RTA issued $260 million in General Obligation Bonds, Series 2000A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In April 2001, the RTA issued $100 million in General Obligation Bonds, Series 2001A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In March 2001, the RTA issued $38 million in General Obligation Bonds, Series 2001B, to provide funds to refund in advance of maturity the RTA's outstanding series 1993A Bonds, maturing June 1 in the years 2004-2008, in the aggregate amount of $38 million.

In March 2002, the RTA issued $160 million in General Obligation Bonds, Series 2002A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In June 2002, the RTA issued $200 million in General Obligation Bonds, Series 2002B, to provide interim funding, as needed for a portion of the costs in con-

nection with the reconstruction and expansion of rapid transit facilities operated by the CTA and to fund other public transportation projects.

In May 2003, the RTA issued $260 million in General Obligation Bonds, Series 2003A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

In January 2003, the RTA issued $150 million in General Obligation Bonds, Series 2003B, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In October 2004, the RTA issued $260 million in General Obligation Bonds, Series 2004A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005-2025, in the aggregate amount of $147 million.

In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

In January 2010, the RTA issued $62.2 million in General Obligation Bonds, Series 2010A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

In January 2010, the RTA issued $112.9 million in General Obligation Bonds, Series 2010B, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

Exhibit 3-27: **2002-2011 RTA Debt Service Requirements**
(dollars in thousands)

Year	Principal	Interest	Total
2002	27,262	86,264	113,526
2003	37,940	102,667	140,607
2004	40,430	119,272	159,702
2005	49,570	129,966	179,536

2008	64,685	127,870	192,555
2009	68,455	129,074	197,529
2010	74,060	127,934	201,994
2011*	919,110	133,331	1,052,441

* Temporary increase due to bond refinancing activity in 2011.

Exhibit 3-28: **2002-2011 Debt Service Requirement Test**
(dollars in thousands)

Year	Sales Tax Revenue	Debt Service Requirement	2.5 Times Debt Service
2002	647,685	113,526	283,815
2003	654,985	140,607	351,518
2004	675,628	159,702	399,255
2005	700,395	179,536	448,840
2006	746,829	178,086	445,215
2007	752,922	188,551	471,378
2008	921,245	192,555	481,388
2009	894,238	197,529	493,823
2010	931,435	201,994	504,985
2011*	975,670	1,052,441	1,175,310

* Temporary increase due to bond refinancing activity in 2011.

In July 2011, the RTA issued $95.6 million in General Obligation Bonds, Series 2011A, to pay when due, or refund in advance of their maturities a portion of the RTA's outstanding General Obligation Bonds, Series 2002B maturing from 2013 through 2019 and to pay Costs of Issuance of the Series 2011A Bonds.

RTA ordinance 85-39 requires that annual RTA revenues equal or exceed two and one-half times the RTA's annual debt service requirement. Exhibit 3-27 displays RTA's annual debt service requirements over the last ten years, and Exhibit 3-28 compares those requirements to annual sales tax revenue, the primary RTA revenue source, over the same period. The large increase in principal due in 2011 is related to bond refinancing, and does not reflect the true level of long term debt service for that year. As a result, the RTA temporarily exceeded its own revenue test in 2011, a

Exhibit 3-29: **Recent Bond Issues with Associated 2012 Expenditures** (dollars in thousands)

Bond Issue	Service Board	Capital Project	Expenditure

condition which is expected to be rectified when 2012 results are finalized. Any differences between debt service amounts presented and amounts shown in general purpose financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

The RTA and its Service Boards have put an emphasis on making sure that bond proceeds are spent in a timely and efficient manner. Exhibit 3-29 relates major 2012 capital project expenditures to their associated bond issue.

Fund Accounting

The accounts of the RTA are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are separated into its own set of accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled.

Major funds are funds whose revenues, expenditures/expenses, assets, or liabilities (excluding extraordinary items) are at least 10% of corresponding totals for all governmental or enterprise funds and at least 5% of the aggregate amount for all governmental and enterprise funds.

The RTA reports three major governmental funds—the General Fund, the Debt Service Fund, and the Capital Projects Fund; one major proprietary fund—the Joint Self-Insurance Fund; and two major fiduciary funds—the Pension Trust Fund and the Sales Tax Agency Fund (Exhibit 3-30).

(1) Reconciliation of budgetary basis to GAAP basis.

(2) Before reserves and designations.

GOVERNMENTAL FUNDS

The RTA's governmental funds are the General Fund, the Debt Service Fund and the Capital Projects Fund.

General Fund

The General Fund is the general operating fund of the RTA. It is used to account for all financial transactions that are not specifically required to be accounted for in the other funds. The General Fund and the Agency Fund are the only two funds that have annual budgets. Exhibit 3-31 displays the 2013 budget for these funds.

Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs. Revenues are generated from the funds being held for payment to the bondholders. The difference between the transfer and payment expenditures reflects year-over-year timing variances.

Capital Projects Fund

In 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of SCIP bonds

Exhibit 3-31: RTA Statement of Revenues and Expenditures, 2013 Budget, General and Agency Fund (dollars in thousands)

	General Fund	Agency Fund	Total Budget
RTA Funding Sources

and to have a maximum of $500 million of non-SCIP RTA bonds outstanding. The Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of these RTA bond issues. The first Capital Projects Fund was established in 1990 with the issue of $100 million of RTA bonds to fund capital projects at the Service Boards. The RTA allocated the proceeds from the bonds issued under the General Assembly's authorization as follows: 50% for CTA capital projects; 45% for Metra capital projects; and 5% for Pace capital projects. Projects included in approved five-year capital programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

Effective January 1, 2000, the RTA Act was amended to authorize the issuance of an additional $260 million of SCIP Bonds in each year for the period of 2000 through 2004 and to issue and have outstanding an additional $300 million of non-SCIP Bonds. These amounts were subsequently issued.

PROPRIETARY FUNDS

Proprietary funds are used for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has only one proprietary fund—the Joint Self-Insurance Fund.

Joint Self-Insurance Fund

The Joint Self-Insurance Fund (JSIF) is used to finance claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. This fund is reported as an enterprise fund since the predominant participants are outside of the RTA.

The JSIF distinguishes operating revenues and expenses from non-operating items. Operating revenues (interest charged to Service Boards) and expenses (administrative expenses including insurance premiums and professional services) generally result from providing services in connection with this proprietary fund's ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

FIDUCIARY FUND TYPES

Fiduciary funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's fiduciary funds consist of the Sales Tax Agency Fund and the Pension Trust Fund.

Sales Tax Agency Fund

The Sales Tax Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra, and Pace agencies, including Retailers' Occupation and Use Tax (sales tax), interest on this tax, reduced fare reimbursement grants, and federal operating assistance grants. The Agency Fund is custodial in nature (assets equal liabilities) and does not involve the measurement of results of operations. Sales tax revenues are recorded in the fund and are equally offset by expenditures passed through to the Service Boards.

Pension Trust Fund

The Pension Trust Fund is used to account for all accumulation of resources for, and the payment of, retirement benefits to employees participating in the RTA Pension Plan and Trust.

MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

RTA's government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund (Joint Self-Insurance Fund) and the Pension Trust Fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Sales taxes are recognized as revenues if collected by the retailer before year-end. Grants and similar items are recognized as revenues when qualifying expenditures have been incurred and as soon as all eligibility requirements imposed by the grantors have been met. Prepaid expenses are recorded using the consumption method.

Governmental fund financial statements use the current financial resources measurement focus. The funds are accounted for using the modified accrual basis of accounting; i.e., revenues are recognized as soon as they are both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or shortly thereafter to pay liabilities of the current period. Sales taxes are considered measurable and available if collected by the retailer by year-end and received by the RTA within 80 days after year-end. ASA/AFA is considered measurable and available if billed and received within 180 days after year-end. Sales taxes and ASA/AFA are susceptible to full accrual. Additionally, certain compensated absences and claims and judgments are recognized when the obligations are expected to be liquidated with expendable available financial resources.

Basis of Budgeting

The basis of budgeting refers to the conventions for the recognition of costs and revenues in budget development and in establishing and reporting appropriations. The RTA's annual budget and related appropriations are prepared on the modified accrual basis of accounting in conformity with generally accepted accounting principles, except for capital grants/expenditures and debt service payments. Modified accrual basis is a type of accounting whereby revenue and other financial resource increments (e.g., bond issue proceeds) are recognized when they become both measurable and available for finance expenditures of the current period. Capital grants/expenditures are budgeted for on a project basis, which normally exceeds one year. Debt service payments are budgeted as transfers from the General Fund.

Although appropriations are adopted for individual line items, the legal level of control is restricted to total appropriations/expenditures and total administration (statutory cap) appropriations/expenditures. Management has the authority to exceed any line appropriation without Board approval, provided it does not exceed the legal levels of control. It had been the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the Budget Ordinance. However, due to the unfavorable economic conditions in recent years and the depletion of funds in the undesignated / unreserved fund balance to preserve operating stability, the RTA again waived its fund to budget policy for the 2013 fiscal year.

Exhibit 3-32: **2011 Reconciliation of Budgetary Basis to GAAP Basis Accounting** (dollars in thousands)

	General Fund
Excess of expenditures over revenues and other financing use - budgetary basis	113,493
Adjustments	
Capital grant expenditures incurred in current year but considered in prior years' budgets	(6,907)
Capital grant expenditures expected to be incurred in future years but considered in current year budget	10,200
RTA capital expenditures expected to be incurred in future years but considered in current year operating budget	33
Budgetary basis to GAAP basis adjustment	**$ 3,326**
Net Change in Fund Balance - GAAP basis	116,818
Net Changes in Reserves	(89,321)

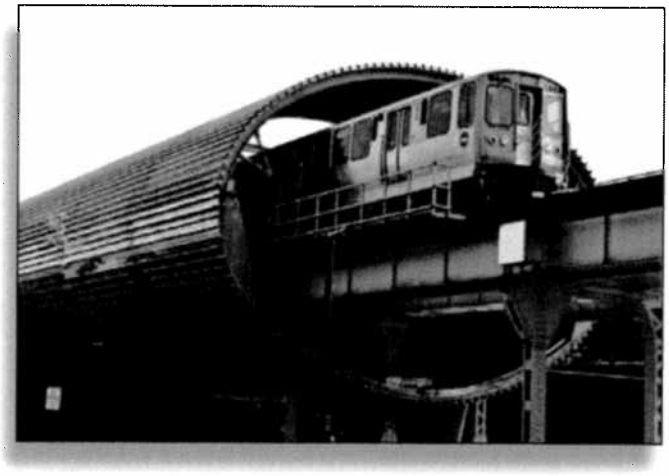
(1) The RTA Act permits certain revenue and expense adjustments for the recovery ratio calculation. The RTA, by means of ordinance, allows supplementary adjustments for Service Board calculations, but such adjustments are disallowed in determining the system-generated revenue recovery ratio for the region, which by statute must be at least 50%. Service Board adjustments include amounts that result in calculations that equal the "marks" set by the RTA. (2) CTA revenue adjustments include in-kind revenue for security services provided by the Chicago Police Department (CPD) and circuit ride free credits. Expense adjustments include in-kind costs for the CPD equal to the revenue credit, and credit for security, pension obligation debt service and some grant revenues. (3) Metra revenue adjustments include circuit ride free credits; expense adjustments include credits for security, depreciation and transportation facility leases. (4) Pace revenue and expense adjustments include in-kind Advantage program charges. (5) Does not include grant revenue or expense for JARC / New Freedom funded programs. (6) Regional revenue adjustments include a credit for a CTA lease transaction and exclusion of circuit ride free credits for CTA and Metra. (7) Expense adjustments include credits for capital costs incurred in providing contracted services (capital cost of contracting).

4 CTA Operating Plan



Overview

The Chicago Transit Authority (CTA) was created by the Illinois State legislature in 1945 and began operations in 1947. It became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator and is governed by a seven-member Chicago Transit Board.

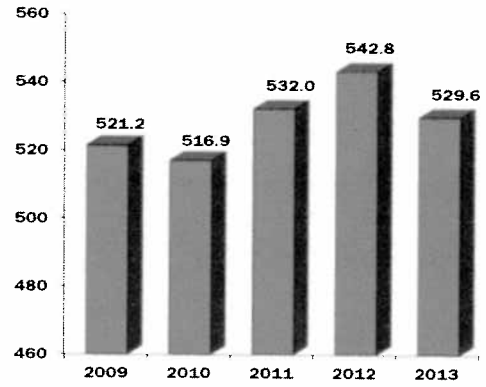
A State funding package ratified by State legislation in 2008 increased the percentage of sales tax dedicated to mass transit and gave authority to the City of Chicago to increase the Real Estate Transfer Tax (RETT) to support the CTA. Unfortunately, the economic recession had a significant impact on these funds; revenue from sales tax and the RETT were diminished from the effect of reduced consumer spending. Additionally, the recession impacted the rate at which the State of Illinois has made payments to the RTA and subsequently the rate at which the RTA can make payments to the CTA.

In 2013, the CTA will continue to hold the line on costs and, for the second year in a row, will not rely on the unsustainable use of transfers from capital to operations.

In 2012, the CTA projected a $160 million structural deficit. In order to eliminate this deficit and balance its 2012 budget, the CTA reduced personnel, pursued work rule reforms with its labor unions, and instituted management improvements. The CTA also liquidated a debt service reserve fund related to its Pension Obligation Bonds (POB) and replaced it with a bond insurance policy. These initiatives allowed the CTA to avoid a fare increase and/or service reductions without transferring funds from capital to operations. Ultimately, labor negotiations were not ratified until December of 2012, but higher than anticipated sales tax revenue and fare revenue offset unfavorable expenses.

Once labor agreements were ratified, the CTA had the certainty it required to develop its 2013 Budget and Two-Year Financial Plan. In 2013, the CTA will continue to hold the line on costs and, for the second year in a row, will not rely on the unsustainable use of transfers from capital to operations. However in the 2013 budget, the CTA increased the price on all fare passes including the CTA's 1-Day, 3-Day, 7-Day, 30-Day, CTA/Pace 7-Day passes and Metra Link-up Pass. Reduced fare prices will be adjusted to half the price of the base fare and the base fare will remain at current levels. Exhibit 4-10 provides a comparative analysis of the new fare structure.

Exhibit 4-1: CTA **Ridership** (in millions)



The CTA's total expenses decreased in 2012 compared to 2011, due in part to the CTA's liquidation of its debt service reserve for their Pension Obligation Bonds, which it recorded as an expense credit in their other expenses category. Without this additional expense credit in 2013, the CTA's other expense category increases to levels more in line with what was experienced in 2011. Total expenses at the CTA are budgeted to increase by 6.6% over 2012 estimated levels due to the increase in the other expenses category. Net results for the 2013 budget and 2014 through 2015 plan show zero balances, with total revenue equal to expenses.

Service Characteristics

The CTA operates the second largest public transportation system in the United States with average weekday ridership on its bus and rail system of 1.7 million. The CTA's service area encompasses 220 square miles in the City of Chicago and 35 surrounding suburbs. Bus operations provide 1,781 buses traveling over 129 routes covering 1,959 miles with approximately 11,500 bus stops. Rail service provided on eight lines has 1,200 train cars traveling over 224 miles of track.

RIDERSHIP

Total ridership for 2013 is budgeted at 529.6 million trips, 2.4% or 13.2 million trips lower than estimated 2012 ridership (Exhibit 4-1). The CTA anticipates that ridership will decrease in 2013 due to major reconstruction scheduled on the Red Line, the CTA's busiest rail line, and the fare increase. Bus ridership is budgeted at 304.7 million trips in 2013, 2.7% or 8.5 million lower than estimated 2012 ridership. Rail ridership is budgeted at 224.9 million trips in 2013, 2.0% or 4.7 million trips less than estimated 2012 ridership (Exhibit 4-2).

The CTA's 2012 ridership gains were made despite the loss of some senior ridership related to the end of the Seniors Ride Free Program. Effective September 1, 2011, senior free rides, which had previously been allowed on all Chicago-area transit, became limited to only low-income seniors, resulting in an estimated loss of up to 5 million senior trips per year on the CTA. Seniors who did not qualify for free rides were still eligible to purchase reduced-fare tickets, and an estimated 29% of former free CTA senior riders opted to do so, providing a significant farebox revenue improvement. It is also estimated that 51% of the CTA's ridership under the Seniors Ride Free Program continues to ride free by meeting the low-income criteria of the revised program.

Average weekday ridership in 2012 was about 1.7 million, while Saturday and Sunday average ridership was over 1.1 million and 782 thousand, respectively. In 2013, average weekday ridership is projected to decrease slightly, but remain around 1.7 million. Saturday average ridership is expected to remain around 1.1 million, and Sunday average ridership is budgeted to decrease slightly to 743 thousand (Exhibit 4-3). Total vehicle miles are expected to increase by 3.3% in 2013 to 121.4 million (Exhibit 4-4).

Exhibit 4-2: **CTA Annual Ridership By Mode** (in millions)

	2009	2010	2011	2012	2013
Bus	318.6	306.0	310.4	313.2	304.7

Weekday	1,658	1,644	1,688	1,721	1,687
Saturday	1,058	1,046	1,088	1,112	1,083
Sunday	749	734	771	782	743

SERVICE QUALITY

Some of the CTA's major initiatives to improve service quality in 2013 include the following: the eradication of slow zones, a complete reconstruction of the Dan Ryan Branch of the Red Line, reconstruction of the Wilson Red line station, modernization of its bus and rail fleet, installing over 3,000 security cameras across the system, adding 400 Bus-tracker display signs to its bus shelters across the city, and rolling out the new Ventra™ Open-standards fare payment system. In 2013, the CTA will also continue to deploy its station renew crews across the City's rail stations, and provide service on the recently created Jeffrey Jump, the CTA's first real foray into Bus Rapid Transit.

As part of its effort to improve service quality, the CTA has implemented a variety of performance measures. Grouped by service quality objective, the CTA records average monthly 2011 and 2012 monthly targets. It also provides a definition of the performance measure and its association with a specific department, when applicable. When performance for a month exceeds the monthly target, the measurement is highlighted in green. If performance for the month falls below but within 10% of the target, the measurement is highlighted in yellow. When performance falls below 10%

Exhibit 4-4: **CTA Ridership and Miles** (Riders and Miles in thousands)

	2009 Actual	2010 Actual	2011 Actual	2012 Estimate	2013 Budget
Ridership (1)	521,242	516,873	531,960	542,846	529,642
Vehicle Miles	131,893	118,708	116,334	117,577	121,425
Passengers Per Mile	4.0	4.4	4.6	4.6	4.4

(1) Ridership in annual unlinked trips.

of the target, the measurement is highlighted in red. Performance measure targets yet to be established are highlighted in gray. The monthly performance measures published on the CTA's website through June 2012 can be found at the end of this section (Exhibit 4-20).

Business units and departments are responsible for certain performance measures. For instance, the Bus Operations unit is responsible for the "% of Big Gaps interval" measurement which records the number of bus intervals that are double the scheduled interval. The Bus Operations Department communicates goals and performance to everyone from managers to operators while providing a platform for reporting issues and brainstorming solutions. As indicated in Exhibit 4-20, the CTA was challenged in June of 2012 to keep "% of Big Gaps Interval" performance measure at or below its ambitious target of less than 4%.

CAPITAL INVESTMENTS

The CTA estimated that capital expenditures in 2012 would be approximately $317.3 million. In 2013, the CTA is planning to more than double those expenditures and increase capital funding to $658.5 million (Exhibit 4-5).

Since 2008, the CTA has diverted $554 million in capital funds to operations in order to fill operating budget gaps. As a result, the CTA has underfunded its capital program. In 2012, the CTA pledged to stop diverting capital funds to operations and use all available Federal funds to reinvest in the system. The 2013 capital budget continues this practice. In 2013, the CTA will be performing reconstruction on the south end of the Red Line, known as the Dan Ryan Branch. In order to reduce costs and complete the project in a

timely fashion the CTA will be shutting down the Dan Ryan Branch for five months. The $425 million project will provide significantly more reliable service. Also in 2013, the CTA budgeted to spend $66 million for rehabilitation and removal of slow zones on the Brown line between Armitage and Merchandise Mart. Between 2013 and 2017, the CTA will perform mid-life bus overhaul, rail-car overhauls, and rehabilitate rail stations, including investing $203 million to reconstruct the Wilson Red Line Station.

Bus System

The CTA operates a fleet of 1,781 buses which make 19,709 weekday trips on 129 routes, and provide approximately one million rides on a typical weekday. All buses delivered since 2007 have clean diesel engines and particulate filters that meet EPA emissions standards, and the entire bus fleet is ADA accessible and air-conditioned.

The bus vehicle overhaul program continues to improve service through regular replacement of major mechanical components subject to extensive wear. In 2013, bus mid-life overhaul activities are programmed for $31.0 million and total $143.7 million between 2013 and 2017. With overhauls, the fleet will dem-

Exhibit 4-5: **CTA Capital Statistics** (dollars in thousands)

	2009	2010	2011	2012	2013
CTA Total Capital Expenditures	**$ 671,952**	**$ 428,500**	**$ 426,437**	**$ 317,300**	**$ 658,489**

Bus Routes Offering Lift Service	154	150	141	129	129
ADA Accessible Stations	85	85	88	88	88

onstrate increased reliability and fewer instances of expensive breakdown-based repair.

Also in 2013, the CTA plans to replace its Nova 40-foot buses that have reached the end of their useful service life. In 2013, the CTA will spend $85.8 million to purchase vehicles equipped with clean propulsion technologies which achieve greater fuel efficiency than standard diesel buses.

Rail System

The CTA's Capital Improvement Plan (CIP) scheduled $160.1 million in 2012 to repair rail tracks and structures, to reduce slow zone imposition and therefore maintain operating speeds. A total of $297.2 million is budgeted from 2013-2017 to continue systematic rehabilitation of the CTA right of way.

The CTA has funded and ordered 706 new 5000-Series rail cars from Bombardier, a transportation and aerospace company. Each rail car will be equipped with seven network security cameras. These rail cars also include glow-in-the-dark strips on the floors and improved door sensors. Each car meets or exceeds ADA compliance standards. These railcars will replace the aging 2200 Series and 2400 Series fleet placed into service in 1969, which have exceeded their expected service lives of 25 years. Between 2013 and 2017 the CTA's CIP has allocated $497.2 million toward the purchase of the new rail cars.

System-Wide Improvements

The CTA continues to invest in new technology to further improve service and safety. The CTA operates over 1,500 desktop computers that link into local area networks for efficient data transfer and team analysis. The CTA's proposed Capital Improvement Program allocates $5.8 million between 2013 and 2017 for software and hardware upgrades. An additional $2.5 million is allocated toward enhancement of the CTA's existing Transit Asset Management System. The Capital Improvement Plan also allocates $82.4 million to improve facilities system wide to repair and improve on-time transit service by upgrading and repairing the CTA's seven active garages, 10 rail terminals, 17 park-and-ride lots, and 111 bus turnarounds.

The CTA is working to institute an open fare system by the end of 2013. The new Ventra system will allow CTA and Pace customers to tap their Ventra or contactless bank card for entrance to rail platforms and buses, resulting in faster boarding times than allowed by inserting cash or magnetic stripe cards. The CTA is working with Cubic Transportation Systems to design the new system and begin installation. The contract with Cubic is a corner stone of the State mandate to implement a region-wide universal fare system. The CTA anticipates savings of nearly $50 million over the life of the 12-year contract.

Budget and Financial Plan

The CTA's 2013 Budget and Two-Year Financial Plan were approved by the RTA Board on January 16, 2013, in accordance with the 2012 marks set by the RTA on October 10, 2012. The CTA's operating funding marks, including State Reduced Fare Reimbursement, were set at $645.2 million for 2013, $657.3 million for 2014, and $677.5 million for 2015. The CTA has budgeted for a recovery ratio of 63.0% in 2013, 11.0 percentage points higher than what was established by the RTA marks. The CTA's Budget and Financial Plan, which includes the recovery ratio, is presented in Exhibit 4-6. The CTA is statutorily required to provide estimated levels of operating revenue and expenses that conform to the marks set by the RTA. The following portrays the outlook for the 2013-2015 planning period.

OPERATING REVENUE

The CTA's operating revenue, including passenger revenue, the State Reduced Fare Reimbursement, and other revenue was budgeted at $700.0 million in 2013. Operating revenue is planned to increase from $612.3 million in 2011, to $746.9 million in 2015, an increase of $134.6 million over the five-year period, or a compound annual growth rate of 5.1% (Exhibit 4-7). In 2013, passenger revenue comprises 45.0% of the CTA's total revenue, which includes public funding. The reduced fare subsidy and other revenue account for 2.1% and 4.4% of total revenue, respectively (Exhibit 4-8). In 2013, the CTA anticipates a $62.3 million increase in operating revenue over the 2012 estimate as changes to the fare policy increases total revenue. In 2014 and 2015, total operating revenue is anticipated to increase over the prior year by 4.2% and 2.4%, respectively.

Passenger Revenue

Passenger revenue is budgeted at $611.3 million in 2013, $62.3 million higher than the 2012 estimate. This increase reflects changes to the fare policy which are anticipated to increase the average fare at the CTA by 14 cents. Passenger revenue was estimated to increase from $527.9 million in 2011 to $549.0 million

Recovery Ratio % (2)	**57.3%**	**61.0%**	**63.0%**	**63.3%**	**62.8%**

(1) Beginning in 2012, statutorily required local contributions from the City of Chicago and Cook County have been classified as public funding, not other operating revenue.

(2) The Recovery Ratio is calculated by dividing operating Revenues by Operating Expense. The calculation includes in-kind revenues and expenses for security services provided by the City of Chicago, excludes purchased security expenses, POB debt service, and includes some grant revenues.

in 2012, an increase of $21.1 million or 4.0%, largely due to increased ridership (Exhibit 4-9). Passenger revenue is anticipated to increase $24.9 million in 2014 or 4.1%. In 2015, passenger revenue is projected to increase $12.7 million over 2014. The revenue increase is largely attributable to an increase in fares and partially due to increases in ridership. The old and new CTA fare structure is shown in Exhibit 4-10.

State Free Rides & Reduced Fare Reimbursements

The Illinois General Assembly passed legislation in 1989 that provided funds to reimburse the CTA for the cost of providing reduced fares for the elderly, students, and the disabled. Fare reimbursement is included as operating revenue and became available in July 1989. However, in 2009 the State eliminated a portion of the funding for this program and in 2011 provided just $26.0 million to the CTA and anticipates $28.1 million in 2012. In 2013, the RTA has asked the CTA to budget for $28.3 million in reduced fare subsidies. The RTA has estimated the CTA will receive $28.3 million in Reduced Fare Reimbursements each year from 2013 to 2015.

Other Revenue

The other revenue category includes revenue generated through advertising, chartered service, concessions, investment income, and miscellaneous other revenue (Exhibit 4-11). In prior years, the statutorily required contributions from the City of Chicago and Cook County, referred to as local contributions, were also included in the other revenue category. Beginning in 2012, this $5.0 million in local contributions has been classified as public funding. In 2013, other revenue is budgeted to decrease by 0.4% to $60.4 million from the 2012 estimate. Other revenue was $58.4 million in 2011 and is estimated to increase by 3.8% in 2012. The CTA anticipates that an improving economy, renewed efforts to broaden their advertising, and increases in corporate sponsorship will result in favorable returns during the financial planning years. In 2014 and 2015, the CTA anticipates that other revenue will increase over the prior years by 7.6% and 7.1%, respectively.

Exhibit 4-8: **2013 Budgeted Total Revenues** - $1,358.1 million

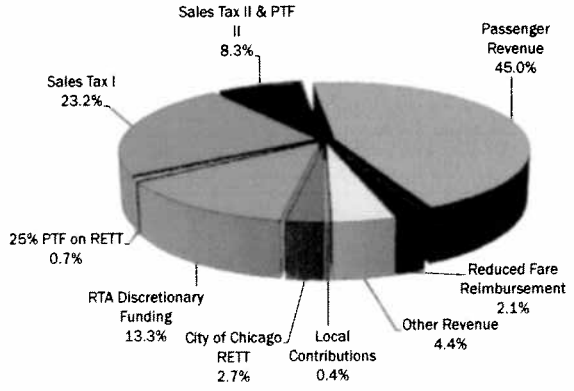

Exhibit 4-7: **CTA Operating Revenue** (dollars in millions)

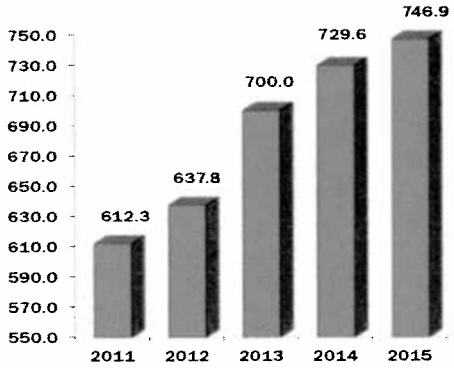

PUBLIC FUNDING

Public funding, available for CTA operations, is determined by the RTA's revenue projection for the year. Public funding from the RTA consists of the RTA Sales Tax (RTA Sales Tax-I and II), the Public Transportation Fund (PTF-II and PTF-II on RETT), and RTA discretionary funding. Illinois Public Act 95-0708 increased the rates of the RTA sales tax, the PTF match, and the City of Chicago Real Estate Transfer Tax (RETT), and enacted a PTF match on the RETT and RTA Sales Tax II. While the RTA establishes the estimates for Reduced Fare Reimbursements, they are presented as operating revenue because they are allocated to the Service Boards for the reimbursement of fare revenue.

CTA funding from RTA Sales Tax-I is budgeted to increase from the 2012 estimate of $304.5 million to $314.6 million in 2013. RTA Sales Tax-II and PTF-II are expected to decrease from $113.4 million in 2012 to $112.1 million in 2013. The RETT and the 25% PTF-II match on RETT combined are expected to increase

Exhibit 4-9: **CTA Average Fare Calculation** (Revenue and Ridership in thousands)

	2009	2010	2011	2012	2013
Passenger Revenue	$ 505,713	$ 509,180	$ 527,853	$ 549,000	$ 611,281

(1) Reduced fares are for children 7 through 11 years old and people with RTA issued Reduced Fare Permits for seniors and/or persons with disabilities. The CTA also provides free rides to eligible seniors and persons with disabilities.

(2) Transit Cards include Chicago Card Plus and Chicago Card, unless otherwise noted.

(3) For elementary and high school students that present a Student Riding Permit on school days between the hours of 5:30 am and 8:30 pm.

(4) The additional $2.75 surcharge will not be effective until the middle of 2013, and is not applied to riders that use reduced fare or present a pass.

(5) Current one-way fares were replaced with a $5.00 round-trip fare.

from $44.4 million in 2012 to $45.2 million in 2013. Apportionments from the RTA's 15% share of the sales tax (Sales Tax-I) revenue and the State's public transportation fund (PTF-I) are the sources of the RTA's discretionary funds. RTA discretionary funds for the CTA are expected to increase from $168.7 million in 2012 to $181.0 million in 2013. The RTA funding in 2013 is budgeted to increase over the 2012 estimate by $21.4 million or 3.6%. The CTA used $35.0 million of federal funds for preventative maintenance in 2011. The CTA does not intend to transfer funds for preventative maintenance between 2012 and 2015. Additionally, the CTA's last payment of $83.0 million from the State in accordance with the 2009 State Fare Agreement was received in 2011. Total public funding is budgeted to increase by $22.1 million or 3.5% over the 2012 estimate. Between 2013 and 2015, total public funding is anticipated to increase at a compound annual growth rate of 2.6%.

OPERATING EXPENDITURES

Total operating expenditures are budgeted to increase from $1,273.7 million in 2012 to $1,358.1 million in 2013. This $84.4 million increase represents a 6.6% increase in expenses (Exhibit 4-12). The increase in total expenses is largely due to the one time liquidation of the POB debt service reserve, which the CTA

Exhibit 4-11: **All Other Revenue** (dollars in thousands)

Total All Other Revenues	**$ 58,438**	**$ 60,670**	**$ 60,434**	**$ 65,005**	**$ 69,588**

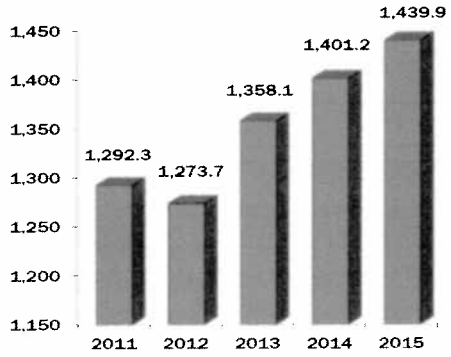
(1) Beginning in 2012, statutorily required local contributions from the City of Chicago and Cook County have been classified as public funding not other operating revenue.

recorded as an expense credit in their other expenses category in 2012. With the exception of the other expenses category, the CTA 2013 budget reduced expenditures in every expense category when compared to the 2012 estimate.

Financial projections for the years 2013 and 2014 show increased operating expenditures of $1,401.2 million and $1,439.9 million, respectively. The 2014 financial projection represents an increase of 3.2% over the 2013 budget, and the 2015 financial projection represents an increase of 2.8% over the 2014 financial plan. Between 2011 and 2015, total expenditures are expected to increase at a compound annual growth rate of 2.7%.

2013 operating expenditure elements include labor, material, fuel, power, insurance and claims, security, and other costs. Labor expenditures, including fringe benefits, represent 67.7% of the CTA's total expenditures. Base wages represent about two thirds of the labor total, while fringe benefits, which are primarily medical insurance and pension costs, represent the remaining one third. Materials, used primarily for maintenance, are 4.2% of total expenditures. Fuel and power represent 6.5% of the CTA's expenditures combined. Security and insurance & claims represent 3.8% of total spending. Other expenditures comprise the remaining 17.9%. The other expenditure category includes items such as leases, utilities, and contractual services (Exhibit 4-13).

Exhibit 4-12: **CTA Total Operating Expenses** (dollars in millions)



Labor Costs

Labor expenses for 2013 were estimated at $918.9 million, $6.0 million or 0.7% less than prior year. Labor expenditures are expected to increase from $893.8 million in 2011 to $962.7 million in 2015. This $68.8 million increase represents a compound annual growth rate of 1.9% (Exhibit 4-14). The CTA pursued work rule reforms with its labor unions in 2012, which eliminated archaic fringe benefits, and allowed the CTA to "bend the cost curve" and ensure slower growth in labor expenses over the five-year negotiated contract. Between 2011 and 2015, labor expenses are expected to increase at a compound annual growth rate of 1.9%.

The CTA's budgeted positions returned to 2011 levels, but still remain historically low with just 9,381 employees budgeted in 2013 (Exhibit 4-15).

Material

The material category covers all repair parts for buses, trains, track, structure and signals in the system. Material expenses of $57.3 million in 2013 are budgeted to be $9.4 million, or 14.1%, lower than the 2012 estimate. Lower material expenses reflect the CTA's increased investment in capital grants that offset some material operating costs and a reduction in maintenance cost associated with the purchase of the 5000

Exhibit 4-13: **CTA 2013 Operating Expenses** - $1,358.1 million

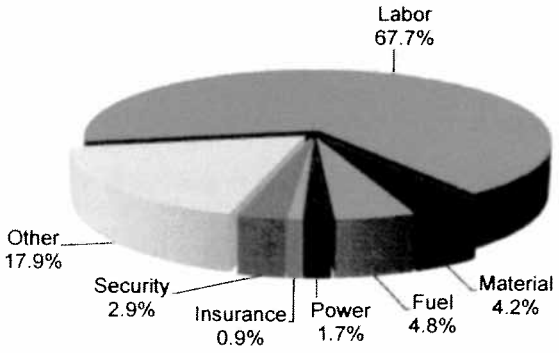


Exhibit 4-15: **CTA Budgeted Positions** (in thousands)

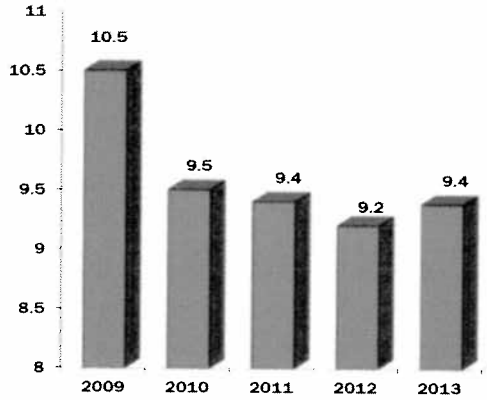


Series Bombardier rail cars which have substantially lower maintenance costs and a two-year warranty on all parts. Material expenditures are estimated at $66.7 million in 2012, $57.3 million in 2013, $66.7 million in 2014, and $68.7 million in 2015. Modest increases in 2014 and 2015 reflect the estimated savings provided by the CTA's plan to outsource its procurement system to contractors that will utilize barcode technologies and upgrade the CTA's procurement system to a just-in-time model with greater access to vendors nationwide. Between 2011 and 2015, material expenses are expected to increase at a compound annual growth rate of just 0.3%.

Fuel

In 2013, the cost of fuel is budgeted at $3.50 per gallon for a total budgeted cost of $65.3 million. Through its strategic fuel hedging program, which uses a long-term layered fuel hedging strategy, the CTA has been able to achieve better-than-market results in its average fuel prices, successfully maintaining favorable to budget variances for fuel over the last couple of years. In 2011, the CTA spent $57.2 million for 18.7 million gallons, a price per gallon of $3.06 (Exhibit 4-16). In 2012, the estimated cost per gallon is $3.42, a $0.36 increase from the 2011 average. Fuel consumption is budgeted to decline slightly in 2013 and remains at constant levels through 2015, but the anticipated cost of fuel is expected to rise by 1.1% in 2014 and 3.0% in 2015. Between 2011 and 2015, fuel expenses are expected to increase at a compound annual growth rate of 4.9%.

Power

In 2013, power expenses of $23.2 million are budgeted to be 2.0% favorable to the 2012 estimate. Electric power expenditures decreased in 2012 by 15.8% from $28.1 million in 2011 to $23.7 million. The CTA negotiated a new contract for purchasing electric power that began in January of 2012. The new contract allowed the CTA to purchase blocs of electricity in advance of use. About 60% of the CTA base electricity needs are purchased in this fashion and the remainder is purchased at the real-time ComEd price. Through this strategy, the CTA hopes to duplicate the success of its fuel hedging program to reduce volatility for their power expenses. Power expenses are projected to increase at a compound annual growth rate of 2.0% over 2014 and 2015, but between 2011 and 2015, power expenses are expected to decrease at a compounded annual rate of 3.8%.

Exhibit 4-14: **CTA Labor Expense Growth** (in thousands)

	2011	2012	2013	2014	2015
Labor Expense	$ 893,834	$ 924,885	$ 918,875	$ 932,721	$ 962,674
% Change from Prior Year	7.0%	3.5%	(0.6%)	1.5%	3.2%

Exhibit 4-16: **CTA Fuel Cost per Gallon** (Cost and Gallons in thousands)

	2011	2012	2013	2014	2015
Fuel Cost	$57,273	$65,238	$65,342	$67,302	$69,321
Gallons	18,725	19,055	19,019	19,019	19,019
Cost Per Gallon	$3.06	$3.42	$3.50	$3.54	$3.64

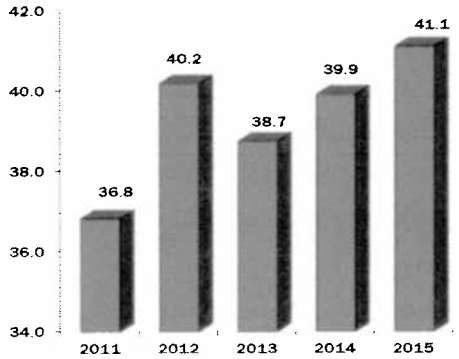
Insurance and Claims

The insurance and claims expense category represents the expenditures related to claims and litigation for injuries and damages that occur on CTA property or with CTA vehicles. The amount reserved for injury and damages is determined by actuaries and based on actual claims history. In 2013, acting upon the advice of its actuary, the CTA reduced its contribution to its injury and damages reserve by $12.2 million or 50.9% to $11.8 million. The CTA's estimate of $24.0 million in 2012 was $9.0 million more than the 2011 actual expenditures for insurance and claims. Additional deposits in 2010 allowed for lower-than-normal expenditures in 2011. Proposed expenditures for 2014 and 2015 are $24.7 and $25.7 million, respectively, a compound annual growth rate of 67.7% between 2013 and 2015. Between 2011 and 2015, insurance and claims expenses are expected to increase at a compound annual growth rate of 14.4%.

Purchase of Security Services

Security is strategically deployed throughout the CTA system to provide 24-hour coverage, seven days a week. Security services are provided by the City of Chicago, Evanston, and Oak Park Police Departments, and contracts with private security firms for guard and canine security.

Exhibit 4-17: **CTA Purchase of Security Service** (in millions)



The 2013 budget for security services is $38.7 million, a 3.6% decrease from the 2012 estimate. Expenditures were estimated to be $40.2 million in 2012, a 9.1% increase from 2011 (Exhibit 4-17). The increase was attributed to a contracted rate increase for security personnel across the system, the addition of security guards at the new Oakton and Morgan stations, and a new intergovernmental agreement negotiated with the Chicago Police Department. Between 2011 and 2015, security expenditures are expected to increase at a compound annual growth rate of 2.8%.

Other Expenditures

Other expenses include: utilities, rents, maintenance and repair, advertising, commissions, consulting, insurance, and miscellaneous general expenditures. For 2013, $242.9 million is estimated for other expenses. This amount reflects an increase of $113.8 million, or 88.2% over 2012. This significant increase in costs is largely due to the liquidated debt service fund which the CTA applied to their other expense category as a credit in 2012. Between 2011 and 2015, other expenses are expected to increase at a compound annual growth rate of 6.4%.

NET RESULTS

In 2013, system-generated revenue (fares and other revenue) are budgeted to cover 51.5% of CTA's operating expense budget with the remainder of the operating deficit covered by public funding. The operating deficit is derived from total system generated revenue minus total operating expenditures. The operating deficit, or public funding need, for the 2013 budget and 2014-2015 financial plans are $658.0 million, $671.6 million, and $693.0 million, respectively (Exhibit 4-6). Between 2011 and 2015, the public funding need at the CTA has decreased at compounded annual rate of 0.3%. For the 2013 budget and 2014 and 2015 plans, public funding meets the need and

is estimated to increase at a compound annual growth rate of 2.6%. Therefore, net results for the 2013 budget and 2014 through 2015 plan show zero balances, with total revenue equal to expenses. The remaining funding in excess of the operating deficit experienced in 2011 was transferred from operations to capital at the CTA in accordance with the RTA's financial policy.

RECOVERY RATIO

The CTA's recovery ratio equals total system-generated revenue divided by total operating expenditures, with statutory and approved adjustments. In 2013, the CTA's recovery ratio is budgeted at 63.0% exceeding the mark of 52.0% set by the RTA Board by 11.0 percentage points.

The following factors affect the CTA recovery ratio calculation. In-kind security services provided by the Chicago Police Department in the amount of $22.0 million are included as both revenue and expenditure in the recovery ratio calculation. Revenue credits are provided to the Service Boards for free service provided to eligible seniors and disabled persons. Additionally, purchased security expenditures are excluded from the recovery ratio calculation. The CTA's recovery ratio was 57.3% in 2011 and is estimated to be 61.0% in 2012. In 2013, the CTA has budgeted for a 63.0% recovery ratio and has planned for a 63.3% and 62.8% recovery ratio in 2014 and 2015, respectively (Exhibit 4-6). The RTA Chapter provides the detailed recovery ratio calculation.

Statutory Compliance

The RTA Act requires that each Service Board meet the seven criteria detailed in the Introduction chapter for their budgets to be approved. The 2013 CTA budget, as submitted, substantially meets all criteria.

2012 Budget versus 2012 Estimate

The CTA expects a balanced budget in 2012, with favorable public funding and operating revenue offsetting unfavorable expense results (Exhibit 4-18).

OPERATING REVENUE

Calendar year 2012 operating revenue is estimated at $637.8 million and is projected to be $14.1 million, or 2.3%, favorable to budget. Passenger revenue is estimated at $549.0 million, which is $9.0 million or 1.7% higher than the budget due to higher ridership. The reduced fare subsidy is the State's reimbursement to the Service Boards for providing discounted fares to the disabled, the elderly, and students. Revenue from the reduced fare subsidy is estimated at $28.1 million, 0.4% higher than budget.

Total other revenue is estimated at $60.7 million, $5.0 million or 9.0% favorable to budget. Revenue from advertising, charter, and concessions is estimated at $25.5 million which is greater than budget by $2.7 million or 11.8%. Investment income is estimated at $629 thousand, which is unfavorable to budget by $238 thousand or 27.6%. All other revenue is estimated at $34.5 million which is higher than budget by $7.5 million or 27.9%, largely due to a Homeland Security grant received in 2012 that was not originally programed into the CTA's Budget.

PUBLIC FUNDING

Calendar year 2012 public funding was estimated at $635.9 million, favorable to budget by $19.3 million. Public funding available through the RTA is estimated at $595.4 million, exceeding the budget by $6.8 million. This increase is largely due to greater than expected sales tax collections across the region. The City of Chicago's Real Estate Transfer Tax (RETT) is estimated to be an additional $7.5 million or 26.7%

Exhibit 4-18: **CTA 2012 Budget vs. 2012 Estimate** (dollars in thousands)

higher than budget, as real estate sales increased in the City of Chicago. The RTA Act requires the City of Chicago to contribute $3.0 million and Cook County to contribute $2.0 million annually to the operations of the CTA. These contributions from the City of Chicago and Cook County were classified as other revenue in the 2012 budget, but have since been categorized as public funding. The City and Cook County both provided the statutorily required sum in 2012.

EXPENDITURES

Calendar year 2012 operating expenditures are estimated at $1,273.7 million and are estimated to be unfavorable to budget by $33.4 million. Expenditures for labor, security, and other expenses were over budget while material, fuel, power, and insurance and claims were favorable to budget.

Labor expenditures are projected at $924.9 million in 2012, which is $41.8 million or 4.7% unfavorable to budget. During the development of its 2012 budget, the CTA was entering negotiations with its labor unions. At this time, the CTA anticipated that it could achieve $80.0 million in savings by implementing work rule reforms. By the middle of 2012 it was clear that these negotiations would not fully impact the CTA's 2012 financial results.

Material expenditures in 2012 are estimated at $66.7 million, which was lower than budget by $4.8 million or 6.7%. The CTA continues to improve its supply chain processes to ensure that only required quantities are being purchased and that the CTA is getting the best price possible. The success of this initiative is reflected in the lower-than-budgeted material expenditures for 2012.

Fuel expenditures are expected to be $65.2 million at the end of 2012, $1.5 million or 2.2% lower than budget. While consumption levels went up in 2012, the CTA continues to actively work to decrease the price it pays for fuel through its fuel hedging program. Fuel prices are projected to end the year at a net average price of $3.42 per gallon, which is $.37 higher than the average price in 2011.

Electric power expenditures for the rail system are estimated to be $23.7 million in 2012, favorable to budget by $1.3 million or 5.3%. The CTA's favorable power result is largely due to favorable market pricing and the CTA's long term hedging strategy. Compared to prior year, the CTA's estimated power expenses are $4.4 million or 15.8% favorable.

Expenditures for insurance, claims, and litigation for injuries and damages that occur on CTA property or with CTA vehicles are estimated at $24.0 million for 2012. While insurance and claims expenses are lower than budget by $7.2 million or 23.1%, they are consistent with actuarial recommendations which have found that the CTA's insurance and claims reserve was somewhat overfunded in prior years.

Security is deployed strategically throughout the system to provide 24-hour coverage, seven days a week. These services are provided by the Chicago, Evanston, and Oak Park Police departments and through contracts with private security firms. Full year expenditures are estimated at nearly $40.2 million, $3.4 million or 9.2% above budget. This increase in costs over budget is due to a contracted increase in the rates provided to rail station private security guards, the addition of Oakton and Morgan stations, and the intergovernmental agreements that were recently negotiated with the Chicago Police Department (CPD). In addition to the

services contracted by CTA, the Public Transportation Unit of the CPD continues to provide services to the CTA at an estimated cost of $22.0 million.

NET RESULTS

In 2012, the CTA's public funding need of $635.9 million was unfavorable to budget by $19.3 million; higher-than-budgeted public funding results met this need thus achieving a balanced net result. Net results for 2012 show a zero balance without the need for transfers from capital to operations. Estimated results show that the CTA will end 2012 with operating revenue and public funding equal to expenses.

Organizational Structure

The CTA organization chart is shown in Exhibit 4-19 and consists of the following departments and business units: Legislative Affairs, Planning, Transit Operations, Infrastructure, Administration, Finance, Law, Communications, and Safety & Security.

CTA Board

The CTA's governing arm is the Chicago Transit Board which consists of seven board members. The Mayor of Chicago appoints four board members who are subject to the approval of the City Council and the Governor. The Governor appoints three board members who are subject to the approval of the State Senate and the Mayor of Chicago.

The Citizens Advisory Board, the CTA Board Members, the Chief of Staff, the Secretary of the CTA Board, the President of the CTA, and the Department of Internal Audit report directly to the Chairman of the Board. Functionally, the General Counsel of the CTA and the Chief Financial Officer both report to the Chairmen of the Board.

Department of Internal Audit

The CTA's Office of Inspector General was eliminated in October of 2012 having found that its efforts were duplicative of those provided by the State's Office of Inspector General (OEIG) which was given the authority to oversee the CTA in July of 2011. Some of the CTA's Office of Inspector General responsibilities were by-in-large passed on to the Department of the Internal Audit. The Department of Internal Audit reports directly to the Chairmen of the Board, and the Office of the President falls under its scope of potential investigative responsibilities.

President

The CTA President is the agency's chief executive and is charged with executing the policy decisions made by the CTA Board of Directors and providing direction to the CTA staff as they work to fulfill the mission and goals of the Board. The Chief of Staff of the President reports directly to the President, and the President reports directly to the Chairmen of the Board.

Legislative Affairs

Legislative Affairs coordinates agency outreach and represents the CTA and its interests before local, state, and national government.

Planning

The Planning Department is responsible for developing routes and schedules that best synchronize CTA capabilities with customer demand. Planning ensures that the highest level of service is attained.

Transit Operations

Transit Operations consists of Bus Operations, Rail Operations, Bus and Rail Maintenance, and the Control Center. Bus maintenance includes both the maintenance and regular cleaning of bus interiors and exteriors. Rail Maintenance is responsible for maintaining the safe mechanical functioning of the CTA's trains as well as regular cleaning, heavy maintenance repairs, and rebuilds of train systems. The Control Center monitors passenger and facility security, maintains accident statistics, and monitors environmental affairs. The Control Center operates 24 hours per day, 7 days a week.

Infrastructure

Infrastructure includes the operating units of Engineering, Power and Way, and Facilities. Engineering is responsible for creation and maintenance of construction documents for CTA facilities, and reviewing and answering design requests. Power and Way inspects and maintains the rail track, including rail track circuits, switches, and vital signal relays. Power and Way is also responsible for power substations in the CTA system. The Facilities unit performs maintenance and construction of rail stations, terminals, rail yards, and other CTA facilities.

Administration

Administration includes; Human Resources and Employee Relations, Purchasing and Warehousing, Technology, DBE/EEO/ADA Compliance and the Learning Unit. The Human Resources department is responsible for recruiting, hiring, benefit services, medical services, and program compliance. The Purchasing and Warehousing department performs inventory management. Technology maintains and upgrades all CTA technology infrastructure including computer hardware, application software, and communications equipment. This office is also responsible for the maintenance of fare equipment for both Bus and Rail, and for all communication system infrastructures.

Finance

Finance is responsible for Budgeting and Capital Planning, general accounting, investment support, cash management, program development, and the management and control of property, grants, investments, and funding. Finance functionally reports to the Chairmen of the Board and administratively reports to the President.

Law

Law handles appellate matters, corporate law, claims and tort litigation, workers compensation matters, and labor policies and appeals. The law department functionally reports to the Chairmen of the Board and administratively reports to the President.

Communications

Communications is responsible for marketing, media relations, identity development, and publications. Additionally, Communications is responsible for providing customer service such as travel information, Chicago Card account maintenance, maps, brochures, fare updates, refunds, and support for onsite public forums.

Security & Safety

The mission of the Security and Safety department is to ensure the highest degree of safety for CTA customers, employees and the public. This is achieved by identifying and eliminating or controlling safety hazards during the operation of transit service, construction, and maintenance. Security and Safety also administers the Destination Safety program, which aims to reduce employee and third party accidents and injuries.

5 Metra Operating Plan

Overview

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare collection, service levels, capital improvements, finances, passenger services, safety, and systems planning. Service is operated by private carriers under contract to Metra and by Metra directly.

Metra is governed by an eleven-member board of directors. Four of the directors are appointed by the suburban members of the Cook County Board. The chairman or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry, and Will counties each appoint one director, and the Mayor of the City of Chicago also appoints one director. The Chairman of Metra's board of directors must be one of the eleven directors, and is appointed by the concurrence of eight directors.

The network itself is made up of over 1,400 revenue vehicles, 821 bridges, more than 2,000 signals, 27 rail yards and maintenance facilities.

For 2013, Metra has proposed a balanced projection of revenues and expenses that follow the guidelines set forth in the RTA Act. The proposed budget has a recovery ratio target of 55.4%, 2.4 percentage points higher than the RTA-provided revenue recovery ratio target. There are no service or maintenance reductions or increases contained within the budget. In keeping with a decision made in 2012, the 2013 budget does not contain any transfers from capital funds to operations. To further support capital investment, Metra will program $5.6 million of farebox revenue to the capital program with revenues from a fare policy change that eliminates the discount on a 10-ride ticket. Metra plans to return the Farebox Capital Program to its historic funding level of $10 million per year starting in 2014.

Service Characteristics

The Metra rail system is comprised of eleven separate lines, which run north, west, and south of the Chicago central business district. The system extends 488 route-miles to the limits of the six-county area and serves 240 local rail stations in more than 100 communities. The network itself is made up of over 1,400 revenue vehicles, 821 bridges, more than 2,000 signals, 27 rail yards and maintenance facilities. Metra's operational interface with extensive freight networks makes it one of the nation's most complicated rail systems. A system of such magnitude requires continual maintenance and renewal in order to preserve operational performance, safety, and service efficiency.

Metra serves the region on routes owned by Metra or freight carriers and through the purchase of service agreements with Union Pacific and Burlington Northern Santa Fe, two of the largest freight carriers in the nation. The South Shore Line, operated by the Northern Indiana Commuter Transportation District (NICTD), is another Metra partner, providing service between Chicago and South Bend, Indiana. Together, Metra and its carriers provide 702 weekday trains, 296 Saturday trains, and 163 Sunday trains. Metra provides safe, reliable commuter rail service with an average weekday ridership of 260,000. Peak period ridership represents 82% of the total average weekday trips. Metra's hub is located in the downtown Chicago business district. Four downtown terminals serve Metra's eleven lines.

RIDERSHIP

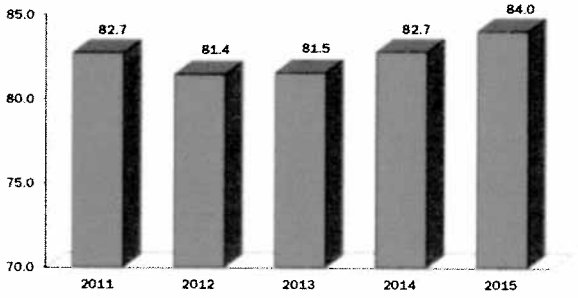
Metra's primary customer base is suburban residents who work in downtown Chicago. According to Metra's 2006 Origin-Destination Survey, 77.0% of weekday morning riders board in the suburbs and alight in

downtown Chicago, and more than 90% of all Metra trips are for business and work purposes.

Metra projects stable ridership for 2013, following a decrease in ridership in 2012 related to a significant 25% average fare increase, followed by modest growth in 2014 and 2015. For 2012, Metra's total ridership, excluding South Shore service, is projected to total 81.4 million passenger trips (Exhibit 5-1), representing a 1.5% decrease from 2011. Metra's total ridership is estimated to increase 0.2% in 2013 to 81.5 million passenger trips. An increase of 2.5 million passenger trips is expected over the following three years, with an estimated total ridership of 84.0 million passenger trips in 2015. This level represents a compound annual growth rate of 0.4% from 2011 to 2015 (Exhibit 5-2).

In addition to the February 2012 fare increase, Metra ridership was negatively impacted by the end of the Seniors Ride Free Program. Effective on September 1, 2011, senior free rides, which had previously been allowed on all Chicago-area transit, were now restricted to only low-income seniors, resulting in an estimated loss of one million senior trips per year for Metra. Seniors who did not qualify for free rides were still eligible to purchase reduced-fare tickets, and an estimated 63% of seniors opted to do so. Exhibit 5-3 demonstrates the effect of the end of the Seniors Ride Free Program; reduced-fare ticket sales plunged in 2008 and 2009 with the start and expansion of the program, then increased more than 50% in 2011, the year the program ended, and 58% in 2012 as seniors who were riding free transitioned to reduced-fare tickets.

Exhibit 5-1: **Metra Ridership** (in millions) (1)



(1) Based on ticket sales. Includes all free rides. Excludes South Shore (NICTD) service.

SERVICE QUALITY

Metra has identified improved service quality as one of its objectives to ensuring customer satisfaction. Metra periodically conducts on-board surveys to measure various service attributes. In late 2011, customer satisfaction surveys were completed by nearly 17,000 Metra customers, who identified on-time performance, seat availability, and safety as the most important service attributes that drive customer satisfaction. Beyond general rider satisfaction, Metra also collects information on the service attributes that are most effective at attracting and retaining riders. These data provide direction for planning, scheduling

Exhibit 5-3: **Reduced-Fare Rides by Year**

Year	Total Reduced Rides	% Change
2007	3,033,277	-
2008	1,822,246	-40%
2009	1,423,241	-22%
2010	1,565,633	10%
2011*	2,352,122	50%
2012	3,736,638	59%

*Senior Ride Free Program discontinued 9/1/11; grace period for program expired on 9/6/11

Exhibit 5-2: **Riders and Miles** (in millions) (1)

	2011 Actual	2012 Estimate	2013 Budget	2014 Plan	2015 Plan
Ridership (2)	82.7	81.4	81.5	82.7	84.0
Vehicle Revenue Miles	42.9	43.0	43.0	43.0	43.0
Passenger Miles (3)	1,876.3	1,847.6	1,850.4	1,878.2	1,906.3

(1) Ridership, Vehicle Revenue Miles, and Passenger Miles exclude South Shore (NICTD) service.

(2) Based on ticket sales. Includes free Senior rides.

(3) Based on ticket sales and 2011 average trip length.

and marketing activities. In response to the changing needs of customers, Metra continuously looks for ways to expand and improve its service within financial constraints. In order to ensure customer satisfaction and efficiency, Metra has implemented a number of metrics to measure customer satisfaction and service efficiency and cost effectiveness.

A number of measures to enhance the customer experience were implemented in 2011 and 2012. In 2011, Metra changed its methodology for reporting on-time performance to more adequately reflect the actual experience of its customers. The revitalization of the Citizens Advisory Board was introduced in 2011, as well as the roll-out of the Quiet Car program. 2012 saw the implementation of a real-time train tracker, as well as the onset of an aggressive renovation program that will eventually overhaul 176 Amerail series cars by the end of 2016, providing customer amenity enhancements such as multiple power outlets for recharging personal devices and upgraded on-board facilities. Also in 2012, Metra began posting all board items and supporting documents on its website, furthering efforts to increase transparency to its customers.

One measurement of system-wide service effectiveness relates the number of passengers to the number of vehicle service miles. Metra's ratio of passengers per vehicle revenue mile is projected to decrease from 1.93 in 2011 to 1.89 in 2012 (Exhibit 5-5), a 2.2% loss reflecting expected ridership declines resulting from the February 2012 fare increase. A decrease in passengers per vehicle revenue mile indicates a loss of efficiency. Ridership growth projected for 2013-2015 will result in improvements for this measure.

Exhibit 5-4: **On-Time Performance**

Year	% On-Time
2007	95.7
2008	95.4
2009	95.7
2010	95.9
2011 *	93.6
2012	95.8

*In May 2011, Metra implemented a change in the methodology used to calculate on-time performance, resulting in data that are not directly comparable to prior years.

Exhibit 5-5: **Passenger Trips per Vehicle Revenue Mile** (in millions)

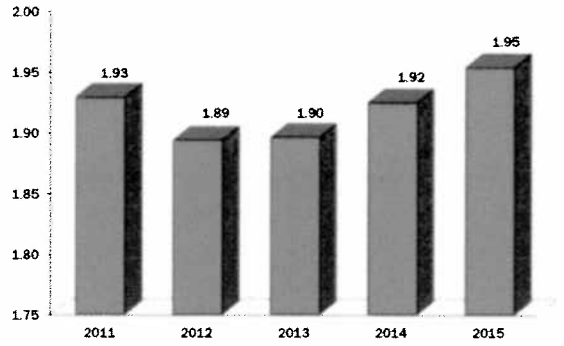


Exhibit 5-6: **Metra Cost Efficiency**

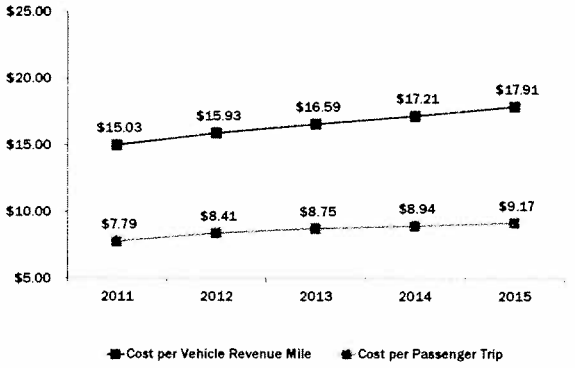

Two measurements used to indicate cost efficiency are operating cost per vehicle revenue mile and operating cost per passenger trip. These measures recognize that the significant costs associated with running commuter rail service become more economical when those costs are spread over increased vehicle miles or passenger trips. Metra expects that its cost per vehicle revenue mile will increase from $15.03 in 2011 to $16.59 in 2013. This $1.56 increase represents a compound annual growth rate of 5.1% (Exhibit 5-6). The operating cost per passenger trip ratio measures cost effectiveness and is designed to examine how well vehicles are deployed to serve riders. Metra projects that its cost per passenger will increase slightly each year from 2011 to 2015. The cost per passenger ratio was $7.79 in 2011 and is projected to be $9.17 in 2015. This $1.38 increase represents a compound annual growth rate of 4.1% (Exhibit 5-6).

CHALLENGES

Following the implementation of a significant fare increase in February 2012, Metra continues to face funding challenges brought on by the demands of managing an older vehicle fleet and mandates to provide Positive Train Control (PTC) by 2015. RTA's 2011 Capital Asset Condition Assessment Update estimated that Metra would need to invest $9.7 billion over the next ten years to achieve and maintain a state of good repair. However, Metra estimates ten-year funding levels to be about $2.6 billion. Clearly, the disconnect between funding and need will result in infrastructure investment deferrals unless alternate funding sources are identified. Metra has been successful in receiving funding from a variety of grant sources including CMAQ, TIGGER, ICE, TCSP, and Livability grants, and is committed to continue seeking other sources of funding. In addition, Metra maintains its commitment to ending the practice of transferring capital dollars to fund operations. Finally, Metra has identified contributions to its Farebox Capital Program ($5.5 million in 2013 and $10 million for 2014 and 2015) to be used for locally-funded projects, local matching funds, and unanticipated capital needs.

CAPITAL INVESTMENT

Metra is in the process of receiving and putting into service new Highliner rail cars and expects to replace more than 150 older cars in the next few years. In addition, Metra's capital program includes projects to rehabilitate or replace bridges, provide for locomotive improvements, rehabilitate older bi-level commuter

cars, implement financial systems upgrades, and rehabilitate or improve stations, yards, shops, and facilities. A regional fare payment system is being investigated for installation by year-end 2014. Positive Train Control is scheduled for completion by year-end 2015.

Customer amenity improvements implemented in 2012 included: ticket vending machines, real-time RailTracker, website enhancements, the installation of automated external defibrillator (AED) units on trains and in facilities, and improved communications to customers via Twitter outreach and the posting of all Board meeting materials on the Metra website prior to monthly meetings.

SAFETY AND SECURITY

In an effort to provide a safe and secure environment for both customers and employees, Metra provides employee incentives to those regularly meeting safety and security goals. Key among these goals is workplace safety. A safe workplace means a safe environment for Metra passengers. Metra reported a 20.5% reduction in employee workplace injuries, the lowest injury rate in more than ten years, in 2012, with its 47th Street Diesel House Rail Yard completing its sixth injury-free year.

A four-day NATO conference in May, 2012 presented Metra with unique safety and security challenges. Metra developed and executed a NATO safety and security plan that protected passengers, employees, and system assets. In 2013, Metra will continue its safety outreach programs, with an extensive focus on area schools. This year will mark the seventh year of

Metra's Poster Contest, where students from throughout the region compete to create the winning designs to be displayed on Metra's safety calendar, which is distributed to over 2,000 schools. The winning design will also be displayed on Metra's monthly passes.

Budget and Financial Plan

The Metra budget and financial plan presented in Exhibit 5-7 meets the 2013, 2014, and 2015 funding marks and the 2013 recovery ratio mark of 53% set by the RTA Board. Metra was able to meet the funding level requirement set by the RTA by eliminating the discount on its 10-ride tickets. The RTA Board adopted Metra's 2013 budget and 2014-2015 financial plan on January 16, 2013. Total revenues are composed of two major parts: operating revenue and public funding.

OPERATING REVENUES

Total operating revenue of $371.9 million for 2013 is 3.1% higher than the 2012 year-end estimate of $360.6 million, and is 22.6% higher than 2011 levels, resulting from a significant fare increase implemented in February 2012. Total operating revenue is expected to increase to $412.5 million in 2015. The increase of $109.2 million represents an influx of $57 million in 2012 followed by a compound annual growth rate of 5.3% from 2013 to 2015 (Exhibits 5-7 and 5-8).

Metra's operating revenue has three major components: passenger revenue, reduced fare subsidy, and other revenue. In 2013, passenger revenue of $318.5 million comprises 44.3% of the total revenue budget with the reduced fare subsidy and other revenue representing 0.4% and 7.0%, respectively (Exhibit 5-9).

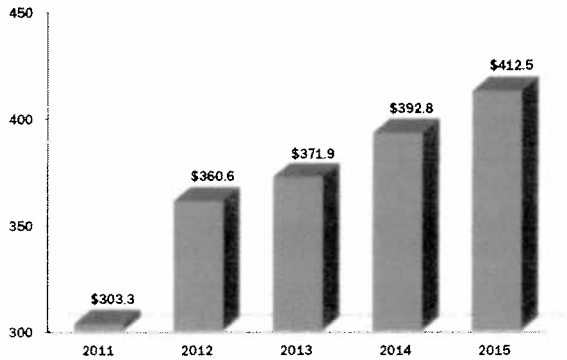
Passenger Revenue

Passenger revenue is estimated at $318.5 for 2013, an increase of $73.0 million from 2011, a 29.7% increase due to Metra's new fare schedule that took effect on February 1, 2012; Exhibit 5-14 provides a schedule of Metra's current fare structure. Passenger revenue is expected to increase another $39.9 million to $358.4 million between 2013 and 2015, a compound annual growth rate of 6.1%.

Reduced Fare Subsidy

The Illinois General Assembly passed legislation in 1989 providing funds to reimburse the CTA, Metra, and Pace for the cost of providing reduced fares for the elderly, students, and persons with disabilities. The fare reimbursement is included in revenue and is contingent upon annual approval by the State. In 1999, the State Assembly passed new reduced fare legislation, which doubled the reimbursement level of previous years. Metra anticipates that the state will continue to provide $3.1 million in reimbursement annually throughout the financial planning period.

Exhibit 5-8: **Metra Operating Revenue** (dollars in millions)



Other Revenue

The components of this category are investment income, joint facility and lease revenue, advertising income, capital credits, and miscellaneous non-fare income. Other revenue, representing 7.0% of Metra's total revenue, is expected to decrease $1.3 million in 2013. Reductions forecasted for years 2013 - 2014 are due to fewer projects for other railroads and lower capital credits. An expected 2% uptick in 2015, the last year of the financial plan, results in an overall $3.4 million decrease for the five-year 2011 - 2015 period and represents a compound annual growth rate of -1.6%.

Public Funding

Metra's total public funding for operations is expected to total $347.1 million in 2013, $47.0 million less than 2011, largely due to Metra's decision to discontinue the unsustainable practice of transferring capital

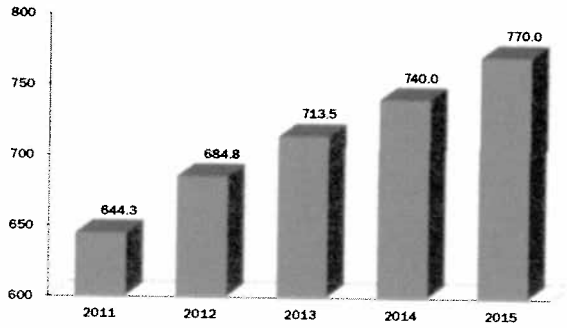
funds to operations in 2012. Total public funding is anticipated to increase by $25.8 million from 2012 to 2015. Public funding is composed of three main parts, RTA Sales Tax I, RTA Sales Tax II & PTF II, and funds made available to Metra by the Department of Homeland Security. In 2013, RTA Sales Tax I is expected to comprise 35.4% of total revenues. Combined Sales Tax II and PTF II were 12.7% of total revenues, and the $1.2 million grant from the Department of Homeland Security constituted 0.2% of total revenues.

Metra funding from RTA Sales Tax-I is expected to increase from $239.8 million in 2011 to $272.2 million in 2015. RTA Sales Tax-II and PTF-II are expected to increase from $94.3 million in 2011 to $95.3 million in 2015. With the 2012 budget, Metra committed to discontinuing the unsustainable process of transferring capital funds into its operating revenues, and maintained that commitment for the 2013 budget and 2014-2015 financial plan. Metra anticipates receiving $1.2 million in operating grants from the Department of Homeland Security each year between 2012 and 2014. A more detailed description of how public funds are allocated among the Service Boards can be found in the RTA Section of this book.

OPERATING EXPENDITURES

Metra's 2013 total operating expenditures of $713.5 million are projected to grow by $28.7 million or 4.2% from the 2012 estimate, largely due to signed labor agreements that will result in 3.7% wage increases. In 2014 and 2015, total expenditures are projected to increase by 3.7% and 4.1% respectively, producing total expenses of $770.0 million in 2015 (Exhibit 5-7). This

Exhibit 5-11: **Metra Total Operating Expenses** (dollars in millions)



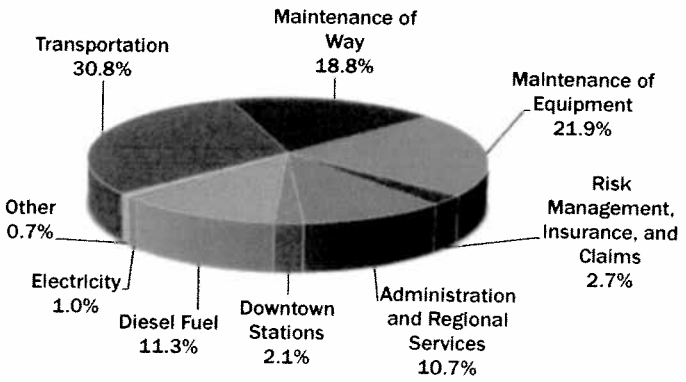
$125.7 million increase represents an annual compound growth rate of 4.6% from 2011 to 2015 (Exhibit 5-11).

The components of operating expenditures include transportation, maintenance of way, maintenance of equipment, risk management, insurance & claims, administration & regional services, downtown stations, diesel fuel, electricity, and unallocated operations expenses. Of total 2013 expenditures, transportation represents 30.8%; maintenance of equipment 21.9%; maintenance of way 18.8%; fuel 11.3%; administration and regional services 10.7%; risk management, insurance, and claims 2.7%; downtown stations 2.1%; electricity 1.0%; and other 0.7% (Exhibit 5-12).

Transportation

Transportation includes the functions and activities directly responsible for the operation of the commuter trains. The major functions include train and engine crew work, dispatching, tower operations, ticket sales, police and security services, employee safety, and supervisory support. The main objective of this area

Exhibit 5-12: **2013 Metra Expenses** - $713.5 million



is to run service consistent with the published train schedules in a safe and efficient manner and in accordance with federal and state regulations. Transportation expenditures were estimated to total $219.5 million in 2013, an increase of $5.2 million from 2012. By 2015, transportation expenditures are expected to reach $237.4 million, a $30.7 million increase from 2011, representing a compound annual growth rate of 3.5% (Exhibit 5-7).

Maintenance

Maintenance of way activities include the maintenance of track, structures, communications and facilities to preserve operational safety, reduce travel times and service interruptions, and increase passenger comfort. Maintenance work is concentrated on safety inspections and short-term projects to safeguard overall track and structure conditions. Maintenance of way expenditures are estimated to total $134.4 million in 2013, an increase of $10.9 million from 2012. By 2015, maintenance of way expenditures are expected to reach $144.5 million, a $20.6 million increase from 2011, representing a compound annual growth rate of 3.9% from 2011 to 2015 (Exhibit 5-7).

Maintenance of equipment activities include regular repairs, inspection, and preventive maintenance of passenger train equipment to ensure that the equipment is safe and in good working order to meet train schedules and passenger demand for seating. Maintenance of equipment expenses are budgeted to total $156.3 million for 2013, an increase of $8.2 million from 2012. Expenditures in this category are expected to reach $170.0 million in 2015; the $32.9 million increase from 2011 represents a compound annual growth rate of 5.5% from 2011 to 2015 (Exhibit 5-7).

Risk Management, Insurance, and Claims

Risk Management, Insurance, and Claims costs for 2013 are budgeted at $19.2 million, a 17.2% reduction from the 2012 estimate of $23.2 million. 2012 was an anomalous year for spending in this category due to the shoring up of reserves per the recommendation of Metra's auditors. Annual growth rates for 2014 and 2015 are budgeted at 2.6% and 3.6%, respectively (Exhibit 5-7).

Administration and Regional Services

Administration activities include general support functions for the organization to ensure overall corporate goals and regulations are met. Administrative activities include human resources, labor management committee, information systems, training, accounting and other support areas. Regional Services include overhead costs as well as the costs of managing Metra-owned and operated rail services.

Administration and regional services are projected to increase by $0.8 million in 2013 to $76.3 million, an increase of 1.1%. Increases of 3.9% are anticipated for 2014 and 2015, reaching a total of $82.4 million in 2015 (Exhibit 5-7), representing a compound annual growth rate of 5.7% from 2011 to 2015.

Downtown Stations

Expenditures related to Metra's downtown stations are expected to increase by 5.5% from 2012 to $15.3 million in 2013. In 2015, costs associated with operating Metra's Downtown Chicago stations are expected to reach $16.2 million. This $1.9 million increase represents an annual compound growth rate of 3.2% from 2011 to 2015.

Diesel Fuel and Electricity

Diesel fuel and electrical power are two of the most volatile components of Metra's operating expen-

ditures. By entering into contracts to lock in prices for 75% of its diesel purchases for 2012, Metra was able to outperform its $3.12 per gallon budget and is projected to end 2012 $0.5 million favorable. Metra has not been able to lock in fuel prices for 2013 and is projecting diesel to average $3.22 per gallon for a total of $80.5 million, an increase of $2.5 million or 2.5% from the 2012 budget. The inability to lock in fuel prices for 2013 leaves Metra exposed to the risk of high fuel prices during the budget year. Metra projects diesel fuel expenses to rise to $85.0 million in 2015, an $11.2 million increase over 2011, representing a compound annual growth rate of 3.6%.

For 2013, Metra has budgeted motive power and electric utility costs to decrease by $1.2 million from 2012, due to renegotiated contracts with NICTD. Power expenses are expected to increase significantly in 2014 and 2015 (+8.6% and +14.5%, respectively) as Metra places its new Highliner rail cars into service on the Metra Electric District Line, as the newer cars require more power resources. In 2015, combined electric power costs are projected to reach $8.7 million, a $0.3 million increase representing a compound annual growth rate of 0.9% from 2011 (Exhibit 5-7).

NET RESULTS

Net results are calculated by adding total operating revenues and public funding together and subtracting total expenses. Metra's 2013 projected net results are $5.6 million; Metra anticipates transferring $5.5 million to capital from operations, and increases that contribution to $10 million in 2014 and 2015.

RECOVERY RATIO

Metra's recovery ratio equals total (system-generated) revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. For 2013, Metra's recovery ratio is projected to reach 55.4%, 2.4 percentage points higher than the ratio set by the RTA in the marks and 0.6 percentage points lower than in 2012. The recovery ratio is anticipated to increase 0.9 percentage points in 2014 and another 0.4 percentage points

in 2015, to end at 56.7%. The RTA section provides a detailed recovery ratio calculation.

Statutory Compliance

The RTA Act requires that each Service Board meet seven criteria, which are detailed in the Introduction section, for Board approval of its budget. The Metra budget substantially meets each of these criteria for its proposed 2013 budget and 2014 - 2015 financial plans. Metra's 2013 through 2015 recovery ratios, with approved adjustments, exceed the RTA mark of 53%.

2012 Budget versus 2012 Estimate

With increased farebox revenues resulting from its February 2012 fare increase and favorable public funding attributed to an improving regional economy, Metra's total revenues were $9.9 million favorable to the 2012 budget. Additionally, the mild winter weather and lock-in of three-fourths of its diesel fuel expenditures aided Metra in keeping operating expenses $2.0 million favorable to budget. The 2012 projected recovery ratio of 56.0% is 1.3 percentage points favorable to the budget of 54.7% (Exhibit 5-13).

OPERATING REVENUE

Calendar year 2012 operating revenues are estimated at $360.6 million and are projected to be $7.0 million or 2.0% higher than budget. Passenger revenues are estimated to be $8.3 million higher than budget because of the slightly higher than budgeted ridership.

Metra estimated that the reduced fare subsidy would end up 8.8% below budget by the end of the calendar year. Other revenues are estimated to be $1.0 million or 1.9% unfavorable to budget.

PUBLIC FUNDING

The RTA marks set at the beginning of 2012 budgeted public funding for the year to total $338.7 million to Metra. Sales tax revenues were higher than what was originally projected in the budget and Metra estimates a favorable variance in Sales Tax I, Sales Tax II and PTF II. Consistent with the RTA's estimates, Metra has anticipated that Sales Tax I will come in $2.5 million or 1.0% higher than budget. Sales Tax II and PTF II are projected to come in $0.4 million or 0.4% higher than budget. End-of-year available funds will be allocated to Metra's farebox capital program.

EXPENDITURES

Total 2012 operating expenditures are estimated at $684.8 million and are projected to be $2.0 million lower than budget, resulting in a favorable variance of 0.3%.

Transportation expenses were favorable to budget by $4.2 million or 2.0%. Maintenance of way expenses were favorable to budget by $2.7 million or 2.1%, but maintenance of equipment expenses were unfavorable to budget by $2.5 million or 1.7%. Administration and regional services expenses were $0.7 million, or

Exhibit 5-13: **Metra 2012 Budget vs. 2012 Estimate** (dollars in thousands)

	2012 Budget	2012 Estimate	Variance
Operating Revenues			
Passenger Revenue	297,600	305,900	8,300
Reduced Fare Subsidy	3,400	3,100	(300)

Total Operating Revenues	**$ 353,600**	**$ 360,600**	**$ 7,000**
Public Funding			
RTA Sales Tax I	246,900	249,400	2,500
RTA Sales Tax II and PTF II	90,600	91,000	400
Homeland Security Grant	1,200	1,200	-
Total Public Funding	**$ 338,700**	**$ 341,600**	**$ 2,900**
Total Revenues	**$ 692,300**	**$ 702,200**	**$ 9,900**
Expenses			
Transportation	218,500	214,300	4,200
Maintenance of Way	126,200	123,500	2,700
Maintenance of Equipment	145,600	148,100	(2,500)
Risk Mgmt., Insurance, and Claims	19,100	23,200	(4,100)
Administration and Regional Services	76,200	75,500	700
Downtown Stations	14,800	14,500	300
Diesel Fuel	78,000	77,500	500
Electricity	8,400	8,200	200
Total Expenses	**$ 686,800**	**$ 684,800**	**$ 2,000**
Less: Farebox Capital Program	5,000	5,000	-
Net Results (1)	**$ 500**	**$ 12,400**	**$ 11,900**
Recovery Ratio % (2)	**55%**	**56%**	**1%**

(1) Positive results in Net Results are either transferred to capital or added to cash reserves to help build a cash balance equivalent to six weeks of operating expenses, consistent with the Office of the Auditor General's recommendation. In 2012, Metra anticipates transferring $5.0 million to capital from operations. (2) The RTA Act requires the RTA Board to set a recovery ratio for each Service Board. Metra's 2012 estimate is 1.3 percentage points higher than the budget.

0.9%, favorable to budget. Diesel fuel expenditures were favorable by $0.5 million or 0.6%. Expenditures for electricity were also favorable by $0.2 million or 2.4%. Risk management, insurance and claims were unfavorable to budget by $4.1 million or 21.5%, following a decision early in the year to heed the advice of auditors and increase contributions to the claims reserve. Expenses related to downtown stations were favorable to budget by $0.3 million or 2.0%. Overall savings achieved in transportation, maintenance of way, administration and regional services, diesel fuel, electricity, and downtown stations more than offset increased expenses for maintenance of equipment and risk management/insurance/claims.

NET RESULTS

For 2012, the operating deficit is estimated to be $324.2 million. This result is favorable to budget by $9.0 million. Net results for 2012 show an $11.9 million favorable variance; Metra anticipates transferring $5.0 million of this positive budget variance to capital. The remainder will be transferred to cash reserves to help build a cash balance equivalent to six weeks of operating expense, consistent with the Office of the Auditor General's recommendation. Estimated results show that Metra will end 2012 with a 56.0% recovery ratio, 1.3 percentage points favorable to its budget of 54.7% and exceeding the RTA mark of 53% by 3.0 percentage points.

Fare Structure

Commuter rail fares are based upon travel between designated fare zones, with a uniform base fare charged for travel within a zone and increments added to this base fare as fare zone boundaries are crossed. These zones are set at five-mile intervals beginning at each rail line's downtown Chicago station. The zone system does not apply to the South Shore fares set by the Northern Indiana Commuter Transportation District (NICTD).

Metra proposed a fare policy change for 10-ride tickets that removes the discount embedded within those fare media, a change that will take effect on February 1, 2013 (Exhibit 5-14). The cost of a weekend ticket remained at $7.00; passengers who pay for their ticket on the train when a Metra agent is available at their boarding station will continue to pay a $3.00 surcharge. Metra has not proposed fare increases for the 2014-15 plan years; however, fare adjustments will be considered in future budgets if there is a projected shortfall between anticipated revenues and expenses.

Exhibit 5-14: **New Fare Structure**

Metra Full Fare Schedule

Zone (1)	One-Way (2)	Ten-Ride (3)	Monthly	Weekend (4)
A	$2.75	$27.50	$78.25	$7.00
B	$3.00	$30.00	$85.50	$7.00
C	$4.25	$42.50	$121.00	$7.00
D	$4.75	$47.50	$135.25	$7.00
E	$5.25	$52.50	$149.50	$7.00
F	$5.75	$57.50	$163.75	$7.00
G	$6.25	$62.50	$178.00	$7.00
H	$6.75	$67.50	$192.25	$7.00
I	$7.25	$72.50	$206.50	$7.00
J	$7.75	$77.50	$220.75	$7.00
K	$8.25	$82.50	$235.00	$7.00
M	$9.25	$92.50	$263.50	$7.00

(1) Fares based on traveling to/from Zone A (downtown stations)

(2) The on-board surcharge increased from $2.00 to $3.00 in 2010

(3) The ten-ride ticket discount was discontinued on February 1, 2013; ten-ride tickets now equal the cost of ten individual rides

(4) The weekend pass was raised from $5.00 to $7.00 in 2010

Organizational Structure

Metra's administrative organization chart is presented in Exhibit 5-15 and consists of the following divisions:

Metra Board

The 11-member Metra Board of Directors, made up of members representing the six-county Chicago metropolitan area, generally meets once a month to discuss various matters. Starting in March 2013, the Metra Board will begin using a new committee structure that is designed to promote more Board input and oversight, while increasing transparency of the operations of the commuter rail agency. Four new committees were established, with five Board members composing each committee. The committees were appointed by Chairman O'Halloran, who also designated one of the five as the committee chairman. All meetings

will be open to the public and comply with all other requirements of the Open Meetings Act.

- The Audit and Finance Committee has oversight of all financial activities not covered by other committees, as well as audit activities, all non-capital procurements, and all matters relating to the operating budget.
- The Capital Oversight Committee has oversight of the development, funding, approval and implementation of the capital program, including all contracts and procurements relating to the capital program.
- The Employment Practices Committee has oversight of policies and actions relating to employee hiring, compensation, personnel policies, labor contracts, labor/management interactions, and safety.
- The Executive Committee has oversight of issues relating to corporate governance, compliance, strategic planning, legislative affairs, operational performance, policies that are not related to personnel, and adoption of intergovernmental agreements.

Executive Director/Chief Executive Officer

Metra's Executive Director and Chief Executive Officer is charged with executing Board policy decisions and providing direction to Metra staff as they work to fulfill the mission and goals of the agency. The Executive Director reports directly to the Metra Board of Directors.

Finance

The finance area is comprised of the Controller's Office (oversees Accounting, Payroll, Treasury, Budget, Finance & Analysis, and Grant Development & Accounting) and Information Technology (oversees Network Services, Systems Development, Computer Operations, and Web Services).

Operations

The Operations Division consists of three departments: Transportation, Mechanical, and Engineering. Transportation has oversight of the Chicago Union Station District, Rock Island District, Electric District, Contract Carriers, Dispatch, Service Design, GPS, and Station Services. Mechanical includes Mechanical Operations, Contract Carriers, Projects, and Fleet Management. Engineering includes Maintenance, Communications, Projects, Safety, Operations Training, and Rules & Federal Regulatory Compliance.

Customer Affairs and Communications

This area includes Customer Service, Ticket Services, Customer Affairs, Communications, Media, Marketing, and Web Content.

Law

Metra's Law Division encompasses assistance to the General Counsel, Litigation and Risk Management, and an Ethics Office.

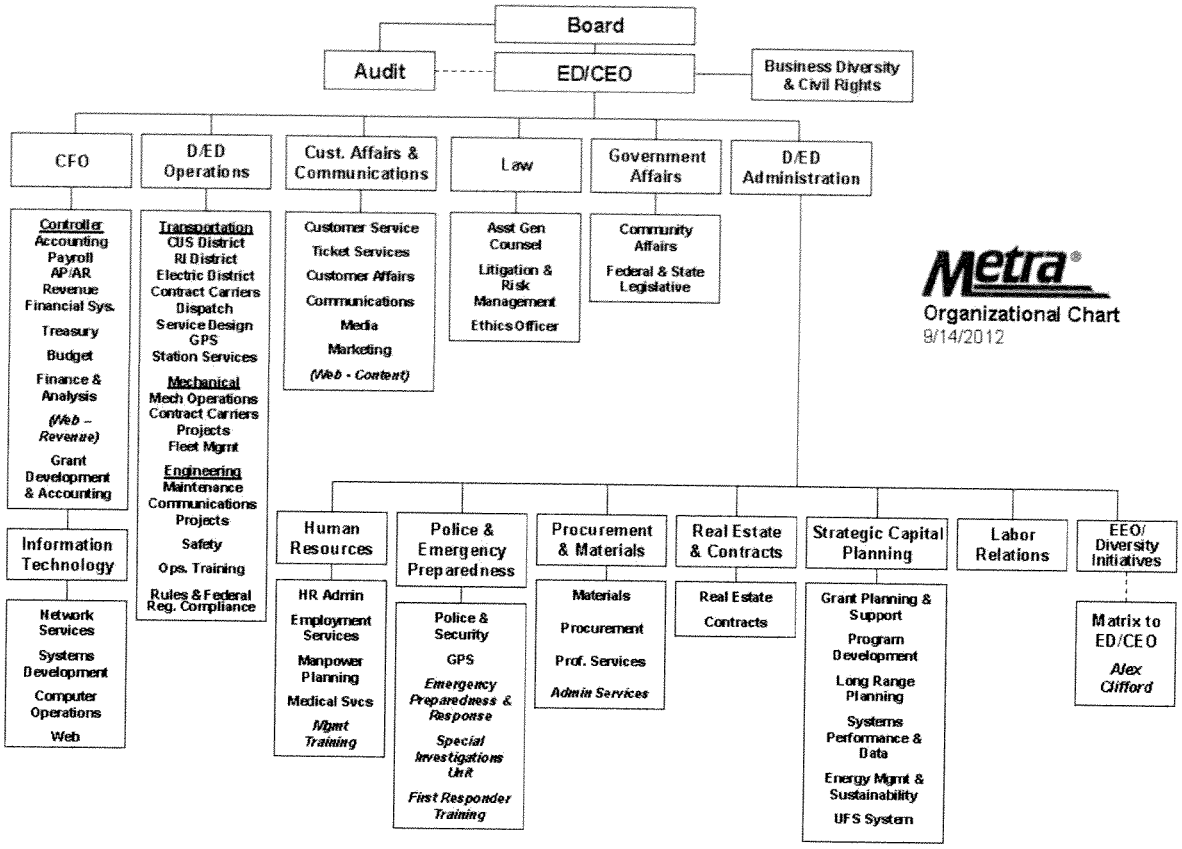
Government Affairs

Metra's Government Affairs Division is comprised of Community Affairs and Federal & State Legislative Affairs, representing Metra and its interests.

Administration

Metra's Administration encompasses Human Resources, Police & Emergency Preparedness, Procurement & Materials, Real Estate & Contracts, Strategic Capital Planning, Labor Relations, and EEO/Diversity Initiatives.

Exhibit 5-15: Metra's Organizational Chart



6 Pace Suburban Service Operating Plan

Overview

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority (RTA), and began service in 1984. Pace is governed by a 13-member Board of Directors made up of current and former village presidents and mayors representing the different suburban areas of the RTA region.

Pace's mission is to provide efficient and well-integrated transportation services that meet the travel needs of the suburban Chicago area. Effective suburban mobility comprises line-haul and community-based services that provide access between both nearby and distant origins and destinations. To attract riders in an automobile-oriented market requires coordination of infrastructure, service, information, and travel demand. To achieve this mission, Pace must maintain viable transit options for the 21st century suburban environment.

Beginning July 1, 2006, Pace also assumed operating responsibility for all ADA Paratransit service in the RTA region. Pace's Regional ADA Paratransit operating plan is presented in chapter 7.

Pace Suburban Service provides more than 35 million annual rides with a fleet of 687 buses, 442 paratransit vehicles, and 694 vanpool vehicles.

Service Characteristics

Pace operates one of the largest bus services in North America, with a territory covering 3,519 square miles. Pace operates more vehicles than any other suburban bus service in the U.S. Their service area spans six counties and serves a full spectrum of 284 diverse communities comprised of walkable suburban neighborhoods, satellite cities, and rural towns.

Pace Suburban Service features distinct fixed-route, paratransit, and vanpool services. Fixed-route operations offer 138 regular routes, 35 feeder routes, and 14 shuttle routes. Pace's non-ADA paratransit services include 68 local Dial-a-Ride arrangements as well as 7 of the newer concept Call-n-Ride operations. Finally, Pace administers 3 types of vanpool programs; traditional vanpool, employer shuttle, and the Advantage program which is tailored to non-profit human service organizations. In total, Pace Suburban Service provides more than 35 million annual rides with a fleet of 687 buses, 442 paratransit vehicles, and 694 vanpool vehicles.

RIDERSHIP

For the 2013 budget year, Pace projects that Suburban Service ridership will increase by 3.9% to 36.8 million as the economy continues to recover and the employment picture improves. Ridership has been increasing steadily since modest service reductions were implemented in 2010. In 2011, Pace Suburban Service ridership increased over 4% to 33.7 million and is expected to finish 2012 at 35.4 million, an additional increase of about 5%. Pace's ridership forecast for 2014 and 2015 predicts slowing growth of 2.1% and 2.0%, respectively, with 38.3 million rides expected by the end of the two-year planning period (Exhibit 6-1).

Pace's 2012 ridership gains were made despite the loss of some senior ridership related to the end of the Seniors Ride Free Program. Effective September 1, 2011, senior free rides, which had previously been allowed on all Chicago-area transit, became limited to only low-income seniors, resulting in an estimated loss of up to 100,000 senior trips per year on Pace fixed-route service. Seniors who did not qualify for free rides were still eligible to purchase reduced-fare tickets, and an estimated 43% of former free Pace senior riders opted to do so, providing a significant farebox revenue improvement. It is also estimated that 51% of Pace's ridership under the Seniors Ride Free Program continues to ride free by meeting the low-income criteria of the revised program.

SERVICE QUALITY

As part of its effort to improve service quality, Pace has formulated a variety of performance measures. For each performance measure, Pace has provided a performance standard, the 2011 result, an estimate for 2012, and a projection for 2013. The performance measures are grouped by quality service area: Safety,

Reliability, Courtesy, Efficiency, and Effectiveness. When performance for a year exceeds the performance standard, the measurement is highlighted in green. If performance for the year falls below but within 10% of the standard, the measurement is highlighted in yellow. When performance falls more than 10% below the standard, the measurement is highlighted in red. The performance measure results and projections for 2011 through 2013 can be found at the end of this section (Exhibit 6-13).

Pace also compares its performance to that of peer transit agencies selected by the RTA and based on similar service characteristics: suburban operating areas with comparable amounts of service and contracts with private providers for some of the service. Peer transit agencies include Long Island Bus (MTA), Orange County Transportation Authority (OCTA), San Mateo County Transit District (SamTrans), and Alameda-Contra Costa Transit District (AC Transit). Performance measures include operating expense per vehicle revenue hour and per vehicle revenue mile (service efficiency), operating expense per passenger trip and per passenger mile (cost effectiveness), and passenger trips per vehicle revenue hour and per vehicle revenue mile (service effectiveness), as reported by Pace and peer agencies to the Federal Transit Administration and compiled in the National Transit Database (NTD). For 2010, Pace outperformed all of its peers in operating expense per vehicle revenue hour, operating expense per vehicle revenue mile, and operating expense per passenger mile. Pace ranked fourth among its peers in operating expense per passenger trip. Pace ranked fifth in both measures of service effectiveness primarily because Pace has the largest service area and the lowest population density when compared to its peers.

Performance measurements and peer comparisons represent important steps toward improving service quality and increasing accountability to the public. By striving to meet or exceed performance goals and peer performance, Pace has shown that it is working toward improved service quality and higher customer satisfaction.

Exhibit 6-1: **Pace Suburban Service Ridership** (in millions)

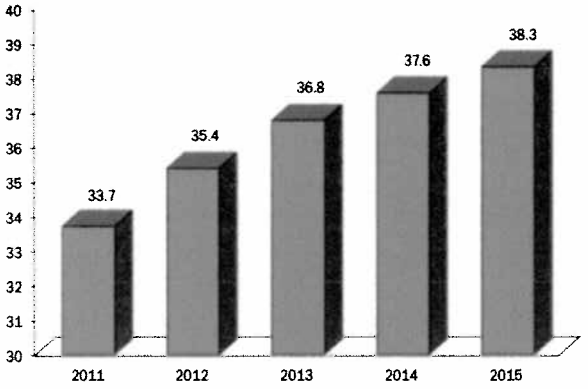


Exhibit 6-2: **Pace Suburban Service Passengers per Vehicle Mile**

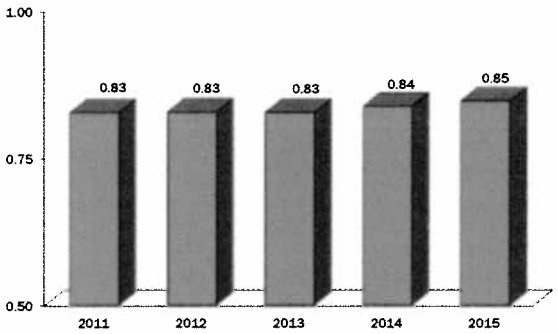
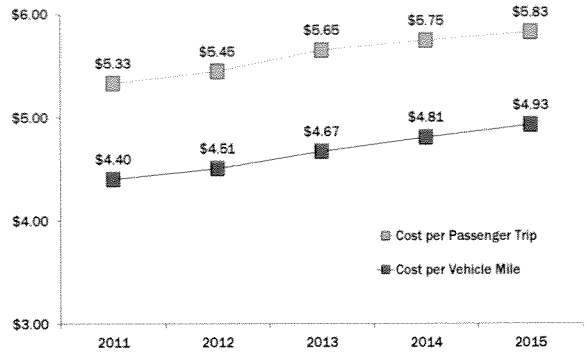


Matching the amount of service provided to demand is fundamental to achieving system effectiveness. One way to measure this balance is to relate the total number of passengers served to the total number of miles operated. Pace's passengers per mile ratio for Suburban Service is estimated to remain flat at 0.83 for 2011 through 2013, before rising to 0.85 by 2015 (Exhibit 6-2). This stable to increasing trend indicates that service is being added at an appropriate and measured rate, consistent with rising demand.

The cost per passenger trip and cost per vehicle mile metrics (Exhibit 6-3) provide insight into the steadily rising expense of providing transit service. Suburban Service cost per mile is expected to increase from $4.40 in 2011 to $4.93 in 2015, corresponding to a compound annual growth rate of 2.9%. Due to ongoing ridership gains, the cost per passenger trip increases at a somewhat lower annual rate of 2.2%. These metrics are being driven higher by steady increases in operating expenses such as labor, maintenance,

Exhibit 6-3: **Pace Suburban Service Cost Efficiency**



material, and fuel, all of which are discussed in detail later in this chapter.

CHALLENGES

Pace's robust ridership gains of late 2011 and 2012, fueled by the economic recovery, are expected to slow over the next three years, in turn reducing the growth of operating revenue. With only modest increases in public funding projected by the RTA, the growth in total revenues will lag the growth in operating expenses, which are driven by labor expense, fuel, technological improvements, and normal inflation. Increasing levels of both federal Capital Cost of Contracting funds and RTA discretionary funds are required to balance Pace's three year plan. Pace will be focused on efforts to continuously improve safety and promote ridership on all of its transit modes, while seeking to fully leverage funding sources for both operating and capital purposes.

CAPITAL INVESTMENT

Pace's 2013 capital program of $109.2 million will focus on projects needed to move Pace toward a State of Good Repair. Of that total, $76.7 million or over 70% will be spent on purchases of rolling stock, as Pace replaces aging fixed-route buses, paratransit vehicles, and vanpool vans. Most of the buses to be purchased are powered by compressed natural gas, a domestically-produced, clean-burning fuel with less price volatility than diesel. The remainder of the bus purchases will be for over-the-road coaches to support expansion of express bus services.

Pace's second largest capital expenditure category for 2013 is $27.6 million or 25% for support facilities and equipment. This category includes expenditures of $10.6 million for the purchase of the Ventra fare system and $9.7 million for garage improvements system-wide. The remainder of the 2013 capital program contains expenditures on station and passenger facilities, electrical, signal, and communications, and miscellaneous. Complete details of Pace's five-year capital program are provided in chapters 9 and 10.

SAFETY AND SECURITY

Pace's primary metric in this area, accidents per 100,000 revenue miles, improved in 2012 but at 5.80 still does not meet Pace's performance standard of 5.0. The posted stop initiative, which will move Pace's fixed bus routes away from the traditional flag-stop service, will enhance safety for both passengers and operators. This initiative will clearly communicate the location of each route's designated bus stops, which will also be fitted with added customer amenities. In addition to improving safety, posted stops will also support better on-time performance by speeding up Pace fixed-route service.

Budget and Financial Plan

The Pace Suburban Service 2013 budget and two-year financial plan presented in Exhibit 6-4 meet the funding marks set by the RTA Board on October 10, 2012. The budget reflects a recovery ratio of 30.0% for Suburban Service operations, using approved credits to exactly meet the mark adopted by the RTA Board. Pace's 2013 budget and two-year financial plan were approved by the RTA Board on January 16, 2013. A detailed discussion of Pace's outlook for operating revenue, public funding, and operating expenditures follows.

OPERATING REVENUE

Pace's system-generated revenue from Suburban Service operations in 2013 is expected to total $59.2 million. Exhibit 6-5 shows a steady increase in operating revenue from 2011 through 2015, representing a 2.8% compound annual growth rate. This increase

Exhibit 6-4: **Pace Suburban Service 2013 Budget and 2014-2015 Financial Plan** (dollars in thousands)

	2011 Actual	2012 Estimate	2013 Budget	2014 Plan	2015 Plan

Total Expenses	**$ 179,690**	**$ 192,701**	**$ 207,761**	**$ 215,756**	**$ 223,196**
Net Result (1)	**$ 14,595**	**$ 5,982**	**-**	**-**	**-**
Recovery Ratio (2)	**36.0%**	**30.0%**	**30.0%**	**30.0%**	**30.0%**

(1) Positive net results are retained by the Service Board for capital purposes unless otherwise authorized by the RTA Board.

(2) The recovery ratio includes Advantage program in-kind revenue and expense inclusions (of equal amounts), as well as statutory and approved adjustments. The recovery ratio in 2013 meets the 30% mark set for Pace by the RTA Board on October 10, 2012.

is primarily due to the actual and projected increase in ridership and the associated growth in farebox revenue over the five-year period. However, operating revenue will account for only 28% of total Suburban Service revenue in 2013 (Exhibit 6-6), with the remainder provided by public funding sources.

Passenger Revenue

Revenue from passenger fares accounts for almost two-thirds of Pace's operating revenue and is projected at $37.3 million in 2013. In 2014 and 2015, passenger revenue grows by just over 2% per year, consistent with the expected slowing of ridership growth (Exhibit 6-7). Passenger revenue includes fixed route farebox deposits (using cash, passes, and cards) and payments for vanpool, Dial-a-Ride, and other services. The average passenger fare increases slightly across the period from $1.01 to $1.02.

Pace's Suburban Service fare structure (effective January 14, 2013) is shown in Exhibit 6-8. While no direct Pace fare increases are scheduled for 2013, the fare table does reflect higher costs for Pace/CTA 30-day and 7-day passes as well as the Link-Up pass, due to the CTA's fare policy adjustments effective in mid-January 2013. Also beginning in 2013, Indiana-based Pace vanpool customers will be assessed a

$27 monthly surcharge to offset the cost of tolls on the Chicago Skyway and Indiana Toll Road.

Reduced Fare Reimbursement

The State of Illinois provides partial reimbursement for the revenue loss due to mandated free and reduced fare ride programs for the elderly, students, and disabled persons. This amount is expected to remain steady at $2.6 million in 2013 and in the planning years of 2014 and 2015.

Other Revenue

Pace's other revenue category is projected at $19.2 million for 2013 and includes investment income, advertising revenue, and local government contributions to support specific services. The latter accounts for more than 75% of this category, amounting to $14.7 million in 2013 and growing by 2% thereafter. Advertising revenue is expected to be steady at $4.4 million, while investment income, the smallest component, is expected to increase from $124 thousand in 2013 to $258 thousand in 2015.

Exhibit 6-5: **Pace Suburban Service Operating Revenue**
(dollars in millions)

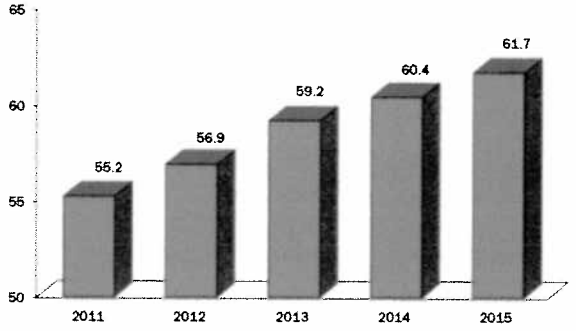

Exhibit 6-7: **Pace Suburban Service Passenger Revenue**
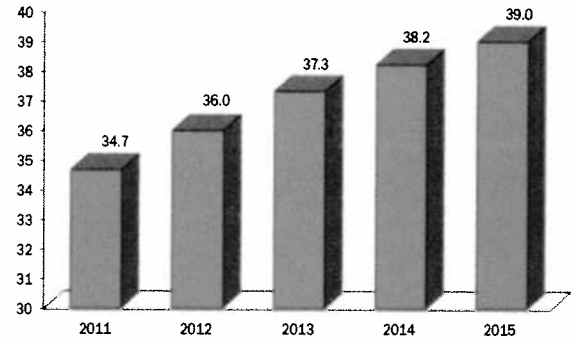
(dollars in millions)



PUBLIC FUNDING

Public funding for Pace is projected at $148.6 million for 2013, representing 72% of total Suburban Service revenue. Public funding is then forecast to grow to $161.5 million by 2015. Public funding for Pace operations includes statutory allocations of RTA Sales Tax (I and II) and Public Transportation Funds (PTF II), as well as federal sources.

Pace's share of RTA Sales Tax I is projected at $80.9 million for 2013, an increase of 2.3% from the 2012 estimate. This funding source is then forecast to increase by 3.2% in 2014 and by 3.5% in 2015, consistent with GDP projections. RTA Sales Tax II &

PTF II is expected to increase from $30.4 million in 2013 to $31.8 million in 2015, growing at a somewhat slower rate than Sales Tax I. Pace will also receive funding from the RTA Suburban Community Mobility Fund (SCMF), which is indexed to sales tax growth. This source will provide $21.1 million to $22.5 million for 2013 through 2015. The RTA also provides South Suburban Job Access (SSJA) funds in the fixed amount of $7.5 million annually, rounding out the statutory funding sources.

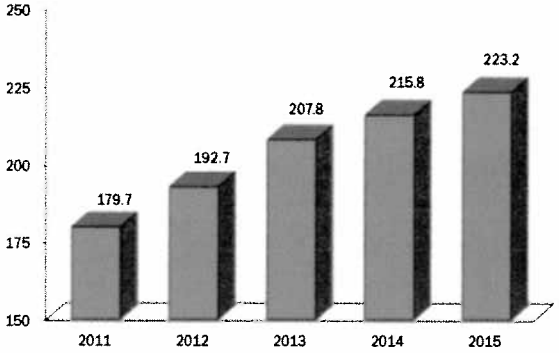
Finally, the RTA will provide Pace with discretionary funding of $3.7 million for operations in 2013, a 23% increase over 2012. A thorough discussion of how the RTA allocates public funds among the Service Boards is contained in chapter 3.

In addition to funds from the RTA, Pace also receives federal funds for operations. Pace expects to receive combined Congestion Mitigation Air Quality (CMAQ), Job Access Reverse Commute (JARC), and New Freedom funds of $2.3 million in 2013, an amount which then decreases to $1.4 million and $1.1 million in 2014 and 2015, respectively. Pace will use $2.8 million of Federal 5307 Capital Cost of Contracting funds for operations in 2013, increasing to $5.5 million and $7.4 million in 2014 and 2015, respectively.

OPERATING EXPENDITURES

Pace Suburban Service operating expenditures are expected to increase by 7.8% in 2013 to $207.8 million. This significant increase is being driven by higher labor expenses, modest service expansions, and technological improvements. In 2014 and 2015, Pace projects that overall expenditure growth will slow to 3.8% and 3.4%, respectively. The total expense trend over the five year period from 2011 to 2015 corresponds to a compound annual growth rate of 5.6% (Exhibit 6-9).

Exhibit 6-9: **Pace Suburban Service Operating Expenses**
(dollars in millions)



Suburban Service expenditure totals include a regional ADA Paratransit support credit that reflects the administrative and overhead costs incurred throughout Pace in support of ADA Paratransit operations. This credit is accounted for in exhibit 6-4 as an offset within the Other expense category. Operating expenditure elements include labor/fringe benefits, health insurance, parts/supplies, purchased transportation, fuel, utilities, insurance/claims, and other (Exhibit 6-10).

Labor/Fringes

Projected 2013 labor/fringes expenditures of $104.1 million will account for just over 50% of total Suburban Service operating expenditures. This amount represents an increase of 6.3% over the 2012 estimate, driven by both contractual wage increases and the hiring of additional full-time equivalents (FTEs) necessitated by modest service expansions. Labor/fringes expenditures are then projected to grow by 3% in both 2014 and 2015, ending the period at $110.5 million. Over the five-year period from 2011 through 2015, this large expense category experiences a 4.8% compound annual growth rate.

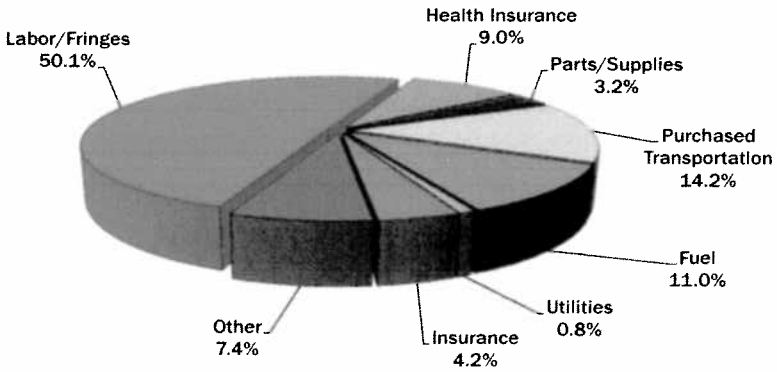
Health Insurance

Health insurance expenditures are projected at $18.7 million for 2013, accounting for 9.0% of total Suburban Service operating expenditures. This amount represents a 3.4% increase over 2012, much smaller than the 12.3% increase experienced in 2012. Health insurance expenditures are then projected to grow at 6.0% in 2014 and 2015, ending the period at $21.0 million and resulting in a 6.9% compound annual growth rate over the five-year period.

Parts/Supplies

Parts/supplies expenditures for 2013 account for 3.2% of total expense and are projected at $6.7 mil-

Exhibit 6-10: **2013 Pace Suburban Service Total Expense - $207.8 million**



lion, an increase of 4.9% over 2012. These expenditures are then projected to grow by 4.4% and 4.9% in 2014 and 2015, respectively. Over the five year period from 2011 through 2015, this category is projected to increase at a 5.7% compound annual growth rate.

Purchased Transportation

Purchased transportation costs of $29.6 million for 2013 represent Pace's second largest expense category at 14.2% of total expenditures. This expenditure level represents a sharp increase of 7.7% over the 2012 estimate, as some of Pace's service agreements were renewed at higher rates. These expenditures are then projected to grow at 3.3% to 3.7% in 2014 and 2015, ending the period at $31.7 million. The resulting five-year compound annual growth rate for this large expense category is 4.2%.

Fuel

Pace's third largest expense category, fuel, is expected to increase by 9.5% to $22.9 million in 2013, representing 11.0% of total Suburban Service expense. The projected increase in fuel expenditures, which include both fixed-route and vanpool, is being driven primarily by price rather than consumption. Pace has assumed a diesel price per gallon of $3.32, an increase of 6.4% over the 2012 estimate of $3.12 per gallon. Fuel consumption in 2013 increases by 2.8% to 6.861 million gallons, consistent with the increase in total vehicle miles for fixed-route and vanpool. In 2014 and 2015, fuel expenditures increase by 2.1% and 3.3%, respectively, as Pace has assumed a smaller fuel price increase and nearly flat fuel consumption.

Utilities

Utilities expenditures of $1.7 million are projected to increase by 2.3% and account for 0.8% of total Suburban Service operating expenditures in 2013. These expenditures are then forecast to increase by 4.0% and 4.4% in 2014 and 2015, respectively, resulting in a 3.0% compound annual growth rate over the five year period from 2011 through 2015.

Insurance

Insurance expenditures of $8.7 million are projected to increase by 2.5% in 2013 and account for 4.2% of total Suburban Service operating expenditures. These expenditures are then forecast to increase by 4.5% and 5.1% in 2014 and 2015, respectively, contributing to a 5.5% compound annual growth rate over the five year period from 2011 through 2015.

Other

Other expenditures are projected to total $15.3 million and account for 7.4% of total Suburban Service operating expenditures in 2013. This amount represents a large increase of 30.5%, partially driven by the first-time inclusion of $1.7 million in operating costs for Ventra, Pace and CTA's new fare payment system. Other items driving the increase include operating expenses for Pace's new Starcom radio system, leases for additional Bus-on-Shoulder coaches, and increased MIS software maintenance expense. The Regional ADA Paratransit support credit, discussed next, is also included within the Other expense category shown in Exhibit 6-4.

Regional ADA Paratransit Support Credit

Pace allocates expenses to the ADA Paratransit budget in order to account for the work that departments such as MIS, budgeting, accounting, purchasing, human resources, and senior executives do in support of the ADA Paratransit program. For 2013, this amount will decrease 1.1% to $3.949 million, an expense credit which is included as an offset within the Other

expense category. Pace anticipates that the amount of this credit will increase by 2.6% and 2.9% in 2014 and 2015, respectively.

NET RESULTS

Net result equals total revenues (both operating revenue and public funding) minus total operating expenses. In the Suburban Service 2013 budget, revenues and expenses are balanced, producing a net result of zero. A net result of zero is also achieved in the 2014 and 2015 financial plan years, although Pace is projecting that it will require a sharply increasing amount of federal capital cost of contracting funds in order to maintain a balanced Suburban Service budget.

RECOVERY RATIO

The recovery ratio equals total operating revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. Pace's adjustments include an in-kind revenue and expense inclusion for the Advantage vanpool program. Pace expects to achieve a recovery ratio of 30% in 2013, meeting the mark set by the RTA Board on October 10, 2012. A 30% recovery ratio is projected for 2014 and 2015 as well.

Statutory Compliance

Pace's proposed 2013 budget, 2013 recovery ratio, and 2014-2015 financial plan comply with the operations funding marks set by the RTA Board on October 10, 2012. These marks included sales tax, Public Transportation Fund, Suburban Community Mobility Funds, and South Suburban Job Access Funds provided by statutory formulas, as well as RTA discretionary funds. The marks set the total RTA funding levels for Pace at $143.5 million in 2013, $148.4 million in 2014, and $153.1 million in 2015, and also set the 2013 recovery ratio at 30%.

The RTA Act requires each Service Board's budget to meet the seven criteria detailed in the Introduction chapter, prior to approval by the RTA Board. The Pace Suburban Service budget, as submitted, substantially meets each of these criteria.

2012 Budget versus 2012 Estimate

Pace expects favorable results relative to budget in 2012 due to strong ridership, improving sales tax receipts, and disciplined cost control (Exhibit 6-11).

OPERATING REVENUE

Pace expects 2012 Suburban Service operating revenue to finish the year $2.4 million or 4.4% favorable to budget, driven almost entirely by a 7.6% favorable variance in farebox receipts due to increased ridership. The improving regional employment outlook, relatively high gas prices, and the successful marketing of vanpool programs and services such as Bus-on-Shoulder have all contributed to significant ridership gains above budget. The State reduced fare reimbursement is expected to be provided at the budgeted level of $2.6 million while other revenues, which include local government share and sources such as advertising and investment income, are expected to be slightly unfavorable to budget.

PUBLIC FUNDING

Pace expects a favorable public funding variance of $1.2 million in 2012 due to higher RTA sales tax receipts and increased federal CMAQ / JARC/ New Freedom funding.

EXPENDITURES

Total 2012 Suburban Service expenditures are expected to finish the year $2.3 million or 1.2% favorable to budget. Pace projects that favorable variances in purchased transportation, fuel, utilities, and insurance expenses will more than offset unfavorable variances in the labor/fringes, health insurance, and parts/supplies categories. Purchased transportation is expected to have the largest favorable variance at $1.8 million due to decreased Dial-a-Ride expenditures.

Although fuel consumption will be slightly higher than budget due to growth in Pace's vanpool programs, per gallon fuel prices have been significantly lower than budgeted and are expected to result in a $1.6 million

Exhibit 6-11: **Pace Suburban Service 2012 Estimate vs. 2012 Budget** (dollars in thousands)

	2012 Budget	2012 Estimate	Variance
Operating Revenues			
Passenger Revenue	33,436	35,979	2,543

Total Expenses	$ 195,017	$ 192,701	$ 2,316
Net Result	-	$ 5,982	$ 5,982
Advantage Program In-Kind Revenue / Expense (1)	**$ 10,167**	**$ 1,315**	**($ 8,852)**
Recovery Ratio (1)	**31.5%**	**30.0%**	-

(1) The recovery ratio calculation includes Advantage program in-kind revenue and expense inclusions (of equal amounts), as well as statutory and approved adjustments.

or 6.9% favorable fuel expense for the year. Labor/fringes expenditures are projected to have the largest unfavorable variance at $1.3 million due to overtime and increased pension costs.

This favorable expense variance, combined with favorable operating revenues and public funding, is expected to produce a 2012 net result of $6.0 million. Suburban Service will also meet the required recovery ratio of 30%, after applying $1.3 million of approved revenue and expense inclusions.

Organizational Structure

Pace is organized into four main areas: Revenue Services, Strategic Services, External Relations, and Internal Services (Exhibit 6-12). Pace's staffing requirements are classified into four primary categories: administration, central support, Pace-owned divisions, and Regional ADA Paratransit services. Within each category, employees are classified into four activity areas: operations, maintenance, non-vehicle maintenance, and administration. These activity areas are defined by the National Transit Database reporting requirements, which apply to all public transit operators.

7 Pace ADA Paratransit Service Operating Plan

Overview

The RTA administers a regional certification program that determines if individuals with physical or cognitive disabilities are eligible for ADA Paratransit service. If they are found eligible, passengers can arrange for travel within three quarters of a mile of Pace or CTA bus routes or CTA rail stations, as required by the Americans with Disabilities Act of 1990 (ADA). Effective July 1, 2006, Pace began providing all ADA Paratransit service in the RTA region.

Service Characteristics

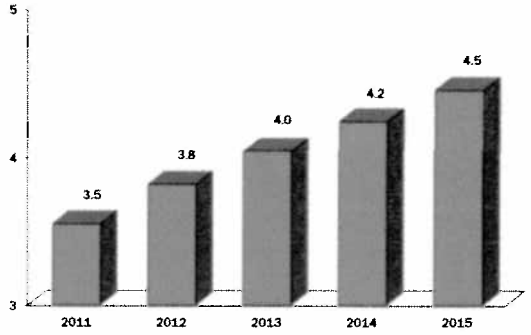
In the suburban area where Pace provides fixed-route service, Pace contracts with private operators to provide ADA Paratransit service. These contractors operate 234 Pace-owned lift-equipped vehicles to provide curb-to-curb service to ADA Paratransit-certified passengers.

In the CTA service area, Pace contracts with four private operators to provide ADA Paratransit service in the entire city of Chicago and most of the suburbs serviced by the CTA. These contractors operate 652 contractor-owned vehicles to provide service to ADA Paratransit-certified passengers. Pace also administers two subsidized taxi programs in the City of Chicago for ADA Paratransit-certified individuals, the Taxi Access Program (TAP) and the Mobility Direct Program, although these services are not required by the Americans with Disabilities Act.

RIDERSHIP

Unlike fixed-route transit services, ADA Paratransit operating expenses vary directly with ridership levels, so accurate ridership projections are critical to budget integrity. Pace's 2013 budget incorporates a ridership increase of 5.9% to just over 4 million, with city ridership growing slightly faster than suburban ridership. Pace expects 2012 to end with a 7.5% ridership increase over 2011, so the assumed growth for 2013 is somewhat lower than recent trends would suggest. Pace then projects that ADA Paratransit ridership will increase by 5.0% per year in 2014 and 2015, reaching almost 4.5 million rides by the end of the two-year planning period (Exhibit 7-1), with equal ridership growth expected in the city and suburban service areas. Effective in 2011, Pace began including companions and personal care attendants in its ADA Paratransit ridership totals, and all ridership figures discussed herein reflect this reporting change.

Exhibit 7-1: **Pace ADA Paratransit Ridership** (in millions)



SERVICE EFFICIENCY

Relative to other transit modes, ADA Paratransit is inherently expensive due to service that is frequently provided on an individualized basis. Pace's cost per ADA Paratransit passenger trip is expected to increase by 75 cents to $36.82 in 2013, resuming an upward trend after a decrease in 2012 (Exhibit 7-2).

Several Pace initiatives were implemented with the goal of increasing productivity in 2012. These included deployment of an Interactive Voice Response (IVR) system to pre-notify riders and reduce vehicle dwell times, an earlier reservation hours cutoff to provide more time for producing an efficient scheduling solution for the following day, and an increased em-

(1) Additional RTA funding from ICE in 2011 and from RTA fund balance in 2012.

(2) Additional revenue and/or funding needed to cover projected ADA Paratransit expenses.

(3) Includes an expense exclusion for capital cost of contracting in order to meet the statutory requirement of 10%.

phasis on ride-sharing whenever feasible. In addition, temporary rate freezes were negotiated with some of Pace's service providers for 2012 only. As a result of these initiatives, Pace's cost per ADA Paratransit passenger trip decreased by 6 cents in 2012 to $36.07. However, as Exhibit 7-2 shows, the cost per passenger trip and cost per vehicle mile are projected to increase steadily from 2013 to 2015, with compound annual growth rates of 2.4% and 1.9%, respectively, across that period.

CHALLENGES

With the 2012 productivity initiatives now implemented, further productivity improvements within the financial planning period are limited. As a result, total ADA Paratransit expenses will be driven by both ridership growth and by contractor price increases. The former is projected at 5% per year in 2014 and 2015, and the latter at 2% to 3% in those years. These two factors combine to produce an expected total expense growth rate of 7% to 8%. Since ADA Paratransit fare levels contribute a relatively small amount of revenue, public funding for ADA Paratransit will need to grow at about the same rate as expenses, which have a higher growth rate than sales tax, resulting in a higher proportion of public funding allocated to ADA Paratransit services.

While ridership growth did show some indications of slowing in the second half of 2012, an aging population would suggest that demand for ADA Paratransit services will continue to be strong in the near future. The current provider contracts are in effect through 2014, and Pace will be issuing an RFP in 2013 in anticipation of the renewal process, which will be critical in setting the expense trajectory for the subsequent five-year period.

Budget and Financial Plan

The Pace Regional ADA Paratransit 2013 budget and two-year financial plan presented in Exhibit 7-3 adheres to the funding marks set by the RTA Board on October 10, 2012. In compliance with the RTA Act, the RTA set the ADA Paratransit recovery ratio for 2013 at 10.0%, a mark which Pace's 2013 budget has met. Pace's 2013 budget and two-year financial plan were approved by the RTA Board on January 16, 2013. A detailed discussion of the outlook for ADA Paratransit operating revenue, public funding, and expenses follows.

OPERATING REVENUE

Pace's system-generated revenue from ADA Paratransit operations in 2013 is expected to increase by 7.9% and total $12.5 million (Exhibit 7-4). This follows a projected 15.9% decrease in operating revenue for 2012. Operating revenue is then expected to grow by 4.6% in both 2014 and 2015. These revenue figures do not incorporate required budget balancing actions in 2014 and 2015, discussed in the upcoming Public Funding section. Operating revenue accounts for 8.4% of total revenue in 2013 (Exhibit 7-6), with the remainder provided by public funding sources. ADA Paratransit operating revenue is comprised of passenger revenue and other revenue, the latter consisting of reimbursements from the RTA and the Illinois state Medicaid program.

Passenger Revenue

Revenue from passenger fares is projected at $10.0 million in 2013, an increase of 6%, consistent with expected ridership growth (Exhibit 7-5). Passenger revenue is then expected to grow by 5% in 2014 and 2015, also consistent with assumed ridership growth in those years. Pace's current regional ADA Paratransit fare structure is shown in Exhibit 7-7. Pace's last ADA Paratransit fare increase was in November 2009. No fare increases are planned for the 2013 budget, and current fares remain below the maximum allowable level of twice the fixed-route base fare. Because medically-required personal care attendants who accompany disabled passengers do not pay a fare,

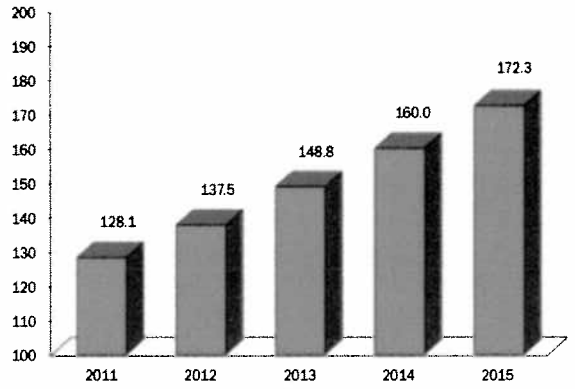
Taxi Access Program and Mobility Direct	$5.00
PACE SERVICE AREA	
ADA Paratransit	$3.00

Exhibit 7-8: **Pace ADA Paratransit Operating Expenses**
(dollars in millions)



but are counted in ridership, the average fare per passenger is lower than the base $3.00 fare, remaining constant across the period at $2.49.

Other Revenue

Other operating revenue for 2013 is projected to increase 16.9% to $2.5 million, followed by increases of 2.9% and 3.0% in 2014 and 2015, respectively. Other revenue comes from two sources. The first is the RTA ADA Paratransit certification program, which reimburses Pace for the cost of transporting prospective customers to and from ADA Paratransit assessment centers. The second is the state Medicaid program, which reimburses Pace to defray the cost of Medicaid-related rides. Medicaid reimbursements are difficult to forecast, and can lead to significant fluctuations in overall operating revenue, as experienced in 2011 and 2012 (Exhibit 7-4).

PUBLIC FUNDING

The required level of public funding for Pace ADA Paratransit in 2013 is projected at $136.3 million, an increase of 8.2% over 2012. Public funding for 2013 consists of two components: $127.8 million of Sales Tax II / PTF II provided by the RTA and $8.5 million of additional funding provided by the State of Illinois. Public funding accounts for 91.6% of total revenue for ADA Paratransit (Exhibit 7-6), and when combined with operating revenue is expected to fully cover the operating costs of ADA Paratransit in 2013.

In 2014 and 2015, Sales Tax II / PTF II funding is projected to increase by 5.3% while the additional State funding remains constant at $8.5 million. Pace has identified additional funding needs in 2014 and 2015 of $3.8 million and $8.4 million, respectively, in order to balance the ADA Paratransit operating budget. Legislation which amended the RTA Act in 2011 requires the RTA to fully fund the ADA Paratransit need each year, although actions such as a fare increase or cost reduction could also be considered to balance the budget.

OPERATING EXPENDITURES

Pace ADA Paratransit operating expenditures are expected to increase by 8.2% in 2013 to $148.8 million. This significant growth follows an increase of 7.3% in 2012. ADA Paratransit expenses continue to be driven higher by a combination of ridership increases and higher contractor prices. In 2014 and 2015, Pace anticipates a slowing of expense growth, to 7.5% and 7.7%, respectively, with total operating expenses expected to reach $172.3 million in 2015. The expense trend over the five-year period of 2011 to 2015 corresponds to a compound annual growth rate of 7.7% (Exhibit 7-8).

Operating expenditure elements include labor/fringe benefits, health insurance, administrative expenses, fuel, liability insurance, RTA certification trip costs, purchased transportation, and the Regional ADA Paratransit support allocation (Exhibit 7-9). Figures for individual expenditure elements do not incorporate projected budget balancing actions in 2014 and 2015.

Labor/Fringe Benefits

Labor/fringe benefits for Pace's dedicated ADA Paratransit staff are expected to total $2.7 million in 2013, an increase of 3.1% from 2012. This amount represents 1.8% of total regional ADA Paratransit operating expenditures. Labor/fringe expenses are then projected to increase by 2.6% and 2.9% in 2014 and 2015, respectively. The resulting compound annual growth rate over the five-year period from 2011 to 2015 is 4.5%.

Health Insurance

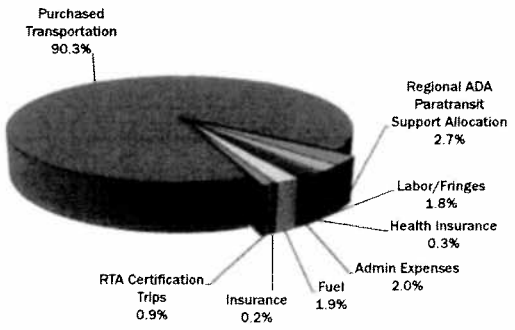
Health insurance expenditures for Pace's dedicated ADA Paratransit staff represent 0.3% of total expenditures, and are projected at $403,000 for 2013, an increase of 2.5%. Health insurance expenditures are then expected to increase by approximately 10% in both 2014 and 2015, approaching $500,000 by the end of the planning period. The resulting compound annual growth rate over the five-year period from 2011 to 2015 is 8.5%.

Representing more than 90% of total operating expenditures, the Purchased Transportation category contains contractual expense for the service providers Pace utilizes in both the city and suburban service areas.

Administration

2013 administration expenditures are projected to total $3.0 million, an increase of 29.7% from 2012. The largest component of this category is facility lease expense, as Pace leases its operations center for ADA Paratransit services in Metra's downtown Chicago headquarters at 547 W. Jackson Blvd. However, the sharp growth in this category for 2013 is being driven by the purchase of software for Pace's Trapeze scheduling system. Growth in this category, which accounts for 2.0% of total expense, is expected to slow to less than 2% in 2014 and 2015, but the compound annual growth rate over the five-year period from 2011 to 2015 is 12.7%.

Exhibit 7-9: **Pace ADA Paratransit Total Expense - $148.8 million**



Fuel

Pace purchases fuel only for the private operators in Pace's suburban service area, who provide ADA Paratransit service using Pace-owned vehicles. After an increase of only 1.9% in 2012, fuel expense is expected to increase by 10.0% in 2013 to $2.8 million. The assumed price for diesel in 2013 is $3.43 per gallon, up from $3.23 per gallon in 2012. Fuel expenditures represent 1.9% of total ADA Paratransit expenses and are expected to reach $3.3 million by the end of the planning period after growing by 6.9% and 8.2% in 2014 and 2015, respectively. The resulting compound annual growth rate over the five-year period from 2011 to 2015 is 6.7%.

Liability Insurance

Due to a favorable outlook for insurance costs, liability insurance expenditures are projected to decrease by 5.2% to $276,000 in 2013, accounting for 0.2% of regional ADA Paratransit service operating expenditures. This category is then expected to increase by 4.7% and 4.8% in 2014 and 2015, respectively.

RTA Certification Trips

RTA certification trip expenditures comprise the cost of transporting ADA Paratransit applicants to and from the RTA's assessment centers. 2013 certification trip expenditures of $1.3 million are projected to account for 0.9% of total operating expenditures. RTA certification expenditures are then projected to increase by 5.1% and 4.9% in 2014 and 2015, respectively, commensurate with projected ridership growth. The resulting compound annual growth rate over the five-year period from 2011 to 2015 is 7.1%.

Purchased Transportation

Representing more than 90% of total operating expenditures, the Purchased Transportation category contains contractual expense for the service providers Pace utilizes in both the city and suburban service areas. These expenditures are projected to increase by 8.2% to $134.3 million in 2013, and continue to increase by 7.9% and 8.1% in 2014 and 2015, respectively, driven by both ridership and contractor price increases of approximately 3% per year. The resulting compound annual growth rate of this predominant expense category over the five-year period from 2011 to 2015 is 7.9%.

Regional ADA Paratransit Support Allocation

Pace allocates cost to account for the work done by its departments in support of ADA Paratransit activities. These departments include Audit, Budget Planning, Finance, General Counsel, Government Affairs, Human Resources, Marketing, Communications, Purchasing, and Risk Management. For 2013, the Regional ADA Paratransit support allocation is $3.9 million, a decrease of 1.1% from 2012. The allocation represents 2.7% of total operating expenses. In 2014 and 2015, the allocation is expected to increase by 2.6% and 2.9%, respectively.

NET RESULTS

Net result equals total revenues (both operating revenue and public funding) minus total operating expenses. Revenues and expenses in the 2013 regional ADA Paratransit budget are balanced, producing a net result of zero. A net result of zero is also reflected in the 2014 and 2015 planning years, although Pace has shown budget balancing actions in both of those years, indicating that projected RTA funding levels may be insufficient.

RECOVERY RATIO

The recovery ratio equals total operating revenue, with statutory and approved adjustments, divided by total operating expenditures, with statutory and approved adjustments. For ADA Paratransit, the approved adjustment excludes from expenses a portion of costs incurred in paying ADA Paratransit contractors for their capital expenses (Capital Cost of Contracting). The RTA Act requires regional ADA Paratransit service to meet a recovery ratio of 10%, and the 2013 Regional ADA Paratransit budget meets this statutory requirement.

Statutory Compliance

Pace's 2013 budget, 2013 recovery ratio, and 2014-2015 financial plans for regional ADA Paratransit comply with the operations funding marks set by the RTA Board on October 10, 2012. These marks include sales tax, Public Transportation Fund, and additional funding from the State of Illinois. The marks set the total level of RTA funding for ADA Paratransit at $136.3 million in 2013, $146.9 million in 2014, and $158.6 million in 2015. Meeting the marks in 2014 and 2015 requires budget balancing actions of $3.8 million and $8.4 million respectively, which may include, but are not limited to, implementing further efficiencies, reducing operating costs, and identifying additional funds or revenues.

The RTA Act requires each Service Board's budget to meet the seven criteria detailed in the Introduction chapter, prior to approval by the RTA Board. The Pace Regional ADA Paratransit budget, as submitted, substantially meets each of these criteria.

2012 Budget versus 2012 Estimate

Unlike fixed-route transit services, additional ridership directly drives additional expense for ADA Paratransit due to the individualized nature of service provided. Pace's original 2012 ADA Paratransit budget assumed 5% ridership growth over 2011. After experiencing ridership growth of 8% in the first quarter of the year, Pace submitted a revised 2012 budget to the RTA in July which increased operating expenses by $10.9 million, but kept operating revenue unchanged. The RTA Board responded by approving additional funding of the same amount, as required by the 2011 legislation. The Pace and RTA Boards both eventually adopted the revised ADA Paratransit budget, set forth as the 2012 Amended Budget in Exhibit 7-10.

OPERATING REVENUE

Pace expects that 2012 regional ADA Paratransit service operating revenue will finish level with the amended budget. However, passenger revenue is projected to exceed that budget by $273,000 due to increased ridership, but is expected to be offset by an unfavorable variance in Other revenue of the same amount. The primary component of the Other revenue category is Medicaid reimbursements, which have historically been difficult to forecast.

PUBLIC FUNDING

Total funding for 2012 is expected to be at the level of the amended budget, comprising the originally budgeted $115 million of Sales Tax II / PTF II, and the additional $10.9 million approved by the RTA Board in August. $8.5 million of this additional funding was provided by the State of Illinois, while the remaining $2.4 million was appropriated from the RTA fund balance.

EXPENDITURES

Total expenditures for 2012 are expected to finish level with the amended budget, with favorable variances in fuel, liability insurance, RTA certification trip expense, and purchased transportation expense exactly offset by unfavorable variances in health insurance and administrative expense.

With revenues, public funding, and expenses all expected to finish 2012 level with the amended budget, Pace ADA Paratransit is projected to have a net result of zero. ADA Paratransit is also projected to meet the statutorily required recovery ratio of 10%, after applying $21.8 million of approved expense exclusions.

Exhibit 7-10: **Pace Regional ADA Paratransit Service 2012 Budget vs. 2012 Estimate** (dollars in thousands)

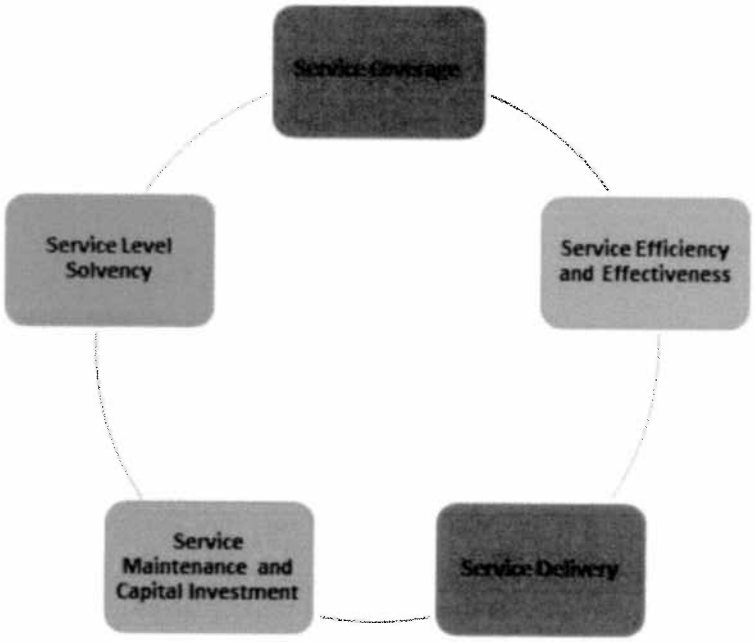
8 Performance Measures



Goals and Performance Measures

Background

In February 2007, the Regional Transportation Authority released its five-year strategic plan entitled *Moving Beyond Congestion (MBC)*. This joint planning process between the RTA and the three Service Boards achieved several important milestones, including the establishment of a shared vision and goals for the region, a detailed analysis of the current status of the transit network, and a long-term evaluation and assessment of the infrastructure and operational needs of the RTA system.

In January 2008, the Illinois General Assembly enacted significant amendments to the RTA Act, which mandated an ongoing strategic planning process, the establishment of goals, and measurement of performance. In response to the new legislation, the RTA joined in partnership with each of the Service Boards to enact a resolution in February 2009 that enhanced the goals and objectives of the MBC Strategic Plan to satisfy the requirements of the amended RTA Act.

Vision

The RTA, CTA, Metra, and Pace share a common vision for the region: That the RTA system is a world-class public transportation system that is affordable, reliable, and safe, and is the keystone of the region's growing business opportunities, thriving job market, clean air, and livable communities.

Goals and Objectives

The table on next page identifies the current regional goals and objectives. The Goals explain what the RTA Region needs to accomplish in order to realize its vision and the Objectives identify how the RTA region will meet its goals.

The executive director and staff of the RTA are committed to working with the Service Boards, their staffs, and state and local elected officials in order to achieve the objectives in the Plan, promote investment in the region's transit system, and ensure that the system operates efficiently and in a coordinated fashion throughout the region.

The RTA also developed an update to the Strategic Plan for the years 2012 - 2016 entitled *The Way Forward*. It was released in 2012 and is a continuation of the vision and goals identified in the Moving Beyond Congestion plan. It outlines an implementation framework of strategic priorities that focus on our customers and their needs as the region also deals with difficult financial constraints.

To achieve the objectives of the Strategic Plan and as part of the RTA's oversight function to support the evaluation and management of the region's public transit system, the RTA has identified five major areas for performance analysis: Service Coverage, Service Efficiency and Effectiveness, Service Delivery, Service Maintenance and Capital Investment, and Service Level Solvency. Each major area has several corresponding performance measures.

- **Service Coverage** - monitors both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.

- **Service Efficiency and Effectiveness** - evaluates the level of resources spent on service delivery in relation to the level of service and the extent to which passengers are using that service.

- **Service Delivery** - reflects the quality of the service delivered.

- **Service Maintenance and Capital Investment** - indicates the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

- **Service Level Solvency** - assesses financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

RTA Regional Goals and Objectives

MBC Goal	Objectives
Provide Transportation Options and Mobility Provide attractive, high-quality, innovative transit choices that link people to jobs and facilitate the use of transit for other trips. Transit use in our region is the broadest measure of the success of the transit system.	• Increase the use of public transportation for commuting • Increase the use of public transportation for other purposes • Increase the amount of transit service provided and serve more of the region's travel markets using innovative approaches, as appropriate • Take advantage of highway pricing strategies and promote preferential treatment of transit • Provide quality transit service that is fast, clean, safe, and reliable • Provide affordable transit service • Increase the ease of connection between different transit providers by coordinating service, fares, information, and physical connections • Ensure appropriate consideration of regional equity principles
Ensure Financial Viability The sustained financial viability of public transportation is essential to the region's effective multi-modal transportation system. The transit agencies need to manage operating costs, make sound investment decisions and implement the capital program in a timely manner.	• Manage the growth of operating costs • Select investments which maximize returns to the region • Progress towards achieving a State of Good Repair while making appropriate investments to enhance and expand the transit system • Implement the capital program in a timely manner • Ensure a fair allocation of passenger revenue from interagency trips across service providers • Where appropriate, engage in joint efforts with private interests that contribute resources and add value to the transit system
Enhance Livability and Economic Vitality An effective transit system makes many contributions to an economically vibrant and livable region. Though transit's role is secondary, not primary, in achieving this goal.	• Mitigate the growth in highway congestion • Improve our environment by reducing total transportation emissions and energy consumption • Coordinate transit with development to encourage concentrated growth near transit services • Provide mobility for aging populations and people with disabilities • Provide employers with access to a broader workforce
Demonstrate Value In order to fulfill its valuable role in our region, transit requires the support of key constituencies and the public at large.	• Realize additional operations support through legislative action • Achieve adequate capital funding to move the system towards a State of Good Repair and undertake selective expansions • Manage transit operations so that they are cost and service effective • Create and sustain public understanding of the benefits of public transportation

Regional and Sub-Regional Performance Measures

In 2009 the RTA began reporting performance at a region-wide level by aggregating data from each of the Service Boards -- CTA, Metra, and Pace -- to arrive at an assessment of regional performance. In 2010, the RTA continued reporting at a regional level and introduced a new sub-regional performance report that analyzes performance at the Service Board and mode level. For both the regional and sub-regional reports, performance is analyzed over a five-year period using data from the Federal Transit Administration's National Transit Database (NTD), RTA financial reports, and operating reports from the three Service Boards. The sub-regional report provides a more detailed level of analysis that helps interpret trends observed at the regional level and provides a means of assessing areas of strength and weakness in the delivery of specific services. Regional and sub-regional performance reports are posted on the RTA website and presented to the RTA Board of Directors. The most recent reports cover the period 2007-2011 using NTD data published in November 2012.

The RTA has also developed a set of companion reports to the regional and sub-regional reports that are based on an analysis of peer groups. At the regional level, the peers selected represent the transit systems that serve the ten largest metropolitan regions in the country. Regional peer reporting began in 2009. At the sub-regional level, the peer analysis is conducted at the mode level with five peers selected for each

mode in the RTA system – urban bus, heavy rail, commuter rail, suburban bus, vanpool, and demand-response/ADA Paratransit. In 2010, the selection of modal peers was completed and work began on the development of the sub-regional peer report, which was completed and first reported to the RTA Board of Directors in Spring 2011.

A full report of the performance measures at the regional and sub-regional levels can be found on the RTA website at http://rtachicago.com/initiatives/performance-measures.html (these reports cover the period of 2007 to 2011 and are based on NTD data.) The following sections contain highlights from these reports, as well as projected results for 2012 and 2013 based on the assumptions used to develop the Service Boards' 2013 operating budget.

In 2010, the RTA began to develop a set of strategic measures. The purpose of the strategic level measures is to focus on broader societal outcomes in the economy, environment, and social/political community to assess how transit is positively impacting the quality of life for residents of the region. The measures involve factors that are out of the direct control of the RTA and Service Boards because of their broader scope, but are ones for which public transportation plays a significant contributing role. The strategic measures also become a way to link RTA goals with those of other regional stakeholders including planning organizations, transportation departments, and units of state and local government. The strategic measures will be used to monitor progress in the goals and objectives outlined in the *Moving Beyond Congestion* strategic plan. The RTA Board adopted a set of strategic measures in January 2012 and the first strategic performance measures report was released in late 2012. It can be found on the RTA website at: http://rtachicago.com/initiatives/performance-measures.html

SERVICE COVERAGE

These performance measures monitor both how much service is available to people in the region (in terms of population and square miles) and how much of that service capacity is used.

Vehicle Revenue Miles

Vehicle Revenue Miles represent the amount of service provided as measured in miles traveled by vehicles while in revenue service. At the regional level, system-wide vehicle revenue miles are anticipated to increase 3.4% in 2013 to 240.9 million miles (Exhibit 8-1). While Metra projects no change to vehicle revenue miles in 2013, CTA projects an increase of 3.3%, Pace Suburban Service projects an increase of 4.0%, and Pace ADA Paratransit projects an increase of 7.4% over 2012 (Exhibit 8-2).

Exhibit 8-1: **System-wide Vehicle Revenue Miles** (millions)

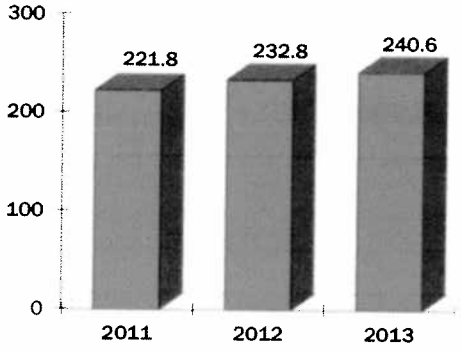


Exhibit 8-2: **Service Boards Vehicle Revenue Miles** (millions)

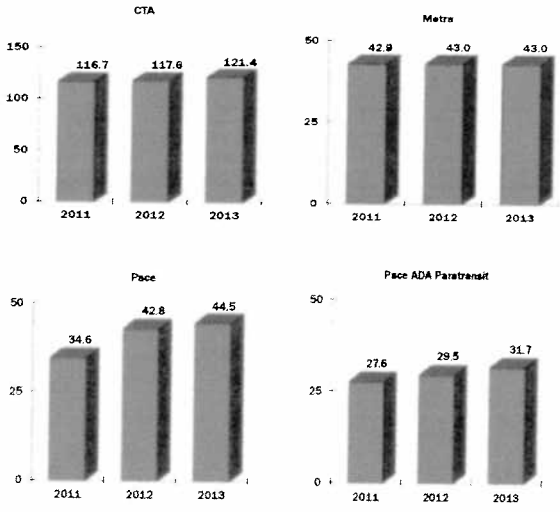

Unlinked Passenger Trips

Unlinked Passenger Trips, or Ridership, reflects the number of times passengers board buses and trains, including transfers from one bus or train to another, in order to complete their trips. As shown in Exhibit 8-3, system-wide ridership is projected to decrease 1.7% in 2013 following fare adjustments at CTA, which estimated ridership losses of 2.4% for the year. Metra projects a 0.2% increase for 2013 as ridership improves slightly following the 2012 fare increase. Pace Suburban Service projects continued growth of 3.9% for 2013, while Pace ADA Paratransit trips are projected to continue their recent trend of strong growth and increase by 5.9% in 2013.

Exhibit 8-3: **System-wide Unlinked Passenger Trips** (millions)

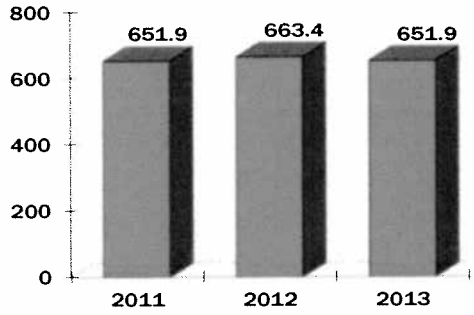

Exhibit 8-4: **Service Boards Unlinked Passenger Trips** (millions)

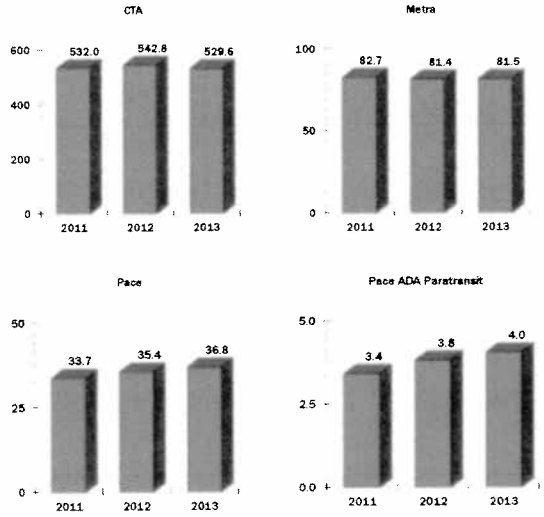

SERVICE EFFICIENCY AND EFFECTIVENESS

These performance measures evaluate the level of resources spent on delivering services as well as the extent to which passengers are using public transit.

Operating Cost per Passenger Trip

Operating Cost per Passenger Trip illustrates both the cost of providing a trip and also the gap between the established fare and the cost of providing an individual trip. The projected performance figures provided in Exhibits 8-5 and 8-6 indicate that the system-wide cost of providing one unlinked passenger trip is expected to increase 26 cents or 8.0% between 2012 and 2013, as a result of increased operating expenses and decreased ridership resulting from CTA fare adjustments in early 2013. Metra projects a 4.0% increase in its operating cost per trip, with the

Exhibit 8-5: **System-wide Operating Cost per Unlinked Passenger Trip**

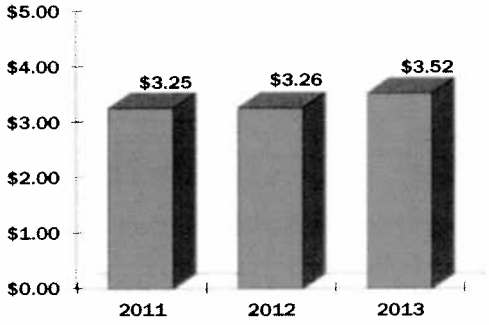

Exhibit 8-6: **Service Boards Operating Cost per Unlinked Passenger Trip**

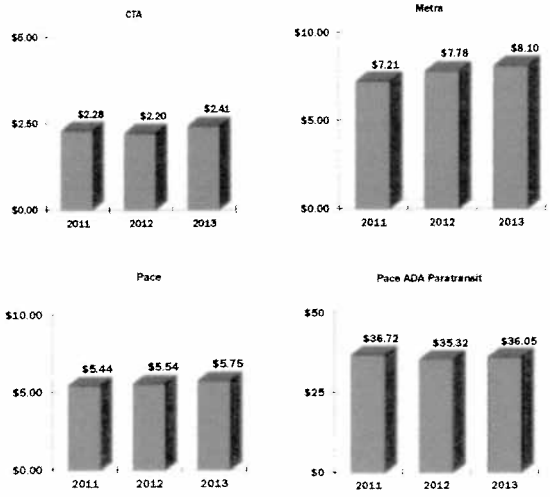

increase resulting from rising costs while ridership remains relatively flat. Pace ADA Paratransit has budgeted the lowest operating cost per passenger trip increase for 2013 at 2.1%, largely due to a projected 5.9% gain in passenger trips that would mostly offset a projected 7.8% increase in operating cost.

Operating Cost per Vehicle Revenue Mile

Operating Cost per Vehicle Revenue Mile is total operating costs divided by the cumulative sum of the miles traveled by transit vehicles while in revenue service. Projected values for this performance measure are shown in Exhibits 8-7 and 8-8. At the regional level, the cost to operate a transit vehicle one mile is expected to be $9.53 in 2013, a 2.7% increase from 2012. CTA is projecting a 3.2% increase for this measure, as its operating cost increases outpace its service level increases. Metra projects a 4.2% increase for this measure, with the increased tied to its 4.2% increase in operating cost and stable service levels. Pace Suburban Service expects to see a 3.7% increase in cost per mile resulting from a 4.0% increase in vehicle revenue miles and a 7.8% increase in operating cost. Pace ADA Paratransit projected a 2013 increase of 0.7% for this measure, to $4.60 per mile, resulting from projected service demand increases as costs continue to be kept under tight control through productivity initiatives.

Exhibit 8-7: **System-wide Operating Cost per Vehicle Revenue Mile**

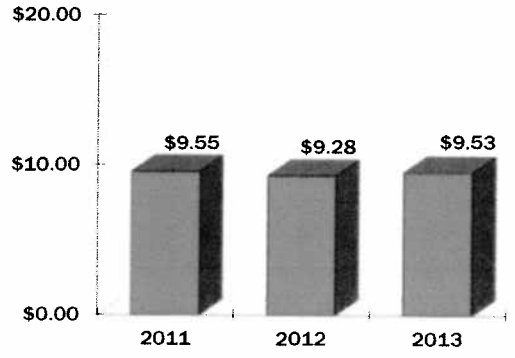

Exhibit 8-8: **Service Boards Operating Cost per Vehicle Revenue Mile**

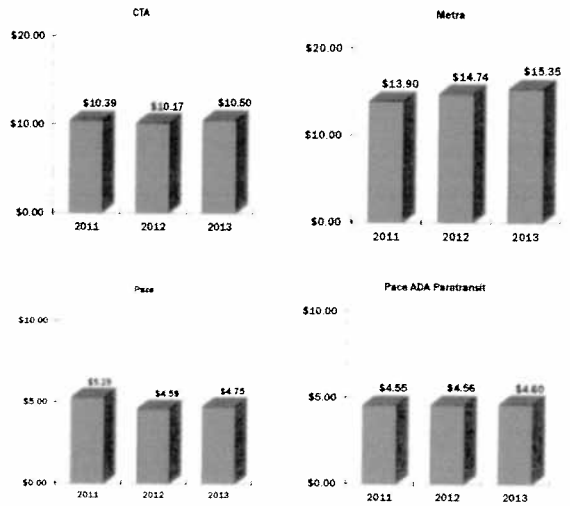

SERVICE DELIVERY

This objective reflects the quality of the service delivered and focuses on customer service and safety.

On-Time Performance

Each Service Board defines on-time performance differently but it is generally understood to represent the percentage of times a transit vehicle departs from and/or arrives at a location within a certain number of minutes before or after the scheduled time. The data presented here reflect actual past performance, rather than projections. As shown in Exhibit 8-9, overall on-time performance has decreased by 1% in each of the last two years. Exhibit 8-10 shows on-time performance for the Service Boards; CTA bus and rail have maintained consistent performance, as has Pace ADA Paratransit. Metra saw a slight decline in 2011 related to methodological changes in the calculation of on-time performance to better represent this metric from the passenger's perspective. Pace Suburban Service has seen significant improvement from 79% in 2009 to 83% in 2011, aided by schedule adherence management programs and the implementation of more limited-stop bus routes.

Exhibit 8-9: **System-wide On-Time Performance**

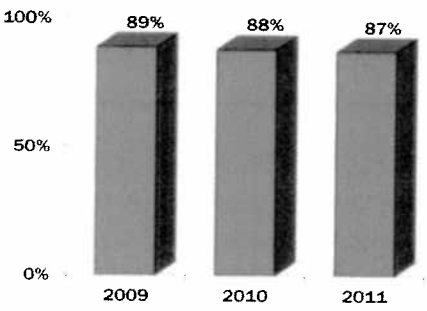

Exhibit 8-10: **Service Boards On-Time Performance**

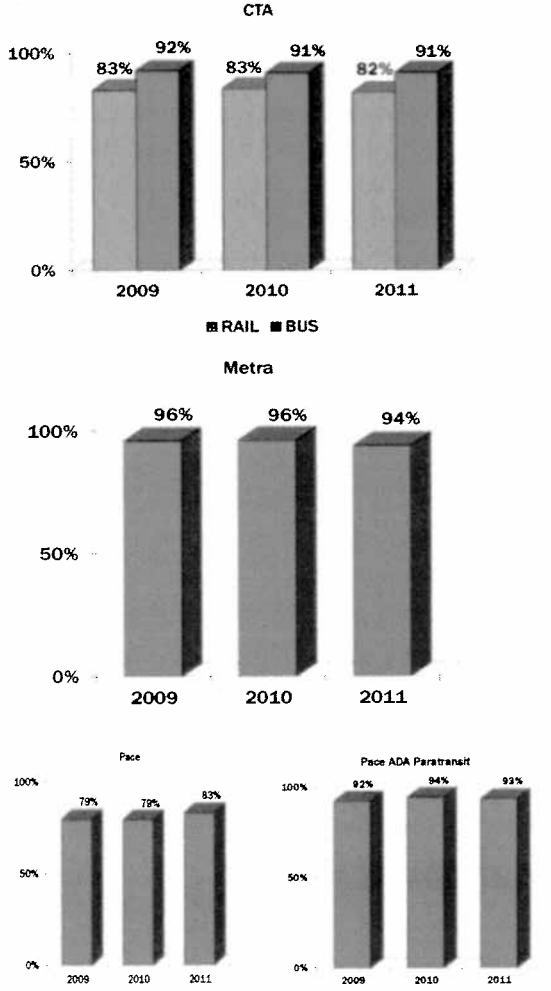

Exhibit 8-11: **System-wide Reportable Safety and Security Incidents per 100,000 Passenger Trips**

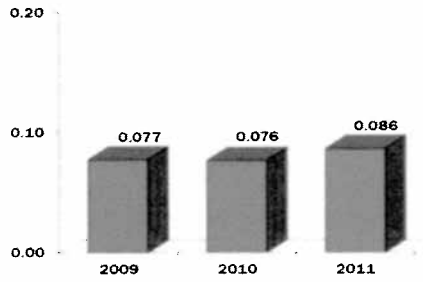

Exhibit 8-12: **Service Boards Reportable Safety and Security Incidents per 100,000 Passenger Trips**

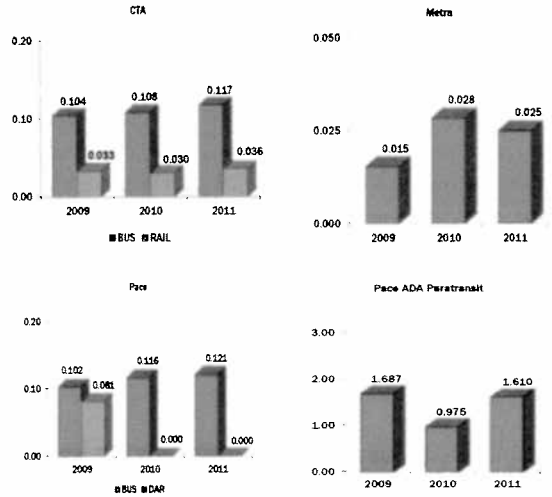

Reportable Safety and Security Incidents per 100,000 Passenger Trips

This performance measure demonstrates the rate of reportable safety and security incidents per 100,000 unlinked passenger trips. Reportable incidents are safety and security incidents that affect revenue service due to: a fatality, an injury requiring immediate medical attention away from the scene, property damage greater than or equal to $25,000, evacuation for life safety reasons, or a mainline derailment. As shown in Exhibit 8-11 for the region overall, the incident rate is very low and declined in 2010, then experienced an uptick in 2011. In 2011, the region had 78, or 16.4%, more reportable incidents compared to 2010: CTA bus reported 33 more incidents, CTA rail 16 more, Pace bus 3 more, and ADA Paratransit service had 28 more. Metra reported 2 fewer incidents in 2011 (Exhibit 8-12).

Exhibit 8-13: **System-wide Customer Satisfaction Ratings**

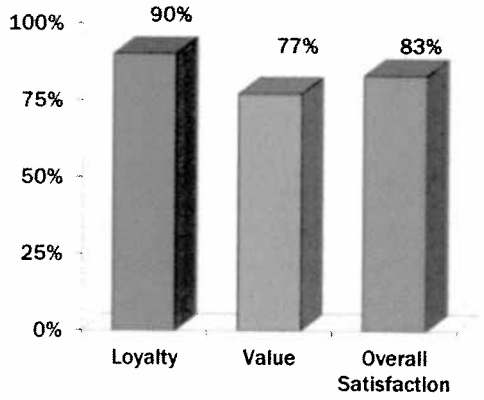

Exhibit 8-14: **Service Board Customer Satisfaction Ratings**

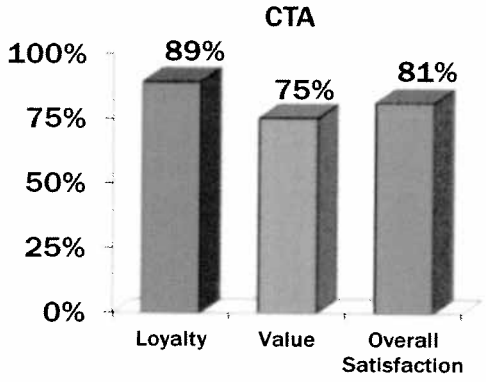

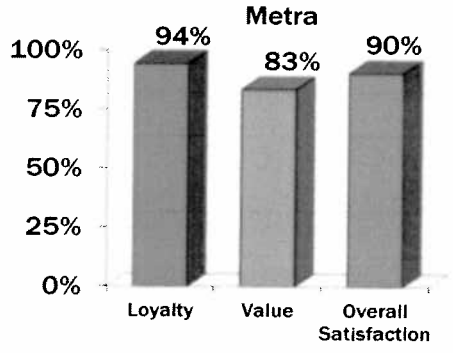

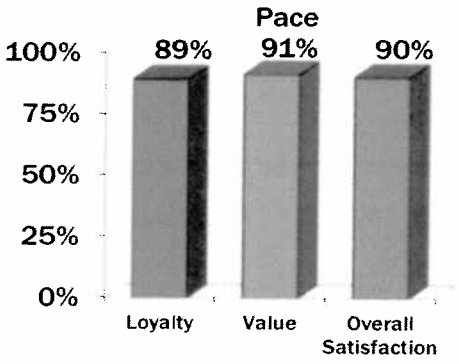

Customer Satisfaction Ratings

For the first time, RTA performance measures include results from a region-wide customer satisfaction survey conducted in late 2011. As shown in Exhibit 8-13, 77% of respondents indicated they were satisfied or very satisfied with the value of service received for the fare paid; 83% of customers gave overall transit service satisfactory or very satisfactory marks; and 90% of customers indicated they would recommend regional transit service to others, an indicator of customer loyalty. Customer satisfaction surveys are scheduled to be repeated on two-year cycles.

SERVICE MAINTENANCE AND CAPITAL INVESTMENT

The measures associated with this objective demonstrate the allocation of capital funds and the replacement and maintenance of infrastructure components on a schedule consistent with their life expectancy.

Miles Between Major Mechanical Failures

This measure is the average distance that vehicles travel in revenue service uninterrupted by mechanical failures that prevent them from completing a scheduled trip or from starting the next scheduled trip. At the regional level, miles between failures have shown steady improvement through 2010 followed by a slight downtick in 2011 (Exhibit 8-15). As shown in Exhibit 8-16, CTA bus leads this indicator with a 10% increase since 2009; compared to 2007, CTA bus has improved 62% as a result of its bus replacement program. CTA rail's mileage between major mechanical failures has declined 27% since 2009 as its average fleet age has

Exhibit 8-15: **System-wide Miles Between Major Mechanical Failures** (thousands)

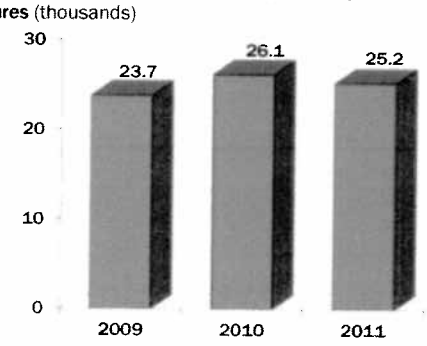

Exhibit 8-16: **Service Boards Miles Between Major Mechanical Failures** (thousands)

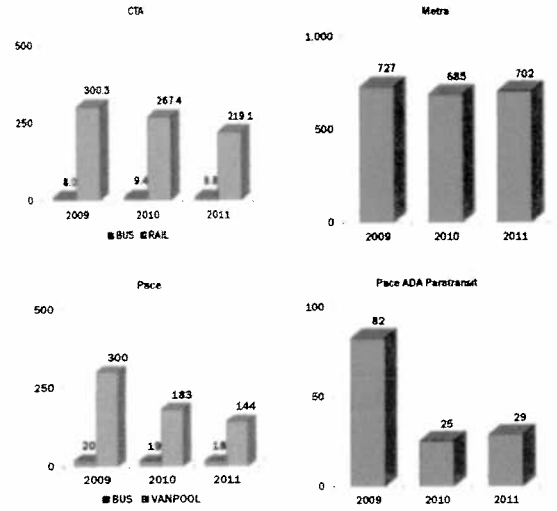

continued to rise. Likewise, Metra's performance has declined from its high in 2006 as a result of the aging of the fleet although it did experience a 2.5% improvement in 2011. Pace Suburban Service also experienced declining performance for this measure since 2009 for bus (-10.0%) and vanpool (-52.0%). Pace ADA Paratransit experienced a sharp decline in 2010, but showed a 13.9% improvement for this measure in 2011.

Percent of Vehicles Beyond Useful Life

This measure shows the percentage of vehicles in the total active vehicle fleet beyond their minimum useful life, as defined by the Federal Transit Administration (FTA). The FTA defines useful life as 4 years for automobiles or vans, 12 years for buses, and 25 years for rail cars. Due to limited capital funding, vehicles usually exceed their useful life before actually being retired. After a steady decline through 2008 in the percentage of vehicles beyond useful life, there was a slight increase for the region in 2009, from 28% to 29%, followed by a decrease to 26% as CTA retired nearly 300 of its older vehicles in 2010 (Exhibit 8-17). Pace also retired 66 buses in 2010, decreasing the average age of their fleet. Metra has not added vehicles to its fleet since 2005, contributing to its average fleet age of 28.9 years in 2011. Metra undertakes extensive maintenance programs to keep its locomotives and cars in service and operating safely longer than the FTA guidelines (Exhibit 8-18).

Exhibit 8-17: **System-wide Percent of Vehicles Beyond Useful Life**

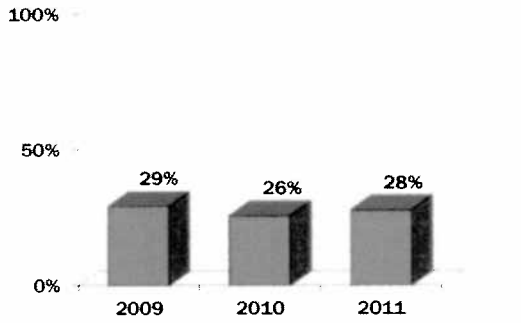

Exhibit 8-18: **Service Boards Percent of Vehicles Beyond Useful Life**

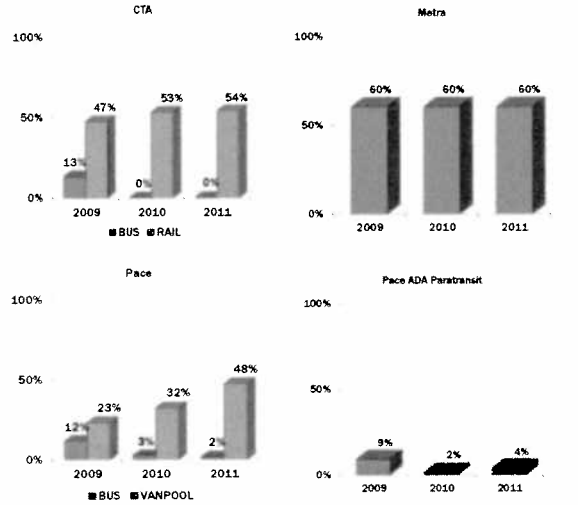

Exhibit 8-19: **System-wide Capital Program Funding** (millions)

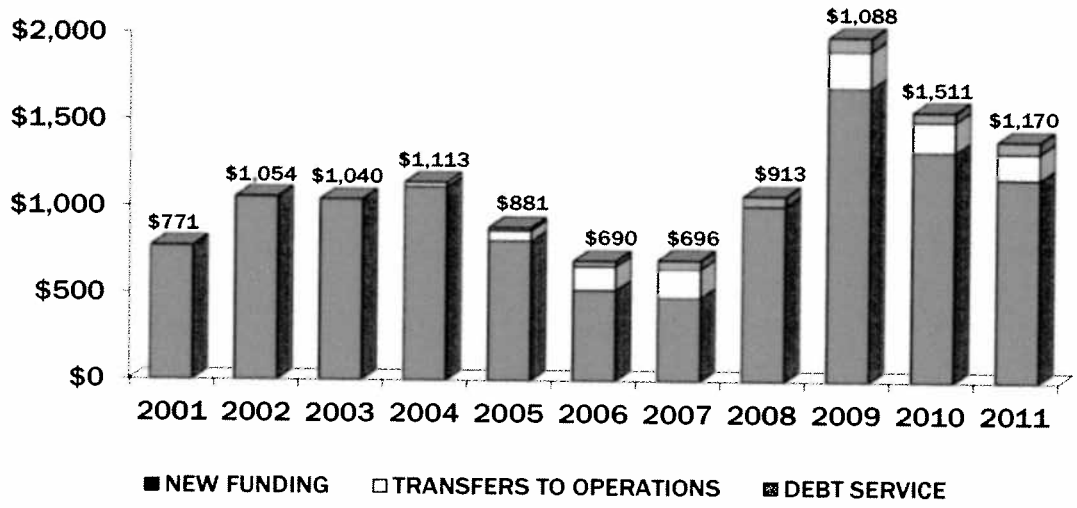

Exhibit 8-20: **Service Boards Capital Program Funding** (millions)

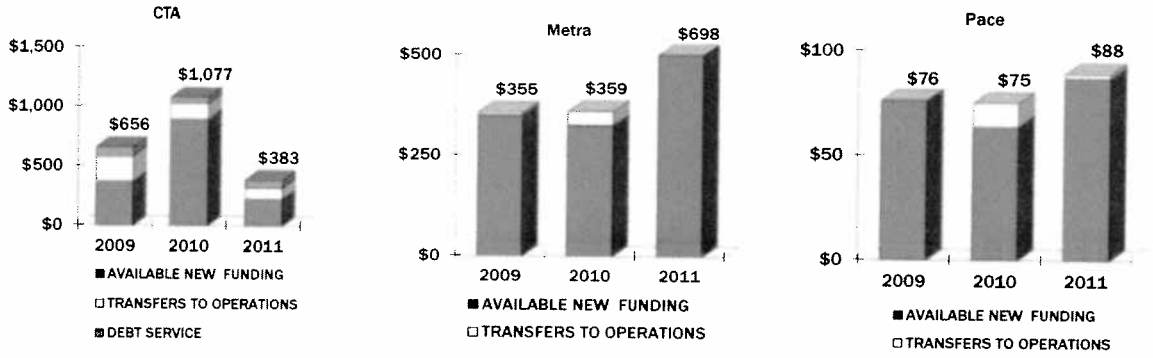

SERVICE LEVEL SOLVENCY

These measures assess financial condition to ensure that there are sufficient resources to meet current and ongoing financial needs (both operating and capital).

Capital Program Funding

This indicator demonstrates the amount of capital funds available to finance maintenance, enhancement, and expansion of the transit system infrastructure. Exhibit 8-19 shows actual data for the new funding available to Service Boards over the past ten years and does not include de-obligated or re-appropriated funds that become available. Funding levels for all three Service Boards benefited from the American Recovery and Reinvestment Act passed in February 2009, followed by two years of declines. CTA's capital program was more volatile, related to its bond financing program, ending 2011 with substantially lower levels compared to 2009. Metra and Pace, however, each trended upward. The unsustainable practice of transferring capital funds to operations was ended after 2011, with each Service Board pledging to discontinue such transfers (Exhibit 8-20).

Fare Revenue per Passenger Trip

Fare Revenue per Passenger Trip is the total fare revenue divided by the total number of passenger trips, providing the average fare that a passenger pays. Exhibit 8-21 indicates that fare revenue per trip is expected to increase by $0.14 in 2013, following an increase of $0.11 in 2012. CTA's fare revenue per trip is budgeted at $1.15, a $0.14 increase over 2012 –due to the fare policy changes implemented in January 2013. Metra projects a $0.15 increase in 2013, an increase of 4% over 2012. Pace has budgeted a decrease of $0.01 in fare revenue per trip in 2013 for its Suburban Service, while ADA Paratransit fare revenue per trip is expected to remain stable at $2.49.

Exhibit 8-21: **System-wide Fare Revenue per Unlinked Passenger Trip**

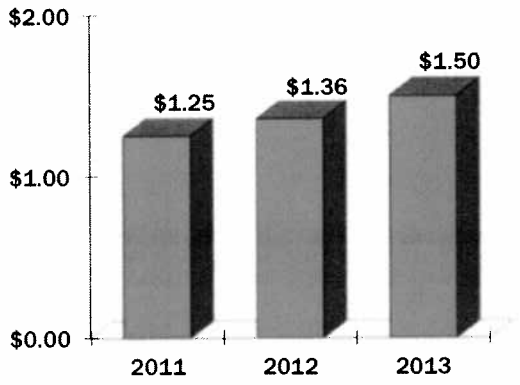

Exhibit 8-22: **Service Board Fare Revenue per Unlinked Passenger Trip**

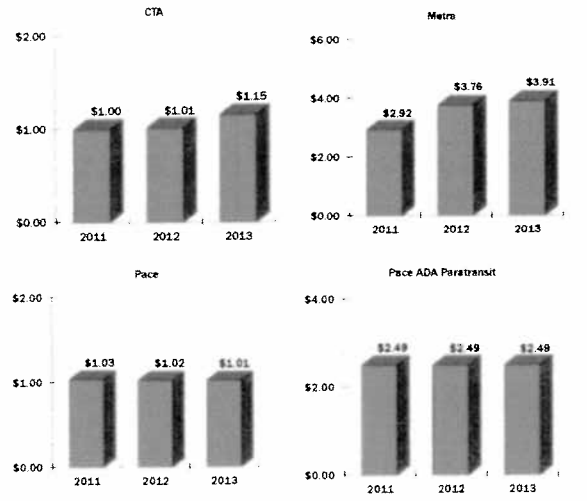

Recovery Ratio

The RTA ACT requires the RTA Board to set a recovery ratio for each Service Board, and also requires the combined RTA operations revenues to cover at least 50% of the system operating cost. The system ratio excludes ADA paratransit service, which is held to a 10% recovery ratio requirement, and allows for certain adjustments. CTA, Metra, and Pace are required to meet or exceed recovery ratios of 52%, 53%, and 30%, respectively, with their proposed 2013 operating budgets (Exhibit 8-24). As shown in their individual sections' budgets, each Service Board met or exceeded these requirements; the RTA regional recovery ratio for 2013 is projected at 56.0% and is in compliance with the RTA Act (Exhibit 8-23).

Exhibit 8-23: **RTA Regional Recovery Ratio**

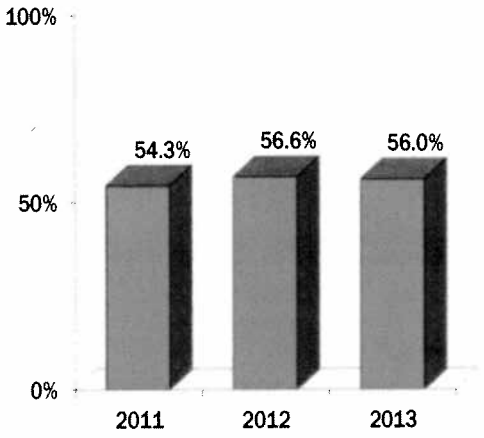

Exhibit 8-24: **Service Board Recovery Ratio**

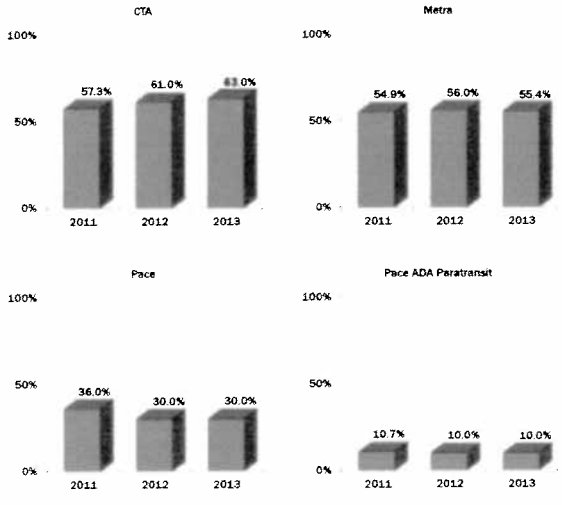


RTA Performance Measures

This section contains performance measures applicable to the functions of the RTA Agency, distinct from the services provided by the operating agencies CTA, Metra, and Pace. The RTA's mission is to ensure financially sound, comprehensive, and coordinated public transportation in the Northeastern Illinois region. In that role, the RTA tracks performance in the following three areas:

- **Funding:** The RTA is responsible for setting the funding levels for the Service Boards for each fiscal year. Funding levels for the fiscal year are based on forecasted sales tax receipts. These forecasts are built based on previous years' receipts and current and projected economic trends. The Service Boards develop their operating budgets based on these funding levels and must operate within the levels set by the RTA Board.

- **Project Management Oversight:** The RTA administers funding for and conducts project management oversight (PMO) of Service Board projects funded through the Illinois Jobs Now! program. Staff monitors projects to determine if they are on time, on budget, and meet plan and grant specifications. In some cases value engineering, the process of evaluating the function of systems, equipment, facilities, procedures, and supplies is provided to determine if cost-saving is achievable.

- **Regional Planning Programs:** The RTA administers funding programs for projects in the region. The agency applies for and receives local and federal funds and then conducts an annual competitive selection process, based on need, to determine the recipients of these funds. RTA funds are also available to support projects. RTA staff provides planning and implementation assistance to the grant recipients. Recipients include the Service Boards and local municipalities in which the Service Boards operate.

In addition to fiscal oversight responsibilities, project management oversight duties, and the funding of regional planning programs, the RTA houses several customer service programs that are critical to promoting and facilitating the use of mass transit in the Chicago region.

- The Information Technology (IT) department actively manages RTA's website content and activity and has seen growth in terms of total website visits, unique visitors to the sites, and page views.

- The RTA's ADA Paratransit Certification Program determines an individual's functional abilities and limitations for using fixed route services. ADA Paratransit is provided for customers whose disability prevents them from using the CTA and/or Pace fixed route services for some or all of their travel. Individuals who are interested in using ADA Paratransit service must apply and be found eligible according to ADA guidelines; demand for such services has increased recently and is expected to continue to increase into the near future.

- The RTA Travel Training Program aims to educate individuals and groups on the use of public transportation to encourage individual mobility and freedom while reducing the burden on regional paratransit services. This program has experienced significant growth, which is a win-win situation for individuals and service providers.

- The Travel Information Center provides Chicagoland residents with all types of customer assistance and information, both on the phone and in person at a walk-in location near CTA headquarters.

- The RTA Transit Benefit Fare Program helps companies and their employees take advantage of tax law changes to reduce commuting costs while supporting clean air and reducing traffic congestion. On January 1, 2013, Congress passed the American Taxpayer Relief Act of 2012, which restored parity between the parking and transit/commuter highway vehicle benefits by reinstating the benefit at $240 per month and retroactively increasing monthly transit benefit limit for 2012 from $125 per month to $240 per month. This benefit subsequently increased to $245 per

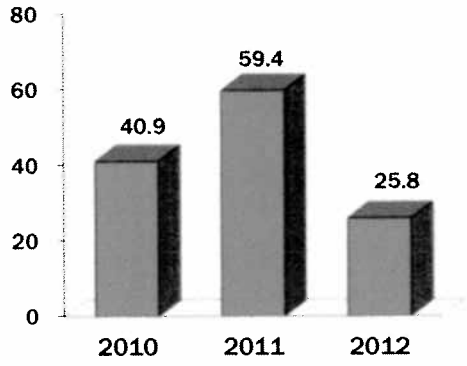
month in 2013. Employers can now provide employees with up to $245 a month ($2,940 a year) for transit or vanpool commuting expenses as tax-free benefits in accordance with the Transportation Equity Act of the 21st Century (TEA-21) and Section 132(f) of the IRS Code. With this program, employers can purchase CTA Transit Cards, Chicago Cards, Metra Monthly, Ten-Ride passes, and/or RTA Fare Checks that the RTA delivers to enrolled companies.

Sales Tax Forecasting

Nearly 40% of total RTA revenue for operations comes from sales tax. The RTA is responsible for forecasting the amount of sales tax funding that will be available to the Service Boards for their operating budgets. Because the Service Boards must operate within their budgets passed by the RTA Board, an accurate forecast of sales tax receipts for the upcoming fiscal year is critical to an effective budget process. However economic volatility in recent years, resulting from the 2008 financial crisis and subsequent recovery, has complicated this effort. It has become harder to accurately predict consumer spending habits and, thereby, sales tax receipts, forcing more conservative forecasting efforts.

Exhibit 8-25 shows the variance of actual sales tax receipts from budgeted levels for 2010 to 2012. The financial downturn in 2008 and 2009 resulted in shortfalls in projected funding, which led to conservative sales tax forecasts for 2010 and 2011. Conservative estimates resulted in positive variances at year end when sales tax receipts came in higher than was forecasted. Economic recovery was still modest in 2011 when the funding levels were set for the 2012 fiscal year and, as a result, forecasts were again conservative. In 2012, sales tax receipts will come in higher than was forecasted by $25.8 million, a significant but smaller surplus than in 2010 and 2011. In 2013, the RTA has forecasted more moderately in order to minimize the amount of surplus at year end.

Exhibit 8-25: **Variance of Actual Sales Tax from Budget**
(dollars in millions)



Project Management Oversight

The RTA is responsible under the RTA Act to ensure that the Service Boards manage capital funds and capital development projects effectively and efficiently. The RTA PMO program works with the Service Boards to ensure transit projects in the region are successfully implemented according to scope, schedule, budget, and established best practices.

The scope of work performed through the PMO program is broad due to the varied nature of Service Board projects; however, typical activities include:

- Conducting periodic PMO reviews
- Performing field inspections and site visits
- Documentation verification and validation
- Identifying current and future project issues
- Technical evaluations of project designs
- Verification of compliance with grant agreements
- Conducting value engineering reviews
- Submittal of periodic reports

In 2012, the RTA began issuing a biannual PMO report to the RTA Board of all Illinois Jobs Now! State-funded capital projects. This report acts as a snapshot in time of Service Board construction, maintenance, and procurement for these projects. Exhibits 8-26 and 8-27 highlight the number of projects on schedule and on budget during the two most recent periods of review, May and November 2012.

Exhibit 8-26: **State-funded Projects Budget Performance**

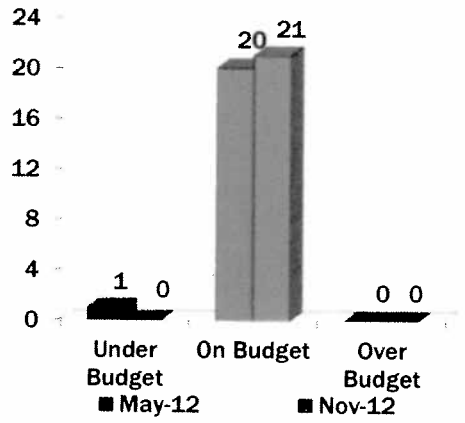


Exhibit 8-27: **State-funded Projects Schedule Performance**

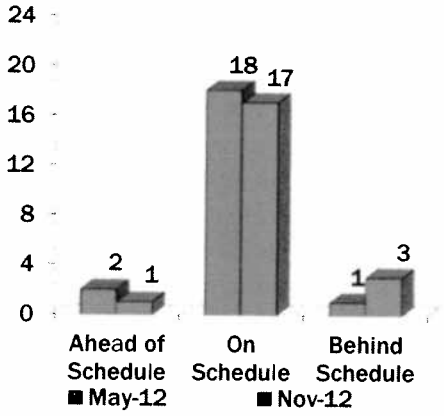

RTA Funding Programs

The Funding Programs administered by the RTA provide value to the region by offering planning, plan implementation, operating, and capital grants for a variety of projects. The programs are consistent with the RTA's legislative mandates and Strategic Plan and are coordinated with the annual budget process. The Community Planning program provides funding for planning and implementation studies and initiatives. The Innovation, Coordination, and Enhancement (ICE) and Job Access Reverse Commute New Freedom (JARC/NF) programs provide funding for transit operating and capital projects. The RTA is the designated recipient for JARC/NF in Northeastern Illinois under SAFETEA-LU. While SAFETEA-LU has expired and MAP-21 is in effect, the RTA maintains responsibility for ongoing JARC/NF projects. The RTA Funding Programs provide a unique opportunity for the RTA and its Service Boards to coordinate at the local level to not only create plans or implement projects, but to facilitate intergovernmental cooperation and relationship building. Since 1998, the RTA has leveraged its own funds with federal, state, and local funds to program 209 projects.

Exhibit 8-28 illustrates the number of projects programmed for 2011 through 2013. Significantly more ICE funding was available in 2012 which led to an increase in programming for the year (Exhibit 8-29). Fluctuations in available funding from year to year affect the number of projects programmed in a given year. In addition to these measures, qualitative measures of value added are currently collected through stakeholder interviews.

Exhibit 8-28: **Projects Programmed by Year**

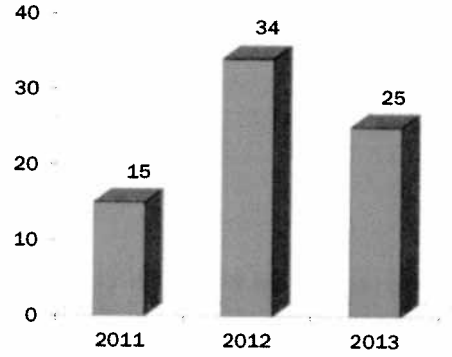

Exhibit 8-29: **Funding by Source** (dollars in millions)

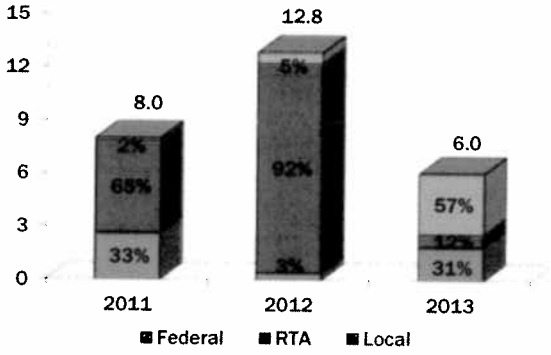

Information Technology

The RTA website experienced 1.7 million page views in 2011 and 1.4 million page views in 2012 with an average of 500 thousand unique visitors each year. In 2012, unique visitors accounted for 61% of total website visits (Exhibit 8-30). In addition to the general website, IT manages the goroo trip planning site which provides users with schedule, fare, and other pertinent information for CTA, Metra, and Pace and even offers driving and biking directions. The goroo site experienced 13 million page views in 2011 and in 2012, with 1.3 million unique visitors per year. Unique visitors made up slightly less than half of all goroo site visits in 2012 (Exhibit 8-31). Visits to the Regional Transportation Authority Mapping and Statistics (RTAMS) site, a data warehouse for planning and financial information on the regional transit system, grew from 106 thousand page views in 2011 to 107 thousand page views in 2012. RTAMS had 11.5 thousand unique visitors in 2011 and 15 thousand unique visitors in 2012, 67% of all visits to the site (Exhibit 8-32).

Exhibit 8-30: **RTA Website Visits** (in thousands)

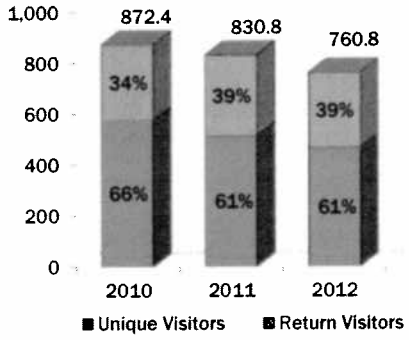

Exhibit 8-31: **goroo Website Visits** (in millions)

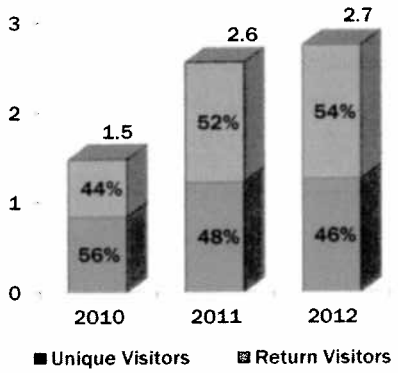

Exhibit 8-32: **RTAMS Website Visits** (in thousands)

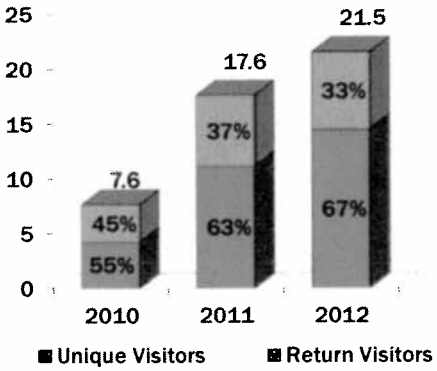
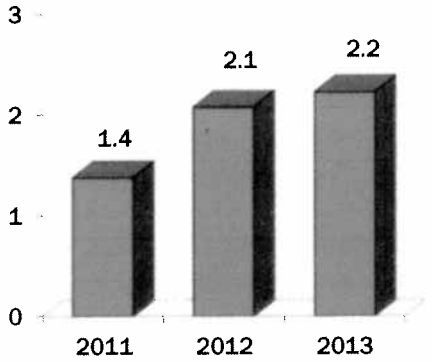


RTA Travel Training Program

The RTA offers travel training to individuals with disabilities and older adults who want to learn how to use fixed route or commuter rail services. Once travel training is requested, a Travel Trainer works with an individual one-on-one to develop a training plan tailored to the individual's unique travel needs. Trainers can practice specific trips, practice maneuvering on buses or trains with a wheelchair or other mobility device, or simply provide an orientation to the accessibility features offered on buses and trains. Group transit orientation presentations are also available. Travel Training requests are estimated at 2.1 thousand in 2012 and are projected to grow 7% to 2.2 thousand in 2013 (Exhibit 8-33).

Exhibit 8-33: **RTA Travel Training Program: Total Individuals Served** (in thousands)

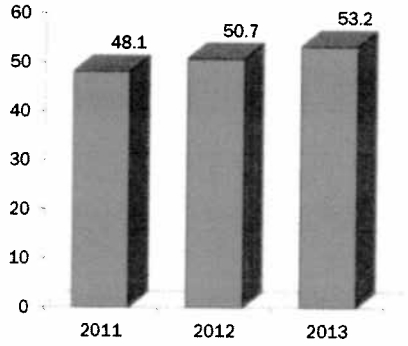


ADA Paratransit Certification Program

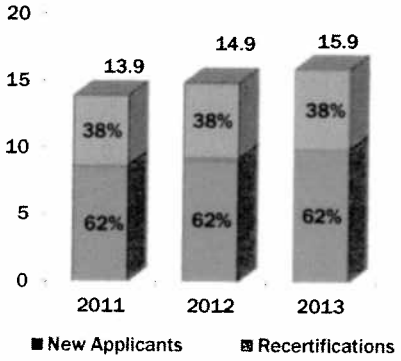
ADA Paratransit is a shared ride, advanced reservation, origin-to-destination service for persons with disabilities who are unable to use the regular fixed-route bus and rail service for some or all of their trips because of their disability. Individuals who are interested in using ADA Paratransit service must apply and be found eligible according to ADA guidelines. The RTA is responsible for determining eligibility for the six-county region. The process begins by contacting the RTA to request an application and learn about the program. Applicants are scheduled for an in-person interview and, in some cases, undergo additional functional testing to assess their individual ability to use fixed route service. Recertification occurs every 4 years.

In 2013, the number of eligible riders is expected to grow by 5%, consistent with growth in 2011 and 2012 (Exhibit 8-34). Applications for ADA Paratransit are projected to increase by 7%, consistent with the growth experienced in 2012 and slower than growth experienced in 2011 (Exhibit 8-35).

Exhbit 8-34: **ADA Paratransit Eligible Riders** (in thousands)



Exhbit 8-35: **ADA Paratransit Certification Applications** (in thousands)



RTA Transit Benefit Fare Program

The RTA Transit Benefit Fare Program helps employees and employers save money on transit. IRS Section 132(f) allows for employees to have up to $245 a month deducted pre-tax to pay for transit or vanpool commuting expenses. Fare media options include the Chicago Card monthly pass, CTA transit cards, FareChecks, Metra monthly passes, Metra 10-ride passes, and Metra Add-on passes that link up to Pace Bus. While the number of units sold of the CTA monthly, CTA transit cards, and all Metra fare media options increased in 2012, overall sales decreased due to a reduction in the number of FareChecks sold. This decrease in units sold can be attributable to some companies switching to third-party administrators (TPAs) of the Transit Benefit Program that issue debit cards. Sales through TPAs are not represented in the data in Exhibits 8-36 and 8-37.

Exhibit 8-36: Transit Benefit Fare Media Units Sold (in thousands)

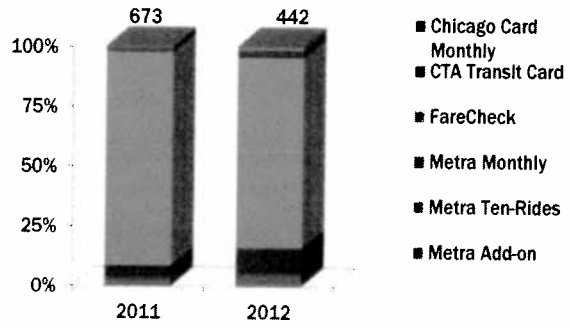


Exhibit 8-37: **Value of Transit Benefit Fare Media Sold** (in millions)

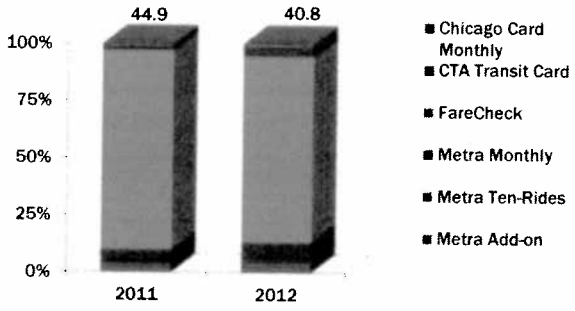


It is important to note that while total number of units sold decreased by 231 thousand or 34% in 2012, the total fare value of units sold decreased at a lower rate of 9%. This is because the average fare value or dollar amount of each unit sold increased for all fare

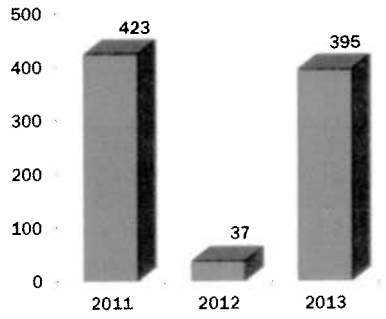
media options, except the CTA monthly pass. The average fare value per unit sold increased by the largest margin for the FareCheck and Metra Monthly media options, which increased from $65.12 to $94.40 and from $112.11 to $143.88, respectively. This is likely attributable to Metra's fare increase in 2012. Sales projections for 2013 are not yet available.

The RTA recognizes that customers are looking for electronic payment options such as debit cards and has undertaken an initiative to begin offering debit cards as part of the Transit Benefit Fare Program. In the third-quarter of 2013, the RTA will begin issuing debit cards that can be loaded with pre-tax funds that employees will only be able to use for purchasing transit fares. Offering debit cards will allow employees to enjoy greater flexibility in their transit options, as these funds can be used at any transit agency that accepts MasterCard. Employers will also see benefits to the administration of the program, as they will no longer need to distribute fare media directly to their employees.

RTA Customer Service Programs

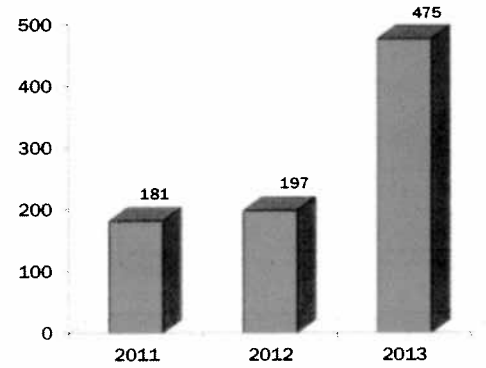
The RTA issues Reduced Fare Cards for elderly residents as well as persons with disabilities. Applicants undergo a screening process and possibly an interview to determine eligibility for a reduced fare card. With the elimination of the Seniors Ride Free Program in September 2011 and the transition to reduced fare for seniors, the number of Reduced Fare Cards issued increased by more than 10 times from 2010 to 2011. In 2013 with the implementation of the Ventra system at CTA and Pace, the RTA is preparing to replace nearly 400 thousand Reduced Fare Cards (Exhibit 8-38).

Exhibit 8-38: **Reduced Fare Cards Issued** (in thousands)



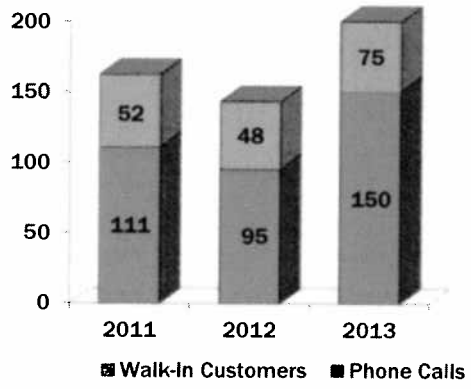
The RTA also issues Ride Free Cards for low-income elderly residents and persons with disabilities who qualify for free rides. Seniors and persons with disabilities who are enrolled in the Illinois Department on Aging's Benefit Access program are eligible to ride for free on CTA, Metra, and Pace fixed-route services. To ride free, applicants must qualify and be enrolled in the Illinois Benefit Access Program. The income levels for eligibility range from $27,610 or less for an individual, $36,635 for a two-person household, and $45,657 for a household of three or more people. The number of Ride Free cards issued increased significantly following the elimination of the Senior Ride Free Program in 2011, as many seniors previously riding for free under the Senior Ride Free Program remained eligible for free rides as part of the Benefit Access Program. In 2013, the RTA expects to replace close to 500 thousand Ride Free Cards to be compatible with Ventra (Exhibit 8-39).

Exhibit 8-39: **Ride Free Cards Issued** (in thousands)



RTA's Customer Service Center experienced a significant increase in phone and walk-in activity in 2011 due to the Seniors Ride Free transition. Phone calls and walk-ins to the Customer Service Center increased by nearly 50%, with a high percentage of this activity occurring in the weeks leading up to the transition period in September of 2011. Phone and walk-in activity at the Customer Service Center remained high in 2012 and staff anticipates more than a 70% increase in phone walk-in activity in 2013 due to the implementation of the Ventra system and the need to replace nearly 1 million free and reduced fare transit cards (Exhibit 8-40).

Exhibit 8-40: **Customer Service Center Volume** (in thousands)



9 Capital

Regional Overview

The RTA Act requires that the capital expenditures of the CTA, Metra, and Pace be subjected to continual review so that the RTA may budget and expend funds available to the region with maximum efficiency. The RTA Board must adopt a five-year capital program every year that describes the nature, location, and budget by project and fiscal year of all anticipated Service Board capital improvements. The capital programs are amended on a quarterly basis as appropriate. Public hearings are held in each county in the Northeastern Illinois region to inform the public and government officials of the RTA's capital development plans.

The RTA emphasizes the need to preserve and enhance the RTA system's valuable infrastructure which includes bringing the system's $151.2 billion in assets (as measured in terms of replacement value and including subway tunnels valued at $100 billion) into a State of Good Repair and extending or expanding service when demand is justified and funding available. To maintain and preserve the existing system requires a capital investment of over $1 billion per year.

Source of Funds

On October 10, 2012, the RTA adopted preliminary federal and state capital funding marks for 2013-2017. Subsequently, the RTA received proposals for funds controlled by the Service Boards and then adopted the 2013 RTA system budget on January 16, 2013. The funding sources for the RTA capital program include the U.S. Department of Transportation's Federal Transit Administration (FTA), the Illinois Department of Transportation (IDOT), the RTA, and the Service Boards. Of the estimated $4.37 billion of capital funding for 2013-2017, federal funding accounts for $2.24 billion or 51%; CTA bond proceeds account for $1 billion or 23%; State of Illinois funds account for $766.6 million or 18%; carryover funds from 2012 account for $139.5 million or 3%; Service Board and other funds account for $97.1 million or 2%; and, RTA funds account for $30.6 million or 1% (Exhibits 9-1 and 9-2). After CTA debt service and capitalized interest is considered, an estimated amount of $3.66 billion is available for 2013-2017 capital investment.

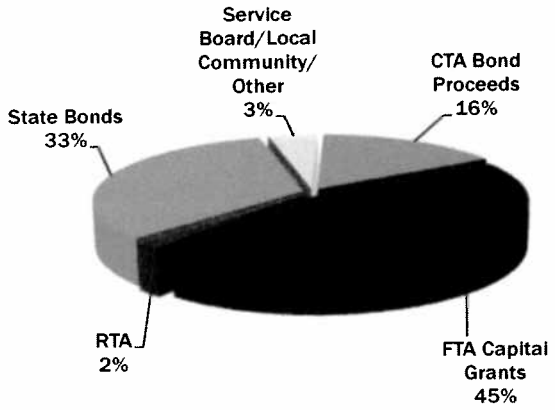
Exhibit 9-4: **Capital Funding in 2013** - $1.093 billion



In 2013, the total estimated capital funds for projects are $1.09 billion. At this time, the final federal appropriation figures for 2013 have not been determined. Once this amount has been established, the capital program will be amended to reflect the available funding. Of the estimated $1.09 billion of funding sources for 2013, federal funding accounts for $485.2 million or 44%; State of Illinois funds account for $363.1 million or 33%; CTA bond proceeds account for $175 million or 16%; Service Board and other funds account for $47.8 million or 5%; and, RTA funds account for $22 million or 2% (Exhibits 9-3 and 9-4). After CTA debt service and capitalized interest is considered, an estimated amount of $957 million is available for 2013 capital investment.

Despite the challenging economic times, critical progress was made in 2012 toward our capital investment needs. The State of Illinois in 2009 approved two measures – the "Jump Start" capital bill and the "Illinois Jobs Now" capital bill. These two programs provide the RTA system with $2.7 billion in capital funds with which the RTA will be able to fund the replacement of aging trains, buses, track, stations and other infrastructure and improve the reliability of the system. In 2012, $704 million of State Bond funds was awarded to the CTA and Pace. Nevertheless, there is uncertainty regarding the timing of the availability of the $2.7 billion balance originally appropriated for the program. A portion of these funds are dependent on bond authorizations that have yet to pass the General Assembly. In addition, sources for debt service on some of the bond funds are dependent upon new revenues in the State's General Revenue Fund. However, encouraged by the award of State Bond funds through this year, the balance of the full $2.7 billion State Bond program is programmed through 2014.

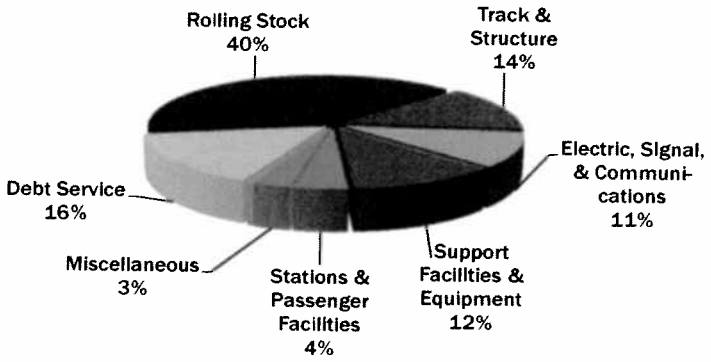
* CTA expenditures do not include adjustments for capitalized interest

Exhibit 9-6: **2013-2017 Capital Program Uses** - $4.374 billion

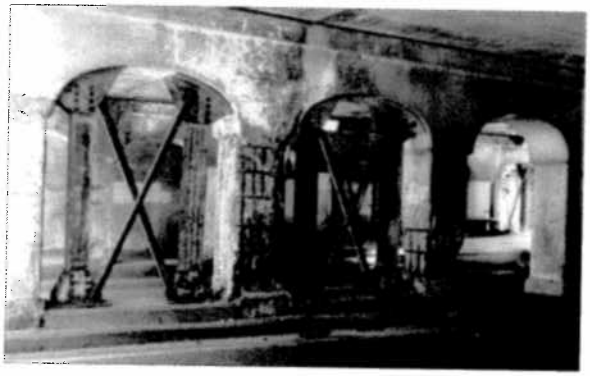


Use of Funds

The primary emphasis of the 2013 Capital Program is to continue efforts to bring the system's transit assets to a State of Good Repair (SGR). When replacing worn capital assets, it is imperative to use modern technologies that result in improved functionalities of equipment, facilities, and rolling stock. In addition, a balanced capital program is responsive to customer needs and shifting markets by including investment in system expansion.

For the 2013 Capital Program, 95% of the budget is allocated to capital projects that maintain the existing infrastructure. While the current funding level does not satisfy all needs, an appropriate balance of investment is achieved in light of the current condition of the RTA system.

Investments in the 2013-2017 Capital Program can be broken down by various asset categories. Exhibits 9-5 and 9-6 show that $1.75 billion or 40% of the program is spent on rolling stock and $559.4 million or 14% for track and structure, which are considered to have the greatest direct impact on transit users. Substantial investment in other infrastructure is also critical to maintaining safe, reliable transportation services. In addition, $685.2 million or 16% is expended on CTA debt service.



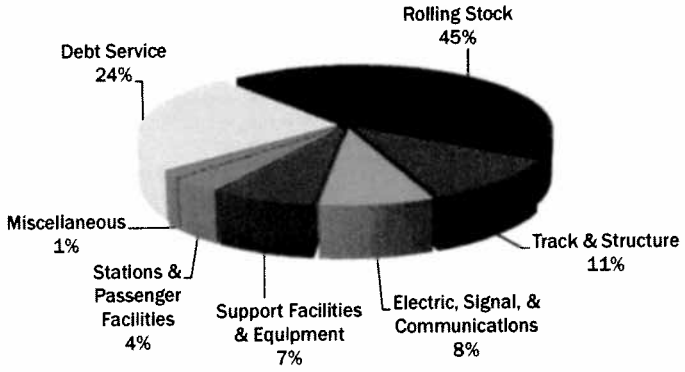
CTA Overview

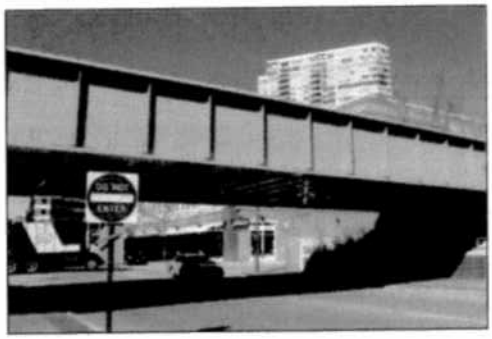
The proposed projects in the CTA's portion of the 2013-2017 Capital Program total $2.82 billion and continue the rehabilitation and replacement of their capital assets. The percentages for the general categories of capital improvements of the total program are: 45% for rolling stock, 24% for debt service, 11% for track and structure, 8% for electric, signal and communications, 7% for support facilities and equipment, 4% for stations and passenger facilities, and 1% for miscellaneous, contingencies and administration. The general categories of capital improvements comprising the CTA's portion of the Capital Program are illustrated in Exhibit 9-7.

Highlights of projects included in the CTA's proposed 2013-2017 Capital Program are:

- $497.2 million to replace rail cars
- $320.4 million for the purchase of buses
- $297.2 million for the repair of track and structure
- $281.7 million for the rehabilitation and overhaul of rail cars
- $204.0 million to replace/upgrade power distribution and signals
- $189.1 million for the improvement of facilities
- $143.7 million to perform mid-life bus overhauls
- $107.2 million to rehabilitate rail stations
- $26.4 million to implement security and communication projects

Exhibit 9-7: **CTA 2013-2017 Capital Program Uses** - $2.817 billion





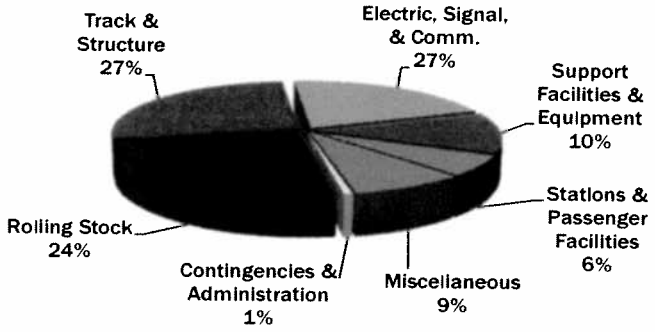
Metra Overview

Metra's portion of the proposed 2013-2017 Capital Program totals $1.12 billion. During this five-year period, Metra will continue to renew its extensive commuter rail infrastructure and renew aging rolling stock. The percentage for the general categories of capital improvements of the total program are: 27% for track and structure, 24% for rolling stock, 21% for electric, signal, and communications, 12% for support facilities and equipment, 6% for stations and passenger facilities, and 10% for miscellaneous, contingencies, and administration. The general categories of capital improvements comprising Metra's portion of the Capital Program are illustrated in Exhibit 9-8.

Highlights of projects included in Metra's proposed 2013-2017 Capital Program are:

- $236.1 million to rehabilitate or replace bridges
- $166.0 million to install Positive Train Control (PTC) system
- $116.4 million to provide locomotive improvements
- $114.9 million to rehabilitate bi-level commuter cars
- $71.1 million rehabilitate and improve stations
- $66.1 million to improve yards, shops, and facilities
- $40.0 million for financial system upgrades

Exhibit 9-8: **Metra 2013-2017 Capital Program Uses** - $1.118 billion



Pace Overview

Pace's portion of the proposed 2013-2017 Capital Program totals $439.3 million. A majority of the funding is provided for the replacement of rolling stock. The percentage for the general categories of capital improvements of the total program are: 53% for rolling stock, 42% for support facilities and equipment, 3% for stations and passenger facilities, 1% for contingencies and administration, and 1% for miscellaneous. The general categories of capital improvements comprising Pace's portion of the Capital Program are illustrated in Exhibit 9-9.

Highlights of projects included in Pace's proposed 2013-2017 Capital Program are:

- $119.7 million for constructing and improving garages
- $74.6 million for the purchase of CNG buses
- $40.5 million for the purchase of paratransit vehicles
- $32.4 million for the purchase of fixed-route buses
- $27.3 million for I-90 corridor transit infrastructure
- $21.6 million for the purchase of vanpool vans
- $17.2 million for the purchase of Over the Road coaches
- $12.4 million for diesel engine retrofits

Capital Impact on Operations

As part of its oversight function, the RTA is charged with providing assessments of the Service Board's Capital Projects and Plans as well as an assessment of the condition of the Service Board's Capital Assets. The RTA, after consultation with the Service Boards, must prepare and adopt a Five-Year Capital Program annually that includes each capital improvement undertaken by or on behalf of a Service Board. In addition to the Five-Year Plan, PA 95-0708 established the need for the development of a Ten-Year Capital Plan.

Achieving and maintaining a State of Good Repair (SGR) will require $31.05 billion of capital investment over the next ten years.

The estimated value of transit capital assets in Northeastern Illinois is $151.2 billion, as measured in terms of replacement value. Achieving and maintaining a State of Good Repair (SGR) will require $31.05 billion of capital investment over the next ten years. During this same timeframe, however, gross funding to support capital infrastructure is projected at $6.93 billion. Since $1.45 billion of capital funds have already been committed to capitalized interest and debt service for bonds issued by the CTA, the current Ten-Year Capital Program leaves approximately $5.49 billion in net funding available for the 2013-2022 period, less than 20% of the total replacement need.

CAPITAL FUNDS AVAILABLE FOR THE TEN-YEAR PLAN

As Exhibit 9-13 indicates, there are four sources of funding that are dedicated to capital program expenditures in the region: federal, state, RTA and local. In the RTA's ten-year plan, $485.2 million in federal capital grants are expected to be made available to the RTA in 2013. By 2022, federal capital grants are planned to increase to $514.8 million, reflecting recent legislative action and associated anticipated trends. State funding includes the $766.6 million available in the State's bond program programmed through 2014. Local funds total $157.1 million between the years 2013 and 2022. These local funds consist of Service Board money that Metra allocates to capital programs from farebox revenues each year, capital funding provided to the region by local communities, and additional funds from the other Service Boards.

In November 2012, a Capital Asset Condition Assessment Update for calendar year 2011 was completed that placed the region's total capital backlog at $18.69 billion, normal replacement needs at $7.95 billion and rehabilitations and capital maintenance at $4.42 billion, for a total of $31.05 billion. The total available funds in 2013 for capital projects are approximately $957 million, a $2.23 billion shortfall from the annual replacement need to achieve a State of Good Repair (SGR). This amount is the total available after the allo-

Exhibit 9-13: **Capital Program Funds Available** (in millions)

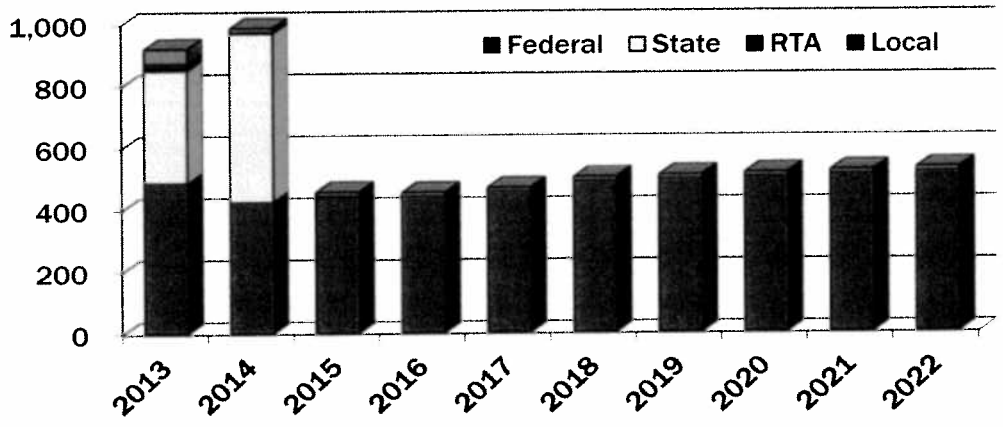

Exhibit 9-14: **Capital Funding vs. Annual Replacement Need** (in millions)

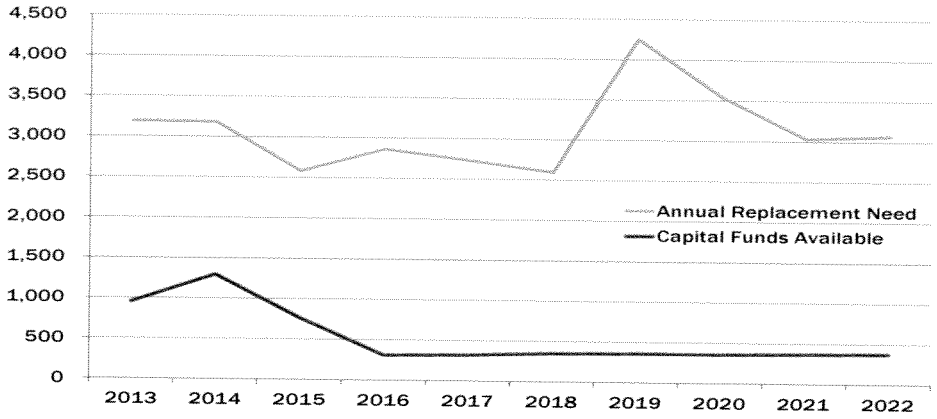

cation of $131.5 million for debt service on CTA bonds and capitalized interest of $4.6 million. It is important to note that in 2012, the Service Boards discontinued their previous unsustainable practice of transferring from capital funds to cover operating expenses.

As shown in Exhibit 9-13, the funding available from state sources in the years 2013 and 2014 is critical to executing the capital program. Beyond 2014, the lack of this vital funding is evident. In 2013 and subsequent years, the amount of funding available for capital is below the annual replacement need by $1.88 to $3.89 billion per year.

CAPITAL FUNDING VS. ANNUAL REPLACEMENT NEED

As Exhibit 9-14 shows, from 2013 to 2022 the region's projected capital funding falls far below the region's replacement need for each year. With the CTA's planned issuance of bonds of $1 billion, capital funding is sufficient to pay for only 30 to 40% of the annual replacement need in 2013 through 2015. With the absence of locally generated borrowing in 2016 and after, that level falls to less than 20% of the replacement need.

Lack of funding for capital improvements is further exacerbated by the region's aging vehicle fleet. As the average life of a region's fleet increases, the fleet's operating and maintenance costs increase as well. Conversely, if the average age of a fleet decreases because of capital spending, one can also expect to see significant savings in operating and maintenance expenses. If the region fails to meet both vehicular and non-vehicular capital annual replacement needs, operating and maintenance costs will continue to rise, making it difficult to continue to provide service at current levels.

IMPACT OF CAPITAL EXPENDITURES ON THE 2013 OPERATING BUDGET

CTA

The proposed 2013 Capital Program for CTA totals $522.3 million. This amount accounts for the reduction of debt service funding of $131.5 million and the capitalized interest of $4.6 million. This program is divided among the following components: Bus Projects for $151.8 million; Rail Projects for $342.6 million; and, Systemwide Projects for $32.5 million. The capital program provides for the overhaul and replacement of aging rail cars and buses in 2013, investments that are expected to generate benefits in the form of improved service reliability, improved rider comfort and reduced maintenance and operating costs. Similarly, proposed investments in track, rail structures, power distribution and signal systems will help mitigate slow-zone restrictions leading to reductions to both rider travel time and rail operating costs.

Exhibits 9-15 through 9-17 are color coded in accordance with the capital investment at High (Dark Green), Medium (Light Green) and Low (Yellow) impact on operating costs. Impacts on operations vary by project for the Service Boards with the highest similar impact occurring for rolling stock replacement and rehabilitation projects.

Exhibit 9-15: **CTA 2013 Capital Impact on Operations** (includes only some of the major programs)

Bus Projects	
Bus mid-life overhaul ($30.9 million) Purchase replacement buses ($85.8 million)	• Improve service reliability • Increase customer satisfaction • Reduced maintenance costs • Improve on-time performance • Enhance safety
Rail Projects	
Repair track and structures ($160.1 million)	• Improve service reliability • Increase customer satisfaction • Improve on-time performance • Increase travel speeds by reducing slow zone restrictions • Enhance safety
System-wide Projects	
Replace/Upgrade power distribution and Signals System-wide ($78 million)	• Improve service reliability • Improve on-time performance • Raise travel speeds by reducing slow zone restrictions • Enhance safety
Rehabilitate rail stations system-wide ($66.6 million)	• Enhance safety

Exhibit 9-16: **Metra 2013 Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock	
Provide locomotive improvements ($10.5 million) Rehabilitate bi-level commuter cars ($18.5 million)	• Maintain on-time performance • Reduce maintenance cost • Improve service reliability • Increase customer satisfaction
Track & Structure	
Rehabilitation/Replacement of bridges (91.7 million)	• Preserve uninterrupted service – higher on-time performance • Improve vertical clearances • Improve traffic flow and pedestrian safety
Electrical Signal & Communication	
Install positive train control system ($54.2 million)	• Improve travel times resulting in higher on-time performance • Enhance safety
Stations and Passenger Facilities	
Rehabilitate and improve stations ($47.1 million)	• Revenue enhancement through improved commercial and retail space • Increase customer satisfaction

Metra

The proposed 2013 Capital Program for Metra totals $325.4 million divided among the following: $33.7 million for Rolling Stock; $104.9 million for Track & Structure; $77.4 million for Electrical, Signal & Communications; $39.2 million for Support Facilities and Equipment; $47.1 million for Stations and Passenger Facilities; and, $21.9 million for Miscellaneous.

Exhibit 9-17: **Pace 2013 Capital Impact on Operations** (includes only some of the major programs)

Rolling Stock	
Purchase of fixed-route buses ($56.8 million)	• Reduced maintenance and operating costs • Maintain on-time performance • Improved travel time • Enhanced safety • Lower fuel consumption
Support Facilities and Equipment	
Improvement to garages/facilities ($11.8 million)	• Lower building maintenance costs • Improved operational performance • Enhanced safety

Pace

The proposed 2013 Capital Program for Pace totals $109.2 million divided among the following: $76.7 million for Rolling Stock; $27.6 million for Support Facilities & Equipment; $2.7 million for Stations and Passenger Facilities; and, $1.6 million for Miscellaneous, Contingencies & Administration. Pace plans to continue the replacement of fixed-route buses in 2013. This will lower the average age of their bus fleet, thereby reducing annual operating expenses.

Note that the Service Board's proposed allocation of investment funds as presented above was found to be consistent with the mix of investment allocations identified by RTA's Capital Decision Prioritization Support Tool. The RTA will continue to work more cooperatively with the Service Boards to identify the impact of capital expenditures on their operating budgets as it attempts to mitigate the effects of the region's aging transit infrastructure and meet its annual replacement needs.

Future Improvements to the Assessment of Investment Benefits: RTA recently initiated the "Estimating the Operating Cost Impacts of Capital Projects" study. The objective of this study is to develop a methodology and tool to better estimate the operating and maintenance cost impacts of a broad range of capital investment actions that might be undertaken by the RTA's Service Boards. Study results are expected to aid Service Board and RTA staff tasked with project selection and approval. The study will also help improve investment prioritization scoring for the O&M cost impact investment criteria within RTA's Capital Decision Prioritization Support Tool. In addition to providing an ongoing assessment of regional capital reinvestment requirements, this prioritization tool provides indepen-dent analyses of proposed capital budgets, and more importantly, is consistent with federal MAP-21 Transit Asset Management (TAM) requirements.

10 Appendices

Exhibit 10-1: **2013 Business Plan Calendar**

2013 Business Plan Calendar

Date (2012)	Requirements
30-May	RTA Finance Committee and Board meet to discuss and consider the release of the 2013 Business Plan Call, which includes the preparatory funding estimates for the Service Boards' 2013 Annual Budget, Two-Year (2014-2015) Financial Plan, and Five-Year (2013-2017) Capital Program.
2-Jul	The RTA releases the preparatory funding marks, which include the preliminary operating funding amounts for the 2013 budget and 2014-2015 financial plan for each Service Board, the required 2013 recovery ratio for each Service Board, and the preliminary capital program amounts for 2013-2017.
Sept - Nov	Service Boards release their proposed Budgets, Two-Year Financial Plans, and Five-Year Capital Programs to the RTA and the public. Information requirements not included in the proposed Budget, Two-Year Financial Plan, and Five-Year Capital Program document shall be provided to the RTA on supplemental schedules not later than September 30.
10-Oct	RTA Finance Committee and Board adopt ordinances which (1) establish the operating funding amounts for the budget for the upcoming year and the financial plan for the subsequent two years for each Service Board, (2) set the required recovery ratio for the upcoming year for each Service Board, and (3) set the preliminary capital program amounts for the upcoming five years.
Oct - Dec	The Service Boards hold public hearings on their proposed Budgets, Two-Year Financial Plans, and Five-Year Capital Programs, and present these proposals to the County Boards in the region.
24-Oct 14-Nov	During the RTA Board Meetings in October and/or in November the Service Boards present their proposed Budgets, Two-Year Financial Plans and Five-Year Capital Programs to the RTA Board.
15-Nov	Service Board proposed Budgets, Two-Year Financial Plans, and Five-Year Capital Programs, adopted by their Boards, are submitted to the RTA by this date.
30-Nov	RTA staff prepares consolidated Budgets, Two-Year Financial Plans, and Five-Year Capital Programs for public review and comment.
5-Dec	The Service Boards present their proposed budgets to a special meeting of the RTA Finance Committee.
5-Dec	The RTA holds a public hearing on the proposed RTA Budget, Two-Year Financial Plan, and Five-Year Capital Program.
19-Dec	RTA Finance Committee and Board meet to discuss and consider adoption of ordinance which approves the 2013 Budget, 2014-2015 Financial Plan, and Five-Year Capital Program for the RTA region.
16-Jan-2013	RTA Finance Committee and Board adopt ordinance 2013-01 which approves the 2013 Budget, 2014-2015 Financial Plan, and Five-Year Capital Program for the RTA region.

Public Hearing Overview

Section 4.01 of the RTA Act directs the RTA to hold public hearings on its annual consolidated budget and financial plan prior to Board consideration of the ordinance adopting the budget and plan. Metra, Pace, and CTA are also required by law to hold public hearings on their proposed budgets and financial plans. The RTA held a public hearing on December 5th, 2012 at RTA Headquarters. This hearing provided a unified presentation of the region's transit system and 2013 consolidated budget. The RTA also participated in eight Metra hearings in November: one in the City of Chicago, two in suburban Cook (North, South), and one each in Lake, Will, DuPage, Kane and McHenry counties. The RTA attended thirteen Pace hearings in October: four in the City of Chicago (North, West, South, Southwest), four in suburban Cook (North, West, South, Southwest), and one each in Lake, Will, DuPage, Kane and McHenry counties. The RTA attended two CTA hearings in December; at CTA Headquarters and on the west side. In addition to public hearings, the RTA and Service Boards participated in six County Board meetings. The hearings were publicized in press releases issued to the media, paid ads in newspapers across the region, and through the RTA's Facebook page and InTransit newsletter. Public hearing information was also posted on the websites of the RTA and the Service Boards. The hearing schedules are detailed in Exhibit 10-2.

At these hearings, the RTA and Service Boards briefed the public on the proposed 2013 Budget, the proposed 2013-2017 Program of Capital Projects, and any proposed service or fare policy changes. Presenters included RTA senior management.

Public hearing comments were primarily focused on proposed service changes at Pace, proposed fare changes at Metra and CTA, and efficiency of paratransit service. Overwhelmingly, riders advocated for smaller, more frequent fare increases rather than large increases every few years. Riders were also concerned about growing capital needs and how the Service Boards would achieve the funds needed to reach a State of Good Repair. Court reporters were present to take testimony at all public hearings. Transcripts are on file with RTA.

In addition to the hearings, the budget documents were posted on the RTA and Service Board websites. The RTA Board voted to approve the 2013 regional transit system budget at its January 16th, 2013 meeting.

Exhibit 10-2: **Public Hearing Schedule**

The Regional Transportation Authority (RTA) hosted its public hearing for the 2013 budget on December 5th, 2012 at RTA headquarters. The budgets for the CTA, Metra, and Pace were reviewed and a general outlook for the transit system and key agency initiatives were presented. Attendees had the opportunity to participate in a Q&A session where RTA staff received comment and responded to questions. Following is the full schedule of budget hearings conducted by the Service Boards and the RTA.

SCHEDULE OF PUBLIC HEARINGS

PACE

McHenry County - Monday, October 22nd
4:30 – 5:30 pm
Crystal Lake Municipal Complex, Council Chambers
100 W. Woodstock St., Crystal Lake, IL

City of Chicago (North) - Monday, October 22nd
11:00 am - 1:00 pm
Sulzer Regional Library
4455 N. Lincoln Ave., Chicago, IL

Will County - Tuesday, October 23rd
4:00 - 6:00 pm
Joliet Public Library, Meeting Room B
150 N. Ottawa St., Joliet, IL

City of Chicago (West) - Tuesday, October 23rd
2:00 - 4:00 pm
Garfield Park Conservatory
300 N. Central Park Ave., Chicago, IL

Cook County (North) - Wednesday, October 24th
4:00 - 6:00 pm
Pace Headquarters, Board Room
550 W. Algonquin Rd., Arlington Heights, IL

Cook County (Southwest) - Wednesday, October 24th
4:30 - 6:30 pm
Worth Village Hall, Board Room
7112 W. 111th St., Worth, IL

Kane County - Thursday, October 25th
4:30 - 6:00 pm
Kane County Government Center Auditorium
719 S. Batavia Ave., Geneva, IL

Cook County (West) - Thursday, October 25th
4:00 - 6:00 pm
Howard Mohr Community Center
7640 Jackson Blvd., Forrest Park, IL

DuPage County - Monday, October 29th
5:00 - 7:00 pm
College of DuPage, Student Resource Center, Room 2000
425 Fawell Blvd., Glen Ellyn, IL

Lake County - Monday, October 29th
4:00 - 6:00 pm
Waukegan Public Library, Bradbury Room
128 N County St., Waukegan, IL

Cook County (South) - Tuesday, October 30th
4:30 - 6:30 pm
Homewood Village Hall, Board Room
2020 Chestnut Rd., Homewood, IL

City of Chicago (Southwest) - Tuesday, October 30th
3:00 - 5:00 pm
Arturo Velasquez Westside Tech. Inst.
2800 S. Western Ave., Chicago, IL

City of Chicago (South) - Wednesday, October 31th
7:00 - 9:00 pm
Olive Harvey College Cafeteria
10001 S. Woodlawn Ave., Chicago, IL

METRA

McHenry County - Tuesday, December 11th
4:00 - 7:00 pm
Crystal Lake City Hall, Council Chambers
100 W. Woodstock St., Crystal Lake, IL

Kane County - Tuesday, December 11th
4:00 - 7:00 pm
Geneva City Hall, City Council Chambers
22 S. First St., Geneva, IL

Cook County (South) - Tuesday, December 11th
4:00 - 7:00 pm
Flossmoor Village Hall, Board Room
2800 Flossmoor Rd., Flossmoor, IL

Cook County (North) - Tuesday, December 11th
4:00 - 7:00 pm
Arlington Heights Village Hall, Board Room
33 S. Arlington Heights Rd., Arlington Heights, IL

DuPage County - Tuesday, December 11th
4:00 - 7:00 pm
Wheaton City Hall, Gamon Room
303 W. Wesley St., Wheaton, IL

Lake County - Tuesday, December 11th
4:00 - 7:00 pm
Grayslake Village Hall, Board Room
10 S. Seymour, Grayslake, IL

Will County - Tuesday, December 11th
4:00 - 7:00 pm
Joliet City Hall, Conference Room 1 & 2
150 W. Jefferson St., Joliet, IL

City of Chicago - Tuesday, December 11th
4:00 - 7:00 pm
Metra Headquarters, 13th Floor Board Room
547 W. Jackson Blvd., Chicago, IL

CTA

City of Chicago (West Loop) - Monday, December 10th
6:00 pm
CTA Headquarters
567 W. Lake St., Chicago, IL

City of Chicago (West Side) - Monday, December 17th
6:00 pm
Westinghouse College Prep
3223 W. Franklin Blvd, Chicago, IL

RTA
City of Chicago – December 5th
3:00 – 5:00 pm
RTA Headquarters
175 W. Jackson, Suite 1650, Chicago, IL

Glossary

Accessible—As defined by FTA, a site, building, facility, or portion thereof that complies with defined standards and that can be approached, entered, and used by persons with disabilities.

Accessible Service—A term used to describe service that is accessible to non-ambulatory riders with disabilities. This includes fixed-route bus service with wheelchair lifts or Dial-a-Ride service with wheelchair lift-equipped vehicles.

ADA (The Americans with Disabilities Act of 1990)—This federal act requires changes to transit vehicles, operations and facilities to ensure that people with disabilities have access to jobs, public accommodations, telecommunications, and public services, including public transit.

ADA Paratransit Service—Non-fixed-route paratransit service utilizing vans and small buses to provide prearranged trips to and from specific locations within the service area to certified participants in the program.

Administration Expenditure—Expenditures for labor, materials and fees associated with general office functions, insurance, safety, legal services, and customer services.

Agency Fund—This fiduciary fund accounts for the assets held by the RTA in a trustee capacity or as an agent for the CTA, Metra, and Pace, rather than for the RTA's own programs. (Of the four types of fiduciary funds [Agency funds, pension (and other employee benefit] funds, investment trust funds, and private-purpose funds], the RTA uses only the first two.)

Ambulatory Disabled—A person with a disability that does not require the use of a wheelchair. This would describe individuals who use a mobility aid other than a wheelchair or have a visual or hearing impairment.

Appropriation—A legal procedure that permits a specified amount of funds to be expended for a given operating or capital purpose; the RTA appropriates funds for expenditures.

ASA/AFA—State-authorized assistance. Additional State Assistance (ASA) and Additional Financial Assistance (ASA) are issued for SCIP bonds (see SCIP bonds).

Balanced Budget—A budget in which expected revenues equal expected expenses during a fiscal period.

Benefit Access Program—The Illinois Department on Aging's Benefit Access Program provides assistance to low income senior citizens and persons with disabilities. Illinois residents with a qualifying disability who meet the income eligibility requirements of the Benefit Access Program are eligible for free rides on regularly scheduled fixed-route public transit service.

Bond Refinancing/Refunding—The payoff and reissuance of bonds, to obtain better interest rates and/or bond conditions which results in the defeasance of the old debt.

Budget—Funds allocated by the RTA Board for a particular purpose; each year the RTA Board approves a budget document for the following year. Funds are allocated either by "programming" them or by "appropriating" them.

Budget Marks—The Regional Transportation Authority Act, as amended in 1983, requires the RTA to advise each of its Service Boards by September 15th each year of its required revenue recovery ratio for the subsequent year, and the public funding estimated to be available for the next three years. These figures are referred to as budget marks.

Bus Bunching—A traffic scenario in which more than one bus arrives at the same time. This phenomenon is a subject of several CTA initiatives aimed at reducing service problems through improved field management of traffic and schedules.

Bus Rapid Transit (BRT)—BRT combines the quality of rail transit and the flexibility of buses. It can operate on exclusive transit ways, High Occupancy Vehicle (HOV) lanes, expressways, or ordinary streets. A BRT system combines intelligent transportation systems technologies, transit signal priority (TSP), cleaner and quieter vehicles, rapid and convenient fare collection, and integration with land use policies.

Capacity Utilization—Total passenger miles divided by transit capacity, where transit capacity is the product of vehicle revenue miles and average vehicle passenger capacity.

Capital—Funds that finance construction, renovation, and major repair projects or the purchase of machinery, equipment, buildings, and land.

Capital Expenditure—Expenditures that acquire, improve, or extend the useful life of any item with an expected life of three or more years and a value of more than $5,000, e.g., rolling stock, track and structure, support facilities and equipment, and stations and passenger facilities.

Car Mile or Vehicle Mile—A single bus, rapid transit car, or commuter rail car traveling one mile.

CMAP (The Chicago Metropolitan Agency for Planning)—Formed in 2005, CMAP integrates planning for land use and transportation in Northeastern Illinois. The new organization combined the region's two previously separate transportation and land-use planning organizations – Chicago Area Transportation Study (CATS) and the Northeastern Illinois Planning Commission (NIPC) – into a single agency.

CMAQ (Congestion Mitigation/Air Quality) Grant—A federal grant program designed to support transportation projects that reduce traffic congestion and/or improve air quality.

Cost Per Mile—Operating expense divided by vehicle miles for a particular program or in total.

Cost Per Passenger—Operating expense divided by ridership for a particular program or in total.

CTA (Chicago Transit Authority)—The CTA operates bus and rapid transit service in the City of Chicago and several suburbs. The CTA was created by state legislation and began operations in 1947.

Deadhead—The time when a transit vehicle is traveling toward a yard, shop, or the start of a run but is not in revenue service. Car miles include deadhead miles.

Debt Service—The payment of interest on and the repayment of principal on long-term borrowed funds according to a predetermined payment schedule.

Defeasance of Bonds—A technique used to discharge older high-rate debt prior to maturity with new securities bearing lower interest rates.

Depreciation—Expiration in the service life of fixed assets, other than wasting assets, attributable to wear and tear, deterioration, action of the physical elements, inadequacy, and obsolescence. The portion of the cost of a fixed asset, other than a wasting asset, charged to expense during a particular period.

Dial-A-Ride Service—Paratransit service that requires the user to call ahead and schedule service.

Discretionary Funds—Funds that the RTA allocates at its discretion. These funds include PTF I and 15 percent of the RTA Sales Tax I.

Elderly—A term used to describe individuals who are 65 years of age or older. This age is used to qualify for the RTA Senior Citizen Reduced Fare Card. Note that some paratransit services define elderly individuals at an age other than 65.

Express Bus (or route)—A suburban or intercity bus that operates a portion of its route without stops or with a limited number of stops.

Favorable Performance—In a comparison of actual results to budgeted levels, favorable performance describes the situation in which expenditures are less than budget or revenue exceeds budget.

Farebox Revenue—Revenue obtained from passengers.

Fares—The amount charged to passengers for use of various services.

Feeder Bus Services—Pace bus routes that serve Metra stations.

Financial Plan—In addition to an annual budget, the RTA Act, as amended in 1983, requires the RTA and its Service Boards to develop a financial plan for the two years subsequent to the upcoming budget year. In combination with the annual budget, this provides a three-year projection of expenses, revenues, and public funding requirements.

Fiscal Year—The calendar year is the fiscal year for the RTA, CTA, Metra, and Pace. The fiscal year of the State of Illinois extends from July 1 through June 30 of the following year. The fiscal year of the federal government extends from October 1 through September 30 of the following year.

Fixed-Route Service—Buses that operate according to fixed schedules and routes.

Flexible Funds—Federal funds made available by TEA-21 that can be used for various transportation projects, including both highway and mass transit projects. Allocation of these funds is at the discretion of state and local agencies.

Fringes (Fringe Benefit Expenditures)—Pay or expenditures to or on behalf of employees in addition to salaries and wages, including sick pay, vacation pay, pension contributions, life and health insurance, unemployment and workers' compensation, social security costs, and other programs.

FTA (Federal Transit Administration)—The FTA is the federal agency that helps cities and communities provide mobility to their citizens. Through its grant programs, FTA provides financial and planning assistance to help plan, build, and operate rail, bus, and paratransit systems. Since 1988, the only FTA funding available to the RTA has been for capital projects.

Full Funding Grant Agreement (FFGA)—The FTA is required to use a FFGA to provide financial assistance for new start projects. The FTA also has the discretion to use an FFGA in awarding federal assistance for other major capital projects. The FFGA defines the project,

including cost and schedule; commits to a maximum level of federal financial assistance (subject to appropriation); establishes the terms and conditions of federal financial participation; covers the period of time for completion of the project; and helps to manage the project in accordance with federal law. The FFGA assures the grantee of predictable federal financial support for the project (subject to appropriation) while placing a ceiling on the amount of that federal support.

Full-Time Equivalent (FTE)—A measurement equal to one staff person working a full-time work schedule for one year.

Fund Balance—The cumulative difference between revenues and expenses over the life of a fund. The excess of funding over operating deficit for a given period of time. In this document, the fund balance refers to the unassigned funds in the Agency and general fund.

Funding Formula—A specific formula used to determine a subsidy level.

General Long Term Debt Account Group (GLTDAG)—This account group is not a fund but a separate list of certain long-term liabilities of the general government. Debt normally is recorded at its face value, without premium or discount. Additions to and deletions from GLTDAG are disclosed in the notes to the financial statements.

General Fund—The operating fund that is used to account for all financial resources and normal recurring activities except for those required to be accounted for in another fund.

General Obligation Bonds (GO Bonds)—Bonds that are legally backed by the full faith and credit of the issuing government. The government is legally obligated to use its full taxing power, if necessary, to repay the debt.

Gross Domestic Product (GDP)—Reported by the Bureau of Economic Analysis, this measure of economic activity is the sum of the market values of all of the final goods and services produced in the United States in a year.

Grants—Monies received from local, federal, and state governments to provide capital or operating assistance.

Headway—The time span between service vehicles (bus or rail) on a specified route.

Illinois FIRST—A group of legislation passed by the Illinois Legislature to fund capital improvements for the state's infrastructure, roads, schools and transit.

Illinois Jobs Now!—Signed into law by Illinois Governor Quinn in 2009, the six-year, $31 billion capital program to improve state infrastructure included $186 million in funding for transportation projects.

Infrastructure—The physical assets of the RTA system, e.g., rail lines and yards, power distribution, signaling, switching, and communications equipment, passenger stations, information systems, and roadways, upon which the continuance and growth of transit depend.

In-Kind Service—These services are provided at no cost to a Service Board. For example, the City of Chicago provides free of charge dedicated security forces to the CTA.

Innovation, Coordination and Enhancement (ICE) Fund—A fund created to award grants to the Service Boards, transportation agencies, and local governments, for short-term, lower-cost projects and service enhancements.

Intelligent Bus System (IBS)—A bus communications system that uses advanced technology to monitor and improve performance on various levels. Pace's new bus communications system includes radio voice and data communications, Computer-Aided Dispatching (CAD) and Global Positioning System (GPS)-based Automatic Vehicle Location (AVL) functions.

Intelligent Transportation Systems (ITS)—The application of advanced sensor, computer, electronics, and communication technologies and management strat-

egies in an integrated manner to increase the safety and efficiency of the surface transportation system. S is a national effort designed to promote the use of advanced technologies in multimodal transportation.

Interest—The charge for borrowing money, typically expressed as an annual percentage rate.

ISTEA (Intermodal Surface Transportation Efficiency Act of 1991)—ISTEA amended the Federal Transit Act introducing new sources of flexible funds and increasing the funding authorized for public transit.

JARC (Job Access Reverse Commute)/New Freedom— JARC is a federally funded program that provides operating and capital assistance for transportation services planned, designed, and carried out to meet the transportation needs of eligible low-income individuals and of reverse commuters regardless of income. The New Freedom program provides new public transportation services and public transportation alternatives beyond those required by the Americans with Disabilities Act (ADA).

Joint Self Insurance Fund (JSIF)—The RTA provides excess liability insurance to protect the self-insurance programs maintained by the CTA, Metra, and Pace. The Service Boards are obligated to reimburse the JSIF for any damages paid plus a floating interest rate.

Labor Expenditure—The cost of wages and salaries (including overtime) to employees for the performance of their work.

Line Item—An appropriation that is itemized on a separate line in a budget.

Linked Trip—A single, one-way trip without regard for the number of vehicles boarded to make the trip (i.e., a home-to-work trip taken by boarding a bus, to a train, to another bus represents one linked trip or three unlinked trips).

Maintenance Expenditure—Expenditures for labor, materials, services, and equipment used to repair and service transit and service vehicles and facilities.

MAP-21—The Moving Ahead for Progress in the 21st Century Act was signed into law by President Obama on July 6, 2012. MAP-21 provides over $105 billion in funds for surface transportation programs in 2013 and 2014.

Metra—The Commuter Rail Division of the RTA responsible for all rail public transit service with the exception of those services provided by the CTA. Metra was created in 1983 by an amendment to the RTA Act.

Mobility Limited—An individual who has a physical impairment, including impaired sensory, manual, or speaking abilities that result in functional limitations.

Modified Accrual Basis—A type of accounting whereby revenue and other financial resource increments (e.g., bond issue proceeds) are recognized when they become both "measurable" and "available" for finance expenditures of the current period. "Available" means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures (e.g., debt service payments and a number of specific accrued liabilities) are only recognized when payment is due because it is only at that time that they normally are liquidated with expendable available financial resources.

Moving Beyond Congestion—In 2008, jointly with the Chicago Transit Authority, Metra and Pace, the RTA led a strategic planning effort to maintain, enhance and expand the Northeastern Illinois region's transit system and to solve the current transit funding challenge, ensure financial viability and accountability, and meet the region's growing and changing transportation needs.

Net Results—The difference between total revenue (including public funding) and total expenses. Sometimes referred to as the "change in fund balance."

Non-Ambulatory Disabled—A person who has a disability that requires use of a wheelchair.

Operating Assistance—Financial assistance for transit operating (as opposed to capital) expenditures. Such

aid may originate with federal, state, or local governments.

Operating Budget—The planning of revenue and expenditures for a given period of time to maintain daily operations.

Operating Deficit—For a particular Service Board, the difference between system-generated revenues and system operating expenses. The operating deficit is sometimes referred to as the "public funding requirement." For the RTA, its deficit or surplus equals total revenues (sales tax, PTF, interest, and other income) less operating funding, debt service, technology, and capital funding (RTA capital and RTA discretionary funding of Service Board capital).

Off-Peak—Non-rush hour time periods.

Pace—The Suburban Bus Division of the RTA responsible for all non-rail suburban public transit service with the exception of those services provided by the CTA. On July 1, 2006, Pace assumed operating responsibility for all ADA Paratransit service in the RTA region. Pace was created in 1983 by an amendment to the RTA Act.

Paratransit Service—Any transit service that is not conventional fixed-route bus or rail service, including Dial-a-Ride, Call-n-Ride, and ADA Paratransit Services.

Passenger Mile—A single passenger traveling one mile.

Peak Period—Morning or evening rush hour.

Principal—The amount borrowed or the amount still owed on a loan, separate from the interest.

Positive Budget Variance (PBV)—Calculated as the difference between a Service Board's budgeted and actual deficit, a positive budget variance results when the actual deficit is less than budgeted. A PBV represents available funds for the Service Boards to use for capital purposes.

Program (verb)—To commit funds, for a given capital purpose, without necessarily appropriating these funds for expenditure. When the RTA Board passes its official budget document, certain funds are "programmed" so that they may be obligated (i.e., contracts signed) during the upcoming year; these funds may be expended during the upcoming or subsequent years.

Program (noun)—Groupings of expenditure accounts with related expenditures (i.e., operations, maintenance, administration, and capital program).

Public Transportation Fund(s) (PTF)—Each month the state transfers from its General Revenue Fund an amount equal to 30% of the RTA Sales Tax and Real Estate Transfer Tax collected in the previous month.

Public Funding—Funding received from the RTA or a local, state, or federal government entity. Generally refers to funding for Service Board operating expenditures.

Purchase of Paratransit Service—The amount of money paid to contractors to provide door-to-door transportation to certified participants in the ADA Paratransit program.

Recovery Ratio—System-generated revenues divided by system operating expenditures with exclusions as allowed by the RTA Act. This ratio is calculated for each of the Service Boards and for the RTA region as a whole. The RTA Act mandates that the RTA region attain an annual recovery ratio of at least 50% for mainline service. For ADA Paratransit service, the Act requires a 10% recovery ratio.

Reduced Fares—Discounted fares for children age 7-11, grade school and high school students (with CTA ID), seniors 65 and older (with RTA ID), and riders with disabilities (with RTA ID) except paratransit riders.

Regional Priorities Initiative—In 2011, the RTA launched a series of five key priority initiatives intended to advance a collective vision for the region's transit system.

Revenue Vehicle Mile—Vehicle mile during which the vehicle is in revenue service (i.e., picking up and/or dropping off passengers).

Reverse Commute—City-to-suburb commute. This phrase refers to the fact that most riders commute from the suburbs to the city.

Ridership (unlinked passenger trips)—Each passenger counted each time that person boards a vehicle.

Rolling Stock—Public transportation vehicles including commuter rail cars, locomotives, rapid transit cars, buses, and vans.

RTA Sales Tax (PART I)—1% in Cook County, 0.25% in the collar counties of DuPage, Kane, Lake, McHenry and Will. 85% of this sales tax is fully distributed to the Service Boards by the RTA according to formulas established by the RTA Act. 15% of this sales tax is retained by the RTA, a portion of which is distributed to the Service Boards at the RTA's discretion.

SAFETEA-LU (Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users)—Signed into law on August 10, 2005, this legislation provided $286.4 billion in guaranteed funding for federal surface transportation programs through federal fiscal year (FFY) 2009. It was extended through FFY 2012. This legislation was replaced by the Moving Ahead for Progress in the 21st Century (MAP-21) Act in July, 2012.

SCIP (Strategic Capital Improvement Program) Bonds—The RTA was authorized under the RTA Act to issue $500 million of bonds for public transportation projects approved by the Governor of the State as part of the RTA's Strategic Capital Improvement Program (SCIP). Effective January 1, 2000, the Act was amended to authorize the RTA to issue an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004.

Series B Bonds—State Transportation Bonds used as all or a portion of the local share required to match federal funds for public transportation capital projects.

Service Boards—The term refers to the region's three transit operators: CTA, Metra and Pace.

Special Service—A transportation service, as defined by the FTA, specifically designed to serve the needs of persons who, by reason of disability, are unable to use mass transit systems designed for the use of the general public.

State Financial Assistance (SFA)—Subject to appropriation by the State, this assistance reimburses the debt service expenses of the RTA's Strategic Capital Improvement Program (SCIP) bonds.

State of Good Repair (SGR)—Capital investment in infrastructure maintenance in order to improve the condition of current transit facilities and provide safe, reliable service.

Statutory Funds Designated for Capital or Transfer Capital—The difference between a Service Board's statutory funding and its budgeted or actual deficit, whichever is greater. These funds, which are over and above operating needs, are generally used for capital purposes.

Subscription Service—Special services for users who ride on a frequent and regular basis and follow a prescribed schedule (a minimum of three times per week between the same origin and destination).

Subsidy—Funds received from another source that are used to cover the cost of a service or program that is not self-supporting.

System-Generated Revenue (Total Operating Revenue)—Total revenue generated from operations. Includes farebox revenue, state fare subsidies, advertising, interest and all other income (excludes RTA and federal subsidies).

Taxi Access Program (TAP)—Certified participants in the ADA Paratransit service program can purchase taxi vouchers, valued at up to $13.50, at a reduced price of $5.00 to pay for one-way taxi rides that originate within the City of Chicago.

TEA-21 (The Transportation Equity Act for the 21st Century)— Signed into law on June 9, 1998, this legislation provided a six-year reauthorization of the federal transit program and the necessary contract authority needed to fully fund the fiscal year 1998 obligation limitations contained in the fiscal year 1998 Department of Transportation Appropriations Act.

TERM-lite—Transit Economic Requirements Model, TERM-lite is the local version of the FTA's capital needs analysis tool that evaluates asset conditions and State of Good Repair (SGR) backlog.

T-FLEx (Transit Finance Learning Exchange)—A strategic alliance of transit agencies formed to leverage mutual strengths and continuously improve transit finance leadership, development, training practices, and information sharing. Its purpose is to transform the finance function into a value-added business partner within each transit authority. Members meet twice annually in a facilitated workshop environment to develop and share best practices in active roundtable work sessions.

TOD (Transit-Oriented Development or Transit-Oriented Design)—Mixed use development of residential, office and retail uses within walking distance of a transit station or bus route.

Transit Asset Management (TAM)—Measurement of the condition of capital assets such as equipment, rolling stock, infrastructure, and facilities.

Transit Signal Priority—Transit signal priority either gives or extends a green signal to transit buses under certain circumstances to reduce passenger travel times, improve bus schedule adherence, and reduce bus operating costs.

Total Vehicle Miles—The sum of all miles operated by passenger vehicles, including mileage when no passengers were carried.

Unreserved Fund Balance—The balance of funds that have not been restricted, committed, or programmed into the budget, financial plan, or capital program.

Value Engineering— The process of evaluating the function of systems, equipment, facilities, procedures, and supplies to determine if cost-saving is achievable. Value Engineering works to achieve balance between function, performance, quality, safety, scope and project costs. The proper balance results in the maximum value for the project.

Vanpool—Pace's VIP (Vanpool Incentive Program) is a service where a group of 5 to 15 people commute to and from work together in a Pace-owned van.

Supplemental Data

National Economic Projections

The Gross Domestic Product (GDP) is the value of the output of goods and services produced by labor and property located in the United States. Exhibit 10-3 highlights the annual real GDP growth from 2008 through 2013 (projected). GDP grew 1.9% in 2008 and then fell 2.2% in 2009 with the onset of the recession. GDP growth began to bounce back in 2010, increasing by 3.8% over prior year. GDP growth continued in 2011 and 2012, increasing by 4.0% in both years. The Congressional Budget Office (CBO) expects GDP growth to be sluggish in 2013, increasing by 1.4%.

Exhibit 10-4 shows the U.S. annual unemployment rate from 2008 through 2013. In 2008, the annual average unemployment rate was 5.8%. The national unemployment rate climbed sharply in 2009 to 9.3% and increased an additional 0.3 percentage points to 9.6% in 2010. The unemployment rate fell 0.7 percentage points in 2011 to 8.9% and decreased again in 2012 to 8.1%. Unemployment is expected to be 7.9% in 2013, according to the CBO.

Exhibit 10-5 shows the annual growth of the U.S. Consumer Price Index (CPI) from 2008 to 2013. The CPI experienced annual growth of 3.8% in 2008 and then decreased sharply in 2009 to negative 0.4%. Positive growth returned in 2010 and the CPI rose 3.2% in 2011. CPI growth slowed in 2012 to 2.1% and is expected to slow further in 2013 to 1.6%. This is consistent with CBO's overall projection of slower economic growth in 2013.

RTA Region

The following sections summarize population and employment trends in the six-county RTA region. These trends have a significant impact on public transportation ridership, as well as sales tax revenue.

POPULATION

As shown in Exhibit 10-6, the population of the RTA region grew by 3.1% (from 8.1 million to 8.4 million) between 2001 and 2011. Population growth in the RTA region grew at a slower pace than the overall population of the United States, which increased by 9.3% during this period.

Since 2001, most of the region's population growth has occurred in the collar counties. Exhibit 10-7 illustrates the annualized population growth rates for each of the region's six counties between 2001 and 2011. The highest growth rate occurred in Will County, where the population has increased at an annual

Source: United States Census Bureau

rate of 3.3%. The population of Kane and McHenry counties grew at annual rates of 2.8% and 1.0%, respectively, while the population of Lake and DuPage counties increased at annual rates of 1.9% and 0.2%, respectively. Cook County experienced a population decline at an annual rate of 0.3%. During the 10-year period, the population of the entire RTA region grew at an annual rate of 0.3%.

In 2011, Cook County accounted for 62.4% of the 8.4 million people living in the RTA region. DuPage County's population comprised 11.0% of the region, followed by Lake County (8.4%) and Will County (8.2%), Kane County (6.2%), and McHenry County (3.7%). The population distribution for 2011 is illustrated in Exhibit 10-8.

EMPLOYMENT

Suburban jurisdictions have led the region in labor force growth since 1990. This growth has intensified over the last decade as more jobs relocated out of Cook and into the collar counties. Employment in the five collar counties accounted for 36.3% of the RTA regions total in 2001 and 39.6% in 2011. Cook County, which accounted for 63.7% of the region's employment in 2001, accounted for 60.4% of employment in 2011. At the same time, regional employment has increased from 4.26 million in 2001 to 4.27 million in 2011, a difference of only 0.2% (Exhibit 10-9).

The trends in employment by economic sector in the RTA region are illustrated in Exhibit 10-10. The Manufacturing sector experienced the greatest loss during the 2001 to 2011 period while the Health Care and Social Assistance sector experienced the greatest increase in employment. In 2011, Health Care and Social Assistance (11.2%), Retail Trade (9.2%), State and Local Government (9.1%), Professional and Business Services (8.0%), and Manufacturing (7.7%) made up the largest share of employment in all industries.

The RTA region has experienced steady growth in per capita personal income. Within the region, per capita personal income was higher than the US average in Cook, DuPage, and Lake Counties. Lake and DuPage had the highest levels of per capita personal income

Source: US Bureau of Economic Analysis

in the six county region in 2011, while Kane and McHenry had the lowest, as illustrated in Exhibit 10-11.

Despite the growth in per-capita income in the region, unemployment remains high in contrast to the US unemployment rate, which continues to improve. Exhibit 10-12 provides a comparison of the national unemployment rate, the unemployment rate in the State of Illinois, and the unemployment rates in each of the counties of the RTA region from 2009 to 2013. The unemployment rates for the six counties in the RTA region are presented on a non-seasonally adjusted basis, as seasonally adjusted data are not available.

Exhibit 10-12: **Unemployment Rates 2009-2013** (in percent)

	2009	2010	2011	2012	2013*
United States	9.3	9.6	8.9	8.1	7.9
Illinois	10.0	10.4	9.7	8.9	9.0
County					
Cook	10.3	10.5	10.4	9.8	10.1
DuPage	8.4	8.3	8.0	7.6	8.0
Kane	10.3	10.3	9.9	10.3	10.6
Lake	9.8	10.5	9.4	10.7	10.5
McHenry	9.7	9.6	9.4	9.5	9.7
Will	10.1	10.4	10.1	10.2	10.5

*based on January 2013 data

Between 2009 and 2012, the unemployment rate in Illinois decreased from 10.0% to 8.9%. The unemployment rate in Illinois reached a high of 10.4% in 2010, which was 0.8 percentage points higher than the national unemployment rate of 9.6%. In 2011 and 2012, Illinois began showing signs of modest recovery with the annual average dropping to 8.9% in 2012. In January 2013, the state unemployment rate increased to 9.0%, 1.1 percentage points higher than the national average of 7.9%. In the six county RTA region, the unemployment situation remained bleaker. On a non-seasonally adjusted basis, Cook, Kane, Lake, and Will Counties had unemployment rates higher than 10.1%. Kane County had the highest unemployment rate at 10.6% in January 2013. DuPage and McHenry Counties had lower unemployment rates at 8.0% and 9.7%, respectively.

SALES TAX TRENDS

In April 2008, the RTA sales tax increased from the equivalent of 1% on retail sales in Cook County and 0.25% on retail sales in the collar counties to the equivalent of 1.25% on retail sales in Cook County and 0.5% on retail sales in the collar counties. Also in 2008, a real estate transfer tax of 0.3% was imposed in the City of Chicago to fund the CTA. Sales tax collec-

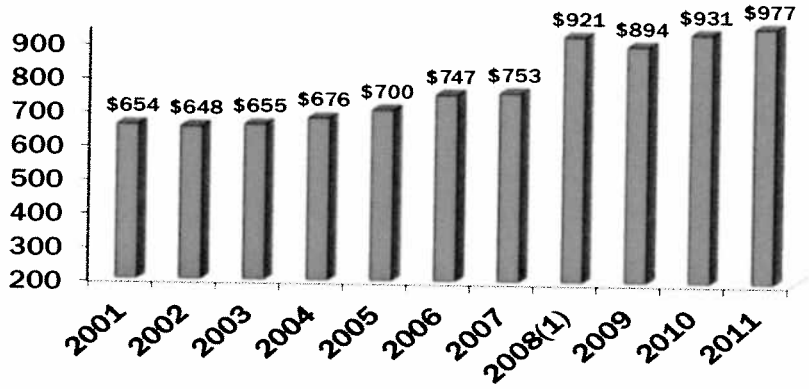
(1) In April 2008 legislation was enacted that modified and increased the percentage of sales tax collected in the region.

Exhibit 10-14: **Sales Tax Collections 2001-2011** (in millions)



tions grew from $654 million in 2001 to $977 million in 2011. Between 2001 and 2003, sales tax collections fluctuated between $654 and $655 million. From 2004 to 2007, sales tax collections increased from $676 million to $753 million. In 2008, sales tax collections increased by 22.4% to $921 million, due to the April 2008 sales tax increase. In 2009, largely due to the economic recession, the sales tax collections decreased by 3.0%. However, sales tax increased by 4.1% in 2010 to $931 million, exceeding sales tax collections from 2008, and increased an additional 4.9% in 2011 (Exhibits 10-13 and 10-14).

RIDERSHIP TRENDS

Total RTA ridership in 2002 was 595.5 million, a decrease of 0.9% from 2001. Total RTA ridership also declined in 2003, falling 2.2% to 582.4 million rides. This decrease in ridership was consistent with the decline in the economy during the same period. Regional ridership changed little from 2003 to 2004 reflecting stagnant ridership on all three Service Boards. In 2005, however, all three Service Boards achieved significant ridership gains as the economy rebounded and gas prices climbed. Regional ridership continued to grow in 2006 and 2007. In 2008, ridership grew 5.1%, representing the largest percentage of growth in the past ten years. Record-breaking ridership levels in 2008 were followed by a significant decline in ridership in 2009 at all three Service Boards, as the recession grew worse and jobs declined. The system

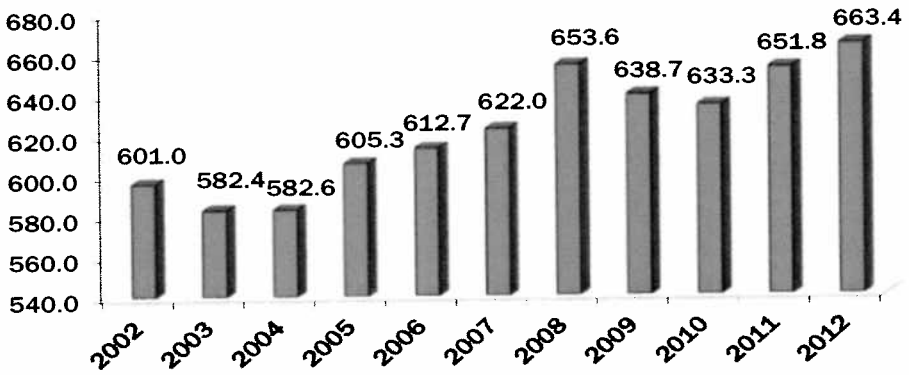
(1) CTA rail ridership includes rail-to-rail transfers.

(2) Prior to 2007, ADA Paratransit ridership is included in CTA Bus and Pace figures.

(3) After 2007, ADA Paratransit ridership is included in Pace figures only.

Exhibit 10-16: **RTA Ridership** (in millions)



continued to lose ridership in 2010, but at a much slower rate than in 2009. Ridership bounced back in 2011 to 651.8 million riders, just 1.1% below 2008 ridership levels. Preliminary results for 2012 put regional ridership at 663.4 million, 1.8% greater than in 2011 and higher than 2008 levels by 1.5% (Exhibits 10-15 and 10-16).

As shown in Exhibit 10-17, regional ridership trends closely with regional jobs. A correlation analysis of the 12 month moving average number of jobs, versus the 12 month moving average of ridership confirmed that there is a strong positive correlation between ridership growth and job growth during periods of increasing job growth. During times of job decline the results are more mixed, with a strong positive correlation occurring between January 2002 and January 2005, but no correlation was observed in the period between January 2008 and January 2012, where steep job declines occurred as a result of the financial crisis.

Regional fuel prices are also considered to have an impact on ridership. Potential riders are attracted to public transportation as increases in the cost of fuel make driving less economical. The average price for a gallon of gas in the region in 2012 was $3.64; $0.10 lower than in 2011, but still $0.71 higher than in 2010 (Exhibit 10-18).

OTHER TRENDS

Service Board Operating Expenditures (Exhibits 10-19 and 10-20) show a steady increase each year from 2002 to 2012. Expenditures increased at a compound annual growth rate of 4.3% during this period.

(1) Includes an estimated $5.1 million and $10.2 million of debt service expense in 2014 and 2015, respectively, associated with planned capital bond issues in 2013 and 2014. Further details are contained in Schedule II-A. (2) RTA working cash borrowing to fill shortfalls in funding provided by public subsidies to the Service Boards in 2011. Pursuant to Section 4.09 of the Act, the borrowing is projected to be repaid in 2013 with subsequent working cash borrowing. (3) Capital Cost of Contracting for rolling stock. (4) Unspecified revenue (fares, State or RTA funding sources) included in 2014 and 2015 to balance the budget.

Schedule I-C

Recovery Ratio

	2013 Marks	2013 Budget
CTA		
Recovery Ratio %	52.0%	63.0%
Metra		
Recovery Ratio %	53.0%	55.4%

1) CTA plans to issue $175 million of 30-year bonds in the second quarter of 2013 and $380 million of 30-year bonds in the fourth quarter of 2014. The debt service amounts noted on Schedule I-B and capitalized interest amounts above reflect the following assumptions: Interest rates of 3.93% and 4.30% on the 2013 and 2014 issues, respectively; capitalized interest in 2013, 2014, and 2015 in the amounts of $4.6 million, $2.8 million, and $18.8 million, respectively. Additional debt service associated with these issuances of $5.1 million and $10.2 million in 2014 and 2015, respectively, is included as operating expense in Schedule I-B.

MOVING BEYOND CONGESTION
WHERE THERE IS A WILL, THERE IS A WAY FORWARD.
RTA Annual Report 2006

"MOBILITY IS THE ECONOMIC ENGINE OF OUR REGION: IF OUR TRUCKS ARE STUCK ON THE HIGHWAYS, OUR COMPANIES ARE NOT MAKING MONEY."

"IF CURRENT BUS AND TRAIN SERVICES WERE SLICED BY 25%, TENS OF THOUSANDS MORE CARS WOULD OVERWHELM THE ROADS."

SUPPORT FOR

"IF WE REALLY WANT A WORLD-CLASS TRANSIT SYSTEM, THEN WE'RE GOING TO HAVE TO MAKE THE INVESTMENTS."

"PUBLIC TRANSPORTATION HAS NEVER BEEN MORE IMPORTANT THAN IT IS RIGHT NOW. QUITE SIMPLY, THERE IS NO GLOBAL WARMING SOLUTION WITHOUT A TRANSPORTATION SOLUTION."

"THE NEEDS ARE REAL, THE PROBLEMS ARE REAL."

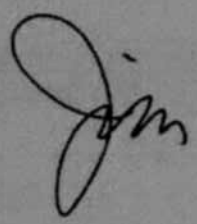
TRANSIT GROWS

"THERE'S NO QUESTION THAT THERE WOULD BE A STEEP DEGRADATION OF SERVICE WITHOUT FUNDING."

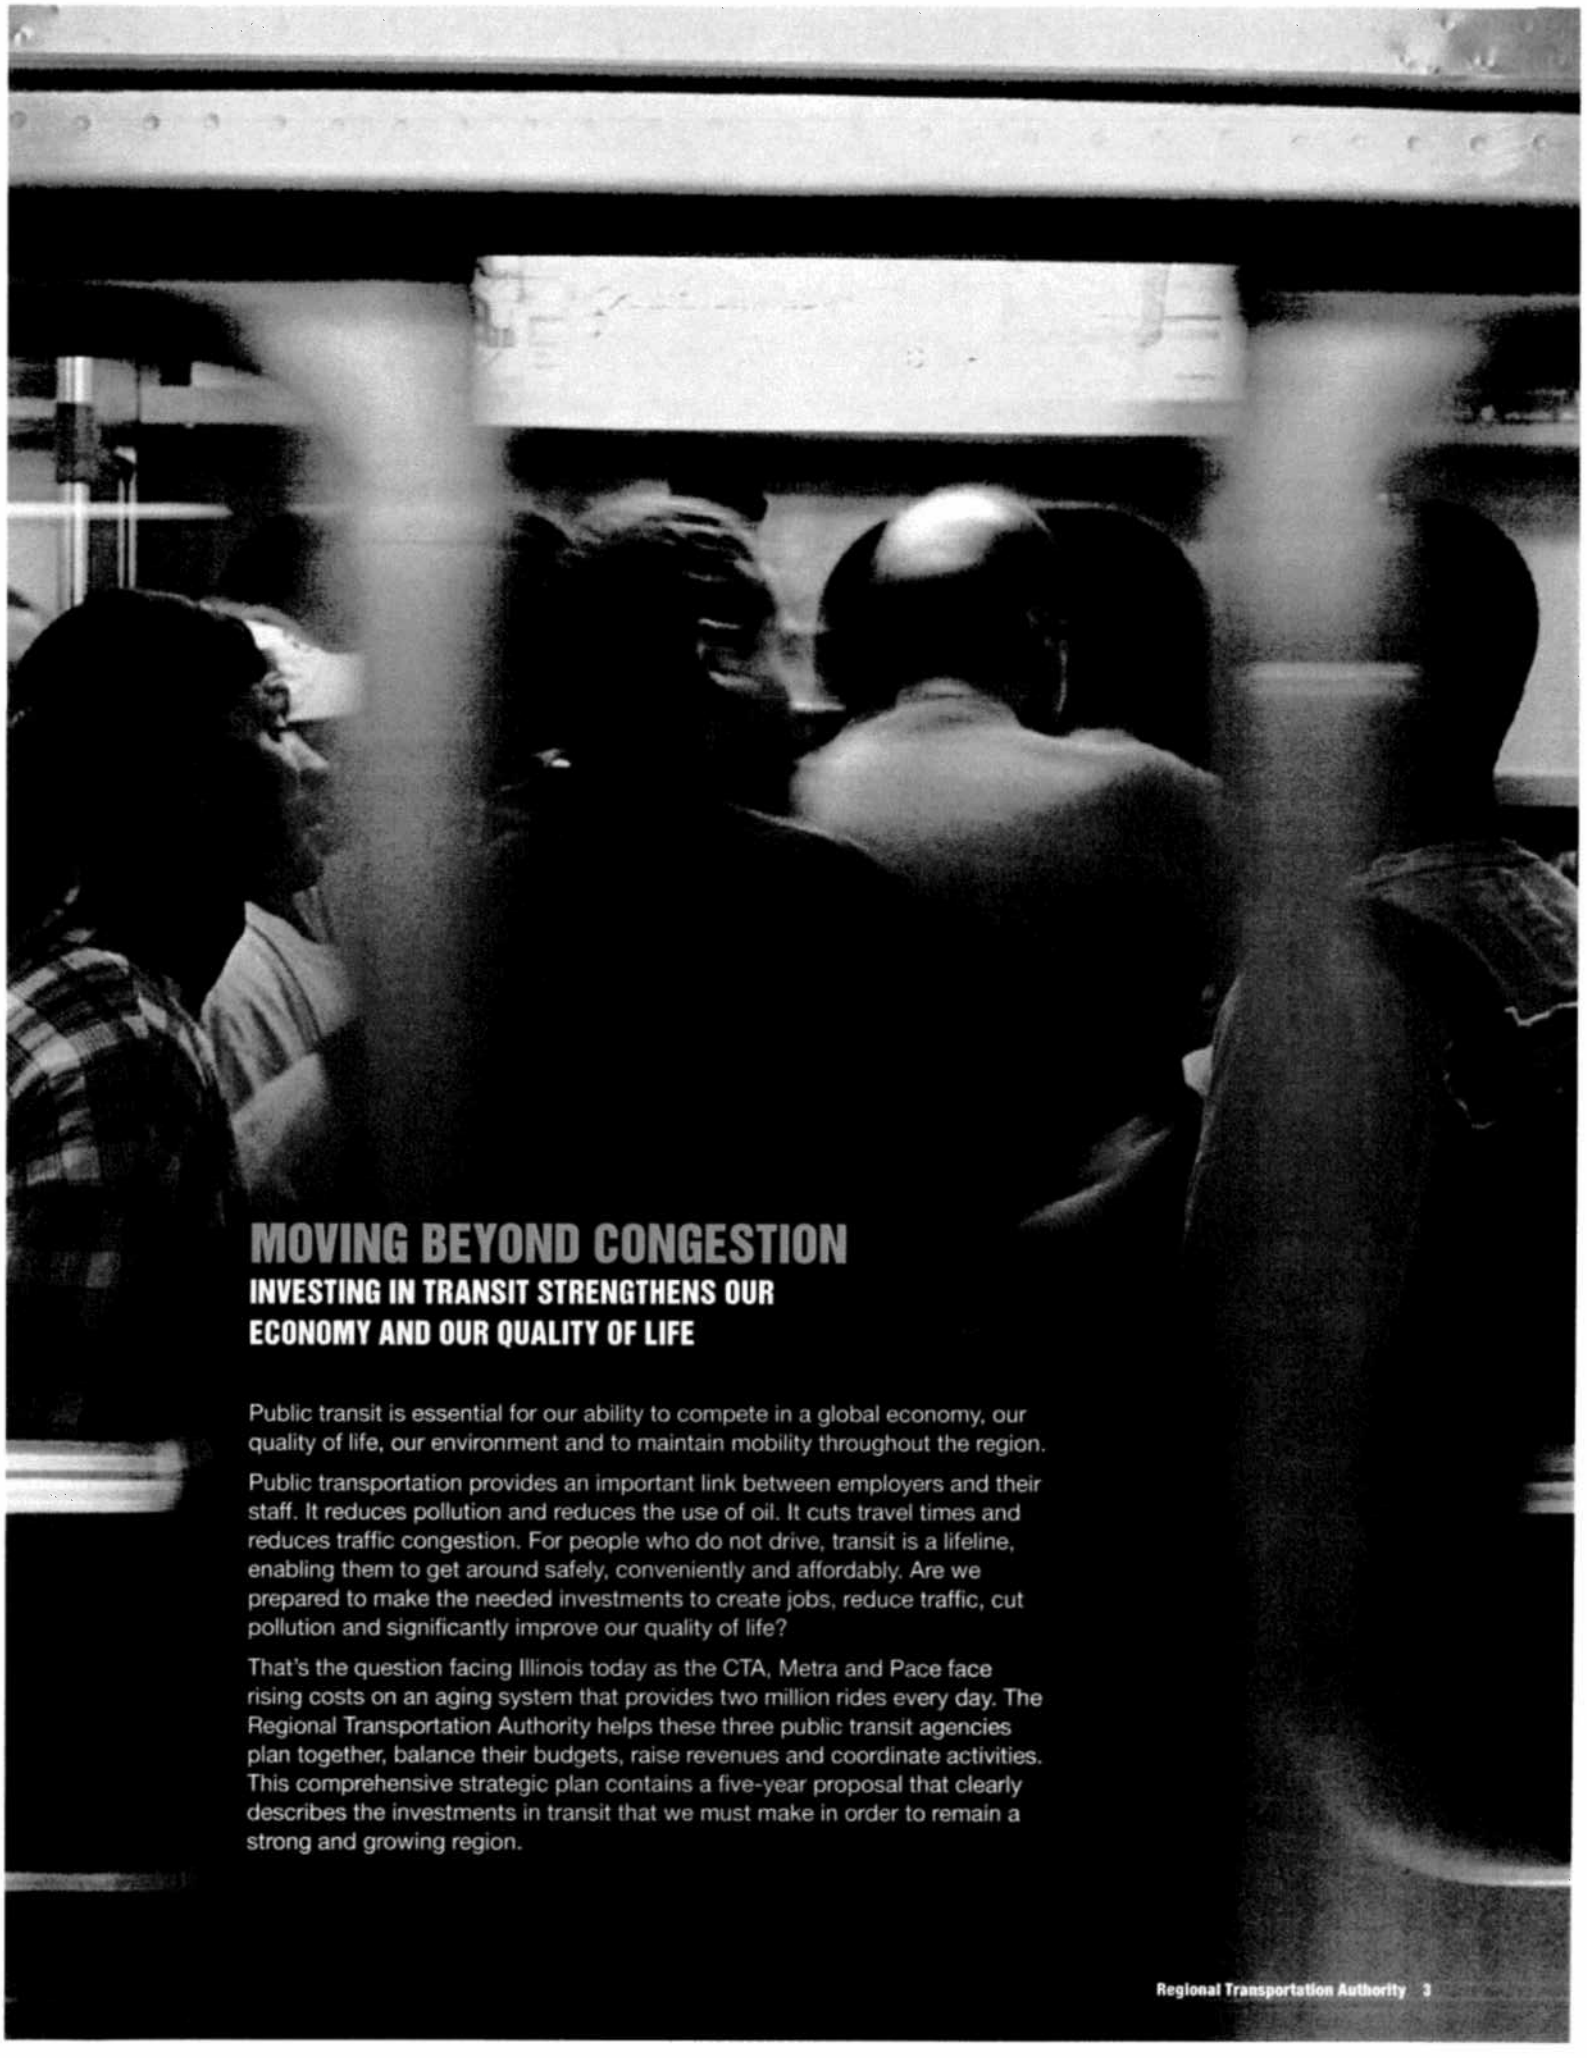
OUR TRANSIT SYSTEM AT A CROSSROADS

2007 IS THE YEAR OF DECISION. NORTHEASTERN ILLINOIS' REGIONAL TRANSIT SYSTEM REPRESENTS ONE OF OUR MOST IMPORTANT PUBLIC ASSETS, VALUED AT OVER $27 BILLION AND GENERATING AN ANNUAL ECONOMIC IMPACT OF MORE THAN $16 BILLION.

Sincerely,



Jim Reilly, Chairman
Regional Transportation Authority



MOVING BEYOND CONGESTION

INVESTING IN TRANSIT STRENGTHENS OUR ECONOMY AND OUR QUALITY OF LIFE

Public transit is essential for our ability to compete in a global economy, our quality of life, our environment and to maintain mobility throughout the region.

Public transportation provides an important link between employers and their staff. It reduces pollution and reduces the use of oil. It cuts travel times and reduces traffic congestion. For people who do not drive, transit is a lifeline, enabling them to get around safely, conveniently and affordably. Are we prepared to make the needed investments to create jobs, reduce traffic, cut pollution and significantly improve our quality of life?

That's the question facing Illinois today as the CTA, Metra and Pace face rising costs on an aging system that provides two million rides every day. The Regional Transportation Authority helps these three public transit agencies plan together, balance their budgets, raise revenues and coordinate activities. This comprehensive strategic plan contains a five-year proposal that clearly describes the investments in transit that we must make in order to remain a strong and growing region.

THE CHALLENGE:
an underfunded, aging system in a changing market

Our transit system includes more than 3,800 buses and vans and 2,300 train cars serving Chicago and hundreds of suburbs spread across six counties. Some parts of the system are newer and they work well. Other parts of the system are more than a century old and are in need of a major overhaul. Some of the busiest train and bus lines are so crowded during rush hour that people cannot board.

Many of our buses, trains and passenger vans are well past their useful life, leading to frequent breakdowns. At the same time, we have added needed new service in growing suburban communities and new transit options including ones for people with disabilities and senior citizens. Looking to the future, we want to enable people to transfer seamlessly between Metra, Pace and the CTA.

Jim Reilly, RTA Chairman, speaks at the Moving Beyond Congestion kickoff in July 2006, joined by Partners for Transit at Union Station.

NOW CONSIDER THESE FACTS:

Despite adding service, while the costs of fuel, security and employee health care and benefits have risen, the RTA and Service Boards have held operating expenses constant since 1986 (when controlling for inflation). The State of Illinois has historically supported public transit with hundreds of millions of dollars each year in capital funding.

No such funding has been provided since 2004. The challenge is made more complex because the agencies have been forced to divert limited capital dollars to help pay for operations. The 2007 budget contains a $226 million shortfall. Over the next five years, approximately $400 million more in annual operating funds are needed to keep our trains and buses running on time and address the growing demand for transit.

The region must invest an additional $10 billion in the next five years to replace older trains and buses, add service where it is critically needed and plan and design a transit system worthy of our reputation as one of the great metropolitan regions of the world. Over the next 30 years, $57 billion must be invested throughout the region in order to create the public transit system northeastern Illinois really wants and needs to meet population projections, development patterns, travel demands and air quality goals.

OUR FIVE-YEAR INVESTMENT LAYS THE FOUNDATION FOR THE FUTURE

Numbers like these are overwhelming until you see what is behind them, so here's what the five-year plan means for you. We divide our capital investments into three categories:

MAINTAIN– Repairs and upgrades that keep our existing systems in good working order so that there are fewer delays and other problems.

ENHANCE– Fewer capital-intensive projects, such as adding reverse commute options and suburb-to-suburb connections.

EXPAND– New train and bus routes requiring major investments that will be completed in the near future.

Maintain $7.3 billion:
The vast majority of funds in the program are dedicated to repairing and upgrading our current system.

ROLLING STOCK– To modernize the fleet, funds are needed to replace aging trains, buses and vans that are beyond their useful life.

TRACK AND STRUCTURE– Train tracks, railroad ties, bridges and viaducts need repairs. Metra has 1,200 miles of track and 800 bridges; CTA has hundreds of miles of track – above ground and below ground as well as over 100 bridges or viaducts. To speed travel times and avoid slow zones, we need to invest in order to fix rails and ties, bridges and structure and repairing signals, electrical systems and communications.

PASSENGER AND SUPPORT FACILITIES AND EQUIPMENT– Significant funds are needed to improve train stations and parking lots serving riders, as well as repair facilities for trains and buses both in the city and the suburbs.

Enhance $1.1 billion:
As the travel market changes, so do the demands on the system, warranting over $1 billion in added service throughout the system.

OFF-PEAK AND WEEKEND SERVICE– While the weekday commuter is the biggest segment of the market, more and more people are using transit outside the rush hours and all three agencies are under pressure to serve this growing demand.

FASTER SERVICE AND MORE SEATS– Both commuters and non-commuters want faster service, less crowding and more seats and that requires more drivers and more buses and trains.

Vans and vanpools are an increasingly popular public transit option for people with disabilities, seniors, and people living in low-density communities. Demand rose 22% since 1980 and will climb higher as baby boomers retire.

MORE REVERSE COMMUTING OPTIONS– One look at outbound highways in the morning shows growth in reverse commuting. Service options include shuttle buses from suburban train hubs to job centers and express bus routes.

SUBURB-TO-SUBURB– With six of the top 10 cities in the state located in the collar counties, inter-suburban travel is on the rise. Pace is looking at new services to meet this growing market.

PASSENGER EFFICIENCIES– Providing better customer information, easier transfers between trains and buses, coordinated schedules and better pedestrian connections are among a broad range of improvements.

Expand $1.6 billion:
Eleven major suburban and city projects are currently in the planning or design phase, 15 more in the proposal phase, and another two dozen projects have been suggested by various transit advocates and community leaders. Together these projects represent a solid return on our investments because local funds are often matched with federal dollars, making our money go further. These projects offer a bold and exciting vision for public transit in the coming decades.

FUNDING:
the wisdom and the will to invest

Capital: Billions in federal dollars are available each year for public transit projects. State and local governments must compete for these dollars by providing matching funds. The State of Illinois has provided no capital funds for transit since 2004. The strategic plan has identified a need for $10 billion in new capital funding over the next five years.

Operating: The RTA has also identified a need for $400 million in new operating funds annually for the next five years to improve current services and meet new demand.

CONCLUSION:
our future is at stake

We are engaged in an open, honest and vigorous debate on the subject of transit investments and funding. We encourage everyone who cares about our quality of life, our economy and our long-term health to continue to participate. We live, work and play in a highly mobile society. If we want it to grow and meet our future needs, now is the time to invest in public transit.

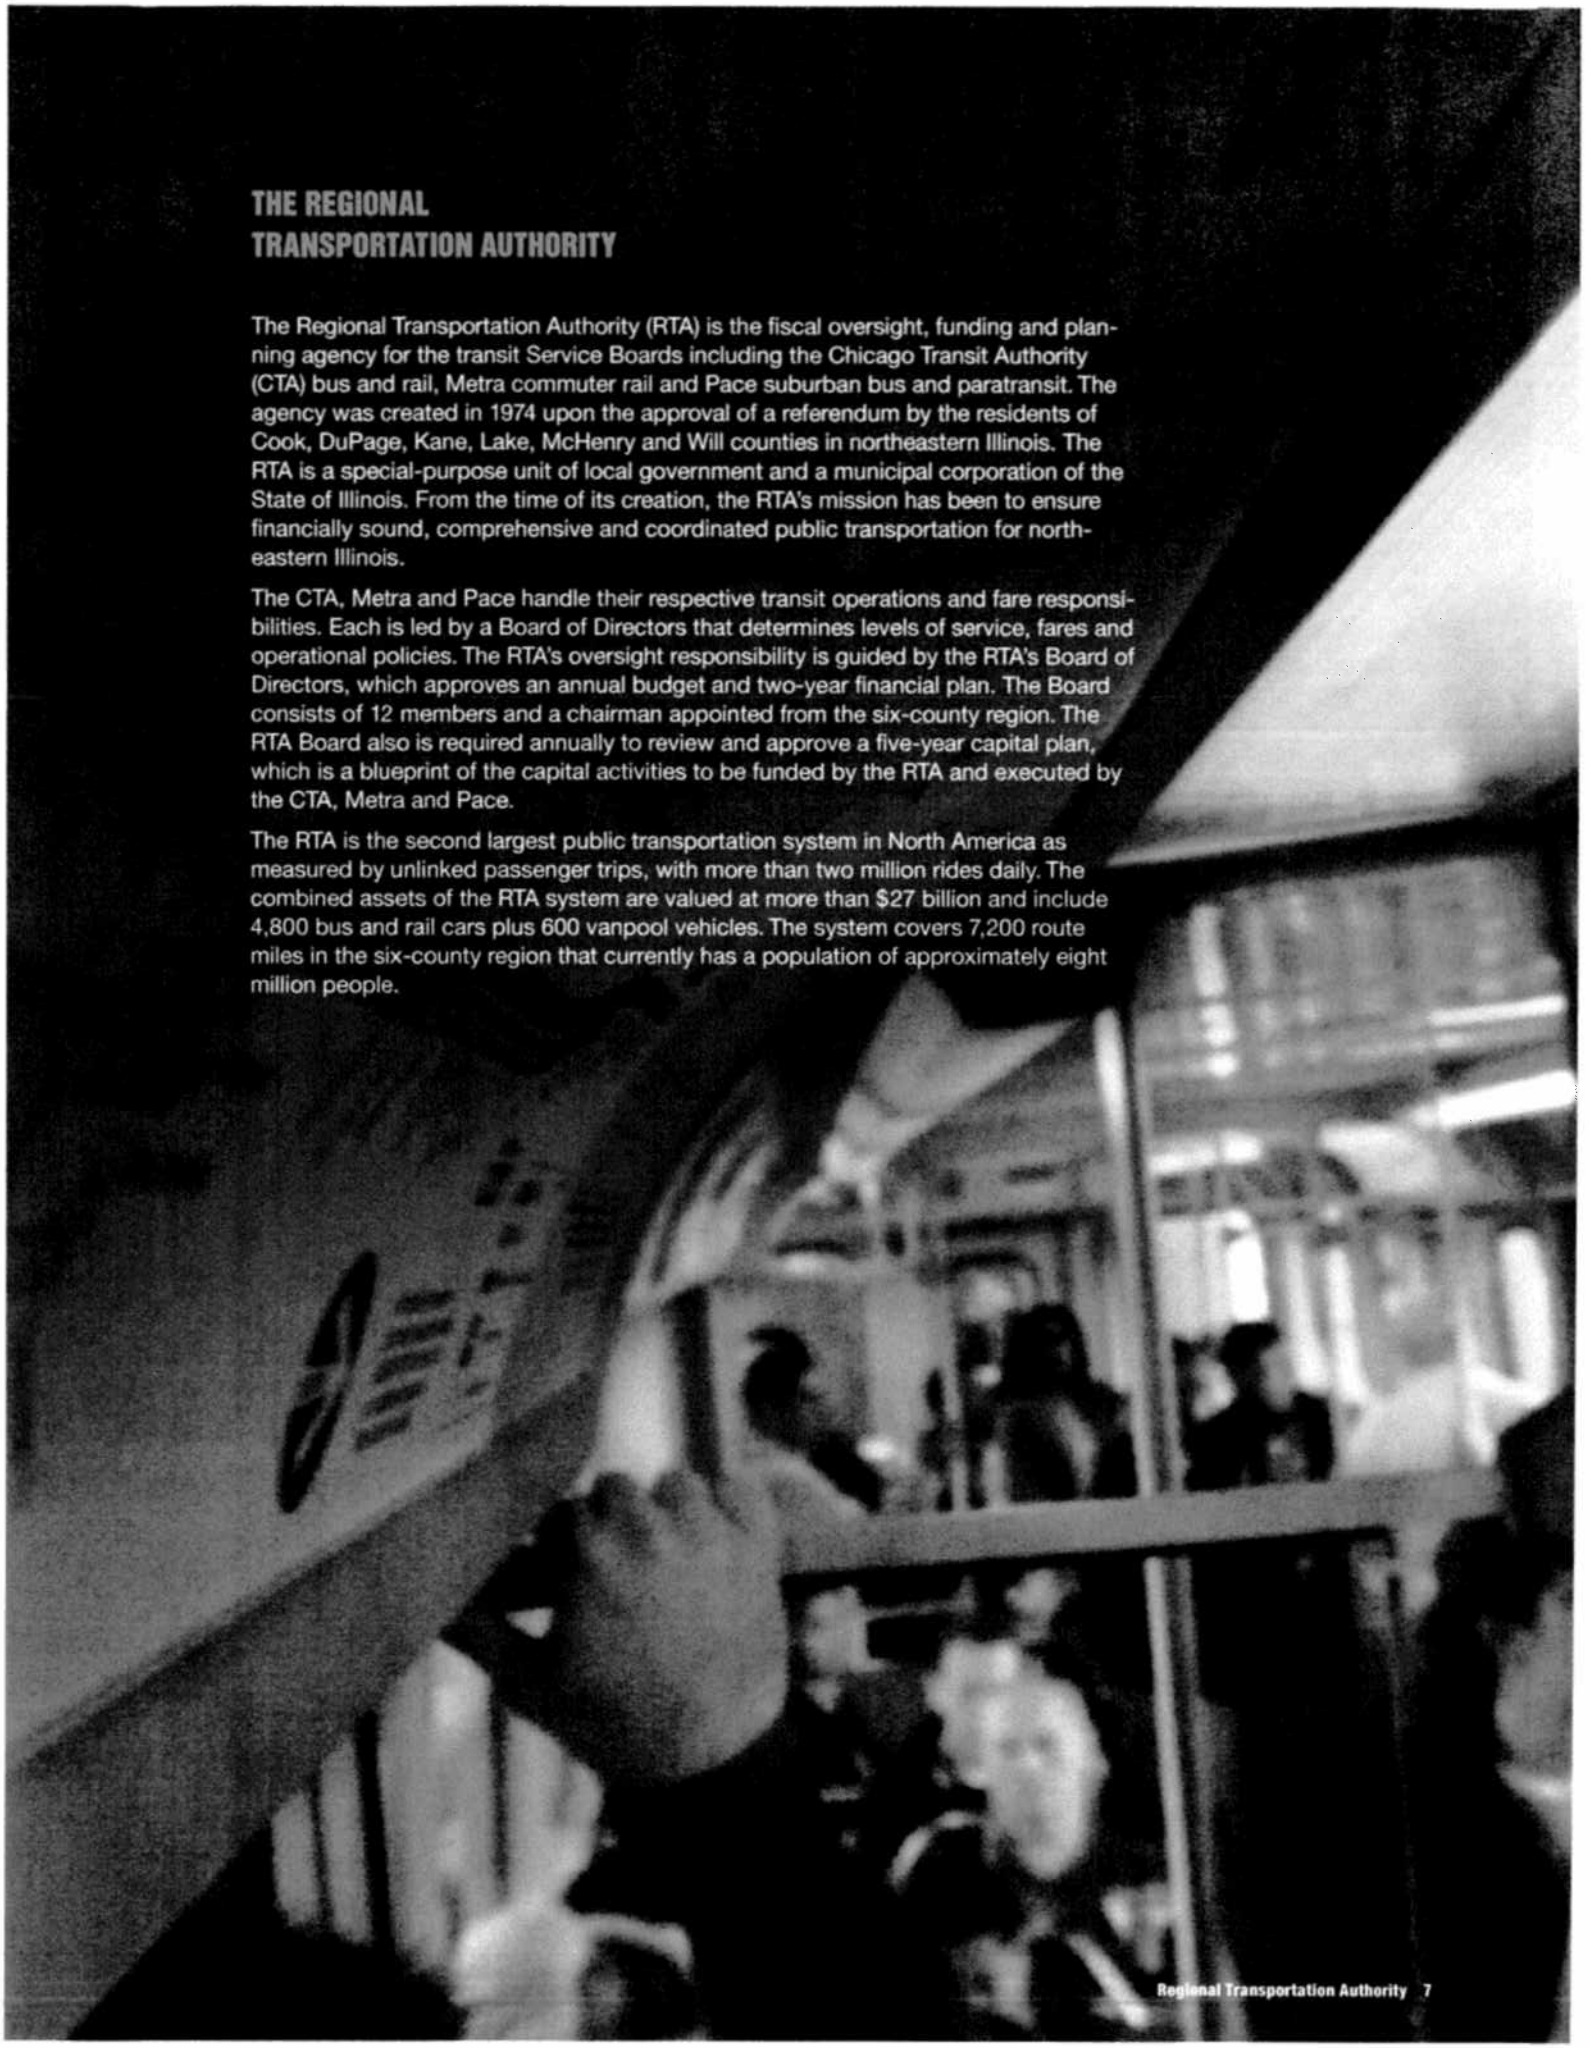
From the central city to the farthest suburbs, the Chicago region is poised for growth. At the heart of this vision is a modern, efficient public transit system that will leverage our economic assets and improve our quality of life.

THE REGIONAL TRANSPORTATION AUTHORITY

The Regional Transportation Authority (RTA) is the fiscal oversight, funding and planning agency for the transit Service Boards including the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail and Pace suburban bus and paratransit. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties in northeastern Illinois. The RTA is a special-purpose unit of local government and a municipal corporation of the State of Illinois. From the time of its creation, the RTA's mission has been to ensure financially sound, comprehensive and coordinated public transportation for northeastern Illinois.

The CTA, Metra and Pace handle their respective transit operations and fare responsibilities. Each is led by a Board of Directors that determines levels of service, fares and operational policies. The RTA's oversight responsibility is guided by the RTA's Board of Directors, which approves an annual budget and two-year financial plan. The Board consists of 12 members and a chairman appointed from the six-county region. The RTA Board also is required annually to review and approve a five-year capital plan, which is a blueprint of the capital activities to be funded by the RTA and executed by the CTA, Metra and Pace.

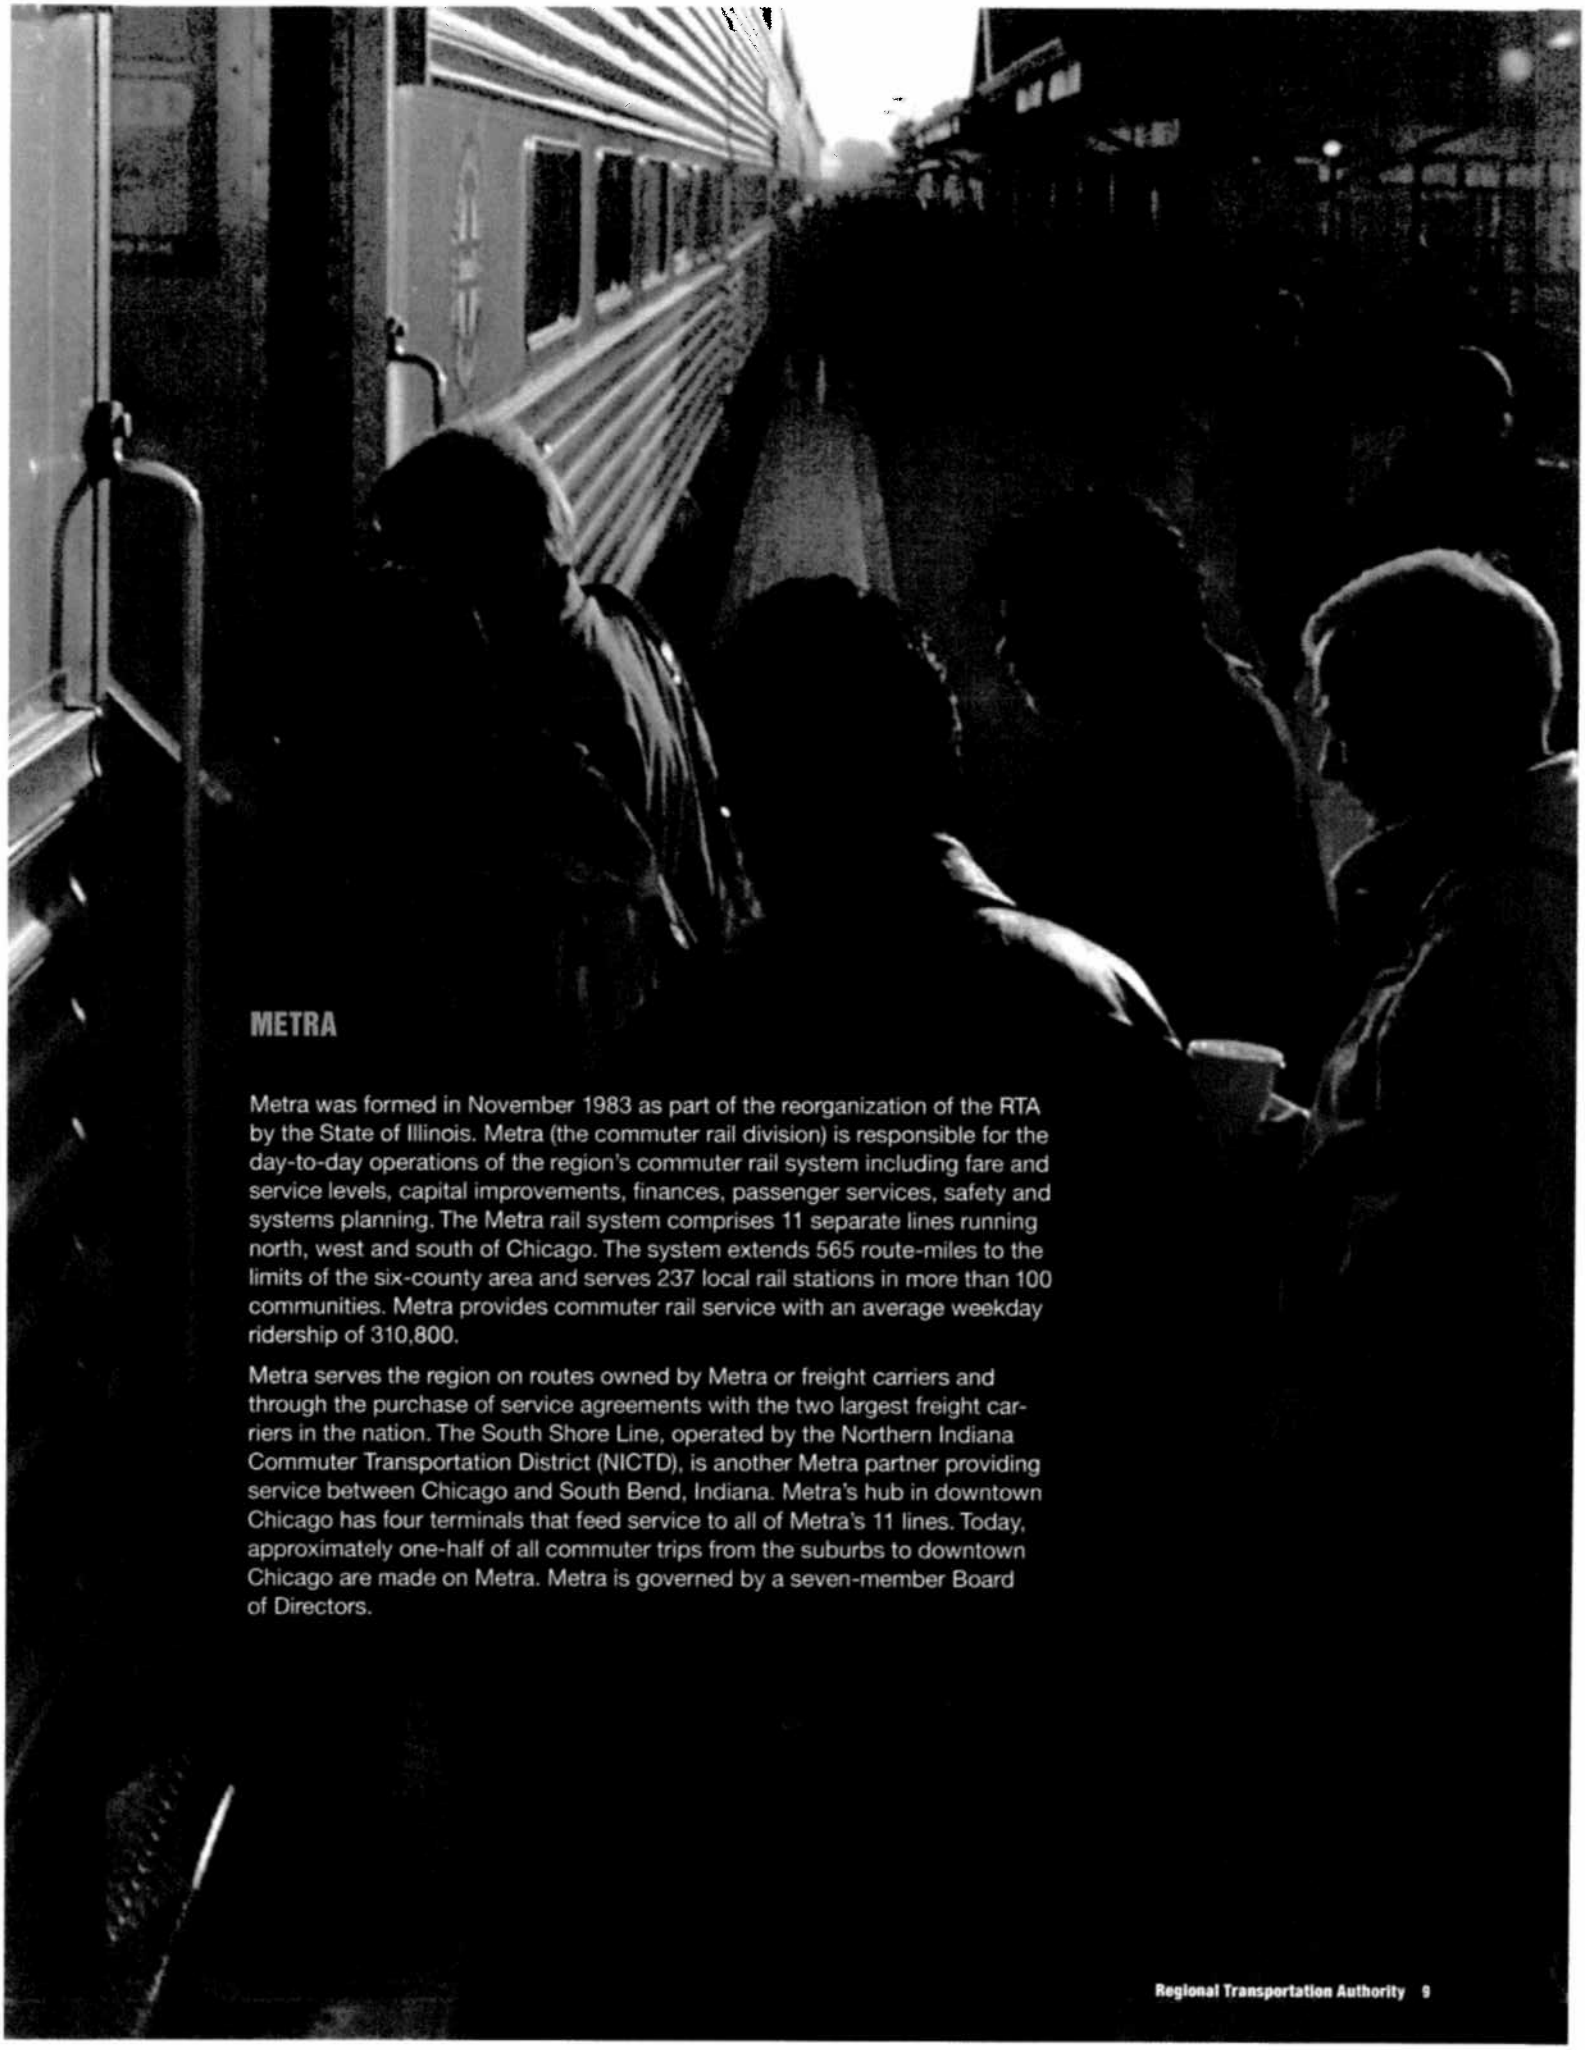
The RTA is the second largest public transportation system in North America as measured by unlinked passenger trips, with more than two million rides daily. The combined assets of the RTA system are valued at more than $27 billion and include 4,800 bus and rail cars plus 600 vanpool vehicles. The system covers 7,200 route miles in the six-county region that currently has a population of approximately eight million people.



THE CHICAGO TRANSIT AUTHORITY

The Chicago Transit Authority (CTA) was created by the Illinois General Assembly in 1945 and began operations in 1947. It became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator, providing service on 154 bus routes and eight rapid transit routes.

The CTA operates the second largest public transportation system in the U.S. Average weekday ridership on its bus and rail system is 1.6 million. The CTA's service area encompasses 220 square miles in the City of Chicago and 35 surrounding suburbs. Bus operations provide 2,106 buses traveling over 154 routes covering 2,529 miles, with approximately 11,846 bus stops. Rail service on eight routes has 1,190 train cars traveling over 288 miles of track. The CTA is governed by the seven-member Chicago Transit Board.



METRA

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra (the commuter rail division) is responsible for the day-to-day operations of the region's commuter rail system including fare and service levels, capital improvements, finances, passenger services, safety and systems planning. The Metra rail system comprises 11 separate lines running north, west and south of Chicago. The system extends 565 route-miles to the limits of the six-county area and serves 237 local rail stations in more than 100 communities. Metra provides commuter rail service with an average weekday ridership of 310,800.

Metra serves the region on routes owned by Metra or freight carriers and through the purchase of service agreements with the two largest freight carriers in the nation. The South Shore Line, operated by the Northern Indiana Commuter Transportation District (NICTD), is another Metra partner providing service between Chicago and South Bend, Indiana. Metra's hub in downtown Chicago has four terminals that feed service to all of Metra's 11 lines. Today, approximately one-half of all commuter trips from the suburbs to downtown Chicago are made on Metra. Metra is governed by a seven-member Board of Directors.

PACE

Pace was formed in 1983 as part of the reorganization of the RTA and began service in 1984. Last July, Pace assumed operating responsibility for all para-transit service in the RTA region.

Pace's mission is to provide efficient, well-integrated transportation services that meet the travel needs of the suburban Chicago area. Effective suburban mobility supplies line-haul and community-based services that provide access between both nearby and distant origins and destinations. To attract riders in an automobile-oriented market requires coordination of infrastructure, service, information and travel demand. Achieving this mission will also require the continued restructuring of Pace's current fixed-route service.

Pace's suburban service area measures 3,446 square miles. The suburban area is divided among the six counties and incorporates 270 municipalities. Transportation needs in this broad area are as unique as the individual communities Pace serves. Pace service includes approximately 160 regular routes, 55 feeder routes, 630 vanpool vehicles, 365 Pace-owned Dial-A-Ride para-transit vehicles, and various subscription, seasonal and shuttle routes.

Pace is governed by a 12-member Board of Directors made up of current and former village presidents and mayors.

Board of Directors
Regional Transportation Authority
175 West Jackson Boulevard, Suite 1550
Chicago, Illinois 60604

I have the pleasure to submit to you the Combining Financial Statements Report for the Regional Transportation Authority, the Chicago Transit Authority, the Commuter Rail Division and the Suburban Bus Division for the year ending December 31, 2006. This Report fulfills the requirements of section 4.05 of the RTA Act. This Report represents the operations of our transit system in the aggregate and not as individual components. It shows the magnitude of the resources on hand and in use for public transportation in the northeastern Illinois region. The RTA's independent accountants have compiled the Combining Financial Statements Report. They have not subjected these statements to audit. The audited financial statements of each individual organization are available upon request. As always, the RTA staff acknowledges the commitment by the RTA Board and the Service Boards to fiscal responsibility, to ensure financially sound public transportation in northeastern Illinois.

Joseph G. Costello
Senior Deputy Executive Director
Finance & Administration
Regional Transportation Authority

June 15, 2007

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have compiled the accompanying special-purpose combining financial statements of the Regional Transportation Authority and Service Boards as of December 31, 2006, and for the year then ended, and the supplementary and statistical information, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting information that is the representation of management in the form of financial statements and supplementary and statistical information. We have not audited or reviewed the accompanying special-purpose combining financial statements and supplementary and statistical information and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying special-purpose financial statements and supplementary and statistical information were prepared for the purpose of complying with the statutory requirement of the Regional Transportation Authority Act as described in Note 1, and are not intended to be a presentation in conformity with accounting principles generally accepted in the United States of America.

See notes to special-purpose combining financial statements and independent accountants' compilation report.

1. BASIS OF ACCOUNTING

The accompanying special purpose combining financial statements are presented as required by the Regional Transportation Authority (RTA) Act (Act) and are not intended to be presented in accordance with accounting principles generally accepted in the United States of America. The special purpose combining financial statements are not in accordance with accounting principles generally accepted in the United States of America primarily due to the RTA and Service Boards using different bases of accounting and due to the omission of significant disclosures. The RTA and each individual Service Board receive a separate audit of their financial statements in accordance with accounting principles generally accepted in the United States of America. These individual statements describe the basis of accounting for each entity and contain the omitted disclosures.

Intergovernmental receivables, payables, revenues, expenses, and expenditures have been eliminated in the Combining Adjustments columns; however, there are some differences in these amounts reported in the stand-alone financial statements of the RTA and the Service Boards. These valid differences relate primarily to differences in timing in the recording of certain transactions. For purposes of these combining financial statements, such differences are recorded as combining adjustments to net assets.

The columns presenting the combined balances for the RTA and Service Boards are statutorily required and do not present financial position, results of operations, or cash flows in conformity with accounting principles generally accepted in the United States of America.

2. ORGANIZATIONAL STRUCTURE

RTA

The RTA was established in 1974 upon the approval of a referendum in its six-county Northeastern Illinois Region (Region). The operating responsibilities of the RTA are set forth in the Act. The RTA is a unit of local government, body politic, political subdivision, and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, in 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority (CTA) and two operating divisions of the RTA; the Commuter Rail Division (Metra) and the Suburban Bus Division (Pace), each having its own independent board. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA system as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. The Service Boards achieve their required recovery ratios by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA is responsible for monitoring the budgets and financial performance of the Service Boards.

CTA

The CTA was formed in 1945 pursuant to the Metropolitan Transportation Authority Act passed by the Illinois legislature. The CTA was established as an independent governmental agency (an Illinois municipal corporation) "separate and apart from all other government agencies" to consolidate Chicago's public and private mass transit carriers. The Chicago City Council has granted the CTA the exclusive right to operate a passenger transportation system within the City of Chicago.

Metra

The Northeast Illinois Regional Commuter Railroad Corporation (NIRCRC), a public corporation, was established in 1980 to serve as the RTA's commuter rail service. The RTA Act, as amended effective November 9, 1983, established the Commuter Rail Division (CRD) to operate commuter rail transportation services. Both the NIRCRC and the CRD act under the registered service mark known as "Metra."

Metra has the responsibility for policy making with respect to actual day-to-day operations, capital investments, finances, fare levels, and service and facilities planning for its operations. Metra is responsible for the administration of all commuter rail activities in the metropolitan Chicago area, including deficit funding, capital grant application, and administration activities. Metra is directly responsible for the operation and management of the Rock Island, Milwaukee Road, Metra Electric, Heritage Corridor, North Central Service, and Metra Southwest Service commuter lines.

Metra also provides commuter rail service under Purchase of Service Agreements (PSA) with Union Pacific Railroad, Burlington Northern Santa Fe Railway Company, and Northern Indiana Commuter Transportation District. Under these agreements, Metra funds the commuter-related operating deficits (as defined) or is entitled to receive the commuter-related operating surpluses (as defined) of these carriers. In addition, Metra provides certain direct expenses such as fuel and insurance coverage considered to be "in-kind assistance." The title to the roadway and structure assets of the PSA carriers, other than capital improvements funded by federal and state agencies, the RTA, and Metra, is vested with the carriers. Accordingly, such assets are not reflected in these financial statements.

Pace

The RTA Act, as amended effective November 9, 1983, established the Suburban Bus Division (Pace) to operate suburban bus service within suburban Cook County and the five collar counties of DuPage, Kane, Lake, McHenry, and Will. The independent operations of Pace commenced on July 1, 1984.

Pace determines the level, nature, and kind of public transportation services that should be provided in the suburban region. Pace operates suburban bus services using stock, structures, and equipment purchased through capital grants funded by federal and state agencies and the RTA.

Reporting Periods

The RTA, CTA, Metra and Pace (the Combined Entities) all report on a calendar-year basis. All statements enclosed herewith are based on each entity's December 31, 2006 year-end.

3. REPORTING ENTITY

The RTA and each of the Service Boards have adopted the provisions of the Governmental Accounting Standards Board's Statement No. 14 (Statement No. 14), *The Financial Reporting Entity*.

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with governmental accounting and financial reporting standards in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure) and are accountable for fiscal matters including: ownership of assets, relations with federal and state transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.
- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors, who is also an RTA Board member.
- The Illinois statutes require the RTA Board to approve the budgets of the Service Boards, if such budgets meet specified system-generated revenue recovery ratios and other requirements as defined by the Act.
- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficit.

Accordingly, financial statements for the Service Boards are not included or combined with the RTA's financial statements under Statement No. 14. They are combined, however, in these Combining Financial Statements. Section 4.05 of the RTA Act requires that the RTA prepare a report combining "the audits of the Service Boards, and reviewing the state of the Authority, the Service Boards, and the public transportation agencies."

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Combined Entities conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting

The RTA maintains records using a fund accounting model consisting of a General Fund, Debt Service Fund, Capital Projects Fund, Proprietary Fund (Business-Type Activities), Agency Fund, and Pension Trust Fund. All Governmental Funds and the Agency Fund are accounted for using the modified accrual method of accounting (i.e., revenues are recognized when they become measurable and available, and expenditures are recognized when the related fund liability is incurred). The Proprietary Fund and the Pension Trust Fund are accounted for using the accrual method of accounting. For the purpose of these combining financial statements, all RTA funds have been combined.

The Service Boards are accounted for on a Proprietary Fund basis. Accordingly, the accrual method of accounting is utilized by the Service Boards. For purposes of these combining financial statements, the individual Service Board financial statements are combined with those of the RTA.

Cash and Cash Equivalents

All investments of the Combined Entities are recorded at fair market value, except short-term investments which are reported at cost or amortized cost that reasonably approximates fair market value.

For the purposes of the combining statements of cash flows, the Combined Entities consider all investments with original maturities of three months or less to be cash equivalents. Such amounts are included in the "Cash and Cash Equivalents" line items on the accompanying balance sheet.

Fixed Assets

All fixed assets are recorded at cost. Costs funded by Federal Capital Grants are recorded as capital items and are included in fixed assets. In calculating depreciation, the Combined Entities use the straight-line method. The estimated useful lives vary depending on the type of fixed asset. These useful lives range from more than one year to forty years.

Materials and Supplies

Each Service Board records its inventory at the lower of cost or market. The CTA and Metra use the average-cost method and Pace uses the first-in/first-out method to determine cost.

Compensated Absences

All four entities have recorded liabilities for vested vacation time in the year the time was earned. The entities account for compensated absences under GASB Statement No. 16, *Accounting for Compensated Absences*, whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability.

Revenues

The Combined Entities have five principal sources of revenue and other financial sources: (1) farebox revenue; (2) retailers' occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Taxes); (3) funds appropriated to the RTA by statute through the state's Public Transportation Fund (PTF) established under the RTA Act; (4) state or federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the RTA Act; and (5) investment income and other miscellaneous revenue.

Farebox Revenue

A major source of revenue to the Service Boards is fares collected from riders. Each Service Board has its own fare structure and method for collection of fares. Farebox revenue is recognized when fares paid are initially valid for transportation services.

Sales Tax

Sections 4.03 and 4.03.1 of the RTA Act, 70 ILCS 3615/4.03, authorizes the RTA to impose a series of taxes within the six-county metropolitan region by a vote of nine of its directors: a sales tax, a car rental tax, a motor fuel tax, an off-street parking tax, and a replacement vehicle tax.

The Act authorizes the RTA to impose a Retailers' Occupation Tax (ROT), a Service Occupation Tax (SOT) and a Use Tax (UT). The RTA imposed this tax at the maximum rate in 1979. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes.

The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 0.75% in Cook County and 0.25% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the

sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result the RTA tax on food and drugs is imposed at a rate of 1% throughout the six-county area.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate is identical to the ROT. The tax base is identical to the State service occupation tax base.

The UT is imposed on persons living in the six-county area for the privilege of using a vehicle purchased outside the six-county area that must be registered with the State. Unlike the State Use Tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed those portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State but registered or titled with a state agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the Replacement Fund). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a state agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the Reform Fund). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of the tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

SERVICE BOARD	COLLECTED WITHIN CHICAGO	COLLECTED WITHIN COOK COUNTY OUTSIDE CHICAGO	COLLECTED IN DUPAGE, KANE, LAKE, MCHENRY AND WILL COUNTIES
CTA	100%	30%	
Metra		55%	70%
Pace		15%	30%

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of the total sales taxes collected to which it is entitled by the amended Act. The remaining portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

Public Transportation Fund

In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the Public Transportation Fund (PTF), an amount equal to 25% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes). These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2007 fiscal year, which will end on June 30, 2007.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement

In the State's fiscal year 2006, which ended June 30, 2006, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation (IDOT) is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2006 and June 30, 2007, the grants were in the amount of $37 million each. The revenue is recognized on the modified accrual basis when the amount is requested from IDOT.

Additional State Assistance/Additional Financial Assistance

The State has authorized Additional State Assistance (ASA), which is supplemental financing for the RTA's Strategic Capital Improvement Program (SCIP) bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of

refunding or advance refunding SCIP bonds, less interest earned on the remaining bond proceeds, or (ii) $55 million per year. The RTA recognized $40 million of ASA in 2006.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance (AFA) to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million and $100 million in the State's fiscal year 2006 and 2007, respectively. The RTA recognized $73 million of AFA in 2006.

In accordance with the Act, earnings on certain investments in the Capital Projects Fund are credited to the Debt Service Fund. This is done to compensate for prior State fiscal year earnings reducing the actual ASA and AFA grant amounts.

Management's Use of Estimates

The preparation of financial statements in conformity with the Act requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

5. BUDGET AND BUDGETARY ACCOUNTING

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the general fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States, except for RTA capital expenditures and capital grants to Service Boards. The RTA capital expenditures and capital grants to Service Boards are budgeted on a project basis, which normally exceeds one year; and debt service payments, which are budgeted as transfers from the general fund. Budgets for RTA capital expenditures and capital grants to the Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax Agency Fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end. There was one budget amendment to the 2006 budget. The amendment (2006-38) amended the RTA budget and amended the Pace budget and program. Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations/expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from 85% of the sales tax receipts;
- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and
- The third source of funds credited against the budgeted funding amount is from RTA 15% of the sales tax receipts and other discretionary receipts.

The reimbursement of the Service Boards' capital expenditures and the payment of PTF funds, 15% funds, and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

6. LEASES

The RTA and CTA hold operating leases which are primarily for rent expense on the facilities they occupy. Metra has several operating leases, primarily for the use of passenger terminals. Pace has multi-year leases for vehicles and bus tires.

CTA

In 2003, the Public Building Commission of Chicago (PBC) issued revenue bonds for the benefit of the CTA in the amount of $119 million. The bonds were issued to pay costs associated with the acquisition of real property and construction of a building and facilities, including certain furniture, fixtures, and equipment. The real property, building and facilities, and all furniture, fixtures, and equipment are owned by the PBC and leased to the CTA for use as its headquarters.

On October 26, 2006, the PBC issued Building Refunding Revenue Bonds for the benefit of the CTA in the amount of $931 million. The proceeds of the bonds were used to advance refund the Public Building Commission of Chicago, Series 2003 bonds. The principal amount of the bonds refunded was $111 million.

The proceeds from the sale of the 2006 bonds are being held in escrow under an escrow refunding agreement and have been invested in United States Treasury obligations. The principal amount of such obligations, together with interest earned thereon, will permit the payment of principal and interest on the refunded bonds up to and including their respective call dates. The refunded bonds are treated in the financial statements as defeased obligations. Accordingly, neither the trust account assets nor the refunded bonds appear in the accompanying financial statements. This refunding decreased debt service payments over the next 27 years by approximately $388,000 resulting in an economic gain of approximately $20.4 million. Based upon the requirements of GASB Statement No. 23, *Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Accounts*, the CTA recorded a deferred amount (loss) on refunding of $2.4 million. This amount is recorded as a component of long-term debt in the accompanying balance sheets.

The new bonds are payable from and secured by the lease entered into between the PBC and the CTA and are considered a general obligation of the CTA payable from any lawfully available funds. Bond issue costs and premium related to this transaction are presented as such on the balance sheets. The present value of the future payments to be made by the CTA under the lease of approximately $91.3 million is reflected in the accompanying December 31, 2006 balance sheet as a capital lease obligation.

In 2003, the CTA entered into a lease/leaseback agreement with a third party pertaining to certain buses (lots 1 and 2), with a book value of $25.8 million as of December 31, 2006. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $23.6 million is reflected in the accompanying December 31, 2006 balance sheet as capital lease obligation.

During 2002, the CTA entered into two lease and leaseback agreements with a third party pertaining to certain buses (lots 1 and 2), with a book value of $42.1 million as of December 31, 2006. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $101.2 million is reflected in the accompanying December 31, 2006 balance sheet as capital lease obligation.

During 2002, the CTA entered into a lease and leaseback agreement with a third party pertaining to certain qualified technological equipment (QTE), with a book value of $28.6 million as of December 31, 2006. Under the QTE lease agreement, which provides certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $169.9 million is reflected in the accompanying December 31, 2006 statement of net assets as capital lease obligation.

During 1998, the CTA entered into a lease/leaseback agreement (1998 Agreement) with a third party pertaining to a rail line (Green Line), with a book value of $273 million as of December 31, 2006. The 1998 Agreement, which provides certain cash and tax benefits to the third party, also provides for a trust established by the CTA to lease the rail line to an equity investor trust (1998 Equity Trust), which would then lease the facilities back to another trust established by the CTA under a separate lease (1998 Lease). The present value of the future payments to be made by the CTA under the lease of approximately $277 million is reflected in the accompanying December 31, 2006 statement of net assets as capital lease obligation.

During 1997, the CTA entered into four lease/leaseback agreements (1997 Agreements) with a third party pertaining to certain of its facilities having a book value of $54.2 million as of December 31, 2006. The 1997 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (Equity Trust), which would then lease the facilities back to another trust established by the CTA under separate leases (Leases). The CTA received certain funds as prepayments by the Equity Trust. The funds have been deposited in designated investment accounts sufficient to meet the payments required under the Leases, and are recorded as assets restricted for repayment of leasing commitments. The Equity Trust has a security interest in the deposits to guarantee the payments due from the CTA and may take possession of the facilities upon a default by the CTA under the Lease. No other lease payments are required until the end of each lease. The present value of the future payments to be made by the CTA under the Leases (net of the payment due from the Equity Trust in 2023 and 2024) of approximately $30.2 million is reflected in the accompanying December 31, 2006 balance sheet as a capital lease obligation.

In connection with the 1997 Agreements, the CTA also received proceeds of $11.9 million. The Federal Transit Administration (FTA) has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1996, the CTA entered into similar lease/leaseback agreements (1996 Agreements) with a third party pertaining to certain of its facilities, with a book value of $57.5 million as of December 31, 2006. The 1996 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (1996 Equity Trust), which would then lease the facilities back to another trust established by the CTA under a separate lease (the 1996 Lease). The present value of the future payments to be made by the CTA under the leases (net of the payment due from the 1996 Equity Trust in 2024) of approximately $30.4 million is reflected in the accompanying December 31, 2006 balance sheet as a capital lease obligation.

In connection with the 1996 Agreements, the CTA also received proceeds of $10.9 million and agreed to make approximately $80.0 million of improvements to one of the facilities. The FTA has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1995, the CTA entered into sale/leaseback agreements (1995 Agreements) with third parties. The 1995 Agreements provided for the CTA to sell and lease back certain rail equipment totaling $487.1 million at cost for a period of 19 years beginning on the date of the respective transaction. As of December 31, 2006, the total payments due under the 1995 Agreements are recorded as capital lease obligations totaling $1.018 billion. The CTA has deposited funds into designated cash and investment accounts sufficient to meet all of its payment obligations throughout the terms of the leases, and recorded such amounts as assets restricted for repayment of leasing commitments.

The following table sets forth the aggregate amounts due under the sublease agreements:

Future minimum lease payments for capital leases due:

2007	$	111,020
2008		211,149
2009		95,772
2010		109,211
2011		99,210
Thereafter		2,416,434
Total future minimum payments	$	3,042,796
Less interest		(1,305,568)
Present value of minimum lease payments	$	1,741,828

The present value of all future payments to be made by the CTA under all its leases of approximately $1.7 million is reflected in the accompanying December 31, 2006 statement of net assets as capital lease obligations.

Metra

On September 18, 1998, Metra entered into a transaction to lease 174 railcars to three equity investors (headlease) and simultaneously

subleased the railcars back (sublease). Under these agreements, Metra maintains the right to use the railcars and is also responsible for their continued maintenance and insurance. Metra's sublease arrangements have been recorded as long-term obligations for accounting purposes. At closing, the railcars had a fair market value of approximately $296.9 million and a book value of $262.9 million. As part of the headlease agreements, Metra received prepayments equivalent to the net present value of the headlease obligations totaling approximately $274 million. Metra transferred approximately $177.4 million and $52.9 million of the prepayment proceeds to third parties in accordance with the terms of debt and equity payment undertaking agreements, respectively. These agreements constitute commitments by the debt and equity payment undertakers to pay Metra's sublease and buy-out options under the terms of the subleases. The debt payment undertaker and equity payment undertaker are finance companies. Both the debt payment undertaker and the equity payment undertaker have AA+ and Aa1 bond ratings from Standard & Poor's and Moody's respectively. Both finance companies' performance under the agreement guaranteed by their parent company, which carries the same ratings. In connection with the transaction, Metra recognized $43.7 million as leasehold revenue in 1998. The net present value of the future payments due under the subleases has been recorded as a liability on the accompanying balance sheet. Since the debt and equity payment undertaking agreements have been structured to meet all future obligations under the subleases, the related asset balances have been recorded to equal the sublease liabilities on the accompanying balance sheet.

The following table sets forth the aggregate amounts due under the sublease agreements:

Future minimum lease payments due:

2007	$	17,193,268
2008		25,239,685
2009		26,481,563
2010		20,947,382
2011		20,947,382
Thereafter		401,014,939
Total future minimum payments	$	513,824,219
Less imputed interest		(230,403,827)
Present value of minimum lease payments	$	283,420,392

The present value of minimum lease payments of the Metra lease is $283.4 million, which is reflected in the accompanying December 31, 2006 statement of net assets as capital lease obligations.

Pace

During 2003, Pace entered into two lease and leaseback agreements and realized a gain of $2.4 million from the proceeds. The transactions allowed Pace to earn up-front economic cash benefit for transferring ownership (not legal title) of a group of assets to a taxpayer that could take advantage of the benefits of tax ownership.

The first lease and leaseback agreement with a third party pertained to certain buses (lots 1, 2, and 3) with a book value of $35.7 million as of December 31, 2006. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $64.5 million and is reflected in the accompanying December 31, 2006 statement of net assets as the total of the current and long-term portions of capital lease obligation.

The second lease and leaseback agreement with a third party pertained to certain buses (lot 4) with a book value of $19.9 million as of December 31, 2006. Under the bus lease agreements, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $35.5 million and is reflected in the accompanying December 31, 2006 statement of net assets as the total of the current and long-term portions of the capital lease obligation.

The following table sets forth the aggregate amounts due under the sublease agreements:

Future minimum lease payments due:

2007	$	25,876,035
2008		
2009		
2010		
2011		1,438,538
Thereafter		124,399,915
Total future minimum payments	$	151,714,488
Less interest		(51,698,763)
Present value of minimum lease payments	$	100,015,725

The present values of the future payments including the purchase option to be made by Pace under these leases are approximately $74.1 million and $25.9 million, respectively, and are reflected in the accompanying December 31, 2006 statement of net assets as the total of the current and long-term portions of the capital lease obligation.

7. COMMITMENTS AND CONTINGENCIES

Each of the entities has various commitments that have arisen in the normal course of operations. None is expected to have a material adverse impact on its financial position as presented.

Each of the entities has also established liabilities for potential legal judgments to satisfy claims against the entity.

The RTA has also established a Loss Financing Plan to cover funding of losses incurred by the RTA and the Service Boards over certain established limits.

8. CASH AND INVESTMENTS

The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/0.01 et seq. Each of the Combined Entities has established its own investment policy which is in line with the State statute or, in some cases, more restrictive.

The Combined Entities have on hand, as of December 31, 2006, $610 million of cash and investments. Of this amount, $420 million is restricted for self-insurance and other damage reserve liabilities, debt service, health insurance claims, and capital projects. In addition, CTA, Metra, and Pace hold $2.44 billion of investments in other assets for employee pension benefits, damage liabilities, and capital lease obligations, which are recorded as other assets in the financial statements.

9. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	JANUARY 1, 2006	NEW ISSUES	CURRENT RETIREMENTS	DECEMBER 31, 2006
1990A	$ 60,795,000	$ -	$ -	$ 60,795,000
1991A	55,745,000	-	-	55,745,000
1992A* and 1992B	52,145,000	-	5,710,000	46,435,000
1994A* and 1994B	24,395,000	-	-	24,395,000
1994C* and 1994D	70,090,000	-	3,790,000	66,300,000
1997 Refunding	79,856,000	-	4,400,000	75,456,000
1999* Refunding	290,640,000	-	5,135,000	285,505,000
2000A*	244,270,000	-	4,480,000	239,790,000
2001A*	93,990,000	-	1,695,000	92,295,000
2001B Refunding*	34,470,000	-	1,485,000	32,985,000
2002A*	153,005,000	-	2,555,000	150,450,000
2002B	173,255,000	-	9,400,000	163,855,000
2003A*	255,440,000	-	4,130,000	251,310,000
2003B	147,645,000	-	2,435,000	145,210,000
2003C Refunding	13,315,000	-	3,115,000	10,200,000
2004A*	258,990,000	-	3,985,000	255,005,000
2005B Refunding	148,110,000	-	2,795,000	145,315,000
2006A*	-	250,350,000	-	250,350,000
Total	$2,156,155,000	$ 250,350,000	$ 55,110,000	$2,351,395,000

*Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2006, the total general obligation bonds payable of $2,351,395,000 are classified as current and long-term in the statement of net assets in the amounts of $59,135,000 and and $2,292,260,000, respectively.

Advance Refundings

On June 21, 1993, the RTA advance refunded a portion of its 1990A Series general obligation bond issue. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $20,350,000 of outstanding general obligation bonds (1990A Series) are considered defeased, and therefore have been removed from the financial statements.

On January 19, 1996, the RTA advance refunded a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $60,300,000 of outstanding general obligation bonds (1994B Series) and $75,605,000 of outstanding general obligation bonds (1994D Series) are considered defeased, and therefore have been removed from the financial statements.

On September 18, 1997, the RTA advance refunded a portion of its 1990A, 1991A, 1992B, and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $4,230,000 of outstanding general obligation bonds (1990A Series), $29,265,000 of outstanding general obligation bonds (1991A Series), $18,170,000 of outstanding general obligation bonds (1992B Series), and $47,465,000 of outstanding general obligation bonds (1993B Series) are considered defeased, and therefore have been removed from the financial statements.

On August 24, 1999, the RTA advance refunded a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation refunding bonds (1999 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $113,895,000 of outstanding general obligation bonds (1992A Series), $9,720,000 of outstanding general obligation bonds (1993A), $142,615,000 of outstanding general obligation bonds (1994A) and $21,955,000 of outstanding general obligation bonds (1994C) are considered defeased, and therefore have been removed from the financial statements.

On March 1, 2001, the RTA advance refunded a portion of its 1993A Series general obligation bond issues. The RTA issued $37,715,000 of general obligation refunding bonds (2001B Series). Proceeds from the issuance amounted to $40,437,798 which includes a premium of $2,554,206. The proceeds are to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $37,750,000 of outstanding general obligation bonds (1993A) are considered defeased, and therefore have been removed from the financial statements.

On May 1, 2003, the RTA advance refunded a portion of its 1993C Series general obligation bond issues. The RTA issued $19,055,000 of general obligation refunding bonds (2003C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2006, $19,150,000 of outstanding general obligation bonds (1993C) are considered defeased, and therefore have been removed from the financial statements.

On May 2, 2005, the RTA issued $148 million in General Obligation bonds with a variable rate which resets weekly to currently refund $144 million of outstanding 1996A Series bonds with an average interest rate of 5.5 percent. The net proceeds of $147 million (after payment of $892 thousand for issuance costs) were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust with an escrow agent to call the 1996A Series bonds June 1, 2005. As a result, the 1996A Series bonds are considered to be redeemed and the liability for those bonds has been removed from the government-wide statement of net assets. The current refunding resulted in a redemption premium of $2.9 million. The RTA completed the current refunding to reduce its total debt service payments with an estimated economic gain over the next 20 years of $2.1 million.

Debt Service Requirements

The "debt service requirements" set forth in the following tables represent payments due the trustee from the RTA, as required by the respective bond agreements.

1990 General Obligation Bonds

In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

The Series 1990A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 6.00% to 7.15% on November 1, 1990, and semiannually thereafter on May 1 and November 1 in each remaining year.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ -	$ 4,377,240	$ 4,377,240
2008		4,377,240	4,377,240
2009		4,377,240	4,377,240
2010	3,810,000	4,377,240	8,187,240
2011	4,085,000	4,102,920	8,187,920
2012 - 2016	25,290,000	15,654,960	40,944,960
2017 - 2020	27,610,000	5,142,600	32,752,600
Total	$ 60,795,000	$ 42,409,440	$ 103,204,440

1991 General Obligation Bonds

In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

The Series 1991A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 4.85% to 6.55% on May 1, 1992, and semiannually thereafter on November 1 and May 1 in each remaining year.

Debt service requirements on the 1991A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ -	$ 3,734,914	$ 3,734,914
2008		3,734,915	3,734,915
2009		3,734,915	3,734,915
2010		3,734,915	3,734,915
2011	-	3,734,914	3,734,914
2012 - 2016	23,390,000	15,743,660	39,133,660
2017 - 2021	32,355,000	6,783,750	39,138,750
Total	$ 55,745,000	$ 41,201,983	$ 96,946,983

1992 General Obligation Bonds

In June 1992, the RTA issued $198 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1992A and 1992B Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 9.00% on December 1, 1992, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1992A and 1992B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 6,250,000	$ 3,225,410	$ 9,475,410
2008	6,840,000	2,636,360	9,476,360
2009	7,480,000	1,991,960	9,471,960
2010		1,396,960	1,396,960
2011	-	863,040	863,040
2012 - 2022	25,865,000	293,760	26,158,760
Total	$ 46,435,000	$ 10,407,490	$ 56,842,490

1994 General Obligation Bonds

In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00%, on December 1, 1994, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$	$ 1,951,600	$ 1,951,600
2008		1,951,600	1,951,600
2009		1,951,600	1,951,600
2010		1,951,600	1,951,600
2011		1,951,601	1,951,601
2012 - 2024	24,395,000	9,795,799	34,190,799
Total	$ 24,395,000	$ 19,553,800	$ 43,948,800

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 4,095,000	$ 4,979,569	$ 9,074,569
2008	4,420,000	4,649,612	9,069,612
2009	1,500,000	4,420,213	5,920,213
2010	1,620,000	4,299,312	5,919,312
2011	1,750,000	4,168,725	5,918,725
2012 – 2016	21,460,000	17,698,676	39,158,676
2017 – 2025	31,455,000	4,313,844	35,768,844
Total	$ 66,300,000	$ 44,529,951	$ 110,829,951

1997 General Obligation Refunding Bonds

In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001–2002, in the aggregate amount of $4 million; Series 1991A Bonds, maturing November 1 in the years 2002–2006, 2008 and 2011, in the aggregate amount of $29 million; Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million; and Series 1993B Bonds, maturing June 1 in the years 2004 – 2009, 2013 and 2023, in the aggregate amount of $47 million.

The Series 1997 Refunding Bonds mature on June 1 over a twenty-six-year period and interest is payable at rates ranging from 4.00% to 6.00% on December 1, 1997, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1997A Refunding Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 4,625,000	$ 4,249,975	$ 8,874,975
2008	4,875,000	4,000,288	8,875,288
2009	5,155,000	3,724,463	8,879,463
2010	5,445,000	3,432,963	8,877,963
2011	5,750,000	3,125,100	8,875,100
2012 - 2016	16,445,000	12,689,688	29,134,688
2017 - 2021	23,910,000	6,533,100	30,443,100
2022 – 2026	9,250,000	490,500	9,740,500
Total	$ 75,455,000	$ 38,246,077	$ 113,701,077

1999 General Obligation Refunding Bonds

In August 1999, the RTA issued $299 million in General Obligation Bonds, Series 1999, to provide funds to refund, in advance of maturity, the RTA's outstanding Series 1992A Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $114 million; Series 1993A Bonds, maturing June 1 in the years 2009 and 2013, in the aggregate amount of $10 million; Series 1994A Bonds, maturing June 1 in the years 2006–2009, 2012, 2015 and 2024, in the aggregate amount of $143 million; and Series 1994C Bonds, maturing June 1 in the year 2025, in the aggregate amount of $22 million.

The Series 1999 Refunding Bonds mature on June 1 over a twenty-five-year period and interest is payable at rates ranging from 5.00% to 6.00% on December 1, 1999, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1999 Refunding Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 5,395,000	$ 16,196,637	$ 21,591,637
2008	5,665,000	15,920,137	21,585,137
2009	7,670,000	15,586,762	23,256,762
2010	8,065,000	15,163,144	23,228,144
2011	8,525,000	14,686,182	23,211,182
2012 – 2016	71,895,000	62,016,007	133,911,007
2017 – 2021	108,245,000	38,208,132	146,453,132
2022 - 2025	70,045,000	5,932,381	75,977,381
Total	$ 285,505,000	$ 183,709,382	$ 469,214,382

2000 General Obligation Bonds

In June 2000, the RTA issued $260 million in General Obligation Bonds, Series 2000A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2000A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.75% to 6.25% on January 1, 2001, and semiannually thereafter on July 1 and January 1 in each remaining year.

Debt service requirements on the Series 2000A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 4,730,000	$ 15,138,538	$ 19,868,538
2008	4,995,000	14,866,563	19,861,563
2009	5,275,000	14,579,350	19,854,350
2010	5,575,000	14,276,038	19,851,038
2011	5,900,000	13,955,475	19,855,475
2012 - 2016	33,155,000	65,867,064	99,022,064
2017 – 2021	47,200,000	51,474,251	98,674,251
2022 – 2026	63,860,000	34,675,576	98,535,576
2027 - 2030	67,100,000	11,236,225	78,336,225
Total	$ 239,790,000	$ 234,069,080	$ 473,859,080

2001 General Obligation Bonds

In April 2001, the RTA issued $100 million in General Obligation Bonds, Series 2001A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2001A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.00% to 6.00% on January 1, 2001, and semiannually thereafter on July 1 and January 1 in each remaining year.

Debt service requirements on the Series 2001A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 1,785,000	$ 5,442,988	$ 7,227,988
2008	1,880,000	5,344,813	7,224,813
2009	1,980,000	5,241,413	7,221,413
2010	2,090,000	5,132,513	7,222,513
2011	2,200,000	5,017,563	7,217,563
2012 – 2016	13,010,000	22,945,626	35,955,626
2017 – 2021	17,125,000	18,611,825	35,736,825
2022 – 2026	22,545,000	13,111,200	35,656,200
2027 – 2031	29,680,000	5,538,300	35,218,300
Total	$ 92,295,000	$ 86,386,241	$ 178,681,241

In March 2001, the RTA issued $38 million in General Obligation Bonds, Series 2001B, to provide funds to refund, in advance of maturity, the RTA's outstanding series 1993A Bonds, maturing June 1 in the years 2004–2008, in the aggregate amount of $38 million.

The Series 2001B Refunding Bonds mature on June 1 over a twenty-three year period and interest is payable at rates ranging from 4.00% to 5.50% on June 1, 2001, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2001B Refunding Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 1,555,000	$ 1,755,488	$ 3,310,488
2008	1,630,000	1,679,750	3,309,750
2009	-	1,639,000	1,639,000
2010	-	1,639,000	1,639,000
2011	-	1,639,000	1,639,000
2012 – 2016	7,280,000	7,808,976	14,888,976
2017 – 2021	15,175,000	4,198,289	19,373,289
2022 – 2023	7,345,000	409,612	7,754,613
Total	$ 32,985,000	$ 20,569,116	$ 53,554,116

2002 General Obligation Bonds

In March 2002, the RTA issued $160 million in General Obligation Bonds, Series 2002A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2002A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.00% to 6.00% on July 1, 2002, and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2002A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 2,690,000	$ 8,833,438	$ 11,523,438
2008	2,835,000	8,698,938	11,533,938
2009	2,985,000	8,557,188	11,542,188
2010	3,150,000	8,407,938	11,557,938
2011	3,315,000	8,250,438	11,565,438
2012 – 2016	19,555,000	38,214,788	57,769,788
2017 – 2021	25,795,000	31,842,500	57,637,500
2022 – 2026	34,170,000	23,167,800	57,337,800
2027 – 2031	45,270,000	11,659,500	56,929,500
2032	10,685,000	641,100	11,326,100
Total	$ 150,450,000	$ 148,273,628	$ 298,723,628

In June 2002, the RTA issued $200 million in General Obligation Bonds, Series 2002B, to provide interim funding as needed for a portion of the costs in connection with the reconstruction and expansion of rapid transit facilities operated by the CTA and to fund other public transportation projects.

The Series 2002B Bonds mature on June 1 over a seventeen-year period and interest is payable at rates ranging from 3.00% to 5.50% on December 1, 2002, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2002B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 9,710,000	$ 8,560,338	$ 18,270,338
2008	10,060,000	8,053,513	18,113,513
2009	10,450,000	7,515,125	17,965,125
2010	10,870,000	6,941,888	17,811,888
2011	11,325,000	6,331,525	17,656,525
2012 – 2016	64,690,000	21,599,850	86,289,850
2017 – 2019	46,750,000	3,851,188	50,601,188
Total	$ 163,855,000	$ 62,853,427	$ 226,708,427

2003 General Obligation Bonds

In May 2003, the RTA issued $260 million in General Obligation Bonds, Series 2003A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2003A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 2.00% to 5.50% on January 1, 2004, and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2003A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 4,335,000	$ 14,212,575	$ 18,547,575
2008	4,555,000	13,995,825	18,550,825
2009	4,790,000	13,768,075	18,558,075
2010	5,045,000	13,528,575	18,573,575
2011	5,310,000	13,276,325	18,586,325
2012 – 2016	31,260,000	62,000,150	93,260,150
2017 – 2021	40,850,000	52,492,500	93,342,500
2022 – 2026	53,310,000	39,953,875	93,263,875
2027 – 2031	68,945,000	22,706,100	91,651,100
2032 – 2033	32,910,000	2,987,100	35,897,100
Total	$ 251,310,000	$ 248,921,100	$ 500,231,100

In January 2003, the RTA issued $150 million in General Obligation Bonds, Series 2003B, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2003B Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 4.00% to 5.50% on June 1, 2003, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2003B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 2,545,000	$ 7,868,325	$ 10,413,325
2008	2,675,000	7,763,925	10,438,925
2009	2,810,000	7,654,225	10,464,225
2010	2,955,000	7,538,925	10,493,925
2011	3,105,000	7,402,200	10,507,200

2027 – 2031	39,785,000	11,435,439	51,220,439
2032 – 2033	19,080,000	1,111,476	20,191,476
Total	$ 145,210,000	$ 134,918,619	$ 280,128,619

In May 2003, the RTA issued $19 million in General Obligation Bonds, Series 2003C, to provide funds to refund, in advance of maturity, the RTA's outstanding series 1993C Bonds, maturing June 1 in the years 2004 – 2009, in the aggregate amount of $19 million.

The Series 2003C Bonds mature on July 1 over a six-year period and interest is payable at rates ranging from 2.00% to 5.00% on January 1, 2004, and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2003C Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 3,240,000	$ 510,000	$ 3,750,000
2008	3,395,000	348,000	3,743,000
2009	3,565,000	178,250	3,743,250
Total	$ 10,200,000	$ 1,036,250	$ 11,236,250

2004 General Obligation Bonds

In October 2004, the RTA issued $260 million in General Obligation Bonds, Series 2004A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2004A Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.00% to 5.75% on June 1, 2005, and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2004A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 4,190,000	$ 13,966,038	$ 18,156,038
2008	4,405,000	13,751,163	18,156,163
2009	4,635,000	13,525,163	18,160,163
2010	4,870,000	13,287,538	18,157,538
2011	5,120,000	13,037,788	18,157,788
2012 – 2016	29,825,000	60,874,539	90,699,539
2017 – 2021	38,540,000	51,393,107	89,933,107
2022 – 2026	50,115,000	39,418,282	89,533,282
2027 – 2031	65,155,000	23,587,544	88,742,544
2032 – 2034	48,150,000	4,249,825	52,399,825
Total	$ 255,005,000	$ 247,090,987	$ 502,096,987

2005 General Obligation Bonds

In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005–2025, in the aggregate amount of $147 million.

The Series 2005B Bonds mature on June 1 over a twenty-year period and interest is payable at variable rates which reset weekly, based on current market rates.

Debt service requirements on the Series 2005B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST*	TOTAL
2007	$ 2,940,000	$ 4,746,885	$ 7,686,885
2008	3,070,000	4,647,720	7,717,720
2009	6,535,000	4,489,238	11,024,238
2010	6,850,000	4,268,385	11,118,385
2011	7,210,000	4,036,395	11,246,395
2012–2016	28,570,000	16,640,746	45,210,746
2017–2021	36,155,000	12,971,394	49,126,394
2022–2025	53,985,000	3,388,524	57,373,524
Total	$ 145,315,000	$ 55,189,287	$ 200,504,287

*Interest was calculated using a rate of 3.3%.

2006 General Obligation Bonds

In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

The Series 2006A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 4.25% to 5.00% on January 1, 2007, and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2006A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2007	$ 1,050,000	$ 9,191,367	$ 10,241,367
2008	3,385,000	12,210,531	15,595,531
2009	3,625,000	12,041,281	15,666,281
2010	3,780,000	11,860,031	15,640,031
2011	3,955,000	11,671,031	15,626,031
2012–2016	23,425,000	55,166,406	78,591,406
2017–2021	31,540,000	48,529,656	80,069,656
2022–2026	81,025,000	36,437,156	117,462,156
2027–2031	60,545,000	14,796,219	75,341,219
2032–2035	38,020,000	5,571,675	43,591,675
Total	$ 250,350,000	$ 217,475,353	$ 467,825,353

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $72 million in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2006.

10. PENSION

All eligible employees of the Combined Entities are covered under a pension plan. RTA employees, as well as nonunion employees of Metra and Pace, are covered under the RTA Pension Plan, which is a multi-employer, noncontributory, defined benefit cost sharing plan and trust. The union employees of Metra and Pace are covered under various other plans as required by their collective bargaining agreements.

The CTA maintains two single-employer defined benefit pension plans, the Employees' Retirement Plan and the Supplemental Retirement Plan, covering substantially all full-time permanent union and nonunion employees and Chicago Transit Authority Board members. The Employees' Retirement Plan is governed by the terms of the employees' collective bargaining agreement. The Supplemental Retirement Plan, which includes the Retirement Plan for Board Members and the Supplemental Retirement Plan for selected Officers, Executives, Supervisory and Professional Employees, provides benefits, in addition to the Employees' Retirement Plan, to management employees in certain employment classifications and Chicago Transit Authority Board members.

11. REGION-WIDE FINANCIAL INFORMATION

The RTA management has elected to present certain region-wide financial information. The purpose of this information is to provide a total overview of transportation-related operations in the Northeastern Illinois region. This information includes the transportation-related results of the Service Boards' affiliated carriers. Accordingly, this region-wide information is presented in the combining region-wide schedules of revenues and expenditures and the combining region-wide statement of revenues and expenditures – budget and actual.

The basic financial statements of the RTA and the Service Boards used to prepare the combining statement of revenues and expenses do not include the aggregate of system-generated revenues and costs. The combining region-wide schedules of revenues and expenditures include the aggregate of all system-generated revenues and costs.

For purposes of the system-generated revenues recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with accounting principles generally accepted in the United States, with certain allowable adjustments as enumerated in the Act. Costs funded by federal capital grants are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act.

The Act requires that the aggregate of all system-generated revenues equal at least 50% of the aggregated costs of providing such public transportation.

For 2006, the region-wide system-generated revenues recovery ratio is calculated from the Combining Region-Wide Schedules of Revenues and Expenditures (Budget and Actual Budget Basis) as follows:

SYSTEM-GENERATED REVENUES RECOVERY RATIO
(in thousands)

	REVENUES	EXPENDITURES
CTA*	$ 586,668	$ 1,083,799
Metra**	275,274	502,028
Pace***	70,007	204,728
RTA****	15,821	28,824
Total	$ 947,770	$ 1,819,379

The RTA Board (Ordinance 2005-06) authorized the exclusion of added security costs from the Service Board expenditures including the allowable adjustments specified in the RTA Act. The amount that exceeds the RTA Act exclusion is added back to RTA system-generated expenses to calculate the System-Generated Revenue Recovery Ratio. The amount added to CTA and Metra expenditures was $16.2 million and $9.0 million, respectively. The region-wide system-generated revenues recovery ratio for 2006 equals 52.1%.

* The system-generated revenues recovery ratio for the CTA included leasehold revenues of $4.3 million and excluded CTA expenditures for security costs of $30.8 million. It also included in-kind services of $22 million, both as revenues and expenditures.

** Metra's $14.0 million security costs, $15.1 million costs for lease of transportation facilities and $2.7 million for funded depreciation to carriers were deducted from expenditures.

*** Pace included in-kind services of $5.5 million both as revenues and expenditures. Also, Pace included capital cost of contracting funding of $7.5 million in revenues.

**** The RTA subtracted back $14.6 million unrealized gain on swap valuation to its revenues. Also, the RTA excluded all capital related (depreciation) expenses of $254 thousand.

These are allowable adjustments for the revenues recovery ratio computation per the Act. These adjustments are reflected in the region-wide information.

12. RECONCILIATION OF GOVERNMENT-WIDE TO REGION-WIDE REVENUES AND EXPENDITURES

RTA's government-wide financial statements do not include fiduciary fund financial statement information which is added in the region-wide presentation. As also stated in Note 11, in-kind services are added in the system-generated revenues and expenditures.

The following data (in thousands) reconciles the combining government-wide to region-wide schedules of revenues and expenditures:

	RTA	CTA	METRA	PACE
Government-wide revenues (page 33)	$ 506,564	$1,745,794	$ 815,946	$ 236,771
Federal operating grants				7,465
Sales tax agency fund	673,929			
Pension trust fund	21,994			
In-kind services		22,000		5,509
Unrealized gain on swap valuation	(14,606)			
Region-wide revenues (page 34)	1,187,881	1,767,794	815,946	249,745
Government-wide expenditures (page 33)	540,604	1,849,353	748,707	235,852
Sales tax agency fund	673,929			
Pension trust fund	6,500			
In-kind services		22,000		5,509
Security costs		(30,831)	(14,022)	
Lease of transportation facilities			(15,139)	
Capital (Depreciation, disposals/additions)	(254)		(2,749)	
Region-wide expenditures (page 34)	1,220,779	1,840,522	716,799	241,361
Net revenues (expenditures)	$ (32,898)	$ (72,728)	$ 99,147	$ 8,384

13. SUBSEQUENT EVENTS

On February 20, 2007, pursuant to Part II, Article One of the Articles of Agreement of the Loss Financing Plan, the Fund made a payment to indemnify PACE in the amount of $4,750,000. PACE is required to make annual payments of $1,000,000 plus interest, calculated using the effective interest rate earned by the remaining assets of the Fund during such Occurrence Year, until the balance is paid in full.

On March 22, 2007, pursuant to Ordinance No. 2006-77 Ordinance Authorizing A Note Issuance Agreement, Bank of America, N.A. issued a working cash note to the RTA for $40,000,000. This note is to be used solely for purposes provided in the RTA Act. The note is an unsecured general obligation payable from any lawfully available moneys subordinate to any bonds or notes issued and outstanding.

On June 11, 2007, the RTA entered into two fixed to floating swaps. The aggregate notional value was $260 million. This was done pursuant to Ordinance No. 2006-33, which authorizes certain actions in connection with Interest Rate Swap Transactions. Both transactions expire in 2030 with optional termination by the counter parties in 2016.

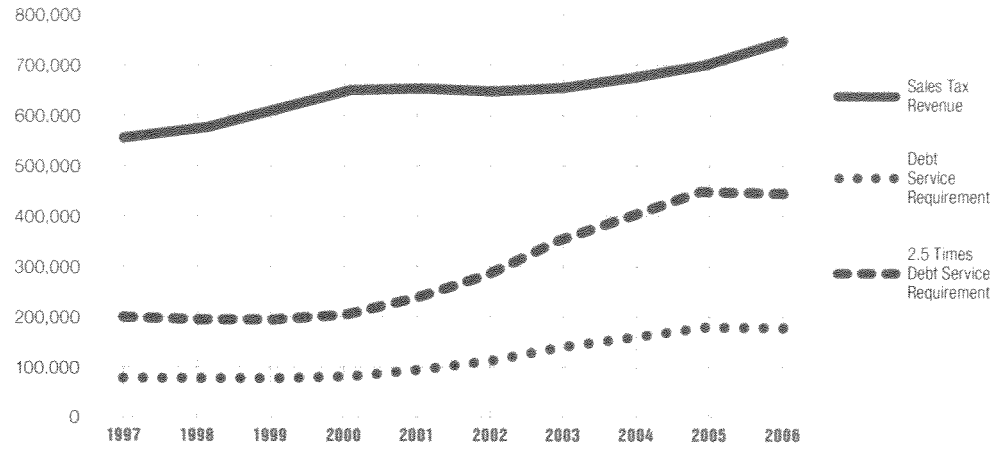
Comparison of Sales Tax Revenue to Debt Service Requirement

1997–2006

(In thousands)



As defined in the Bond and Note General Ordinance, ordinance 85-39, Section 909 (3), revenue test required that all RTA revenues "shall equal or exceed two and one-half (2.5) times the maximum annual debt service requirements." In the graph presented above, the RTA compares 2.5 times debt service requirement to sales tax revenues, a major RTA revenue. In effect, the RTA significantly exceeds the revenue test defined in the ordinance.

Last Ten Years (In thousands)	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006
Sales Tax Revenue	$ 555,496	$ 576,704	$ 613,514	$ 650,284	$ 653,522	$ 647,685	$ 654,985	$ 675,628	$ 700,395	$ 746,829
Debt Service Requirement	78,359	77,883	77,866	81,676	95,187	113,526	140,607	159,702	179,536	178,086
2.5 Times Debt Service Requirement	195,898	194,708	194,665	204,190	237,968	283,815	351,518	399,255	448,840	445,215

Differences, if any, between debt service amounts presented above and amounts presented in the accompanying financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

SERVICE BOARD OPERATING CHARACTERISTICS

2006

Chicago Transit Authority

Rapid Transit

- 8 rail routes
- 144 stations served
- 1,190 rapid transit cars
- 195.2 million riders per year

Motor Bus

- 151 bus routes
- 2,140 buses
- 298.4 million riders per year

Paratransit

- 1,201 thousand riders per year

Other

- 1.1 billion passenger rail miles per year
- 12.3 million rail miles per year
- 715.5 million passenger miles per year
- 68.2 million vehicle miles per year

Metra Commuter Rail Division

- 555 route miles
- 1,251 miles of track
- 241 stations
- 144 locomotives
- 820 passenger cars
- 241 electric cars
- 735 weekly trains operated
- 96.3% on-time performance
- 70.9 million riders per year

Other

- 1.6 billion passenger miles per year
- 43.3 million vehicle miles per year

Pace Suburban Bus Division

Fixed Route

- 155 regular routes
- 51 feeder routes
- 2 subscription routes
- 24 shuttle routes
- 564 vehicles in use during peak periods
- 33.7 million riders per year

Paratransit

- 82 local services
- 380 Pace-owned lift-equipped buses in service
- 217 communities served
- 2.7 million riders per year

Other

- 648 vanpools in operation
- 1.7 million riders for the year
- 16.3 million passenger miles per year
- 18.7 million vehicle miles per year

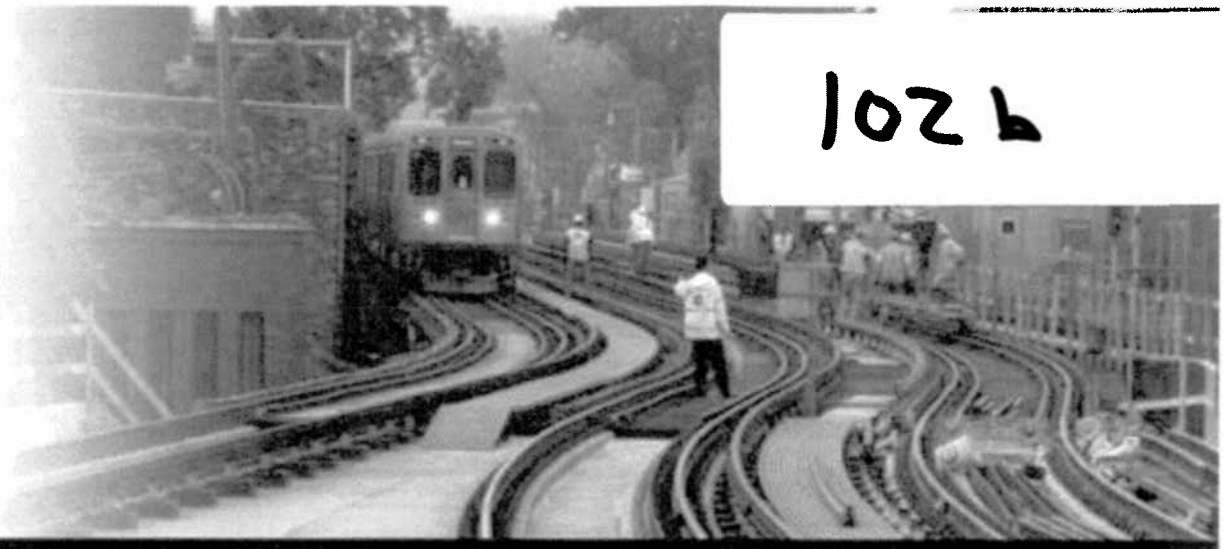
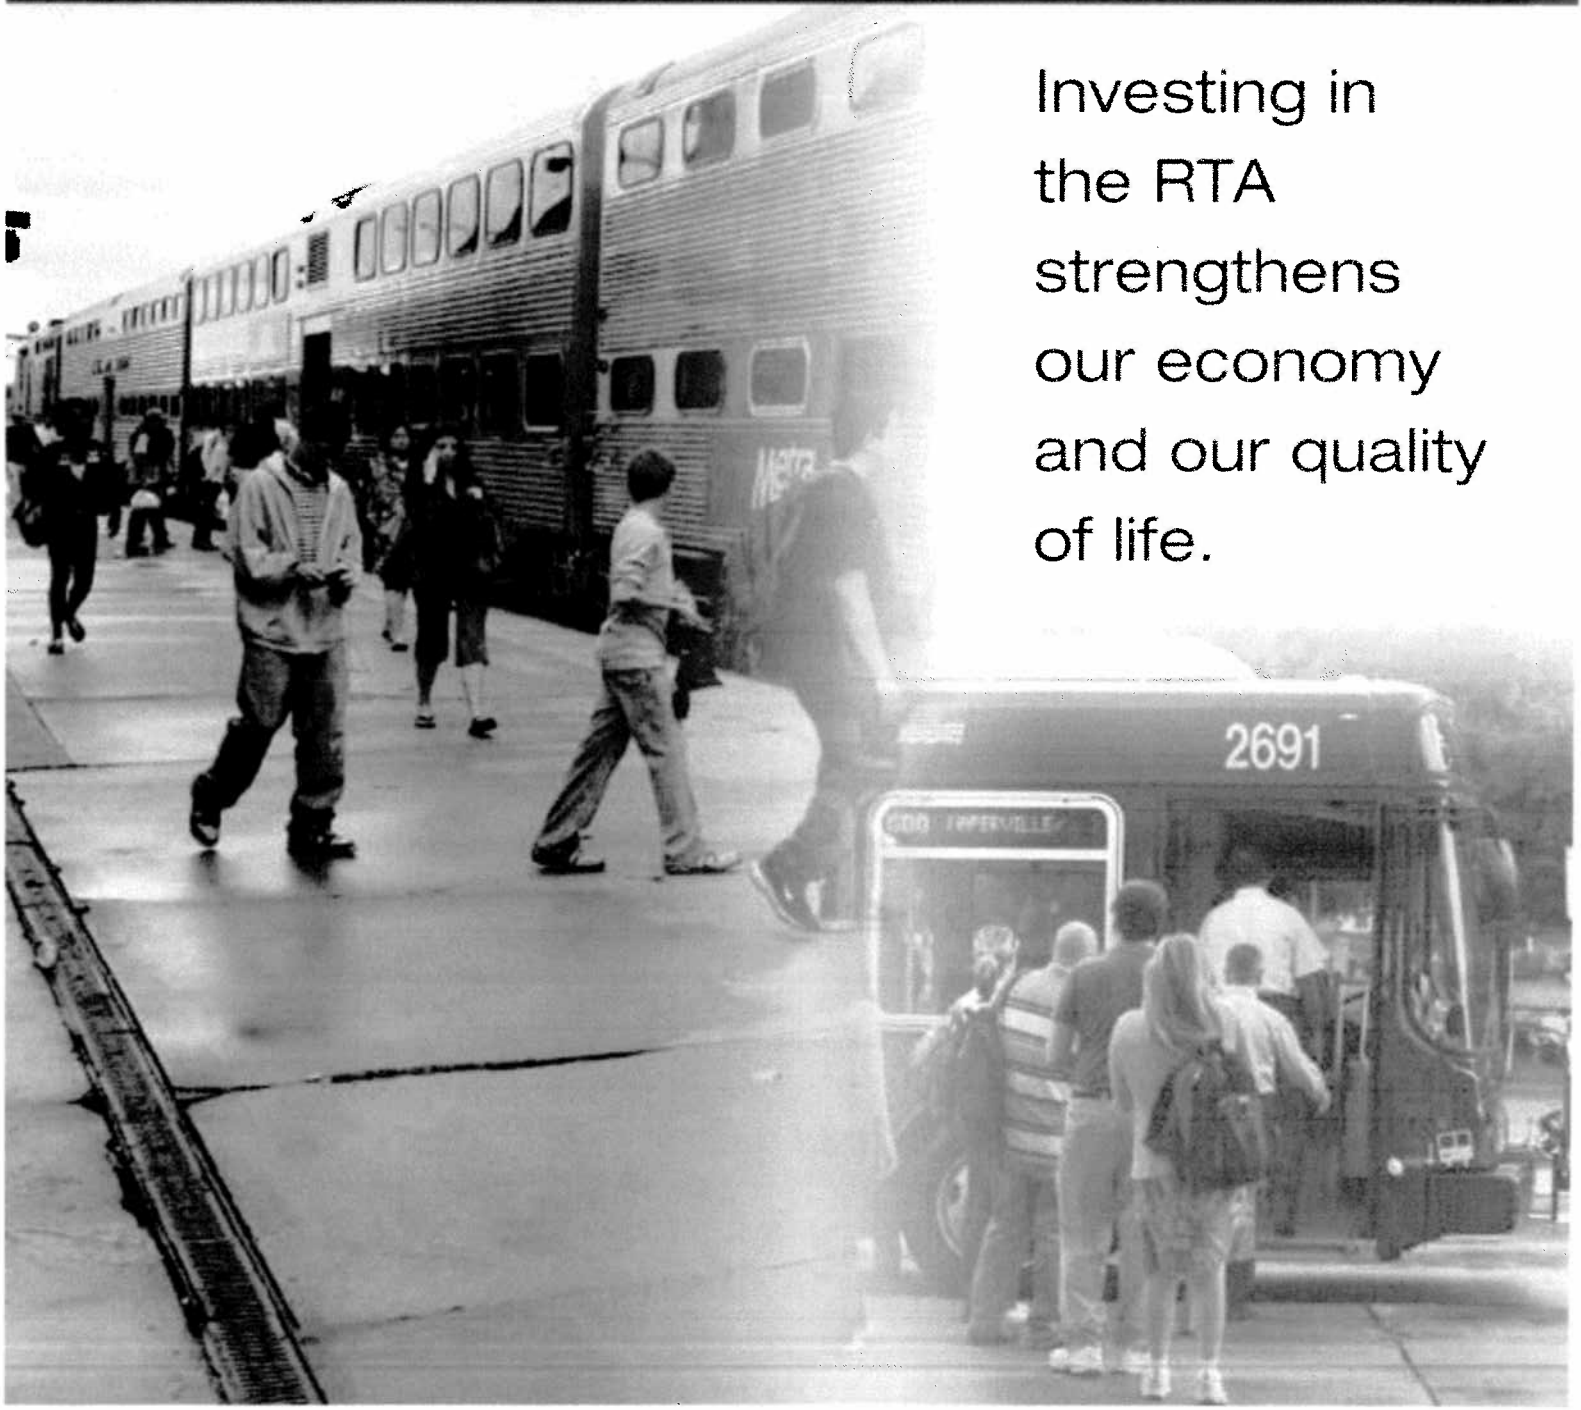
REGIONAL TRANSPORTATION AUTHORITY

102 b



RTA 2007 ANNUAL REPORT

Investing in the RTA strengthens our economy and our quality of life.



A LETTER FROM THE CHAIRMAN

2007 WAS THE YEAR OF DECISION

THE DECISION WAS MADE: TRANSIT IS A PRIORITY

The year 2007 was the "Year of Decision." Would investments be made to operate and reform our transit system or would we let it shrink? Fortunately, the state's leaders recognized that a quality mass transit system is vital to a quality lifestyle for all its residents.

With a report from the Illinois Auditor General in hand proving that reform and funding was needed, mass transit advocates descended on Springfield for the better part of 2007 and into 2008. House Bill 656, sponsored by Representative Julie Hamos and Senator Ricky Hendon, was the result of months of difficult negotiations and discussions, but ultimately became law after the Governor Rod Blagojevich amended the bill with our popular new Seniors Ride Free program that over 300,000 people are now registered for. Not only does the new law provide a stable funding stream for operations, but it enhances the RTA's abilities to help the Service Boards coordinate and plan for their future, places the CTA's pension plan on stable footing, and also restructures the governing boards of the RTA and Metra to reflect population changes in the RTA's six county region.

Many thanks are due to literally hundreds of thousands of people: thousands of advocates who fought for mass transit, the elected officials who recognized mass transit's power to shape a community, the employees of the Service Boards who suffered through continued rounds of potential layoffs, but most importantly our riders who were patient throughout the constant turmoil of the last year.

Now that the operations funding crisis has been averted, the RTA has two main objectives for 2008: implement the new law and acquire much needed capital funding. The RTA is hard at work handling its enhanced responsibilities and is working in close cooperation with Pace, Metra, and CTA. Notably, that includes updating the RTA's long-term, comprehensive Strategic Plan, developing performance measures and reporting requirements, and instituting long-range financial assessments.

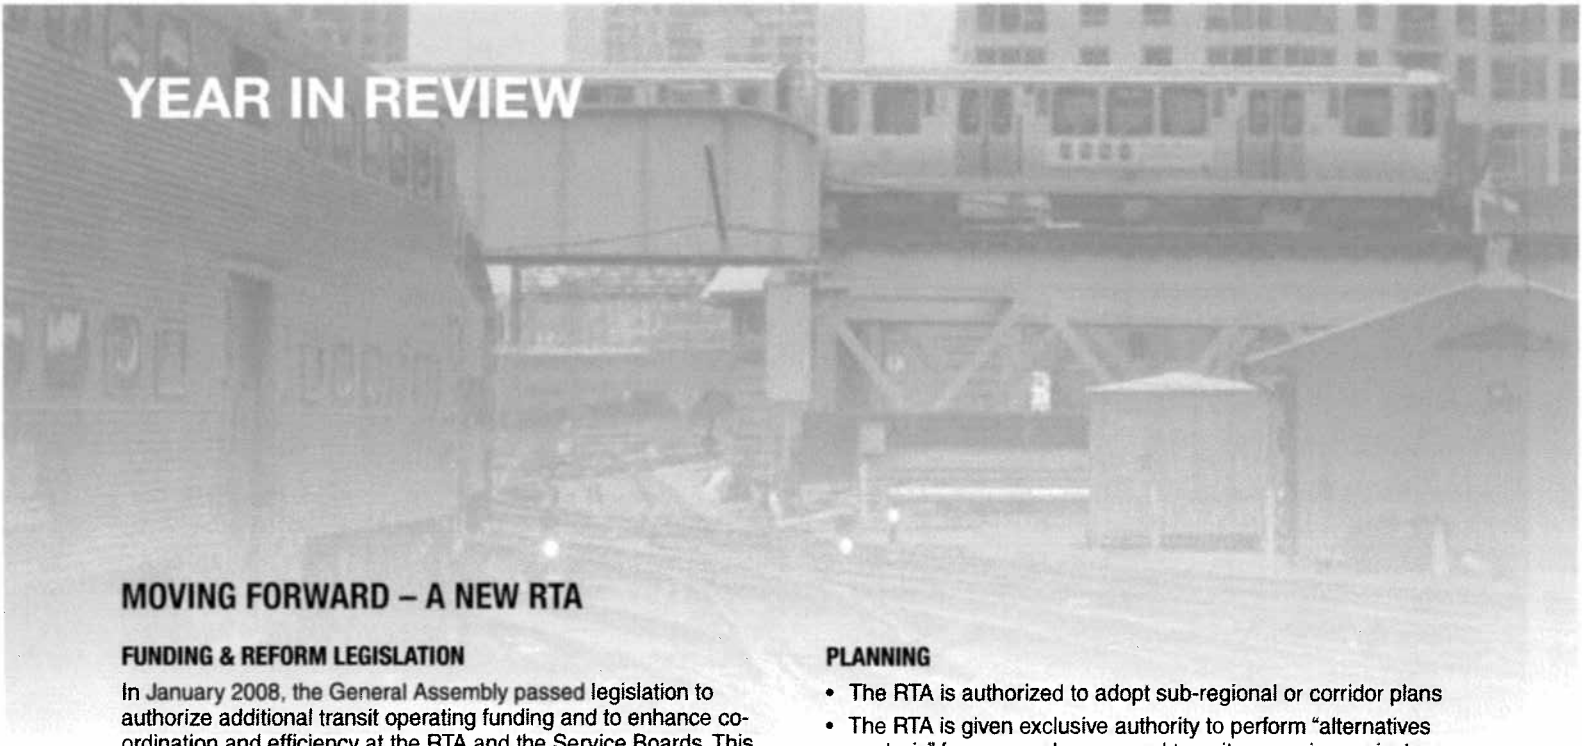
The landmark legislation also requires the RTA and the three Service Boards to coordinate their capital plans. Under the new legislation, capital projects must be prioritized at the regional level and can only proceed if they are consistent with the Strategic Plan. With that legislative directive in mind, the RTA is currently assessing the condition of the infrastructure of the entire transit system. However, all of these efforts will be significantly compromised if the state does not adopt a new capital construction plan.

It has been nine long years since the last state capital funding initiative. Acquiring necessary capital funding is not an option in order for the RTA to succeed, it is a requirement. In order for northeastern Illinois to prosper, it must have a quality mass transit system that is environmentally friendly, reduces congestion, increases mobility, spurs economic growth and creates jobs, and also allows people to spend more time living and less time commuting.

Thank you for your support in making the right decision for 2007. We look forward to continuing to work with you to make sure we maintain, enhance, and expand our world-class transit system.

Sincerely,

Jim Reilly, Chairman
Regional Transportation Authority



YEAR IN REVIEW

MOVING FORWARD – A NEW RTA

FUNDING & REFORM LEGISLATION

In January 2008, the General Assembly passed legislation to authorize additional transit operating funding and to enhance coordination and efficiency at the RTA and the Service Boards. This investment in our system will provide more consistent service and end the almost constant financial crisis we have confronted over the last several years.

HIGHLIGHTS

- Additional $500 million per year: regional sales tax, real estate transfer tax in Chicago, additional state matching funds
- Reforms the CTA pension and health care system
- RTA Board increased from 13 to 16 to reflect population growth
- Free fixed route transit rides for seniors aged 65 and over living in the six-county region

SPECIFIC REFORMS:

Strategic Plan: The RTA must adopt a comprehensive, long-term strategic plan with goals and objectives; standards, measurements and reporting requirements related to achieving goals; criteria and process to evaluate which capital projects are included in five-year capital program; 10-year assessment of transit system's financial condition

CAPITAL PROGRAM

- Projects can only proceed if the RTA finds that they meet the criteria in the Strategic Plan and can be funded within available amounts
- All capital projects undertaken by on or behalf of the Service Boards must be in the RTA's five-year capital program

SERVICE BOARD BUDGETS

- Must be consistent with the RTA Strategic Plan
- Required to include additional details, including long-term obligations such as pension and employee benefit expenses
- Must adhere to RTA's required formats, financial practices and assumptions

COMPLIANCE

- If Service Boards' budgets are not compliant with the requirments, the RTA must withhold funding
- To ensure the Service Boards' budgets are compliant, the RTA can withhold funding

PLANNING

- The RTA is authorized to adopt sub-regional or corridor plans
- The RTA is given exclusive authority to perform "alternatives analysis" for any newly proposed transit expansion projects

NEW INNOVATION, COORDINATION AND ENHANCEMENT (ICE) FUND

Intended for short-term, lower-cost projects and service enhancements with grants awarded to:

- Service Boards
- Transportation agencies
- Local governments

SUBURBAN COMMUNITY MOBILITY FUND

- $20 million program for the RTA to make operating or capital grants to Pace for other than traditional fixed-route services that enhance suburban mobility

AUDIT

- The RTA must audit each Service Board at least once every five years

MARKETING

- The RTA is required to develop and adopt coordinated sales, marketing, advertising and public information programs; outcomes are to achieve unified marketing image and cost savings/efficiencies

PUBLIC INPUT

- The RTA and Service Boards are required to hold additional public hearings before adopting their strategic plan, budgets and capital programs to ensure public input is received and processes are transparent

DISPUTE RESOLUTION

- The RTA is given enhanced authority to mediate disputes among Service Boards regarding: fare coordination, transfers, service coordination and service duplication

DBE AND EEO PROGRAMS

- Programs must be established and maintained to: Ensure non-discrimination in awarding and administration of contracts and promote equal employment opportunity

CAPITAL CAMPAIGN

THE PURSUIT FOR CAPITAL

While obtaining operating funding and reform was a critical step in remaking our transit system, we cannot fully achieve our goal of having a world-class transit system unless there is an adequate capital investment to maintain, enhance and expand the system.

It has been 9 years since the state of Illinois last addressed capital funding. Illinois FIRST was approved in 1999 and provided urgently needed funds for roads, bridges, transit and other public infrastructure. The money allowed our state to address maintenance backlogs and build critical expansions to our road and transit system. But Illinois FIRST funds expired in 2004, and for more than three years, no state infrastructure funding has been dedicated to transit.

Our transit system is the second largest in the nation. Collectively, the CTA, Metra and Pace operate more than 3,800 buses and vans, 2,300 train cars, 1,490 miles of train track, 915 bridges and over 300 rail stations. Just in order to maintain current levels of service and infrastructure, the RTA and Service Boards should be investing over $1 billion each year – and that does include any funding for expansions of the system.

Because funding has not been available, maintenance and repairs have been delayed and replacement of aging vehicles has been put off. This results in less reliable service, slow zones, less fuel efficient vehicles, and increased operating costs.

Without sufficient investment, we will not be able to address the critical maintenance needs of the system. Without an adequate capital program, we will not be able to pursue new transit lines or expansions and will risk losing federal funds that are available for these expansions.

Addressing the repairs and upgrades needed to maintain the current system must be the priority.

Our roads, bridges, transit systems, schools and other public buildings need new funding. The longer we delay these investments, the costs to fix our aging infrastructure increases. If we do not fix our transit infrastructure, the new operating funding we have achieved is used less efficiently because older equipment uses more fuel, breaks down more often and is more expensive to operate.

Transit provides tremendous benefits to this region. It dramatically reduces congestion, cuts air pollution and provides access to jobs, health care and education to millions of people each day. But these benefits are at risk if we don't make the needed investments to maintain, enhance and expand the system.

Our transit infrastructure is deteriorating. The Moving Beyond Congestion Strategic Plan identified the need for $10 billion additional State transit capital funding for the RTA region over 5 years. These funds would be dedicated to three major types of investments: maintain, enhance and expand.

MASS TRANSIT CAPITAL FUNDING – NORTHEASTERN ILLINOIS

Moving Beyond Congestion needs assessment: The Moving Beyond Congestion Strategic Plan identified the need for an additional $10 billion State transit capital investment in the RTA region over 5 years, with a presumed $6.1 billion in federal and other funding, for a total program of $16.1 billion.

Transportation for Illinois Coalition proposal: In recognition of the current fiscal climate, the Transportation for Illinois Coalition (TFIC) developed a proposal for an $6 billion additional State transit capital funding over 5 years, with a presumed $4.3 billion in federal matching funding. The total program of $10.3 billion would be allocated as follows:

PROPOSED 5-YEAR CAPITAL PROGRAM	STATE FUNDS	FEDERAL MATCHING FUNDS	TOTAL
Maintain: invest in trains, buses and vans, track and structures, passenger stations and other facilities	$4.8 billion	$2.9 billion	$7.7 billion
Enhance: invest to improve the service we have with weekend and off-peak service, system efficiencies	$400 million	$100 million	$500 million
Expand: planning for long-term system expansion to meet our region's growing needs	$800 million	$1.3 billion	$2.1 billion
Total	$6.0 billion	$4.3 billion	$10.3 billion

This proposal would allow the transit agencies to address critical maintenance, bring the system closer to a state of good repair, and make progress on prudent system expansions. Under the TFIC proposal, transit capital would be funded through a predictable and dedicated funding stream that could not be used by the State for other purposes; the State budget would then be "backfilled" through new revenues.

Alternative proposals: Proposals for significantly less funding than the proposal above would not provide sufficient funding needed to bring the system to a state of good repair and maintain the system. Insufficient investment will mean more slow zones, more breakdowns, and higher operating costs and would place our region at a disadvantage in competing for federal funding for "New Starts" system expansions. Without adequate local funding, we will not be able to secure the federal funding needed for critical projects such as Metra Union Pacific North West or West line improvements, STAR line, South East Service, CTA Red, Orange, Yellow or Circle Line projects, and Pace Bus Rapid Transit.

Historical comparison: Illinois FIRST provided $2.1 billion for transit over five years; today it would take close to $3 billion to maintain the same spending power. Illinois FIRST had a 2:1 roads-to-transit funding ratio. The current TFIC proposal has a 1:1 ratio for new State funding for roads and transit.

Transit reform legislation, House Bill 656, enacted in January 2008, expanded the Authority's Board from 13 to 16 members. These changes became effective April 1, 2008. The new appointees will serve in five-year terms. The following is a breakdown of the Board make up and the appointing authorities:

- 5 by Mayor of Chicago (appointee cannot be the Chairman of CTA)
- 4 by suburban members of the Cook County Board
- 1 by the President of the Cook County Board (from Suburban Cook County)
- 1 by the Chairman of the DuPage County Board
- 1 by the Chairman of the Lake County Board
- 1 by the Will County Executive
- 1 by the Chairman of the McHenry County Board
- 1 by the Chairman of Kane County Board
- The Board Chair is appointed by 11 members of the Board with at least 2 votes from Chicago, Suburban Cook and the collar counties.

THE CHICAGO TRANSIT AUTHORITY

PRESIDENT: RON HUBERMAN

BOARD CHAIR: CAROLE BROWN

The Chicago Transit Authority (CTA) was created by the Illinois State legislature in 1945 and began operations in 1947. It became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator providing service on 2,175 buses traveling over 154 routes covering 2,529 miles with approximately 11,846 bus stops. Rail service on eight routes has 1,190 train cars traveling over 242 miles of track.

The CTA operates the second largest public transportation system in the United States. Average weekday ridership on its bus and rail system is 1.6 million. The CTA's service area encompasses 220 square miles in the City of Chicago and 40 surrounding suburbs.

A seven-member Chicago Transit Board governs the CTA.

EXECUTIVE DIRECTOR: PHIL PAGANO
BOARD CHAIR: CAROLE DORIS

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare and service levels, capital improvements, finances, passenger services, safety, and systems planning. Geographically, the Metra system is the largest in the United States; and its operational interface with extensive freight network makes it arguably the nation's most complex.

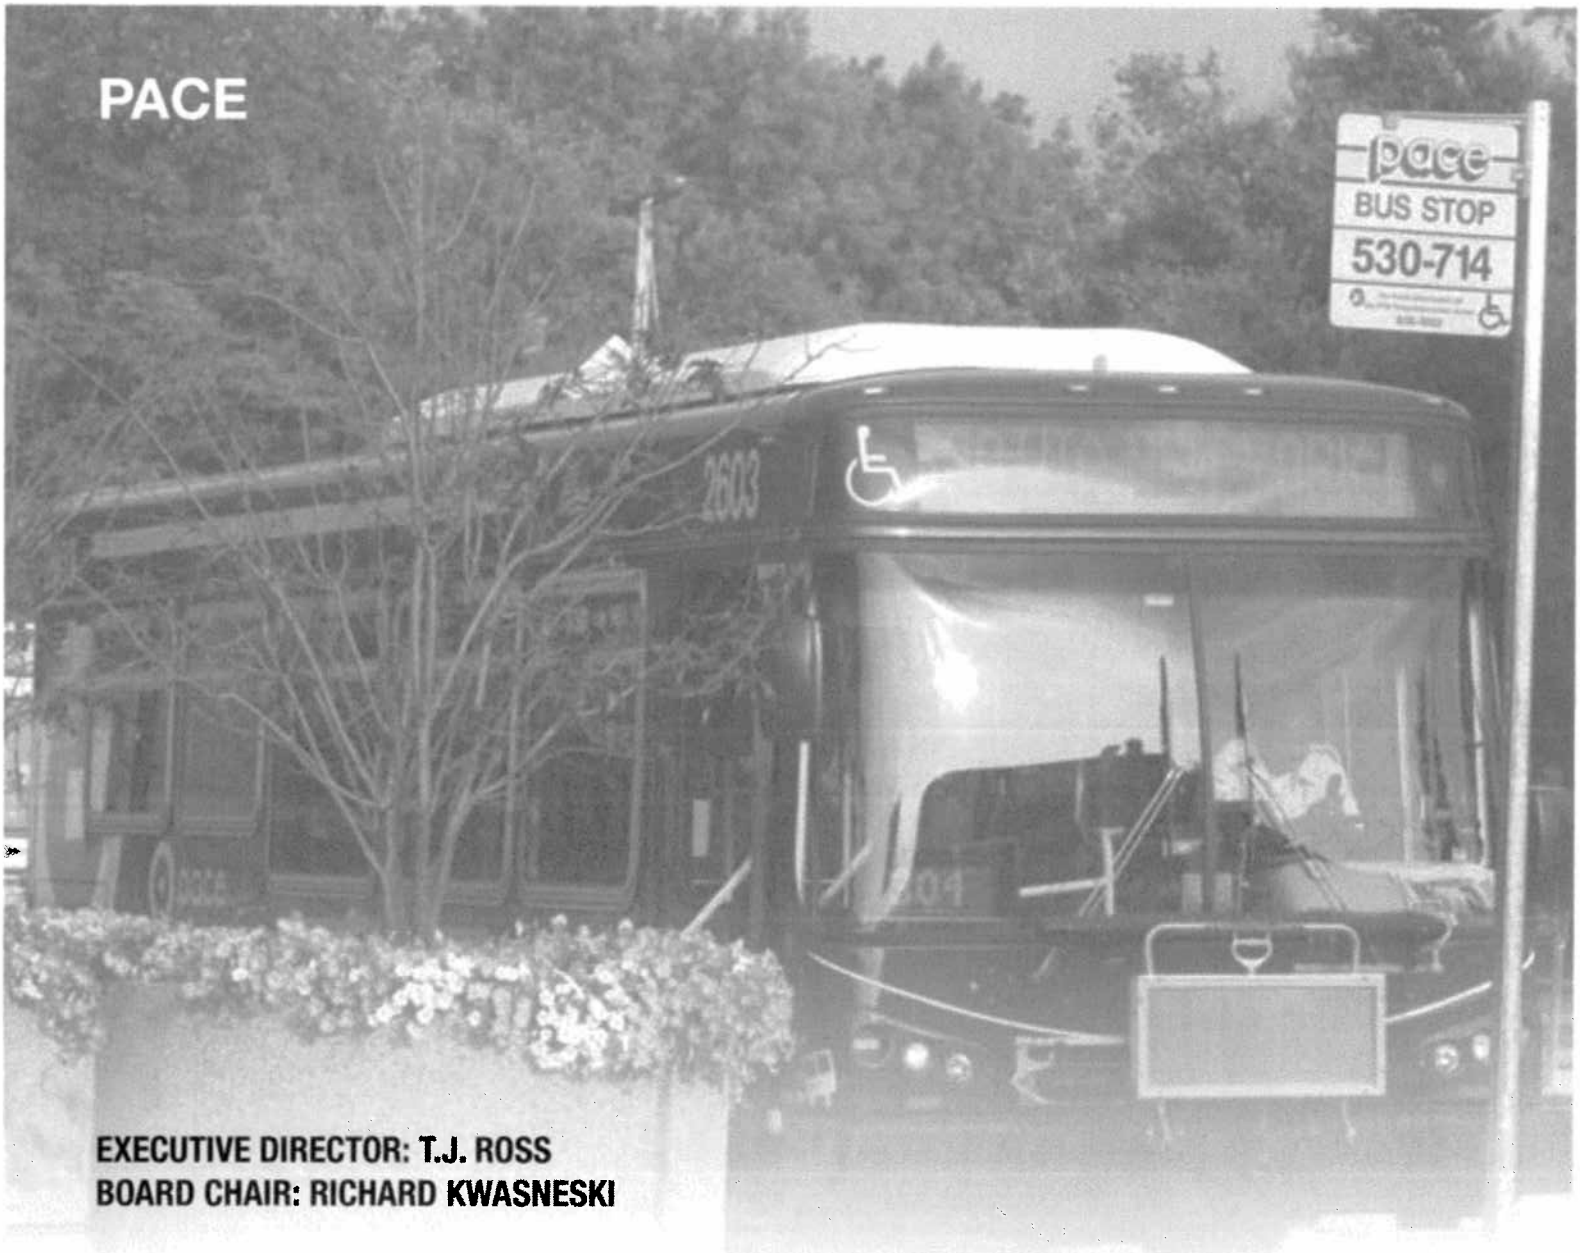
The Metra rail system is comprised of 11 separate lines, which run north, west and south of the Chicago central business district. The system extends 565 route-miles and serves 239 local rail stations in more than 100 communities. The network itself is made up of more than 1,100 pieces of rolling stock, 800 bridges, more than 2,000 signals, 16 rail storage yards and six major maintenance facilities.

Metra's average weekday ridership is 319,100.

Metra is governed by an 11-member Board of Directors.

Metra®

PACE



EXECUTIVE DIRECTOR: T.J. ROSS
BOARD CHAIR: RICHARD KWASNESKI

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority and began service in 1984. Pace's mission is to provide efficient well-integrated fixed route and paratransit transportation services that meet the travel needs of the suburban Chicago area.

Pace's suburban service area measures 3,446 square miles. The suburban area covers the six counties and incorporates 284 municipalities. Transportation needs in this broad area are as unique as the individual communities Pace serves. Average weekday ridership on the Pace system is 141,100. Pace service includes approximately 143 regular routes, 65 feeder routes, 23 shuttle routes, 767 vanpool vehicles, 191 Pace-owned Dial-A-Ride vehicles, and 358 Pace-owned ADA paratransit vehicles.

A 12-member Board of Directors made up of current and former village presidents and mayors governs Pace.

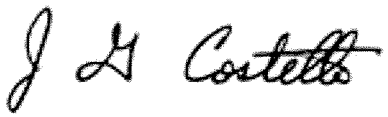
Board of Directors
Regional Transportation Authority
175 West Jackson Boulevard, Suite 1550
Chicago, Illinois 60604

I have the pleasure to submit to you the Combining Financial Statements Report for the Regional Transportation Authority, the Chicago Transit Authority, the Commuter Rail Division and the Suburban Bus Division for the year ending December 31, 2007. This Report fulfills the requirements of section 4.05 of the RTA Act. This Report represents the operations of our transit system in the aggregate and not as individual components. It shows the magnitude of the resources on hand and in use for public transportation in the northeastern Illinois Region. The RTA's independent accountants have compiled the Combining Financial Statements Report. They have not subjected these statements to audit. The audited financial statements of each individual organization are available upon request. As always, the RTA staff acknowledges the commitment by the RTA Board and the Service Boards to fiscal responsibility, to ensure financially sound public transportation in northeastern Illinois.



Joseph G. Costello
Senior Deputy Executive Director,
Finance & Administration
Regional Transportation Authority
June 13, 2008

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have compiled the accompanying special-purpose combining financial statements of the Regional Transportation Authority and Service Boards as of December 31, 2007, and for the year then ended, and the supplementary and statistical information, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting information that is the representation of management in the form of financial statements and supplementary and statistical information. We have not audited or reviewed the accompanying special-purpose combining financial statements and supplementary and statistical information and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying special-purpose financial statements and supplementary and statistical information were prepared for the purpose of complying with the statutory requirement of the Regional Transportation Authority Act as described in Note 1, and are not intended to be a presentation in conformity with accounting principles generally accepted in the United States of America.

See notes to special-purpose combining financial statements and independent accountants' compilation report

1. BASIS OF ACCOUNTING

The accompanying special purpose combining financial statements are presented as required by the Regional Transportation Authority (RTA) Act (Act) and are not intended to be presented in accordance with accounting principles generally accepted in the United States of America. The special purpose combining financial statements are not in accordance with accounting principles generally accepted in the United States of America primarily due to the RTA and Service Boards using a different basis of accounting and due to the omission of significant disclosures. The RTA and each individual Service Board receive a separate audit of their financial statements in accordance with accounting principles generally accepted in the United States of America. These individual statements describe the basis of accounting for each entity and contain the omitted disclosures.

Intergovernmental receivables, payables, revenues, expenses, and expenditures have been eliminated in the Combining Adjustments columns; however, there are some differences in these amounts reported in the stand-alone financial statements of the RTA and the Service Boards. These valid differences relate primarily to differences in timing in the recording of certain transactions. For purposes of these combining financial statements, such differences are recorded as combining adjustments to net assets.

The columns presenting the combined balances for the RTA and Service Boards are statutorily required and do not present financial position, results of operations, or cash flows in conformity with accounting principles generally accepted in the United States of America.

2. ORGANIZATIONAL STRUCTURE

RTA

The RTA was established in 1974 upon the approval of a referendum in its six-county Northeastern Illinois Region (Region). The operating responsibilities of the RTA are set forth in the Act. The RTA is a unit of local government, body politic, political subdivision, and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, in 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority (CTA) and two operating divisions of the RTA: the Commuter Rail Division (Metra) and the Suburban Bus Division (Pace), each having its own independent board. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA system as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. The Service Boards achieve their required recovery ratios by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA is responsible for monitoring the budgets and financial performance of the Service Boards.

CTA

The CTA was formed in 1945 pursuant to the Metropolitan Transportation Authority Act passed by the Illinois legislature. The CTA was established as an independent governmental agency (an Illinois municipal corporation) "separate and apart from all other government agencies" to consolidate Chicago's public and private mass transit carriers. The Chicago City Council has granted the CTA the exclusive right to operate a passenger transportation system within the City of Chicago.

Metra

The Northeast Illinois Regional Commuter Railroad Corporation (NIRCRC), a public corporation, was established in 1980 to serve as the RTA's commuter rail service. The RTA Act, as amended effective November 9, 1983, established the Commuter Rail Division (CRD) to operate commuter rail transportation services. Both the NIRCRC and the CRD act under the registered service mark known as "Metra."

Metra has the responsibility for policy making with respect to actual day-to-day operations, capital investments, finances, fare levels, and service and facilities planning for its operations. Metra is responsible for the administration of all commuter rail activities in the metropolitan Chicago area, including deficit funding, capital grant application, and administration activities. Metra is directly responsible for the operation and management of the Rock Island, Milwaukee Road, Metra Electric, Heritage Corridor, North Central Service, and Metra Southwest Service commuter lines.

Metra also provides commuter rail service under Purchase of Service Agreements (PSA) with Union Pacific Railroad, Burlington Northern Santa Fe Railway Company, and Northern Indiana Commuter Transportation District. Under these agreements, Metra funds the commuter-related operating deficits (as defined) or is entitled to receive the commuter-related operating surpluses (as defined) of these carriers. In addition, Metra provides certain direct expenses such as fuel and insurance coverage considered to be "in-kind assistance." The title to the roadway and structure assets of the PSA carriers, other than capital improvements funded by federal and state agencies, the RTA, and Metra, is vested with the carriers. Accordingly, such assets are not reflected in these financial statements.

Pace

The RTA Act, as amended effective November 9, 1983, established the Suburban Bus Division (Pace) to operate suburban bus service within suburban Cook County and the five collar counties of DuPage, Kane, Lake, McHenry, and Will. The independent operations of Pace commenced on July 1, 1984.

Pace determines the level, nature, and kind of public transportation services that should be provided in the suburban region. Pace operates suburban bus services using stock, structures, and equipment purchased through capital grants funded by federal and state agencies and the RTA.

Reporting Periods

The RTA, CTA, Metra and Pace (the Combined Entities) all report on a calendar-year basis. All statements enclosed herewith are based on each entity's December 31, 2007 year-end.

3. REPORTING ENTITY

The RTA and each of the Service Boards have adopted the provisions of the Governmental Accounting Standards Board's Statement No. 14 (Statement No. 14), *The Financial Reporting Entity.*

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with governmental accounting and financial reporting standards in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters including: ownership of assets, relations with federal and state transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.
- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors who is also an RTA Board member.
- The Illinois statutes required the RTA Board to approve the budgets of the Service Boards, if such budgets meet specified system-generated revenue recovery ratios and other requirements as defined by the Act.
- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficit.

Accordingly, financial statements for the Service Boards are not included or combined with the RTA's financial statements under Statement No. 14. They are combined, however, in these Combining Financial Statements. Section 4.05 of the RTA Act requires that the RTA prepare a report combining "the audits of the Service Boards, and reviewing the state of the Authority, the Service Boards, and the public transportation agencies."

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Combined Entities conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting– The RTA maintains records using a fund accounting model consisting of a General Fund, Debt Service Fund, Capital Projects Fund, Proprietary Fund, (Business-Type Activities), Agency Fund, and Pension Trust Fund. All Governmental Funds and the Agency Fund are accounted for using the modified accrual method of accounting (i.e., revenues are recognized when they become measurable and available, and expenditures are recognized when the related fund liability is incurred). The Proprietary Fund and the Pension Trust Fund are accounted for using the accrual method of accounting. For the purpose of these combining financial statements, all RTA funds have been combined.

The Service Boards are accounted for on a Proprietary Fund basis. Accordingly, the accrual method of accounting is utilized by the Service Boards. For purposes of these combining financial statements, the individual Service Board financial statements are combined with those of the RTA.

Cash and Cash Equivalents– All investments of the Combined Entities are recorded at fair market value, except short-term investments which are reported at cost or amortized cost that reasonably approximates fair market value.

For the purposes of the combining statements of cash flows, the Combined Entities consider all investments with original maturities of three months or less to be cash equivalents. Such amounts are included in the "Cash and Cash Equivalents" line items on the accompanying balance sheet.

Capital Assets– All Capital assets are recorded at cost. Costs funded by Federal Capital Grants are recorded as capital items and are included in Capital assets. In calculating depreciation, the Combined Entities use the straight-line method. The estimated useful lives vary depending on the type of Capital asset. These useful lives range from more than one year to forty years.

Materials and Supplies– Each Service Board records its inventory at the lower of cost or market. The CTA and Metra use the average-cost method and Pace uses the first-in/first-out method to determine cost.

Compensated Absences– All four entities have recorded liabilities for vested vacation time in the year the time was earned. The entities account for compensated absences under GASB Statement No. 16, Accounting for Compensated Absences, whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability.

Revenues– The Combined Entities have five principal sources of revenue and other financial sources: (1) farebox revenue; (2) retailers' occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Taxes); (3) funds appropriated to the RTA by statute through the state's Public Transportation Fund (PTF) established under the RTA Act; (4) state or federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the RTA Act; and (5) investment income and other miscellaneous revenue.

Farebox Revenue– A major source of revenue to the Service Boards is fares collected from riders. Each Service Board has its own fare structure and method for collection of fares. Farebox revenue is recognized when fares paid are initially valid for transportation services.

Sales Tax– Sections 4.03 and 4.03.1 of the RTA Act, 70 ILCS 3615/4.03, authorizes the RTA to impose a series of taxes within the six-county metropolitan region by a vote of nine of its directors: a sales tax, a car rental tax, a motor fuel tax, an off-street parking tax, and a replacement vehicle tax.

The Act authorizes the RTA to impose a Retailers' Occupation Tax (ROT), a Service Occupation Tax (SOT) and a Use Tax (UT). The RTA imposed this tax at the maximum rate in 1979. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes.

The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 0.75% in Cook County and 0.25% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result the RTA tax on food and drugs is imposed at a rate of 1% throughout the six-county area.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate is identical to the ROT. The tax base is identical to the State service occupation tax base.

The UT is imposed on persons living in the six-county area for the privilege of using a vehicle purchased outside the six-county area that must be registered with the State. Unlike the State Use Tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed those portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State but registered or titled with a state agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the Replacement Fund). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a state agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the Reform Fund). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of the tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

SERVICE BOARD	COLLECTED WITHIN CHICAGO	COLLECTED WITHIN COOK COUNTY OUTSIDE CHICAGO	COLLECTED IN DUPAGE, KANE, LAKE, MCHENRY AND WILL COUNTIES
CTA	100%	30%	
Metra		55%	70%
Pace		15%	30%

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of the total sales taxes collected to which it is entitled by the amended Act. The remaining portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

Public Transportation Fund– In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the Public Transportation Fund (PTF), an amount equal to 25% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes). These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2008 fiscal year which will end on June 30, 2008.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement– In the State's fiscal year 2007, which ends June 30, 2007, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation (IDOT) is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2007 and June 30, 2008, the grants were in the amount of $37.3 million and $36.7 million, respectively. The state also provided RTA with Advance Reduced Fare grants in the amount of $15.6 million. The revenue is recognized on the modified accrual basis when the amount is requested from IDOT.

Additional State Assistance/Additional Financial Assistance– The State has authorized Additional State Assistance (ASA) which is supplemental financing for the RTA's Strategic Capital Improvement Program (SCIP) bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of refunding or advance refunding SCIP bonds, less interest earned on the remaining bond proceeds, or (ii) $55 million per year. The RTA recognized $39.7 million of ASA in 2007.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance (AFA) to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million and $100 million in the State's fiscal year 2007 and 2008, respectively. The RTA recognized $78 million of AFA in 2007.

In accordance with the Act, earnings on certain investments in the Capital Projects Fund are credited to the Debt Service Fund. This is done to compensate for prior State fiscal year earnings reducing the actual ASA and AFA grant amounts.

Management's Use of Estimates– The preparation of financial statements in conformity with the Act requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

5. BUDGET AND BUDGETARY ACCOUNTING

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the general fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States except for RTA capital expenditures and capital grants to Service Boards. The RTA capital expenditures and capital grants to Service Boards are budgeted on a project basis, which normally exceeds one year, and debt service payments, which are budgeted as transfers from the general fund. Budgets for RTA capital expenditures and capital grants to Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax agency fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end. There were several amendments to the 2007 budget. The 2007 budget (Ordinance 2006-78) was last revised on October 4, 2007 (Ordinances 2007-50 and 2007-58). These ordinances amended the 2007 RTA budget and the budgets of the CTA, Metra, and Pace.

Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations/expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from 85% sales tax receipts;
- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and
- The third source of funds credited against the budgeted funding amount is from RTA 15% sales tax receipts and other discretionary receipts.

The reimbursement of Service Boards' capital expenditures and the payment of PTF funds, 15% funds and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

6. LEASES

The RTA and CTA hold operating leases which are primarily for rent expense on the facilities they occupy. Metra has several operating leases, primarily for the use of passenger terminals. Pace has multi-year leases for vehicles and bus tires.

CTA

In 2003, Public Building Commission of Chicago (PBC) issued revenue bonds for the benefit of the CTA in the amount of $119 million. The bonds were issued to pay costs associated with the acquisition of real property and construction of a building and facilities, including certain furniture, fixtures, and equipment. The real property, building and facilities, and all furniture, fixtures, and equipment are owned by the PBC and leased to the CTA for use as its headquarters.

On October 26, 2006, the Public Building Commission of Chicago (PBC) issued Building Refunding Revenue Bonds for the benefit of the CTA in the amount of $91.3 million. The proceeds of the bonds were used to advance refund the Public Building Commission of Chicago, Series 2003 bonds. The principal amount of the bonds refunded was $111 million.

The proceeds from the sale of the 2006 bonds are being held in escrow under an escrow refunding agreement and have been invested in United States Treasury obligations. The principal amount of such obligations, together with interest earned thereon, will permit the payment of principal and interest on the refunded bonds up to and including their respective call dates. The refunded bonds are treated in the financial statements as defeased obligations. Accordingly, neither the trust account assets nor the refunded bonds appear in the accompanying financial statements. This refunding decreased debt service payment over the next 27 years by approximately $388,000 resulting in an economic gain of approximately $20.4 million. Based upon the requirements of GASB Statement No.23, *Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Accounts*, the CTA recorded a deferred amount (loss) on refunding of $2.4 million. This amount is recorded as a component of long-term debt in the accompanying balance sheets.

The new bonds are payable from and secured by the lease entered into between the PBC and the CTA and are considered a general obligation of the CTA payable from any lawfully available funds. Bond issue costs and premium related to this transaction are presented as such on the balance sheets. The present value of the future payments to be made by the CTA under the lease of approximately $89 million is reflected in the accompanying December 31, 2007 balance sheet as a capital lease obligation.

In 2003, the CTA entered into a lease/leaseback agreement with a third party pertaining to certain buses with a book value of $22.1 million as of December 31, 2007. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $15 million is reflected in the accompanying December 31, 2007 balance sheet as capital lease obligation.

During 2002, the CTA entered into two lease and leaseback agreements with a third party pertaining to certain buses (lots 1 and 2), with a book value of $35.8 million as of December 31, 2007. Under

the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $106.3 million is reflected in the accompanying December 31, 2007 balance sheet as capital lease obligation.

During 2002, the CTA entered into a lease and leaseback agreement with a third party pertaining to certain qualified technological equipment (QTE), with a book value of $25.3 million as of December 31, 2007. Under the QTE lease agreement, which provides certain cash and tax benefits to the third party, the CTA entered into a long term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $174 million is reflected in the accompanying December 31, 2007 statement of net assets as capital lease obligation.

During 1998, the CTA entered into a lease/leaseback agreement (1998 Agreement) with a third party pertaining to a rail line (Green Line), with a book value of $254.7 million as of December 31, 2007. The 1998 Agreement, which provides certain cash and tax benefits to the third party, also provides for a trust established by the CTA to lease the rail line to an equity investor trust (1998 Equity Trust), which would then lease the facilities back to another trust established by the CTA under a separate lease (1998 Lease). The present value of the future payments to be made by the CTA under the lease of approximately $271 million is reflected in the accompanying December 31, 2007 statement of net assets as capital lease obligation.

During 1997, the CTA entered into four lease/leaseback agreements (1997 Agreements) with a third party pertaining to certain of its facilities having a book value of $50.3 million as of December 31, 2007. The 1997 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (Equity Trust), which would then lease the facilities back to another trust established by the CTA under separate leases (Leases). The CTA received certain funds as prepayments by the Equity Trust. The funds have been deposited in designated investment accounts sufficient to meet the payments required under the Leases, and are recorded as assets restricted for repayment of leasing commitments. The Equity Trust has a security interest in the deposits to guarantee the payments due from the CTA and may take possession of the facilities upon a default by the CTA under the Lease. No other lease payments are required until the end of each lease. The present value of the future payments to be made by the CTA under the Leases (net of the payment due from the Equity Trust in 2023 and 2024) of approximately $32.5 million is reflected in the accompanying December 31, 2007 balance sheet as a capital lease obligation.

In connection with the 1997 Agreements, the CTA also received proceeds of $11.9 million. The Federal Transit Administration (FTA) has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1996, the CTA entered into similar lease/leaseback agreements (1996 Agreements) with a third party pertaining to certain of its facilities, with a book value of $54.4 million as of December 31, 2007. The 1996 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (1996 Equity Trust), which would then lease the facilities back to another trust established by the CTA under a separate lease (the 1996 Lease). The present value of the future payments to be made by the CTA under the leases (net of the payment due from the 1996 Equity Trust in 2024) of approximately $32.6 million is reflected in the accompanying December 31, 2007 balance sheet as a capital lease obligation.

In connection with the 1996 Agreements, the CTA also received proceeds of $10.9 million and agreed to make approximately $80 million of improvements to one of the facilities. The FTA has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1995, the CTA entered into sale/leaseback agreements (1995 Agreements) with third parties. The 1995 Agreements provided for the CTA to sell and lease back certain rail equipment totaling $487.1 million at cost for a period of 19 years beginning on the date of the respective transaction. As of December 31, 2007, the total payments due under the 1995 Agreements are recorded as capital lease obligations totaling $1,030.3 billion. The CTA has deposited funds into designated cash and investment accounts sufficient to meet all of its payment obligations throughout the terms of the leases, and recorded such amounts as assets restricted for repayment of leasing commitments.

Change in Capital Lease Obligations:

Changes in capital leases for the year ended December 31, 2007 are as follows (in thousands of dollars):

2007	BEGINNING BALANCE	ADDITIONS*	PRINCIPAL PAID	ENDING BALANCE	INTEREST PAID	DUE IN ONE YEAR
2003 (Buses)	$ 23,555	$ 840	$ (9,373)	$ 15,022	$ 840	–
2002 (Buses)	101,157	5,098	–	106,255	5,098	–
2002 (QTE)	169,877	10,784	(6,928)	173,733	10,784	103,094
1998 (Green)	276,971	18,912	(24,852)	271,031	18,912	38,183
1997 (Garages)	30,194	2,270	–	32,464	2,270	–
1996 (Skokie/Racine)	30,377	2,234	–	32,611	2,233	–
1995 (Pickle)	1,018,357	75,681	(63,698)	1,030,340	75,680	63,698
Total lease/ leasebacks	1,650,488	115,819	(104,851)	1,661,456	115,817	204,975
2006 PBC lease	91,340	–	(2,375)	88,965	3,794	1,790
Total capital lease obligation	$1,741,828	$ 115,819	$ (107,226)	$1,750,421	$119,611	$206,765

* Additions include accretion of interest.

The following table sets forth the aggregate amounts due under the sublease agreements:

Future Minimum Lease Payments: As of December 31, 2007, future minimum lease payments for capital leases, in the aggregate, are as follows (in thousands of dollars):

2008	$ 211,149
2009	95,772
2010	109,211
2011	99,210
2012	98,004
2013 - 2017	1,699,763
2018 - 2022	367,430
2023 - 2027	218,710
2028 - 2032	30,939
2033	6,188
Total future minimum payments	$ 2,936,376
Less interest	(1,185,955)
Present value of minimum lease payments	$ 1,750,421

The present value of all future payments to be made by the CTA under all its leases of approximately $1.8 million is reflected in the accompanying December 31, 2007 statement of net assets as capital lease obligations.

Metra

On September 18, 1998, Metra entered into a transaction to lease 174 railcars to three equity investors (headlease) and simultaneously subleased the railcars back (sublease). Under these agreements, Metra maintains the right to use the railcars and is also responsible for their continued maintenance and insurance. Metra's sublease arrangements have been recorded as long-term obligations for accounting purposes.

At closing, the railcars had a fair market value of approximately $296.9 million and a book value of $262.9 million. As part of the headlease agreements, Metra received prepayments equivalent to the net present value of the headlease obligations totaling approximately $274 million.

Metra transferred approximately $177.4 million and $52.9 million of the prepayment proceeds to third parties, in accordance with the terms of debt and equity payment undertaking agreements, respectively. These agreements constitute commitments by the debt and equity payment undertakers to pay Metra's sublease and buyout options, under the terms of the subleases. The debt payment undertaker and equity payment undertaker are finance companies. Both the debt payment undertaker and the equity payment undertaker have AA+ and Aa2 bond ratings from Standard & Poor and Moody, respectively. Both finance companies' performance under the agreement is guaranteed by their parent company which carries the same ratings.

In connection with the transaction, Metra recognized $43.7 million as leasehold revenue in 1998. The net present value of the future payments due under the subleases has been recorded as a liability on the accompanying balance sheet. Since the debt and equity payment undertaking agreements have been structured to meet all future obligations under the subleases, the related asset balances have been recorded to equal the sublease liabilities on the accompanying balance sheet.

The following table sets forth the aggregate amounts due under the sublease agreements:

Future Minimum Lease Payments: As of December 31, 2007, future minimum lease payments for capital leases, in the aggregate, are as follows (in thousands of dollars):

2008	$ 25,239,685
2009	28,481,563
2010	20,947,382
2011	20,947,382
2012	20,947,382
2013 - 2017	104,736,910
2018 - 2022	272,178,527
2023 - 2027	–
2028 - 2030	3,152,120
Total future minimum payments	$ 496,630,951
Less imputed interest	(220,188,943)
Present value of minimum lease payments	$ 276,442,008

The present value of minimum lease payments of the Metra lease is $276.4 million which is reflected in the accompanying December 31, 2007 statement of net assets as capital lease obligations.

Pace

During 2003, Pace entered into two lease and leaseback agreements and realized a gain of $2.4 million from the proceeds. The transactions allowed Pace to earn up-front economic cash benefit for transferring ownership (not legal title) of a group of assets to a taxpayer that could take advantage of the benefits of tax ownership.

The first lease and leaseback agreement with a third party pertained to certain buses (lot 1, 2, and 3) with a book value of $30.5 million as of December 31, 2007. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $57.3 million and is reflected in the accompanying December 31, 2007 statement of net assets as the total of the current and long-term portions of Capital lease obligation.

The second lease and leaseback agreement with a third party pertained to certain buses (lot 4) with a book value of $17.5 million as of December 31, 2007. Under the bus lease agreements, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $23.3 million and is reflected in the accompanying December 31, 2007 statement of net assets as the total of the current and long-term portions of the Capital lease obligation.

2007	BEGINNING BALANCE	ADDITIONS	REDUCTIONS	ENDING BALANCE	INTEREST EXPENSE	DUE IN ONE YEAR
2003 (Buses)	$ 64,554,752	$ 4,086,123	$ 11,367,085	$ 57,273,790	$ 4,086,123	–
2003 (Buses)	$ 35,460,973	$ 2,394,005	$ 14,508,950	$ 23,346,028	$ 2,394,005	–
Total	$ 100,015,725	$ 6,480,128	$ 25,876,035	$ 80,619,818	$ 6,480,128	–

As described above, Pace entered into two lease financing agreements with a third party in 2003.

The following table sets forth the aggregate amounts due under the sublease agreements:

2008	–
2009	–
2010	–
2011	$ 1,438,538
2012	
2013 - 2016	124,399,915
Total future minimum payments	$ 125,838,453
Less interest	(45,218,635)
Present value of minimum lease payments	$ 80,619,818

The present value of the future payments including the purchase option to be made by Pace under these leases are approximately $80.6 million and is reflected in the accompanying December 31, 2007 statement of net assets as the total of the current and long-term portions of the capital lease obligation.

7. COMMITMENTS AND CONTINGENCIES

Each of the entities has various commitments that have arisen in the normal course of operations. None is expected to have a material adverse impact on its financial position as presented.

Each of the entities has also established liabilities for potential legal judgments to satisfy claims against the entity.

The RTA has also established a Loss Financing Plan to cover funding of losses incurred by the RTA and the Service Boards over certain established limits.

8. CASH AND INVESTMENTS

The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/1, et seq. Each of the Combined Entities has established its own investment policy which is in line with the State statute or, in some cases, more restrictive.

The Combined Entities have on hand, as of December 31, 2007, $820 million of cash and investments. Of this amount, $389 million is restricted for self-insurance and other damage reserve liabilities, debt service, health insurance claims, and capital projects. In addition, CTA, Metra, and Pace hold $2.33 billion of investments in other assets for employee pension benefits, damage liabilities, and capital lease obligations, which are recorded as other assets in the financial statements.

9. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	JANUARY 1, 2007	NEW ISSUES	CURRENT RETIREMENTS	DECEMBER 31, 2007
1990A	$ 60,795,000	–	–	$ 60,795,000
1991A	55,745,000	–	–	55,745,000
1992A* & 1992B	46,435,000	–	$ 6,250,000	40,185,000
1994A & 1994B	24,395,000	–	–	24,395,000
1994C* & 1994D	66,300,000	–	4,095,000	62,205,000
1997 Refunding	75,455,000	–	4,625,000	70,830,000
1999* Refunding	285,505,000	–	5,395,000	280,110,000

2001A*	92,295,000	–	1,785,000	90,510,000
2001B* Refunding	32,985,000	–	1,555,000	31,430,000
2002A*	150,450,000	–	2,690,000	147,760,000
2002B	163,855,000	–	9,710,000	154,145,000
2003A*	251,310,000	–	4,335,000	246,975,000
2003B	145,210,000	–	2,545,000	142,665,000
2003C Refunding	10,200,000	–	3,240,000	6,960,000
2004A*	255,005,000	–	4,190,000	250,815,000
2005B Refunding	145,315,000	–	2,940,000	142,375,000
2006A*	250,350,000	–	1,050,000	249,300,000
Total	$ 2,351,395,000	$ –	$ 59,135,000	$ 2,292,260,000

* Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2007, the total general obligation bonds payable of $2,292,260,000 are classified as current and long-term in the Statement of Net Assets in the amounts of $64,685,000 and $2,292,260,000, respectively.

Advance Refundings–On June 21, 1993, the RTA advance refunded a portion of its 1990A Series general obligation bond issue. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $20,350,000 of outstanding general obligation bonds (1990A Series) are considered defeased, and therefore, been removed from the financial statements.

On January 19, 1996, the RTA advance refunded a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $60,300,000 of outstanding general obligation bonds (1994B Series) and $75,605,000 of

outstanding general obligation bonds (1994D Series) are considered defeased, and therefore, been removed from the financial statements.

On September 18, 1997, the RTA advance refunded a portion of its 1990A, 1991A, 1992B, and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $4,230,000 of outstanding general obligation bonds (1990A Series), $29,265,000 of outstanding general obligation bonds (1991A Series), $18,170,000 of outstanding general obligation bonds (1992B Series), and $47,465,000 of outstanding general obligation bonds (1993B Series) are considered defeased, and therefore, been removed from the financial statements.

On August 24, 1999, the RTA advance refunded a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation refunding bonds (1999 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $113,895,000 of outstanding general obligation bonds (1992A Series), $9,720,000 of outstanding general obligation bonds (1993A), $142,615,000 of outstanding general obligation bonds (1994A) and $21,955,000 of outstanding general obligation bonds (1994C) are considered defeased, and therefore, been removed from the financial statements.

On March 1, 2001, the RTA advance refunded a portion of its 1993A Series general obligation bond issues. The RTA issued $37,715,000 of general obligation refunding bonds (2001B Series). Proceeds from the issuance amounted to $40,437,798 which includes a premium of $2,554,206. The proceeds are to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $37,750,000 of outstanding general obligation bonds (1993A) are considered defeased, and therefore, been removed from the financial statements.

On May 1, 2003, the RTA advance refunded a portion of its 1993C Series general obligation bond issues. The RTA issued $19,055,000 of general obligation refunding bonds (2003C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2007, $19,150,000 of outstanding general obligation bonds (1993C) are considered defeased, and therefore, been removed from the financial statements.

On May 2, 2005, the RTA issued $ 148 million in General Obligation bonds with a variable rate which resets weekly to refund $144 million of outstanding 1996A Series bonds with an average interest rate of 5.5 percent. The net proceeds of $147 million (after payment of $892 thousand for issuance costs) were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust with an escrow agent to call the 1996A Series bonds June 1, 2005. As a result, the 1996A Series bonds are considered to be defeased and the liability for those bonds has been removed from the financial statements.

Debt Service Requirements–The "debt service requirements" set forth in the following tables represent payments due the trustee from the RTA, as required by the respective bond agreements. The "principal" columns represent principal payments due bondholders from the trustee.

1990 General Obligation Bonds – In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

The Series 1990A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 6.00% to 7.15% on November 1, 1990 and semiannually thereafter on May 1 and November 1 in each remaining year.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST	TOTAL
2008	$ –	$ 4,377,240	$ 4,377,240
2009	–	4,377,240	4,377,240
2010	3,810,000	4,377,240	8,187,240

2013-2022	–	–	–
Total	$ 40,185,000	$ 7,182,080	$ 47,367,080

1994 General Obligation Bonds – In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00% on December 1, 1994 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST	TOTAL
2008		$ 1,951,600	$ 1,951,600
2009		1,951,600	1,951,600
2010		1,951,600	1,951,600
2011		1,951,601	1,951,601
2012		1,951,600	1,951,600
2013-2024	24,395,000	7,844,199	32,239,199
Total	$ 24,395,000	$ 17,602,200	$ 41,997,200

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST	TOTAL
2008	$ 4,420,000	$ 4,649,612	$ 9,069,612

2002 General Obligation Bonds – In March 2002, the RTA issued $160 million in General Obligation Bonds, Series 2002A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2002A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.00% to 6.00% on July 1, 2002 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2002A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2008	$ 2,835,000	$ 8,698,938	$ 11,533,938
2009	2,985,000	8,557,188	11,542,188
2010	3,150,000	8,407,938	11,557,938
2011	3,315,000	8,250,438	11,565,438
2012	3,495,000	8,068,113	11,563,113
2013-2017	20,660,000	37,090,375	57,750,375
2018-2022	27,280,000	30,306,300	57,586,300
2023-2027	36,150,000	21,117,600	57,267,600
2028-2032	47,890,000	8,943,300	56,833,300
Total	$ 147,760,000	$ 139,440,190	$ 287,200,190

In June 2002, the RTA issued $200 million in General Obligation Bonds, Series 2002B, to provide interim funding, as needed for a portion of the costs in connection with the reconstruction and expansion of rapid transit facilities operated by the CTA and to fund other public transportation projects.

The Series 2002B Bonds mature on June 1 over a seventeen-year period and interest is payable at rates ranging from 3.00% to 5.50% on December 1, 2002, and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2002B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2008	$ 10,060,000	$ 8,053,513	$ 18,113,513
2009	10,450,000	7,515,125	17,965,125
2010	10,870,000	6,941,888	17,811,888

2012	11,815,000	5,695,175	17,510,175
2013-2017	67,705,000	18,018,931	85,723,931
2018-2019	31,920,000	1,736,932	33,656,932
Total	$ 154,145,000	$ 54,293,089	$ 208,438,089

2003 General Obligation Bonds – In May 2003, the RTA issued $260 million in General Obligation Bonds, Series 2003A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2003A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 2.00% to 5.50% on January 1, 2004 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2003A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2008	$ 4,555,000	$ 13,995,825	$ 18,550,825
2009	4,790,000	13,768,075	18,558,075
2010	5,045,000	13,528,575	18,573,575
2011	5,310,000	13,276,325	18,586,325
2012	5,600,000	13,010,825	18,610,825
2013-2017	32,980,000	60,338,400	93,318,400
2018-2022	43,095,000	50,245,750	93,340,750
2023-2027	56,160,000	36,962,850	93,122,850
2028-2032	72,565,000	18,569,400	91,134,400
2033	16,875,000	1,012,500	17,887,500
Total	$ 246,975,000	$ 234,708,525	$ 481,683,525

In January 2003, the RTA issued $150 million in General Obligation Bonds, Series 2003B, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2003B Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 4.00% to 5.50% on June 1, 2003 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2003B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS PRINCIPAL	INTEREST	TOTAL
2008	$ 2,675,000	$ 7,763,925	$ 10,438,925
2009	2,810,000	7,654,225	10,464,225
2010	2,955,000	7,538,925	10,493,925
2011	3,105,000	7,402,200	10,507,200
2012	3,265,000	7,242,950	10,507,950

2018-2022	24,805,000	27,290,565	52,095,565
2023-2027	32,245,000	19,489,638	51,734,638
2028-2032	41,930,000	9,095,064	51,025,064
2033	9,790,000	281,463	10,071,463
Total	$ 142,665,000	$ 127,050,294	$ 269,715,294

In May 2003, the RTA issued $19 million in General Obligation Bonds, Series 2003C, to provide funds to refund, in advance of maturity, the RTA's outstanding series 1993C Bonds, maturing June 1 in the years 2004-2009, in the aggregate amount of $19 million.

The Series 2003C Bonds mature on July 1 over a six-year period and interest is payable at rates ranging from 2.00% to 5.00% on January 1, 2004 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2003C Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST	TOTAL
2008	$ 3,395,000	$ 348,000	$ 3,743,000
2009	3,565,000	178,250	3,743,250
Total	$ 6,960,000	$ 526,250	$ 7,486,250

2004 General Obligation Bonds – In October 2004, the RTA issued $260 million in General Obligation Bonds, Series 2004A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2004A Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.00% to 5.75% on June 1, 2005 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2004A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST	TOTAL
2008	$ 4,405,000	$ 13,751,163	$ 18,156,163
2009	4,635,000	13,525,163	18,160,163
2010	4,870,000	13,287,538	18,157,538
2011	5,120,000	13,037,788	18,157,788
2012	5,385,000	12,775,163	18,160,163
2013-2017	31,360,000	59,222,739	90,582,739

2023-2027	52,815,000	36,662,745	89,477,745
2028-2032	68,670,000	19,754,700	88,424,700
2033-2034	32,935,000	1,918,631	34,853,631
Total	$ 250,815,000	$ 233,124,949	$ 483,939,949

2005 General Obligation Bonds – In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005-2025, in the aggregate amount of $147 million. The Series 2005B Bonds mature on June 1 over a twenty year period and interest is payable at variable rates which reset weekly, based on current market rates.

Debt service requirements on the Series 2005B Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST*	TOTAL
2008	$ 3,070,000	$ 4,647,720	$ 7,717,720
2009	6,535,000	4,489,238	11,024,238
2010	6,850,000	4,268,385	11,118,385
2011	7,210,000	4,036,395	11,246,395
2012	7,590,000	3,792,195	11,382,195
2013-2017	21,700,000	15,811,291	37,511,291
2018-2022	49,320,000	11,561,057	60,881,057
2023-2025	40,100,000	1,836,121	41,936,121
Total	$ 142,375,000	$ 50,442,402	$ 192,817,402

* Interest was calculated using a rate of 3.3%.

2006 General Obligation Bonds – In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

The Series 2006A Bonds mature on July 1, over a thirty year period and interest is payable at rates ranging from 4.25% to 5.00% on January 1, 2007 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2006A Bonds to maturity are set forth below:

YEAR ENDING DECEMBER 31	DEBT SERVICE REQUIREMENTS		
	PRINCIPAL	INTEREST*	TOTAL
2008	$ 3,385,000	$ 12,210,531	$ 15,595,531
2009	3,625,000	12,041,281	15,666,281
2010	3,780,000	11,860,031	15,640,031
2011	3,955,000	11,671,031	15,626,031
2012	4,150,000	11,473,281	15,623,281
2013-2017	24,890,000	53,995,156	78,885,156
2018-2022	40,540,000	46,952,656	87,492,656
2023-2027	87,420,000	32,385,906	119,805,906
2028-2032	40,755,000	11,833,338	52,588,338
2033-2035	36,800,000	3,860,775	40,660,775
Total	$ 249,300,000	$ 208,283,988	$ 457,583,988

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $76 million in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2007.

10. PENSION

All eligible employees of the Combined Entities are covered under a pension plan. RTA employees, as well as nonunion employees of Metra and Pace, are covered under the RTA Pension Plan, which is a multi-employer, noncontributory, defined benefit cost sharing plan and trust. The union employees of Metra and Pace are covered under various other plans as required by their collective bargaining agreements.

The CTA maintains two single-employer defined benefit pension plans, the Employees' Retirement Plan and the Supplemental Retirement Plan, covering substantially all full-time permanent union

and nonunion employees and Chicago Transit Board members. The Employees' Retirement Plan is governed by the terms of the employees' collective bargaining agreement. The Supplemental Retirement Plan, which includes the Retirement Plan for Board Members and the Supplemental Retirement Plan for selected Officers, Executives, Supervisory and Professional Employees, provides benefits, in addition to the Employees' Retirement Plan, to management employees in certain employment classifications and Chicago Transit Board members.

11. REGION-WIDE FINANCIAL INFORMATION

The RTA management has elected to present certain region-wide financial information. The purpose of this information is to provide a total overview of transportation-related operations in the Northeastern Illinois region. This information includes the transportation-related results of the Service Boards' affiliated carriers. Accordingly, this region-wide information is presented in the combining region-wide schedules of revenues and expenditures and the combining region-wide statement of revenues and expenditures—budget and actual.

The basic financial statements of the RTA and the Service Boards used to prepare the combining statement of revenues and expenses do not include the aggregate of system-generated revenues and costs. The combining region-wide schedules of revenues and expenditures include the aggregate of all system generated revenues and costs.

For purposes of the system-generated revenues recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with accounting principles generally accepted in the United States, with certain allowable adjustments as enumerated in the Act. Costs funded by Federal capital grants are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act.

The Act requires that the aggregate of all system-generated revenues equal at least 50% of the aggregated costs of providing such public transportation.

For 2007, the region-wide system-generated revenues recovery ratio is calculated from the Combining Region-Wide Schedules of Revenues and Expenditures—(Budget and Actual Budget Basis) as follows:

SYSTEM-GENERATED REVENUES RECOVERY RATIO
(in thousands)

	REVENUES	EXPENDITURES
CTA*	$ 580,182	$ 1,100,973
Metra**	291,841	525,397
Pace***	55,826	166,183
RTA****	11,504	27,891
Total	$ 939,353	$ 1,820,444

The RTA Board (Ordinance 2005-06) authorized the exclusion of added security costs from the Service Board expenditures including the allowable adjustments specified in the RTA Act. The amount that exceeds the RTA Act exclusion is added back to RTA system-generated expenses to calculate the System-Generated Revenue Recovery Ratio. The amount added to CTA and Metra expenditures was $16.2 million and $9.8 million, respectively. The region-wide system-generated revenues recovery ratio for 2007 equals 51.6%.

* The system-generated revenues recovery ratio for the CTA included leasehold revenues of $4.3 million and excluded CTA expenditures for security costs of $31.4 million. It also included in-kind services of $22 million, both as revenues and expenditures.

** Metra's $14.8 million security costs, $15.3 million costs for lease of transportation facilities and $2.7 million for funded (depreciation) to carriers were deducted from expenditures.

*** Pace included in-kind services of $3.7 million both as revenues and expenditures.

**** The RTA subtracted $9.4 million unrealized gain on swap valuation to its revenues. Also, the RTA excluded all capital related depreciation expenses of $228 thousand.

These are allowable adjustments for the revenues recovery ratio computation per the Act. These adjustments are reflected in the region-wide information.

Also, in the RTA Act section 4.01(b) requires the RTA Board to determine that the level of fares charged for ADA paratransit services is sufficient to cause the aggregate of all projected revenues from such fares charged and received in each fiscal year to equal at least 10% of the aggregate costs of providing such ADA paratransit services in fiscal years 2007. However, PACE did not meet the 10% recovery ratio for Regional ADA Paratransit Services that was established in the state legislature and in the 2007 RTA budget marks. Pace ended the year with an 8.4% recovery ratio for Regional ADA Paratransit Services. The 2008 budget for ADA paratransit service adopted by the RTA meets the 10% recovery ratio requirement.

12. RECONCILIATION OF GOVERNMENT-WIDE TO REGION-WIDE REVENUES AND EXPENDITURES

RTA's government-wide financial statements do not include fiduciary fund financial statement information which is added in the region-wide presentation. As also stated in Note 11, in-kind services are added in the system-generated revenues and expenditures.

The following data (in thousands) reconciles the combining government-wide to region-wide schedules of revenues and expenditures:

	RTA	CTA	METRA	PACE
Government-wide revenues (page 30)	$ 510,414	$ 1,600,852	$ 757,471	$ 286,445
Federal operating grants				
Sales tax agency fund	694,423			
Pension trust fund	14,957			
In-kind services		22,000		3,673
Unrealized gain on swap valuation	(9,418)			
Region-wide revenues (page 31)	1,210,375	1,622,852	757,471	290,118
Government-wide expenditures (page 30)	526,822	1,932,117	780,141	284,187
Sales tax agency fund	694,423			
Pension trust fund	7,878			
In-kind services		22,000		3,673
Security costs		(31,363)	(14,773)	
Lease of transportation facilities			(15,325)	
Capital (Depreciation, disposals/additions)	(228)		(2,749)	
Region-wide expenditures (page 31)	1,228,896	1,922,754	747,294	287,860
Net revenues (expenditures)	$ (18,521)	$ (299,902)	$ 10,177	$ 2,257

13. SUBSEQUENT EVENTS

On January 18, 2008, New Legislation Public Act 95-708 became law. As a result, the RTA Act was amended to:

(1) Authorize additional funds to be raised, primarily from the RTA region and

(2) Enhance the RTA's responsibilities and accountability with respect to regional planning, fiscal oversight, and fare and service coordination.

This legislation also includes provisions to stabilize the long-term financial health of the CTA pension and retiree healthcare system. The legislation requires that the funding for the pension and retiree healthcare are separated, employee and employer contributions are increased, benefits are adjusted, governance is strengthened, bonds are issued and ongoing financial oversight by the Illinois Auditor General is established. The Chicago Transit Board has not yet approved the issuance of these bonds, however the CTA is preparing for this issuance predicated on the assumption that the bonds will be repaid with the proceeds of the additional funds provided to the CTA from the legislation.

On February 29, 2008, Hybrid Bus Lease; CTA finalized an agreement to lease 150 New Flyer articulated hybrid buses. Delivery of the new buses is expected to occur between Fall 2008 and Spring 2009. The terms of the agreement allow CTA to lease the buses for 12 years and retain ownership at the conclusion of the lease. The lease cost will be approximately $13.4 million per year with a total principal amount of $120,522,624. Lease payments are due every June 1 and December 1 of each year, beginning on December 1, 2008.

On March 12, 2008, Capital Grant Receipts Revenue Bonds, Series 2008; the Chicago Transit Board approved the issuance of $250 million in Capital Grant Receipt Revenue Bonds to accelerate funding of capital improvement projects including the purchase of buses and rail cars, and slow zone elimination. The Board's approval means the CTA will issue up to $250 million in tax-exempt Capital Grant Receipts Revenue Bonds backed by the pledge of Federal Transit Administration Section 5307 Urbanized Area Formula Program and 5309 Fixed Guideway Modernization Program Funds.

In January 2008, the Illinois legislature approved bill HB656 "Mass Transit Funding and Reform" to provide additional operating funding for the region beginning in 2008. Metra anticipates its share of these funds will be $46.7 million in 2008. This bill also authorizes Metra to issue $1 billion in bonds for capital projects.

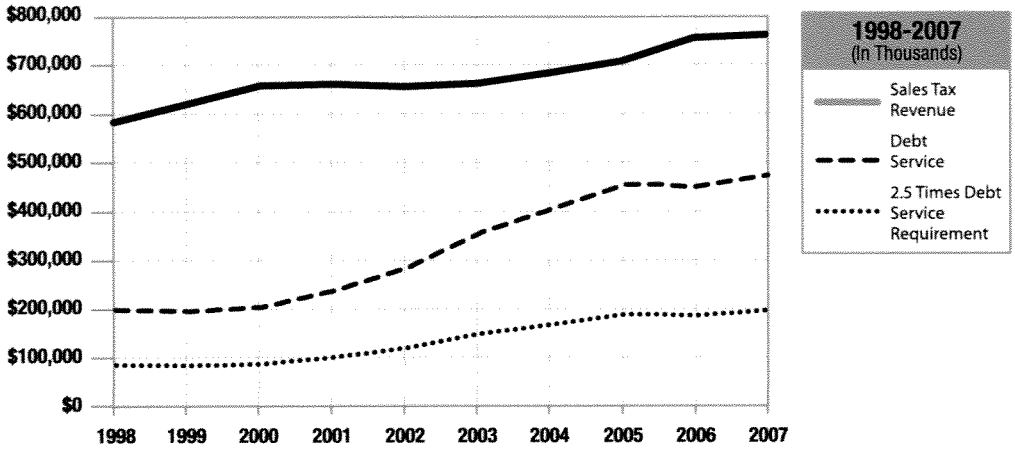
Total Legal Debt Margin				$ 231,245,000

COMPARISON OF SALES TAX REVENUE TO DEBT SERVICE REQUIREMENT



As defined in the Bond and Note General Ordinance, ordinance 85-39, Section 909 (3), revenue test required that all RTA revenues "shall equal or exceed two and one-half (2.5) times the maximum annual debt service requirements." In the graph presented above, the RTA compares 2.5 times debt service requirement to sales tax revenues, a major RTA revenue. In effect, the RTA significantly exceeds the revenue test defined in the ordinance.

SERVICE BOARD OPERATING CHARACTERISTICS

2007

CHICAGO TRANSIT AUTHORITY

Rapid Transit
- 8 rail routes
- 144 stations served
- 1,190 rapid transit cars
- 190.3 million riders per year
- 1331 STO* positions

Motor Bus
- 154 bus routes
- 2,222 buses
- 309.3 million riders per year
- 4,274 STO* positions

Other
- 1.1 billion passenger rail miles per year
- 12.1 million rail miles per year
- 762.3 million passenger miles per year
- 70.4 million vehicle miles per year
- 5,302 without STO* positions

* *STO is scheduled transit operators. This classification includes bus operators, motormen, conductors and customer assistants.*

*METRA COMMUTER RAIL DIVISION

- 489 route miles
- 1,185 miles of track
- 239 stations
- 144 locomotives
- 818 passenger cars
- 173 electric cars
- 702 weekly trains operated
- 95.7% on-time performance
- 33.5 million riders per year
- 83.3 million riders per year
- 3,978 full-time employees

Other
- 1.7 billion passenger miles per year
- 44.3 million vehicle miles per year

*All data excludes NICTD South Shore

PACE SUBURBAN BUS DIVISION

Fixed Route
- 152 regular routes
- 52 feeder routes
- 1 subscription routes
- 23 shuttle routes
- 584 vehicles in use during peak periods
- 33.5 million riders per year
- 1,322 full-time employees

Paratransit
- 62 local services
- 380 Pace owned lift-equipped buses in service
- 228 communities served
- 3.7 millions of riders per year
- 28 full-time employees

Other
- 678 vanpools in operation
- *1.9 million riders for the year*
- *29.4 million passenger miles per year*
- *26.7 million vehicle miles per year*

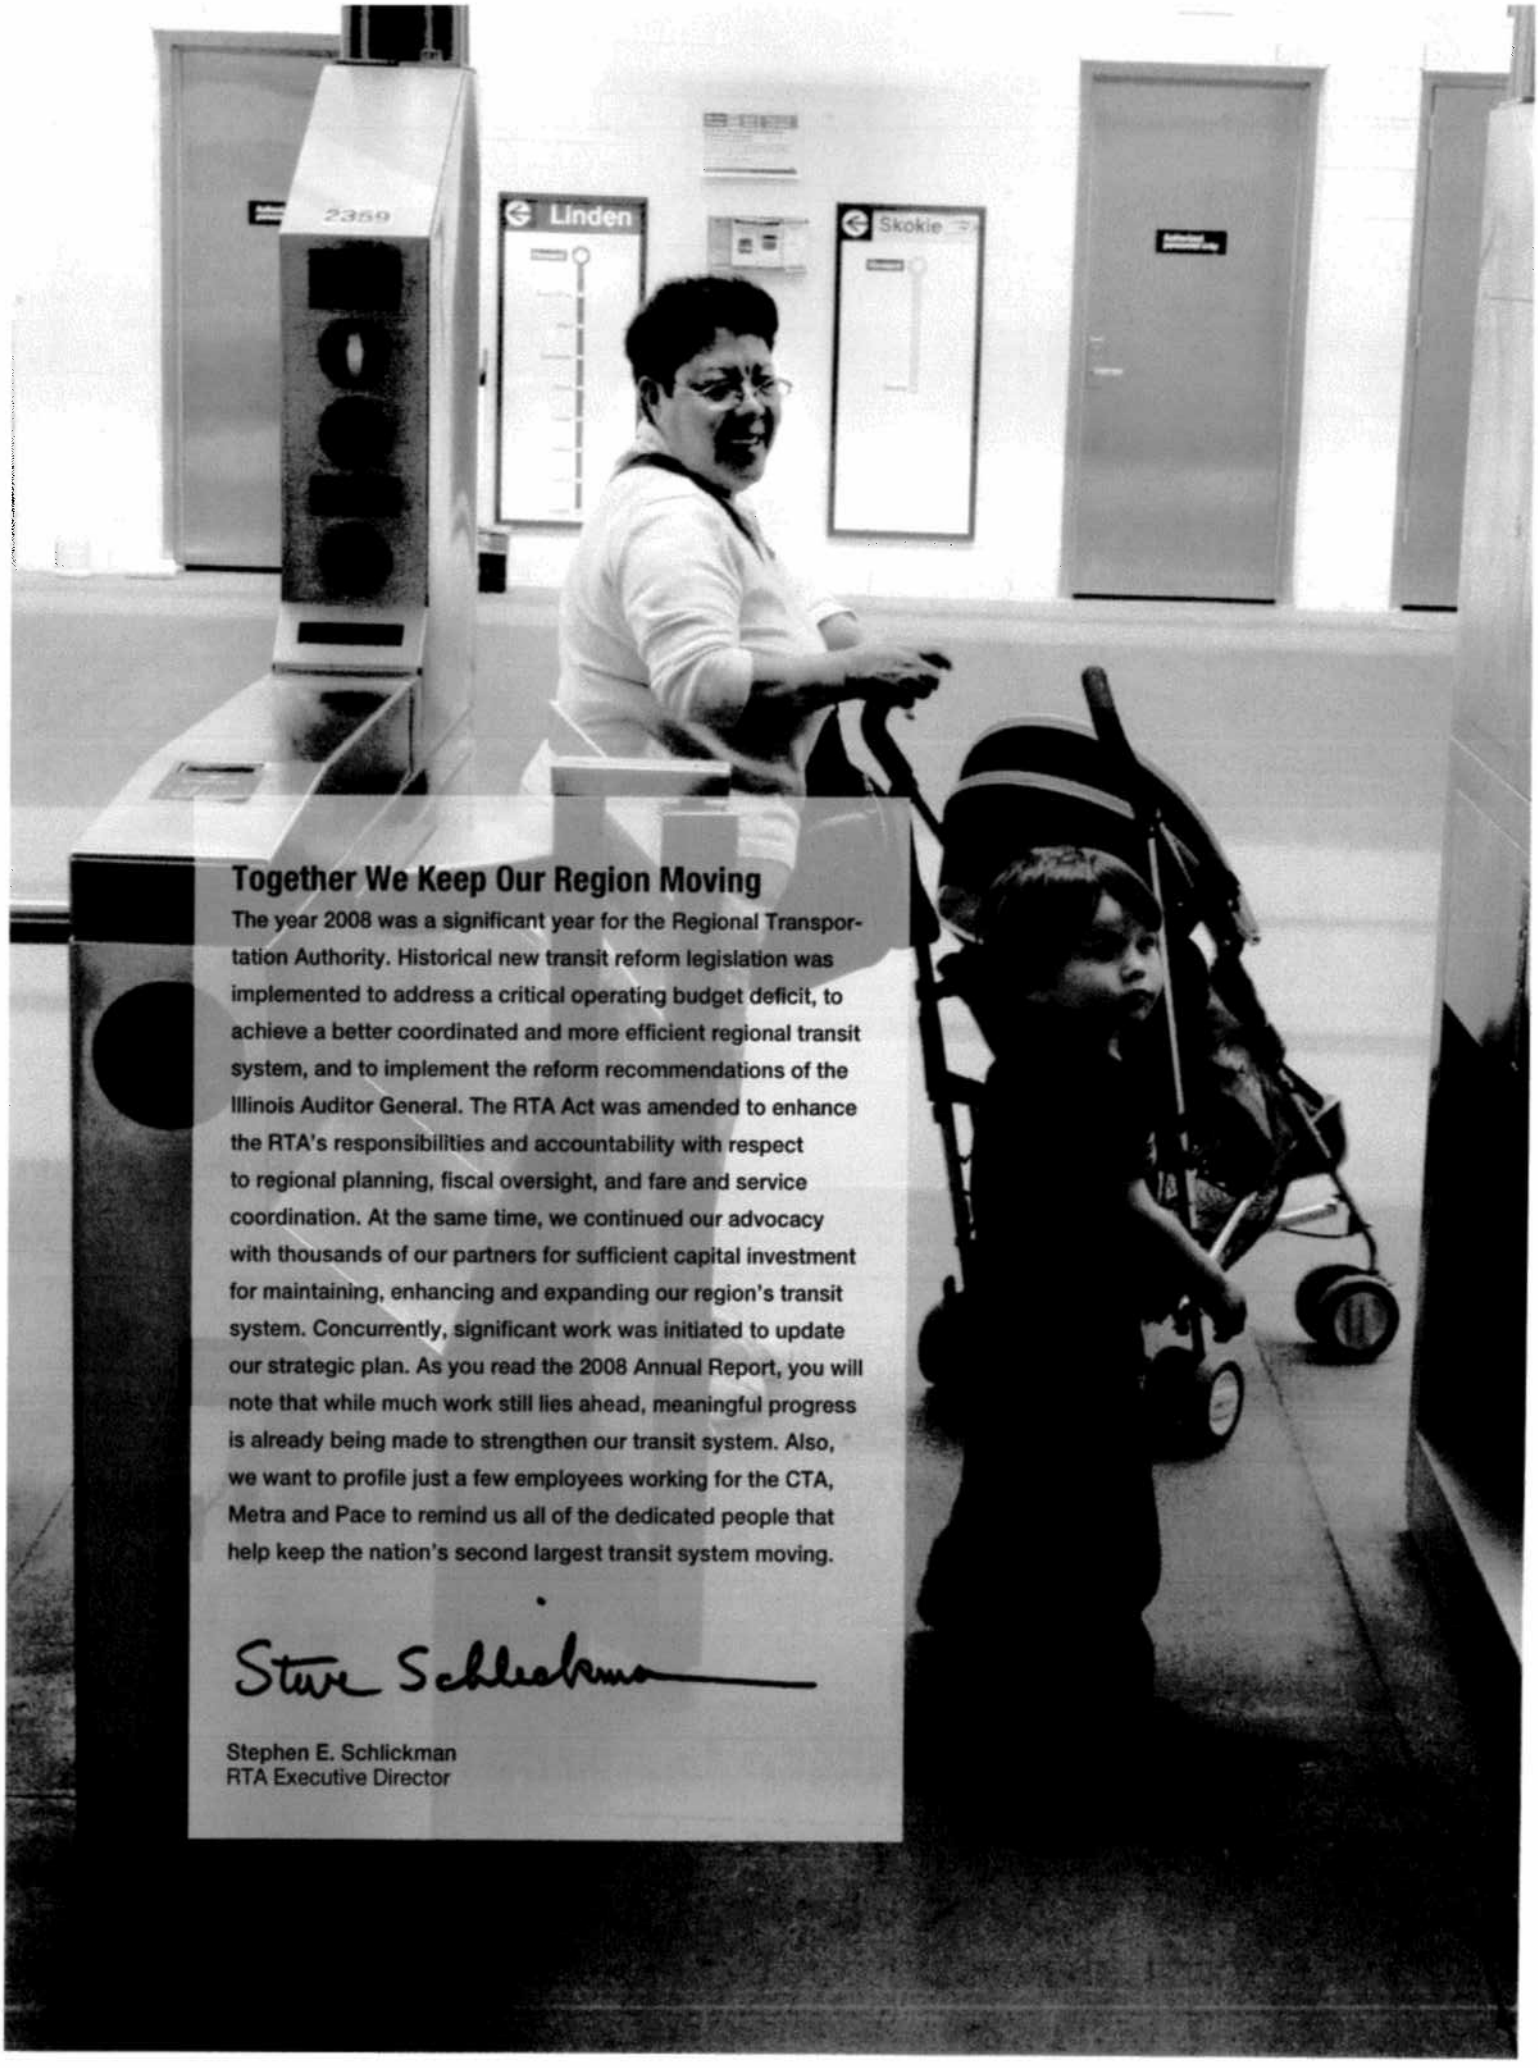
ANNUAL REPORT 2008

WE ARE THE RTA

REGIONAL TRANSPORTATION AUTHORITY



Together We Keep Our Region Moving

The year 2008 was a significant year for the Regional Transportation Authority. Historical new transit reform legislation was implemented to address a critical operating budget deficit, to achieve a better coordinated and more efficient regional transit system, and to implement the reform recommendations of the Illinois Auditor General. The RTA Act was amended to enhance the RTA's responsibilities and accountability with respect to regional planning, fiscal oversight, and fare and service coordination. At the same time, we continued our advocacy with thousands of our partners for sufficient capital investment for maintaining, enhancing and expanding our region's transit system. Concurrently, significant work was initiated to update our strategic plan. As you read the 2008 Annual Report, you will note that while much work still lies ahead, meaningful progress is already being made to strengthen our transit system. Also, we want to profile just a few employees working for the CTA, Metra and Pace to remind us all of the dedicated people that help keep the nation's second largest transit system moving.

Stephen E. Schlickman
RTA Executive Director

Over the past three years, the Regional Transportation Authority, in partnership with the CTA, Metra and Pace, has pursued a comprehensive effort to renew and remake our transit system. With the launch of our first joint strategic plan in 2006, through the adoption of operating funding legislation in January of 2008, and most recently with the approval of federal and state capital funds, we have embarked on this journey with a common goal of improving service for our 2 million daily riders.

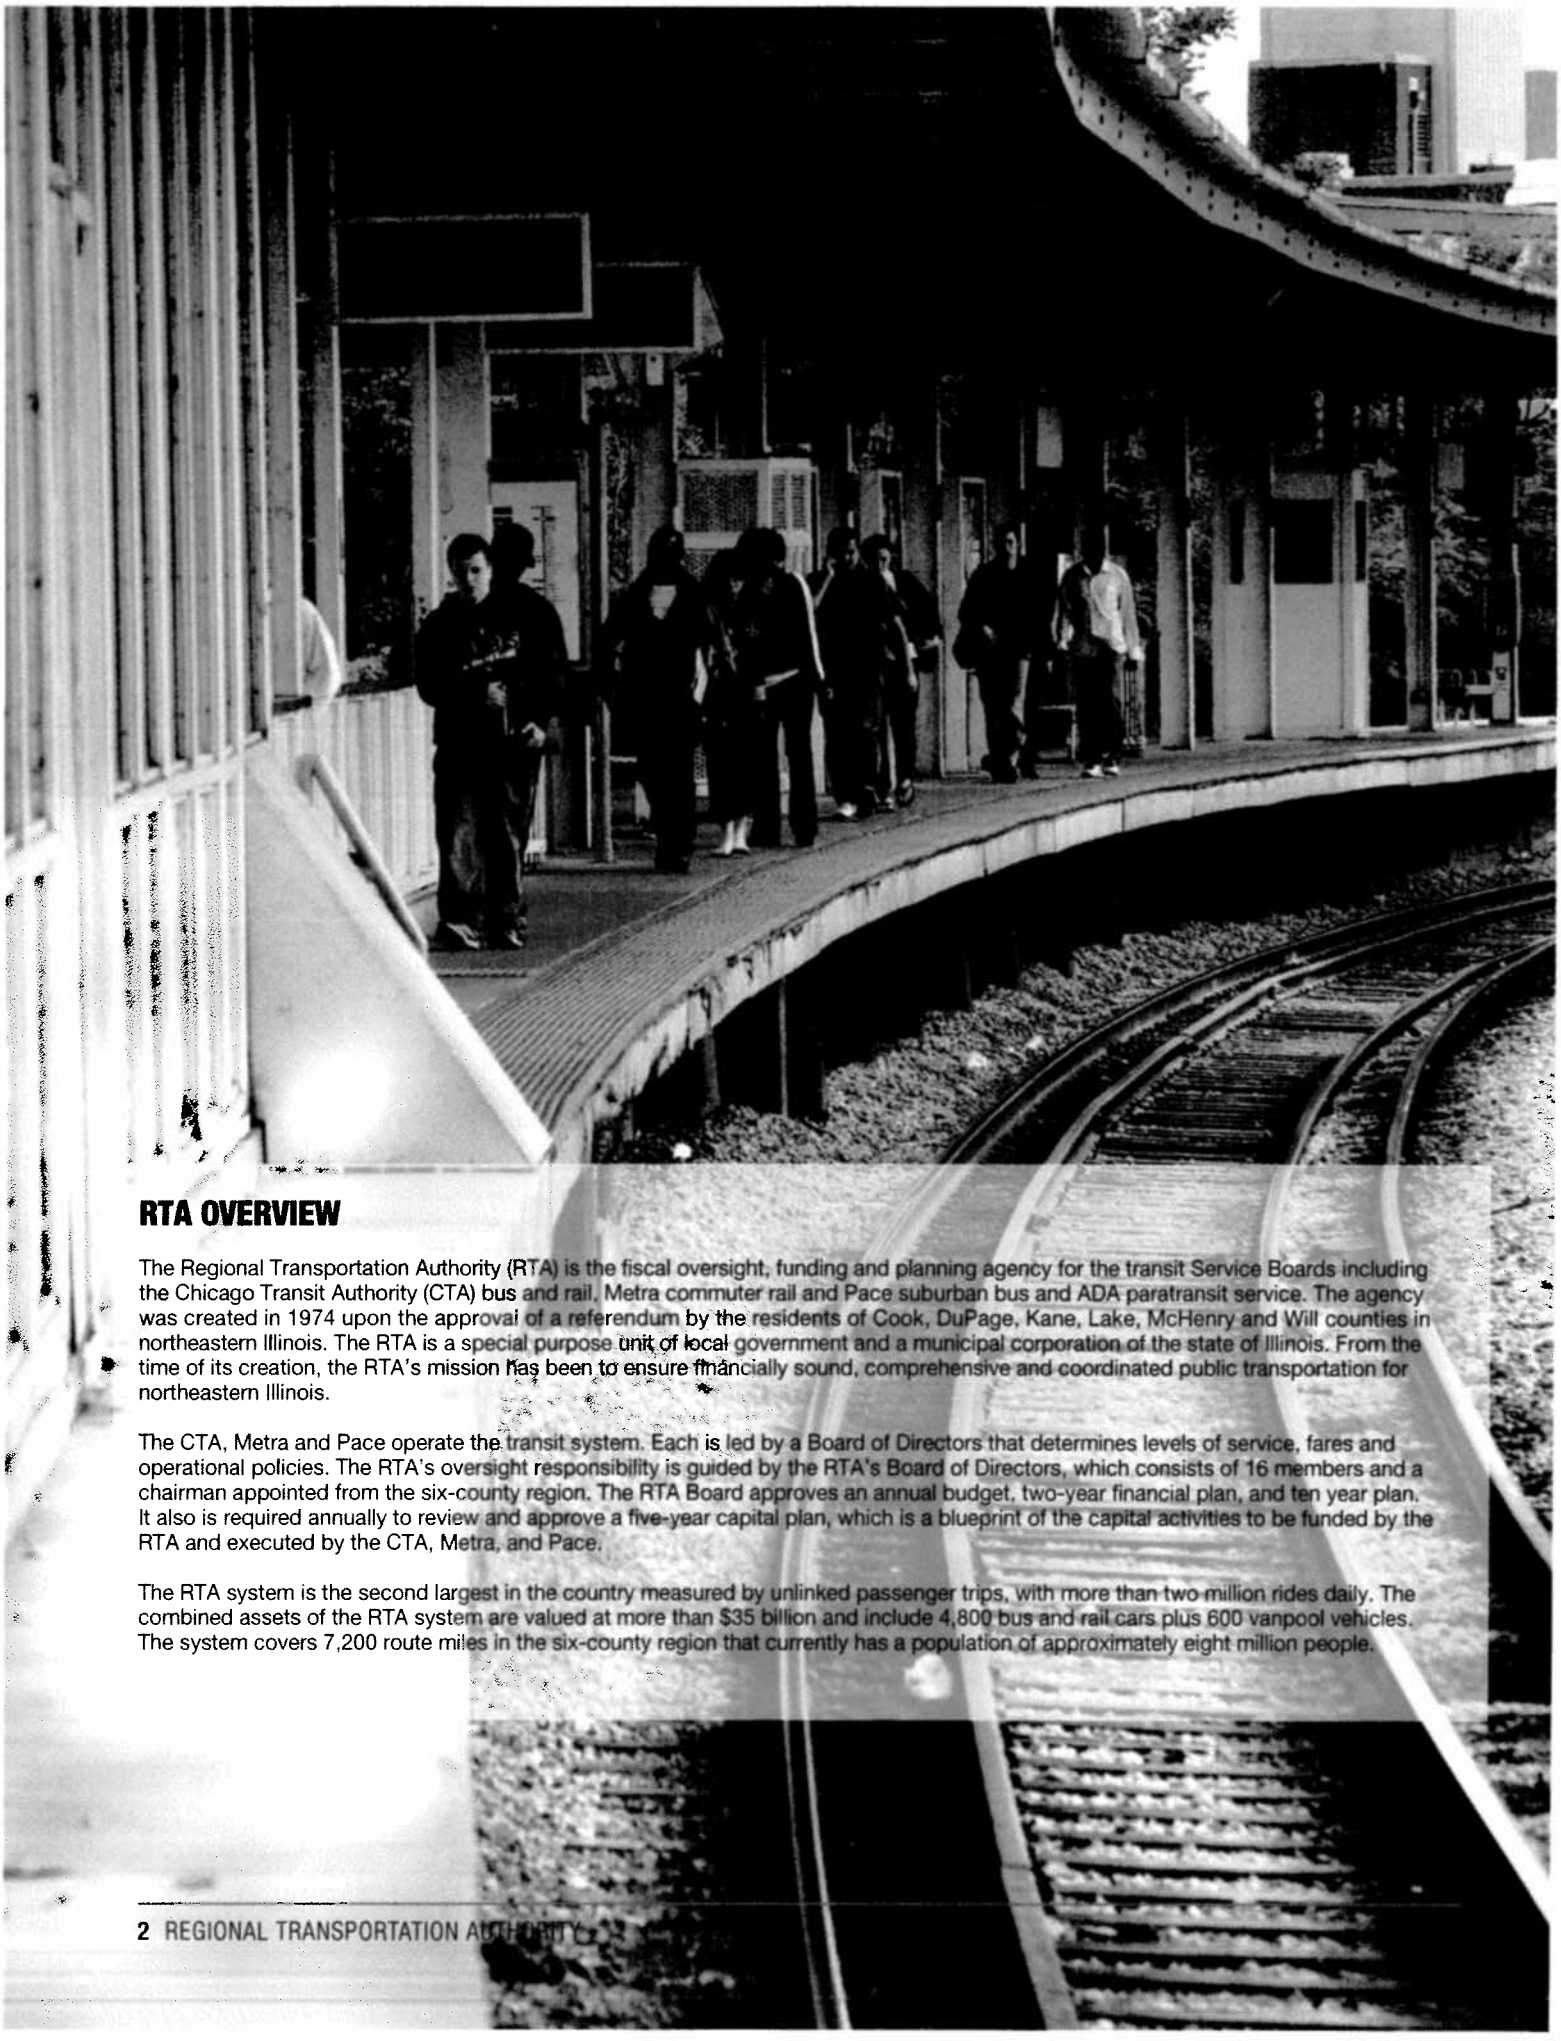
Real progress has been made to improve the efficiency and coordination of the regional transit system, and the RTA is working diligently to fulfill our new responsibilities while still maintaining a small work force:

- The RTA is developing a universal fare payment system and innovative services such as Bus Rapid Transit (BRT).
- Our agency is leading regional transit planning and assisting local municipalities to make their communities more livable and sustainable.
- We have worked with the Service Boards to develop long-term financial plans.
- Working with the Federal Transit Administration (FTA) we created an Internet based multi-modal trip planner which will serve as a model for other transit systems **(www.goroo.com)**.
- Working with the Service Boards, we have set performance measures for the regional transit system using objective criteria.
- We are performing a detailed market analysis to survey the future transit needs of the region, as well as an assessment of the condition of the system's infrastructure.
- We assisted the CTA and the transit unions to stabilize their pension and healthcare funds.

We greatly appreciate the leadership displayed by President Obama and our Congressional Delegation, and Governor Quinn and the Illinois General Assembly to approve critical capital funding during very difficult economic conditions. Newly awarded capital funding will allow us to make progress to bring the regional transit system to a state of good repair. Together, the RTA and the service boards will continue to work with the state and federal government to identify additional funds needed to expand the system and meet growing demand in the region and improve service for our riders. Transit plays an important role in growing our regional economy and improving our environment and our quality of life. With your continued support, we can achieve the world class status that the nation's second largest transit system deserves.

Sincerely,

James Reilly
Chair
RTA Board of Directors



RTA OVERVIEW

The Regional Transportation Authority (RTA) is the fiscal oversight, funding and planning agency for the transit Service Boards including the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail and Pace suburban bus and ADA paratransit service. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties in northeastern Illinois. The RTA is a special purpose unit of local government and a municipal corporation of the state of Illinois. From the time of its creation, the RTA's mission has been to ensure financially sound, comprehensive and coordinated public transportation for northeastern Illinois.

The CTA, Metra and Pace operate the transit system. Each is led by a Board of Directors that determines levels of service, fares and operational policies. The RTA's oversight responsibility is guided by the RTA's Board of Directors, which consists of 16 members and a chairman appointed from the six-county region. The RTA Board approves an annual budget, two-year financial plan, and ten year plan. It also is required annually to review and approve a five-year capital plan, which is a blueprint of the capital activities to be funded by the RTA and executed by the CTA, Metra, and Pace.

The RTA system is the second largest in the country measured by unlinked passenger trips, with more than two million rides daily. The combined assets of the RTA system are valued at more than $35 billion and include 4,800 bus and rail cars plus 600 vanpool vehicles. The system covers 7,200 route miles in the six-county region that currently has a population of approximately eight million people.

TAKING A LOOK BACK AT 2008

Transit Operating Funding and Reform Legislation Signed into Law

The Illinois General Assembly approved key operating funding and reform legislation to avert significant service cuts, fare increases and layoffs.

Seniors Ride Free Program

Legislation requires free public transit rides on fixed routes for senior citizens ages 65 and over who live in the service region that includes the counties of Cook, DuPage, Kane, Lake, McHenry and Will. Approximately 500,000 seniors are enrolled.

Six Board Members Appointed to RTA Board

Six new members were appointed to the RTA Board of Directors: Jan Carlson, Rev. Tyrone L. Crider, Phil Fuentes, Al Jourdan, J.D. Ross, and Michael Scott. Transit reform legislation enacted in January 2008 expanded the agency's Board from 13 to 16.

Golden Trumpet Award for MBC Outreach Campaign

A Golden Trumpet Award was awarded to the RTA for its implementation of a regional, bipartisan issue campaign to secure new funding from the state legislature for the RTA, the Chicago Transit Authority (CTA), Metra and Pace.

RTA Hosts a Series of Public Hearings about Transit Budget

The general public was invited to attend one of 26 budget hearings to learn about the RTA 2009 budget, implementation of legislation reforms, updating the regional strategic plan, RTA Funding Programs and the status of a critically needed capital investment plan to fund transit projects.

Board of Directors Approves 43 Planning, Operating, and Capital Transit Projects

RTA Board approved 43 planning, operating and capital transit projects located throughout the six-country region. More than $18 million in federal, state and RTA funds support these innovative projects which aim to increase transit usage and provide multi-modal connections.

People with Disabilities Ride Free Program

Legislation requires free public transit rides on fixed routes for people with disabilities who are Illinois residents and have been enrolled as a person with a disability in the Illinois Circuit Breaker program. Approximately 90,000 people with disabilities are enrolled.

Rep. Julie Hamos wins APTA's Distinguished Public Service Award

The American Public Transportation Association (APTA) awarded Illinois State Representative Julie Hamos (D-Evanston) its Local Distinguished Service Award for her contributions to the public transportation industry at the local level though policy, legislative initiative and leadership.

Certificate of Achievement for Excellence in Financial Reporting

The RTA received the Certificate of Achievement for Excellence in Financial Reporting for the 14th consecutive year by the Government Finance Officers of the United States and Canada (GFOA) for its Comprehensive Annual Financial Report (CAFR). The award is the highest form of recognition in governmental accounting and financial reporting, and receiving the award represents a significant accomplishment by a unit of government and its management.

2008 TRANSIT LEGISLATION HIGHLIGHTS

The following are strategic plan and budget highlights in the new transit legislation that went into effect on January 17, 2008:

RTA REFORMS FOR COORDINATION, EFFICIENCY AND TRANSPARENCY

Adoption of Strategic Plan

Requires RTA Board to adopt a comprehensive, long-term Strategic Plan for regional transit, to be reviewed and updated periodically

The Plan will establish goals and objectives, e.g., ridership increases, service and fare coordination, job access for low-income communities, standards, measurements and reporting requirements related to achieving the goals, and criteria for evaluating which capital projects are included in the Five-Year Capital Program

The Plan also will include a 10-year assessment of the transit system's financial condition

RTA is authorized to adopt sub-regional or corridor plans

RTA must coordinate with the Chicago Metropolitan Agency for Planning in developing the Strategic Plan and capital program

Capital program

Capital projects can only be in the Five-Year Capital Program if they meet the criteria in the Strategic Plan and can be funded within amounts determined by the RTA to be available. The RTA is required to do "alternatives analysis" for any newly-proposed transit expansion projects with construction costs of over $25 million where potentially more than one Service Board could be the provider of the proposed service

Annual budgets

Annual Service Board budgets and two-year financial plans must be consistent with Strategic Plan as a condition for approval by RTA

Service Board budgets must include additional details, including long-term obligations such as pension and employee benefit expenses

Allows RTA to adopt required formats, financial practices and assumptions that Service Boards must use in preparing annual budgets and capital programs. If the Executive Director certifies that a Service Board has not submitted its budget in the required form, etc., and such certification is accepted by the Board the Service Board is limited to the previous year's operating funding levels

RTA is required to withhold 25% of sales tax and discretionary funding until a Service Board budget is approved by the RTA

CTA Pension and Retiree Health Care Reform

To stabilize the long-term financial health of the CTA pension and retiree health care system, the funding for pensions and retiree health care are separated, employee and employer contributions are increased, benefits are adjusted, governance is strengthened, bonds are issued, and ongoing financial oversight by the Auditor General is established

RTA BOARD OF DIRECTORS

Transit reform legislation, enacted in January 2008 expanded the Authority's Board from 13 to 16 members. These changes became effective April 1, 2008. The new appointees will serve in five-year terms. The following is a breakdown of the Board make up and the appointing authorities:

- 5 by Mayor of Chicago
  (appointee cannot be the Chairman of CTA)
- 4 by suburban members of the Cook County Board
- 1 by the President of the Cook County Board
  (from Suburban Cook County)
- 1 by the Chairman of the DuPage County Board
- 1 by the Chairman of the Lake County Board
- 1 by the Will County Executive
- 1 by the Chairman of the McHenry County Board
- 1 by the Chairman of Kane County Board
- The Board Chair is appointed by 11 members of the Board with at least 2 votes from Chicago, Suburban Cook and the collar counties.

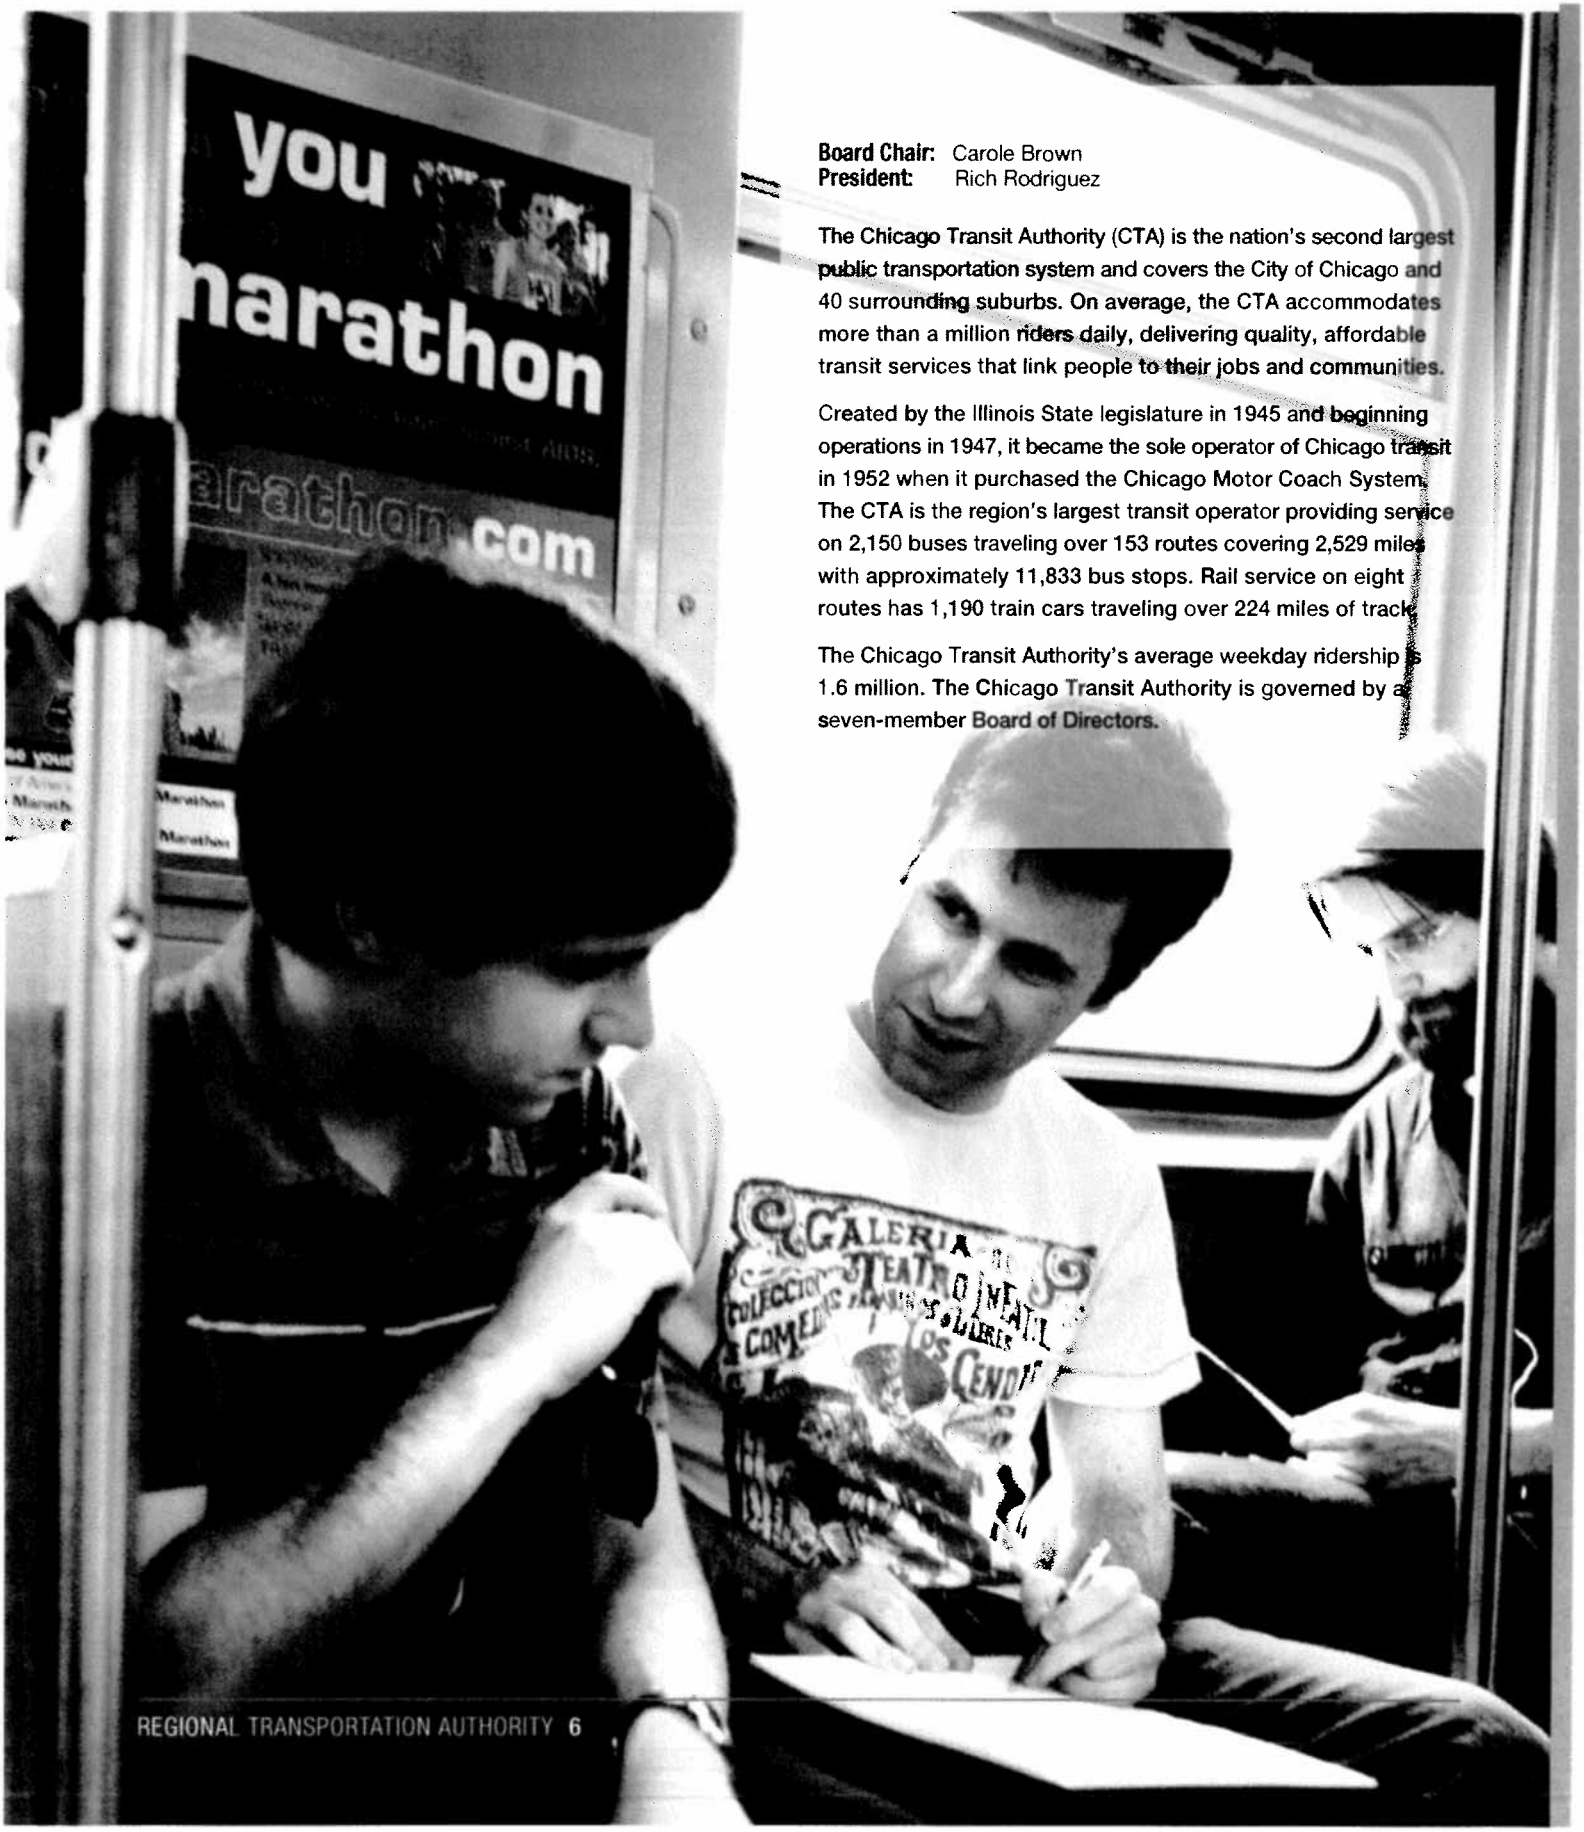
CHICAGO TRAN



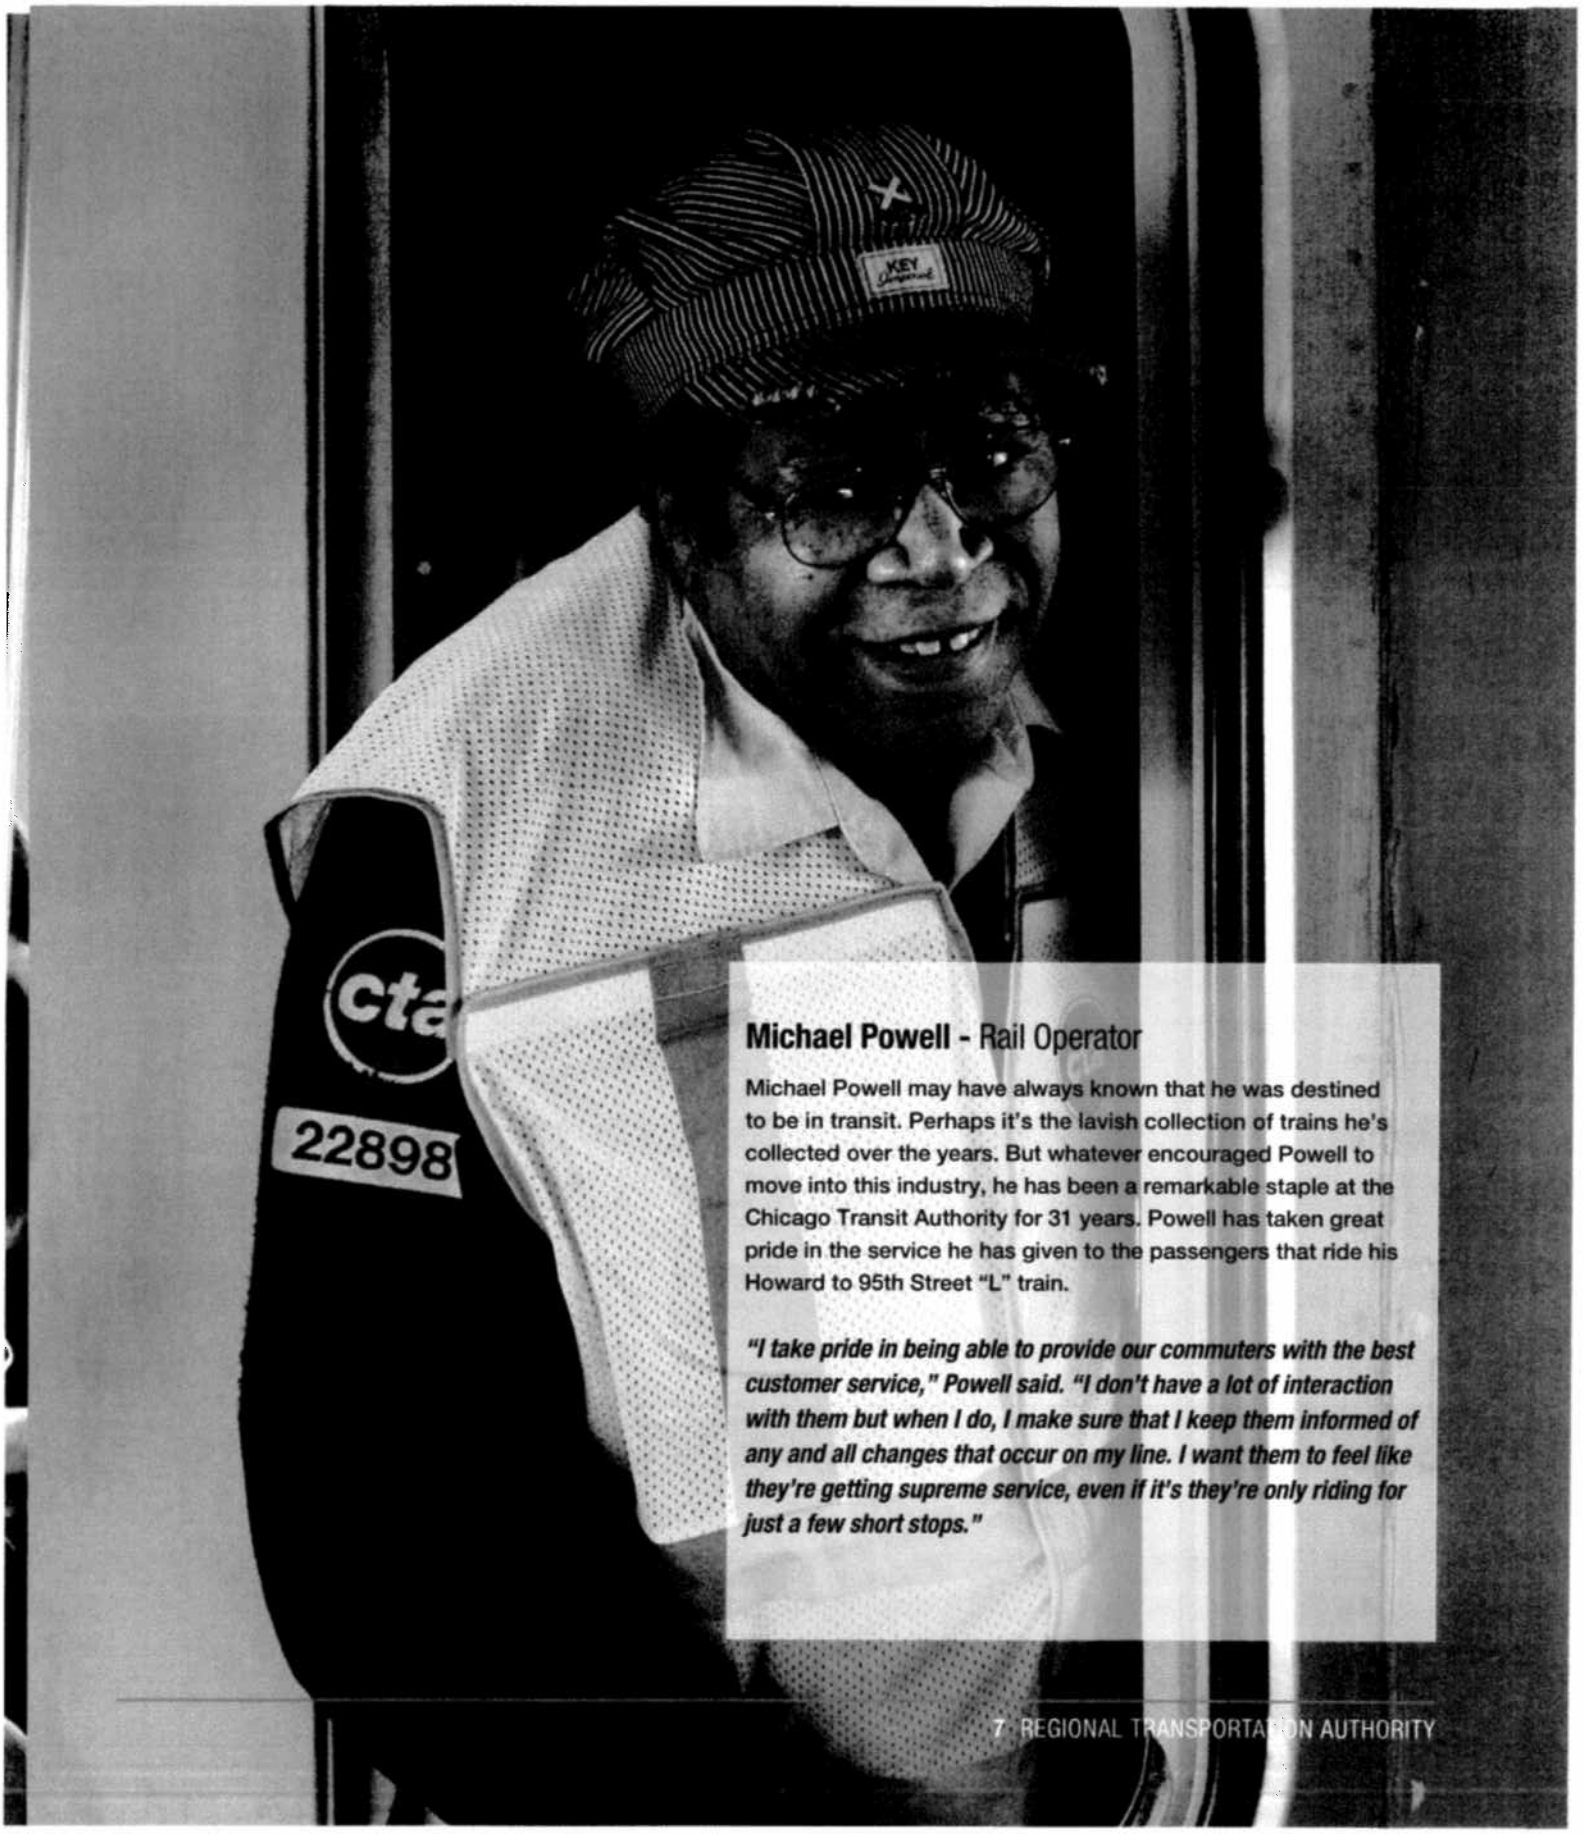
Board Chair: Carole Brown
President: Rich Rodriguez

The Chicago Transit Authority (CTA) is the nation's second largest public transportation system and covers the City of Chicago and 40 surrounding suburbs. On average, the CTA accommodates more than a million riders daily, delivering quality, affordable transit services that link people to their jobs and communities.

Created by the Illinois State legislature in 1945 and beginning operations in 1947, it became the sole operator of Chicago transit in 1952 when it purchased the Chicago Motor Coach System. The CTA is the region's largest transit operator providing service on 2,150 buses traveling over 153 routes covering 2,529 miles with approximately 11,833 bus stops. Rail service on eight routes has 1,190 train cars traveling over 224 miles of track.

The Chicago Transit Authority's average weekday ridership is 1.6 million. The Chicago Transit Authority is governed by a seven-member Board of Directors.

SIT AUTHORITY

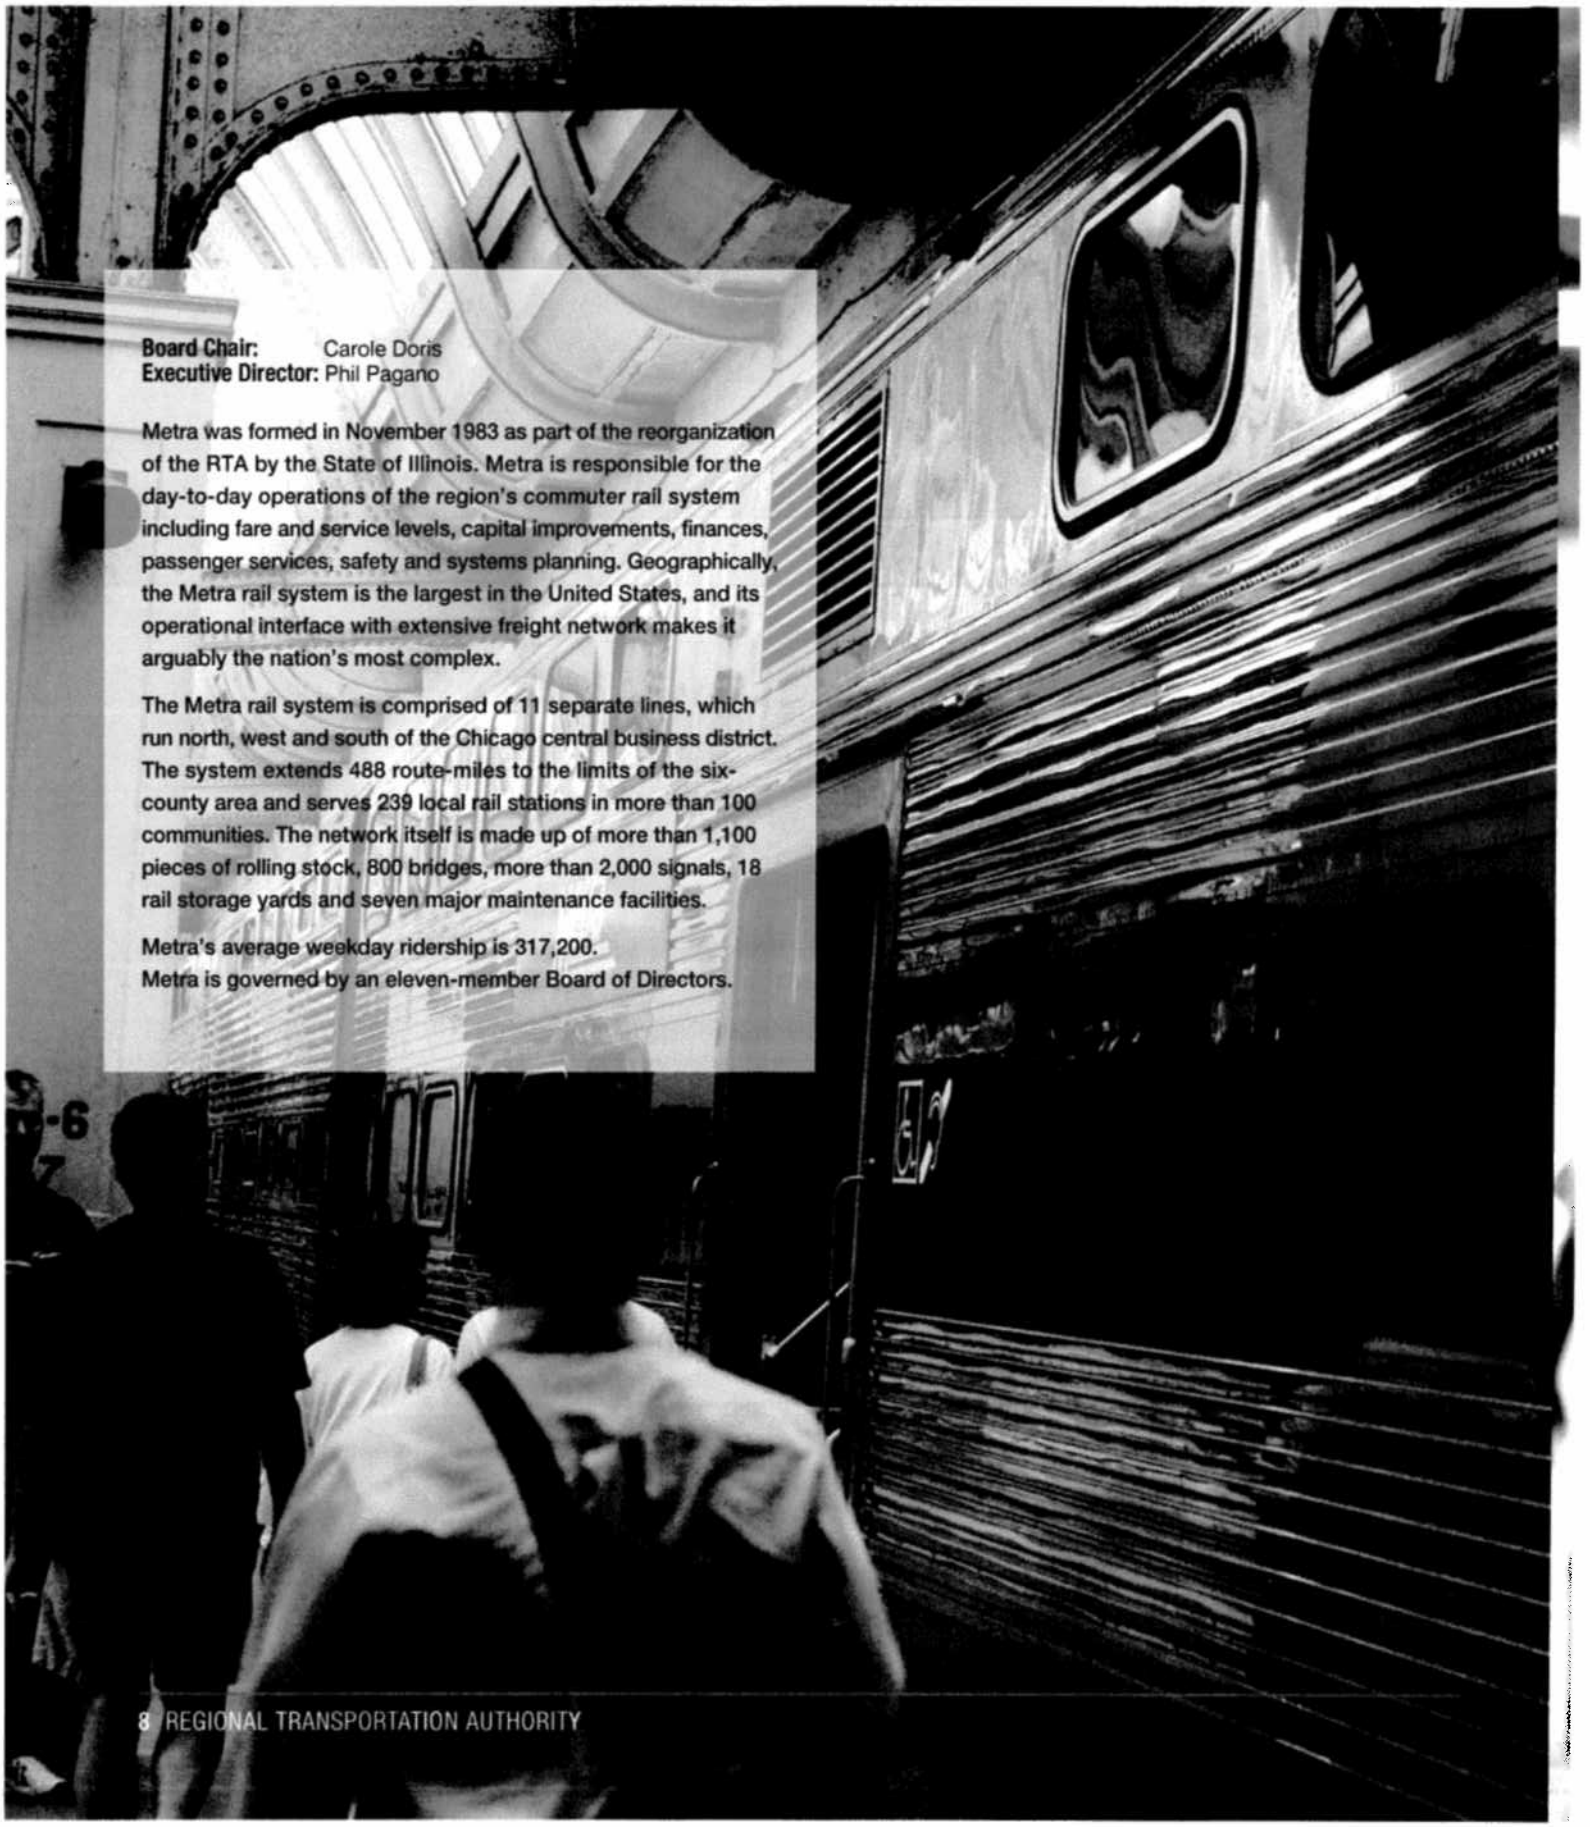


Michael Powell - Rail Operator

Michael Powell may have always known that he was destined to be in transit. Perhaps it's the lavish collection of trains he's collected over the years. But whatever encouraged Powell to move into this industry, he has been a remarkable staple at the Chicago Transit Authority for 31 years. Powell has taken great pride in the service he has given to the passengers that ride his Howard to 95th Street "L" train.

"I take pride in being able to provide our commuters with the best customer service," Powell said. "I don't have a lot of interaction with them but when I do, I make sure that I keep them informed of any and all changes that occur on my line. I want them to feel like they're getting supreme service, even if it's they're only riding for just a few short stops."

METRA

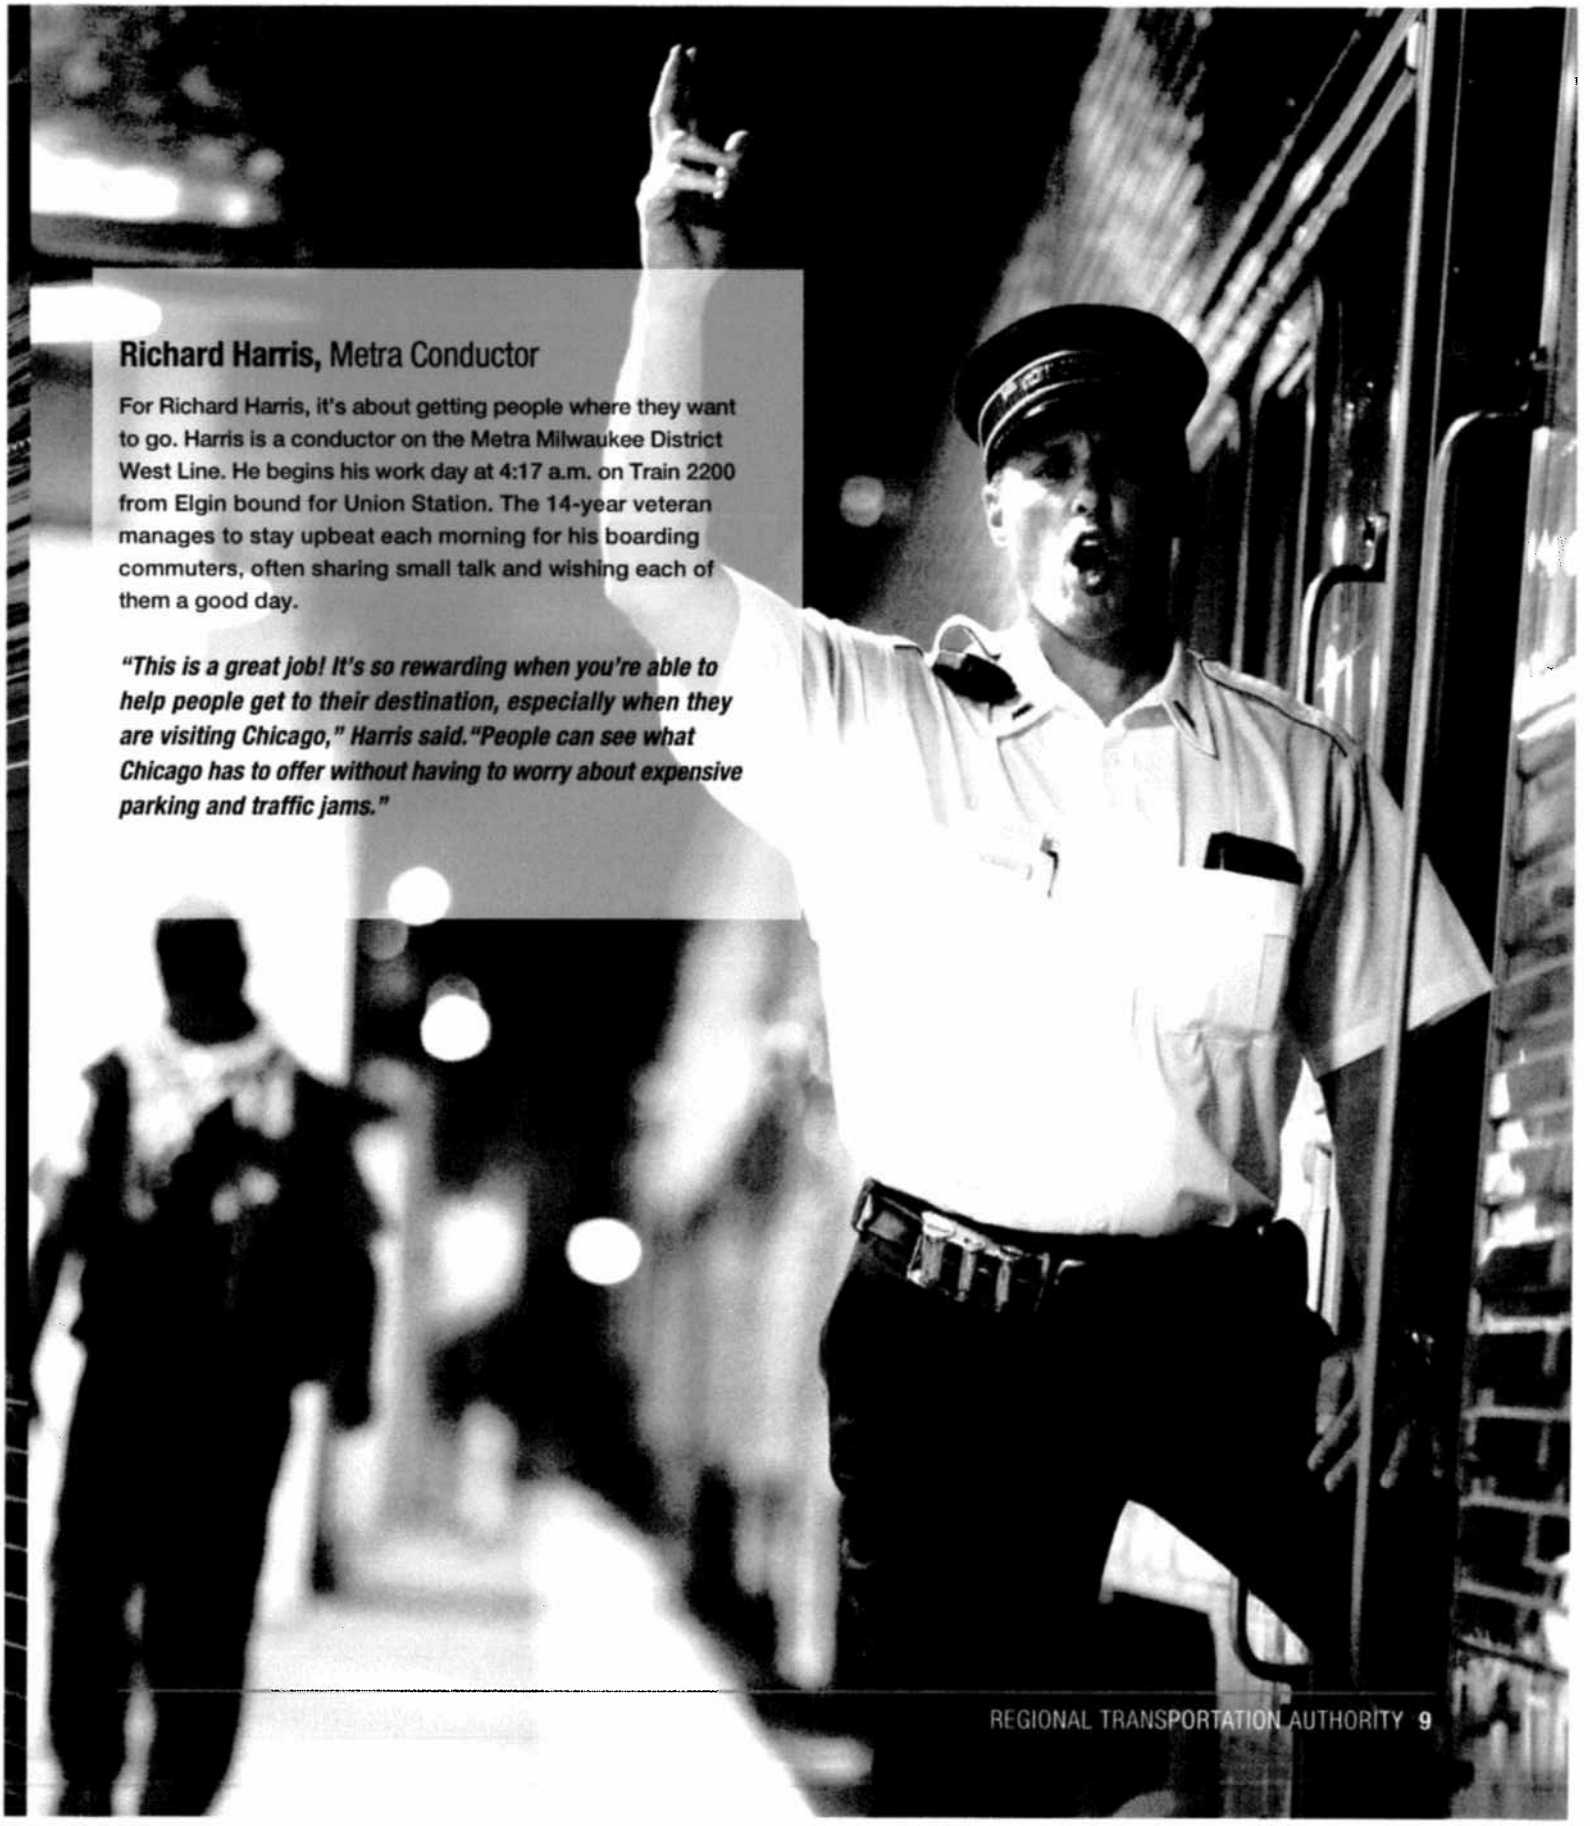


Board Chair: Carole Doris
Executive Director: Phil Pagano

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare and service levels, capital improvements, finances, passenger services, safety and systems planning. Geographically, the Metra rail system is the largest in the United States, and its operational interface with extensive freight network makes it arguably the nation's most complex.

The Metra rail system is comprised of 11 separate lines, which run north, west and south of the Chicago central business district. The system extends 488 route-miles to the limits of the six-county area and serves 239 local rail stations in more than 100 communities. The network itself is made up of more than 1,100 pieces of rolling stock, 800 bridges, more than 2,000 signals, 18 rail storage yards and seven major maintenance facilities.

Metra's average weekday ridership is 317,200.
Metra is governed by an eleven-member Board of Directors.

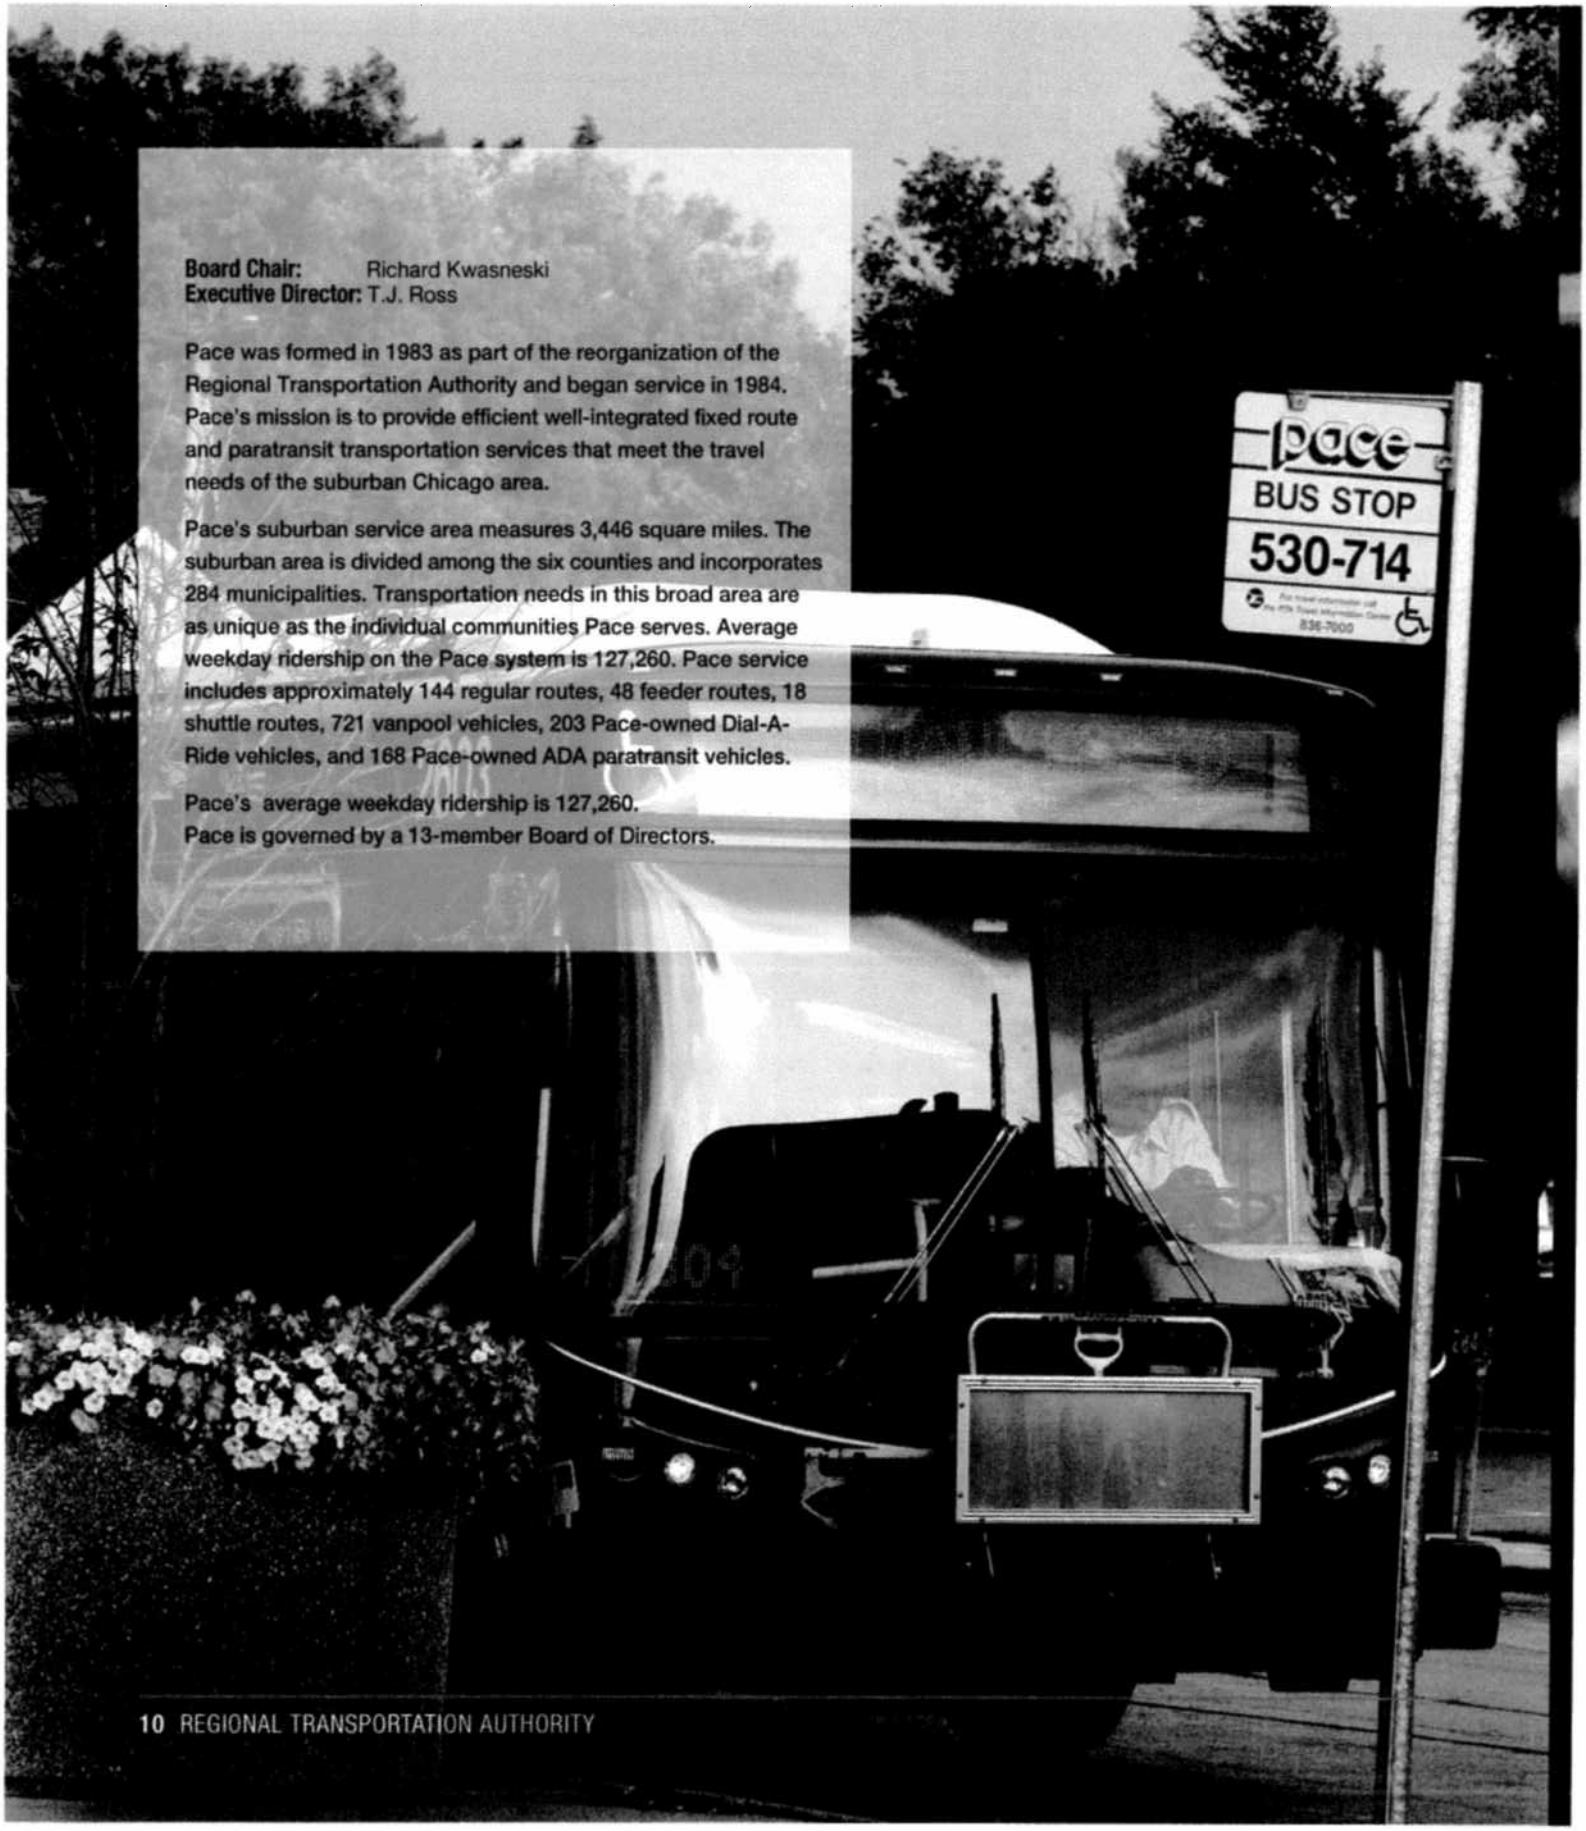


Richard Harris, Metra Conductor

For Richard Harris, it's about getting people where they want to go. Harris is a conductor on the Metra Milwaukee District West Line. He begins his work day at 4:17 a.m. on Train 2200 from Elgin bound for Union Station. The 14-year veteran manages to stay upbeat each morning for his boarding commuters, often sharing small talk and wishing each of them a good day.

"This is a great job! It's so rewarding when you're able to help people get to their destination, especially when they are visiting Chicago," Harris said."People can see what Chicago has to offer without having to worry about expensive parking and traffic jams."

PACE

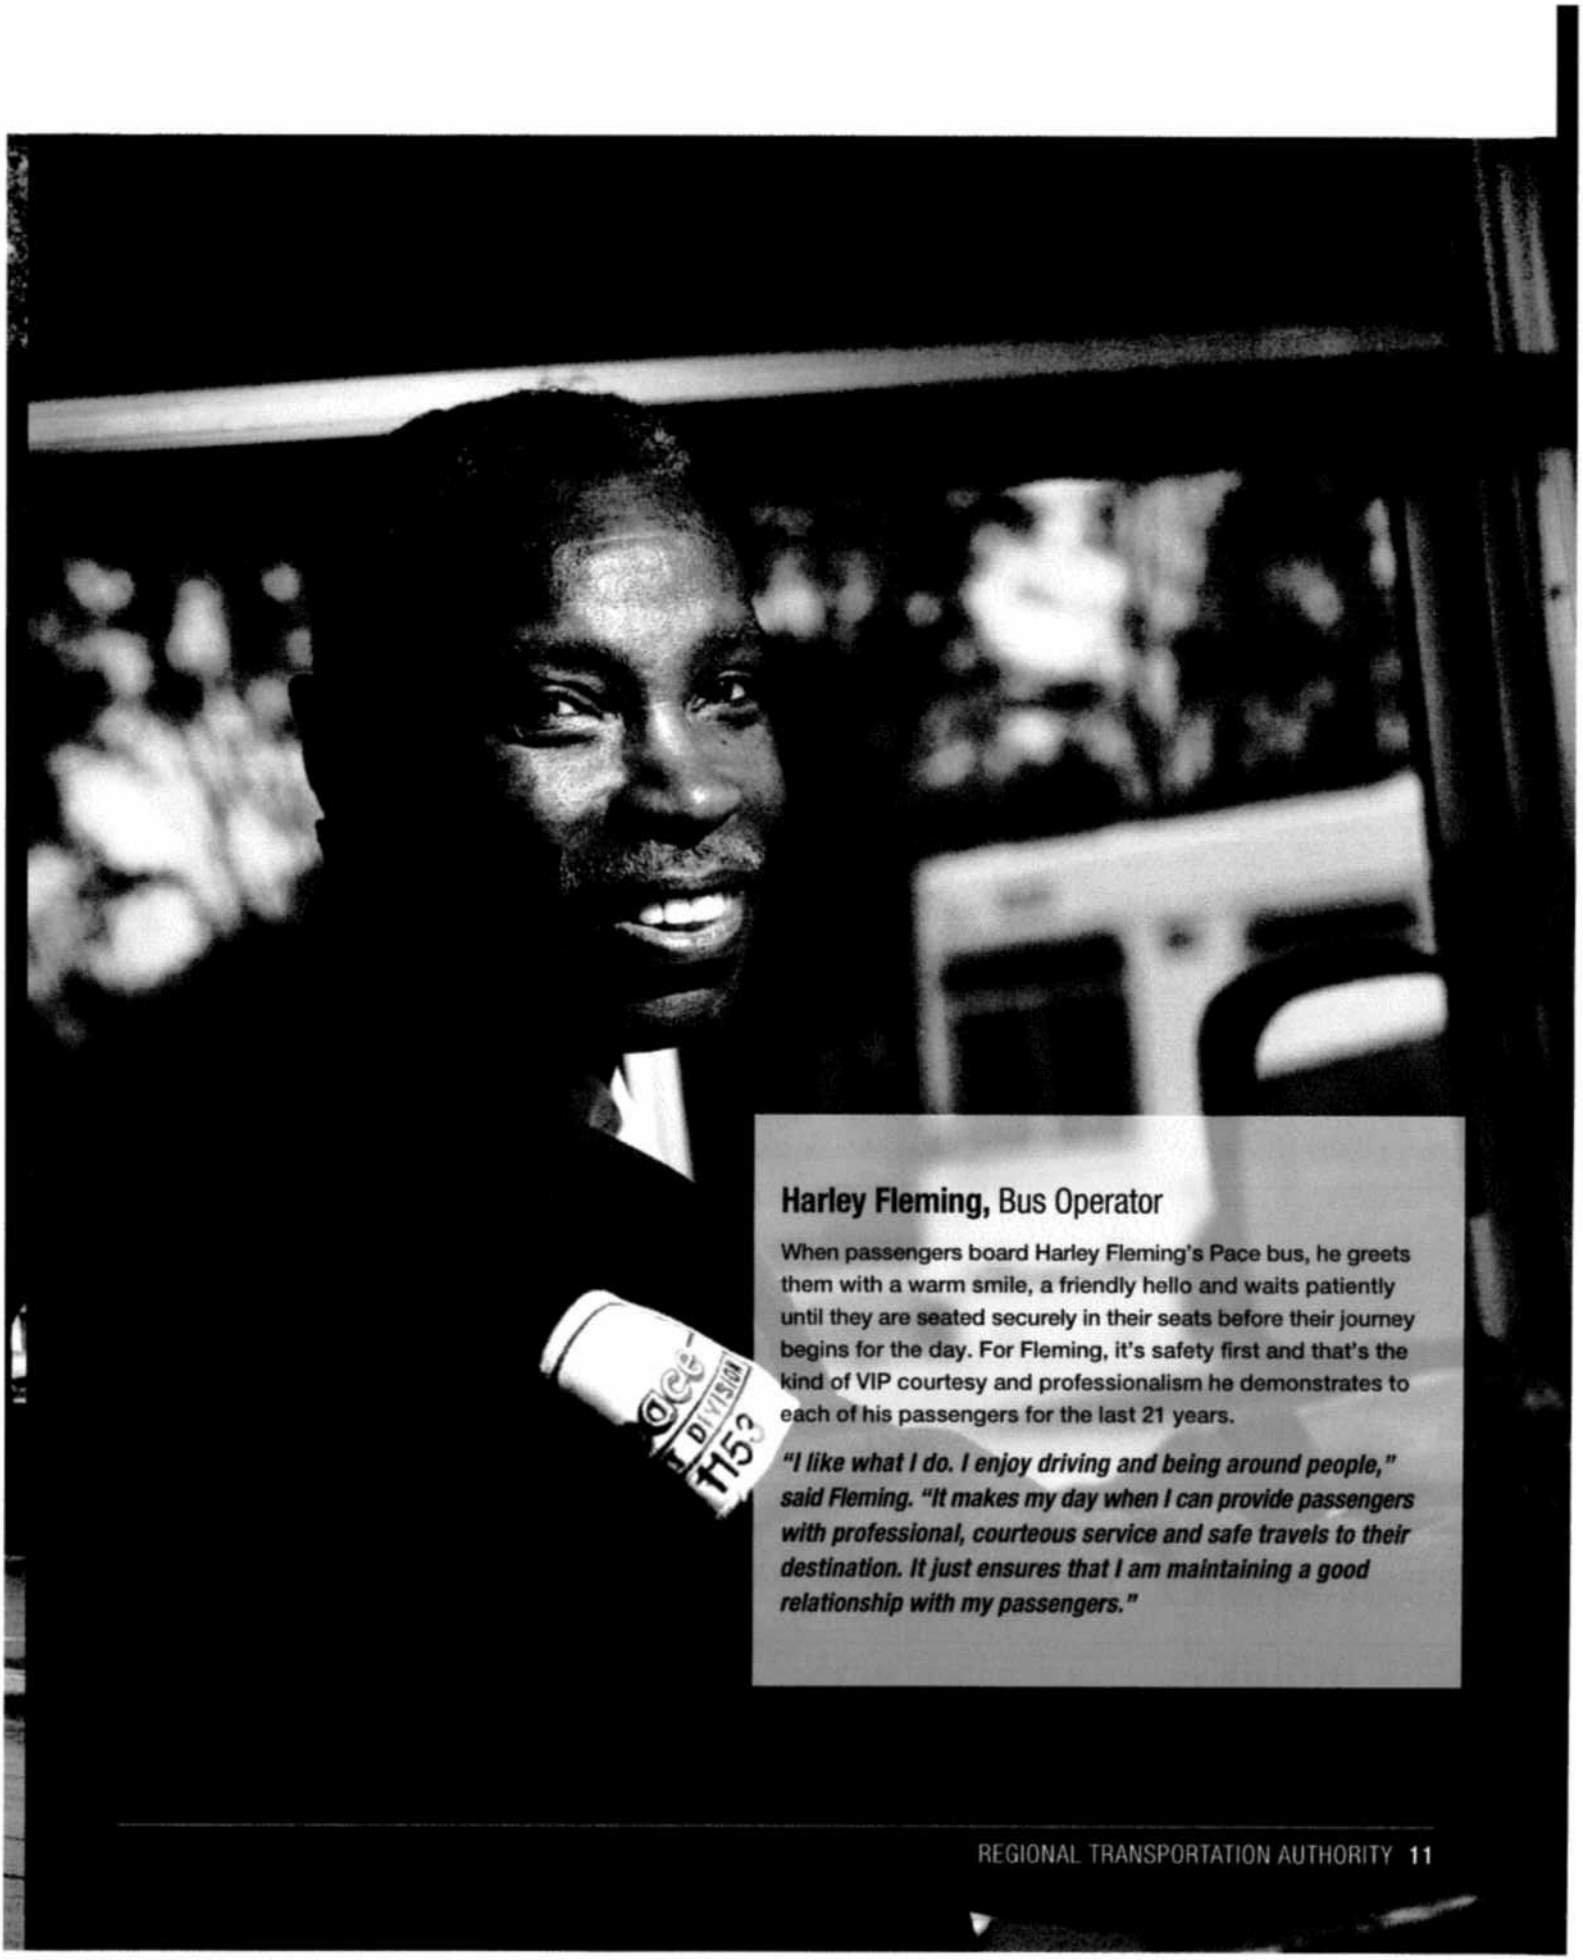


Board Chair: Richard Kwasneski
Executive Director: T.J. Ross

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority and began service in 1984. Pace's mission is to provide efficient well-integrated fixed route and paratransit transportation services that meet the travel needs of the suburban Chicago area.

Pace's suburban service area measures 3,446 square miles. The suburban area is divided among the six counties and incorporates 284 municipalities. Transportation needs in this broad area are as unique as the individual communities Pace serves. Average weekday ridership on the Pace system is 127,260. Pace service includes approximately 144 regular routes, 48 feeder routes, 18 shuttle routes, 721 vanpool vehicles, 203 Pace-owned Dial-A-Ride vehicles, and 168 Pace-owned ADA paratransit vehicles.

Pace's average weekday ridership is 127,260.
Pace is governed by a 13-member Board of Directors.



Harley Fleming, Bus Operator

When passengers board Harley Fleming's Pace bus, he greets them with a warm smile, a friendly hello and waits patiently until they are seated securely in their seats before their journey begins for the day. For Fleming, it's safety first and that's the kind of VIP courtesy and professionalism he demonstrates to each of his passengers for the last 21 years.

"I like what I do. I enjoy driving and being around people," said Fleming. "It makes my day when I can provide passengers with professional, courteous service and safe travels to their destination. It just ensures that I am maintaining a good relationship with my passengers."

Board of Directors
Regional Transportation Authority
175 West Jackson Boulevard, Suite 1550
Chicago, Illinois 60604

I have the pleasure to submit to you the Combining Financial Statements Report for the Regional Transportation Authority, the Chicago Transit Authority, the Commuter Rail Division and the Suburban Bus Division for the year ending December 31, 2008. This Report fulfills the requirements of section 4.05 of the RTA Act. This Report represents the operations of our transit system in the aggregate and not as individual components. It shows the magnitude of the resources on hand and in use for public transportation in the northeastern Illinois Region. The RTA's independent accountants have compiled the Combining Financial Statements Report. They have not subjected these statements to audit. The audited financial statements of each individual organization are available upon request. As always, the RTA staff acknowledges the commitment by the RTA Board and the Service Boards to fiscal responsibility, to ensure financially sound public transportation in northeastern Illinois.

Joseph G. Costello
Senior Deputy Executive Director,

Finance & Administration
Regional Transportation Authority
June 10, 2009

INDEPENDENT ACCOUNTANT'S REPORT

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have compiled the accompanying special-purpose combining financial statements of the Regional Transportation Authority and Service Boards as of December 31, 2008, and for the year then ended, and the supplementary and statistical information, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting information that is the representation of management in the form of financial statements and supplementary and statistical information. We have not audited or reviewed the accompanying special-purpose combining financial statements and supplementary and statistical information and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying special-purpose financial statements and supplementary and statistical information were prepared for the purpose of complying with the statutory requirement of the Regional Transportation Authority Act as described in Note 1, and are not intended to be a presentation in conformity with accounting principles generally accepted in the United States of America.

1. BASIS OF ACCOUNTING

The accompanying special purpose combining financial statements are presented as required by the Regional Transportation Authority (RTA) Act (Act) and are not intended to be presented in accordance with accounting principles generally accepted in the United States of America. The special purpose combining financial statements are not in accordance with accounting principles generally accepted in the United States of America primarily due to the RTA and Service Boards using a different basis of accounting and due to the omission of significant disclosures. The RTA and each individual Service Board receive a separate audit of their financial statements in accordance with accounting principles generally accepted in the United States of America. These individual statements describe the basis of accounting for each entity and contain the omitted disclosures.

Intergovernmental receivables, payables, revenues, expenses, and expenditures have been eliminated in the Combining Adjustments columns; however, there are some differences in these amounts reported in the stand-alone financial statements of the RTA and the Service Boards. These valid differences relate primarily to differences in timing in the recording of certain transactions. For purposes of these combining financial statements, such differences are recorded as combining adjustments to net assets.

The columns presenting the combined balances for the RTA and Service Boards are statutorily required and do not present financial position, results of operations, or cash flows in conformity with accounting principles generally accepted in the United States of America.

2. ORGANIZATIONAL STRUCTURE

RTA

The RTA was established in 1974 upon the approval of a referendum in its six-county Northeastern Illinois Region (Region). The operating responsibilities of the RTA are set forth in the Act. The RTA is a unit of local government, body politic, political subdivision, and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, in 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority (CTA) and two operating divisions of the RTA: the Commuter Rail Division (Metra) and the Suburban Bus Division (Pace), each having its own independent board. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA system as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. The Service Boards achieve their required recovery ratios by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA is responsible for monitoring the budgets and financial performance of the Service Boards.

CTA

The CTA was formed in 1945 pursuant to the Metropolitan Transportation Authority Act passed by the Illinois legislature. The CTA was established as an independent governmental agency (an Illinois municipal corporation) "separate and apart from all other government agencies" to consolidate Chicago's public and private mass transit carriers. The Chicago City Council has granted the CTA the exclusive right to operate a passenger transportation system within the City of Chicago.

Metra

The Northeast Illinois Regional Commuter Railroad Corporation (NIRCRC), a public corporation, was established in 1980 to serve as the RTA's commuter rail service. The RTA Act, as amended effective November 9, 1983, established the Commuter Rail Division (CRD) to operate commuter rail transportation services. Both the NIRCRC and the CRD act under the registered service mark known as "Metra."

Metra has the responsibility for policy making with respect to actual day-to-day operations, capital investments, finances, fare levels, and service and facilities planning for its operations. Metra is responsible for the administration of all commuter rail activities in the metropolitan Chicago area, including deficit funding, capital grant application, and administration activities. Metra is directly responsible for the operation and management of the Rock Island, Milwaukee Road, Metra Electric, Heritage Corridor, North Central Service, and Metra Southwest Service commuter lines.

Metra also provides commuter rail service under Purchase of Service Agreements (PSA) with Union Pacific Railroad, Burlington Northern Santa Fe Railway Company, and Northern Indiana Commuter Transportation District. Under these agreements, Metra funds the commuter-related operating deficits (as defined) or is entitled to receive the commuter-related operating surpluses (as defined) of these carriers. In addition, Metra provides certain direct expenses such as fuel and insurance coverage considered to be "in-kind assistance." The title to the roadway and structure assets of the PSA carriers, other than capital improvements funded by federal and state agencies, the RTA, and Metra, is vested with the carriers. Accordingly, such assets are not reflected in these financial statements.

Pace

The RTA Act, as amended effective November 9, 1983, established the Suburban Bus Division (Pace) to operate suburban bus service within suburban Cook County and the five collar counties of DuPage, Kane, Lake, McHenry, and Will. The independent operations of Pace commenced on July 1, 1984.

Pace determines the level, nature, and kind of public transportation services that should be provided in the suburban region. Pace operates suburban bus services using stock, structures, and equipment purchased through capital grants funded by federal and state agencies and the RTA.

Reporting Periods

The RTA, CTA, Metra and Pace (the Combined Entities) all report on a calendar-year basis. All statements enclosed herewith are based on each entity's December 31, 2008 year-end.

3. REPORTING ENTITY

The RTA and each of the Service Boards have adopted the provisions of the Governmental Accounting Standards Board's Statement No. 14 (Statement No. 14), The Financial Reporting Entity.

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with governmental accounting and financial reporting standards in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters including: ownership of assets, relations with federal and state transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.
- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors who is also an RTA Board member.
- The Illinois statutes required the RTA Board to approve the budgets of the Service Boards, if such budgets meet specified system-generated revenue recovery ratios and other requirements as defined by the Act.
- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficit.

Accordingly, financial statements for the Service Boards are not included or combined with the RTA's financial statements under Statement No. 14. They are combined, however, in these Combining Financial Statements. Section 4.05 of the RTA Act requires that the RTA prepare a report combining "the audits of the Service Boards, and reviewing the state of the Authority, the Service Boards, and the public transportation agencies."

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Combined Entities conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting—The RTA maintains records using a fund accounting model consisting of a General Fund, Debt Service Fund, Capital Projects Fund, Proprietary Fund, (Business-Type Activities), Agency Fund, and Pension Trust Fund. All Governmental Funds and the Agency Fund are accounted for using the modified accrual method of accounting (i.e., revenues are recognized when they become measurable and available, and expenditures are recognized when the related fund liability is incurred). The Proprietary Fund and the Pension Trust Fund are accounted for using the accrual method of accounting. For the purpose of these combining financial statements, all RTA funds have been combined.

The Service Boards are accounted for on a Proprietary Fund basis. Accordingly, the accrual method of accounting is utilized by the Service Boards. For purposes of these combining financial statements, the individual Service Board financial statements are combined with those of the RTA.

Cash and Cash Equivalents—All investments of the Combined Entities are recorded at fair market value, except short-term investments which are reported at cost or amortized cost that reasonably approximates fair market value.

For the purposes of the combining statements of cash flows, the Combined Entities consider all investments with original maturities of three months or less to be cash equivalents. Such amounts are included in the "Cash and Cash Equivalents" line items on the accompanying statement of net assets.

Capital Assets—All Capital assets are recorded at cost. Costs funded by Federal Capital Grants are recorded as capital items and are included in Capital assets. In calculating depreciation, the Combined Entities use the straight-line method. The estimated useful lives vary depending on the type of Capital asset. These useful lives range from more than one year to forty years.

Materials and Supplies—Each Service Board records its inventory at the lower of cost or market. The CTA and Metra use the average-cost method and Pace uses the first-in/first-out method to determine cost.

Compensated Absences—All four entities have recorded liabilities for vested vacation time in the year the time was earned. The entities account for compensated absences under GASB Statement No. 16, Accounting for Compensated Absences, whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability.

Revenues—The Combined Entities have five principal sources of revenue and other financial sources: (1) farebox revenue; (2) retailers' occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Taxes); (3) funds appropriated to the RTA by statute through the state's Public Transportation Fund (PTF) established under the RTA Act; (4) state or federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the RTA Act; and (5) investment income and other miscellaneous revenue.

Farebox Revenue—A major source of revenue to the Service Boards is fares collected from riders. Each Service Board has its own fare structure and method for collection of fares. Farebox revenue is recognized when fares paid are initially valid for transportation services.

Sales Taxes
The Act authorizes the RTA to impose a retailers' occupation tax "ROT", a service occupation tax "SOT," and a use tax "UT." The RTA imposed this tax at the maximum permissible rate in 1979. The 2008 legislation increased the sales tax by .25% in Cook and .50% in the collar counties. The individual collar counties keep .25% of the increase. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes. The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 1% in Cook County and .75% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result the RTA tax on food and drugs is imposed at a rate of 1.25% in Cook, .75% in collar counties.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate and tax base are identical to the ROT.

The UT is imposed on persons living in the six county areas for the privilege of using a vehicle purchased outside the six county area that must be registered with the State. Unlike the state use tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

As indicated above, the RTA imposes a sales tax in the six-county northeastern Illinois region. The Illinois Department of Revenue collects this tax and remits the collections to the Illinois State Treasurer. The Treasurer holds the funds in trust for the RTA outside the State Treasury. The Treasurer disburses the funds monthly to the RTA, without appropriation, upon order of the State Comptroller.

The amounts of funding and taxes received, together with revenues from the provision of transit services by the Service Boards and other operating revenues, provide the resources to cover operating costs of the RTA System.

The RTA Sales Tax consists of (i) in Cook County, (a) a tax of 1.25% of the gross receipts from sales of drugs, certain medical supplies and food prepared for consumption off the premises (other than for immediate consumption) imposed on all persons selling tangible personal property at retail (a Food and Drug Tax) and (b) a tax of 1% of the gross receipts from all other taxable retail sales; (ii) in counties within Northeastern Illinois other than Cook County, a tax of 0.5% of the gross receipts from all taxable retail sales (together with (i) (b), a General Sales Tax); and (iii) a tax of 1% on the use in Cook County, and 0.5% on the use in Northeastern Illinois other than Cook County of tangible personal property purchased from a retailer outside Northeastern Illinois and titled or registered with a State agency by a person with a Northeastern Illinois address (a Use Tax); and (iv) a tax imposed in the same locations and at the same rates as the Food and Drug Tax and the General Sales Tax on persons engaged in a sale of service pursuant to which property in the form of tangible personal property or in the form of real estate is transferred incident to a sale of a service (a Service Occupation Tax).

The taxes described in (i) and (ii) above are also imposed on persons engaged in making sales of services pursuant to which tangible personal property or real estate (as incident to a sale of a service) is transferred (with respect to the taxes in (i) and (ii), a Service Occupation Tax).

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed that portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State, but registered or titled with a State agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the "Replacement Fund"). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax, and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a State agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the "Reform Fund"). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of the tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

Service Board	Collected within Chicago	Collected within Cook County Outside Chicago	Collected in DuPage, Kane, Lake, McHenry, And Will Counties
CTA	100%	30%	
Metra		55%	70%
Pace		15%	30%

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of the total sales taxes collected to which it is entitled by the amended Act. The remaining portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

In January 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region, increased the real estate transfer tax (RETT) in the City of Chicago, and raised the portion of RTA sales tax revenues matched by PTF. The RTA sales tax rate was increased 0.25% in Cook County and 0.50% in the Collar Counties effective April 1, 2008. Proceeds of the sales tax increase in the Collar Counties are divided evenly between the RTA and the county where the tax is collected. Effective April 1, 2008, the real estate transfer tax in the City of Chicago was increased 0.3% (e.g. for every $500 in sales price $1.50 in tax is collected).

In February 2008, the PTF match of the old RTA sales tax increased from 25% to 30%. In April 2008, the 5% PTF match was applied to the RETT and the RTA portion of the sales tax increase. Beginning in January 2009, the PTF match of both the RETT and the RTA portion of the sales tax increase rose from 5% to 30%

While the RETT and the 25% PTF match of RETT funds only the CTA, the largest part of P.A. 95-0708 revenue provides funding for CTA, Metra, Pace and ADA Paratransit operations, as well as for regional innovation, coordination and enhancement (ICE) and suburban community mobility (SCMF) initiatives. Funds for ADA Paratransit, ICE and SCMF are by statute set aside before distributions to the CTA, Metra and Pace.

Car Rental Tax

Section 4.03.1 of the Act authorizes the RTA to impose an automobile rental occupation and use tax. This occupation tax, paralleling

the state and local car rental taxes may be imposed at a rate of 1% in Cook County and ¼% in the collar counties of the gross receipts from car rentals. The use tax may be imposed at the same rates on the privilege of using in the region a car rented outside, but titled in, Illinois. Any car leasing tax would be collected by the Illinois Department of Revenue.

This taxing power was added to the RTA Act in 1982, when the legislature imposed a state-wide car rental tax and authorized cities, counties, and certain special districts that had the power to impose sales taxes to tax the car rental occupation. This taxing power has never been exercised by the RTA.

Motor Fuel Tax
The Act authorized the RTA to impose a tax on retail sales and use of motor fuel at a rate of 5% of gross receipts. Section 4.03 (p) of the Act prohibits the RTA from imposing the motor fuel tax, if it has imposed the broader sales taxes described above. Consequently, this tax has never been imposed.

Off-Street Parking Tax
The Act authorizes the RTA to impose a tax in unspecified amounts on the privilege of parking a motor vehicle in a public or private fee-charging lot in the six county area. Because the Act prohibits the imposition of this tax if the RTA has enacted sales taxes, it has never been imposed.

Replacement Vehicle Tax
The Act authorizes the RTA to impose a $50 tax on any passenger car purchased within the metropolitan area by an insurance company in settlement of a total loss claim of its insured. Any such tax would be collected by the State. This taxing power has never been exercised by the RTA.

Public Transportation Fund—In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the "Public Transportation Fund," an amount equal to 25% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes). These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2009 fiscal year which will end June 30, 2010. During 2008, the PTF was 30% on some sales tax and 5% on other sales tax and the RETT. The PTF is 30% on both sales tax and RETT beginning in 2009.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement—In the State's fiscal year 2009, which ends June 30, 2009, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation ("IDOT") is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2008 and June 30, 2009, the grants were in the amount of $36.7 million and $28.9 million, respectively. In 2007, the state provided the RTA with advanced reduced fare reimbursements in the amount of $15.6 million. The revenue is recognized on the modified accrual basis when the amount is requested from IDOT.

Additional State Assistance/Additional Financial Assistance—The State has authorized Additional State Assistance ("ASA") which is supplemental financing for the RTA's Strategic Capital Improvement Program ("SCIP") bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of refunding or advance refunding SCIP bonds, less interest earned on the remaining bond proceeds, or (ii) $55 million per year. The RTA recognized $39.7 million of ASA in 2008.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance ("AFA") to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million in the State's fiscal years 2008 and 2009, per year. The RTA recognized $82 million of AFA in 2008.

In accordance with the Act, earnings on certain investments in the Capital Projects Fund are credited to the Debt Service Fund. This is done to compensate for prior State fiscal year earnings reducing the actual ASA and AFA grant amounts.

Management's Use of Estimates—The preparation of financial statements in conformity with the Act requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

5. BUDGET AND BUDGETARY ACCOUNTING

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the general fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States except for RTA capital expenditures and capital grants to Service Boards. The RTA capital expenditures and capital grants to Service Boards are budgeted on a project basis, which normally exceeds one year, and debt service payments, which are budgeted as transfers from the general fund. Budgets for RTA capital expenditures and capital grants to Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax agency fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end. There were several amendments to the 2008 budget. The 2008 budget (Ordinance 2007-63) was last revised on December 18, 2008 (Ordinance 2008-81). This ordinance

amended the 2008 RTA budget and the budgets of the CTA, Metra, and Pace. Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations / expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from 85% sales tax receipts;
- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and
- The third source of funds credited against the budgeted funding amount is from RTA 15% sales tax receipts and other discretionary receipts.

The reimbursement of Service Boards' capital expenditures and the payment of PTF funds, 15% funds and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

6. LEASES

The RTA and CTA hold operating leases which are primarily for rent expense on the facilities they occupy. Metra has several operating leases, primarily for the use of passenger terminals. Pace has multi-year leases for vehicles and bus tires.

CTA

During 2008, the CTA entered into a lease-purchase agreement to finance the purchase of 150 sixty foot New Flyer articulated hybrid buses and certain related parts and equipment at an estimated aggregate cost of $120.5 million. The terms of the agreement allow CTA to lease the buses for 12 years and retain ownership at the conclusion of the lease. Lease payments are due every June 1 and December 1 of each year, beginning on December 1, 2008. The present value of the future payments to be made by the CTA under the lease of approximately $120.2 million is reflected in the accompanying December 31, 2008 balance sheet as a capital lease obligation.

In 2003, Public Building Commission of Chicago (PBC) issued revenue bonds for the benefit of the CTA in the amount of $119 million. The bonds were issued to pay costs associated with the acquisition of real property and construction of a building and facilities, including certain furniture, fixtures, and equipment. The real property, building and facilities, and all furniture, fixtures, and equipment are owned by the PBC and leased to the CTA for use as its headquarters.

On October 26, 2006, the Public Building Commission of Chicago (PBC) issued Building Refunding Revenue Bonds for the benefit of the CTA in the amount of $91.3 million. The proceeds of the bonds were used to advance refund the Public Building Commission of Chicago, Series 2003 bonds. The principal amount of the bonds refunded was $111.1 million.

The proceeds from the sale of the 2006 bonds are being held in escrow under an escrow refunding agreement and have been invested in United States Treasury obligations. The principal amount of such obligations, together with interest earned thereon, will permit the payment of principal and interest on the refunded bonds up to and including their respective call dates. The refunded bonds are treated in the financial statements as defeased obligations. Accordingly, neither the trust account assets nor the refunded bonds appear in the accompanying financial statements. This refunding decreased debt service payment over the next 27 years by approximately $388 thousand resulting in an economic gain of approximately $20.4 million. Based upon the requirements of GASB Statement No.23, Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Accounts, the CTA recorded a deferred amount (loss) on refunding of $2.4 million. This amount is recorded as a component of long-term debt in the accompanying balance sheets.

The bonds are payable from and secured by the lease entered into between the PBC and the CTA and are considered a general obligation of the CTA payable from any lawfully available funds. Bond issue costs and premium related to this transaction are presented as such on the balance sheets. The present value of the future payments to be made by the CTA under the lease of approximately $87.2 million is reflected in the accompanying December 31, 2008 balance sheet as a capital lease obligation.

In 2003, the CTA entered into a lease/leaseback agreement with a third party pertaining to certain buses with a book value of $17.6 million as of December 31, 2008. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $15.6 million is reflected in the accompanying December 31, 2008 balance sheet as capital lease obligation.

During 2002, the CTA entered into two lease and leaseback agreements with a third party pertaining to certain buses (lots 1 and 2), with a book value of $30.2 million as of December 31, 2008. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, the CTA entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $111.6 million is reflected in the accompanying December 31, 2008 balance sheet as capital lease obligation.

During 2002, the CTA entered into a lease and leaseback agreement with a third party pertaining to certain qualified technological equipment (QTE), with a book value of $12.8 million as of December 31, 2008. Under the QTE lease agreement, which provides certain cash and tax benefits to the third party, the CTA entered into a long term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to the CTA under a sublease. The present value of the future payments to be made by the CTA under the lease of approximately $80.8 million is reflected in the accompanying December 31, 2008 statement of net assets as capital lease obligation.

During 1998, the CTA entered into a lease/leaseback agreement (1998 Agreement) with a third party pertaining to a rail line (Green Line), with a book value of $240.6 million as of December 31, 2008. The 1998 Agreement, which provides certain cash and tax benefits to the third party, also provides for a trust established by the CTA to lease the rail line to an equity investor trust (1998 Equity Trust),

which would then lease the facilities back to another trust established by the CTA under a separate lease (1998 Lease). The present value of the future payments to be made by the CTA under the lease of approximately $251.4 million is reflected in the accompanying December 31, 2008 statement of net assets as a capital lease obligation.

During 1997, the CTA entered into four lease/leaseback agreements (1997 Agreements) with a third party pertaining to certain of its facilities having a book value of $47.6 million as of December 31, 2008. The 1997 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (Equity Trust), which would then lease the facilities back to another trust established by the CTA under separate leases (Leases). The CTA received certain funds as prepayments by the Equity Trust. The funds have been deposited in designated investment accounts sufficient to meet the payments required under the Leases, and are recorded as assets restricted for repayment of leasing commitments. The Equity Trust has a security interest in the deposits to guarantee the payments due from the CTA and may take possession of the facilities upon a default by the CTA under the Lease. No other lease payments are required until the end of each lease. The present value of the future payments to be made by the CTA under the Leases (net of the payment due from the Equity Trust in 2023 and 2024) of approximately $34.9 million is reflected in the accompanying December 31, 2008 balance sheet as a capital lease obligation.

In connection with the 1997 Agreements, the CTA also received proceeds of $11.9 million. The Federal Transit Administration (FTA) has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1996, the CTA entered into similar lease/leaseback agreements (1996 Agreements) with a third party pertaining to certain of its facilities, with a book value of $51.4 million as of December 31, 2008. The 1996 Agreements, which provide certain cash and tax benefits to the third party, also provide for a trust established by the CTA to lease the facilities to an equity investor trust (1996 Equity Trust), which would then lease the facilities back to another trust established by the CTA under a separate lease (the 1996 Lease). The present value of the future payments to be made by the CTA under the leases (net of the payment due from the 1996 Equity Trust in 2024) of approximately $35 million is reflected in the accompanying December 31, 2008 balance sheet as a capital lease obligation.

In connection with the 1996 Agreements, the CTA also received proceeds of $10.9 million and agreed to make approximately $80 million of improvements to one of the facilities. The FTA has approved the CTA's right to the benefit received from these transactions. The CTA has elected to defer recognition of the proceeds over the remaining lease term.

During 1995, the CTA entered into sale/leaseback agreements (1995 Agreements) with third parties. The 1995 Agreements provided for the CTA to sell and lease back certain rail equipment totaling $487.1 million at cost for a period of 19 years beginning on the date of the respective transaction. As of December 31, 2008, the total payments due under the 1995 Agreements are recorded as capital lease obligations totaling $1,043.3 billion. The CTA has deposited funds into designated cash and investment accounts sufficient to meet all of its payment obligations throughout the terms of the leases, and recorded such amounts as assets restricted for repayment of leasing commitments.

Change in Capital Lease Obligations:
Changes in capital leases for the year ended December 31, 2008 are as follows (in thousands of dollars):

2008	Beginning Balance	Additions*	Principal Paid	Ending Balance	Interest Paid	Due in One Year
2003 (Buses)	$ 15,022	$ 535	$ -	$ 15,557	$ 535	$ -
2002 (Buses)	106,255	5,356	-	111,611	5,356	-
2002 (QTE)	173,733	10,154	(103,094)	80,793	10,154	-
1998 (Green)	271,031	18,508	(38,184)	251,355	18,508	$25,885
1997 (Garages)	32,464	2,442	-	34,906	2,442	-
1996 (Skokie/Racine)	32,611	2,397	-	35,008	2,397	-

TOTAL CAPITAL LEASE OBLIGATION	**$1,750,421**	**$ 236,537**	**$(207,099)**	**$1,779,859**	**$121,087**	**$99,688**

*Additions include accretion of interest

The following table sets forth the aggregate amounts due under the sublease agreements:

Future Minimum Lease Payments: As of December 31, 2008, future minimum lease payments for capital leases, in the aggregate, are as follows (in thousands of dollars):

2009	$ 109,209
2010	122,647
2011	112,647
2012	111,440
2013	191,063
2014-2018	1,750,021
2019-2023	311,950
2024-2028	139,834
2029-2033	30,942
TOTAL FUTURE MINIMUM PAYMENTS	**$ 2,879,753**
Less Interest	(1,099,894)
PRESENT VALUE OF MINIMUM PAYMENTS	**$ 1,779,859**

The present value of all future payments to be made by the CTA under all its leases of approximately $1.8 million is reflected in the accompanying December 31, 2008 statement of net assets as capital lease obligations.

Metra

On September 18, 1998, Metra entered into a transaction to lease 174 railcars to three equity investors (headlease) and simultaneously subleased the railcars back (sublease). Under these agreements, Metra maintains the right to use the railcars and is also responsible for their continued maintenance and insurance. Metra's sublease arrangements have been recorded as long-term obligations for accounting purposes.

At closing, the railcars had a fair market value of approximately $296.9 million and a book value of $262.9 million. As part of the headlease agreements, Metra received prepayments equivalent to the net present value of the headlease obligations totaling approximately $274 million.

Metra transferred approximately $177.4 million and $52.9 million of the prepayment proceeds to third parties, in accordance with the terms of debt and equity payment undertaking agreements, respectively. These agreements constitute commitments by the debt and equity payment undertakers to pay Metra's sublease and buy-out options, under the terms of the subleases. The debt payment undertaker and equity payment undertaker are finance companies.

In connection with the transaction, Metra recognized $43.7 million as leasehold revenue in 1998.

In 2008, American International Group, Inc ('AIG') incurred a ratings downgrade undertaker ('DPU'), Equity Payment undertaker ('EPU'), and Standby Letter of Credit Provider ('SLOCP') for these transactions. Once AIG's rating fell below levels specified per the terms of the agreements, AIG was required to provide additional collateral to securitize the transactions. Later in 2008, AIG's credit ratings were further downgraded which triggered an event of default. No notices of default were or have been received; however, the investors can demand to have AIG replaced or that some other suitable arrangement be made.

On December 18, 2008, one of the investors terminated their transaction. A second investor has advised Metra that they are satisfied with AIG in its capacities. The remaining investor has sent notices demanding that AIG be replaced. Subsequently, the investor has been allowing Metra to pursue potential optics demanding that AIG be replaced. Subsequently, the investor has been allowing Metra to pursue potential options that could be mutually acceptable to both the investor and Metra. Metra does not anticipate a material adverse financial impact as a result.

The net present value of the future payments due under the subleases has been recorded as a liability on the accompanying balance sheet. Since the debt and equity payment undertaking agreements have been structured to meet all future obligations under the subleases, the related asset balances have been recorded to equal the sublease liabilities on the accompanying balance sheet. The following table sets forth the aggregate amounts due under the sublease agreements:

Future Minimum Lease Payments: As of December 31, 2008, future minimum lease payments for capital leases, in the aggregate, are as follows (in thousands of dollars):

2009	$ 14,660,341
2010	14,660,341
2011	14,660,341
2012	14,660,341
2013	14,660,341
2014-2018	73,301,706
2019-2021	154,316,955
TOTAL FUTURE MINIMUM PAYMENTS	**$ 300,920,366**
Less Interest	(118,388,183)
PRESENT VALUE OF MINIMUM PAYMENTS	**$ 182,532,183**

The present value of minimum lease payments of the Metra lease is $182.5 million which is reflected in the accompanying December 31, 2008 statement of net assets as capital lease obligations.

Pace

During 2003, Pace entered into two lease and leaseback agreements and realized a gain of $2.4 million from the proceeds. The transactions allowed Pace to earn up-front economic cash benefit for transferring ownership (not legal title) of a group of assets to a taxpayer that could take advantage of the benefits of tax ownership.

The first lease and leaseback agreement with a third party pertained to certain buses (lot 1, 2, and 3) with a book value of $25.3 million as of December 31, 2008. Under the bus lease agreements, which provide certain cash and tax benefits to the third party, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $60.8 million and is reflected in the accompanying December 31, 2008 statement of net assets as the total of the current and long-term portions of Capital lease obligation.

The second lease and leaseback agreement with a third party pertained to certain buses (lot 4) with a book value of $15.1 million as of December 31, 2008. Under the bus lease agreements, Pace entered into a long-term lease for applicable assets with a trust, established by the equity investor, in which the trust concurrently leased the respective assets back to Pace under a sublease. The present value of the future payments to be made by Pace under the lease is approximately $24.9 million and is reflected in the accompanying December 31, 2008 statement of net assets as the total of the current and long-term portions of the Capital lease obligation.

2008	Beginning Balance	Additions	Reductions	Ending Balance	Interest Expense	Due in One Year
2003 (Buses)	$57,273,790	$3,573,739	$ -	$60,847,529	$3,573,739	$ -
2003 (Buses)	23,346,028	1,545,668	-	24,891,695	1,545,667	-
TOTAL	**$80,619,818**	**$5,119,407**	**$ -**	**$85,739,224**	**$5,119,406**	**$ -**

As described above, Pace entered into two lease financing agreements with a third party in 2003.

The following table sets forth the aggregate amounts due under the sublease agreements:

2009	$ -
2010	-
2011	-
2012	1,438,538
2013	
2014-2016	124,399,915
TOTAL FUTURE MINIMUM PAYMENTS	**125,838,453**
Less Interest	(40,099,229)
PRESENT VALUE OF MINIMUM LEASE PAYMENTS	**85,739,224**
A Reconciliation of the Statement of Net Assets to amount presented above:	
Capital lease obligation	85,739,224
Capital lease obligation, long term portion	$ 85,739,224

The present value of the future payments including the purchase option to be made by Pace under these leases are approximately $85.7 million and is reflected in the accompanying December 31, 2008 statement of net assets as the total of the current and long-term portions of the capital lease obligation.

7. COMMITMENTS AND CONTINGENCIES

Each of the entities has various commitments that have arisen in the normal course of operations. None is expected to have a material adverse impact on its financial position as presented.

Each of the entities has also established liabilities for potential legal judgments to satisfy claims against the entity.

The RTA has also established a Loss Financing Plan to cover funding of losses incurred by the RTA and the Service Boards over certain established limits.

8. CASH AND INVESTMENTS

The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/1, et seq. Each of the Combined Entities has established its own investment policy which is in line with the State statute or, in some cases, more restrictive.

The Combined Entities have on hand, as of December 31, 2008, $581 million of cash and investments. Of this amount, $291 million is restricted for self-insurance and other damage reserve liabilities, debt service, health insurance claims, and capital projects. In addition, CTA, Metra, and Pace hold $2.57 billion of investments in other assets for employee pension benefits, damage liabilities, and capital lease obligations, which are recorded as other assets in the financial statements.

9. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	January 1, 2008	New Issues	Current Retirements	DECEMBER 31,2008
1990A	$ 60,795,000	$ -	$ -	$ 60,795,000
1991A	55,745,000	-		55,745,000
1992A* &1992B	40,185,000	-	6,840,000	33,345,000
1994A* &1994B	24,395,000	-		24,395,000
1994C* &1994D	62,205,000	-	4,420,000	57,785,000
1997 Refunding	70,830,000	-	4,875,000	65,955,000
1999* Refunding	280,110,000	-	5,665,000	274,445,000

2001B Refunding*	31,430,000	-	1,630,000	29,800,000
2002A*	147,760,000	-	2,835,000	144,925,000
2002B*	154,145,000	-	10,060,000	144,085,000
2003A*	246,975,000	-	4,555,000	242,420,000
2003B	142,665,000	-	2,675,000	139,990,000
2003C Refunding	6,960,000	-	3,395,000	3,565,000
2004A*	250,815,000	-	4,405,000	246,140,000
2005B Refunding	142,375,000	-	3,070,000	139,305,000
2006A*	249,300,000	-	3,385,000	245,915,000
TOTAL	**$2,292,260,000**	**$ -**	**$ 64,685,000**	**$ 2,227,575,000**

*Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2008, the total general obligation bonds payable of $2,227,575,000 are classified as current and long-term in the Statement of Net Assets in the amounts of $68,455,000 and $2,159,120,000 respectively.

Advance Refundings—On June 21, 1993, the RTA advance refunded a portion of its 1990A Series general obligation bond issue. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $20,350,000 of outstanding general obligation bonds (1990A Series) are considered defeased, and therefore, have been removed from the financial statements.

On January 19, 1996, the RTA advance refunded a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $60,300,000 of outstanding general obligation bonds (1994B Series) and $75,605,000 of outstanding general obligation bonds (1994D Series) are considered defeased, and therefore, have been removed from the financial statements.

On September 18, 1997, the RTA advance refunded a portion of its 1990A, 1991A, 1992B, and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt

service payments of the refunded debt. At December 31, 2008, $4,230,000 of outstanding general obligation bonds (1990A Series), $29,265,000 of outstanding general obligation bonds (1991A Series), $18,170,000 of outstanding general obligation bonds (1992B Series), and $47,465,000 of outstanding general obligation bonds (1993B Series) are considered defeased, and therefore, have been removed from the financial statements.

On August 24, 1999, the RTA advance refunded a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation refunding bonds (1999 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $113,895,000 of outstanding general obligation bonds (1992A Series), $9,720,000 of outstanding general obligation bonds (1993A), $142,615,000 of outstanding general obligation bonds (1994A) and $21,955,000 of outstanding general obligation bonds (1994C) are considered defeased, and therefore, have been removed from the financial statements.

On March 1, 2001, the RTA advance refunded a portion of its 1993A Series general obligation bond issues. The RTA issued $37,715,000 of general obligation refunding bonds (2001B Series). Proceeds from the issuance amounted to $40,437,798 which includes a premium of $2,554,206. The proceeds are to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $37,750,000 of outstanding general obligation bonds (1993A) are considered defeased, and therefore, have been removed from the financial statements.

On May 1, 2003, the RTA advance refunded a portion of its 1993C Series general obligation bond issues. The RTA issued $19,055,000 of general obligation refunding bonds (2003C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $19,150,000 of outstanding general obligation bonds (1993C) are considered defeased, and therefore, have been removed from the financial statements.

On May 2, 2005, the RTA issued $ 148 million in General Obligation bonds with a variable rate which resets weekly to refund $144 million of outstanding 1996A Series bonds with an average interest rate of 5.5 percent. The net proceeds of $147 million (after payment of $892 thousand for issuance costs) were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust with an escrow agent to call the 1996A Series bonds June 1, 2005. As a result, the 1996A Series bonds are considered to be defeased and the liability for those bonds has been removed from the financial statements.

Debt Service Requirements—The "debt service requirements" set forth in the following tables represent payments due the trustee from the RTA, as required by the respective bond agreements. The "principal" columns represent principal payments due bondholders from the trustee.

1990 General Obligation Bonds—In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

The Series 1990A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 6.00% to 7.15% on November 1, 1990 and semi-annually thereafter on May 1 and November 1 in each remaining year.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009		$ 4,377,240	$ 4,377,240
2010	$ 3,810,000	4,377,240	8,187,240
2011	4,085,000	4,102,920	8,187,920
2012	4,380,000	3,808,800	8,188,800
2013	4,695,000	3,493,440	8,188,440
2014-2018	29,060,000	11,882,160	40,942,160
2019-2020	14,765,000	1,613,160	16,378,160
TOTAL	**$ 60,795,000**	**$ 33,654,960**	**$ 94,449,960**

1991 General Obligation Bonds—In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

The Series 1991A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 4.85% to 6.55% on May 1, 1992 and semi-annually thereafter on November 1 and May 1 in each remaining year.

Debt service requirements on the 1991A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009		$ 3,734,915	$ 3,734,915
2010		3,734,915	3,734,915
2011		3,734,914	3,734,914
2012	$ 4,090,000	3,734,915	3,734,915
2013	4,365,000	3,460,885	7,825,885
2014-2018	26,635,000	12,504,210	39,139,210
2019-2021	20,655,000	2,827,400	23,482,400
TOTAL	**$ 55,745,000**	**$ 33,732,154**	**$ 89,477,154**

1992 General Obligation Bonds—In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1992A and 1992B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 5.30% to 9.00% on December 1, 1992 and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1992A and 1992B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009	$ 7,480,000	$ 1,991,960	$ 9,471,960
2010		1,396,960	1,396,960
2011		863,040	863,040
2012-2022	25,865,000	293,760	26,158,760
TOTAL	**$ 33,345,000**	**$ 4,545,720**	**$ 37,890,720**

1994 General Obligation Bonds—In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00% on December 1, 1994 and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009		$ 1,951,600	$ 1,951,600
2010		1,951,600	1,951,600
2011		1,951,601	1,951,601
2012		1,951,600	1,951,600
2013		1,951,600	1,951,600
2014-2024	$24,395,000	5,892,599	30,287,599
TOTAL	**$ 24,395,000**	**$ 15,650,600**	**$ 40,045,600**

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995 and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009	$ 1,500,000	$ 4,420,213	$ 5,920,213
2010	1,620,000	4,299,312	5,919,312
2011	1,750,000	4,168,725	5,918,725
2012	1,890,000	4,027,675	5,917,675
2013	2,045,000	3,875,194	5,920,194
2014-2018	35,420,000	13,311,401	48,731,401
2019-2025	13,560,000	798,250	14,358,250
TOTAL	**$ 57,785,000**	**$ 34,900,770**	**$ 92,685,770**

1997 General Obligation Refunding Bonds—In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001-2002, in the aggregate amount of $4 million, Series 1991A Bonds, maturing November 1 in the years 2002-2006, 2008 and 2011, in the aggregate amount of $29 million, Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million and Series 1993B Bonds, maturing June 1 in the years 2004-2009, 2013 and 2023, in the aggregate amount of $47 million.

The Series 1997 Refunding Bonds mature on June 1 over a twenty-six-year period and interest is payable at rates ranging from 4.00% to 6.00% on December 1, 1997 and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1997A Refunding bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009	$ 5,155,000	$ 3,724,463	$ 8,879,463
2010	5,445,000	3,432,963	8,877,963
2011	5,750,000	3,125,100	8,875,100
2012	1,865,000	2,915,688	4,780,688
2013	3,320,000	2,764,800	6,084,800

2019-2023	59,200,000	9,770,477	68,970,477
2024-2025	25,485,000	753,968	26,238,968
TOTAL	**$ 139,305,000**	**$ 45,794,682**	**$ 185,099,682**

* Interest was calculated using a rate of 3.3%

2006 General Obligation Bonds—In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

The Series 2006A Bonds mature on July 1, over a thirty year period and interest is payable at rates ranging from 4.25% to 5.00% on January 1, 2007 and semi-annually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2006A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirement		
	Principal	Interest	TOTAL
2009	$ 3,625,000	$ 12,041,281	$ 15,666,281
2010	3,780,000	11,860,031	15,640,031
2011	3,955,000	11,671,031	15,626,031
2012	4,150,000	11,473,281	15,623,281
2013	4,390,000	11,265,781	15,655,781
2014-2018	26,470,000	52,750,656	79,220,656
2019-2023	45,150,000	44,925,656	90,075,656
2024-2028	99,210,000	28,014,906	127,224,906
2029-2033	18,735,000	9,866,056	28,601,056
2033-2035	36,450,000	2,204,775	38,654,775
TOTAL	**$ 245,915,00**	**$ 196,073,456**	**$ 441,988,456**

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $78,391,542 in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2008.

10. PENSION

All eligible employees of the Combined Entities are covered under a pension plan. RTA employees, as well as non-union employees of Metra and Pace, are covered under the RTA Pension Plan, which is a multi-employer, non-contributory, defined benefit cost sharing plan and trust. The union employees of Metra and Pace are covered under various other plans as required by their collective bargaining agreements.

The CTA maintains two single-employer defined benefit pension plans, the Employees' Retirement Plan and the Supplemental Retirement Plan, covering substantially all full-time permanent union and non-union employees and Chicago Transit Board members. The Employees' Retirement Plan is governed by the terms of the employees' collective bargaining agreement. The Supplemental Retirement Plan, which includes the Retirement Plan for Board Members and the Supplemental Retirement Plan for selected Officers, Executives, Supervisory and Professional Employees, provides benefits, in addition to the Employees' Retirement Plan, to management employees in certain employment classifications and Chicago Transit Board members.

11. REGION-WIDE FINANCIAL INFORMATION

The RTA management has elected to present certain region-wide financial information. The purpose of this information is to provide a total overview of transportation-related operations in the northeastern Illinois region. This information includes the transportation-related results of the Service Boards' affiliated carriers. Accordingly, this region-wide information is presented in the combining region-wide schedules of revenues and expenditures and the combining region-wide statement of revenues and expenditures—budget and actual.

The basic financial statements of the RTA and the Service Boards used to prepare the combining statement of revenues and expenses do not include the aggregate of system-generated revenues and costs. The combining region-wide schedules of revenues and expenditures include the aggregate of all system generated revenues and costs.

For purposes of the system-generated revenues recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with accounting principles generally accepted in the United States, with certain allowable adjustments as enumerated in the Act. Costs funded by Federal capital grants are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act.

The Act requires that the aggregate of all system-generated revenues equal at least 50% of the aggregated costs of providing such public transportation.

For 2008, the region-wide system-generated revenues recovery

ratio is calculated from the Combining Region-Wide Schedules of Revenues and Expenditures—(Budget and Actual Budget Basis) as follows:

The region-wide system-generated revenues recovery ratio for

System-Generated Revenues Recovery Ratio
(In Thousands)

	Revenues	Expenditures
CTA*	$ 596,317	$ 1,204,005
Metra**	320,825	559,316
Pace***	61,139	179,627
RTA****	17,462	29,300
TOTAL	**$ 995,743**	**$ 1,972,248**

2008 equals 56.19%.

* The system-generated revenues recovery ratio for the CTA included leasehold revenues of $4.3 million and Senior Free Rides revenue of $17.5 million, but excluded CTA expenditures for security costs of $32.4 million. It also included in-kind services of $22 million, both as revenues and expenditures.

** Metra's system-generated revenues recovery ratio included Senior Free Rides revenue of $5 million, but excluded $16.6 million security costs, $16 million costs for lease of transportation facilities and $2.7 million for funded depreciation to carriers were deducted from expenditures.

*** Pace system-generated revenues recovery ratio included Senior Free Rides revenue of $1.5 million, and in-kind services of $7.7 million both as revenues and expenditures.

**** The RTA subtract back $15.9 million of unrealized loss on swap valuation to its revenues. Also, the RTA excluded all capital related depreciation expenses of $235 thousand.

**** $200 million of new expenses are exempted from the farebox recovery ratio to avoid the need to match each new dollar with a 50 cent fare increase. This exemption is phased out over 5 years, thereby requiring gradual fare increases.

These are allowable adjustments for the revenues recovery ratio computation per the Act. These adjustments are reflected in the region-wide information.

Also, in the RTA Act section 4.01(b) requires the RTA Board to determine that the level of fares charged for ADA paratransit services are sufficient to cause the aggregate of all projected revenues from such fares charged and received in each fiscal year to equal at least 10% of the aggregate costs of providing such ADA paratransit services in fiscal years 2008. Pace ended the year with a 10.0% recovery ratio for Regional ADA Paratransit Services. The 2008 budget for ADA paratransit service adopted by the RTA meets the 10% recovery ratio requirement.

12. RECONCILIATION OF GOVERNMENT-WIDE TO REGION-WIDE REVENUES AND EXPENDITURES

RTA's government-wide financial statements do not include fiduciary fund financial statement information which is added in the region-wide presentation. As also stated in Note 11, in-kind services are added in the system-generated revenues and expenditures.

The following data (in thousands) reconciles the combining government-wide to region-wide schedules of revenues and expenditures:

	RTA	CTA	Metra	Pace
Government-wide revenues (page 35)	$ 476,251	$1,841,682	$ 735,772	$ 311,391
Sales tax agency fund	871,535			
Pension trust fund	(16,185)	33,188		
Senior Free Rides		17,500		
In-kind services		22,000		7,671
ADA Regional Paratransit Funding				107,935
Interest on Bonds		4,385		
Unrealized loss on swap valuation	23,986			
Region-wide revenues (page 36)	1,355,587	1,918,755	735,772	426,997
Government-wide expenditures (page 35)	589,988	1,786,433	830,294	317,887
Sales tax agency fund	871,535			
Pension trust fund	9,858			
In-kind services		22,000		7,671
Security Costs		(32,282)	(16,558)	
Lease of transportation facilities			(15,985)	
Prior Year Positive Balance Lease proceeds		20,000		
Pension and other employee benefits		13,191		
Capital (Depreciation, disposals / additions)	(732)		(2,744)	
Region-wide expenditures (page 36)	1,470,649	1,809,242	795,007	325,558
NET REVENUES (EXPENDITURES)	**$ (115,062)**	**$ 109,513**	**$ (59,235)**	**$ 101,439**

13. SUBSEQUENT EVENTS

During 1998, the CTA entered into a lease and leaseback agreement (Green Line Lease) with three equity investors pertaining to the railway tracks, train stations and adjacent property on the Green Line. The CTA's payments associated with this agreement were guaranteed by American International Group, Inc (AIG). During 2008, AIG's credit rating was reduced amid the U.S. global economic crisis. Although each equity investor had the right to demand that the CTA replace AIG as guarantor, one of the investors decided to simply exercise the option to terminate the Green Line transaction with CTA. CTA entered negotiations with this investor to unwind the transaction at the current market value in the equity defeasance account. These negotiations were finalized in 2009 and final payment was made and a termination agreement was executed. The restricted lease assets and associated lease liability related to this transaction were removed from CTA's financial statements upon termination and payment in 2009. CTA is in negotiations with the remaining two equity investors to determine whether to unwind the transaction or restructure the agreements with a new guarantor.

During 2008, CTA issued nearly $2 billion in Sales and Transfer Tax Receipts Revenue Bonds for the purpose of funding the pension and retiree healthcare. These bonds were initially executed as fixed rate bonds with a relatively high interest rate. In April 2009, CTA executed a basis swap transaction that has a net effect of changing the interest rate characteristics of the debt for a portion of the

bonds from a fixed rate to a variable interest rate. The transaction was structured such that CTA will receive upfront cash payments in 2009 and 2010. Beginning in 2011, CTA will pay a percentage of a tax-exempt index (SIFMA) and receive a taxable index (LIBOR) plus a fixed payment annually over 20 years based on the notional amount of the transaction of $567,130,000. CTA has the right to terminate this basis swap transaction at any time.

In January 2009, the RTA borrowed $24 million under the terms of the working cash note agreement. The funds were used to supplement CTA's cash flow.

On May 27, 2009, Fitch Ratings downgraded the Regional Transportation Authority's (Illinois) (RTA, or the Authority) general obligation (GO) bond rating to 'AA-,' from 'AA,' and assigns a Negative Outlook to outstanding GO debt. In conjunction, Fitch assigned an 'F1+' rating to the Authority's approximately $132.8 million Series 2005B GO variable rate notes and an 'F1' rating to its approximately $260 million taxable GO working cash notes, Series 2009B. The Series 2009B and Series 2005B notes are during June 2009. The downgrade affects and the Negative Outlook applies to approximately $650.4 million of outstanding GO bonds.

On June 8, 2009, Moody's Investors Service assigned an Aa3 rating to the approximately $132.8 million remarketing of the Regional Transportation Authority (RTA) General Obligation Variable Rate Bonds, Series 2005B. At the same time, Moody's has downgraded the RTA's approximately $2.5 billion outstanding parity bonds to Aa3 from Aa2. The outlook is stable. The bonds are secured by a gross pledge of sales taxes and other state aid and constitute a full faith and credit obligation of the RTA.

In June 2009, the RTA intends to issue up to $260 million of Working Cash Notes that will mature not later than June 1, 2011. The purpose of the funding is to payoff an existing note and to provide timely operating funding for the RTA and the Service Boards necessitated by the economic downturn.

On July 1, 2009, the RTA will initiate a mandatory tender of all Series 2005B bonds ($132,770,000), modify the indenture, and reissue the bonds in a different mode. (This is not a refunding. The par value and maturity of Series 2005B will not be changed by the transaction.) The mandatory tender will allow the Authority to eliminate the need to have a liquidity provider, change the interest reset frequency from weekly to monthly and lengthen the extension period from seven days to 12 months.

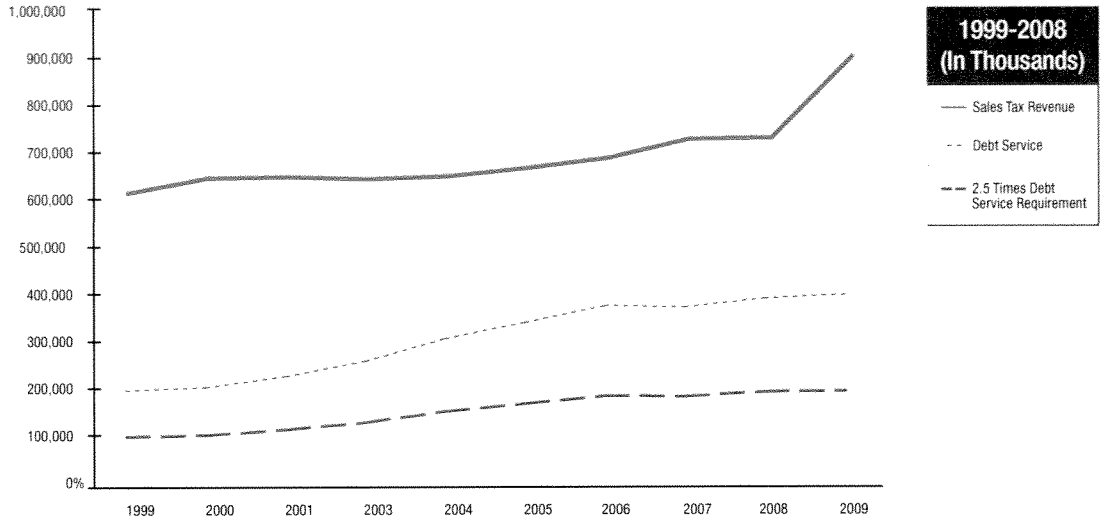
COMPARISON OF SALES TAX REVENUE TO DEBT SERVICE REQUIREMENT



As defined in the Bond and Note General Ordinance, ordinance 85-39, Section 909 (3), revenue test required that all RTA revenues "shall equal or exceed two and one-half (2.5) times the maximum annual debt service requirements." In the graph presented above, the RTA compares 2.5 times debt service requirement to sales tax revenues, a major RTA revenue. In effect, the RTA significantly exceeds the revenue test defined in the ordinance.

Last Ten Years (In Thousands)

Year	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008
Sales Tax Revenue	$ 613,514	$ 650,284	$ 653,522	$ 647,685	$ 654,985	$ 675,628	$ 700,395	$ 746,829	$ 752,922	$ 949,617
Debt Service Requirement	77,866	81,676	95,187	113,526	140,607	159,702	179,536	178,086	188,551	192,555
2.5 Times Debt Service Requirement	$ 194,665	$ 204,190	$ 237,968	$ 283,815	$ 351,518	$ 399,255	$ 448,840	$ 445,215	$ 471,378	$ 481,388

Differences, if any, between debt service amounts presented above and amounts presented in the accompanying financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

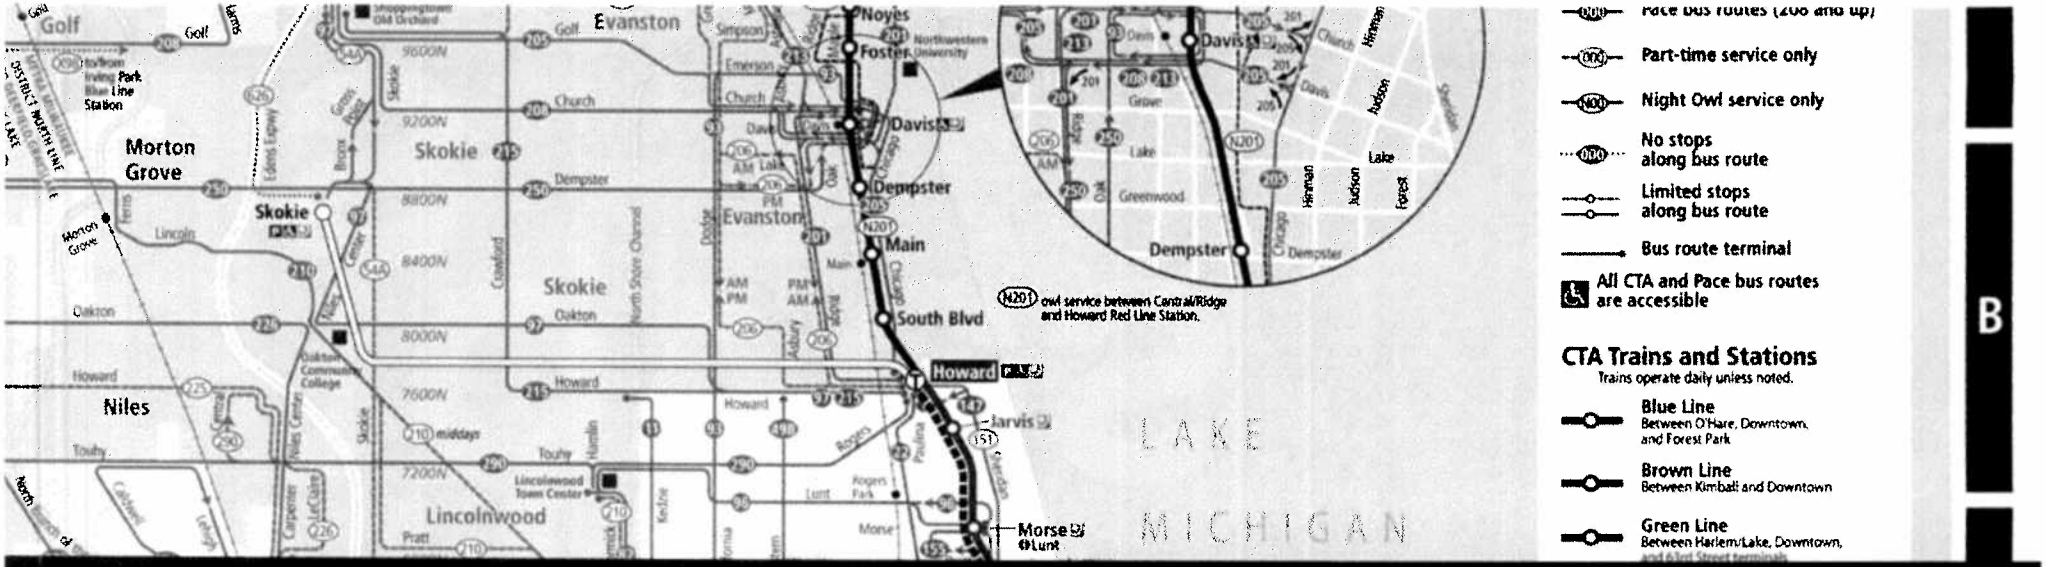
ANNUAL REPORT 2009
what
moves
us

R201



What moves the RTA?

We're in the business of overseeing how people are moved – from home to work, from the suburbs to the city, from point A to point B. But it's much more than that. Public transportation moves an area from separate towns and villages into a powerful region, united by the trains and buses that drive economic growth, ease traffic congestion and benefit the environment.

What keeps the entire process moving is the funding that supports transit: critical dollars that help the RTA manage improvements to infrastructure, acquisition of assets and completion of critical projects. We want to keep people, business, the economy and the entire northeastern Illinois region moving forward.

Ultimately, what moves us is our riders. They are why we do what we do. And in these difficult times, we pledge to go above and beyond to do what's best for them. We'll keep moving… and we won't stop.

LETTER FROM THE EXECUTIVE DIRECTOR

The economic crisis that has gripped our nation since the fall of 2008 has posed an extreme challenge to all levels of government. They have all confronted revenue shortfalls and have made difficult cuts to service, employees and other resources in order to deal with the deteriorating economy. Transit systems in particular, with their reliance on revenues closely tied to consumer spending, faced extremely daunting circumstances throughout 2009. Over 80 percent of our nation's transit systems have raised fares, reduced or eliminated service or both, according to the American Public Transportation Association.

Despite these challenges, the Regional Transportation Authority (RTA) has worked cooperatively with the Chicago Transit Authority (CTA), Metra and Pace to make strategic changes in operations and personnel in order to reduce costs, while avoiding the need for major cuts to transit services or significant fare increases. Through a combination of tight fiscal management, the prudent use of working cash and the imposition of unpaid furlough days and other internal policy changes, we have been able to navigate the most difficult economic period in nearly eight decades.

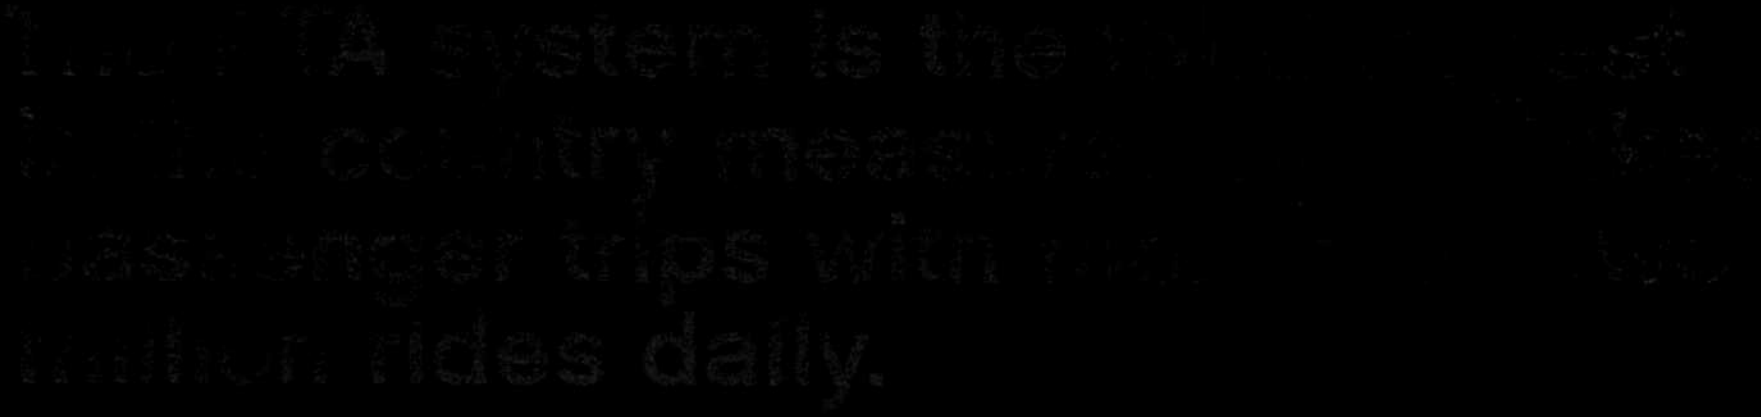
Additionally, the RTA supported this initiative to secure $2.7 billion in state capital funds, developed and implemented a regional performance metrics, conducted the first regional customer satisfaction measurement study and managed and monitored the implementation of the Office of the Auditor General recommendations to approve the system operation.

As the crisis has gradually lifted, economic and revenue indicators have improved. However, we remain in the midst of a very challenging fiscal climate and continue to plan for the future under the assumption of reduced revenue and slow recovery. This 2009 annual report details the steps we have taken to address the ongoing crisis.

We are eager to complete the capital investments approved in the 2009 capital plan in order to improve our transit system and help our economy recover. Initial capital funds have already been allocated to the individual transit agencies and we look forward to full implementation of the capital plan. We will continue to work with the State of Illinois to meet state transit operating funding commitments, which are lagging, as its own revenue situation improves. Our fiscal actions in 2009 to address our own transit revenue shortfalls leave the RTA and the service boards with little flexibility if state funding commitments continue to be delayed significantly.

Each day over two million riders rely on the transit system to support our economy, our environment and our quality of life. Together, we can continue to improve our transit network for riders, taxpayers and the millions of Illinois residents who benefit from the system.

STEPHEN E. SCHLICKMAN
Executive Director



THE REGIONAL TRANSPORTATION AUTHORITY

EXECUTIVE DIRECTOR: STEPHEN E. SCHLICKMAN

BOARD CHAIR: JIM REILLY

The Regional Transportation Authority (RTA) is the oversight, funding, and regional planning agency for the transit Service Boards including the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail and Pace suburban bus and paratransit. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties in northeastern Illinois. The RTA is a special purpose unit of local government and a municipal corporation of the State of Illinois. From the time of its creation, the RTA's mission has been to ensure financially sound, comprehensive and coordinated public transportation for northeastern Illinois.

The CTA, Metra and Pace handle their respective transit operations and fare responsibilities. Each is led by a Board of Directors that determines levels of service, fares and operational policies. The RTA's oversight responsibility is guided by the RTA's Board of Directors, who approves an annual budget and two-year financial plan that sets a strategic plan to guide all the agencies in achieving their common mission of providing the best transit system possible for the region. The Board consists of 16 members and a chairman appointed from the six-county region. The RTA Board also is required annually to review and approve a five-year capital plan, which is a blueprint of the capital activities to be funded by the RTA and executed by the CTA, Metra and Pace.

The RTA regional system is the third largest in the country measured by unlinked passenger trips with more than two million rides daily. The combined assets of the RTA system are valued at more than $43 billion and include 5,640 buses and rail cars, plus 650 vanpool vehicles. The system covers 7,200 route miles in the six-county region that currently has a population of approximately eight million people.

Transit reform legislation, House Bill 656, enacted in January 2008 by the Illinois General Assembly, expanded the Authority's Board from 13 to 16 members. The new appointees will serve in five-year terms. The following is a breakdown of the Board make up and the appointing authorities:

- 5 by Mayor of Chicago (appointee cannot be the Chairman of CTA)
- 4 by suburban members of the Cook County Board
- 1 by the President of the Cook County Board (from Suburban Cook County)
- 1 by the Chairman of the DuPage County Board
- 1 by the Chairman of the Lake County Board
- 1 by the Will County Executive
- 1 by the Chairman of the McHenry County Board
- 1 by the Chairman of Kane County Board
- The Board Chair is appointed by 11 members of the Board with at least 2 votes from Chicago, Suburban Cook and the collar counties.

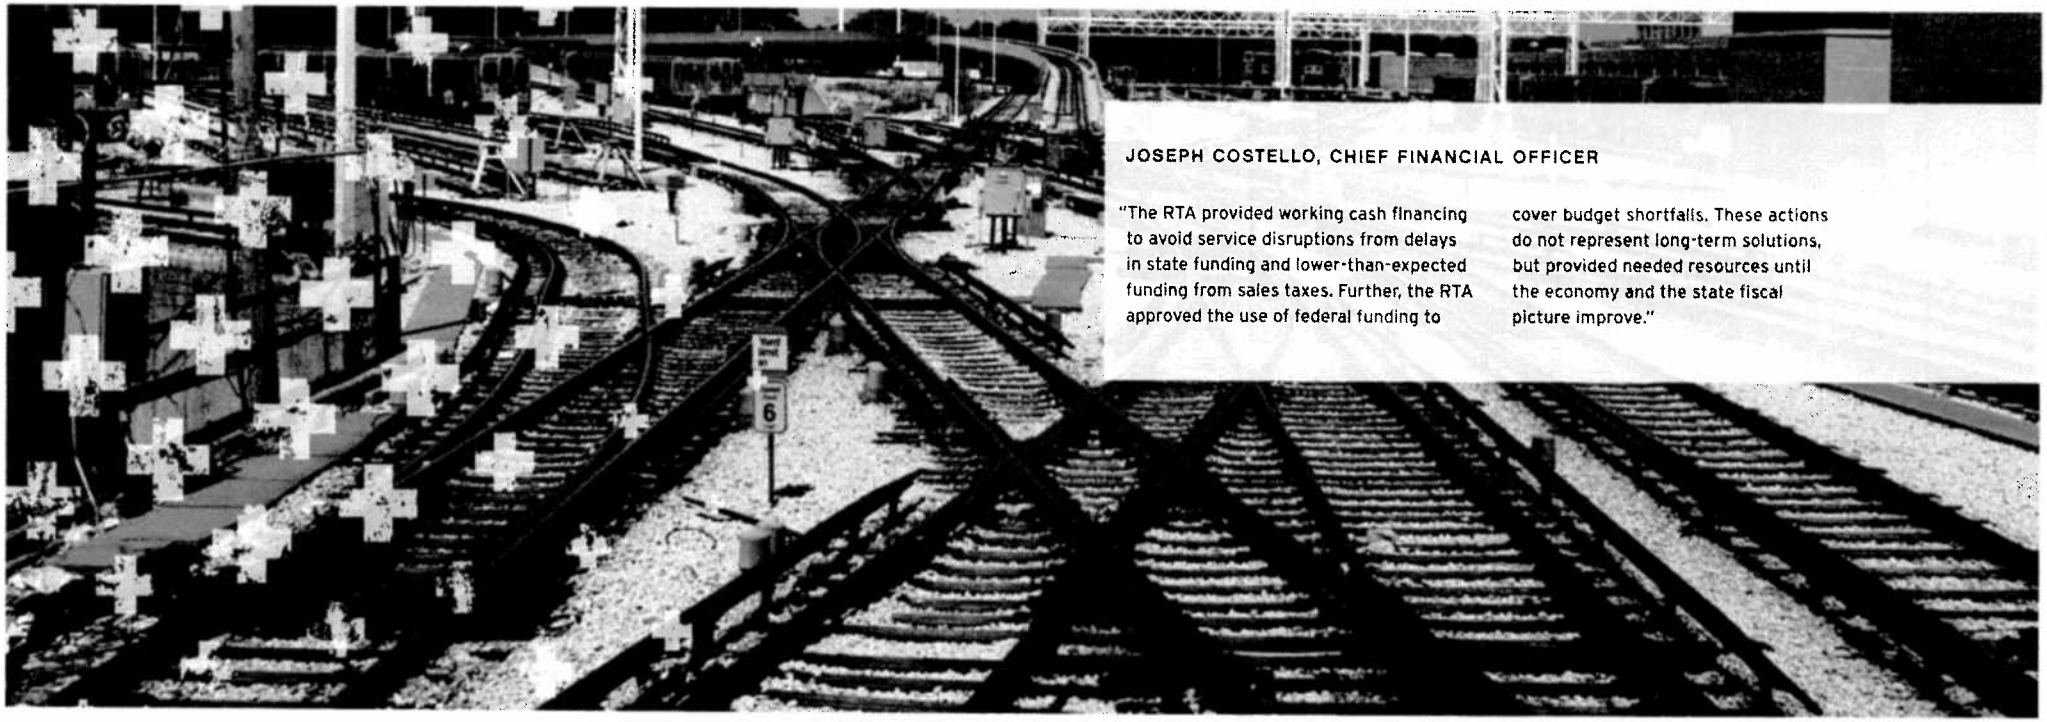
STEPHEN E. SCHLICKMAN
Executive Director



JOSEPH COSTELLO, CHIEF FINANCIAL OFFICER

"The RTA provided working cash financing to avoid service disruptions from delays in state funding and lower-than-expected funding from sales taxes. Further, the RTA approved the use of federal funding to cover budget shortfalls. These actions do not represent long-term solutions, but provided needed resources until the economy and the state fiscal picture improve."

FISCAL RESPONSIBILITY

In 2009, the RTA made decisions that would be fiscally responsible for our riders. The RTA reduced revenue estimates downward by $61 million and immediately began working with the CTA, Metra and Pace to identify solutions to address revenue shortfalls resulting from the current economic crisis. The RTA reduced its own internal operating budget of $36.7 million by 12 percent, saving approximately $4.5 million.

The RTA was responsible for coordinating and managing the finances of the transit agencies, an effort that has become more critical as we continue to confront the impact of our historic economic crisis. We worked with the CTA, Metra and Pace to make every effort to identify solutions that would reduce the need to rely on fare increases or service reductions.

The recession hit all levels of government hard for the last two years and the transit agencies were not immune to the economic crisis. The RTA, like other transit agencies, adjusted to its changing conditions.

ANDREW GRUBER, FORMER SENIOR DEPUTY EXECUTIVE DIRECTOR
LEGAL AND GOVERNMENTAL AFFAIRS

"The capital bill provides essential funding to reinvest in the region's public transportation system. With these funds, more energy efficient buses and locomotives can be purchased, stations can be cleaned and repaired, and tracks can be rehabilitated to ensure continued safety and smooth operation."

REPRESENTATIVE LOU LANG
HOUSE CHIEF SPONSOR OF THE FIRST STATEWIDE CAPITAL BILL IN 10 YEARS

"The capital construction bill provides for $31 billion for the infrastructure needs of our great state. A significant share of these investments, $2.7 billion, will be for northeastern Illinois transit. These new investments will create many jobs and update and maintain services and equipment. Those who use our local transit will find that they have a more efficient and more convenient experience. This is a WIN-WIN for the taxpayers."

CAPITAL FUNDING

The year 2009 brought good news to transit riders with more capital funding than any previous year.

In 2009 the Illinois General Assembly and Governor Quinn approved $2.7 billion in capital funding for northeastern Illinois transit to repair and maintain the transit system. The last state capital bill passed 10 years ago, and the RTA will be using the latest capital funding to bring the regional transit system closer to a state of good repair by replacing outdated vehicles and equipment, aging stations and deteriorating rail ties that were resulting in slow zones.

The state funds were coupled with $414 million in federal stimulus funding that the regional transit system received. Working with the CTA, Metra and Pace, the RTA identified and prioritized the most pressing maintenance needs of the system.

BICYCLE COMMUTER: SERGE LUBOMUDROV

"Living in Chicago, I use the CTA for commuting and for getting around the city. Often, I take my bike along, and the ability to bring it on the train is quite important. Parking is a nightmare in my area; that's why I've never owned a car and don't want to. Public transportation allows me to avoid the hassle. I'll always ride the CTA!"

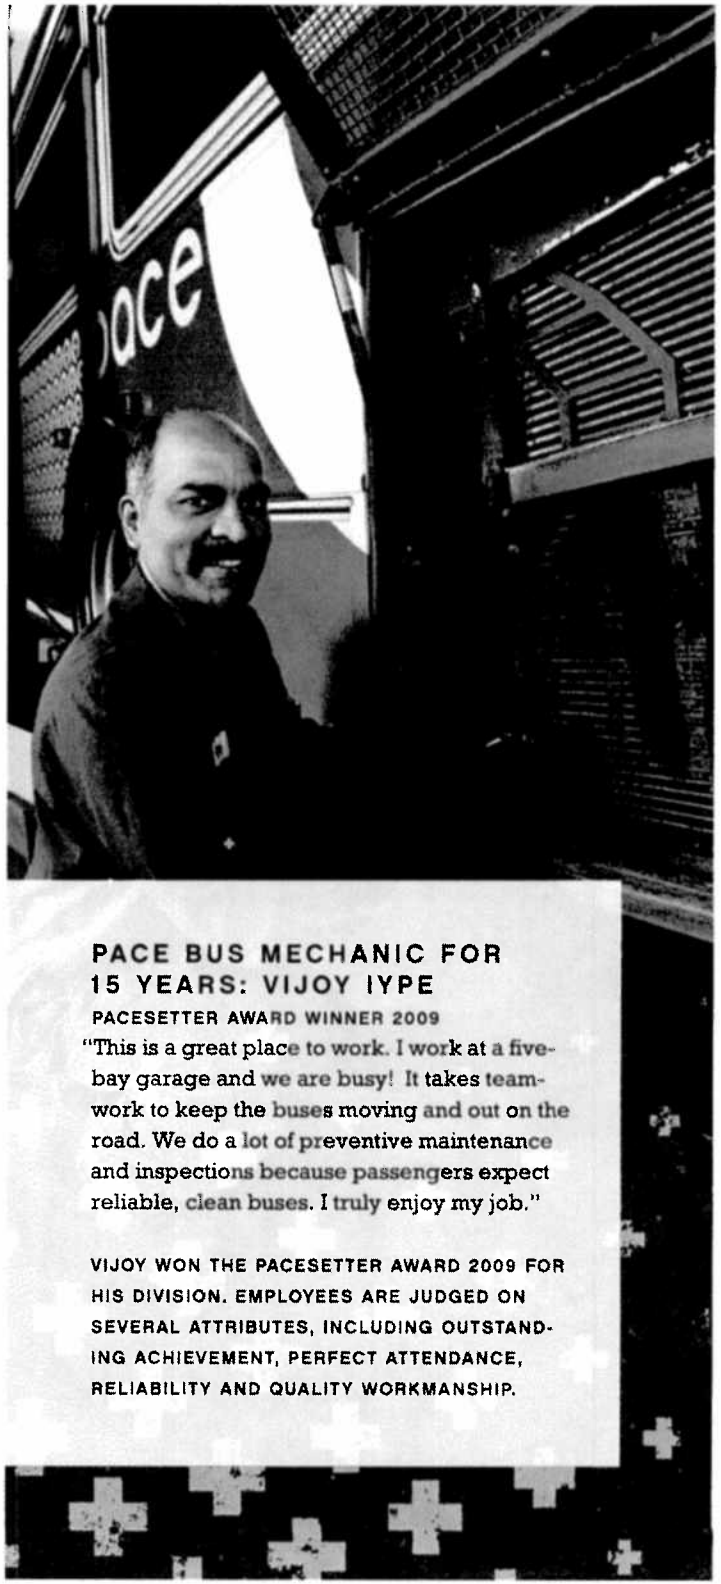
AIMEE LEE, DIVISION MANAGER, STRATEGIC & LONG RANGE PLANNING

"Public transit plays a critical role in the prosperity and vitality of our region. It connects people to jobs, education, health care services and many of the region's key major destinations, such as Midway and O'Hare airports. The benefits of transit are far reaching and go beyond regular riders. An investment in transit is an investment in the long-term well being of our region."

MARKET AND SYSTEMS ANALYSIS

As the RTA works toward a world-class transit system, it understands the importance of knowing the needs of its riders. In 2009, the RTA began a market analysis of travel in the six-county region. The study entailed examining the Chicago Metropolitan Agency for Planning (CMAP) Household Travel Tracker database and a 2009 RTA commissioned survey of riders and non-riders of transit that explored people's attitudes and behaviors about travel. The RTA concluded its data collection effort at the end of August 2009. Between the CMAP and RTA surveys, input from nearly 13,000 households across the region was captured to help paint a picture of regional travel.

The analysis shows that more than 26 million trips are made on an average weekday in our region. The region's travel patterns are highly geographically dispersed with over 60% of travel occurring within the suburban region. While transit accounts for approximately 6% of all trips, 38% of households in the region report using transit over the course of a regular week. Transit serves a critical role in the region's economy as it connects people with jobs, serving 14% of work trips. Survey findings indicate a broad base of support for transit investment. This support was even found to be true among those who do not take transit, pointing to the growing appreciation that the general public has for the broad reaching benefits of transit.



PACE BUS MECHANIC FOR 15 YEARS: VIJOY IYPE

PACESETTER AWARD WINNER 2009

"This is a great place to work. I work at a five-bay garage and we are busy! It takes teamwork to keep the buses moving and out on the road. We do a lot of preventive maintenance and inspections because passengers expect reliable, clean buses. I truly enjoy my job."

VIJOY WON THE PACESETTER AWARD 2009 FOR HIS DIVISION. EMPLOYEES ARE JUDGED ON SEVERAL ATTRIBUTES, INCLUDING OUTSTANDING ACHIEVEMENT, PERFECT ATTENDANCE, RELIABILITY AND QUALITY WORKMANSHIP.

JOHN GOODWORTH, DIVISION MANAGER, PROGRAM COMPLIANCE

"Every asset has an expected life span. Knowledge of an asset's condition allows a consistent method to determine expected comparative costs to either replace an asset at the appropriate time, or to defer and continue maintaining it. Proper maintenance of assets saves taxpayer funds by ensuring that equipment is repaired or replaced at the most cost-effective times."

ASSET CONDITION

The RTA began working on an 18-month assessment of its asset condition report in 2009 to assess the condition of existing capital assets for each of the region's service boards and surrounding suburb area rail system, and Pace (the suburban bus system). The report's intent was to provide the Regional Transportation Authority (RTA) with a plan for a capital asset condition assessment for each Service Board. The process established administrative criteria for the capital replacement, capital rehabilitation and capital maintenance of all assets.

Representatives from the Chicago Transit Authority, Metra and Pace assisted in all aspects of this process including: the design and development of the inventory tables, the condition ratings system based on useful life and industry standards, the definition of "State of Good Repair," the sampling plan and sampling data. Additionally, Asset Information Teams, consisting of representatives from the RTA and its service boards, worked to design and develop the inventory framework which looked at five asset types:

+ Track and Structures
+ Electrical/Subway Equipment
+ Signals/Communications/Fare Collection
+ Stations/Garages/Facilities
+ Rolling Stock

The initial 10-year capital needs assessment is based on cost components for backlog — assets that are still in service and typically have not been replaced within their useful life due to a lack of sufficient funding; normal replacement costs — which are the planned replacement cost for assets that will reach the end of their useful life during the 10-year program; capital maintenance — typically significant and anticipated costs associated with keeping the asset in service for the full term of its useful life; soft costs — includes in-house agency staff, government related support staff and the use of consultants for particular tasks; and contingency costs — unforeseen emergencies or design shortfalls typically identified after a project commences. The results of the study will be published in 2010.

GRACE GALLUCCI, DEPUTY EXECUTIVE DIRECTOR
RESEARCH, ANALYSIS & POLICY DEVELOPMENT

"The Performance Measures Report Card gives public officials and the public a level of confidence that transit system administrators are utilizing tax dollars in an effective way. For 2009, tight controls of costs led to improvements in efficiencies, and the quality of service delivered was maintained."

PERFORMANCE MEASURES

In 2009, the RTA developed and implemented the first phase of a comprehensive performance measure system with the objective of improving the transparency, accountability and overall service of the region's public transit system.

As part of this effort, the RTA compiled and released a report card which satisfied the requirements in the 2008 transit reform legislation and recommendations made by the Illinois Auditor General in a 2007 performance and funding audit. It was the first report of its kind to be created and published by the agency.

The report card found that the overall performance of the transit system is relatively good, but serious challenges still exist, primarily due to a lack of capital investment. The report highlights increases in the levels of service provided, as well as increases in ridership. It also demonstrates successful efforts to improve system maintenance.

Performance Measures are part of the RTA's oversight function to help manage the region's public transit system. They evaluate factors such as service coverage, efficiency and effectiveness, delivery, maintenance and capital investment, and service level solvency. Through aggregated data from the CTA, Metra and Pace, the RTA and the region's taxpayers will have a better sense of how these agencies are collectively meeting their mission, and thus the transit needs for the region.

STUDENT RIDER: GENIE BRYANT

"As a DePaul student, I ride the bus and train every day. I live near the Lincoln Park campus, but commute to the Loop for a class. Coming from the suburbs, I never used public transportation. Now, I use it all the time to explore Chicago. I go to Chinatown, to Loyola to meet friends, and even up to Evanston. It's more social than driving, and no traffic!"

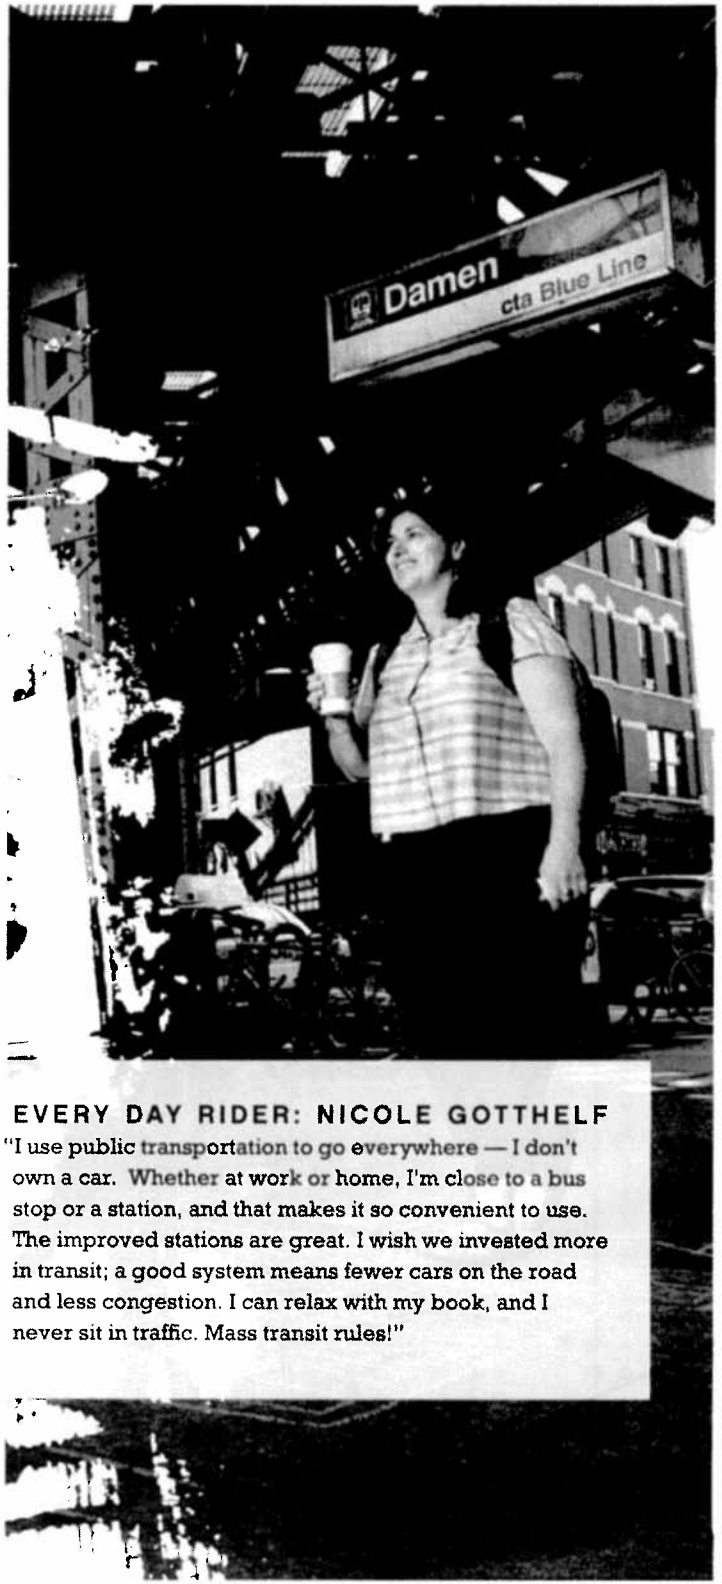
FUNDING PROGRAMS

The RTA's Funding Programs offer planning, operating, and capital grants for a variety of projects. The programs are consistent with the RTA's legislative mandates and Strategic Plan, and coordinated with the annual budget process. Two of the programs, Community Planning and Subregional Planning, provide funding for planning studies and initiatives. The other two programs, Innovation, Coordination and Enhancement (ICE) and Job Access Reverse Commute/New Freedom (JARC/NF), provide funding for transit operating and capital projects.

The Funding Programs provide value to a wide variety of recipients, including municipalities, counties, private non-profits, private transportation operators and the RTA Service Boards. Each recipient's needs are different, and the RTA Funding Programs offer support and a path to implementation. The Funding Programs also provide a unique opportunity for the RTA and its Service Boards to coordinate at the local level to not only create plans or implement projects, but to facilitate intergovernmental cooperation and relationship building. During the past decade, the RTA has leveraged its own funds with federal, state and local funds to program nearly 150 projects.

Each year, the RTA conducts a transparent process consisting of outreach, open houses, a "call for projects," the development of a preliminary program of projects, a public participation process, and ultimately the selection and approval of projects for inclusion in the Funding Programs. In 2009, the RTA Funding Programs funded 19 projects and allocated more than $11 million in federal, local and RTA funds.

The RTA Funding Programs are recognized nationally as a best practice of grant making in the public transportation field. The RTA approaches each potential applicant as a partner in achieving mutual goals. Potential applicants receive valuable guidance, support and advice from the RTA, even if not selected for the programs. For those that are awarded grants, the RTA maintains a strong and committed presence throughout the development, execution and implementation of the project.



EVERY DAY RIDER: NICOLE GOTTHELF

"I use public transportation to go everywhere — I don't own a car. Whether at work or home, I'm close to a bus stop or a station, and that makes it so convenient to use. The improved stations are great. I wish we invested more in transit; a good system means fewer cars on the road and less congestion. I can relax with my book, and I never sit in traffic. Mass transit rules!"

JAY CIAVARELLA
DIVISION MANAGER

"The RTA Funding Programs use a comprehensive set of selection criteria to ensure that critical projects are funded. These programs provide valuable planning for the increased use of public transit, a way to encourage sustainable growth, a proven method to seek investments that maximize beneficial returns, and improved access to jobs in our region."

CAPITAL PROGRAMS OVERVIEW

The RTA Act requires that the capital expenditures of the CTA, Metra and Pace be subjected to continuous review so that the RTA may budget and expend funds available to the region with maximum efficiency. The RTA Board must adopt a Five-Year Capital Program every year. The RTA's Five-Year Capital Program describes the nature, location and budget by project and by fiscal year of all anticipated Service Board capital improvements. Public hearings are held in each county in the northeastern Illinois region to inform the public and government officials of the Authority's capital development plans.

The primary emphasis of the 2009 Capital Program is to continue efforts to bring the system's assets to a State of Good Repair. When replacing worn out items, it is imperative to utilize modern technologies that often result in improved functionalities of equipment, facilities and rolling stock. In addition, a balanced Capital Program is responsive to customer needs and shifting markets by including investment in system expansion. For the 2009 Capital Program, the percent of the budget for capital projects to maintain the system is 93 percent. While the current funding level does not satisfy all needs, an appropriate balance of investment is achieved in light of the current condition of the RTA system.

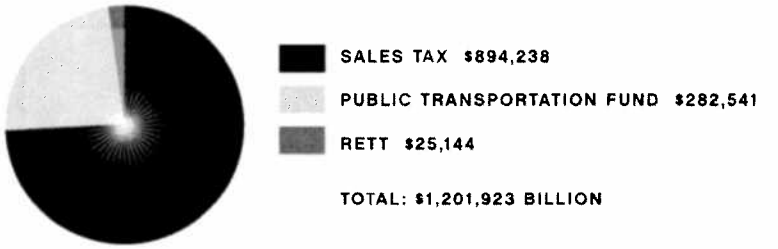
2009 CAPITAL PROGRAMS FOR THE CTA, METRA AND PACE SIGNIFICANT PROJECTS INCLUDED IN THE ADOPTED 2009 CAPITAL PROGRAM:

- $97.6 million for the repair of CTA track and structure
- $57.7 million for the continuation of the purchase of CTA buses
- $42.9 million for the upgrade of power distribution and signal systems
- $42.3 million for the expansion of the CTA Ravenswood Brown Line
- $27.4 million for the purchase of 406 CTA rail cars
- $26.5 million for the rehabilitation and overhaul of CTA rail cars
- $19.8 million for the rehabilitation and overhaul of CTA buses
- $19 million for the improvement of CTA facilities
- $74.1 million for Metra bridge rehabilitation and renewal
- $70.6 million for the rehabilitation and improvement of Metra locomotives
- $19.7 million for the rehabilitation of Metra commuter rail cars
- $18.1 million for the upgrade of Metra signal systems
- $16.2 million for the rehabilitation and improvement of stations
- $25.4 million for the purchase of Pace fixed route buses
- $15.8 million for the purchase of Pace paratransit vehicles
- $6.2 million for the purchase of Pace vans and community vehicles
- $4.4 million for the purchase of the replacement for the HPe3000 computer system and $3.2 million for improvements to Pace garages and facilities
- $1.7 million for the purchase of a replacement of Pace's fixed route radio system

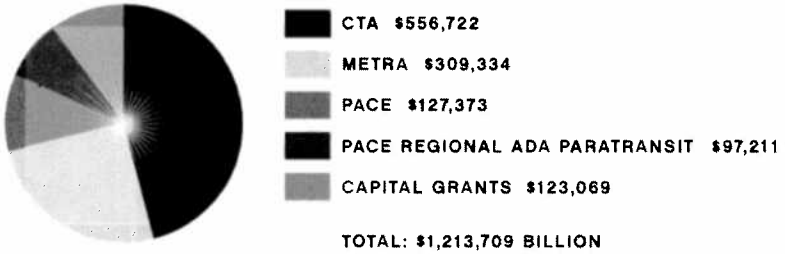
SYSTEM RIDERSHIP UNLINKED PASSENGER TRIPS ENDING DECEMBER 31, 2009

CTA—BUS	318.7
CTA—RAIL	202.6
METRA	83.1
PACE SUBURBAN SERVICE	32.3
PACE REGIONAL ADA PARATRANSIT	2.8
TOTAL:	639.5 MILLION RIDERS

RTA REVENUE BY SOURCE (IN MILLIONS) ENDING DECEMBER 31, 2009



DISTRIBUTION OF FUNDING (IN MILLIONS) ENDING DECEMBER 31, 2009



FINANCIAL OVERVIEW

Like most of the transit systems around the country, the 2009 recession and economic crisis had a dramatic impact on the RTA's regional transit system. The majority of operating funds produced by RTA sales tax, Public Transportation Funds (PTF) and the City of Chicago Real Estate Transfer Tax (RETT) fell significantly. These operating dollars support the daily operation of our transit system such as maintenance and repairs, fuel and other ongoing costs to keep our buses and trains operating. As the economy continued to struggle and revenues declined, the RTA updated revenue estimates in April and then again in June. Total revenues decreased by as much as 21.8% compared to our original recession projections, creating a shortfall of approximately $328.2 million.

The falling revenues forced the RTA to make serious cost-saving measures for our regional system that accommodated our more than two million daily riders. The RTA worked with the CTA, Metra and Pace to successfully shift funds from existing programs, reduce administrative expenses, provide working cash to the transit agencies and facilitate state and federal assistance to help close the budget gap.

These measures reduced each agency's budget, making it smaller than the previous year and minimizing the effects on the rider. Additionally, employees were required to take unpaid workdays and holidays, salaries were frozen, more than 1,000 employees were laid off, and service cuts and increased contributions from employees for benefits such as health care were implemented.

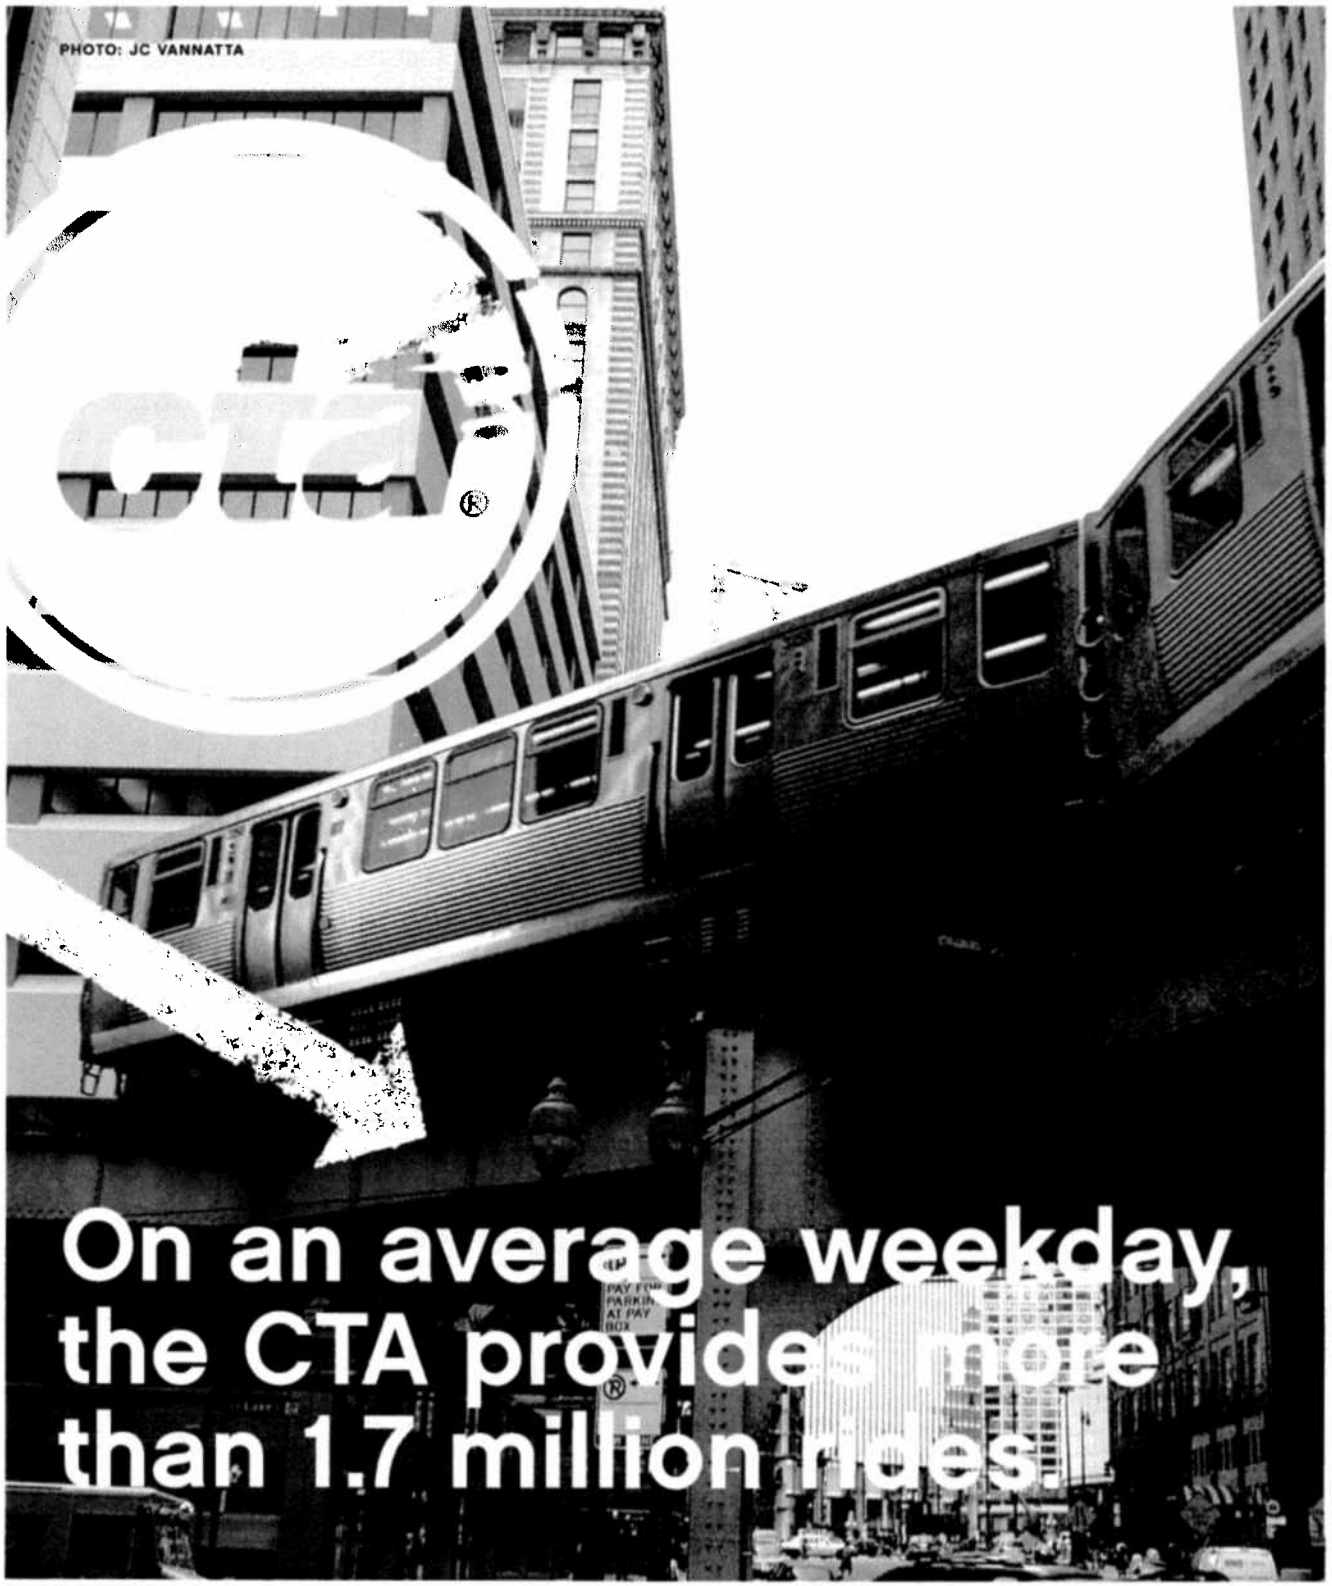
The RTA continues to make great strides in improving its transit system, working with each transit agency to ensure riders have safe and reliable service across the region.

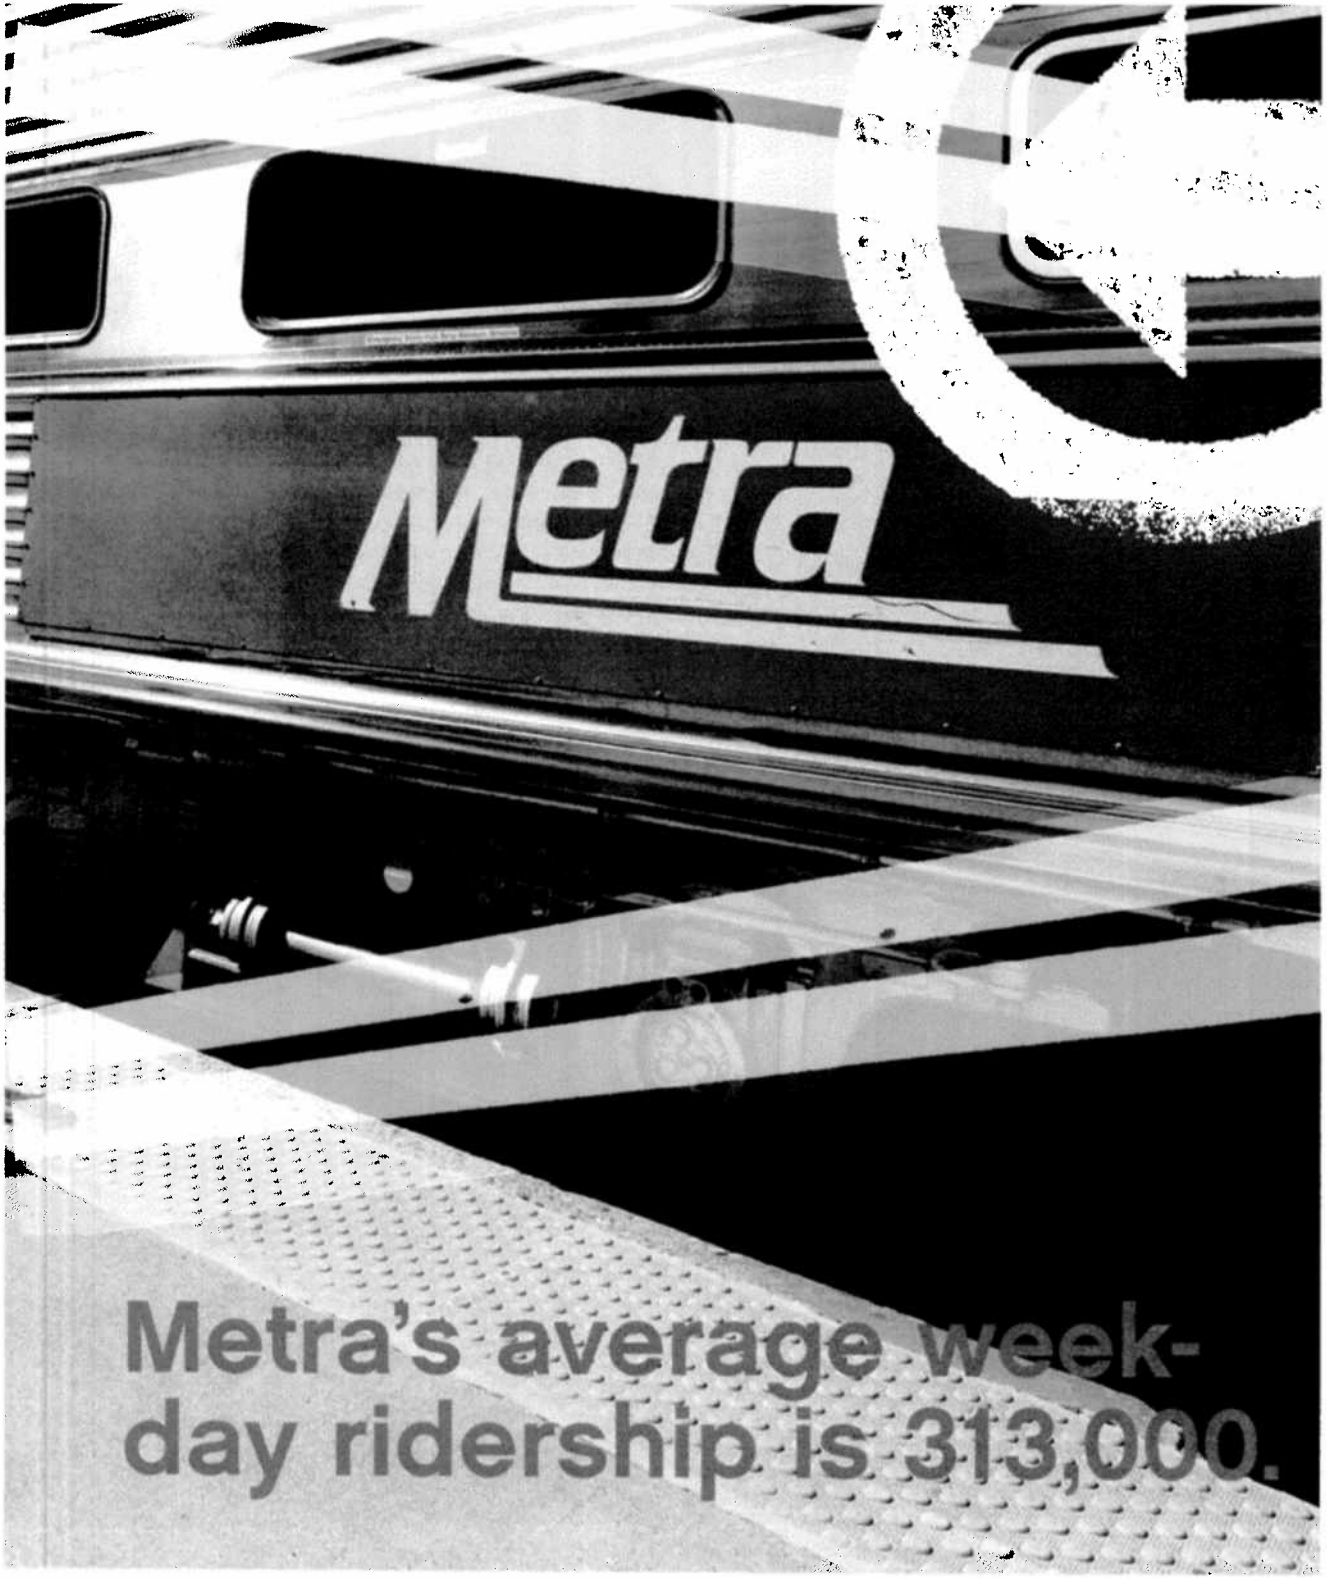
THE CHICAGO TRANSIT AUTHORITY

BOARD CHAIR: TERRY PETERSON
PRESIDENT: RICHARD L. RODRIGUEZ

The Chicago Transit Authority (CTA) is the nation's second largest public transportation system, covering the City of Chicago and 40 surrounding suburbs. On an average weekday, the CTA provides more than 1.7 million rides. With nearly 1,800 buses that operate over 140 routes and nearly 1,200 rail cars operating over eight rail lines, many of which operate 24 hours a day. CTA is responsible for providing more than 81 percent of public transit trips in the six-county region. The CTA was created by the Illinois State legislature in 1947 and became the predominant operator of Chicago transit after purchasing the Chicago Motor Coach system.

The Chicago Transit Authority is governed by a seven-member Chicago Transit Board.





METRA

BOARD CHAIR: CAROLE R. DORIS
EXECUTIVE DIRECTOR: PHIL PAGANO (DECEASED)

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare and service levels, capital improvements, finances, passenger services, safety and systems planning. Geographically, the Metra system is the largest in the United States, and its operational interface with an extensive freight network makes it arguably the nation's most complex.

The Metra rail system is comprised of 11 separate lines, which run north, west and south of the Chicago central business district. The system extends 565 route-miles to the limits of the six-county area and serves 239 local rail stations in more than 100 communities. The network itself is made up of more than 1,100 pieces of rolling stock, 800 bridges, more than 2,000 signals, 16 rail storage yards and six major maintenance facilities.

Metra's average weekday ridership is 313,000.

Metra is governed by an 11-member Board of Directors.

PACE

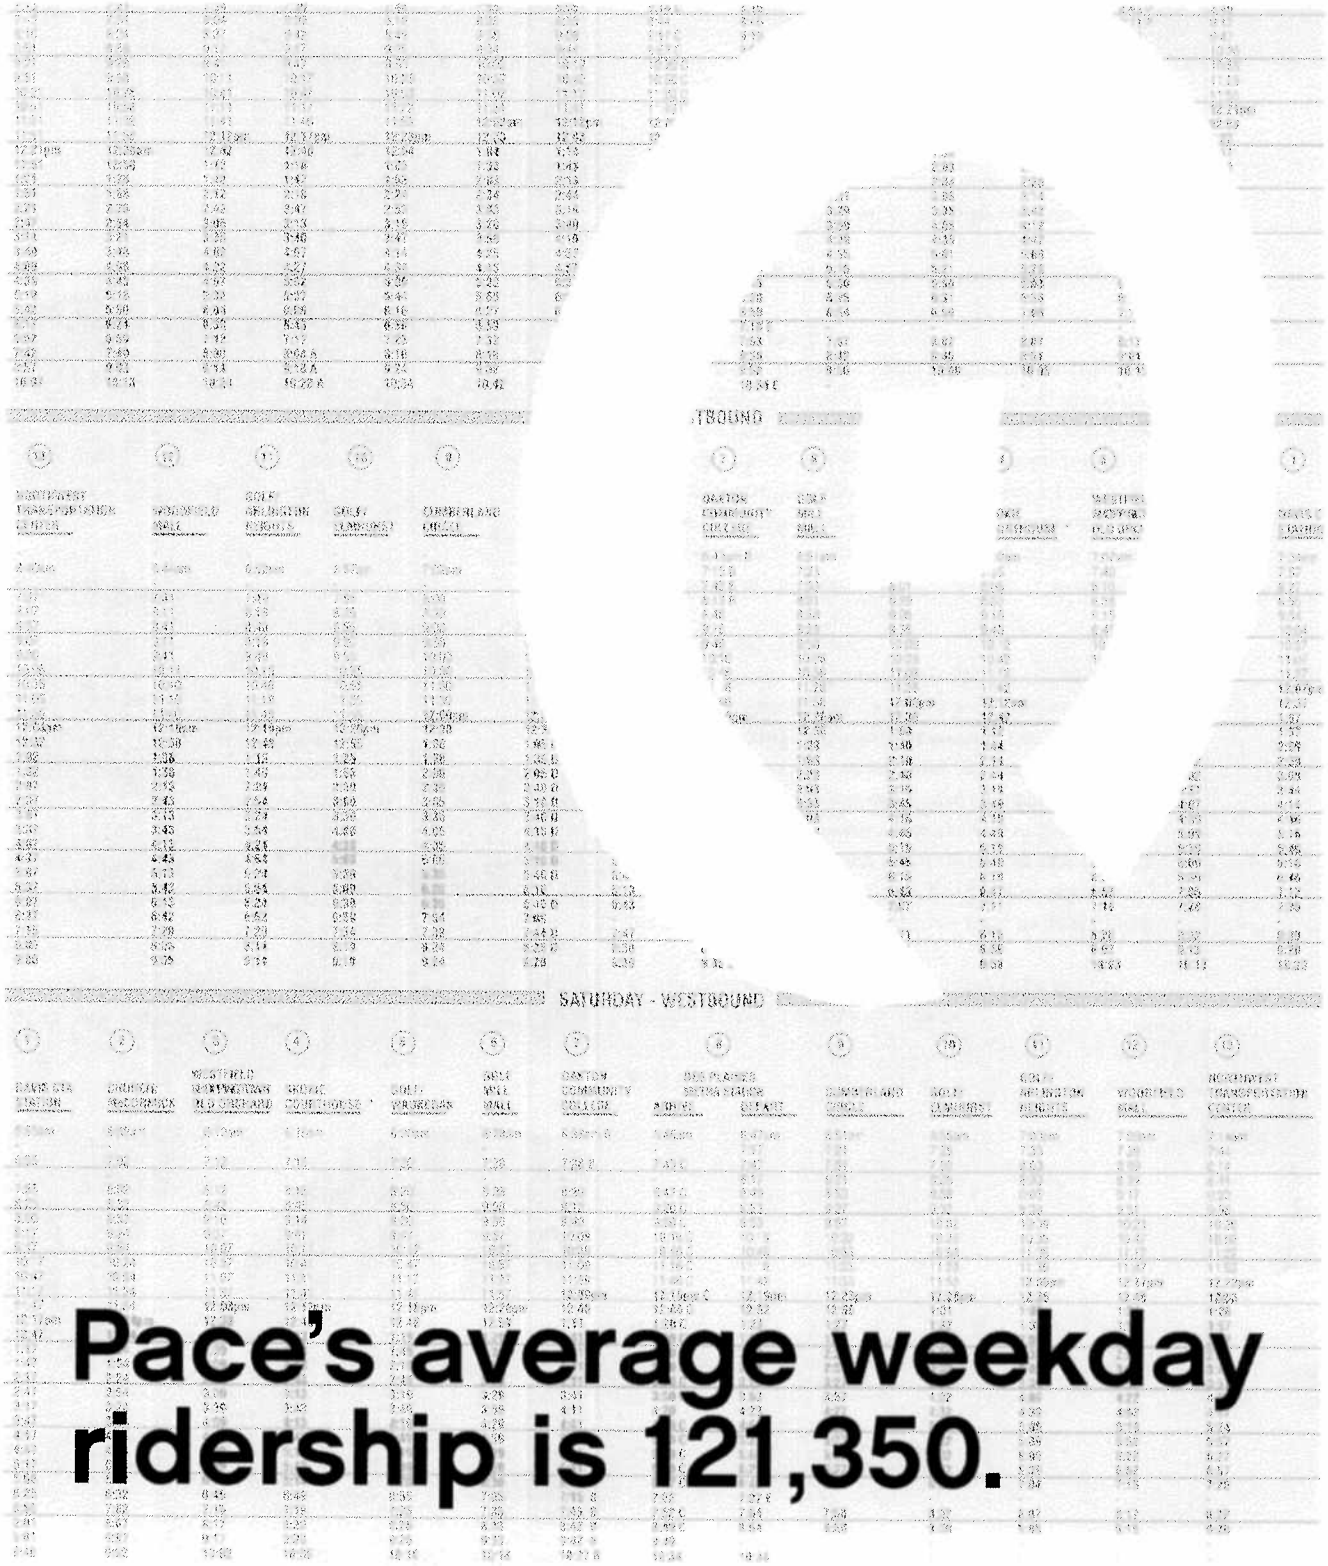
BOARD CHAIR: RICHARD KWASNESKI
EXECUTIVE DIRECTOR: T.J. ROSS

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority and began service in 1984. Pace's mission is to provide efficient well-integrated fixed route, vanpool and paratransit transportation services that meet the travel needs of the suburban Chicago area.

Pace's service area measures 3,700 square miles. The suburban area is divided among the six counties and incorporates 284 municipalities. Transportation needs in this broad area are as unique as the individual communities Pace serves. Pace fixed route service includes approximately 143 regular routes, 50 feeder routes and 16 shuttle routes. The fleet is comprised of 701 buses, 610 vanpool vehicles, 366 Pace-owned ADA paratransit vehicles and 80 Community Transit Vehicles.

Pace's average weekday ridership is 121,350.

Pace is governed by a 13-member Board of Directors.



Pace's average weekday ridership is 121,350.

FAMILY RIDERS: STACEY CARAGHER AND SONS

"I've used Pace and Metra for 20 years, and I enjoy the ease of the ride, and the money I save! My children love taking the train to Brookfield Zoo and to Chicago — we enjoy seeing the towns the train goes through. I only wish we had more access to public transportation. We rely so much on our own vehicles and if we used public transportation more, the environmental effects would be great."

GREEN TRANSIT PLAN

The RTA teamed up with several regional partners to convene the Regional Sustainability Working Group, tasked with identifying ways to increase public transportation's role in reducing the impacts of climate change and protecting the region's environment. Consisting of representatives from the RTA, CTA, Metra, Pace, Illinois Department of Transportation (IDOT), Chicago Metropolitan Agency for Planning (CMAP), Chicago Department of Environment and Chicago Department of Transportation (CDOT), the working group is developing the Regional Green Transit Plan. Funded by an Illinois State Planning and Research grant, the plan will recommend strategies to improve the energy efficiency of the region's public transportation system and reduce the overall impact of transportation on the region's environment. The RTA intends to use the plan to educate the public about the environmental benefits of transit and demonstrate the ability of transit to reduce regional greenhouse gas emissions.

UNIVERSAL FARE PAYMENT SYSTEM

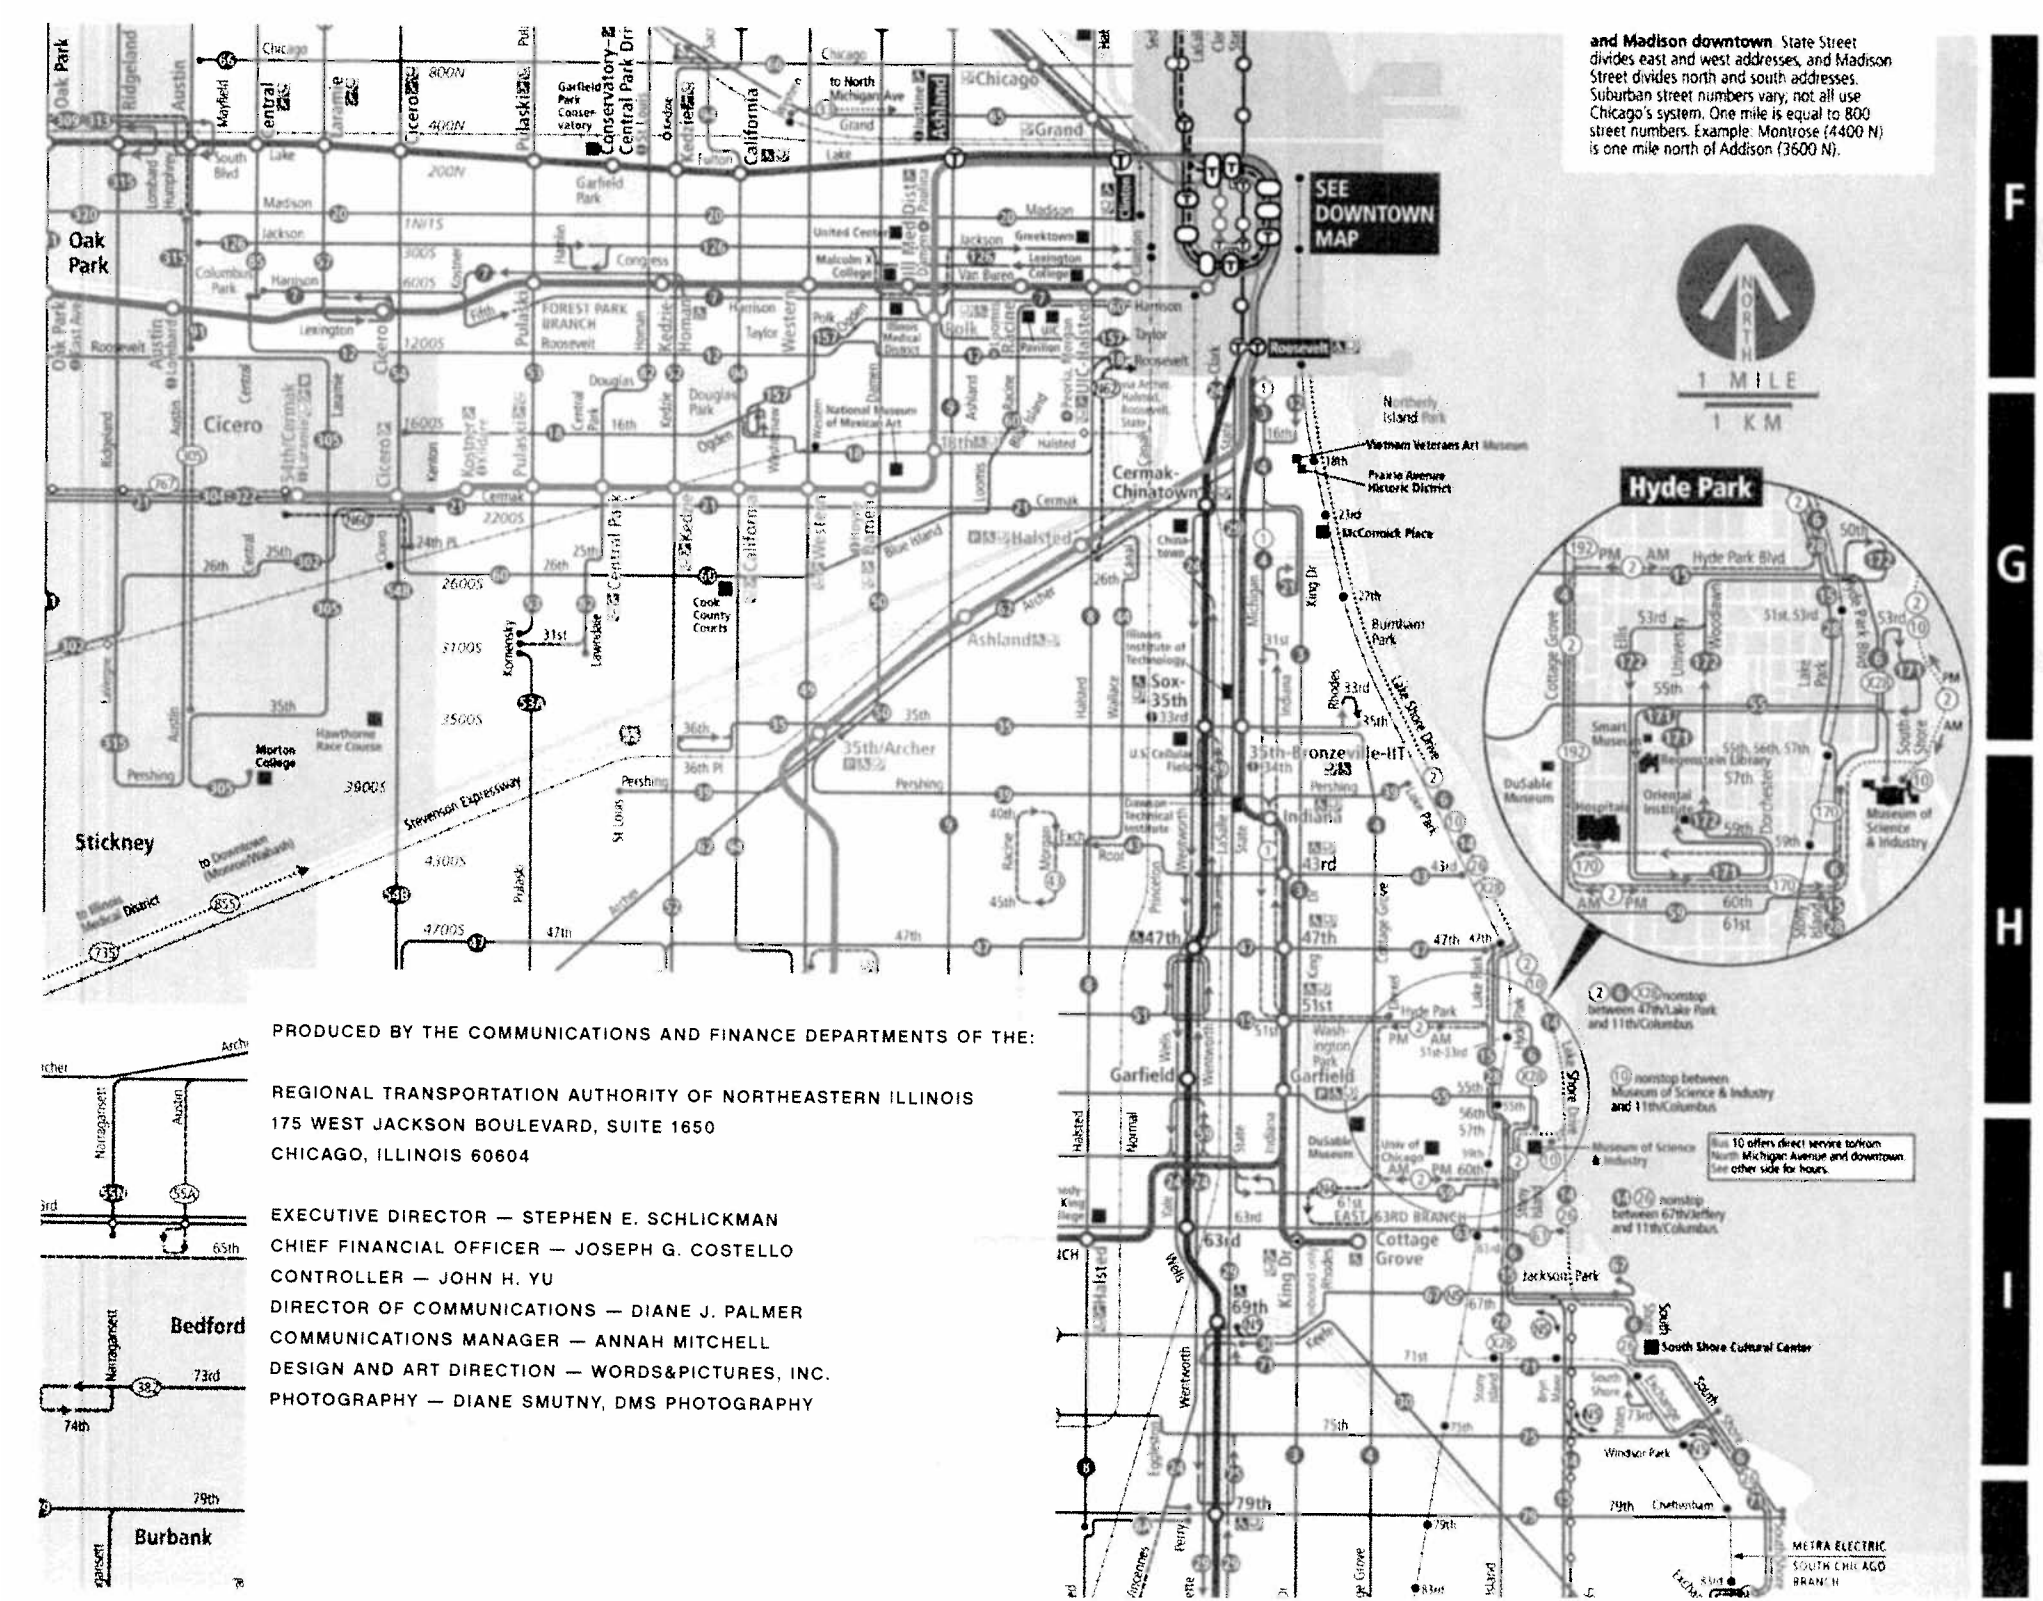
Fare coordination is one of the ways the RTA wants to promote seamless regional mobility. A major goal of fare coordination is to make it easier for customers to pay for travel on different segments of the RTA system by using one simple form of payment. The original idea was that a single transit card would accomplish this. Following the lead of the financial and retail merchants, the RTA is exploring the concept of open payment as a way to cost-effectively deliver a regionally coordinated fare payment system.

The open payment approach takes advantage of the financial and retail sectors' transition into open interoperable standards for contactless payments. Ultimately, we are seeking a "smart chip" technology that takes advantage of these open standards. We envision a suite of regionally coordinated fare products that would be available in a variety of formats (credit/debit cards, pre-loaded gift cards, cell phones, key fobs, etc.) that could be used interchangeably to pay for travel on CTA, Pace and Metra services. The RTA believes that the open payments approach would make transit travel more attractive from the customer's perspective, expanding our market share for regional travel.

BRT INITIATIVES

In 2009 the RTA launched a Phase I study in partnership with IDOT and Pace to explore the opportunity to run buses on the shoulder of I-55. The concept of running buses on the shoulder has been implemented in a handful of other regions such as Minneapolis and Cincinnati. It is proposed to be a low cost means to maximize the utility and capacity of the existing roadway infrastructure. By allowing buses to run on the shoulder, buses are able to bypass regular traffic and achieve greater travel time savings and better schedule adherence.

The Phase I study will focus on further development of the bus-on-shoulder concept, assess the opportunities for buses to run on the shoulder of I-55, explore cost implications, identify safety concerns and estimate travel time savings. The study is scheduled for completion by end of 2010.



and Madison downtown State Street divides east and west addresses, and Madison Street divides north and south addresses. Suburban street numbers vary, not all use Chicago's system. One mile is equal to 800 street numbers. Example: Montrose (4400 N) is one mile north of Addison (3600 N).

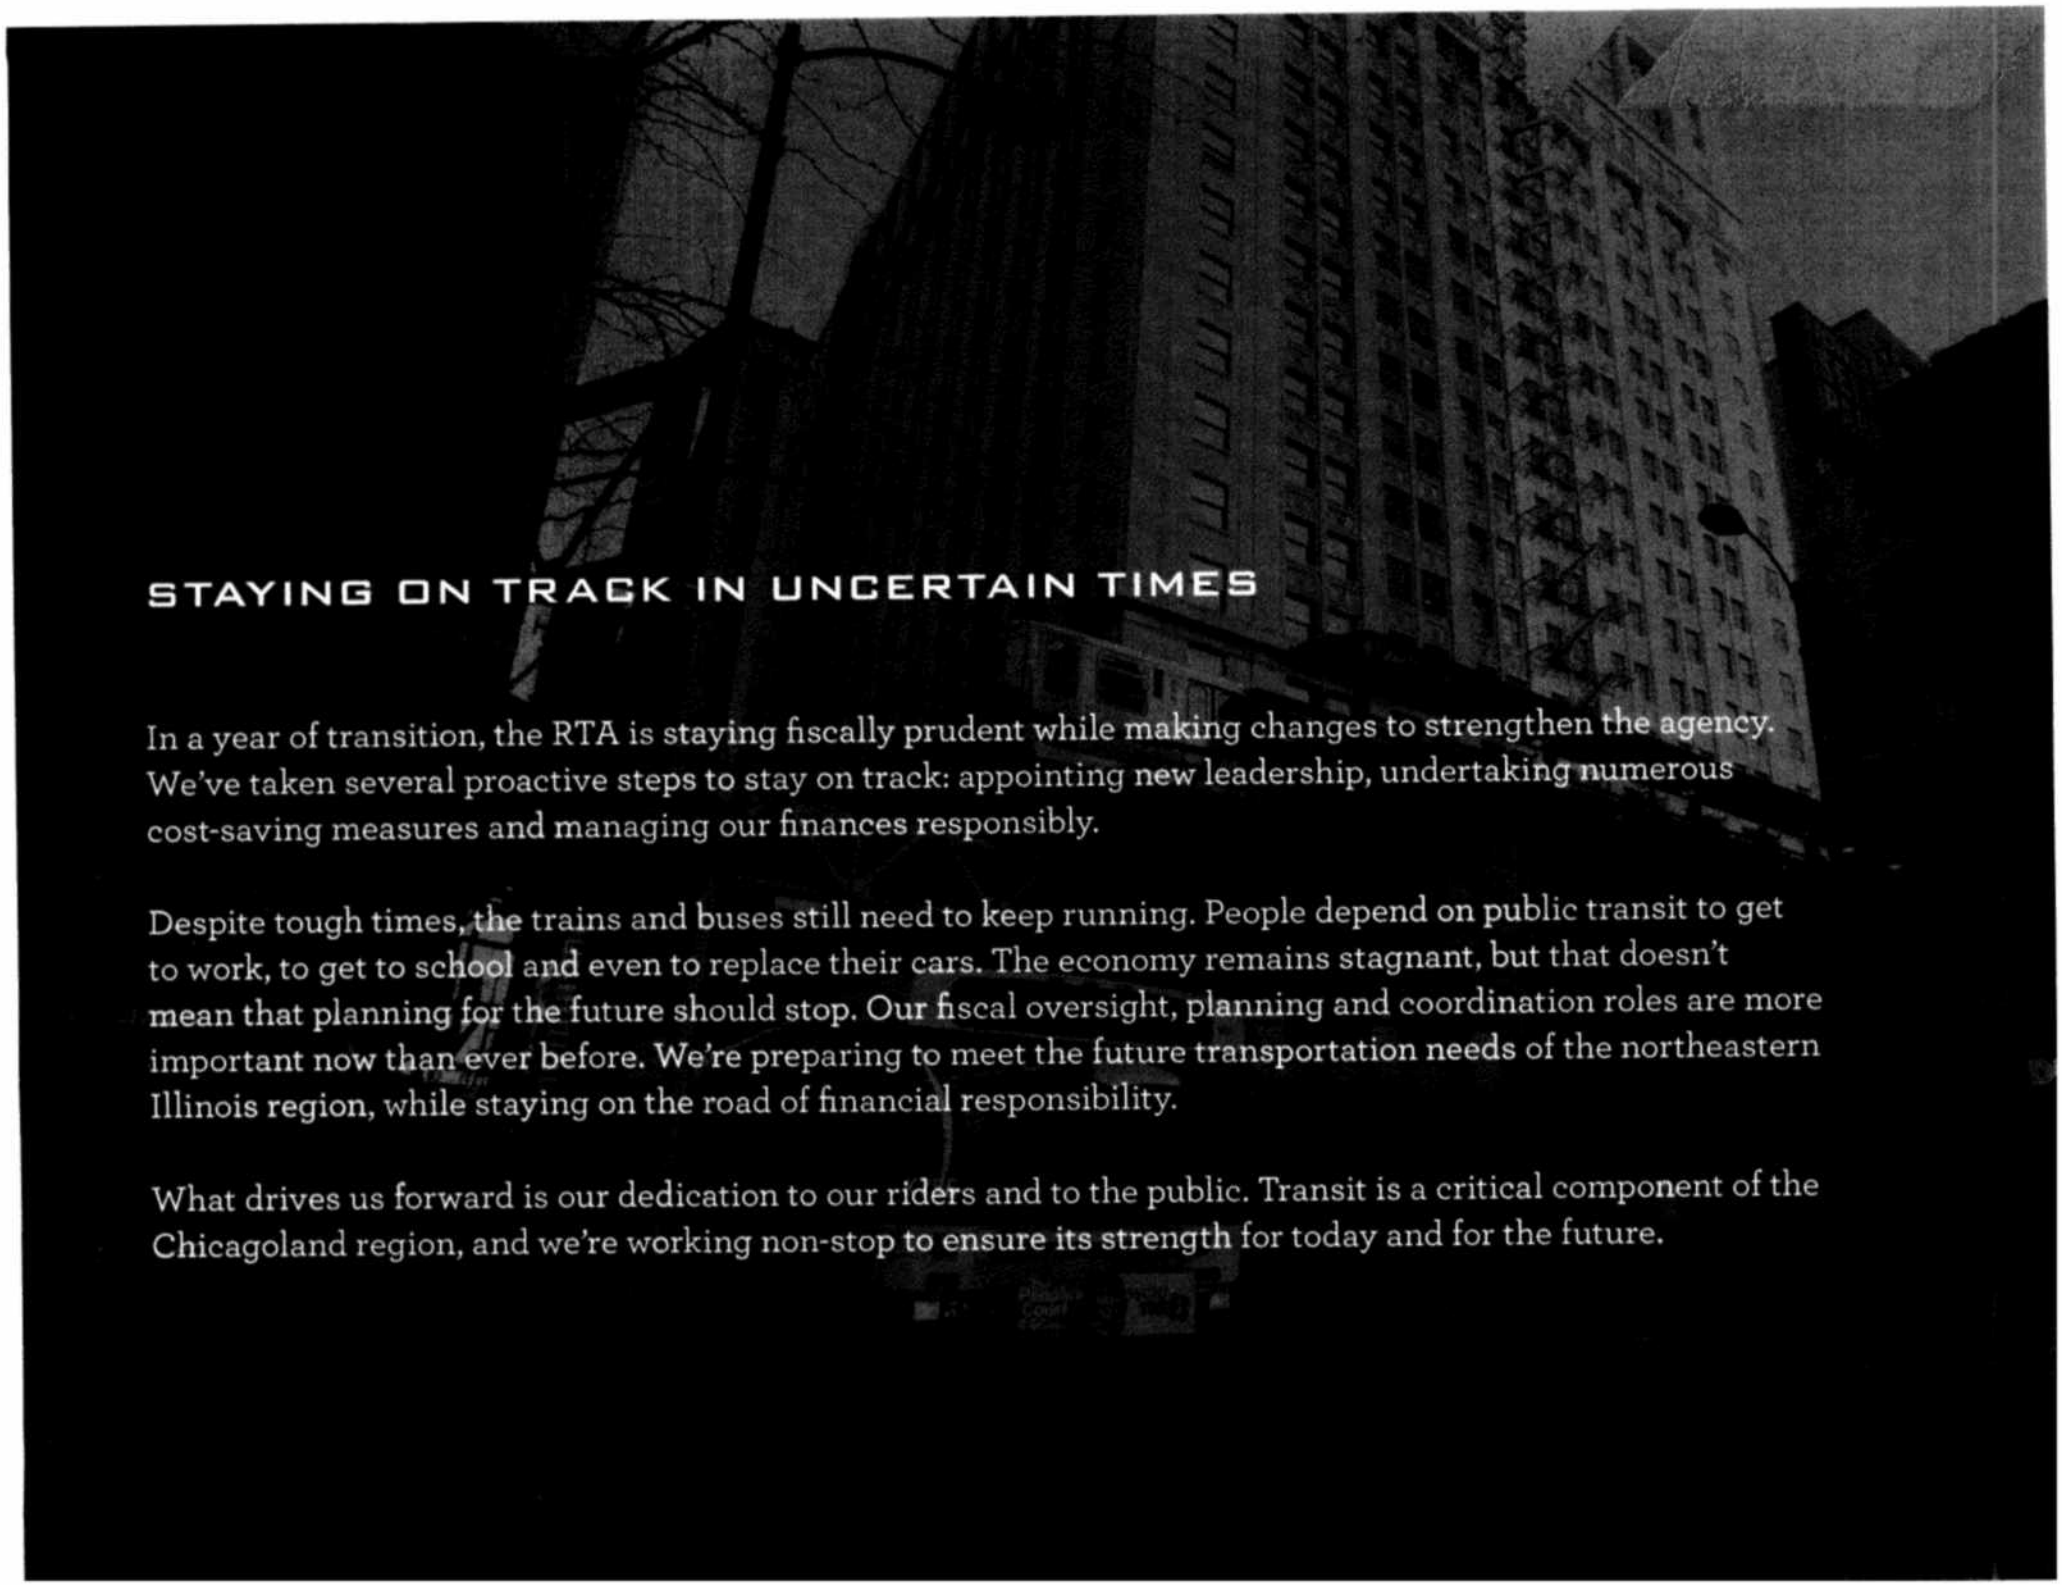
TRANSIT: PLANNING FOR THE FUTURE

2010 POPULAR ANNUAL FINANCIAL REPORT



STAYING ON TRACK IN UNCERTAIN TIMES

In a year of transition, the RTA is staying fiscally prudent while making changes to strengthen the agency. We've taken several proactive steps to stay on track: appointing new leadership, undertaking numerous cost-saving measures and managing our finances responsibly.

Despite tough times, the trains and buses still need to keep running. People depend on public transit to get to work, to get to school and even to replace their cars. The economy remains stagnant, but that doesn't mean that planning for the future should stop. Our fiscal oversight, planning and coordination roles are more important now than ever before. We're preparing to meet the future transportation needs of the northeastern Illinois region, while staying on the road of financial responsibility.

What drives us forward is our dedication to our riders and to the public. Transit is a critical component of the Chicagoland region, and we're working non-stop to ensure its strength for today and for the future.

LETTER FROM THE CHAIRMAN AND EXECUTIVE DIRECTOR

JOHN S. GATES, JR.
RTA Board Chairman

JOE COSTELLO
RTA Executive Director

The ongoing economic recession has continued to have a significant impact on transit funding over the last three years. Revenue generated from the RTA sales tax, our largest source of public funding, has been hit hard by the effects of reduced consumer spending. Although 2010 saw an increase in sales tax funding over 2009 levels, funding for the RTA system is still significantly below the amounts anticipated when the state passed new funding and reform legislation for the RTA in 2008.

With the slight rebound we've seen as the economy struggles to improve, the RTA anticipates some modest gain in sales tax and the Chicago real estate transfer tax. Additionally, the recession has impacted the rate at which the State of Illinois has made payments to the RTA and most other state agencies. These long awaited funds caused the RTA to face greater challenges in meeting its financial obligations.

Due to the slower growth in revenue, the RTA, CTA, Metra and Pace took steps to constrain costs, including mandating employees to take unpaid workdays and holidays, freezing salaries, implementing more than 1,000 employee layoffs and increasing contributions from employees for benefits such as health care. Additionally, small fare increases and reductions in service were required in 2010 to avoid more painful, long-term cuts. Service eliminations were avoided wherever possible.

While the economic crisis greatly affected the RTA and transit agencies this year, important progress was made. In an ongoing effort to increase accountability and transparency, the RTA implemented recommendations made by the Illinois State Auditor General. The RTA continues to work with the CTA, Metra and Pace to establish performance measures that will evaluate each agency's on-time performance, ridership, safety metrics, service effectiveness and operating efficiency. Additionally, the RTA launched a comprehensive audit of all of the transit agencies and worked with state lawmakers to appoint an inspector general to monitor business practices for the entire system.

The work and analyses conducted in 2010 gave us a solid understanding of the transit system's infrastructure and riders' usage and needs. A capital asset condition assessment determined that the region's 10-year capital program need is $24.6 billion, presenting significant challenges with regard to achieving a state of good repair. The service boards have made progress in rolling stock with the purchase of upgraded vehicles including CTA hybrid buses, Pace vehicles and Metra cars which will enhance the customer experience.

In 2011, the RTA will focus on the state of good repair, reducing expenses and increasing efficiencies through the following five priority areas: Strategic Capital Investment, Economies of Scale, Increased Use of the Transit System, Enhanced Customer Experience and Coordinated Marketing and Government Affairs. The RTA and service boards have partnered on these initiatives which are expected to contribute to a more robust and efficient transit system.

As the RTA plans for the future on behalf of the system's two million daily riders, we appreciate your continued support.

This is the RTA's annual report, formally known as the Popular Annual Financial Report (PAFR). It is intended to help you understand the RTA's role in the provision of public transit to our customers and to taxpayers in the six-county service area of northeastern Illinois. This report does not provide all of the detailed information that is contained in the RTA's Comprehensive Annual Financial Report (CAFR). For those interested in a higher level of financial detail, the 2010 RTA CAFR is available on the RTA's website at http://rtachicago.com/about-the-rta/rta-documents.html.

RTA PROFILE

The Regional Transportation Authority (RTA) is the oversight, funding and regional planning agency for the three transit operators that serve northeastern Illinois: the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail, and Pace suburban bus and regional paratransit. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties. The RTA is a special purpose unit of local government and a municipal corporation of the State of Illinois. From the time of its inception, the RTA's mission has been to ensure financially sound, comprehensive and coordinated public transportation.

The CTA, Metra and Pace individually handle their respective transit operations and fare responsibilities. Each is led by a Board of Directors that determines levels of service, fares and operational policies. The RTA's oversight responsibility is guided by the agency's Board of Directors, which approves an annual budget, a two-year financial plan and a strategic plan to guide all the agencies in achieving their common mission of providing safe, affordable and reliable public transit.

The RTA Board consists of 16 members appointed from the six-county region, led by a chairman. The Board is also required annually to review and approve a five-year capital plan which is a blueprint of the capital activities to be executed by the CTA, Metra and Pace.

The RTA regional system is the third largest in the country as measured by unlinked passenger trips, with more than two million daily riders. The combined assets of the RTA system are valued at more than $42 billion, and include 3,230 buses, 2,200 rail cars, 146 locomotives and 667 vanpool vehicles. The system covers 7,200 route miles in the six-county region which currently has a population of approximately eight million.

The resources required on an annual basis to operate the region's public transportation system total approximately $2.2 billion. In addition, the RTA system has a five-year capital program funded at approximately $5.1 billion. The table below shows the breakdown for the transit agencies and RTA of annual operating expenses and the five-year capital program.

AGENCY	2010 ANNUAL OPERATING EXPENSES *(in millions)*	2010–2014 FIVE-YEAR CAPITAL PROGRAM *(in millions)*
CTA	$ 1,239.0	$ 2,740.8
Metra	$ 615.8	$ 2,016.4
Pace	$ 176.2	$ 304.6
Pace ADA	$ 115.1	$ 1.3
RTA	$ 33.7	–
TOTAL	**$2,179.8**	**$5,063.1**

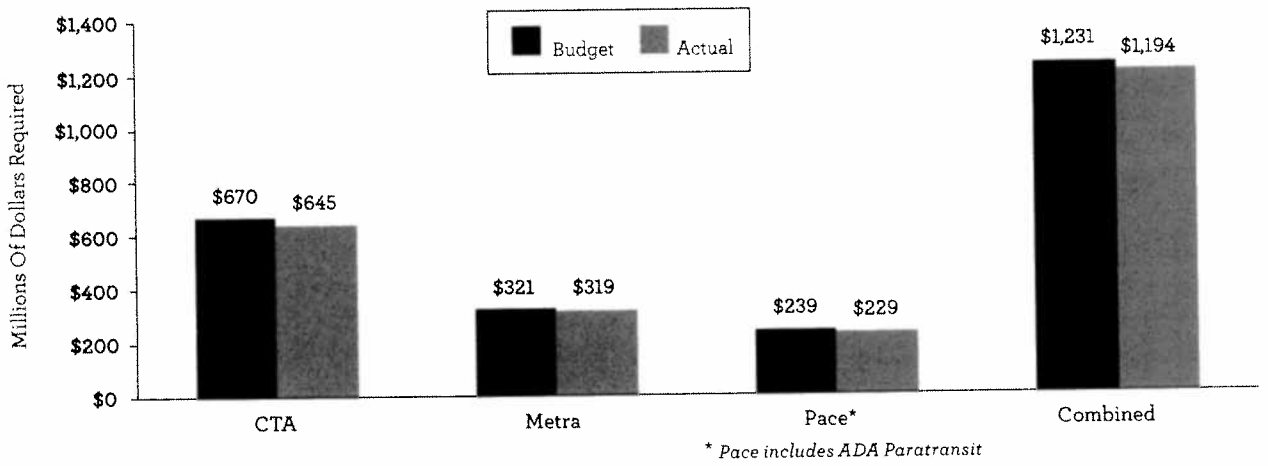
RTA'S FISCAL RESPONSIBILITY

The RTA is not a transit operator, but rather a planning, funding, coordination and oversight agency. Transit services are provided by the CTA, Metra and Pace, also referred to as the "service boards." The structural relationship of the RTA and the service boards is somewhat unique when compared to other major public transit systems around the country.

The service boards develop, adopt and submit to the RTA their own individual annual budgets. The RTA then monitors the financial and operational performance of each service board on a monthly and quarterly basis to ensure compliance with their adopted budgets.

For 2010, the service boards budgeted with consideration given to the impact that the weak economic environment would have on funding and ridership levels, and they operated within their budgets as the year progressed. Although system ridership was slightly lower than forecast, the final 2010 financial net results of all three service boards were favorable by a combined total of $37.0 million. This favorable balance means that their operating shortfalls were less than was projected during the budget process and, as a result, less financial assistance was needed than had been anticipated.

2010 SERVICE BOARD NET RESULTS (FUNDING REQUIREMENTS)



** Pace includes ADA Paratransit*

SERVICE DELIVERY AND RIDERSHIP

The RTA system carried a total of 634.2 million riders in 2010, a decrease of 0.8% from 2009, but 6% higher than year 2000 levels.

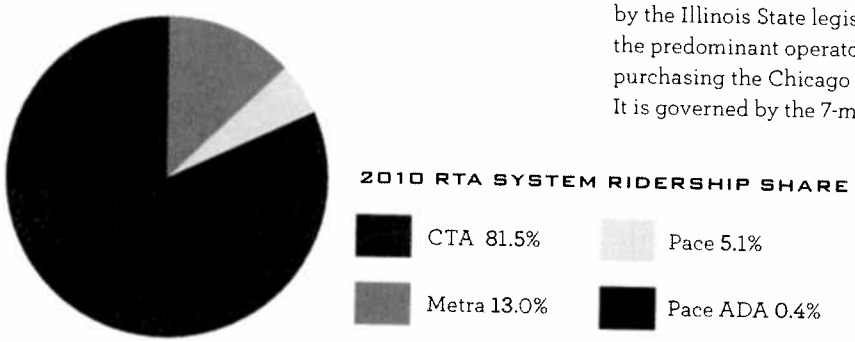
The CTA, with a weekday ridership of more than 1.6 million, carries the largest number of riders in the RTA system, but on relatively short urban trips. Its bus and rail operations comprise the nation's second largest transit agency, with service to the City of Chicago and 40 surrounding suburbs. The CTA was created by the Illinois State legislature in 1947 and became the predominant operator of Chicago transit after purchasing the Chicago Motor Coach system in 1952. It is governed by the 7-member Chicago Transit Board.

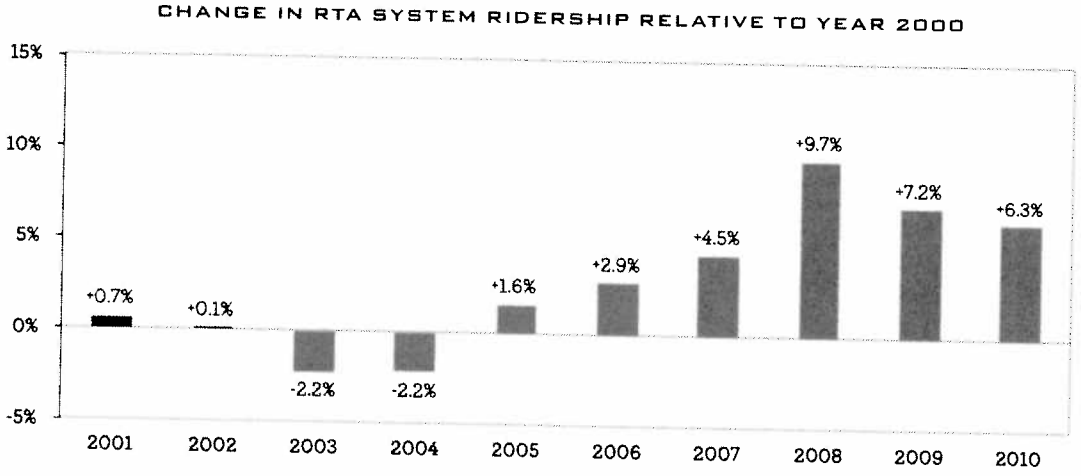
Metra was formed in 1983 and is responsible for the day to day operations of the region's commuter rail system. With 11 rail lines extending to the limits of the six-county area, it is geographically the largest commuter operation in the United States. Metra has a weekday ridership of more than 300,000 with an average trip distance of about 23 miles. It is governed by an 11-member Board of Directors.

Pace began service in 1984 and provides fixed-route bus, demand-response "dial-a-ride", and vanpool service to the suburban Chicago area. Pace is also responsible for ADA paratransit service in both the suburbs and the City of Chicago. Pace's weekday ridership is in excess of 100,000, and it is governed by a 13-member Board of Directors.

Over the course of the last decade, total RTA system ridership dipped in the wake of the 2001 recession, then recovered and peaked in 2008 prior to the financial crisis, when gasoline prices were at an all-time high. Overall, ridership still made gains during the decade, and the 634.2 million trips taken in 2010 were 37.7 million more than year 2000 levels.

RTA system capacity, as measured by vehicle miles of revenue service provided, increased steadily during the decade until CTA service cuts took effect in 2010, but also remains well above year 2000 levels.





2010 RTA & SERVICE BOARDS OPERATING CHARACTERISTICS

CHICAGO TRANSIT AUTHORITY

Rapid Transit

8 rail routes
143 stations served
1,190 rapid transit cars
198.1 million riders per year
1,158 STO* positions

Motor Bus

153 bus routes
2,150 buses
328.2 million riders per year
4,341 STO* positions

Other

1.2 billion passenger rail miles per year
12.3 million rail miles per year
779.8 million passenger miles per year
70.8 million vehicle miles per year
5,001 without STO* positions

**STO is scheduled transit operators. This classification includes bus operators, motormen, conductors and customer assistants.*

*METRA COMMUTER RAIL DIVISION

487.7 route miles
1,155 miles of track
241 stations
146 locomotives
839 passenger cars
171 electric cars
702 weekly trains operated
96.0% on-time performance
81.4 million riders per year
4,429 full-time employees

1.8 billion passenger miles per year
43.1 million vehicle miles per year

**All data excludes NICTD South Shore*

PACE SUBURBAN BUS DIVISION

Fixed Route

135 regular routes
38 feeder routes
16 shuttle routes
579 vehicles in use during peak periods
29.3 million riders per year
3 seasonal routes
713 Pace-owned buses
1,422 full-time employees

Paratransit

210 Pace-owned lift-equipped buses in service
2.8 million riders per year
30 full-time employees

Dial-A-Ride

66 local services
157 Pace-owned lift-equipped buses in service
210 communities served
1.3 million riders per year
7.5 million passenger miles per year
5.7 million vehicle miles per year

Vanpool

667 vanpools in operation
1.8 million riders per year
37.8 million passenger miles per year
9.3 million vehicle miles per year

Track 2
Track 3

goroo® & Transit Tracker

In 2010, the RTA transitioned its primary trip planning system, from TripsWeb, which provided transit-only itineraries. As featured on goroo® — the RTA's online travel information site — the system provides side-by-side comparisons of trip itineraries using transit, driving, biking, walking or any combination of these transportation modes. It gives customers a comprehensive tool for choosing travel options that incorporate convenience, efficiency and cost — from the traveler's perspective. In 2011, goroo® started offering real-time arrival information. The CTA's BusTracker and TrainTracker were included in goroo's Next Train/Bus pages. Pace's WebWatch and Metra's future next train information system are next in line for inclusion.

Bus-on-Shoulder

Last year, the RTA completed a Phase I study in partnership with IDOT and Pace to explore the opportunity to run buses on the shoulder of I-55. The study focused on further development of the Bus-on-Shoulder concept, assess the opportunities for buses to run on the shoulder of I-55, explore cost implications, identify safety concerns and estimate travel time savings. The Bus-on-Shoulder model has been implemented in several cities throughout the Midwest including Minneapolis and Cincinnati. The concept serves to be a low-cost means to maximize the utility and capacity of the existing roadway infrastructure. Buses that run along the shoulder are able to bypass regular traffic and achieve better travel time savings and schedule adherence.

RTA Market Analysis

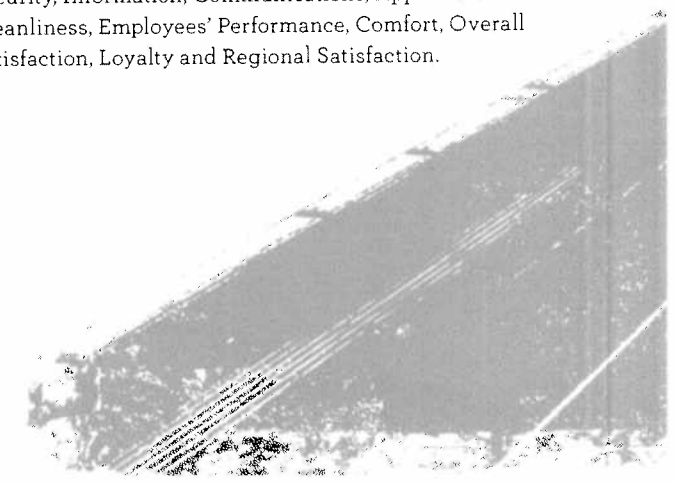
In 2010, the RTA completed a market analysis of travel in the six-county region. The study entailed examining the Chicago Metropolitan Agency for Planning (CMAP) Household Travel Tracker database and an RTA commissioned survey of riders and non-riders of transit that explored people's attitudes and behaviors about travel. Between the CMAP and RTA surveys, input from nearly 13,000 households across the region was captured to help paint a picture of regional travel.

Among highlights, the analysis shows that more than 26 million trips are made on an average weekday in our region. The region's travel patterns are highly geographically dispersed with over 60 percent of travel occurring within the suburban region. Thirty eight percent of households in the region report using transit weekly. Transit serves a critical role in the region's economy as it connects people with jobs, serving 14 percent of work trips. Survey findings indicate a broad base of support for transit investment. This support was even found to be true among those who do not take transit, pointing to the growing appreciation that the general public has for the broad reaching benefits of transit.

Holistic Customer Satisfaction Survey Program

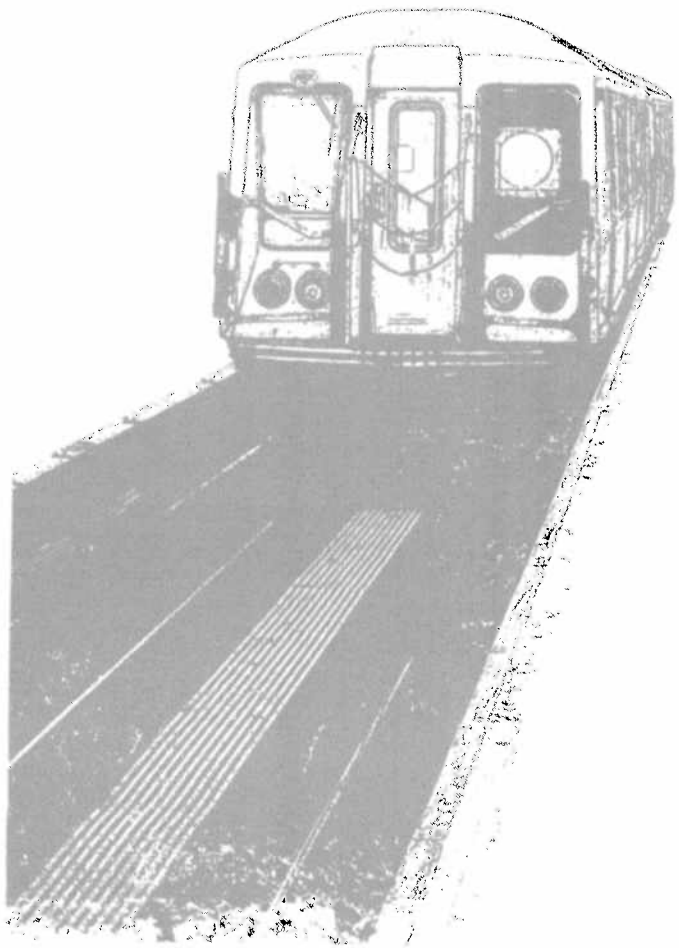
The RTA is mandated by the RTA Act to provide regional measures of customer satisfaction as part of its performance measurement program. In 2010, the RTA worked with the Service Boards to develop a common methodology for measuring customer satisfaction and successfully reached consensus on a unified approach to conducting the research with the goal of obtaining a regional perspective, as well as providing the Service Boards with unique evaluations of their own service. Historically, all three Service Boards have conducted customer satisfaction surveys for their individual agencies with their own set of questions, sampling plans, survey time intervals, and scales for question responses. The differences among the methodologies rendered the aggregation of results into one unified regional customer satisfaction performance index impossible. The new customer satisfaction survey program will be incorporated into the performance management process to initiate opportunities for improvement and drive business results. Furthermore, it is anticipated that this new approach will result in overall cost savings through capitalizing on economies of scale and process improvements.

The customer satisfaction survey for each Service Board will be implemented in 2011 and will include the following categories: Time & Reliability, Safety & Security, Information, Communications, Appearance & Cleanliness, Employees' Performance, Comfort, Overall Satisfaction, Loyalty and Regional Satisfaction.



RTA Funding Programs

The Funding Programs provide value to the transit region by offering planning, operating and capital grants for a variety of projects.



Two of the programs, Community Planning and Subregional Planning, provide funding for planning studies and initiatives. The other two programs, Innovation, Coordination and Enhancement (ICE) and Job Access Reverse Commute / New Freedom (JARC/NF), provide funding for transit operating and capital projects. The Funding Programs provide value to a wide variety of recipients, including municipalities, counties, private non-profits, private transportation operators and the RTA Service Boards. Each recipient's needs are different, and the RTA Funding Programs offer support and a path to implementation. The Funding Programs also provide a unique opportunity for the RTA and its Service Boards to coordinate at the local level to not only create plans or implement projects, but to facilitate intergovernmental cooperation and relationship building. Key project accomplishments in 2010 are highlighted below for each of the four programs.

The City of Joliet wrapped up the conceptual planning phase of a Community Planning study during the summer of 2010. Developed in conjunction with the RTA, Metra, Pace, Will County and other planning partners, the City's Plan calls for an intermodal transit facility located adjacent to the existing Union Station. The development of the Plan led to a $35 million grant from Illinois Jobs Now! to partially fund the facility, announced by Governor Quinn on October 28, 2010. The balance of the money needed for the $42 million estimated total project cost will come from a combination of City funds and other sources. Architectural and Engineering is scheduled to begin in the Fall of 2011.

Kane County, working in close coordination with Pace and the RTA, finalized a Subregional Planning Corridor Plan along Randall Road in December 2010. As a result of the Plan, Pace received a grant for $800,000 to install bus shelters and sidewalk connectors along Randall Road, which is currently served by Pace Route 529. Shelters will be installed at 23 stops along the route by Fall of 2011, along with necessary sidewalk connectors in certain locations as recommended in the Plan.

The Village of Skokie received an ICE grant from the RTA to fund improvements associated with the new Congestion Mitigation and Air Quality Improvement (CMAQ) funded Oakton Street station on the CTA Yellow Line. The ICE funded improvements will include bus stops, bus and taxi access lanes, sheltered waiting areas, pedestrian walkways, shared vehicle lanes, a kiss and ride, bicycle parking, and landscape improvements. The improvements are expected to be completed by Fall of 2011.

Lake County secured a JARC/NF grant to implement a new coordinated dial-a-ride service operating on weekdays in Antioch, Avon, Grant, and Lake Villa townships. A portion of the service is a flexible route connecting three Metra stations on the North Central and Milwaukee District North Lines with residential areas to offer greater access to employment opportunities primarily for individuals with limited mobility and other transit dependent populations. The service was implemented in January 2010 and provides nearly 1,500 trips per month.

Transit-Oriented Development (TOD) Implementation

The RTA has invested almost $3 million of its own funds during the past 12 years to complete approximately 75 transit-oriented development (TOD) planning studies through the RTA's Community Planning and Subregional Planning funding programs. These programs fund TOD planning studies that promote walkable, mixed-income, mixed-use development co-located and/or well-connected to retail and business uses in transit station areas, while also increasing overall access to the transit system. Many communities within the RTA region, including those that have completed TOD planning studies through the RTA funding programs, have encountered obstacles and barriers to implementing recommendations found in their completed TOD plans.

In 2010, the RTA developed a program that invests further in the communities we have worked with previously by offering an opportunity to receive additional technical assistance and support towards implementing their plans. This program, the first of its kind in our region, will help communities develop and update land control documents, attract developers and streamline development approval processes. From the RTA's perspective, pursuing and achieving implementation of these plans can result in more efficient transit operations, improved access to transit services and a potential for increased ridership for the CTA, Metra and Pace. Implementation efforts can also increase private investment in TOD areas while promoting the principles of sustainability and livability.

Sustainability and Climate Change

In 2010, RTA became a signatory of the American Public Transportation Association's (APTA) Sustainability Commitment, reaffirming the agency's commitment to reducing regional greenhouse gas emissions and improving the sustainability of the region's transit system. As part of this commitment, RTA and the service boards conducted the first comprehensive greenhouse gas inventory and displacement analysis of the region's transit system. The results of the analysis show that the RTA system is responsible for keeping 6.7 million metric tons of CO_2 from entering the atmosphere. That is equivalent to taking more than one million cars off the road, and is more than five times the amount of CO_2 produced by transit operations.

Working with the Illinois Department of Transportation (IDOT), Chicago Metropolitan Agency for Planning (CMAP), Chicago Department of Environment, Chicago Department of Transportation (CDOT) and other stakeholders, the transit agencies are using the results of the greenhouse gas emissions analysis to demonstrate the value of the transit system and identify strategies for improving the environmental benefits of transit, including increasing ridership and improving the efficiency of transit operations. In 2011, RTA and service boards will publish the first sustainability and climate action plan for the regional transit system in an effort to educate legislators, advocates and the public about the environmental value of transit in the region. The plan will also show how investments in transit can help the state and region meet their carbon emissions reduction goals, as well as how they enhance our customer experience.

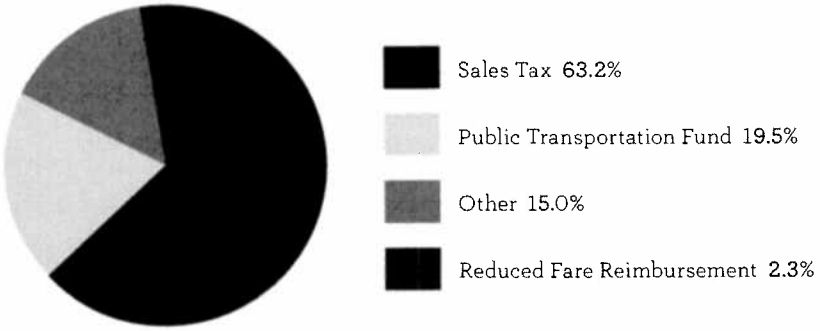
FUNDING PUBLIC TRANSPORTATION

2010 RTA REVENUE BY SOURCE



RTA REVENUE BY SOURCE DECEMBER 31, 2010 AND 2009 *(in thousands)*

	2010	2009	CHANGE
Sales Tax*	$ 931,435	$ 894,238	$37,197
Public Transportation Fund	$ 287,404	$ 282,541	$ 4,863
Reduced Fare Reimbursement	$ 33,570	$ 41,970	($ 8,400)
Other Sources	$ 220,737	$ 262,098	($41,361)
TOTAL REVENUE	**$1,473,146**	**$1,480,847**	**($7,701)**

*Includes all sales taxes retained by the RTA and passed through to the service boards

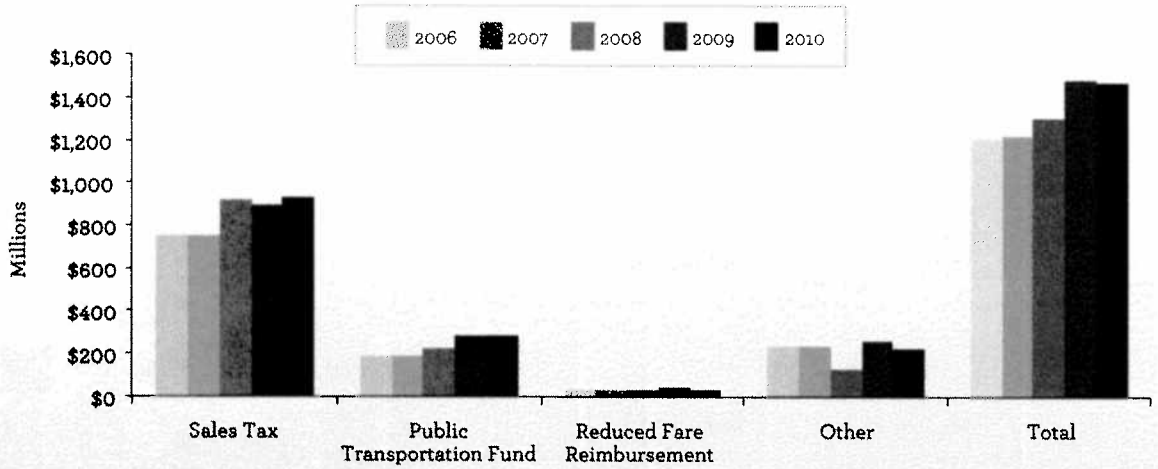
Revenue Sources

The RTA's primary source of operating funding is a regional sales tax which is matched by the State of Illinois via the Public Transportation Fund (PTF). A reduced fare reimbursement also comes from the State and is passed through to the service boards to help offset the revenue lost from the various required fare programs such as those for the elderly, disabled persons, and students. The final revenue category of "Other" shown in the chart includes items such as additional assistance from the State, investment income and contributions from local governments.

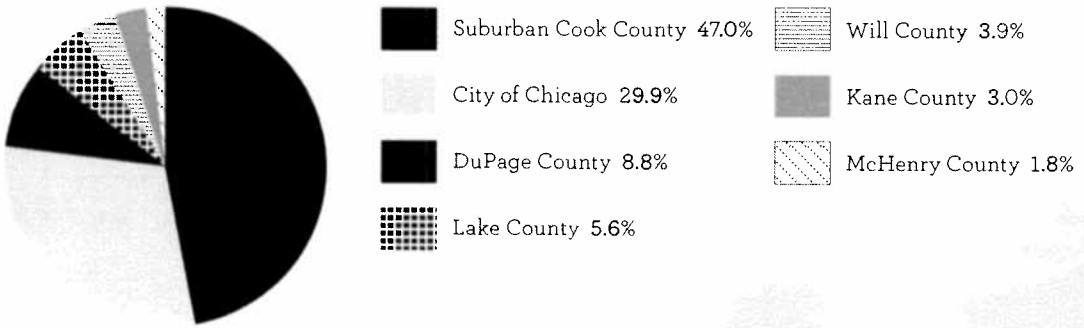
As the economy slightly improved in 2010, total RTA sales tax receipts of $931 million increased 4.2 percent from 2009 and exceeded budget projections. This growth was a positive development, since in 2009 the RTA sales tax receipts had declined 2.9 percent from 2008 due to the impact of the financial crisis. Reduced investment income drove the "Other" category lower. Overall, 2010 RTA revenues decreased by 0.5 percent from 2009.

Over the last five years, the RTA has experienced a steady increase in total revenues, driven by the increase in sales tax funding for public transit which took effect in 2008. This tax increase was necessary to ensure the sustainability of the RTA system and clearly helped the RTA weather the current economic downturn. Because it is a sales tax match, the PTF increased in line with sales tax, while Reduced Fare and Other categories remained relatively flat across the period.

5-YEAR TREND OF RTA REVENUE SOURCES



2010 RTA SALES TAX REVENUE BY COUNTY



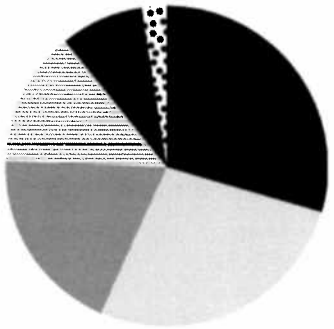
Sales Tax by County

The RTA sales tax is imposed region-wide, but at differing rates to reflect the differing levels of transit service provided throughout the constituent counties. In 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate from 1.0 percent to 1.25 percent in Cook County and from 0.25 percent to 0.5 percent in the collar counties.

In practical terms, this means that on a $50 purchase, some of the sales tax paid goes directly to the funding of public transit: 62.5 cents for residents of Cook County, and 25 cents for residents of the collar counties that include DuPage, Kane, Lake, McHenry and Will.

This same Act also designated an increase of the real estate transfer tax (RETT) within the City of Chicago to directly fund the CTA, and raised from 25 percent to 30 percent the portion of RTA sales tax and RETT revenues matched by the state PTF.

WHERE RTA EXPENDITURES GO



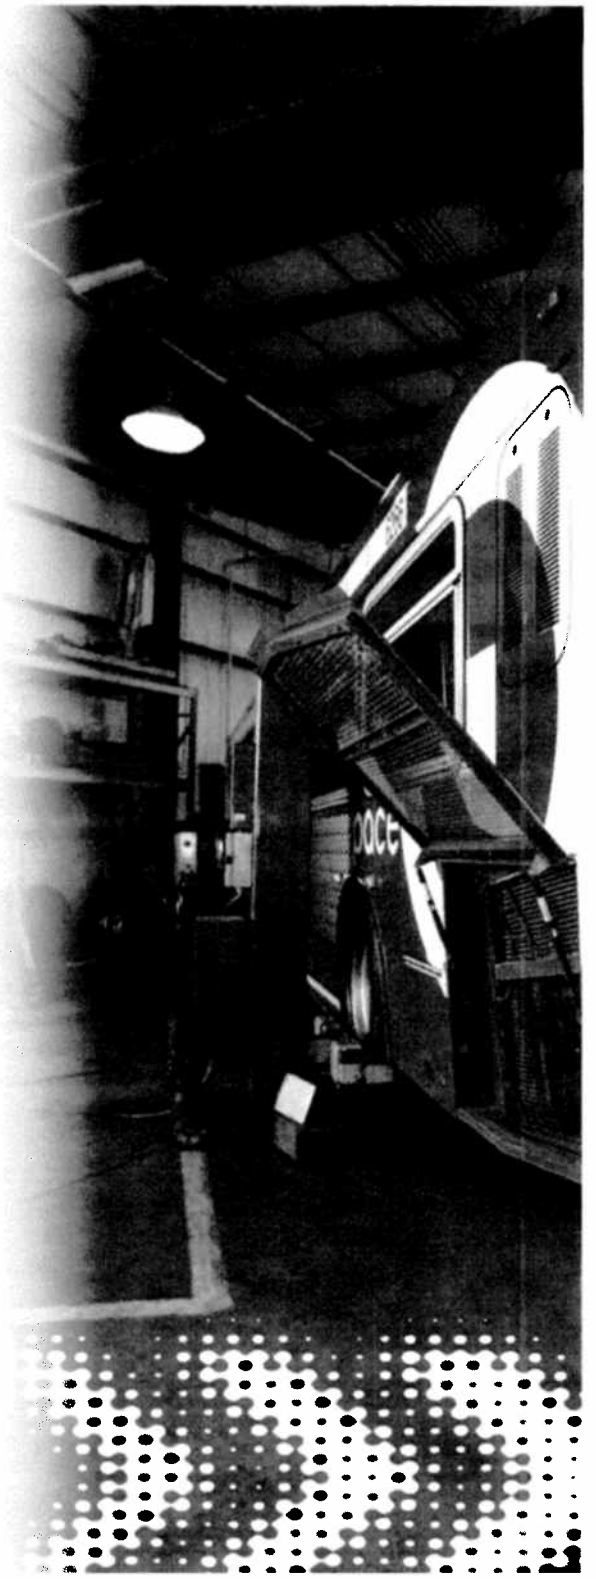
CTA 29.6%
RTA and Other 27.3%
Metra 18.8%
Capital Grants 8.3%
Pace 13.7%
Reduced Fare 2.3%

As stated in the previous section, the primary source of funding for public transportation in Chicago is sales tax. More than 85 percent of the public transportation sales tax collections pass directly through the RTA to the CTA, Metra and Pace according to pre-determined, statutory formulas. The remainder of the sales tax is initially retained at the RTA along with revenues from the Public Transportation Fund and additional state funding.

After funding the RTA's own administrative costs, regional services, special programs and debt servicing, the remainder of the retained sales tax and PTF is distributed to the service boards on a discretionary basis and within the context of their annual budgets. The service boards also generate fare revenue from their customers and have other direct funding sources such as the RETT, which, when combined with the funds flowing from the RTA, covers the cost of providing service.

RTA EXPENDITURES DECEMBER 31, 2010 AND 2009 *(in thousands)*

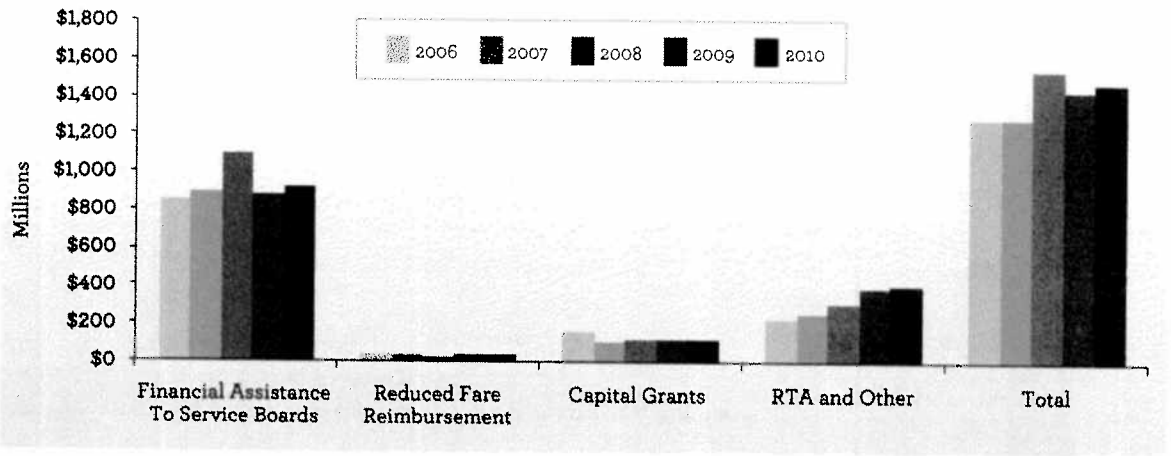
	2010	2009	CHANGE
CTA	$ 436,467	$ 417,288	$ 19,179
Metra	$ 277,506	$ 267,576	$ 9,930
Pace	$ 202,463	$ 194,698	$ 7,765
Reduced Fare	$ 33,570	$ 41,970	($ 8,400)
Capital Grants	$ 122,998	$ 123,069	($ 71)
RTA and Other	$ 402,956	$ 389,857	$ 13,099
TOTAL EXPENDITURES	**$1,475,960**	**$1,434,458**	**$41,502**



Financial assistance provided by the RTA to all three service boards, both statutory and discretionary, increased in 2010. As previously mentioned, the Reduced Fare pass-through from the State was lower. The "RTA and Other" category, which contains items such as interest on long term debt and the administrative costs of the RTA itself, was higher. Overall, 2010 RTA expenditures increased by 2.9 percent from 2009.

Over the last 5 years, the RTA increased the financial assistance provided to the service boards while Reduced Fare and Capital Grants remained fairly flat across the period; the "RTA and Other" category also trended higher. The increase in Financial Assistance occurring in 2008 was related to the new RTA funding legislation passed by the State of Illinois in that year.

5-YEAR TREND OF RTA EXPENDITURES BY CATEGORY



AVERAGE OPERATING COST AND FARE SUBSIDY

The challenge of financing public transportation is that customers pay only part of the cost of providing a given service level. Public funding, primarily from sales taxes in the case of the RTA, covers the majority of the cost. Increased usage of public transportation will decrease the average operating cost per passenger, allowing those tax dollars to be re-directed to other uses such as infrastructure upgrades and technology improvements.

The RTA is required by law to offer several different fare discount programs, including those for seniors, the disabled and students, which contribute to a lower average fare actually paid.

While the average operating cost may, in this context, appear to be high, the RTA system actually compares very favorably to other public transit regions of the country on a cost per passenger-mile basis as shown in the second chart below.

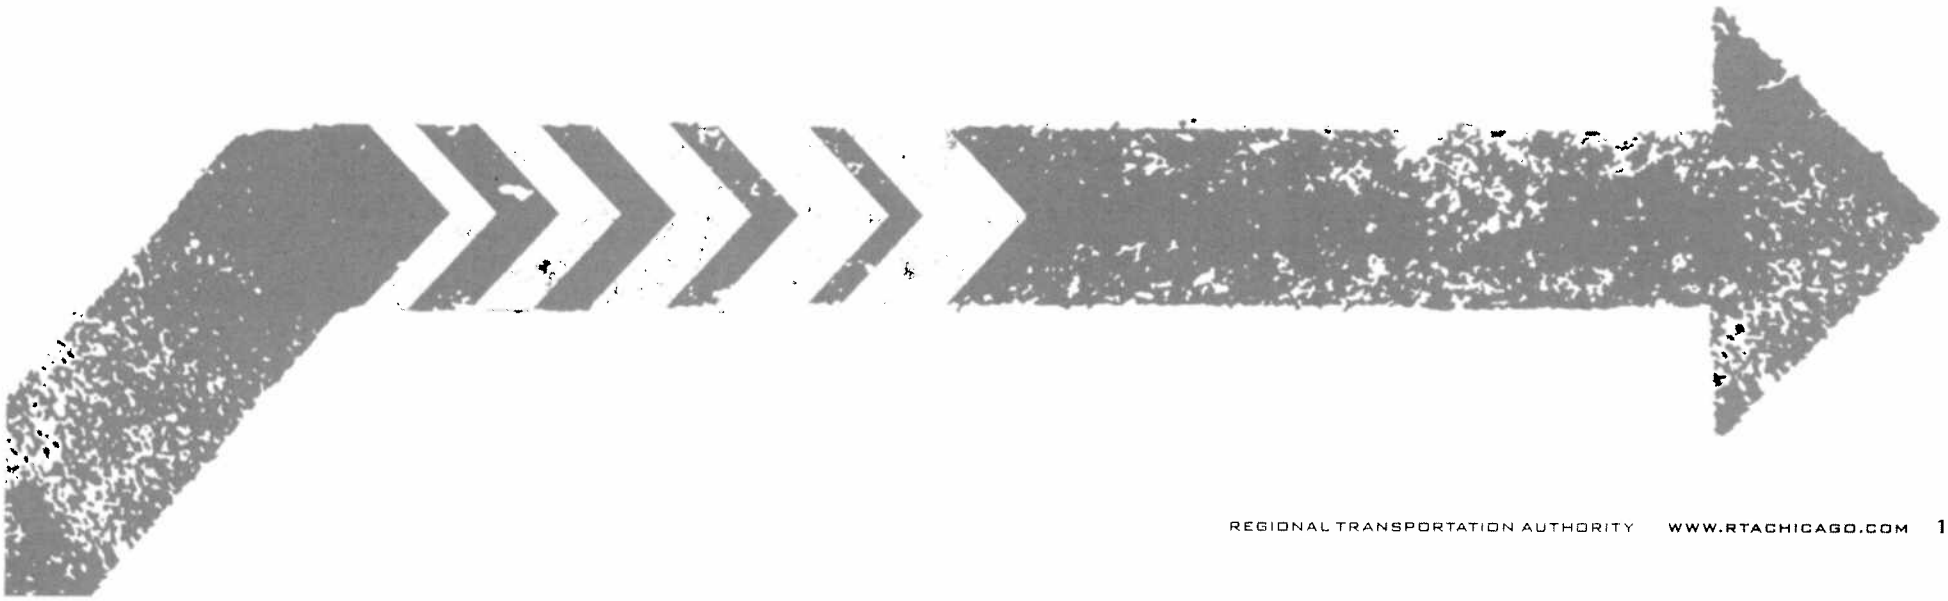
MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) provides an overview of the financial activity of the Regional Transportation Authority ("RTA") for the fiscal year ended December 31, 2010. This analysis is based on the RTA's 2010 Comprehensive Annual Financial Report (CAFR), which contains all of the detailed financial statements surrounding the RTA's operations.

Two important tables from the 2010 RTA CAFR are included in the following pages with a discussion of significant year-over-year issues. For the sake of simplicity, only the sections of these tables related to governmental activities are shown. The CAFR also includes in these tables sections that relate to business-type activities (such as the RTA Joint Self-Insurance Fund), which only amount to approximately one percent of the RTA's total financial activity.

To better understand these financial statements, it is important to remember the role of the RTA as described earlier in the report. Specifically, the sales tax revenue figures include only that portion of the RTA sales tax which is retained by the RTA for discretionary distribution, and not the portion which is passed through to the CTA, Metra and Pace according to statutory formulas.

Similarly, in the expense section, the "financial assistance to service boards" excludes those same pass-through sales taxes and includes only discretionary funding, so that these statements encompass only those funds controlled by the RTA entity.



RTA STATEMENT OF ACTIVITIES

For the year ended December 31, 2010, the RTA statement of activities for the governmental activities shows expenses increasing by $12 million to $411 million from $399 million for the same period in 2009. This increase is due to an increase in financial assistance to the CTA, Metra and Pace of $4 million. Grant activity was higher by $5 million, while administrative expenses were lower by $3 million. Also, bond interest expense and the Regional and Technology Program expenses were higher by $4 million and $2 million respectively.

Revenues decreased by $4 million in 2010, driven by a $27 million decrease in investment income which was partially offset by a $21 million increase in PTF and State Assistance Revenues, as well as a $4 million increase in sales taxes.

The combined effect of higher expenses and lower revenues resulted in an increase in net assets of $81 million over the course of 2010, which was $16 million less than the increase in net assets which the RTA experienced over the course of 2009.

SUMMARY OF ACTIVITIES — DECEMBER 31, 2010 AND 2009 *(in thousands)*

	Governmental Activities		
	2010	2009	Change
EXPENSES			
Financial Assistance to Service Boards	$ 97,648	$ 93,453	$ 4,195
Grant Activity	$ 145,996	$ 141,261	$ 4,735
Administrative Expenses	$ 8,551	$ 12,014	($ 3,463)
Regional and Technology Program Expenses	$ 23,555	$ 21,209	$ 2,346
Interest Expense	$ 135,530	$ 131,775	$ 3,755
Total Expenses	**$ 411,280**	**$ 399,712**	**$ 11,568**
REVENUES AND TRANSFERS			
Sales Taxes	$ 103,168	$ 99,027	$ 4,141
PTF and State Assistance	$ 372,434	$ 351,509	$ 20,925
Operating Grant - CTA/Pace	$ 9,480	$ 9,101	$ 379
Regional Expenses	$ 582	$ 2,904	($ 2,322)
Investment Income and Other	$ 11,012	$ 37,749	($26,737)
Transfers	($ 4,425)	($ 3,575)	($ 850)
Total Revenues and Transfers	**$ 492,251**	**$ 496,715**	**($ 4,464)**
Change in Net Assets	$ 80,971	$ 97,003	($16,032)
Net Assets—Beginning of Year	($ 1,954,619)	($2,051,622)	$ 97,003
Net Assets—End of Year	($ 1,873,648)	($1,954,619)	$ 80,971

GOVERNMENT-WIDE STATEMENT OF NET ASSETS

The statement of net assets presents information on all of the RTA's assets and liabilities, with the difference between the two reported as net assets. Increases or decreases in net assets may serve as a useful indicator of whether an organization's financial position is improving or deteriorating.

The government-wide statement of net assets shows 2010 assets of $1.142 billion, a net increase of $351 million from 2009. The increase was mainly due to an increase in cash and investments which was caused by the timing of receipts.

2010 liabilities were $3.015 billion and also increased from 2009, but by a lesser amount of $270 million, which was primarily driven by an increase in general-obligation bonds payable in 2010. As a result, total net assets increased by $81 million over the course of 2010.

At the end of 2010, the government-wide statement of net assets shows a deficit of $1.9 billion for governmental activities. However, this does not represent a precarious financial position for the RTA, but rather is related to how the Governmental Accounting Standards Board (GASB) requires RTA's general obligation bonds to be presented in the government-wide statement of net assets. According to the GASB standard, the RTA must show the full liability of multi-year bonds in the current year, which drives a large net annual deficit. This deficit will not affect the availability of RTA fund resources for future use.

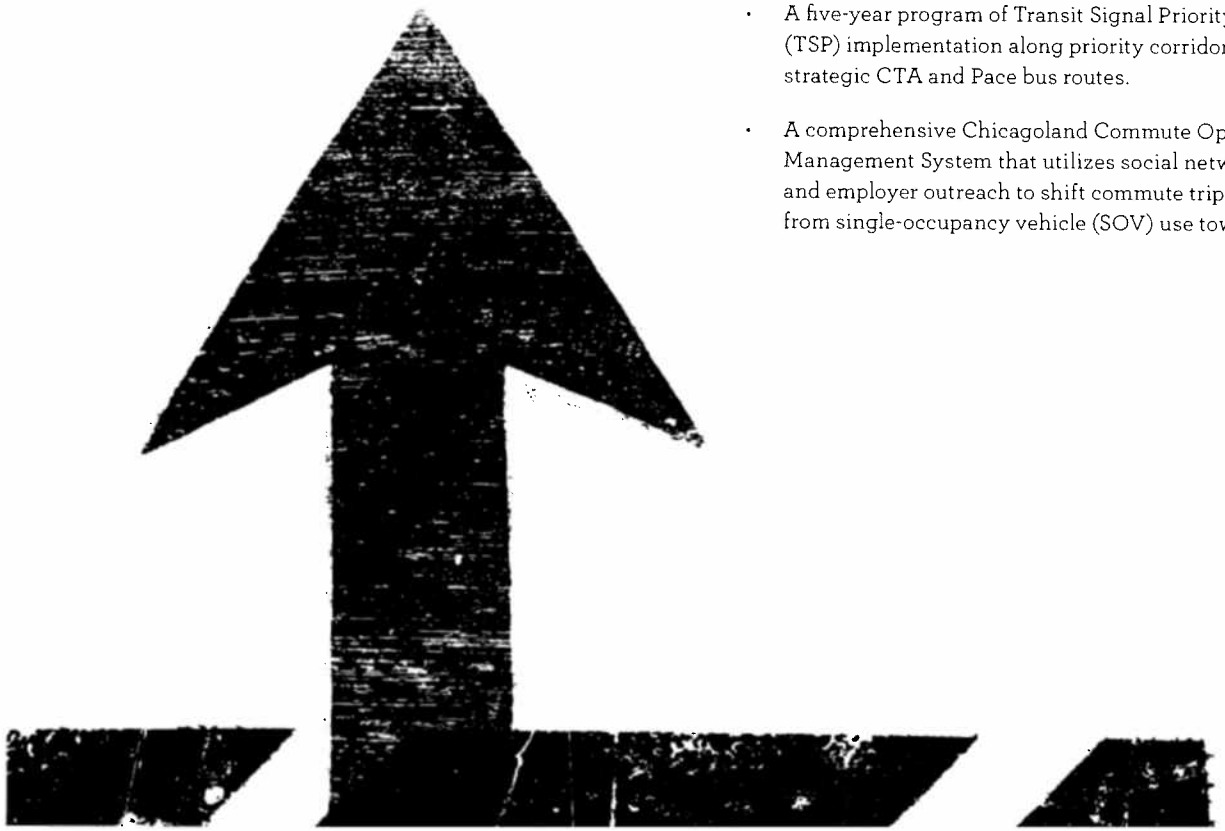
SUMMARY OF NET ASSETS — DECEMBER 31, 2010 AND 2009 *(in thousands)*

	Governmental Activities		
	2010	2009	Change
ASSETS			
Cash and Investments	$ 753,522	$ 494,670	$ 258,852
Noncurrent Assets/Other Assets	$ 372,820	$ 283,137	$ 89,683
Capital Assets—Net	$ 15,265	$ 12,660	$ 2,605
Total Assets	$ 1,141,607	$ 790,467	$ 351,140
LIABILITIES			
Current Bond & Non Bond-Related Liabilities	$ 80,409	$ 123,927	($ 43,518)
Current Bond Related Liabilities	$ 345,124	$ 69,827	$ 275,297
Long-Term Non Bond-Related Liabilities	$ 154,352	$ 49,133	$ 105,219
Long-Term Bond-Related Liabilities	$ 2,435,370	$ 2,502,199	($ 66,829)
Total Liabilities	$ 3,015,255	$ 2,745,086	$ 270,169
Net Assets (Deficit)			
Invested in Capital Assets	$ 15,265	$ 12,660	$ 2,605
Restricted	$ 83,277	$ 270,019	($186,742)
Unrestricted (Deficit)	($1,972,190)	($2,237,298)	$ 265,108
Total Net Assets (Deficit)	($1,873,648)	($ 1,954,619)	$ 80,971

SWANSO

CAPITAL IMPROVEMENTS

Future RTA capital projects are focused on the application of advanced technology to transportation in order to improve efficiency and passenger convenience. These new technology projects need to be balanced with bringing our system to a state of good repair.



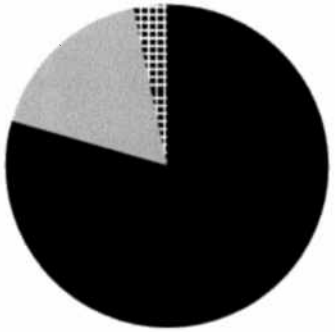
These applications include the following:

- A regional open fare payment system to promote seamless regional mobility, making it easier for transit customers to pay for travel on different segments of the RTA system with a simple, single payment method.
- A regional real-time information system that integrates CTA's Bus Tracker and Train Tracker, Pace's WebWatch and Metra's future next train information system.
- A five-year program of Transit Signal Priority (TSP) implementation along priority corridors and strategic CTA and Pace bus routes.
- A comprehensive Chicagoland Commute Options Management System that utilizes social networking and employer outreach to shift commute trips away from single-occupancy vehicle (SOV) use toward sustainable transportation modes like transit and vanpools.
- Interagency Transit Passenger Information Display (ITPID) that utilizes regional wayfinding and static information sign standards to promote seamless travel on multi-agency transit facilities.
- Multi-Modal Trip Planner System (MMTPS) to provide side-by-side comparisons of trip itineraries using transit, driving or any combination of non-motorized modes such as biking and walking.
- Transfer connection protection (a system to minimize connecting time between transit vehicles by ensuring pre-scheduled connections).
- Parking management systems (real-time information and guidance regarding the availability of parking spaces at transit and ride-share parking facilities).

REGIONAL ASSET CONDITION ASSESSMENT

In 2010, the RTA completed a condition assessment of the existing capital assets for each of the region's three Service Boards. The intent of the assessment was to provide the RTA region with the short- and long-term costs of maintaining the transit system in a State of Good Repair (SGR). The effort has provided a comprehensive capital asset inventory database representing all categories of public transportation infrastructure.

CONDITION FINDINGS BY MODE



The assessment shows that nearly 80 percent of the cost of maintaining our system in a state of good repair is related to rail, while less than 20 percent is for bus.

The initial 10-year capital needs assessment defined assets and their associated costs as backlog, normal replacement or capital maintenance, with the backlog assets characterized by an age greater than their useful life; normal replacement representing planned investments for assets that will reach the end of their useful life during the 10-year program; and capital maintenance representing activities associated with keeping an asset in a SGR during its normal useful life.

Condition ratings were assigned on a scale from 1 to 5, with 1 representing an asset "past its useful life" and 5 representing a relatively new asset in "excellent" condition. For the purposes of this asset condition assessment, the SGR is defined as a condition rating of 3, or "adequate with no backlog." The framework for the condition assessment defined the general data structure, categorized the assets into types, and identified the data fields required for each type. The asset database supported the recording of current assets by Service Board type, current asset value and age. In total, 80 inventory tables were developed to provide the basis for data collection and ultimately, condition ratings.

Data collected from the asset inventory/condition assessment have been used to assess the magnitude of the region's SGR needs. The Capital Asset Condition Assessment report concluded that the RTA region's 10-year capital program need is $24.6 billion, broken down to $15 billion for the CTA, $7.4 billion for Metra and $2.2 billion for Pace. $13.8 billion of the total need is dedicated to backlog costs, $6.9 billion to normal replacement costs and $3.9 billion for capital maintenance costs.

10-YEAR CAPITAL PROGRAM NEEDS SUMMARY *(in billions)*

PROGRAM NEEDS	CTA	METRA	PACE	TOTAL RTA
Backlog	$10.0	$3.7	$ .1	$ 13.8
Normal Replacement	$ 3.2	$1.7	$1.9	$ 6.9
Capital Maintenance	$ 1.8	$2.0	$ .2	$ 3.9
Total	$15.0	$7.4	$2.3	$24.6
% of Total	61%	30%	9%	100%

OVERALL RESULTS OF 10-YEAR NEEDS ASSESSMENT

Monitoring asset inventory data is essential to maintain the integrity of the asset management program. Thus, the RTA is currently proceeding with a process that continuously updates the database as current conditions change. The RTA is also developing a Decision Support Tool to set forth the process and establish the criteria necessary to focus capital efforts on improvements that are intended to bring the region's infrastructure toward a SGR, all of which ensures the allocation of the available financial resources to yield the greatest return to RTA customers and taxpayers.

The prioritization of capital expenditures is critical at this juncture. The condition assessment highlights the financial challenges that the RTA faces as it moves toward achieving and maintaining a state of good repair. The capital needs associated with this objective is massive at $24.6 billion over the next ten years. During that same time, however, revenue to support capital infrastructure is projected at $7.8 billion, representing the receipt of only one dollar for every three that is needed.

RTA SYSTEM 10-YEAR TOTAL CAPITAL NEEDS

ANNUAL REPORT 2009
what
moves
us

What moves the RTA?

We're in the business of overseeing how people are moved – from home to work, from the suburbs to the city, from point A to point B. But it's much more than that. Public transportation moves an area from separate towns and villages into a powerful region, united by the trains and buses that drive economic growth, ease traffic congestion and benefit the environment.

What keeps the entire process moving is the funding that supports transit: critical dollars that help the RTA manage improvements to infrastructure, acquisition of assets and completion of critical projects. We want to keep people, business, the economy and the entire northeastern Illinois region moving forward.

Ultimately, what moves us is our riders. They are why we do what we do. And in these difficult times, we pledge to go above and beyond to do what's best for them. We'll keep moving… and we won't stop.

LETTER FROM THE EXECUTIVE DIRECTOR

The economic crisis that has gripped our nation since the fall of 2008 has posed an extreme challenge to all levels of government. They have all confronted revenue shortfalls and have made difficult cuts to service, employees and other resources in order to deal with the deteriorating economy. Transit systems in particular, with their reliance on revenues closely tied to consumer spending, faced extremely daunting circumstances throughout 2009. Over 80 percent of our nation's transit systems have raised fares, reduced or eliminated service or both, according to the American Public Transportation Association.

Despite these challenges, the Regional Transportation Authority (RTA) has worked cooperatively with the Chicago Transit Authority (CTA), Metra and Pace to make strategic changes in operations and personnel in order to reduce costs, while avoiding the need for major cuts to transit services or significant fare increases. Through a combination of tight fiscal management, the prudent use of working cash and the imposition of unpaid furlough days and other internal policy changes, we have been able to navigate the most difficult economic period in nearly eight decades.

Additionally, the RTA supported this initiative to secure $2.7 billion in state capital funds, developed and implemented a regional performance metrics, conducted the first regional customer satisfaction measurement study and managed and monitored the implementation of the Office of the Auditor General recommendations to approve the system operation.

As the crisis has gradually lifted, economic and revenue indicators have improved. However, we remain in the midst of a very challenging fiscal climate and continue to plan for the future under the assumption of reduced revenue and slow recovery. This 2009 annual report details the steps we have taken to address the ongoing crisis.

We are eager to complete the capital investments approved in the 2009 capital plan in order to improve our transit system and help our economy recover. Initial capital funds have already been allocated to the individual transit agencies and we look forward to full implementation of the capital plan. We will continue to work with the State of Illinois to meet state transit operating funding commitments, which are lagging, as its own revenue situation improves. Our fiscal actions in 2009 to address our own transit revenue shortfalls leave the RTA and the service boards with little flexibility if state funding commitments continue to be delayed significantly.

Each day over two million riders rely on the transit system to support our economy, our environment and our quality of life. Together, we can continue to improve our transit network for riders, taxpayers and the millions of Illinois residents who benefit from the system.

STEPHEN E. SCHLICKMAN
Executive Director

THE REGIONAL TRANSPORTATION AUTHORITY

EXECUTIVE DIRECTOR: STEPHEN E. SCHLICKMAN

BOARD CHAIR: JIM REILLY

The Regional Transportation Authority (RTA) is the oversight, funding, and regional planning agency for the transit Service Boards including the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail and Pace suburban bus and paratransit. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties in northeastern Illinois. The RTA is a special purpose unit of local government and a municipal corporation of the State of Illinois. From the time of its creation, the RTA's mission has been to ensure financially sound, comprehensive and coordinated public transportation for northeastern Illinois.

The CTA, Metra and Pace handle their respective transit operations and fare responsibilities. Each is led by a Board of Directors that determines levels of service, fares and operational policies. The RTA's oversight responsibility is guided by the RTA's Board of Directors, who approves an annual budget and two-year financial plan that sets a strategic plan to guide all the agencies in achieving their common mission of providing the best transit system possible for the region. The Board consists of 16 members and a chairman appointed from the six-county region. The RTA Board also is required annually to review and approve a five-year capital plan, which is a blueprint of the capital activities to be funded by the RTA and executed by the CTA, Metra and Pace.

The RTA regional system is the third largest in the country measured by unlinked passenger trips with more than two million rides daily. The combined assets of the RTA system are valued at more than $43 billion and include 5,640 buses and rail cars, plus 650 vanpool vehicles. The system covers 7,200 route miles in the six-county region that currently has a population of approximately eight million people.

Transit reform legislation, House Bill 656, enacted in January 2008 by the Illinois General Assembly, expanded the Authority's Board from 13 to 16 members. The new appointees will serve in five-year terms. The following is a breakdown of the Board make up and the appointing authorities:

- 5 by Mayor of Chicago (appointee cannot be the Chairman of CTA)
- 4 by suburban members of the Cook County Board
- 1 by the President of the Cook County Board (from Suburban Cook County)
- 1 by the Chairman of the DuPage County Board
- 1 by the Chairman of the Lake County Board
- 1 by the Will County Executive
- 1 by the Chairman of the McHenry County Board
- 1 by the Chairman of Kane County Board
- The Board Chair is appointed by 11 members of the Board with at least 2 votes from Chicago, Suburban Cook and the collar counties.

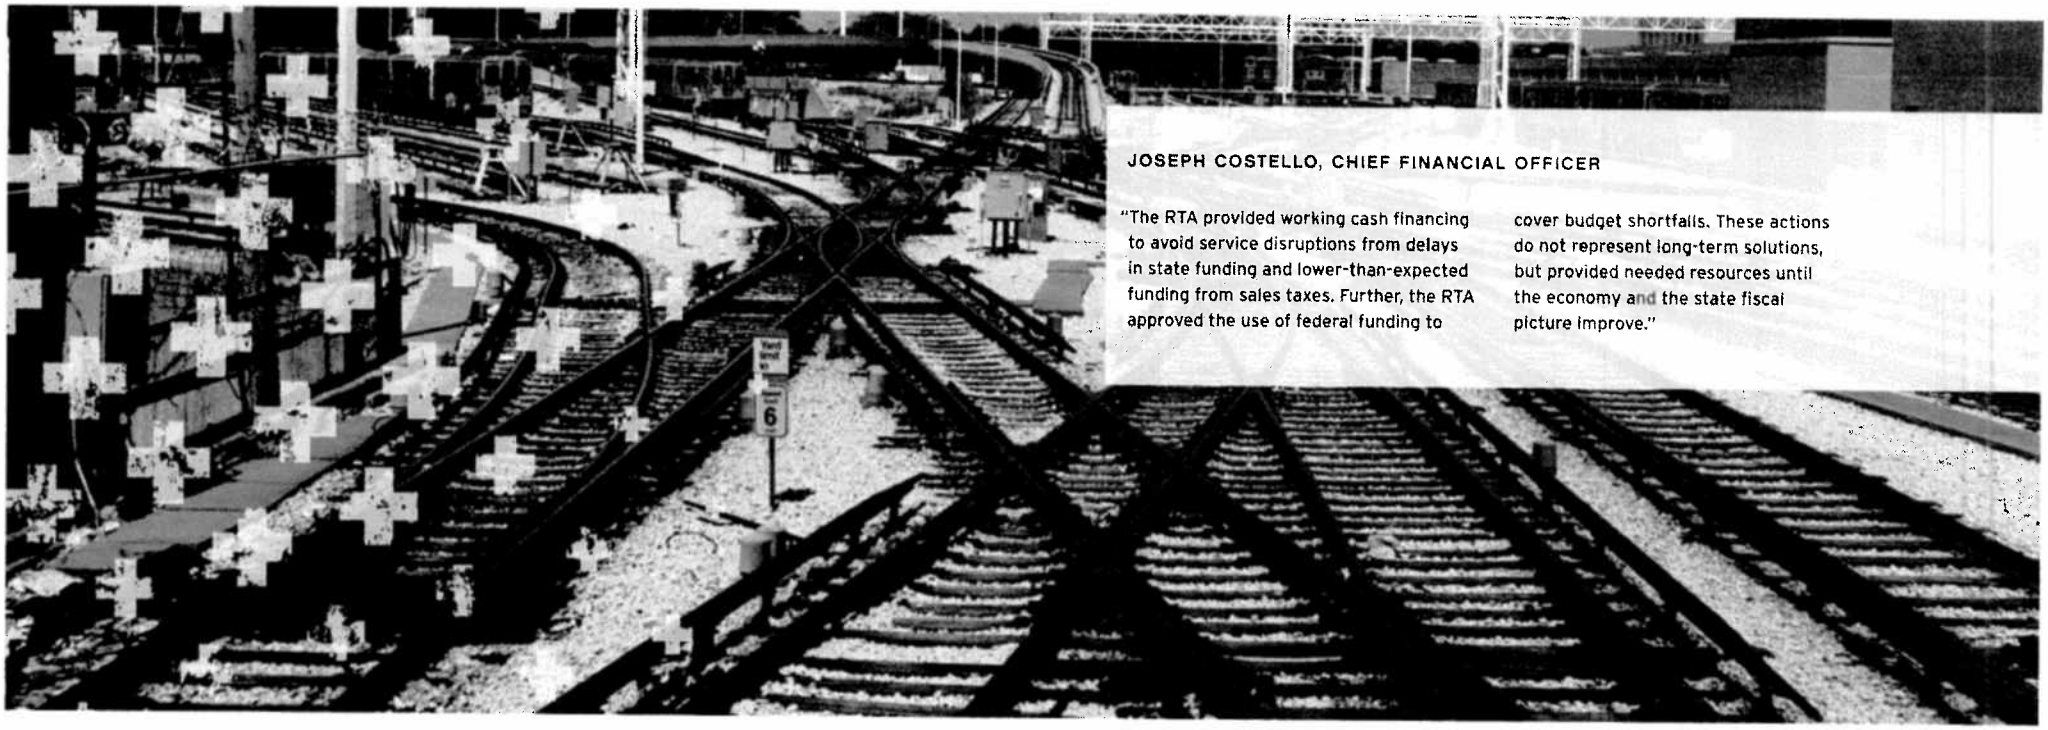
STEPHEN E. SCHLICKMAN
Executive Director



JOSEPH COSTELLO, CHIEF FINANCIAL OFFICER

"The RTA provided working cash financing to avoid service disruptions from delays in state funding and lower-than-expected funding from sales taxes. Further, the RTA approved the use of federal funding to cover budget shortfalls. These actions do not represent long-term solutions, but provided needed resources until the economy and the state fiscal picture improve."

FISCAL RESPONSIBILITY

In 2009, the RTA made decisions that would be fiscally responsible for our riders. The RTA reduced revenue estimates downward by $61 million and immediately began working with the CTA, Metra and Pace to identify solutions to address revenue shortfalls resulting from the current economic crisis. The RTA reduced its own internal operating budget of $36.7 million by 12 percent, saving approximately $4.5 million.

The RTA was responsible for coordinating and managing the finances of the transit agencies, an effort that has become more critical as we continue to confront the impact of our historic economic crisis. We worked with the CTA, Metra and Pace to make every effort to identify solutions that would reduce the need to rely on fare increases or service reductions.

The recession hit all levels of government hard for the last two years and the transit agencies were not immune to the economic crisis. The RTA, like other transit agencies, adjusted to its changing conditions.

ANDREW GRUBER, FORMER SENIOR DEPUTY EXECUTIVE DIRECTOR
LEGAL AND GOVERNMENTAL AFFAIRS

"The capital bill provides essential funding to reinvest in the region's public transportation system. With these funds, more energy efficient buses and locomotives can be purchased, stations can be cleaned and repaired, and tracks can be rehabilitated to ensure continued safety and smooth operation."

REPRESENTATIVE LOU LANG
HOUSE CHIEF SPONSOR OF THE FIRST STATEWIDE CAPITAL BILL IN 10 YEARS

"The capital construction bill provides for $31 billion for the infrastructure needs of our great state. A significant share of these investments, $2.7 billion, will be for northeastern Illinois transit. These new investments will create many jobs and update and maintain services and equipment. Those who use our local transit will find that they have a more efficient and more convenient experience. This is a WIN-WIN for the taxpayers."

CAPITAL FUNDING

The year 2009 brought good news to transit riders with more capital funding than any previous year.

In 2009 the Illinois General Assembly and Governor Quinn approved $2.7 billion in capital funding for northeastern Illinois transit to repair and maintain the transit system. The last state capital bill passed 10 years ago, and the RTA will be using the latest capital funding to bring the regional transit system closer to a state of good repair by replacing outdated vehicles and equipment, aging stations and deteriorating rail ties that were resulting in slow zones.

The state funds were coupled with $414 million in federal stimulus funding that the regional transit system received. Working with the CTA, Metra and Pace, the RTA identified and prioritized the most pressing maintenance needs of the system.

BICYCLE COMMUTER: SERGE LUBOMUDROV

"Living in Chicago, I use the CTA for commuting and for getting around the city. Often, I take my bike along, and the ability to bring it on the train is quite important. Parking is a nightmare in my area; that's why I've never owned a car and don't want to. Public transportation allows me to avoid the hassle. I'll always ride the CTA!"

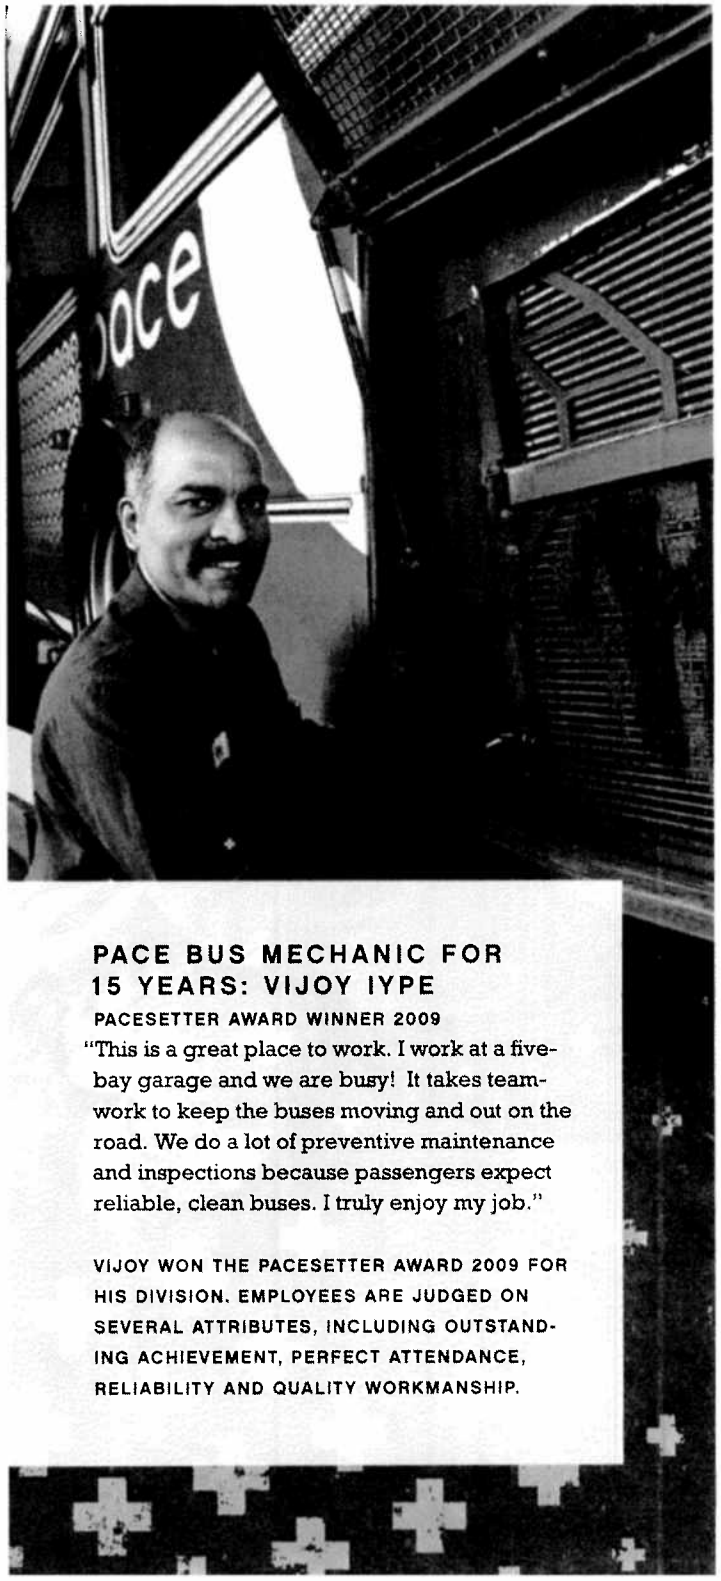
AIMEE LEE, DIVISION MANAGER, STRATEGIC & LONG RANGE PLANNING

"Public transit plays a critical role in the prosperity and vitality of our region. It connects people to jobs, education, health care services and many of the region's key major destinations, such as Midway and O'Hare airports. The benefits of transit are far reaching and go beyond regular riders. An investment in transit is an investment in the long-term well being of our region."

MARKET AND SYSTEMS ANALYSIS

As the RTA works toward a world-class transit system, it understands the importance of knowing the needs of its riders. In 2009, the RTA began a market analysis of travel in the six-county region. The study entailed examining the Chicago Metropolitan Agency for Planning (CMAP) Household Travel Tracker database and a 2009 RTA commissioned survey of riders and non-riders of transit that explored people's attitudes and behaviors about travel. The RTA concluded its data collection effort at the end of August 2009. Between the CMAP and RTA surveys, input from nearly 13,000 households across the region was captured to help paint a picture of regional travel.

The analysis shows that more than 26 million trips are made on an average weekday in our region. The region's travel patterns are highly geographically dispersed with over 60% of travel occurring within the suburban region. While transit accounts for approximately 6% of all trips, 38% of households in the region report using transit over the course of a regular week. Transit serves a critical role in the region's economy as it connects people with jobs, serving 14% of work trips. Survey findings indicate a broad base of support for transit investment. This support was even found to be true among those who do not take transit, pointing to the growing appreciation that the general public has for the broad reaching benefits of transit.



PACE BUS MECHANIC FOR 15 YEARS: VIJOY IYPE

PACESETTER AWARD WINNER 2009

"This is a great place to work. I work at a five-bay garage and we are busy! It takes teamwork to keep the buses moving and out on the road. We do a lot of preventive maintenance and inspections because passengers expect reliable, clean buses. I truly enjoy my job."

VIJOY WON THE PACESETTER AWARD 2009 FOR HIS DIVISION. EMPLOYEES ARE JUDGED ON SEVERAL ATTRIBUTES, INCLUDING OUTSTANDING ACHIEVEMENT, PERFECT ATTENDANCE, RELIABILITY AND QUALITY WORKMANSHIP.

JOHN GOODWORTH, DIVISION MANAGER, PROGRAM COMPLIANCE

"Every asset has an expected life span. Knowledge of an asset's condition allows a consistent method to determine expected comparative costs to either replace an asset at the appropriate time, or to defer and continue maintaining it. Proper maintenance of assets saves taxpayer funds by ensuring that equipment is repaired or replaced at the most cost-effective times."

ASSET CONDITION

The RTA began working on an 18-month assessment of its asset condition report in 2009 to assess the condition of existing capital assets for each of the region's service boards and surrounding suburb area rail system, and Pace (the suburban bus system). The report's intent was to provide the Regional Transportation Authority (RTA) with a plan for a capital asset condition assessment for each Service Board. The process established administrative criteria for the capital replacement, capital rehabilitation and capital maintenance of all assets.

Representatives from the Chicago Transit Authority, Metra and Pace assisted in all aspects of this process including: the design and development of the inventory tables, the condition ratings system based on useful life and industry standards, the definition of "State of Good Repair," the sampling plan and sampling data. Additionally, Asset Information Teams, consisting of representatives from the RTA and its service boards, worked to design and develop the inventory framework which looked at five asset types:

+ Track and Structures
+ Electrical/Subway Equipment
+ Signals/Communications/Fare Collection
+ Stations/Garages/Facilities
+ Rolling Stock

The initial 10-year capital needs assessment is based on cost components for backlog — assets that are still in service and typically have not been replaced within their useful life due to a lack of sufficient funding; normal replacement costs — which are the planned replacement cost for assets that will reach the end of their useful life during the 10-year program; capital maintenance — typically significant and anticipated costs associated with keeping the asset in service for the full term of its useful life; soft costs — includes in-house agency staff, government related support staff and the use of consultants for particular tasks; and contingency costs — unforeseen emergencies or design shortfalls typically identified after a project commences. The results of the study will be published in 2010.

GRACE GALLUCCI, DEPUTY EXECUTIVE DIRECTOR
RESEARCH, ANALYSIS & POLICY DEVELOPMENT

"The Performance Measures Report Card gives public officials and the public a level of confidence that transit system administrators are utilizing tax dollars in an effective way. For 2009, tight controls of costs led to improvements in efficiencies, and the quality of service delivered was maintained."

PERFORMANCE MEASURES

In 2009, the RTA developed and implemented the first phase of a comprehensive performance measure system with the objective of improving the transparency, accountability and overall service of the region's public transit system.

As part of this effort, the RTA compiled and released a report card which satisfied the requirements in the 2008 transit reform legislation and recommendations made by the Illinois Auditor General in a 2007 performance and funding audit. It was the first report of its kind to be created and published by the agency.

The report card found that the overall performance of the transit system is relatively good, but serious challenges still exist, primarily due to a lack of capital investment. The report highlights increases in the levels of service provided, as well as increases in ridership. It also demonstrates successful efforts to improve system maintenance.

Performance Measures are part of the RTA's oversight function to help manage the region's public transit system. They evaluate factors such as service coverage, efficiency and effectiveness, delivery, maintenance and capital investment, and service level solvency. Through aggregated data from the CTA, Metra and Pace, the RTA and the region's taxpayers will have a better sense of how these agencies are collectively meeting their mission, and thus the transit needs for the region.

STUDENT RIDER: GENIE BRYANT

"As a DePaul student, I ride the bus and train every day. I live near the Lincoln Park campus, but commute to the Loop for a class. Coming from the suburbs, I never used public transportation. Now, I use it all the time to explore Chicago. I go to Chinatown, to Loyola to meet friends, and even up to Evanston. It's more social than driving, and no traffic!"

FUNDING PROGRAMS

The RTA's Funding Programs offer planning, operating, and capital grants for a variety of projects. The programs are consistent with the RTA's legislative mandates and Strategic Plan, and coordinated with the annual budget process. Two of the programs, Community Planning and Subregional Planning, provide funding for planning studies and initiatives. The other two programs, Innovation, Coordination and Enhancement (ICE) and Job Access Reverse Commute/New Freedom (JARC/NF), provide funding for transit operating and capital projects.

The Funding Programs provide value to a wide variety of recipients, including municipalities, counties, private non-profits, private transportation operators and the RTA Service Boards. Each recipient's needs are different, and the RTA Funding Programs offer support and a path to implementation. The Funding Programs also provide a unique opportunity for the RTA and its Service Boards to coordinate at the local level to not only create plans or implement projects, but to facilitate intergovernmental cooperation and relationship building. During the past decade, the RTA has leveraged its own funds with federal, state and local funds to program nearly 150 projects.

Each year, the RTA conducts a transparent process consisting of outreach, open houses, a "call for projects," the development of a preliminary program of projects, a public participation process, and ultimately the selection and approval of projects for inclusion in the Funding Programs. In 2009, the RTA Funding Programs funded 19 projects and allocated more than $11 million in federal, local and RTA funds.

The RTA Funding Programs are recognized nationally as a best practice of grant making in the public transportation field. The RTA approaches each potential applicant as a partner in achieving mutual goals. Potential applicants receive valuable guidance, support and advice from the RTA, even if not selected for the programs. For those that are awarded grants, the RTA maintains a strong and committed presence throughout the development, execution and implementation of the project.

EVERY DAY RIDER: NICOLE GOTTHELF

"I use public transportation to go everywhere — I don't own a car. Whether at work or home, I'm close to a bus stop or a station, and that makes it so convenient to use. The improved stations are great. I wish we invested more in transit; a good system means fewer cars on the road and less congestion. I can relax with my book, and I never sit in traffic. Mass transit rules!"

JAY CIAVARELLA
DIVISION MANAGER

"The RTA Funding Programs use a comprehensive set of selection criteria to ensure that critical projects are funded. These programs provide valuable planning for the increased use of public transit, a way to encourage sustainable growth, a proven method to seek investments that maximize beneficial returns, and improved access to jobs in our region."

CAPITAL PROGRAMS OVERVIEW

The RTA Act requires that the capital expenditures of the CTA, Metra and Pace be subjected to continuous review so that the RTA may budget and expend funds available to the region with maximum efficiency. The RTA Board must adopt a Five-Year Capital Program every year. The RTA's Five-Year Capital Program describes the nature, location and budget by project and by fiscal year of all anticipated Service Board capital improvements. Public hearings are held in each county in the northeastern Illinois region to inform the public and government officials of the Authority's capital development plans.

The primary emphasis of the 2009 Capital Program is to continue efforts to bring the system's assets to a State of Good Repair. When replacing worn out items, it is imperative to utilize modern technologies that often result in improved functionalities of equipment, facilities and rolling stock. In addition, a balanced Capital Program is responsive to customer needs and shifting markets by including investment in system expansion. For the 2009 Capital Program, the percent of the budget for capital projects to maintain the system is 93 percent. While the current funding level does not satisfy all needs, an appropriate balance of investment is achieved in light of the current condition of the RTA system.

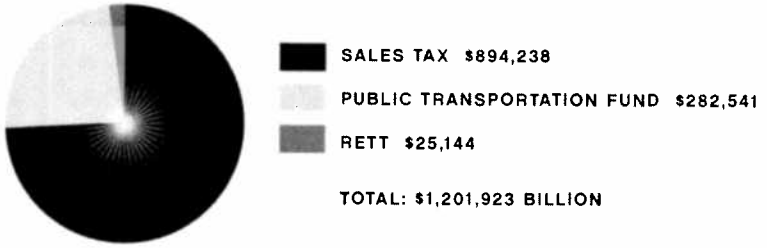
2009 CAPITAL PROGRAMS FOR THE CTA, METRA AND PACE SIGNIFICANT PROJECTS INCLUDED IN THE ADOPTED 2009 CAPITAL PROGRAM:

- $97.6 million for the repair of CTA track and structure
- $57.7 million for the continuation of the purchase of CTA buses
- $42.9 million for the upgrade of power distribution and signal systems
- $42.3 million for the expansion of the CTA Ravenswood Brown Line
- $27.4 million for the purchase of 406 CTA rail cars
- $26.5 million for the rehabilitation and overhaul of CTA rail cars
- $19.8 million for the rehabilitation and overhaul of CTA buses
- $19 million for the improvement of CTA facilities
- $74.1 million for Metra bridge rehabilitation and renewal
- $70.6 million for the rehabilitation and improvement of Metra locomotives
- $19.7 million for the rehabilitation of Metra commuter rail cars
- $18.1 million for the upgrade of Metra signal systems
- $16.2 million for the rehabilitation and improvement of stations
- $25.4 million for the purchase of Pace fixed route buses
- $15.8 million for the purchase of Pace paratransit vehicles
- $6.2 million for the purchase of Pace vans and community vehicles
- $4.4 million for the purchase of the replacement for the HPe3000 computer system and $3.2 million for improvements to Pace garages and facilities
- $1.7 million for the purchase of a replacement of Pace's fixed route radio system

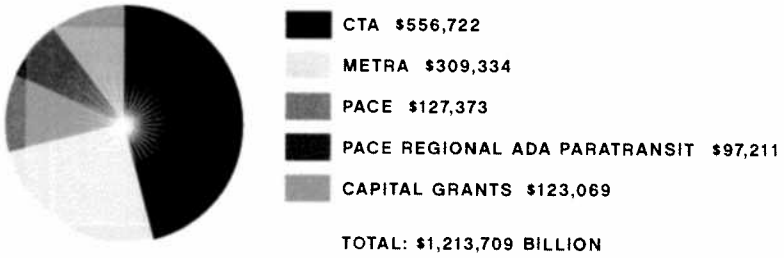
SYSTEM RIDERSHIP UNLINKED PASSENGER TRIPS ENDING DECEMBER 31, 2009

CTA—BUS	318.7
CTA—RAIL	202.6
METRA	83.1
PACE SUBURBAN SERVICE	32.3
PACE REGIONAL ADA PARATRANSIT	2.8
TOTAL:	639.5 MILLION RIDERS

RTA REVENUE BY SOURCE (IN MILLIONS) ENDING DECEMBER 31, 2009



DISTRIBUTION OF FUNDING (IN MILLIONS) ENDING DECEMBER 31, 2009



FINANCIAL OVERVIEW

Like most of the transit systems around the country, the 2009 recession and economic crisis had a dramatic impact on the RTA's regional transit system. The majority of operating funds produced by RTA sales tax, Public Transportation Funds (PTF) and the City of Chicago Real Estate Transfer Tax (RETT) fell significantly. These operating dollars support the daily operation of our transit system such as maintenance and repairs, fuel and other ongoing costs to keep our buses and trains operating. As the economy continued to struggle and revenues declined, the RTA updated revenue estimates in April and then again in June. Total revenues decreased by as much as 21.8% compared to our original recession projections, creating a shortfall of approximately $328.2 million.

The falling revenues forced the RTA to make serious cost-saving measures for our regional system that accommodated our more than two million daily riders. The RTA worked with the CTA, Metra and Pace to successfully shift funds from existing programs, reduce administrative expenses, provide working cash to the transit agencies and facilitate state and federal assistance to help close the budget gap.

These measures reduced each agency's budget, making it smaller than the previous year and minimizing the effects on the rider. Additionally, employees were required to take unpaid workdays and holidays, salaries were frozen, more than 1,000 employees were laid off, and service cuts and increased contributions from employees for benefits such as health care were implemented.

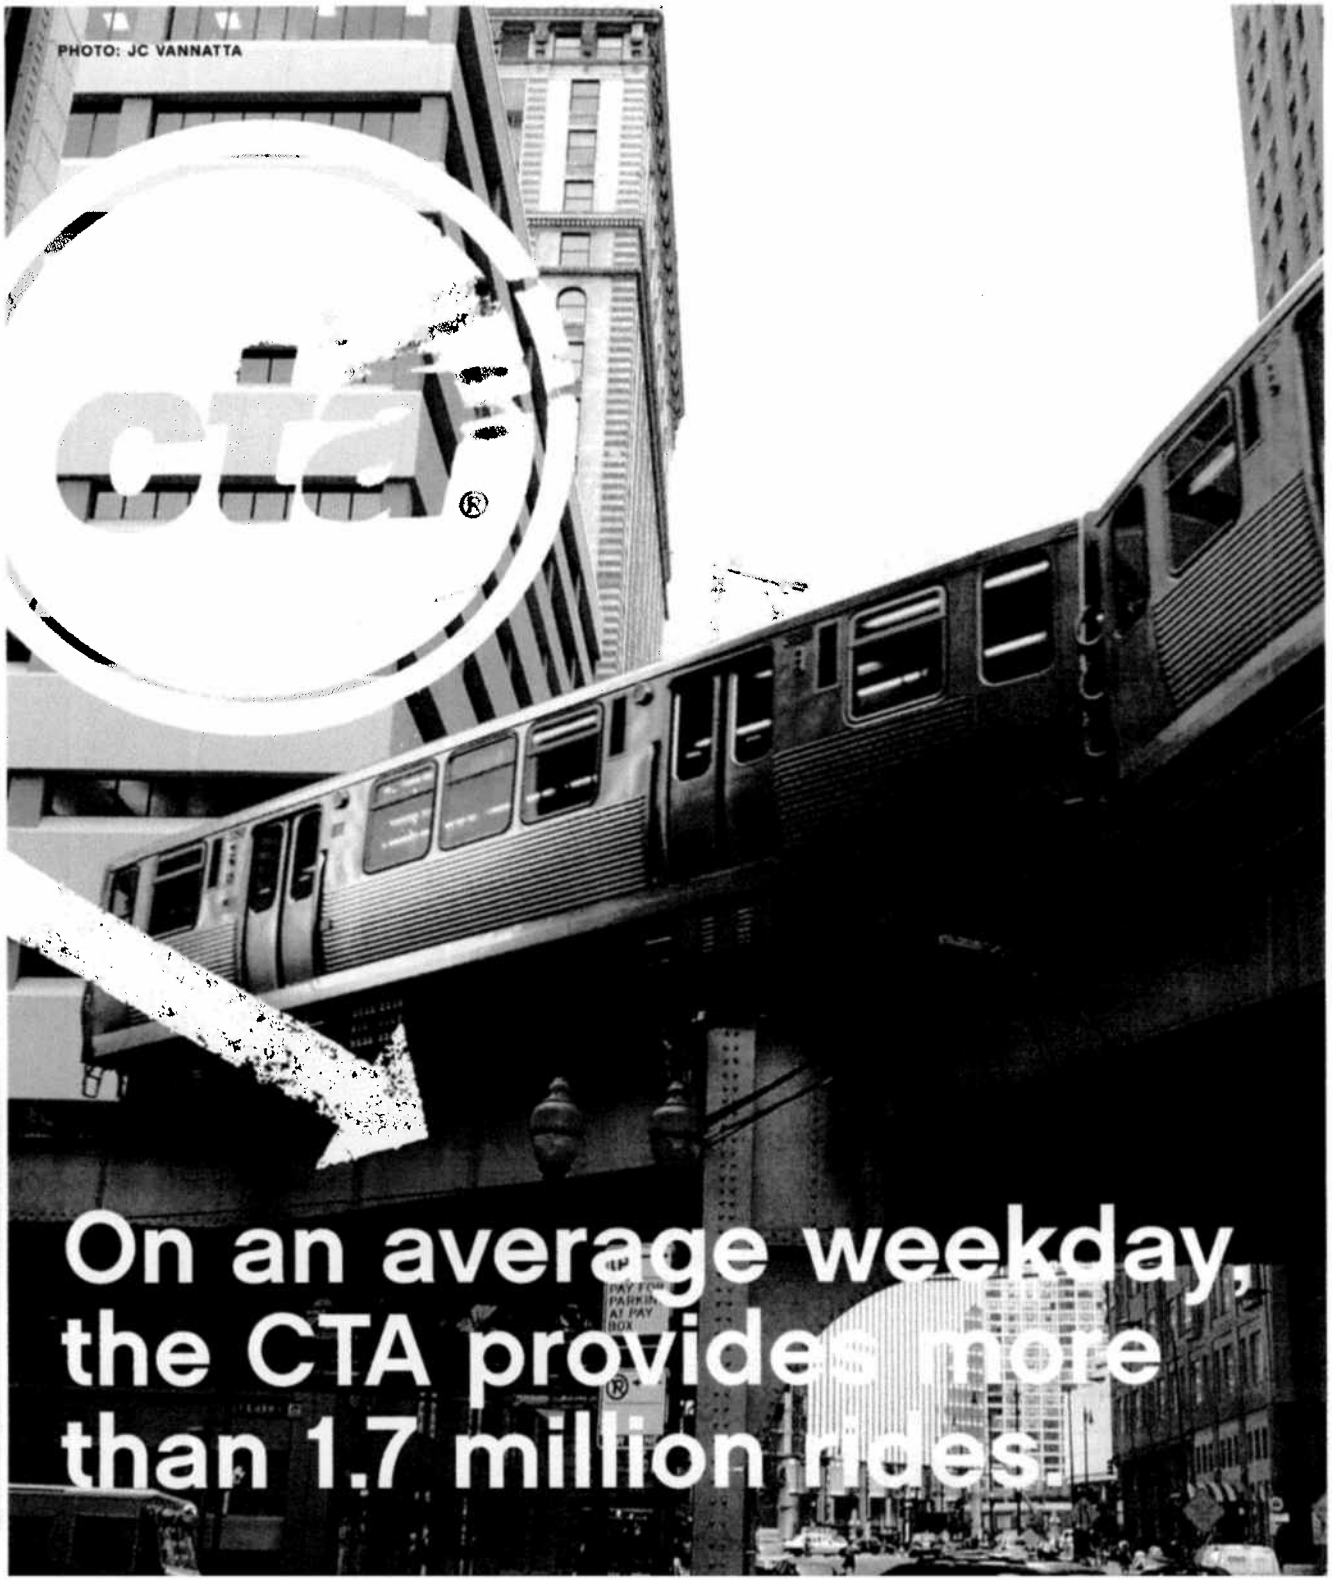
The RTA continues to make great strides in improving its transit system, working with each transit agency to ensure riders have safe and reliable service across the region.

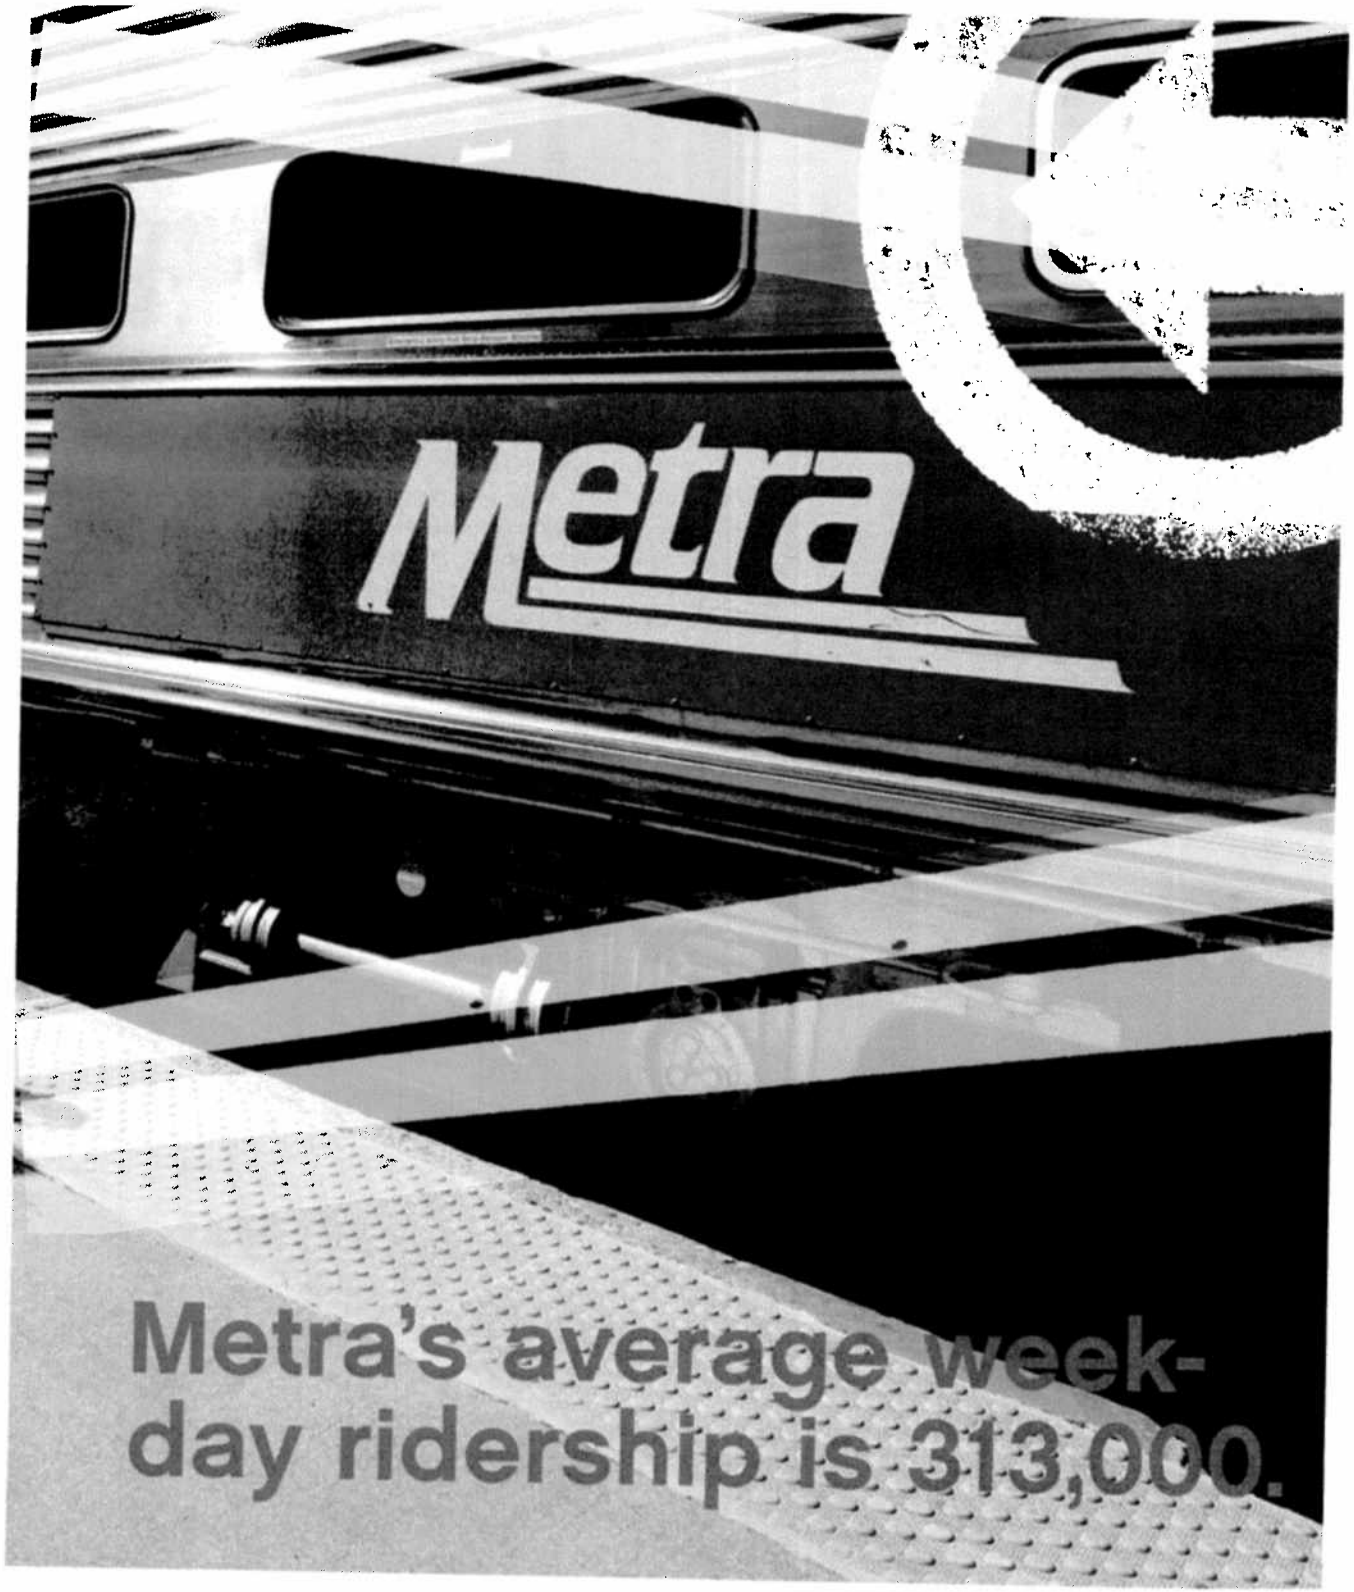
THE CHICAGO TRANSIT AUTHORITY

BOARD CHAIR: TERRY PETERSON
PRESIDENT: RICHARD L. RODRIGUEZ

The Chicago Transit Authority (CTA) is the nation's second largest public transportation system, covering the City of Chicago and 40 surrounding suburbs. On an average weekday, the CTA provides more than 1.7 million rides. With nearly 1,800 buses that operate over 140 routes and nearly 1,200 rail cars operating over eight rail lines, many of which operate 24 hours a day. CTA is responsible for providing more than 81 percent of public transit trips in the six-county region. The CTA was created by the Illinois State legislature in 1947 and became the predominant operator of Chicago transit after purchasing the Chicago Motor Coach system.

The Chicago Transit Authority is governed by a seven-member Chicago Transit Board.





METRA

BOARD CHAIR: CAROLE R. DORIS
EXECUTIVE DIRECTOR: PHIL PAGANO (DECEASED)

Metra was formed in November 1983 as part of the reorganization of the RTA by the State of Illinois. Metra is responsible for the day-to-day operations of the region's commuter rail system including fare and service levels, capital improvements, finances, passenger services, safety and systems planning. Geographically, the Metra system is the largest in the United States, and its operational interface with an extensive freight network makes it arguably the nation's most complex.

The Metra rail system is comprised of 11 separate lines, which run north, west and south of the Chicago central business district. The system extends 565 route-miles to the limits of the six-county area and serves 239 local rail stations in more than 100 communities. The network itself is made up of more than 1,100 pieces of rolling stock, 800 bridges, more than 2,000 signals, 16 rail storage yards and six major maintenance facilities.

Metra's average weekday ridership is 313,000.

Metra is governed by an 11-member Board of Directors.

PACE

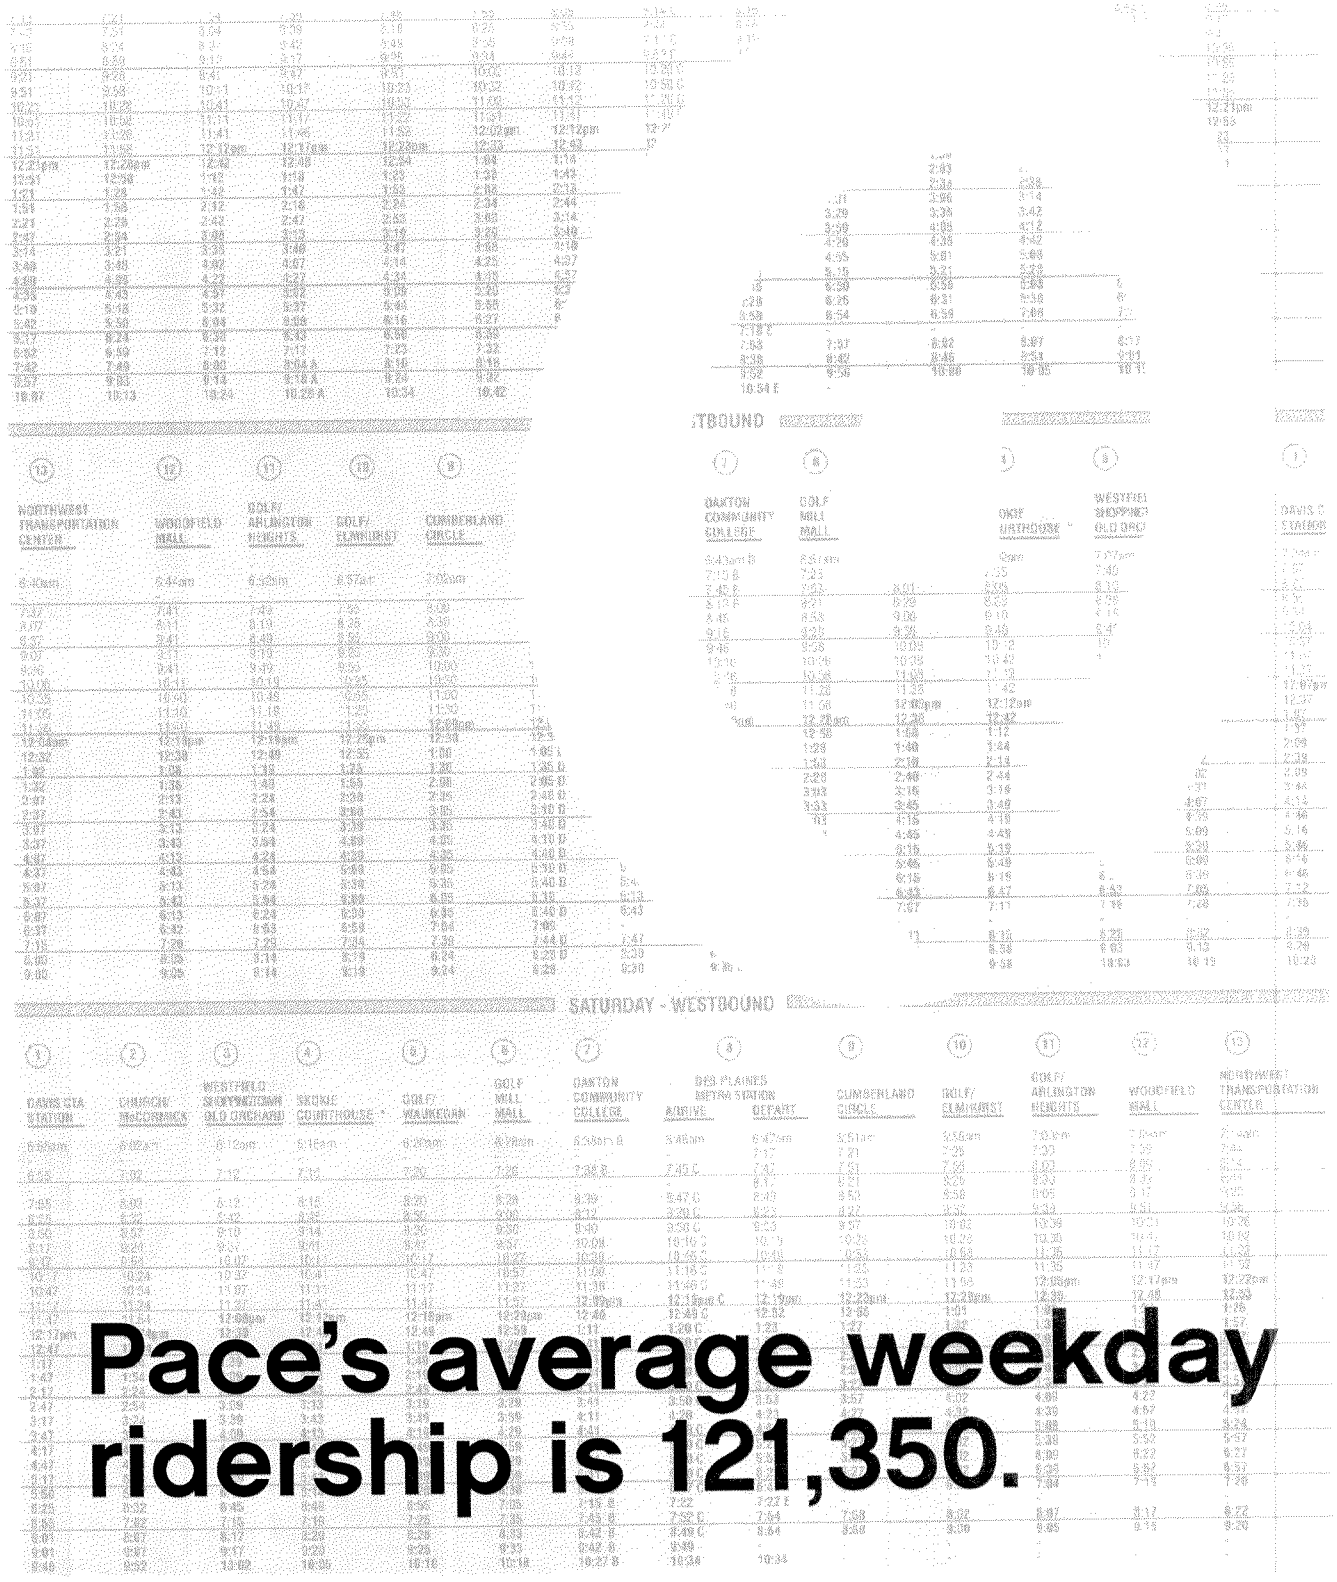
BOARD CHAIR: RICHARD KWASNESKI
EXECUTIVE DIRECTOR: T.J. ROSS

Pace was formed in 1983 as part of the reorganization of the Regional Transportation Authority and began service in 1984. Pace's mission is to provide efficient well-integrated fixed route, vanpool and paratransit transportation services that meet the travel needs of the suburban Chicago area.

Pace's service area measures 3,700 square miles. The suburban area is divided among the six counties and incorporates 284 municipalities. Transportation needs in this broad area are as unique as the individual communities Pace serves. Pace fixed route service includes approximately 143 regular routes, 50 feeder routes and 16 shuttle routes. The fleet is comprised of 701 buses, 610 vanpool vehicles, 366 Pace-owned ADA paratransit vehicles and 80 Community Transit Vehicles.

Pace's average weekday ridership is 121,350.

Pace is governed by a 13-member Board of Directors.



Pace's average weekday ridership is 121,350.

FAMILY RIDERS: STACEY CARAGHER AND SONS

"I've used Pace and Metra for 20 years, and I enjoy the ease of the ride, and the money I save! My children love taking the train to Brookfield Zoo and to Chicago — we enjoy seeing the towns the train goes through. I only wish we had more access to public transportation. We rely so much on our own vehicles and if we used public transportation more, the environmental effects would be great."

GREEN TRANSIT PLAN

The RTA teamed up with several regional partners to convene the Regional Sustainability Working Group, tasked with identifying ways to increase public transportation's role in reducing the impacts of climate change and protecting the region's environment. Consisting of representatives from the RTA, CTA, Metra, Pace, Illinois Department of Transportation (IDOT), Chicago Metropolitan Agency for Planning (CMAP), Chicago Department of Environment and Chicago Department of Transportation (CDOT), the working group is developing the Regional Green Transit Plan. Funded by an Illinois State Planning and Research grant, the plan will recommend strategies to improve the energy efficiency of the region's public transportation system and reduce the overall impact of transportation on the region's environment. The RTA intends to use the plan to educate the public about the environmental benefits of transit and demonstrate the ability of transit to reduce regional greenhouse gas emissions.

UNIVERSAL FARE PAYMENT SYSTEM

Fare coordination is one of the ways the RTA wants to promote seamless regional mobility. A major goal of fare coordination is to make it easier for customers to pay for travel on different segments of the RTA system by using one simple form of payment. The original idea was that a single transit card would accomplish this. Following the lead of the financial and retail merchants, the RTA is exploring the concept of open payment as a way to cost-effectively deliver a regionally coordinated fare payment system.

The open payment approach takes advantage of the financial and retail sectors' transition into open interoperable standards for contactless payments. Ultimately, we are seeking a "smart chip" technology that takes advantage of these open standards. We envision a suite of regionally coordinated fare products that would be available in a variety of formats (credit/debit cards, pre-loaded gift cards, cell phones, key fobs, etc.) that could be used interchangeably to pay for travel on CTA, Pace and Metra services. The RTA believes that the open payments approach would make transit travel more attractive from the customer's perspective, expanding our market share for regional travel.

BRT INITIATIVES

In 2009 the RTA launched a Phase I study in partnership with IDOT and Pace to explore the opportunity to run buses on the shoulder of I-55. The concept of running buses on the shoulder has been implemented in a handful of other regions such as Minneapolis and Cincinnati. It is proposed to be a low cost means to maximize the utility and capacity of the existing roadway infrastructure. By allowing buses to run on the shoulder, buses are able to bypass regular traffic and achieve greater travel time savings and better schedule adherence.

The Phase I study will focus on further development of the bus-on-shoulder concept, assess the opportunities for buses to run on the shoulder of I-55, explore cost implications, identify safety concerns and estimate travel time savings. The study is scheduled for completion by end of 2010.

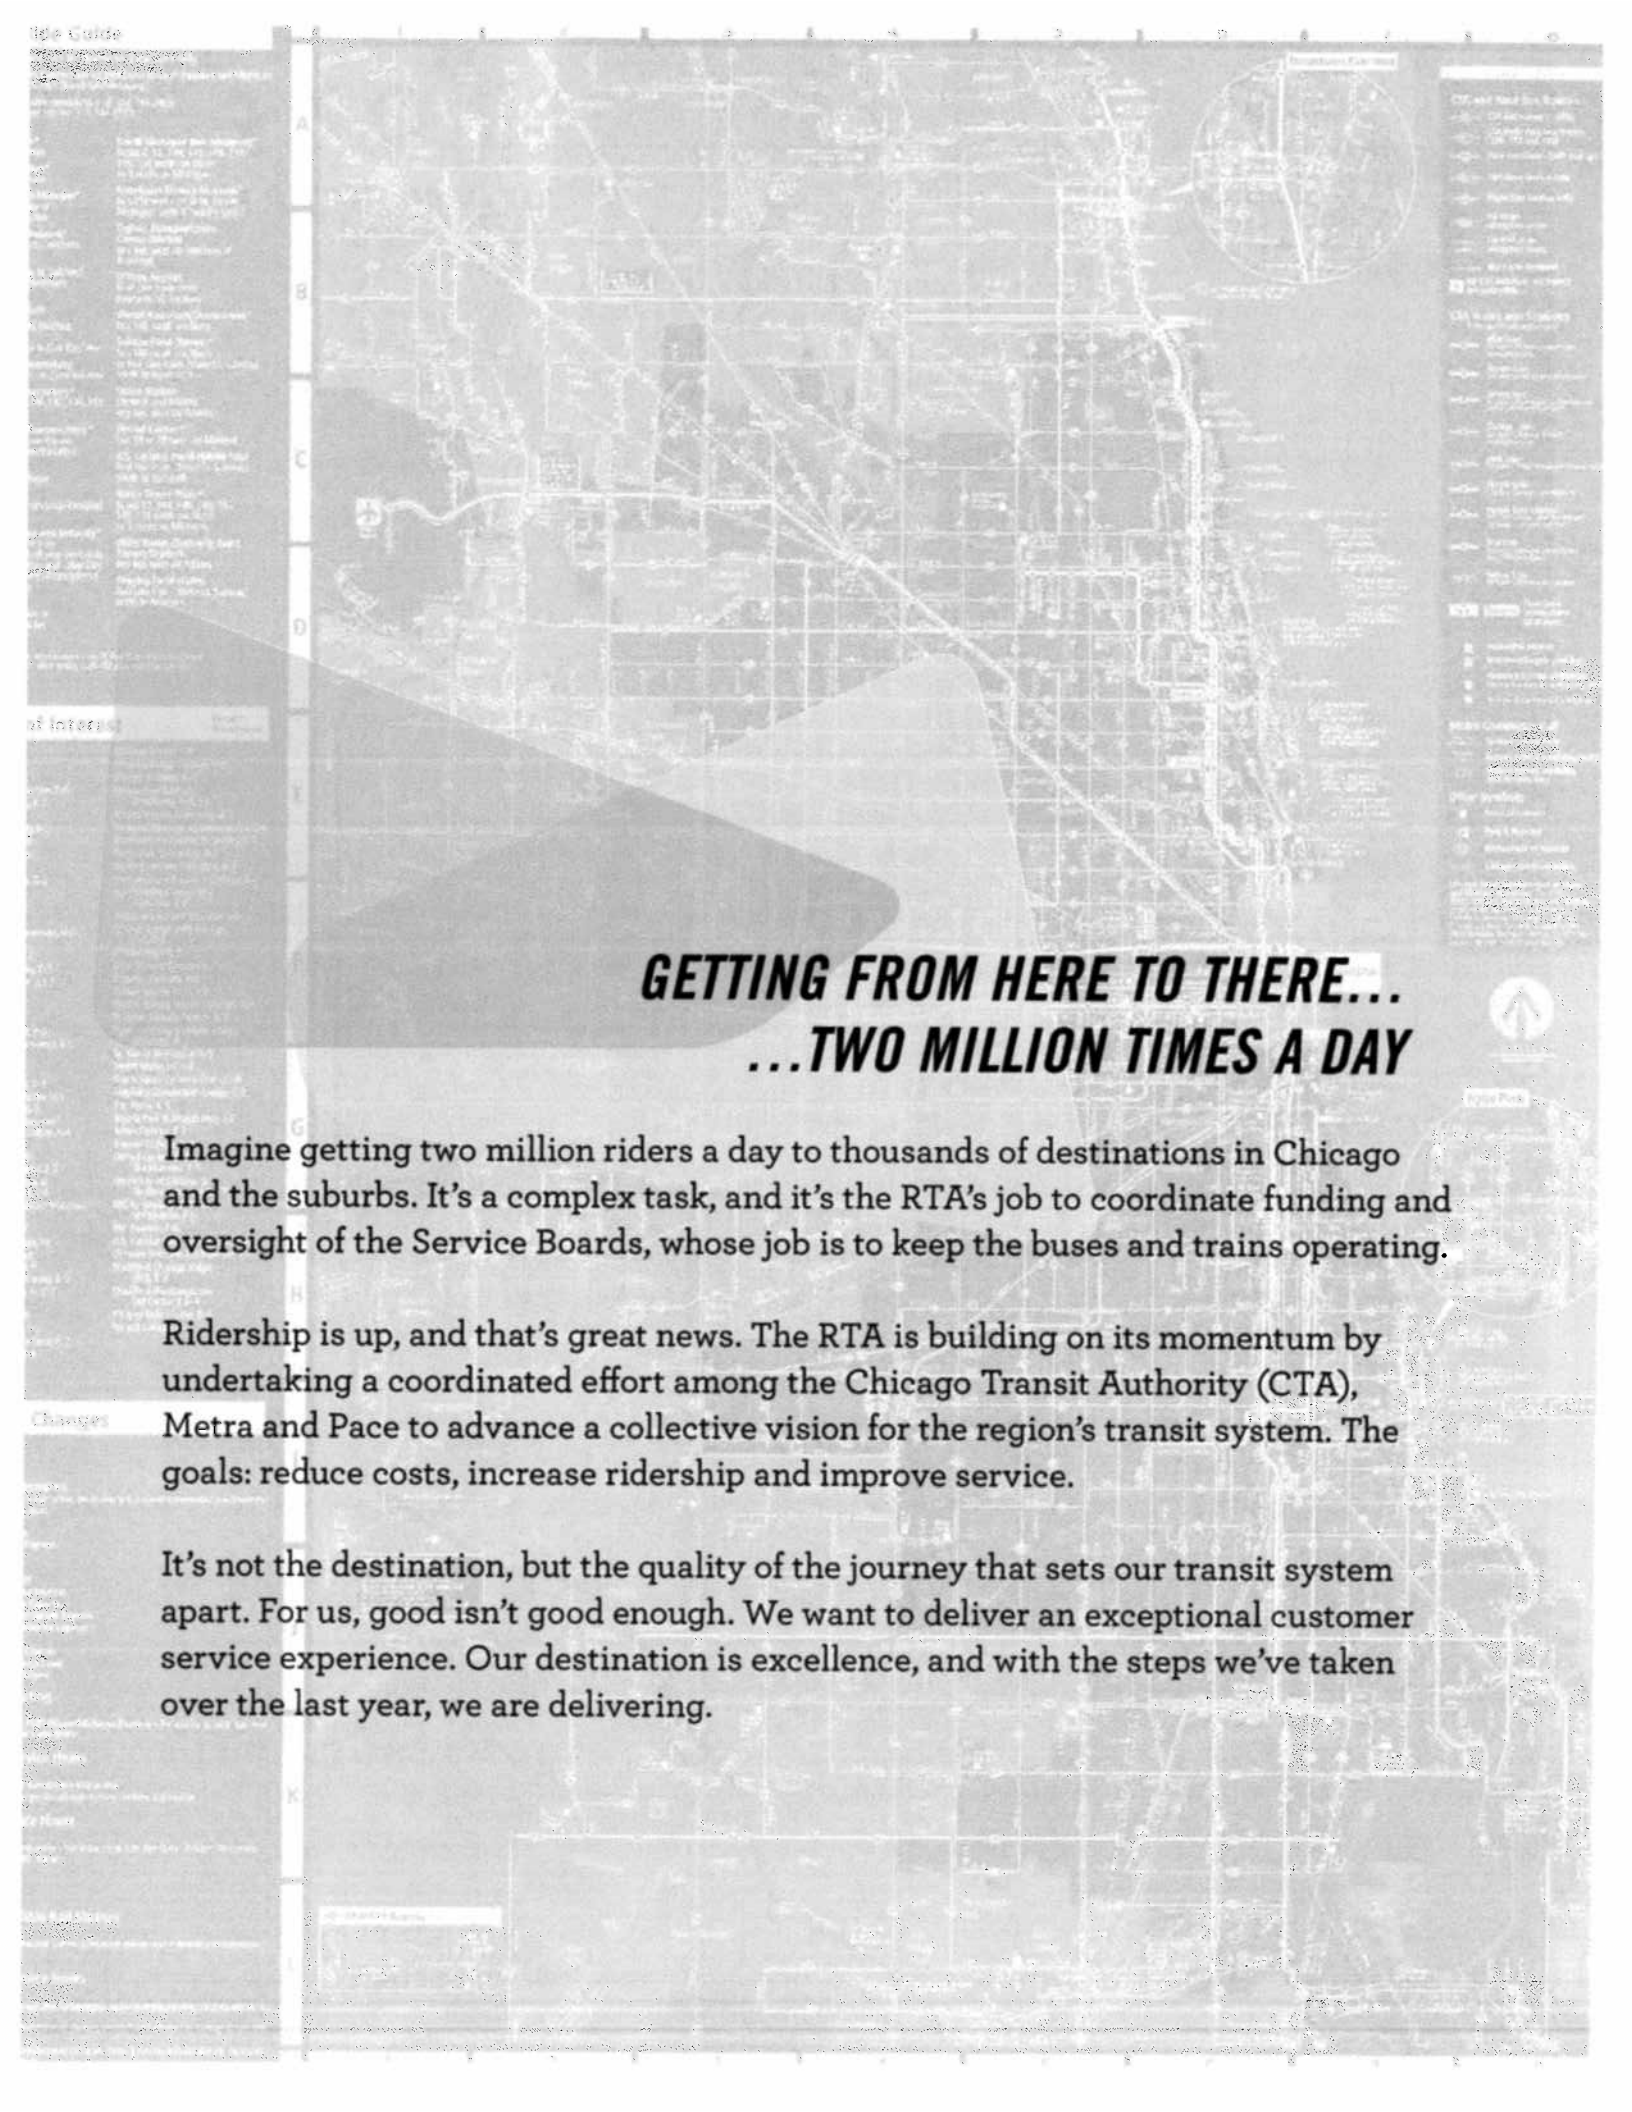
Regional Transportation Authority

The six-county public transportation system serving northeastern Illinois

2011 POPL

Fiscal Year Ended December 31, 2011

DESTINATION: EXCELLENCE



GETTING FROM HERE TO THERE...
...TWO MILLION TIMES A DAY

Imagine getting two million riders a day to thousands of destinations in Chicago and the suburbs. It's a complex task, and it's the RTA's job to coordinate funding and oversight of the Service Boards, whose job is to keep the buses and trains operating.

Ridership is up, and that's great news. The RTA is building on its momentum by undertaking a coordinated effort among the Chicago Transit Authority (CTA), Metra and Pace to advance a collective vision for the region's transit system. The goals: reduce costs, increase ridership and improve service.

It's not the destination, but the quality of the journey that sets our transit system apart. For us, good isn't good enough. We want to deliver an exceptional customer service experience. Our destination is excellence, and with the steps we've taken over the last year, we are delivering.

JOHN S. GATES, JR.
RTA Board Chairman

JOSEPH G. COSTELLO
RTA Executive Director

LETTER FROM THE CHAIRMAN AND EXECUTIVE DIRECTOR

We're happy to report that many more people are using public transportation in Chicago, and that resulted in better news for the region's transit system in 2011. In fact, we experienced the second-highest annual ridership since 1990, just slightly below our peak 2008 levels. Ridership increased 2.9% over 2010, to 651.8 million riders.

While the increases are attributed to skyrocketing gas prices and a slight uptick in the economy and employment, it was nonetheless good news for the CTA, Metra and Pace, collectively known as the "Service Boards." Higher ridership at each Service Board resulted in increased fare revenues. This, in turn, helped offset higher operating expenses, such as fuel, as the Service Boards managed their budgets over the course of the year.

As ridership increases, so does the responsibility of the RTA to our customers. We launched an effort with the CTA, Metra and Pace to operate guided by five priorities in order to advance a collective vision for the region's transit system. Leadership from all three agencies provided input and endorsed this collaborative effort to reduce costs, increase transit ridership and improve service.

The five priorities are:

STRATEGIC CAPITAL INVESTMENT
Paradoxically, one sometimes needs to spend money to save it. This priority will focus on an objective and systemic approach to support capital projects that could result in reductions in operating expenditures and recommending priority projects based on available capital funds.

ECONOMIES OF SCALE
Unifying our purchasing efforts with the three Service Boards and joining with other government agencies could achieve cost savings and improve efficiency with purchases such as fuel, insurance and utilities.

MAXIMIZE USE OF THE TRANSIT SYSTEM
The goal is to attract more riders by better tapping markets that will use the system at non-peak periods and where capacity has not been maximized. By improving coordination in marketing and access to transit, we are exploring opportunities to better reach the reverse commute markets, as well as increasing ridership in the evening and on weekends.

ENHANCED CUSTOMER EXPERIENCE
How do we make the commute more convenient and enjoyable? By focusing on targeted capital and technology related projects that deliver a superior experience, such as Wi-Fi, improved wayfinding signage, expanded service information and fare payment coordination. In serving our customers better, we can increase system usage.

COORDINATED GOVERNMENT AFFAIRS, MARKETING, AND OUTREACH
Pooling our efforts ultimately strengthens our reach. We're coordinating with the CTA, Metra and Pace on customer information and better leveraging our partners and other stakeholders.

As we strive to further improve the customer experience, we continue to advocate for critically needed federal funding that will allow us to achieve a State of Good Repair. Only with the appropriation of increased, stable and long-term funding can we successfully provide the level and quality of service that our two million daily riders deserve. At the state level, we are still faced with delinquent payments that are tied to financial malaise affecting all agencies. We appreciate the efforts of state and federal legislators that support our transit system and who understand that it fuels our regional economy, helps reduce traffic congestion and improves our quality of life.

All of the agencies have been working to achieve efficiencies, but having the five priorities in place will help maximize results and reduce expenses. Specifically, this effort means that the RTA will be able to provide greater mobility, transit that is even more accessible and state-of-the-art technology that will deliver a better overall customer experience.

Thank you for your continued support.

This is the RTA's annual report, formally known as the Popular Annual Financial Report (PAFR). It is intended to help you understand the RTA's role in the provision of public transit to our customers and to taxpayers in the six-county service area of northeastern Illinois. This report does not provide all of the detailed information that is contained in the RTA's Comprehensive Annual Financial Report (CAFR). For those interested in a higher level of financial detail, the 2011 RTA CAFR and 2011 RTA PAFR are available on the RTA's website at http://rtachicago.com/about-the-rta/rta-documents.html.

RTA PROFILE

The Regional Transportation Authority (RTA) is the oversight, funding, and regional planning agency for the three transit operators which serve northeastern Illinois: the Chicago Transit Authority (CTA) bus and rail, Metra commuter rail, and Pace suburban bus and regional paratransit. The agency was created in 1974 upon the approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry, and Will counties. The RTA is a special purpose unit of local government and a municipal corporation of the State of Illinois. From the time of its inception, the RTA's mission has been to ensure financially sound, comprehensive, and coordinated public transportation for northeastern Illinois.

The CTA, Metra, and Pace autonomously manage their respective transit operations. Each is led by a Board of Directors that determines levels of service, passenger fares, and operational policies. The RTA's oversight responsibility is guided by the RTA's Board of Directors, which approves an annual budget, a two-year financial plan, and a strategic plan to guide all the agencies in achieving their common mission of providing a convenient, affordable, reliable, and safe transit system for the region. The Board consists of sixteen members appointed from the six-county region and led by a chairman. The RTA Board is also required to review and approve a five-year capital plan annually, providing a blueprint of the capital activities to be executed by the CTA, Metra, and Pace.

The RTA regional system is the third largest in the country as measured by unlinked passenger trips, with more than two million daily riders. The combined assets of the RTA system are valued at more than $142 billion and include 2,728 buses, 2,419 rail cars, 157 locomotives, and 696 vanpool vehicles. The system covers 7,200 route miles in the six-county region, which currently has a population of approximately 8.3 million.

The annual resources required to operate the region's public transportation system total approximately $2.5 billion. In addition, the RTA system has a five-year capital program funded at approximately $4.4 billion. The following table shows the breakdown of 2011 actual annual operating expenses and the five-year capital program for the Service Boards and RTA.

AGENCY	2011 ANNUAL OPERATING EXPENSES *(in millions)*	2011–2015 FIVE-YEAR CAPITAL PROGRAM *(in millions)*
CTA	$ 1,292.3	$ 2,242.5
Metra	$ 644.3	$ 1,747.1
Pace	$ 179.7	$ 333.5
Pace ADA	$ 128.1	$ 31.7
RTA Agency	$ 32.0	—
Regional (debt, insurance, capital)	$ 245.6	---
TOTAL	$ 2,522.0	$ 4,354.8

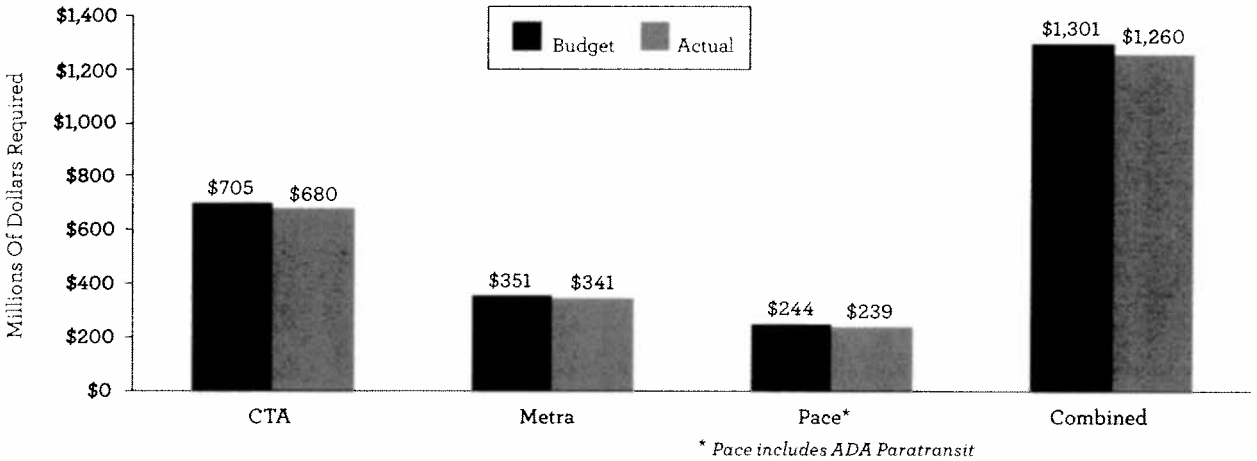
RTA'S FISCAL RESPONSIBILITY

The RTA is not a transit operator, but rather a planning, funding, and oversight agency. Transit services are provided by the CTA, Metra, and Pace, also referred to as the "Service Boards." The relationship of the RTA and the Service Boards is somewhat unique when compared to other major public transit systems around the country.

The Service Boards develop, adopt, and submit to the RTA their own individual annual budgets, which the RTA Board must review, approve, and adopt. The RTA then monitors the financial and operational performance of each Service Board on a monthly and quarterly basis to ensure compliance with their adopted budgets. In the event of significant non-compliance to budgetary goals, the RTA may require a revised budget to be submitted by the Service Board. This review can even lead to the withholding of up to 25% of regional sales tax funding from the Service Board until the RTA is satisfied that the revised budget is back in compliance.

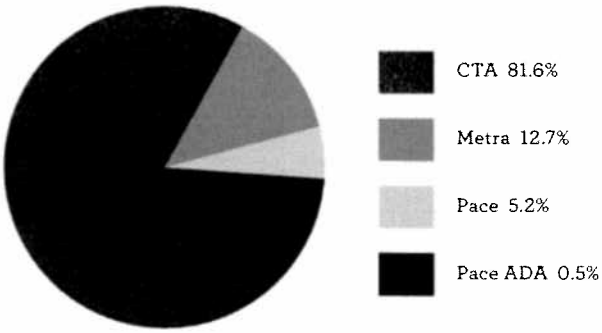
The Service Boards' 2011 budgets were developed with the ongoing weak economic environment in mind. As 2011 progressed, the regional employment picture began to improve and ridership exceeded projections at all three Service Boards. Higher fuel prices impacted Metra's expenses to the extent that the RTA required an amended 2011 Metra budget using the process described above. For the full year, all three Service Boards had operating deficits that were favorable to final budgets by a combined $71 million, allowing for the transfer of some Service Board funds to support needed capital projects.

2011 SERVICE BOARD OPERATING DEFICITS (FUNDING REQUIREMENTS)



** Pace includes ADA Paratransit*

2011 RIDERSHIP SHARE BY SERVICE BOARD: 651.8 MILLION RIDES



SERVICE DELIVERY AND RIDERSHIP

Higher gas prices and a slowly improving economy in 2011 led to the second-highest annual ridership since 1990, just slightly below 2008 levels. The RTA system carried a total of 651.8 million riders, an increase of 2.9% from 2010.

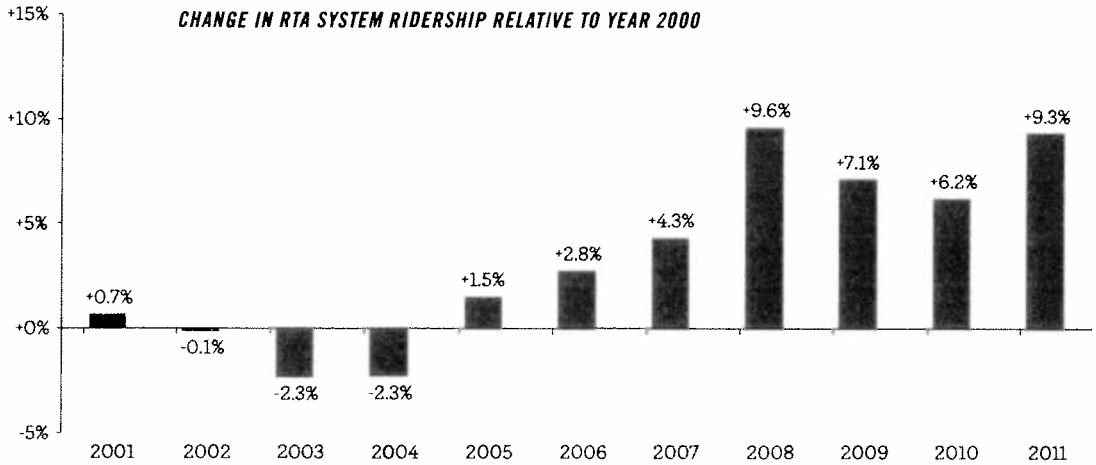
The CTA, with weekday ridership of more than 1.6 million, carries the largest number of customers in the RTA system, but on relatively short urban trips. Its bus and rail operations comprise the nation's second largest transit agency, with service to the City of Chicago and 40 surrounding suburbs. The CTA was created by the Illinois State legislature in 1947 and became the predominant operator of Chicago transit after purchasing the Chicago Motor Coach system in 1952. It is governed by the 7-member Chicago Transit Board.

Metra was formed in 1983 and is responsible for the day-to-day operations of the region's commuter rail system. With 11 rail lines extending to the limits of the six-county area, it is geographically the largest commuter operation in the United States. Metra has weekday ridership of more than 300,000 with an average passenger trip distance of about 23 miles. It is governed by an 11-member Board of Directors.

Pace began service in 1984 and provides fixed-route bus, demand-response "dial-a-ride," and vanpool services within and between the suburbs and the City of Chicago. Pace is also responsible for ADA paratransit service for the entire region. Pace's weekday ridership is in excess of 125,000, with over 12,000 of those rides provided on ADA paratransit. Pace is governed by a 13-member Board of Directors.

Over the course of the last decade, total RTA system ridership dipped in the wake of the 2001 recession, then recovered and peaked in 2008 prior to the financial crisis, when gasoline prices were near record high levels. The 651.8 million trips taken in 2011 were 55.6 million more than year 2000 levels.

CHANGE IN RTA SYSTEM RIDERSHIP RELATIVE TO YEAR 2000



OPERATING CHARACTERISTICS

CHICAGO TRANSIT AUTHORITY

Rapid Transit

8 rail routes
143 stations served
1,142 rapid transit cars
221.6 million riders per year
1,598 STO* positions

Motor Bus

140 bus routes
1,780 buses
310.4 million riders per year
3,710 STO* positions

CTA Totals

1.4 billion rail passenger miles per year
712.9 million bus passenger miles per year
116.7 million vehicle revenue miles per year
3,784 without STO* positions

**STO is Scheduled Transit Operators. This classification includes bus operators, motormen, conductors and customer assistants.*

METRA COMMUTER RAIL DIVISION*

11 rail routes
487.7 route miles
1,155 miles of track
241 stations
157 locomotives
1,086 passenger cars
191 electric cars
703 weekday trains operated
95.9% on-time performance
82.7 million riders per year
4,380 full-time employees
1.6 billion passenger miles per year
42.9 million vehicle miles per year

**All data excludes NICTD South Shore*

PACE SUBURBAN BUS DIVISION

Fixed Route Bus

137 regular routes
35 feeder routes
15 shuttle routes
579 vehicles in use at peak
30.6 million riders per year
7 seasonal routes
589 Pace-owned buses
1,416 full-time employees

ADA Paratransit

212 vehicles in service
3.4 million riders per year
36 full-time employees

Dial-A-Ride

68 local services
157 vehicles in service
210 communities served
1.2 million riders per year

Vanpool

696 vanpools in operation
1.8 million riders per year

SYSTEM INITIATIVES

The following initiatives demonstrate how the RTA is coordinating to increase ridership and efficiencies while reducing expenses. Here are updates on these programs:

WAYFINDING AND INFORMATIONAL SIGNAGE

As you are getting off of a Metra train, would you know how to find a CTA or Pace bus to get you to your final destination? Having easily understandable signage to help riders transfer between transit systems enhances the customer experience. It makes the commute easier, and could potentially increase ridership between CTA trains and buses, Metra trains and Pace buses.

Interagency Transit Passenger Information Design (ITPID) is a project to provide coordinated information at major transit locations to promote seamless regional travel between CTA, Metra and Pace. It is funded by a grant from the Congestion Mitigation and Air Quality (CMAQ) program. The grant covers design and installation of wayfinding and informational signage.

As part of the ITPID pilot site work, the RTA formulated interagency design standards in consultation with the CTA, Metra and Pace. In 2011, after extensive user testing and feedback, manufacturing of the signage began. Four pilot sites for signage installation include:

- 95th Street and Western Avenue (for CTA and Pace buses)
- The Van Buren Street Station in Chicago (for CTA bus and rail, and Metra)
- The Davis Street Station in Evanston (for CTA bus and rail, Metra and Pace)
- Union Station in Joliet (for Metra and Pace)

The pilot sites will enable the RTA to get feedback from riders about the content and design of the signs and maps. Also being reviewed are the physical materials used to construct the signs, from the hardware that secures them to how the materials stand up to the weather. As feedback is gathered, changes will be made to refine the signs and maps, which will be reflected in finalized interagency design standards.

Also during 2011, other elements completed include:

- RTA System Maps were updated at Union, Ogilvie and LaSalle stations.
- A $3.3 million CMAQ grant was received by the RTA for 19 additional ITPID locations.
- Area Maps were added to Union Station.
- The Union Station Downtown Connection Signage Plan was completed by RTA, CTA, Metra, Amtrak and Jones Lang LaSalle (Union Station's Property Manager). Signage installation is underway in 2012.

Signs installed in spring of 2012.

SENIORS RIDE FREE PROGRAM TRANSITION

In 2011, Governor Pat Quinn signed Senate Bill 3778 to amend the RTA Act allowing only low-income seniors (aged 65 or older) to continue riding free on fixed-route service operated by the Chicago Transit Authority (CTA), Metra and Pace. All other seniors ride at reduced fares.

The RTA worked with all three Service Boards to transition the Seniors Ride Free program. Tasks included communicating the changes and ensuring that seniors who qualified would be able to continue free rides without interruption. Under the new program, seniors had to be registered in the Illinois Department of Aging's Circuit Breaker Program to qualify for free rides. Income eligibility amounts set by the Circuit Breaker Program determine if a senior can continue to ride for free.

The RTA worked with the Illinois Department of Aging to determine which seniors enrolled in the Circuit Breaker program would be eligible for free rides on the region's transit system. The RTA sent out new fare cards, with 85,000 permits issued to qualified seniors to allow them to continue free rides. Another group of 348,000 seniors received Reduced Fare permits.

Partnering with the Service Boards helped the RTA seamlessly transition seniors to a program that is now based on income eligibility. This change allows low-income seniors to continue receiving this important benefit.

The program became effective September 1, 2011. Currently, there are more than 433,000 seniors enrolled in the free ride and reduced fare programs.

Field work was done on Pace Suburban Bus service in the spring of 2011 and CTA and Metra services in the fall and winter of 2011. Analysis and reporting of the results took place in 2012. These results are being used to help management allocate resources based on customers' priorities.

The CSS was undertaken to satisfy the State legislature's reporting requirements, and will be conducted on a regular basis every two years. This will enable the RTA and Service Boards to keep a "finger on the pulse" of the issues that transit customers think are important.

CUSTOMER SATISFACTION SURVEY

Keeping transit customers satisfied is vital to keeping ridership up; knowing where customers are dissatisfied is key to guiding management priorities and investments from a customer perspective. That's why the RTA oversaw the first region-wide Customer Satisfaction Survey (CSS) in 2011.

This coordinated CSS was conducted with each of the three Service Boards – CTA, Metra and Pace. Previously, each Service Board would do its own survey. This year marked the first time the survey was a regional effort, designed to allow for standardization of information where appropriate, without losing depth of analysis at the Service Board level.

The RTA CSS project began in 2010 with the goal of coordinating the individual customer satisfaction surveying efforts of each of the Service Boards into one unified approach. A common questionnaire was developed incorporating the similar elements of each of the Service Boards' individual surveys. It addressed the areas of travel time, reliability, safety, security, communication, cleanliness, comfort and employee performance. In addition, the survey was broadened to include questions regarding regional mobility issues and the interconnectivity of services. Each Service Board also included unique questions that were applicable to its individual service operations.

This successful collaborative work among the Service Boards and the RTA was done to improve the quality of customer satisfaction data and analysis, while realizing cost savings by merging the CSS into one project. The ability to analyze service from a regional perspective and gain an understanding of the way the Service Boards' combined services address the mobility needs of the region's residents were important aspects of this undertaking.

REGIONAL ACCESSIBILITY INITIATIVES

Travel independence is vital to older adults, riders with disabilities and others who rely on public transportation to meet some or all of their mobility needs. The RTA's Regional Travel Training Program provides instruction (either one-on-one or in a group setting) to help these riders learn to ride CTA, Metra or Pace routes independently.

This program, as well as the ADA Paratransit Certification Program, is operated by the RTA's Regional Accessibility Division. Formed in 2011, the Division was created as a focal point for programs designed to enhance mobility. This regional priorities initiative speaks to maximizing use of the transit system.

The Regional Travel Training Program offers both one-on-one and group travel instructions for people with disabilities and older adults who wish to use fixed route transit services for some or all of their trips. This encourages people to use existing transit services and reduces their reliance on having to arrange curb-to-curb ADA Paratransit service.

The RTA Travel Training Program features one-on-one training tailored to an individual rider who has physical, visual, intellectual and/or memory related disabilities. One of the five trainers will literally ride with the participant, showing him or her the exact route, how to transfer if needed, how to

access transit using mobility devices and address any other accessibility concerns during their commute. The Group Travel Training Program provides classroom training at agencies throughout the region that serve people with disabilities and/or older adults and gives an introductory education on how to use accessible fixed route transit services. This program provided transit orientation for more than 2,000 people throughout the RTA service area in 2011.

The Division also manages the ADA Paratransit Certification Program, which determines eligibility for using the region's ADA Paratransit service. ADA Paratransit provides origin to destination service for people with disabilities who are unable to use fixed route service. In 2011, the ADA Paratransit Certification Program received 13,891 applications, a 10% increase over 2010. Recently, a team of national experts conducted a comprehensive review of this program, and found it to be "very well designed and administered" with several components described as "best practices" nationally.

Additionally, last year the Division began laying the foundation for development of a regional mobility management initiative to identify and foster transportation options for customers throughout the RTA service area. The Division also spearheaded a Regional Priority Seating Signage Project to develop a new set of policy and marker signs to help the public identify seating areas that are designated for use by people with disabilities and seniors. Installation of the signs began in late 2011 and will continue through 2012.

FTA GRANT FOR STATE OF GOOD REPAIR

Maintaining transit system assets in a State of Good Repair is a daunting task. With the help of an $800,000 Transit Asset Management (TAM) grant, the RTA is enhancing the development of two projects that will help transit agencies across the country in this endeavor.

The Federal Transit Administration (FTA) awarded the RTA a one-time grant to advance TAM nationally. The first enhancement is developing a how-to manual for conducting an asset condition assessment. This guide provides information on how to inventory and categorize assets, assess their conditions, and determine the cost of bringing a system into a State of Good Repair. The manual will be ready by the end of 2013, and the FTA will share this information with other transit systems in the United States.

The grant will also provide for the enhancement of a Capital Decision Prioritization Support Tool that the RTA is developing. This technology-based solution is all inclusive in terms of capital asset data. It will allow for various criteria (i.e., asset condition, cost constraints, safety and reliability, ridership impact) to be input into a software program, and the system will help prioritize which projects to advance in order to optimize limited resources. This information is critical so that projects can be ranked in order of importance when capital is limited. Using this tool, transit agencies are better able to spend scarce funds on projects that will have the most impact on riders. The grant funding is allowing the RTA to improve the decision tool by adding additional capabilities. The program is in its final development phase, and supports the regional priorities initiative for strategic capital investment.

The TAM grant was awarded partially because both RTA projects were already in development. Upon completion, both the Asset Condition Assessment Update and the Capital Decision Prioritization Support Tool will serve as a blueprint for other national transit systems.

SALES TAX LAWSUIT/LEGISLATION

In August 2011, the RTA filed suit in the Circuit Court of Cook County to recoup more than $100 million of revenue lost to tax avoidance scams operating in the municipalities of Kankakee and Channahon. The lawsuit arises from the utilization of tax sharing agreements which have induced companies operating within the six-county RTA region and across the State to claim that their sales are sourced through sham offices set up in Kankakee and Channahon. Under these agreements, the two municipalities kick back a large portion of their local share of the statewide sales tax to participating companies. These companies do not create jobs, promote economic development or have any operations in Kankakee or Channahon.

Other than the State of Illinois, the RTA is the largest recipient of sales tax revenue, and depends on this source for almost 50% of its funding. These tax avoidance scams are costing the RTA millions in lost revenue every year. The RTA Executive Director Joe Costello stated that, "This case is about fairness. Businesses that utilize our transit system because their company and their employees are located in our service area should pay their proper share of taxes, and not try to shift that burden on to others." Since the initial lawsuit by the RTA and Cook County, the City of Chicago and a host of other municipalities have joined the RTA lawsuit.

At the heart of the suit is the issue of where a sale is "sourced." Unlike most states, Illinois imposes its sales tax at the location where the seller operates its business, not the location where the buyer is. The distinction doesn't matter when a sale is made over the counter, because the sale is simply sourced at the store. If the buyer and seller are at different locations when a sale happens, however, the sourcing rules are vague and have allowed corporations to play games with them. The location of where the tax is collected determines not just the rate of sales tax that applies, but also which local government gets a portion of the tax collected.

The difference in sales tax rates occasionally leads a company to relocate, and in Illinois a municipality is allowed to compete for that business by offering to share sales tax revenues if the company moves inside its borders. Legislation passed in 2004 forbids any municipality from entering into a tax sharing agreement with a company if that company isn't engaged in any legitimate business within the municipality and should be rightfully paying its taxes to another local government. Aggressive tax consultants have set up shop in Kankakee and Channahon to provide a local address and phone number to businesses that actually operate in other cities around the state, including Chicago. In exchange for falsely claiming that their sales were made by these do-nothing consultants, participating companies are rewarded with 75-85% of the local sales tax with the tax consultants taking a hefty cut off the top.

As RTA Chairman John Gates noted in the press release, "[The lawsuit] is an attempt by the RTA Board to fulfill its fiduciary responsibility to our riders by collecting every penny that is owed to the transit system. We would prefer not to go to court, but these municipalities, and others engaged in this practice, have made it clear that they will not stop unless we make them." The case is making its way to trial.

To ensure that the public has access to the sales tax rebate agreements (such as those entered into by Kankakee and Channahon with tax consulting firms), the RTA worked diligently to pass House Bill 3859. It requires municipalities to publicly disclose all of the details of their tax rebate agreements – including the names of retailers and the terms of each deal.

TECHNOLOGY LEGISLATION

In spring 2011, the Illinois Legislature amended the Regional Transportation Authority (RTA) Act to enhance the use of technology across the RTA system and make it easier for customers to transfer between Service Boards. This regional priorities initiative speaks to achieving economies of scale.

Specifically, the legislation requires RTA to:

- Have obtained real-time vehicle arrival information from all three Service Boards by July 1, 2012.
- Implement a regional fare payment system that allows customers to pay fares using contactless credit, debit and prepaid cards on all fixed-route transit service by January 1, 2015.
- Recommend a regional interagency fare policy by January 1, 2013.
- Submit a report to the Governor and General Assembly on the feasibility of implementing Wi-Fi on fixed-route transit.

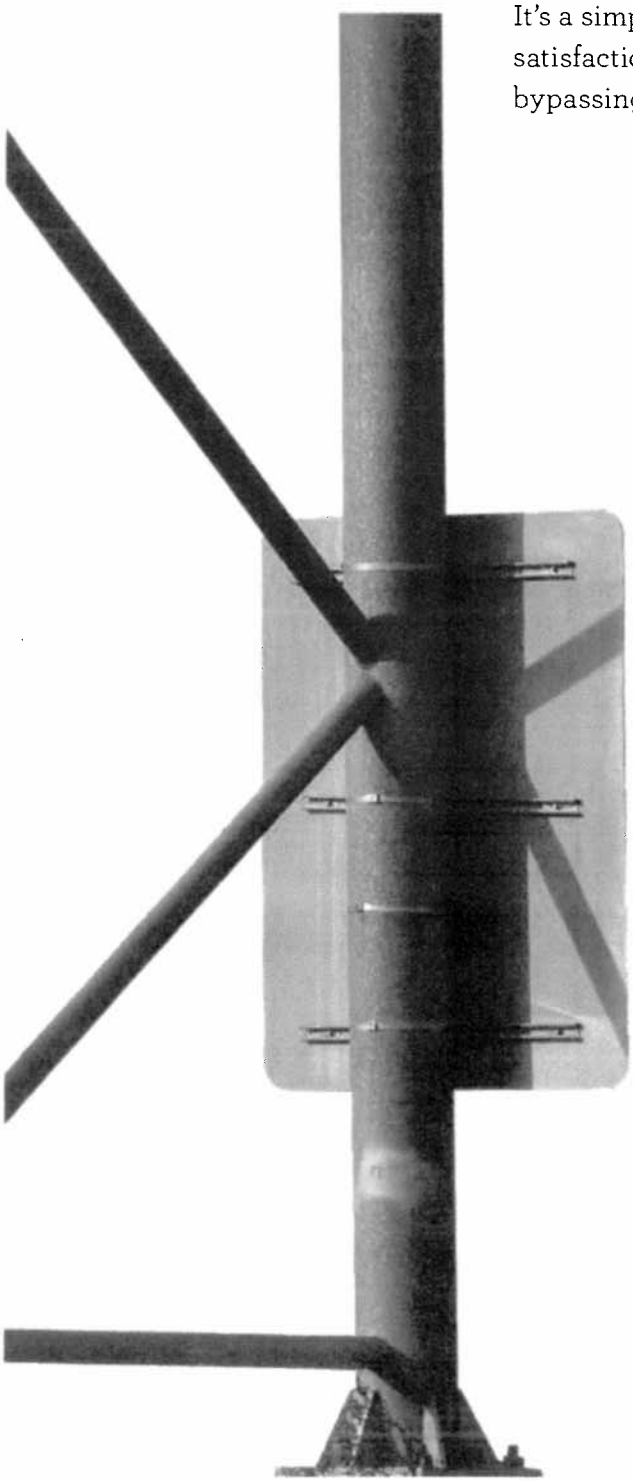
RTA, in collaboration with the Service Boards, made significant strides in meeting the requirements of the legislation in 2011.

- Using a data feed provided by CTA, RTA was able to make CTA BusTracker and TrainTracker real-time information available on goroo® (www.goroo.com), the region's transit travel information website. Additionally, in December 2011, RTA and Pace began developing a real-time vehicle arrival data feed from Pace's Intelligent Bus System.
- A regional working group led by RTA, with representatives from CTA, Metra and Pace, began developing a regional fare model that will evaluate the ridership and revenue impacts of potential enhancements to existing interagency fare products and policies.
- A report on the feasibility of adding Wi-Fi to all buses and trains was submitted to Governor Quinn and the Illinois General Assembly in December 2011. The report concluded that supplementing cellular data networks with Wi-Fi on Metra commuter trains, at Downtown Metra stations and Pace's express buses has the potential to enhance the customer experience and increase transit ridership.

Implementing the customer focused technologies required by the legislation will help achieve the region's priorities by enhancing the customer experience and increasing transit ridership.

SHOULDER
pace
BUSES
ALLOWED
5AM-9AM
MON-FRI

I-55 BUS ON SHOULDER



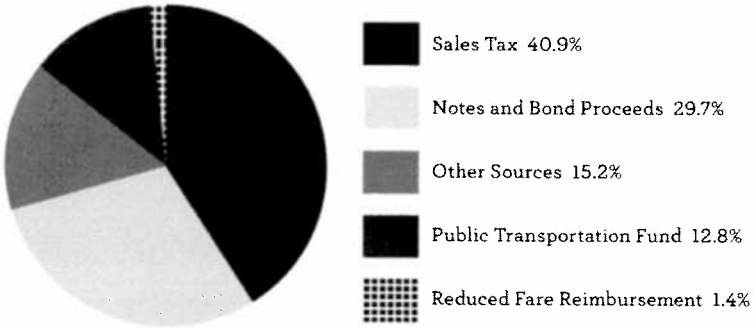
It's a simple idea that can decrease commuting times and increase rider satisfaction: run selected bus routes on the shoulder of the interstate, bypassing rush hour traffic.

The RTA led a planning effort for Bus On Shoulder operations on the I-55/Stevenson Expressway operated by Pace. Following the completion of that planning study, on November 14, 2011, the RTA, IDOT, and Pace, in coordination with the Illinois State Police (ISP), launched a two-year pilot demonstration of transit bus operations on the I-55/Stevenson Expressway shoulder as a priority treatment for transit under congested highway conditions. This demonstration adds transit as an allowed use to the I-55/Stevenson Expressway shoulders roughly between Kedzie Avenue and I-355. This shoulder option is an added feature of Pace routes 755 and 855 that can be used on an as-available basis and at the bus driver's discretion. The purpose of this pilot is two-fold: to determine whether using the highway shoulder for transit can improve transit service while maintaining the primary function of the shoulder and overall traffic safety; and to capitalize on the capacity of the existing urban transportation system.

This regional priorities initiative speaks to enhancing the customer experience. So far, the results have been positive. Some riders reported saving up to 30 minutes during their commutes. But more important to riders is that travel time reliability has improved. As a result, ridership on these Pace routes is at historical highs.

Although using highway shoulders for transit is a new concept in Illinois, Bus on Shoulder is successfully operating in a number of major metropolitan areas around the country such as Minneapolis-St. Paul and Cincinnati. The advantage of a Bus on Shoulder Program is that the major capital facilities are already in place and it is unlikely to have major environmental or community impacts. It is generally a low cost, quick-to-implement capacity addition that does not require costly expansion of the highway.

2011 RTA REVENUE BY SOURCE: $2.386 BILLION*



* *Includes $709 million of financing proceeds.*

FUNDING PUBLIC TRANSPORTATION

REVENUE SOURCES

The RTA's primary source of operating funding is a regional sales tax which is matched by the State of Illinois via the Public Transportation Fund (PTF). A reduced fare reimbursement also comes from the State and is passed through to the Service Boards to help offset the revenue lost from various mandated fare programs such as those for the elderly, disabled persons, and students. The "Other Sources" revenue category shown in the chart includes items such as additional assistance from the State, investment income, and contributions from local governments. An additional category, Note and Bond Proceeds, has been shown here in order to reflect income associated with debt refinancing undertaken in 2011.

As the economic recovery gained traction in 2011, total RTA sales tax receipts increased 4.7% from 2010 to $975.7 million, exceeding budget projections. The "Other Sources" category was sharply higher in 2011 as State funding for capital projects was received by the RTA for distribution to the Service Boards. As a result, overall 2011 RTA revenues increased by 12.1% from 2010. Note and Bond Proceeds more than doubled in 2011 as the RTA took advantage of low interest rates to refinance existing debt.

Over the last 5 years, the RTA has experienced a steady increase in total revenues, driven by the increase in sales tax funding for public transit which took effect in 2008. This tax increase was necessary to ensure the sustainability of the RTA

RTA REVENUE BY SOURCE, DECEMBER 31, 2011 AND 2010 (in thousands)

	2011	2010	CHANGE

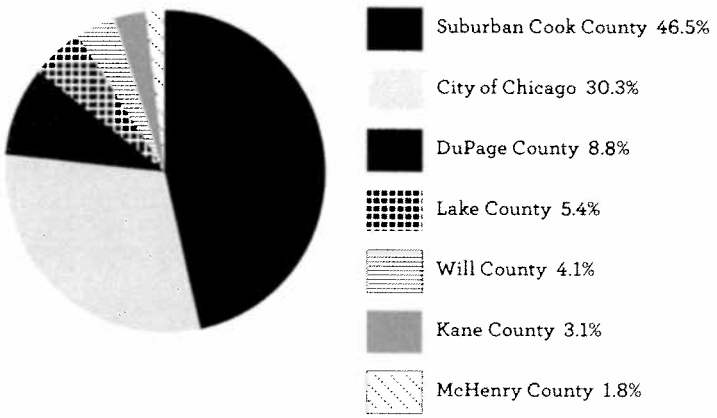
2011 RTA SALES TAX REVENUE BY COUNTY: $975.7 MILLION



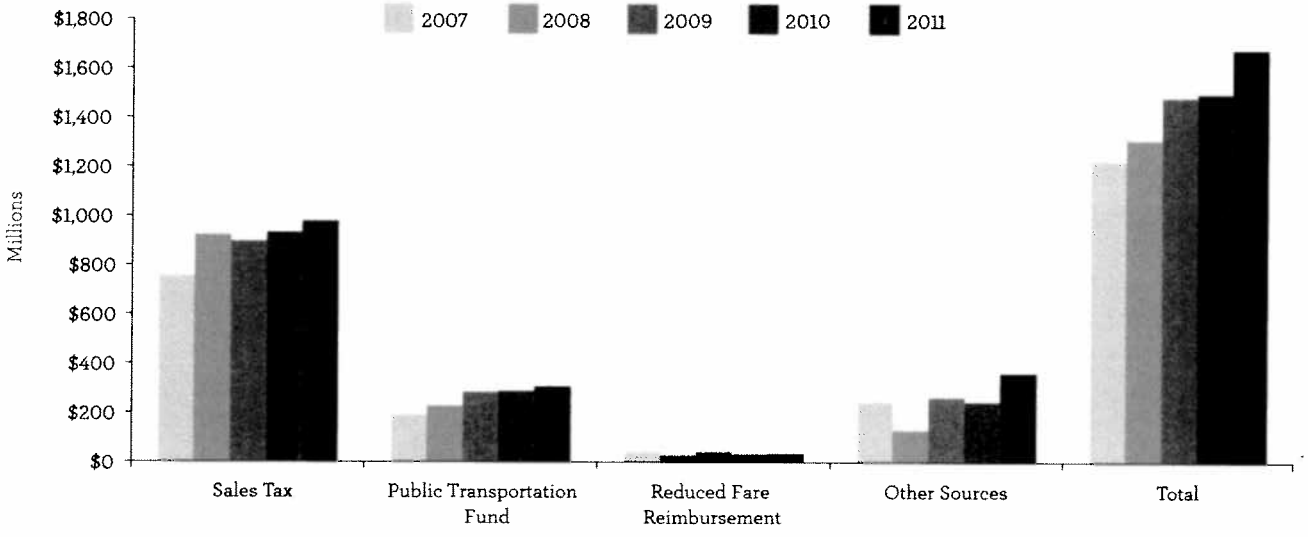
system and clearly helped the RTA weather the subsequent economic downturn. Because it is a sales tax match, the PTF increased in line with sales tax. The State Reduced Fare Reimbursement was flat across the period, while the "Other Sources" category fluctuated from year to year due primarily to the timing of the release of capital funds by the State.

SALES TAX BY COUNTY

The RTA sales tax is imposed region-wide, but at differing rates to reflect the differing levels of transit service provided throughout the constituent counties. In 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate from 1.0% to 1.25% in Cook County and from 0.25% to 0.5% in the collar counties of DuPage, Kane, Lake, McHenry, and Will. In practical terms, this means that on a $50 purchase, some of the sales tax paid goes directly to the funding of public transit; 62.5 cents for residents of Cook County, and 25 cents for residents of the collar counties.

This same Act also designated an increase of the Real Estate Transfer Tax (RETT) within the City of Chicago to directly fund the CTA, and raised the portion of RTA sales tax and RETT revenues matched by the state PTF from 25% to 30%.

5-YEAR TREND OF RTA REVENUE SOURCES* (in millions)



* *Excludes financing proceeds for all years.*

WHERE RTA EXPENDITURES GO

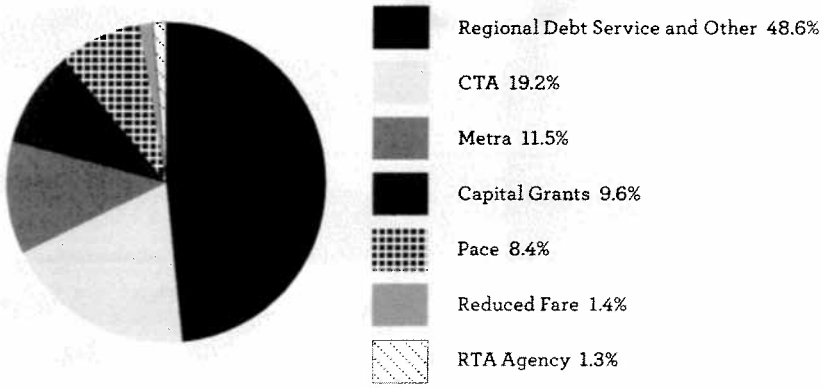
As stated in the previous section, the primary source of funding for public transportation in the region is sales tax. More than 85% of the public transportation sales tax collections pass directly through the RTA to the CTA, Metra, and Pace according to pre-determined, statutory formulas. The remainder of the sales tax is initially retained at the RTA along with revenues from the Public Transportation Fund and additional state funding.

After funding the RTA's own administrative costs, regional services, special programs, and debt servicing, the remainder of the retained sales tax and PTF is distributed to the Service Boards on a discretionary basis and within the context of their annual budgets. The Service Boards also generate fare revenue from their customers and have other direct funding sources such as the RETT, which, when combined with the funds flowing from the RTA, covers the cost of providing service.

Financial assistance provided by the RTA to the Service Boards, both statutory and discretionary, increased in 2011, enabled by increased sales tax revenues. The Reduced Fare Reimbursement pass-through from the State also increased slightly, while Capital Grants expenditures increased significantly as more State capital funding became available. The "Regional Debt Service and Other" category was sharply higher, as the RTA took advantage of low interest rates and re-financed its existing debt. The payoff of principal related to this refinancing was a one-time expense which caused the 2011 share of this expenditure category to be much larger than normal. As a result of the re-financing, overall 2011 RTA expenditures increased by over 71% from 2010.

Over the last five years, the RTA has increased the financial assistance provided to the Service Boards while the State Reduced Fare Reimbursement remained fairly flat across the period. The increase in financial assistance occurring in 2008 was related to the new RTA funding legislation passed by the State of Illinois in that year. Capital grant expenditures were flat until 2011, while Regional Debt Service and Other expenditures had been trending steadily higher until the sharp 2011 increase related to debt re-financing.

2011 RTA EXPENDITURES: $2.522 BILLION



RTA EXPENDITURES BY SOURCE, DECEMBER 31, 2011 AND 2010 (in thousands)

	2011	2010	CHANGE

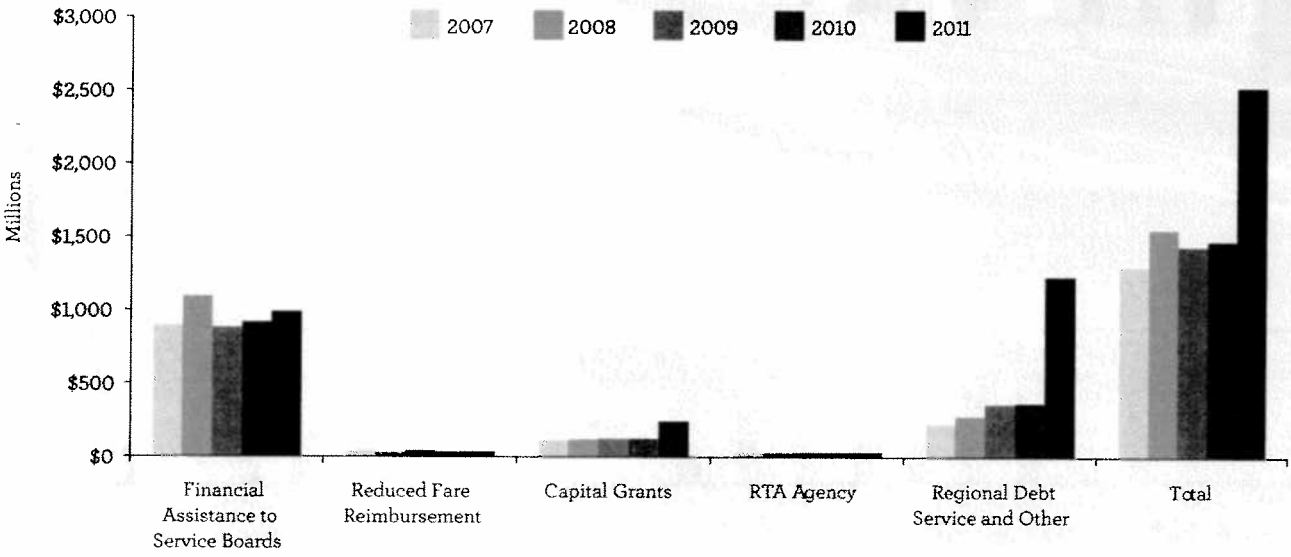
5-YEAR TREND OF RTA EXPENDITURES BY CATEGORY

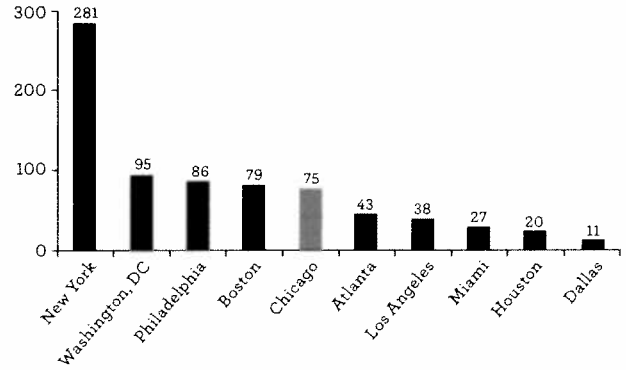


PERFORMANCE MEASUREMENT AND PEER COMPARISONS

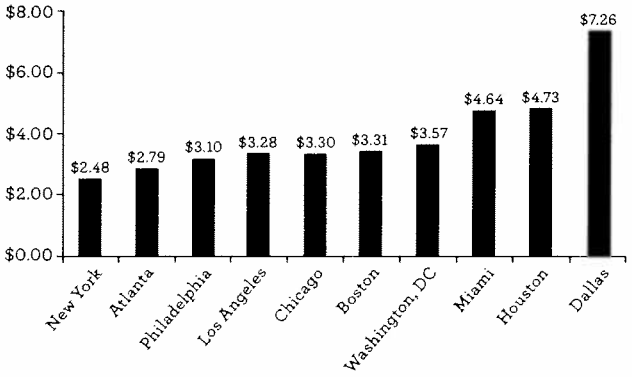
The 2008 legislation which increased funding for public transit in northeastern Illinois also required the RTA to evaluate the impact and effectiveness of public transit in the region. A performance measurement system has been developed which includes a regional peer report card, in which the RTA compares the combined performance of the Service Boards to carefully selected peer agencies in the other nine largest U.S. metropolitan areas.

The National Transit Database (NTD) is used to measure regional performance relative to peers in fifteen metrics across four broad areas; Service Coverage, Service Efficiency and Effectiveness, Service Maintenance and Capital Investment, and Service Level Solvency. For 2010, the latest year for which NTD data are available, the RTA region ranked as well as or better than its peers in fourteen of the fifteen measures. A sample of these 2010 regional peer comparisons is included on this page.

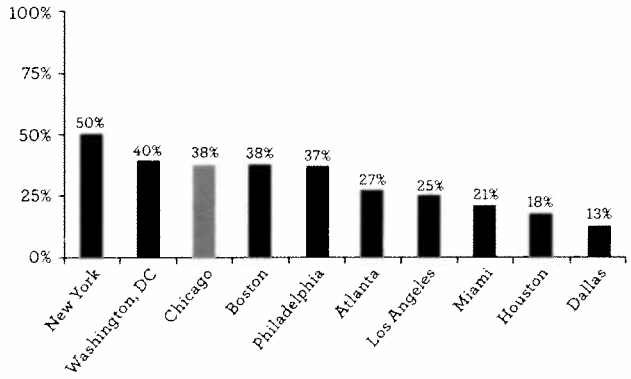
ANNUAL PASSENGER TRIPS PER AREA RESIDENT – 2010



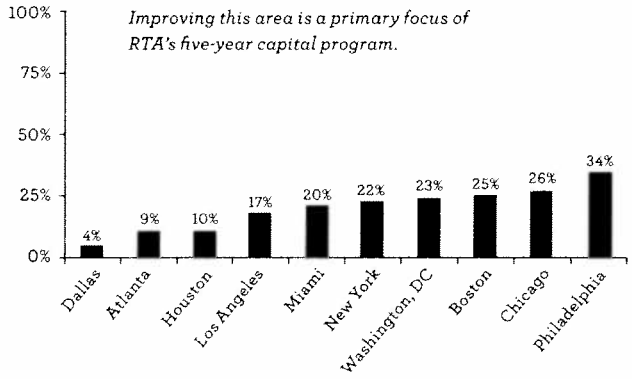
OPERATING COST PER PASSENGER TRIP – 2010

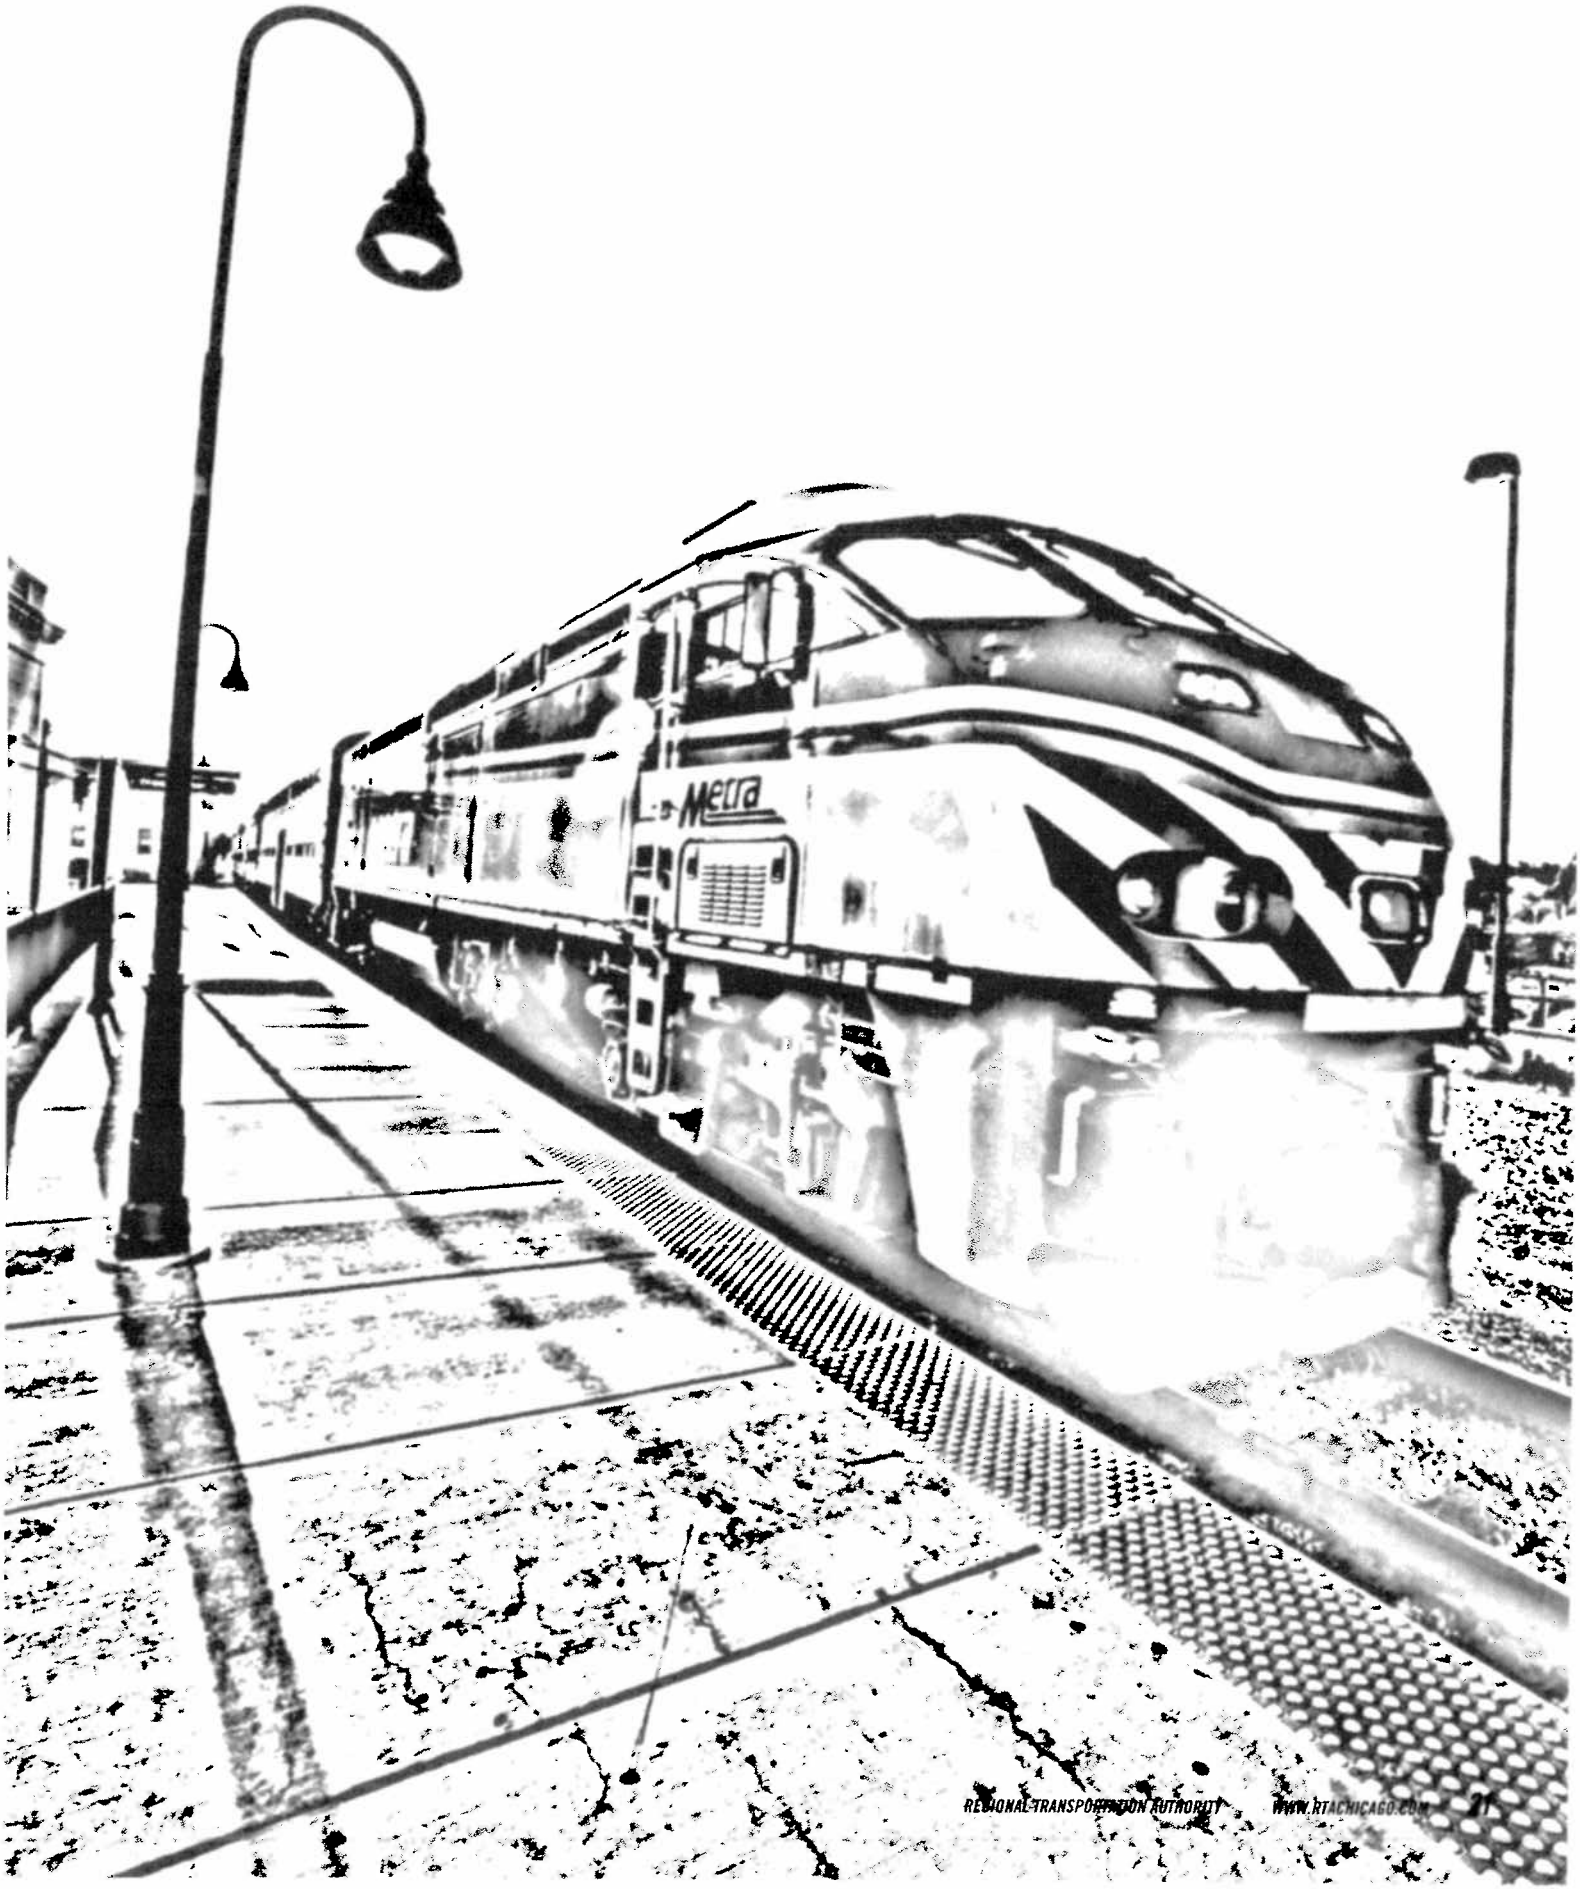


FARE RECOVERY RATIO – 2010



PERCENT OF VEHICLES BEYOND USEFUL LIFE – 2010





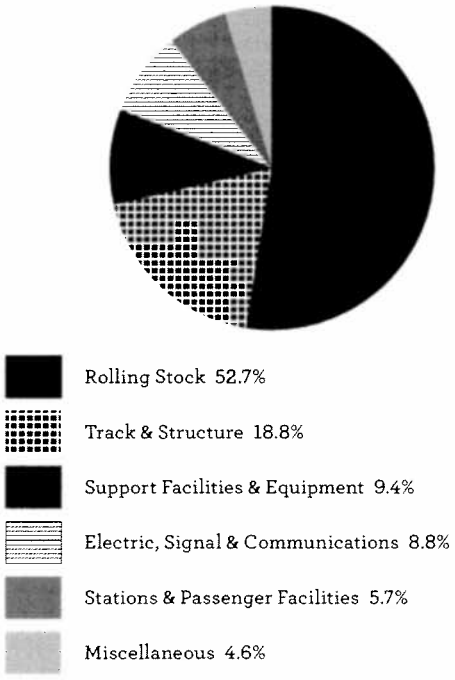
Metra

CAPITAL PLAN

With over $142 billion in assets, the infrastructure of the RTA system is comprised of everything from buses to locomotives to railroad tracks to bridges to subway tunnels. Such an extensive system is very expensive to maintain. More than $1 billion per year is required just to preserve the existing system, as the RTA and Service Boards continuously strive to achieve a State of Good Repair.

The funding sources for the RTA capital program include the Federal Transit Administration, the Illinois Department of Transportation, the RTA itself, and the Service Boards. The 2011-2015 capital program totals $4.355 billion, with the majority of funds planned to be spent on new rolling stock, that is, the replacement of railcars, buses, and other vehicles.

2011-2015 CAPITAL PROGRAM: $4.355 BILLION



2011-2015 FIVE-YEAR CAPITAL PROGRAM USES (in millions)

	CTA	METRA	PACE	PACE ADA	TOTAL

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) provides an overview of the financial activity of the Regional Transportation Authority ("RTA") for the fiscal year ended December 31, 2011. This analysis is based on the RTA's 2011 Comprehensive Annual Financial Report (CAFR), which contains all of the detailed financial statements surrounding the RTA's operations.

Two important tables from the 2011 RTA CAFR are shown on the following pages with a discussion of significant year over year issues. For the sake of simplicity, only the sections of these tables related to governmental activities are shown here. The CAFR also includes in these tables sections that relate to business-type activities (such as the RTA Joint Self-Insurance Fund and Pension Trust Fund), which only amount to approximately 1% of the RTA's total financial activity.

To better understand these financial statements, it is important to remember the role of the RTA as described earlier in the report. Specifically, the sales tax revenue figures include only that portion of the RTA sales tax which is retained by the RTA for discretionary distribution, and not the portion which is passed through to the CTA, Metra, and Pace according to statutory formulas.

Similarly, in the expense section, the "Financial Assistance to Service Boards" excludes those same pass-through sales taxes and includes only discretionary funding, so that these statements encompass only those funds controlled by the RTA.

The CAFR can be viewed at www.RTAchicago.com/about-the-rta/rta-documents.html.

RTA STATEMENT OF ACTIVITIES

For the year ended December 31, 2011, the RTA statement of activities for the governmental activities shows expenses increasing by $153 million to $564 million from $411 million for the same period in 2010. This increase is due to an increase in financial assistance to the CTA, Metra, and Pace (the "Service Boards") of $31 million. Grant activity was higher by $113 million, as the RTA passed State capital funding through to the Service Boards, while administrative expenses were only slightly higher, by $764 thousand. Also, Regional and Technology Program and bond interest expenses were each higher by $4 million.

Revenues increased by $153 million in 2011, driven primarily by a $133 million increase in State capital funds. Sales taxes increased by $5 million, while higher income from regional programs and investments also contributed to the year-over-year revenue increase.

2011 revenues exceeded expenses by $81 million, resulting in an increase in net assets which was very similar to the increase in net assets which the RTA experienced over the course of 2010.

SUMMARY OF ACTIVITIES - DECEMBER 31, 2011 AND 2010 (in thousands)

	GOVERNMENTAL ACTIVITIES*		
	2011	2010	CHANGE
EXPENSES			
Financial assistance to Service Boards	$ 128,786	$ 97,648	$ 31,138
Grant activity	$ 258,609	$ 145,996	$ 112,613
Administrative expenses	$ 9,315	$ 8,551	$ 764
Regional and Technology Program expenses	$ 27,914	$ 23,555	$ 4,359
Interest expense	$ 139,314	$ 135,530	$ 3,784
Total expenses	$ 563,938	$ 411,280	$ 152,658

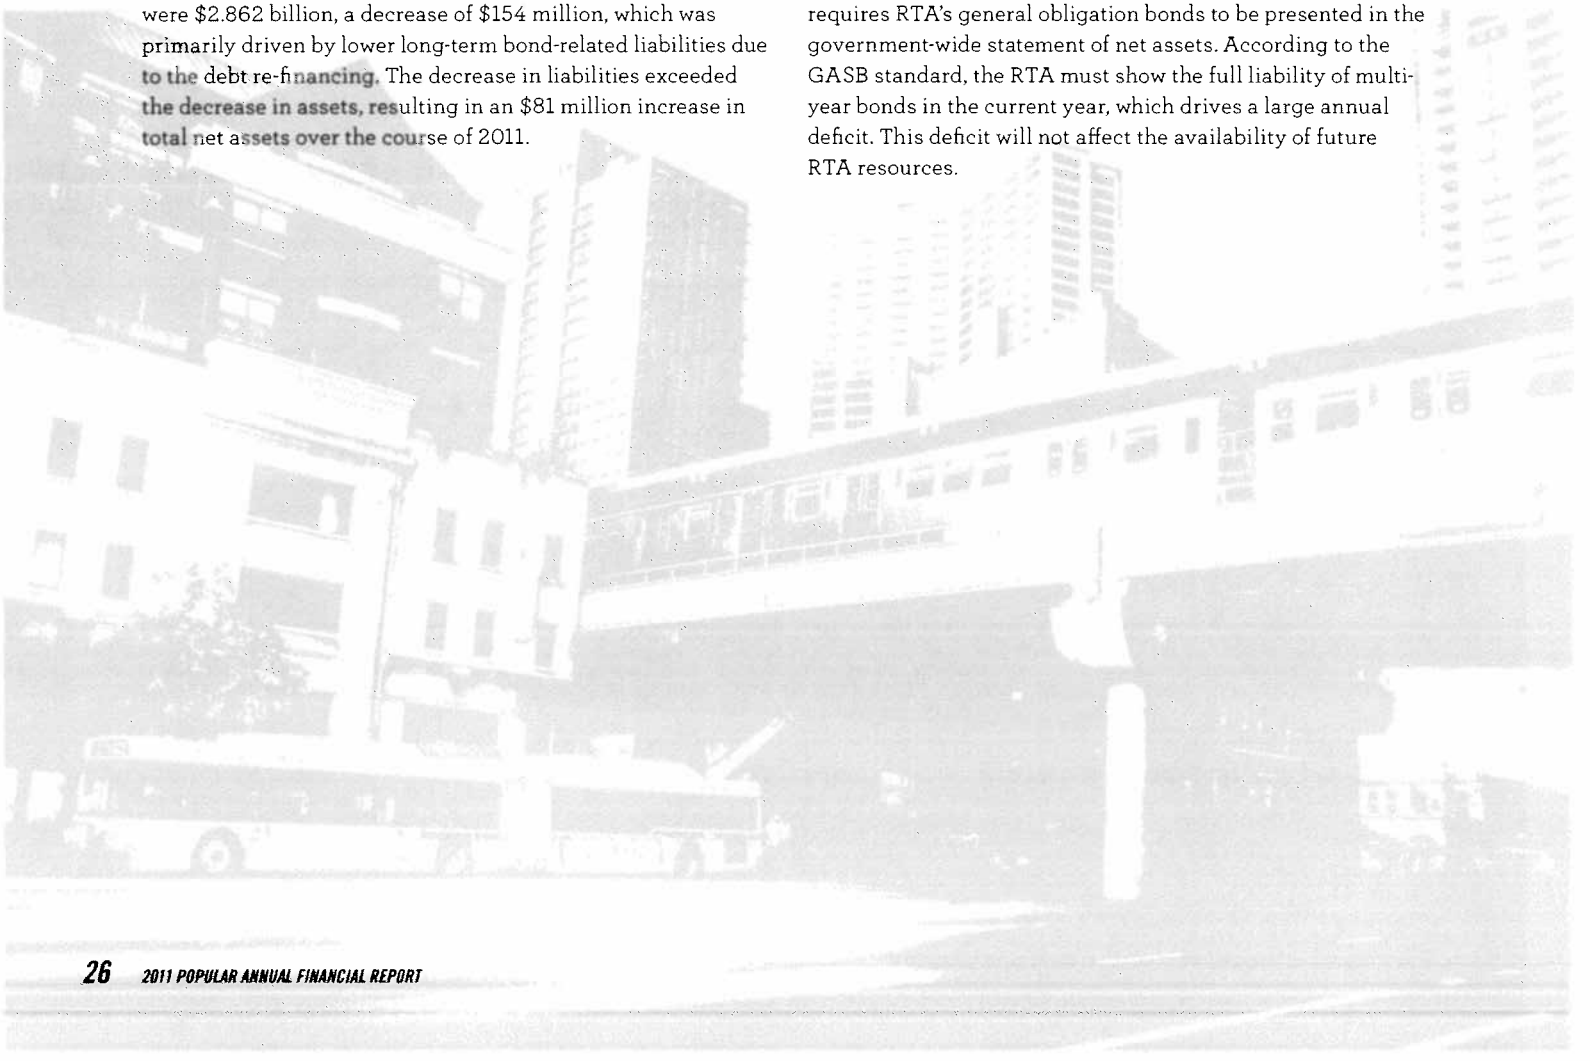
GOVERNMENT-WIDE STATEMENT OF NET ASSETS

The statement of net assets presents information on all of the RTA's assets and liabilities, with the difference between the two reported as net assets. Increases or decreases in net assets may serve as a useful indicator of whether an organization's financial position is improving or deteriorating.

The government-wide statement of net assets shows 2011 assets of $1.069 billion, a net decrease of $73 million from 2010. Cash and investments decreased by $117 million due to bond-related expenses. This was partially offset by an increase of $45 million in noncurrent and other assets. 2011 liabilities were $2.862 billion, a decrease of $154 million, which was primarily driven by lower long-term bond-related liabilities due to the debt re-financing. The decrease in liabilities exceeded the decrease in assets, resulting in an $81 million increase in total net assets over the course of 2011.

At the end of 2011, the government-wide statement of net assets shows a deficit of $1.8 billion for governmental activities. However, this does not represent a precarious financial position for the RTA, but rather is related to how the Governmental Accounting Standards Board (GASB) requires RTA's general obligation bonds to be presented in the government-wide statement of net assets. According to the GASB standard, the RTA must show the full liability of multi-year bonds in the current year, which drives a large annual deficit. This deficit will not affect the availability of future RTA resources.



SUMMARY OF NET ASSETS - DECEMBER 31, 2011 AND 2010 (in thousands)

	GOVERNMENTAL ACTIVITIES		
	2011	2010	CHANGE
ASSETS			
Cash and investments	$ 636,759	$ 753,522	$ (116,763)
Noncurrent assets / other assets	$ 417,781	$ 372,820	$ 44,961
Capital assets - net	$ 14,491	$ 15,265	$ (774)
Total Assets	$ 1,069,031	$ 1,141,607	$ (72,576)
LIABILITIES			
Current non-bond-related liabilities	$ 128,256	$ 80,409	$ 47,847
Current bond-related liabilities	$ 394,645	$ 345,124	$ 49,521
Long-term non-bond-related liabilities	$ 128,710	$ 154,352	$ (25,642)
Long-term bond-related liabilities	$ 2,209,908	$ 2,435,370	$ (225,462)
Total Liabilities	$ 2,861,519	$ 3,015,255	$ (153,736)

Award for Outstanding Achievement in Popular Annual Financial Reporting

PRESENTED TO

Regional Transportation Authority, Illinois

for the Fiscal Year Ended

December 31, 2010

The 2010 RTA Popular Annual Financial Report (PAFR) received the PAFR award from the Government Finance Officers Association of the United States and Canada. This is the RTA's first award of its kind. The award was presented to the RTA based on creativity, presentation, understandability and reader appeal.

Produced by the Communications and the Finance and Performance Management Departments of the:

REGIONAL TRANSPORTATION AUTHORITY

OF NORTHEASTERN ILLINOIS

EXECUTIVE DIRECTOR – Joseph G. Costello

CHIEF FINANCIAL OFFICER – Grace Gallucci

CONTROLLER – John H. Yu

DIVISION MANAGER, BUDGET, PERFORMANCE, AND BUSINESS ANALYSIS – Donna Anderson

DEPUTY EXECUTIVE DIRECTOR OF COMMUNICATIONS – Diane J. Palmer

COMMUNICATIONS MANAGER – Annah Mitchell

DESIGN AND ART DIRECTION – Words&Pictures, Inc.

PHOTOGRAPHY – Diane Smutny, DMS Photography

A very special thanks to Doug Anderson, Lalaine Alvarez, the Planning Department, and the rest of the staff of the Finance and Performance Management Department.

The RTA gratefully acknowledges the cooperation of the Chicago Transit Authority, Metra and Pace in the assembly of this report.

POPULAR ANNUAL FINANCIAL REPORT

Regional Transportation Authority

GETTING FROM HERE TO THERE... TWO MILLION TIMES A DAY

Moving two million riders every day to thousands of destinations across Chicago and its suburbs takes vision: plans for today and goals for tomorrow.

That's why the RTA is taking steps toward sustainability. After all, in order to keep the RTA moving, the region as a whole must continue to thrive.

Public transportation is key to the foundation of the region. It is the network that brings people to work and back home again, helps grow the economy and encourages investment in communities.

We strive to be a world-class regional transportation system that is socially, financially and environmentally sustainable.

This is the RTA's annual report, formally known as the Popular Annual Financial Report (PAFR). It is intended to help you understand the RTA's role in the provision of public transit to our customers and to taxpayers in the six-county service area of northeastern Illinois. This report does not provide all of the detailed information that is contained in the RTA's Comprehensive Annual Financial Report (CAFR). For those interested in a higher level of financial detail, the 2012 RTA CAFR and 2012 RTA PAFR are available on the RTA's website at www.RTAchicago.org.

LETTER FROM THE CHAIRMAN & EXECUTIVE DIRECTOR

At the Regional Transportation Authority, we are working for today and planning for tomorrow. With our Service Board partners at the Chicago Transit Authority (CTA), Metra and Pace, our common goals are to provide a foundation for prosperity and sustainability in the region.

That is why we are very pleased to report that the RTA, along with the Service Boards, took important steps toward making transit operations in the region fiscally sustainable. For the first time in a decade, capital funds were not diverted to support operational expenses.

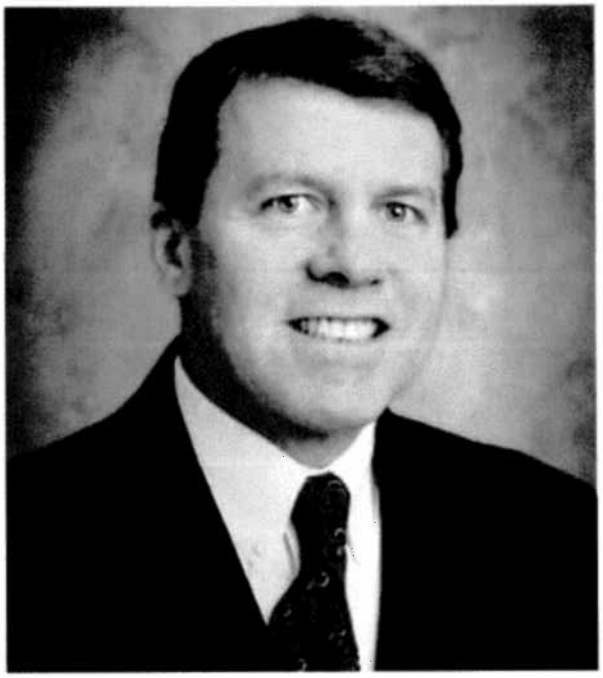
In order to keep the existing system operating efficiently, the region's growing capital funding needs are estimated to total $30.9 billion over the next decade. We must ensure money is available for improvements. Many more billions of dollars are required to expand our transit system to meet current and future demand.

Attention to budgets, new fare structures and negotiated labor agreements, as well as rebounding ridership, all contributed to this collective achievement, and each Service Board played a role by taking steps toward financial sustainability. As a result, the RTA's credit ratings, which allow it to finance future capital expenditures, have improved significantly.

After careful consideration, Metra instituted a significant fare increase as a component of its 2012 operating budget. Faced with the choice of cutting service or raising fares, Metra surveyed its customers and found that service reductions were the least desirable course of action. Metra then compared its fare structure to peer agencies across the country and found that, over time, Metra's fares had fallen well below the national average and had failed to keep up with inflationary increases in operating expenses. Public hearings on the proposed fare increase resulted in some modifications to the plan. In the end, this necessary fare adjustment contributed to a 17 percent increase in Metra's operating revenues for 2012, producing a balanced budget by the RTA.

The CTA worked over the course of 2012 to address rising labor expenses by pursuing work rule reforms with its various labor unions. These efforts culminated in a December 2012 agreement that eliminated outdated and costly work rules and enhanced job security for its workers. This agreement will allow the CTA to lower costs over time and ensure slower growth in labor expenses over the four-year contract period. At $900 million per year, labor is the CTA's single largest operating

John S. Gates Jr., RTA Board Chairman



Joseph G. Costello, RTA Executive Director

category. This new stability will help produce balanced operating budgets in the years to come.

Finally, ridership is the most important measure of a transit system, and in 2012 the RTA region enjoyed its highest ridership since 1990. Pace led the way with a 5.0 percent ridership increase for its Suburban Service, as well as a 7.2 percent increase in demand for its regional ADA Paratransit Service. The CTA experienced ridership growth of 2.6 percent in 2012, thanks to increases of 1.3 percent for bus and 4.3 percent for rail. Due in part to its fare increase, Metra saw a 1.7 percent decrease in ridership for the year. But overall, the combined Service Board ridership increased by 2.2 percent in 2012, following a 2.9 percent increase in 2011 to 2.2 million rides per day utilizing 8,000 buses, elevated trains and train cars.

In the spirit of looking ahead, in 2012 the RTA launched an update to the region's Transit Strategic Plan. A roadmap for the future of the region's transit system, the Strategic Plan prioritizes initiatives so the RTA can make informed decisions about infrastructure and operations in the near and long terms. Last updated in 2008, the plan will build from various studies, analyses and public input to affirm the region's vision and goals for transit as well as serve as a guide for decision making over the next five years.

The RTA sought input from partner agencies, stakeholders and the general public. This initiative continued through the first half of 2013. Please read on to learn more about the RTA, its programs and priorities. Let's move forward together.

Thank you for your continued support.

Agency	2012 Annual Operating Expenses (millions)	2012-2016 Five-Year Capital Program (millions)
CTA	$1,291.5	$2,256.1
Metra	$676.5	$1,205.3
Pace	$190.3	$379.6
Pace ADA	$137.0	-
RTA Agency	$34.2	$46.4
Regional (debt, insurance, capital)	$244.6	-
TOTAL	$2,574.1	$3,887.4

RTA PROFILE

The RTA moves Chicagoland. The RTA serves as the oversight, funding and regional planning agency for the three transit operators that serve Northeastern Illinois — CTA bus and rail, Metra commuter rail, and Pace suburban bus and regional ADA paratransit. The RTA provides a foundation for the region's prosperity.

Created in 1974 upon approval of a referendum by the residents of Cook, DuPage, Kane, Lake, McHenry and Will counties, the RTA oversees a world-class transportation system that provides a foundation for the region's prosperity, livability and vitality.

The CTA, Metra and Pace (collectively the Service Boards) manage their respective systems, and each is led by a Board of Directors that determines levels of service, passenger fares and operational policies. The RTA's Board of Directors approves an annual budget and two-year financial plan, as well as a strategic plan to guide the Service Boards in achieving their common missions of providing convenient, affordable, reliable and safe transit in the region. Composed of 15 members appointed from the six-county region plus an elected chairman, the RTA Board is also required to review and approve a five-year capital program updated annually, providing a blueprint of the capital activities to be executed by the CTA, Metra and Pace.

The RTA system is the third largest in the country, with combined assets valued at more than $151 billion, including 2,468 buses, 410 paratransit vehicles, 2,210 rail cars, 146 locomotives and 694 vanpool vehicles. The system covers 7,200 route miles in the six-county region, which currently has a population of approximately 8.3 million. The annual resources required to operate the region's public transportation system total approximately $2.6 billion. In addition, the RTA system has a five-year capital program funded at approximately $3.9 billion. The table on page six shows the breakdown of 2012 annual operating expenses and the five-year capital program for the Service Boards and RTA.

RTA'S FISCAL RESPONSIBILITY

The mission of the RTA is to ensure delivery of financially sound, comprehensive and coordinated public transportation for Northeastern Illinois.

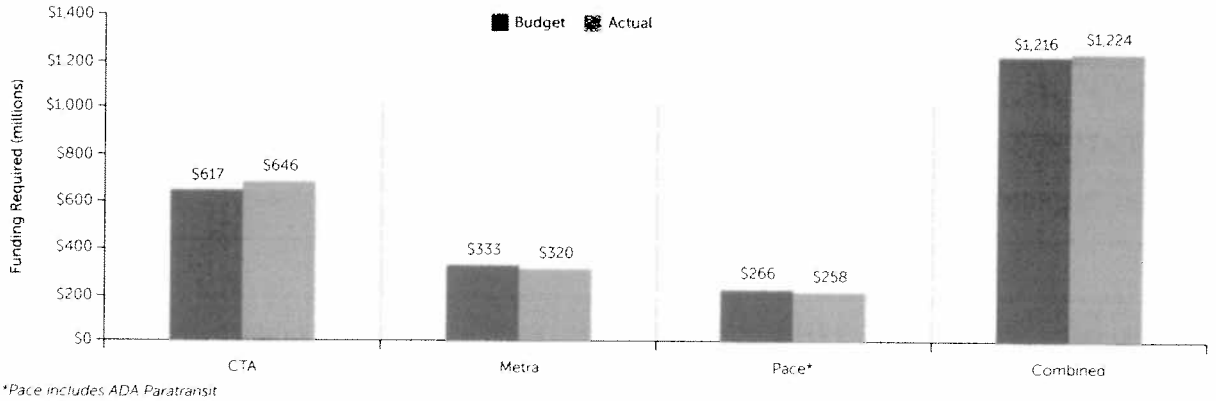
The RTA is a planning, funding and oversight agency. The CTA, Metra and Pace (collectively the Service Boards) provide transit services. The relationship between the RTA and the Service Boards is unique but ultimately provides for a regional system that allows its agencies to work together for the future of transit.

Collaboration, transparency and accountability characterize interactions between the Service Boards — which develop, adopt and submit individual annual budgets to the RTA — and the RTA, which reviews, approves and adopts them. The RTA then monitors the financial and operational performance of each Service Board on a monthly and quarterly basis to ensure compliance with its adopted budgets. In the event of significant non-compliance to budgetary goals, the RTA may require the Service Board to submit a revised budget. This can lead to the withholding of up to 25 percent of regional sales tax funding from the Service Board until the RTA is satisfied that the revised budget is back in compliance.

The Service Boards' 2012 budgets were developed with the struggling economy in mind, but as the year progressed and regional employment improved, ridership exceeded projections at all three Service Boards.

The CTA's actual funding requirement exceeded budget by almost $30 million largely due to a delay in achieving new labor agreements, but this shortfall was offset by higher than expected funding from sales tax receipts. Metra and Pace had operating deficits that were favorable to the budget by $13 million and $8 million, respectively, meaning that less financial assistance was needed than had been anticipated during the 2012 budget process.

2012 SERVICE BOARD OPERATING DEFICITS (FUNDING REQUIREMENTS)



*Pace includes ADA Paratransit

SERVICE DELIVERY & RIDERSHIP

Thanks to an improving economy in 2012, the RTA enjoyed its highest annual ridership since 1990. The RTA system carried a total of 666.0 million riders, an increase of 2.2 percent from 2011.

Each of the Service Boards had an important part to play in moving so many people throughout the region in 2012.

The CTA, with weekday ridership of more than 1.6 million, carries the largest number of customers in the RTA system, mostly on relatively short urban trips. Its bus and rail operations compose the nation's second largest transit agency, with service to the City of Chicago and 40 surrounding suburbs.

Metra has weekday ridership of more than 300,000 with an average passenger trip distance of about 23 miles. Formed in 1983, Metra commuter rail operates 11 lines extending to the limits of the six-county area, making it geographically the largest commuter operation in the United States. It is governed by an 11-member Board of Directors.

Pace's weekday ridership exceeds 125,000, of which more than 12,000 are pre-arranged trips for riders certified by the RTA to receive paratransit services as required by the Americans with Disabilities Act. Pace began service in 1984 and provides fixed-route bus, demand-response "dial-a-ride," vanpool services within and between the suburbs and the City of Chicago, and ADA paratransit service for the entire region. Pace is governed by a 13-member Board of Directors.

Over the course of the last decade, total RTA system ridership has experienced highs and lows that closely mirror national economic trends. For example, ridership dipped in the wake of the 2001 recession, then recovered and peaked in 2008 prior to the financial crisis when gas prices were setting new records and urban congestion was at an all-time high. The 666.0 million trips taken in 2012 exceeded the 2008 peak and represented nearly 70 million more trips than year 2000 levels.

REGIONAL INITIATIVES

RTA Continues to Fight Sales Tax Avoidance Schemes

One of the RTA's most critical functions is to collect and distribute sales tax proceeds to the CTA, Metra and Pace, who rely on this revenue for approximately half of their annual operating budgets.

But there are obstacles to collecting these funds. Illinois is one of the few states that collect sales taxes based on where a company reports a purchase was "accepted." Some companies, looking to exploit this provision, set up sham offices outside the RTA region to avoid paying the higher tax that supports their businesses.

Over the last few years, the RTA has filed suits against companies engaging in this practice and has worked with the Illinois legislature to clarify the state tax code to put an end to these illegal tax avoidance schemes. In 2011 the RTA introduced HB 3859, a bill that requires counties and municipalities to provide the Illinois Department of Revenue details of sales tax rebate agreements between companies and municipalities. The legislation received overwhelming bipartisan support and went into effect on January 1, 2013.

The RTA will be closely monitoring these agreements and will take further actions when appropriate. The RTA is committed to ensuring that every penny that is owed to the region's transit system is collected and that businesses that enjoy it pay their fair share.

Advocating for Federal Funding for Transit: *Getting America to Work*

The RTA spearheaded the creation of the *Getting America to Work* (GATW) coalition in 2012 to help advocate for additional federal funding needed to bring America's public transit systems, including those in Chicago, into a State of Good Repair. GATW is working to make transit a national priority by raising local awareness of capital funding needs, developing advocacy tools that can be replicated and used by transit supporters across the country, and encouraging other transit agencies and supporters to join the coalition.

GATW's initial messaging focused on how investing in public transit will preserve and create jobs, as well as spur economic development. In 2012, GATW successfully recruited dozens of transit agencies, advocacy groups, councils of government and labor groups in Illinois to support vital investments in transportation. This coalition helped to build Illinois' legislative delegation support of H.R. 4348, the Surface Transportation Extension Act that reauthorized federal funding for transit. GATW initiatives resulted in teleconferences, speaking tours, media stories and events with numerous congressmen, community leaders and transit agencies—all in an effort to increase capital investment in public transit and help keep our economy on the right track. In 2013, GATW plans to broaden its focus beyond Illinois to address the challenges of increased ridership and aging assets facing the country's commuters.

Greening the Future of Transit in the Chicago Region

Taking public transportation is good for the environment and good for passengers and their wallets. In an effort to assess the environmental benefit of mass transit, the RTA and several of its transportation partners released the *Chicago Regional Green Transit Plan* in May 2012. Crafted by the RTA, the CTA, Metra, Pace, the Illinois Department of Transportation (IDOT), the Chicago Department of Transportation (CDOT) and the Chicago Metropolitan Agency for Planning (CMAP), the *Chicago Regional Green Transit Plan* quantifies the environmental benefits of the region's public transit system and serves as a roadmap to a sustainable future for transit in the region. As noted in the plan, the region's transit system saves 6.7 million metric tons of carbon from being emitted into the atmosphere annually, the equivalent of saving 750 million gallons of gas or taking one million automobiles off

the roads. Additionally, the RTA system improved its carbon-emissions efficiency up to five percent between 2005 and 2008, due to increased ridership and more fuel-efficient vehicles such as hybrid buses.

The plan also provides a vision for a more environmentally-friendly transit system that builds on the environmental benefits of transit by growing ridership and market share, promoting transit oriented development, improving operational efficiency, and greening the transit system. The plan's recommendations include:

- Bringing the region's system into a state of good repair
- Expanding real-time bus and train arrival information
- Modernizing fare payment systems
- Expanding technical assistance and funding efforts related to transit-oriented development
- Studying and piloting more efficient locomotives, trains and buses
- Installing additional pollution control technologies on buses and trains

The *Chicago Regional Green Transit Plan* is just one example of the RTA and its partners' commitment to the environment for the future health and prosperity of the region.

Building Communities around Transit

Over the past 15 years, the RTA has leveraged $2.7 million of its own funds with federal, state and local funds to complete approximately 70 transit oriented development (TOD) planning studies through the RTA's Community Planning program. This funding program provides financial support for planning and implementation studies and initiatives that promote walkable, mixed-income, mixed-use developments well-connected to retail, business and transit access. In 2012, the RTA produced four educational publications and a video that promoted benefits of TOD for the region.

- In August, the RTA, in cooperation with the CTA, Metra, Pace and the Chicago Metropolitan Agency for Planning, released *Setting the Stage for Transit*—a guide for municipal officials looking to make their communities more transit friendly. The report recommends that communities without existing service can create environments conducive to transit by conducting transit-supportive planning and making local financial investments in transit. For communities with existing service, the report suggests they can make themselves more competitive for increased transit service by planning for developments that have sufficient populations and a mix of land uses to support more riders.

- In November, the RTA released *Streamlining the Entitlement Process: A Best Practices Report* to clarify for municipal officials the submission and review requirements for TOD project proposals. An efficient and predictable approval process can make a community more attractive to private developers. Streamlining and expediting the approval process for TOD projects will also help encourage more developers to pursue TOD projects over traditional projects.
- In December, the *Making Way Access to Transit Guide* was released to encourage and empower municipalities to implement small scale capital access improvements, such as the installation of sidewalks and crosswalks near existing transit facilities to promote pedestrian mobility and provide added access to transit.
- Also in December, the RTA released a TOD video promoting the various benefits of TODs, including increased transit ridership, decreased traffic congestion, and improved walkability and economic development opportunities for communities. The video also depicts what TOD efforts are underway in the region and how local communities can plan for TODs.

RTA Funding Programs: Setting Ideas in Motion

The Funding Programs administered by the RTA target innovative projects that increase transit usage, improve the efficiency and effectiveness of the region's current transit system, provide for better mobility for seniors and people with disabilities, and improve job access. These programs provide value to the region by offering planning, plan implementation, and operating and capital grants. The range of programs funded is consistent with the RTA's legislative mandates and Strategic Plan and is part of the annual budget process. The RTA Funding Programs allow the RTA, the CTA, Metra and Pace to coordinate at the local level to create plans, implement projects, facilitate intergovernmental cooperation and build new relationships. Since 1998, the RTA has leveraged its own funds with federal, state and local capital to support more than 200 projects. In 2012 the Funding Programs helped improve transit experiences for Metra riders as well as disabled commuters.

- In June, Metra unveiled its "Rail-Time Tracker," a major new enhancement to its website that allows riders to check the status of trains at every station in the system. The Rail-Time Tracker was funded through the RTA's Innovation, Coordination and Enhancement Program, which provides funding for transit operating and capital projects, and represents an important step forward in enhancing transit customers' experiences—a key element of the RTA's Regional Priorities Initiative.
- In November, the RTA and the City of Chicago announced the Taxi Wheelchair Accessible Vehicle Cost Reimbursement Program, which will put more than 130 additional wheelchair accessible taxicabs on the streets of Chicago. The program, funded through a $1.7 million federal New Freedom grant, will reimburse expenses accrued in converting taxicabs to accommodate wheelchairs. Partial funding can also be used toward the purchase of new factory manufactured wheelchair accessible vehicles. The program is scheduled to begin in 2013.

Pointing the Way to Seamless Interagency Travel Across the Region

Easy navigation of the regional transit system is one of the RTA's core missions. However, current and potential customers are frequently confronted with inconsistent messages or gaps in information when transferring from one service to another. For many this confusion reduces the appeal of taking public transportation.

To address this problem, the RTA, in cooperation with the CTA, Metra and Pace and our municipal partners in Chicago, Evanston, Joliet and Evergreen Park, worked together to develop a new system of wayfinding signage and informational products designed specifically for major transit hubs where passengers make transfers between services.

The first phase of this project was substantially completed in 2012, with new prototype interagency signage and wayfinding products installed at the following four demonstration locations:

- Van Buren in the Chicago Loop, where Metra and CTA rapid transit and buses connect
- Davis Street in Evanston, where Metra, CTA rapid transit, CTA buses and Pace buses connect
- Joliet, where Metra and Pace buses connect
- 95th and Western on Chicago's southwest border, where CTA and Pace buses connect

Customer input was vital to the development of signs and informational products. User testing, including a last round of user and functional evaluations at the demonstration locations, will help update the final design standards and engineering specifications. Additional interagency signs will be installed at 20 transit hubs across the region, thanks to funding from the federal Congestion Mitigation Air Quality program the RTA received in 2012.

Looking forward, these products could be installed at up to 100 different locations throughout the region, such as downtown Chicago terminal stations (Union, Ogilvie, LaSalle and Millennium stations) as well as major train-to-train and bus-to-train connection points.

The ultimate goal of the program is to enhance the customer experience so that all of our passengers—from regular riders and reverse commuters to occasional riders, visitors and tourists—can seamlessly navigate the entire RTA system.

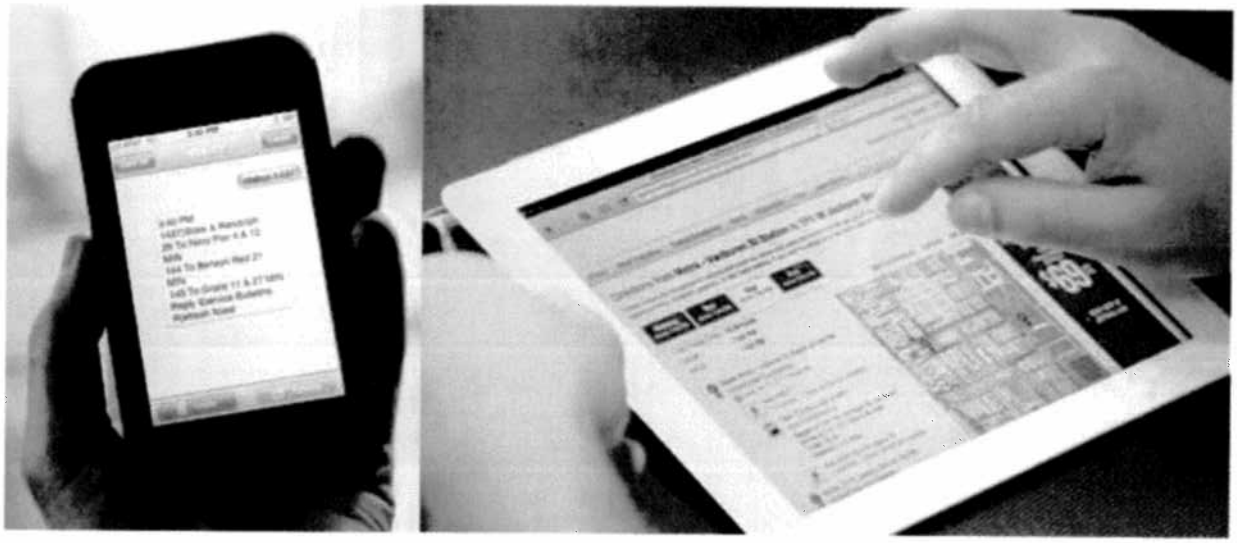
A Shoulder to Ride On

First launched in 2011, the I-55 Bus-On-Shoulder (BOS) pilot allows Pace routes 755 and 855 to bypass congestion in the general purpose lanes on I-55 by traveling on the inside shoulder. During calendar year 2012, the first full year of the pilot, partnering agencies Pace, the Illinois Department of Transportation and the Illinois State Police monitored the program to assess the impact of BOS on overall roadway safety, winter operations, typical shoulder functions (such as emergency response) and, of course, transit operations.

The first full year of the pilot was heralded as a success. Transit operations continued to be safe under winter conditions. Also, typical shoulder functions were not impacted. Since the pilot began, transit ridership on Pace routes 755 and 855 has hit historical highs, doubling previous levels. The initial success of the pilot has led to expansion of the program, including eliminating the current time restrictions and making the shoulder available to Pace buses whenever there is congestion. (In the initial launch phase of the pilot, BOS operations were limited to peak periods and in peak directions.) As this pilot continues, assessment of operations, modifications and enhancements will inform regional standards for BOS operations and could lead to the concept being implemented on a highway shoulder near you.

Improvements to the I-90 Corridor Just Around the Bend

The RTA, the Illinois State Toll Highway Authority (ISTHA) and Pace partnered in 2011 to integrate transit in the reconstruction of the I-90 Jane Addams Tollway. The I-90 Corridor is essential to the region's continued economic growth and vitality. Since 1970, the volume of traffic in this corridor has more than quadrupled and is projected to continue to grow.



Work in 2012 built on a framework laid in the *I-90 Transit Value Planning Study*, which outlined a strategy for implementing enhanced bus transit service using new managed lanes and establishing basic design requirements for the reconstruction of the Jane Addams Tollway. These requirements were included in the ISTHA's Five-Year Capital Plan adopted by the ISTHA Board in August 2011.

The *Transit and Supporting Highway Infrastructure Study* conducted in 2012 provides additional technical analysis and will enable completion of final engineering for the tollway reconstruction. A survey of tollway users in the corridor included in the study was used to help understand travel behavior and to build computer models and simulations. Plans to enhance service in the corridor include provisions for bus service to operate without being delayed by congestion as well as improved access, including park and ride lots and bus stations.

Planning Your Trip Just Got Easier

The RTA, in collaboration with the CTA, Metra and Pace, made significant strides in 2012 to enhance the RTA's online travel information system at RTAchicago.org. These improvements include:

- Enhanced Site Navigation: Clearer access points to the trip planner features such as Transit Trackers, Transit Schedules and Travel Alerts has improved overall site navigation.
- Improved Home Page: Users can now choose among train, bus, driving, driving to transit, bicycling and walking options when planning trips.
- Improved Itineraries: The RTA simplified trip directions, increased the prominence of the itinerary map and created tabs to distinguish travelers' options at a glance.
- Metra Train Tracker and Pace Bus Tracker: Real-time arrival information for Metra trains and Pace buses was added to the existing CTA Train and Bus Trackers on the site.
- RTA Trip Planner is Mobile: The RTA released a free web app for RTAchicago.org that includes the same great features that travelers in the region have been enjoying on the RTA trip planner desktop site. The app can be accessed by logging on to RTAchicago.org from the browser of any web-enabled smart phone, including devices powered by Apple's iOS, Google's Android and Microsoft's Windows Phone software.

Improving Access across the Region

The Regional Accessibility Division of the RTA was created in 2011 to enhance mobility options for people with disabilities and older adults in the region. The RTA ADA Paratransit Certification Program and the RTA Travel Training program are two regional services operated within this Division.

The RTA ADA Paratransit Certification Program determines who is eligible for the region's ADA Paratransit service. Pace ADA Paratransit provides origin-to-destination service for people with disabilities who are unable to use fixed-route service. In 2012, the RTA ADA Paratransit Certification Program received 14,868 applications, a seven percent increase over 2011 levels.

In 2012, the RTA Travel Training Program taught more than 2,000 people with disabilities and older adults how to travel independently on CTA, Metra and Pace buses and trains. The program also expanded its offerings and partnered with Chicago Public Schools to educate students about public transportation. The Travel Training Program expanded in 2012 to offer three services tailored to meet the varying needs of travel training participants:

- Trip Training: Participants in this program work one-on-one with an RTA Travel Trainer to practice using buses and trains to travel to locations they go to on a regular basis. During Trip Training sessions, participants learn how to recognize landmarks to know when to get off the bus or train and how to interact with transit personnel and other riders.
- Individual Transit Orientation: The goal of Individual Transit Orientation is to educate and empower participants to use the entire transit system. Working one-on-one with an RTA Travel Trainer, participants receive a general introduction to bus and train accessibility. During Individual Transit Orientation sessions, a Travel Trainer will explain how to use accessibility features in transit vehicles and train stations, as well as how to plan trips on the CTA, Metra and Pace. In addition to building participants' confidence, Travel Trainers may take them to a bus garage or rail station to practice boarding transit vehicles or practice using buses and trains.
- Group Transit Orientation: The Travel Training Program offers group presentations at agencies that serve people with disabilities and older adults throughout the six-county region. The goal of Group Transit Orientation is to give participants and agency staff an introduction to the accessible services of the CTA, Metra and Pace and to demonstrate the benefits of using fixed-route buses and trains. In 2012, Group Transit Orientation Presentations took place at more than 75 locations throughout the region.

The RTA also partnered in 2012 with the Chicago Public Schools in a pilot project made possible by Easter Seals Project ACTION, a national training and technical assistance center funded by the Federal Transit Administration to develop a curriculum for public transportation education in the schools. The final curriculum was distributed nationally in 2012 and can be adapted for use at any school in the country.

The goal of this project was to develop a school-based public transportation education program to give students the knowledge and skills needed to use public transit so they can participate in community activities and have greater access to career-related experiences while they are in high school. This project also helps increase school personnel's awareness of public transportation options, gives educators content for curriculum development related to public transportation and provides suggestions for integration of that content into existing school curriculums.

Customer Satisfaction High Across RTA System

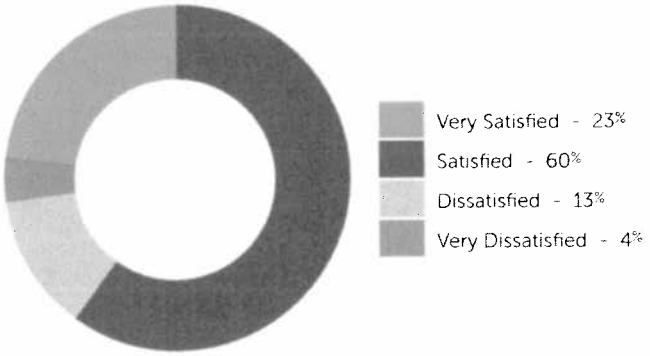
In 2012 the RTA completed the first-ever region-wide survey of customer satisfaction. Conducted collaboratively by the CTA, Metra and Pace, the surveys were administered on trains and buses in the spring and fall of 2011 as well as through online invitations.

Results were analyzed and reported in May 2012. While in past years, each of the Service Boards implemented its own independent assessment tool using different methodologies, questions, timing and scale that made aggregation of results impossible, the 2012 study standardized the process so that data could be analyzed. The surveys asked questions about customer satisfaction, travel time, reliability, safety, security, communications, cleanliness, comfort and employee performance.

Overall, customers were satisfied with the services provided, both at the regional level and Service Board level. The vast majority of riders (91 percent) would recommend using the services to others and more than three-quarters (83 percent) reported overall satisfaction with transit services. In general, customers reported the highest levels of satisfaction in the safety and employee performance categories and somewhat lower satisfaction in the comfort and cleanliness categories. A breakdown of some of the survey's findings follows.

CUSTOMER SATISFACTION RATING

Customers' ratings of satisfaction with the transit service overall.



CUSTOMER LOYALTY RATING

The likelihood that a transit customer would recommend the transit service to others.

HOW THE RTA MEASURES UP

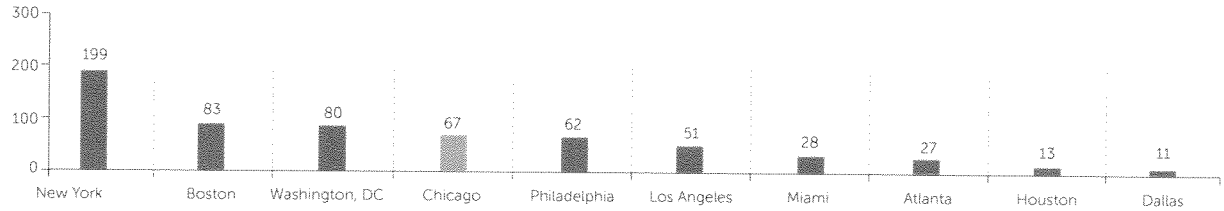
As part of its role supporting the evaluation and management of the region's public transit system while emphasizing both transparency and accountability, the RTA has developed a series of reports that show how transit in the Chicago region measures up against peer municipalities across the United States.

Data are culled from the National Transit Database (NTD).

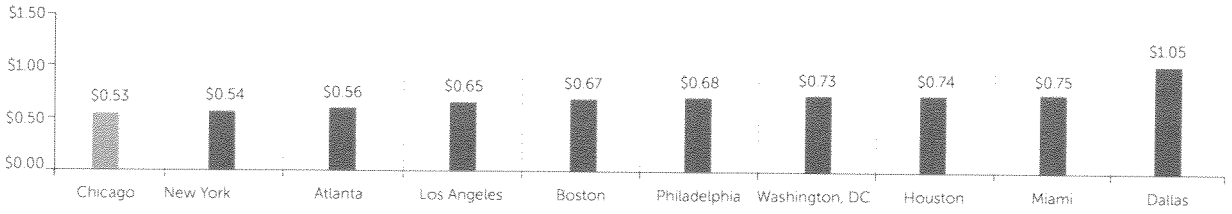
To measure and describe regional performance relative to peers, the RTA developed fifteen metrics across four broad areas: Service Coverage, Service Efficiency and Effectiveness, Service Maintenance and Capital Investment, and Service Level Solvency (the financial ability to provide quality services). For 2011, the most recent year for which NTD data are available, the RTA region ranked in the top half of the peer group in twelve of fifteen measures and was in the top three for six of the measures.

Several of these 2011 regional peer comparisons charts follow.

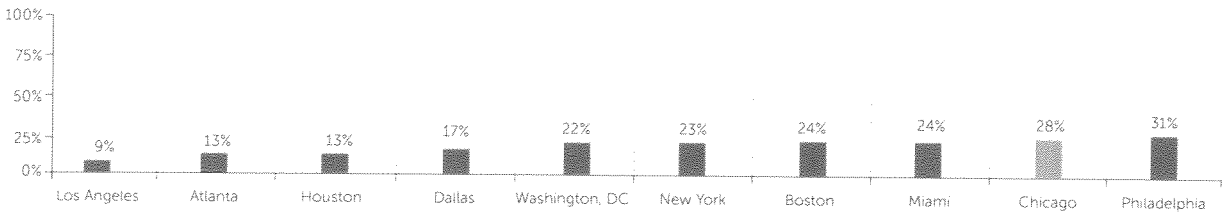
ANNUAL PASSENGER TRIPS PER AREA RESIDENT



OPERATING COST PER PASSENGER MILE



PERCENT OF VEHICLES BEYOND USEFUL LIFE



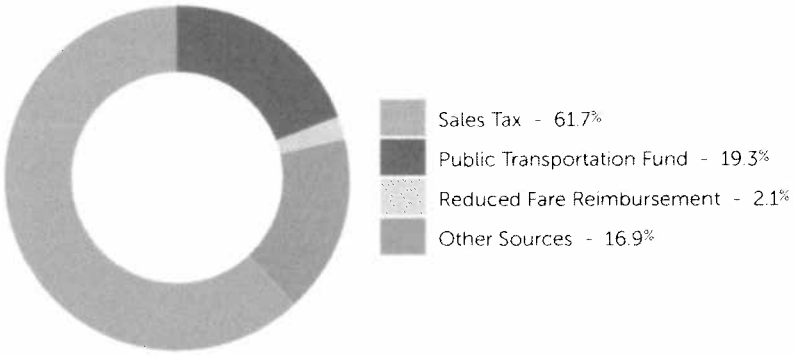
FUNDING PUBLIC TRANSPORTATION

Revenue Sources

The RTA's primary source of operating funding is a regional sales tax that is matched by the state of Illinois via the Public Transportation Fund (PTF). A reduced fare reimbursement also comes from the state and is passed through to the CTA, Metra and Pace to help offset the revenue lost from mandated fare programs for seniors, people with disabilities and students. The "Other Sources" revenue category shown in the chart below includes items such as additional assistance from the state, investment income and grants.

As the economy improved in 2012, total RTA sales tax receipts increased 4.7 percent from 2011 to $1.022 billion, exceeding budget projections. Receipts from the PTF also increased 4.7 percent.

2012 RTA REVENUE BY SOURCE: $1.655 BILLION



The "Other Sources" category was sharply lower in 2012 because the RTA received less state funding for capital projects. This decrease offset the higher sales tax receipts and, as a result, overall 2012 RTA revenues decreased by $19.9 million, or 1.2 percent, from 2011.

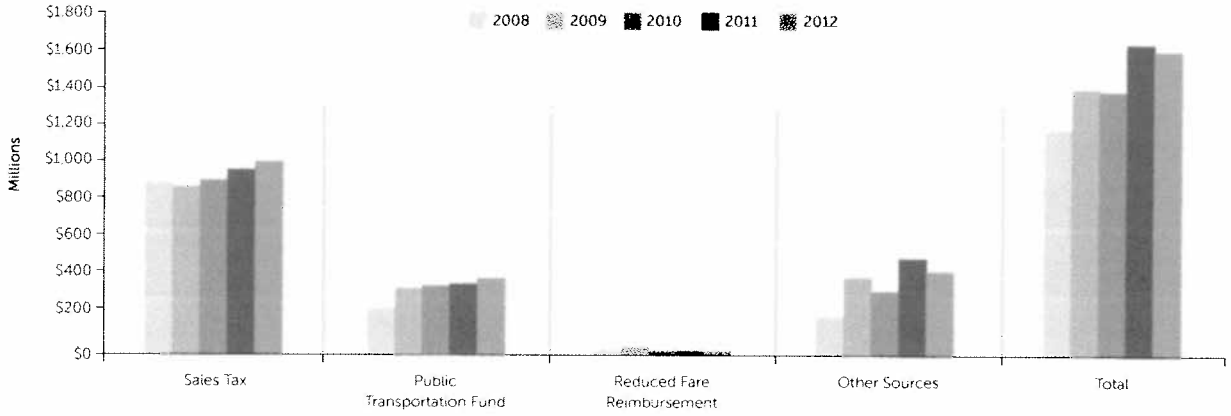
Over the last five years, the RTA has experienced a general increase in total revenues. After a sharp drop in 2009 related to the recession, sales tax receipts have increased steadily and exceeded 4 percent growth in each of the last three years; because

RTA REVENUE BY SOURCE, DECEMBER 31, 2012 AND 2011 (IN THOUSANDS)

	2011	2012	Change
Sales Tax*	$975,671	$1,021,686	$46,015
Public Transportation Fund	$305,395	$319,892	$14,497
Reduced Fare Reimbursement	$34,070	$34,070	-
Other Sources	$360,002	$279,571	$(80,431)
TOTAL REVENUE	**$1,675,138**	**$1,655,219**	**$(19,919)**

**Includes sales taxes retained by the RTA and sales taxes passed through to Service Boards. See Management Discussion and Analysis on page 29 for revenues received directly by the RTA.*

5-YEAR TREND OF RTA REVENUE SOURCES

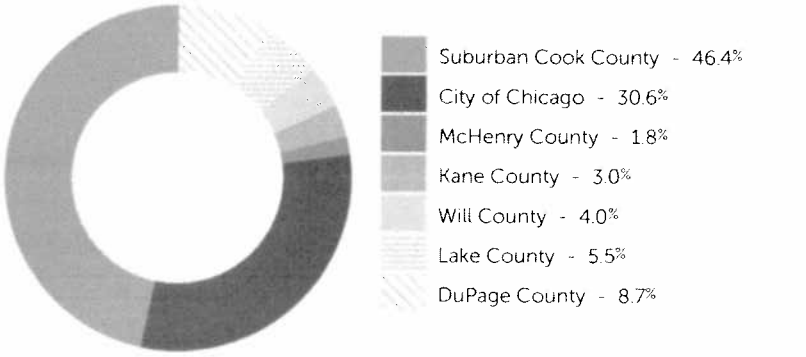


PTF matches sales tax receipts, this increased as well. The State Reduced Fare Reimbursement was flat across the period, while the "Other Sources" category fluctuated from year to year due primarily to the timing of the release of capital funds by the state.

Sales Tax by County

Though region-wide, the RTA sales tax is imposed at differing rates to reflect the various levels of transit service provided throughout the constituent counties. In 2008, the RTA Act increased the RTA sales tax rate from 1.0 percent to 1.25 percent in Cook County and from 0.25 percent to 0.5 percent in the collar counties of DuPage, Kane, Lake, McHenry and Will. In practical terms, this means that on a $100 purchase in Cook County, $1.25 of the sales tax paid goes directly to the funding of public transit; in the collar counties, 50 cents of sales tax related to that purchase goes to the RTA. This same act also increased the Real Estate Transfer Tax (RETT) within the City of Chicago to directly fund the CTA and raised the portion of RTA sales tax and RETT revenues matched by the state PTF from 25 percent to 30 percent.

2012 RTA SALES TAX REVENUE BY COUNTY: $1.022 BILLION

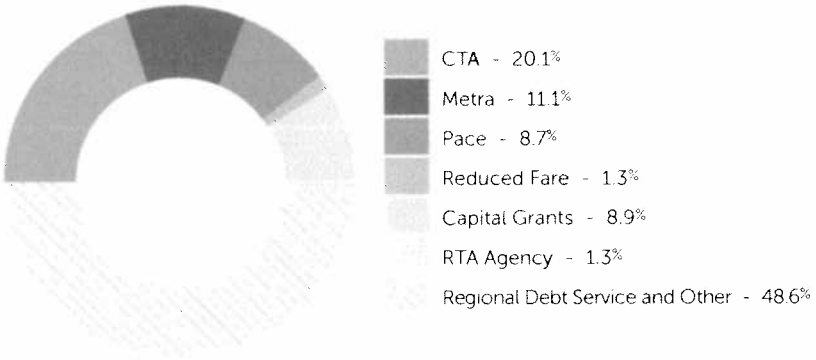


WHERE RTA EXPENDITURES GO

The primary source of funding for public transportation in the region is sales tax. More than 85 percent of the public transportation sales tax collections pass directly through the RTA to the CTA, Metra and Pace according to pre-determined, statutory formulas.

The remainder is initially retained by the RTA along with revenues from the Public Transportation Fund (PTF) and additional state funding. After funding regional debt service, special programs and the RTA's own administrative costs, the remainder of the retained sales tax and PTF is distributed to the Service Boards on a discretionary basis and within the context of their annual budgets.

2012 RTA EXPENDITURES: $2.675 BILLION



The Service Boards also generate fare revenue from their customers and have other direct funding sources such as the RETT, which, when combined with the funds managed by the RTA, covers the cost of providing service.

RTA EXPENDITURES, DECEMBER 31, 2012 AND 2011 (IN THOUSANDS)

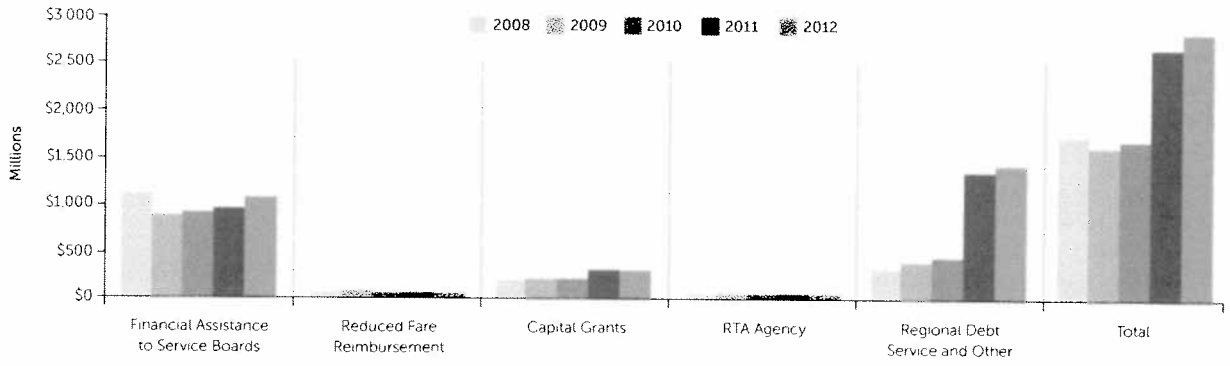
	2011	2012	Change
CTA*	$485,117	$538,594	$53,477
Metra*	$289,179	$297,369	$8,190
Pace*	$212,253	$233,871	$21,618
Reduced Fare	$34,070	$34,070	-
Capital Grants	$241,047	$237,717	(3,330)
RTA Agency	$31,980	$34,178	$2,198
Regional Debt Service and Other	$1,226,280	$1,298,896	72,616
TOTAL EXPENDITURES	$2,519,926	$2,674,695	154,769

*Includes sales taxes passed through to Service Boards. See Management Discussion and Analysis on page 29 for expenditures made directly by the RTA.

Thanks to increased sales tax revenues, financial assistance provided by the RTA to the Service Boards, both statutory and discretionary, increased in 2012. The Reduced Fare Reimbursement from the state was unchanged, and capital grant expenditures decreased slightly. The "Regional Debt Service and Other" category was almost $73 million higher as the RTA continued to take advantage of low interest rates to refinance existing long-term debt. Overall, RTA expenditures in 2012 increased by 6.1 percent from the previous year.

Following a recession-related drop in 2009, financial assistance provided by the RTA to the Service Boards has steadily increased over the last four years. While the State Reduced Fare Reimbursement remained fairly flat across the period, the Capital Grants expenditures increased slightly. Regional Debt Service and Other expenditures had been trending steadily higher until the sharp increase in 2011 and 2012 (related to debt re-financing).

5-YEAR TREND OF RTA EXPENDITURES BY CATEGORY

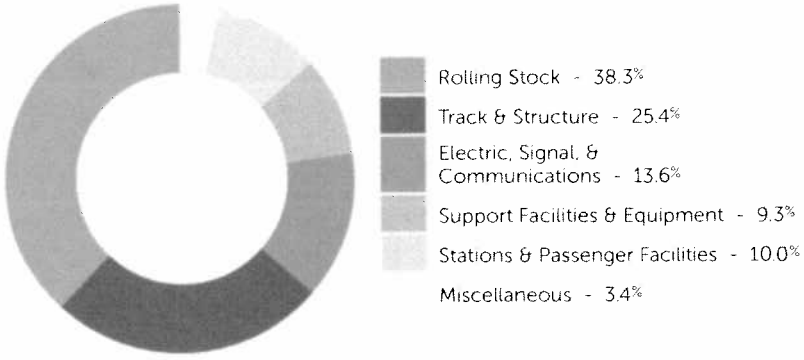


CAPITAL PLAN

Capital Infrastructure and Asset Condition Assessment

In 2012, the CTA, Metra and Pace made significant investments and improvements in their capital infrastructure. The CTA opened a new rail station in Skokie at Oakton Street on the Yellow Line, replaced viaducts in Evanston at Dempster and Grove streets on the Purple Line, and replaced rail and track components on the Wells and Van Buren legs of the Loop elevated system. In Chicago, the CTA completed rehabilitation of seven stations on the Howard Branch of the Red Line at Jarvis, Morse, Granville, Thorndale, Berwyn, Argyle and Lawrence, and the CTA awarded a contract to completely reconstruct the tracks and track beds of the Dan Ryan Branch of the Red Line.

2012 - 2016 CAPITAL PROGRAM: $3.887 BILLION



Metra began reconstruction of the Ravenswood Station on the Union Pacific North Line, the Fox River Grove Station on the Union Pacific Northwest Line and the Cicero Station on the BNSF Line.

In 2012, Pace received 27 fixed route buses, 142 vanpool vans and eight community vehicles.

2012-2016 FIVE YEAR CAPITAL PROGRAM USES (IN MILLIONS)

	CTA	Metra	Pace	RTA	Total
Rolling Stock	$1,040	$200	$251	-	$1,491
Track & Structure	$650	$338	-	-	$988
Electric, Signal, & Communications	$162	$324	$2	$42	$530
Support Facilities and Equipment	$120	$127	$113	-	$361
Stations & Passenger Facilities	$221	$157	$5	$4	$387
Miscellaneous	$63	$60	$9	-	$131
TOTAL	$2,256	$1,205	$380	$46	$3,887

In evaluating infrastructure as part of the 2012 Asset Condition Assessment, approved by the RTA board, the RTA concluded:

- State of Good Repair (SGR) backlog is $18.7 billion
- Normal reinvestment for 2012 – 2021 is $12.4 billion
- Ten-year total capital SGR needs for the region is $31.1 billion
- SGR Backlog is 36 percent higher and ten-year total capital SGR needs are 26 percent higher than estimated during the 2010 baseline assessment. (This is primarily due to more precision in estimating methods, improved data, additional assets reported, additional and improved sampling, and the completion of necessary inventory records. The estimate should be viewed as a snapshot in time, with the underlying data and methods of analysis continually improving.)

Overall, despite positive changes made to the infrastructure of the CTA, Metra and Pace in 2012, the shortage of capital funds needed to support the RTA system will continue to present challenges to the achievement of a State of Good Repair.

MANAGEMENT DISCUSSION & ANALYSIS

The following Management Discussion and Analysis (MD&A) provides an overview of the financial activity of the RTA for the fiscal year ended December 31, 2012. This analysis is based on the RTA's 2012 Comprehensive Annual Financial Report (CAFR), which contains detailed financial statements. Two important tables from the 2012 RTA CAFR are shown on the following pages with a discussion of significant year over year issues. For the sake of simplicity, only the sections of these tables related to governmental activities are shown on the proceeding pages. The CAFR also includes in these tables sections that relate to business-type activities (such as the RTA Joint Self-Insurance Fund and Pension Trust Fund), which amount to approximately 1 percent of the RTA's total financial activity. In order to better understand these financial statements, it is important to remember the role of the RTA as described earlier in the report and keep in mind that the sales tax revenue figures include only that portion of the RTA sales tax which is retained by the RTA for discretionary distribution, and not the portion which is passed through to the CTA, Metra and Pace according to statutory formulas.

Similarly, in the expense section, the "Financial Assistance to Service Boards" excludes those same pass-through sales taxes and includes only discretionary funding, so that these statements encompass only those funds controlled by the RTA.

The 2012 RTA CAFR can be viewed in its entirety at: www.RTAchicago.org.

RTA STATEMENT OF ACTIVITIES

For the year ended December 31, 2012, governmental activities expenses show an increase of $16 million. Financial assistance to Service Boards expenses increased by $43 million.

Grant activity expense decreased by $3 million, while Regional and Technology Program and bond interest expenses were lower by $9 million and $22 million, respectively. Administrative expenses show an increase of $7 million primarily because of a new, more comprehensive categorization of administrative expenses.

Revenues and transfers decreased by $52 million in 2012, driven primarily by a $63 million decrease in Public Transportation Fund and state assistance, some of which was reclassified as deferred revenue due to the continuing lag in payments from the state. This decrease was partially offset by higher sales tax receipts, regional program revenue and investment income.

2012 revenues exceeded expenses by $14 million, resulting in a significantly smaller increase in net assets in 2012 than the RTA experienced in 2011.

SUMMARY OF ACTIVITIES - DECEMBER 31, 2011 AND 2012 (in thousands)

	GOVERNMENTAL ACTIVITIES		
	2011	2012	Change
EXPENSES			
Financial assistance to Service Boards	$128,786	$171,700	$42,914
Grant activity	$258,609	$255,491	$(3,118)
Administrative expenses	$9,315	$16,507	$7,192
Regional and Technology Program expenses	$27,914	$19,015	$(8,899)
Interest expense	$139,314	$117,254	$(22,060)
Total expenses	$563,938	$579,967	$16,029
REVENUES AND TRANSFERS			
Sales taxes	$107,977	$113,152	$5,175
PTF and State assistance	$505,588	$442,143	$(63,445)
Innovation, Coordination, and Enhancement (ICE)	$9,930	$10,398	$468
Regional programs	$2,385	$4,077	$1,692
Investment income and other	$24,598	$28,768	$4,170
Transfers	$(5,380)	$(5,000)	$380
Total Revenues and Transfers	$645,098	$593,538	$(51,560)
Change in Net Assets	$81,160	$13,571	$(67,589)
Net Assets—Beginning of Year	$(1,873,648)	$(1,792,488)	$81,160
Net assets—End of Year	$(1,792,488)	$(1,778,917)	$13,571

GOVERNMENT-WIDE STATEMENT OF NET POSITION

The government-wide statement of net assets shows 2012 assets of $1.076 billion, an increase of $8 million from 2011. Cash and investments increased by $23 million, while non-current and other assets decreased by $15 million. 2012 liabilities were $2.856 billion, a decrease of $6 million from 2011. The increase in assets and decrease in liabilities resulted in a $14 million increase in total net position over the course of 2012.

At the end of 2012, the government-wide statement of net assets shows a deficit of $1.8 billion for governmental activities. However, this does not represent a precarious financial position for the RTA; rather it is related to the Governmental Accounting Standards Board's (GASB) requirement that the RTA's general obligation bonds be presented in the government-wide statement of net position. According to the GASB standard, the RTA must show the full liability of multi-year bonds in the current year, which drives a large annual deficit. This deficit will not affect the availability of future RTA resources, and in fact the RTA will use future funding to extinguish this liability.

SUMMARY OF NET POSITION - DECEMBER 31, 2011 AND 2012 (in thousands)

	GOVERNMENTAL ACTIVITIES		
	2011	2012	Change
ASSETS			
Cash and investments	$636,759	$659,287	$22,528
Noncurrent assets / other assets	$417,781	$402,608	$(15,173)
Capital assets - net	$14,491	$14,809	$318
Total Assets	**$1,069,031**	**$1,076,704**	**$7,673**
LIABILITIES			
Current non-bond-related liabilities	$128,256	$154,380	$26,124
Current bond-related liabilities	$394,645	$137,384	$(257,261)
Long-term non-bond-related liabilities	$128,710	$162,439	$33,729
Long-term bond-related liabilities	$2,209,908	$2,401,418	$191,510
Total Liabilities	**$2,861,519**	**$2,855,621**	**$(5,898)**
NET POSITION (DEFICIT)			
Invested in capital assets	$14,491	$14,809	$318
Restricted*	$326,598	$175,643	$(150,955)
Unrestricted (deficit)	$(2,133,577)	$(1,969,369)	$164,208
Total Net Position (Deficit)	**$(1,792,488)**	**$(1,778,917)**	**$13,571**

**Resources restricted for specific use as imposed by creditors, grantors, contributors, laws or regulations of other government, Board of Directors and Service Boards.*

Award for Outstanding Achievement in Popular Annual Financial Reporting

PRESENTED TO

Regional Transportation Authority, Illinois

for the Fiscal Year Ended

December 31, 2011

Christopher P. Morrill
President

Jeffrey L. Esser
Executive Director

The RTA gratefully acknowledges the cooperation of the RTA staff, the Chicago Transit Authority, Metra and Pace in the assembly of this report.

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

I have the pleasure to submit to you the Comprehensive Annual Financial Report ("CAFR") of the Regional Transportation Authority ("RTA") for the year ended December 31, 2008. The RTA staff has prepared this report as required by, and in accordance with, the RTA Act. This state law requires that the RTA publish financial statements presented in conformity with generally accepted accounting principles and audited by an independent certified public accountant.

This report consists of RTA management's representations concerning its finances. The responsibility for the accuracy, completeness, and fairness of the data rests with management. To the best of our knowledge and belief, this report contains data complete and reliable in all material respects. To provide a reasonable basis for making these representations, management of the RTA has established an internal control structure designed to provide reasonable assurance that assets are safeguarded from loss, theft, or misuse, and that adequate and reliable accounting data is compiled to prepare financial statements in conformity with accounting principles generally accepted in the United States of America. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits of that control, and that the valuation of costs and benefits requires estimates and judgments by management.

In addition to the statutory requirement of the RTA Act for an annual audit by independent certified public accountants, the Single Audit Act Amendments of 1996 and the U.S. Office of Management and Budget Circular A-133, Audits of State and Local Governments, and Non-Profit Organizations, require the RTA to undergo an annual Single Audit. The RTA has engaged the firm of McGladrey & Pullen LLP to meet these requirements. The firm followed auditing standards generally accepted in the United States of America and the standards set forth in the above circular in conducting the engagement. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the RTA's financial statements for the year ended December 31, 2008 are presented in conformity with accounting principles generally accepted in the United States of America. The independent auditor's report is presented as the first part of the financial section of this report.

A separately issued Single Audit report contains a schedule of expenditures of federal awards, the independent auditor's report on internal controls and compliance with applicable laws, regulations, contracts and grants, a schedule of findings and questioned costs, and other information related to the Single Audit.

Accounting principles generally accepted in the United States require that management provide a discussion and analysis to accompany the financial statements. This letter of transmittal complements management's discussion and analysis, and should be read in conjunction with it. The RTA management's discussion and analysis ("MD &A") can be found immediately following the report of the independent auditors.

OVERVIEW OF THE REGIONAL TRANSPORTATION AUTHORITY

Illinois State law (the RTA Act, as amended) created the RTA as a fiscal and policy oversight agency committed to providing an efficient and effective public transportation system for Northeastern Illinois.

> "It is the purpose of [the RTA] Act to provide for, aid and assist public transportation in the northeastern area of the State without impairing the overall quality of existing public transportation by providing for the creation of a single authority responsive to the people and elected officials of the area and with the power and the competence to provide financial review of the providers of public transportation in the metropolitan region and facilitate public transportation provided by Service Boards which is attractive and economical to users, comprehensive, coordinated among its various elements, economical, safe, efficient and coordinated with area and State plans."

History

In 1974, upon approval of a referendum in the six counties of metropolitan Chicago (Cook, DuPage, Kane, Lake, McHenry, and Will), the Act created the RTA as a unit of local government, body politic, political subdivision, and municipal corporation. Initially, the RTA provided financial assistance to the then existing public transportation operators. Subsequently, the role of the RTA expanded to include the acquisition and operation of such public transportation providers, as well as contract with operators to provide service through the purchase of service agreements.

In 1983, the Illinois General Assembly reorganized the structure and funding of the RTA. The Act placed operating responsibilities with the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"). These three entities are defined in the Act as the "Service Boards."

The CTA provides bus and rail transportation services within Chicago and 38 adjacent suburbs. Illinois State law (the Metropolitan Transportation Authority Act) created the CTA in 1945. The law established the CTA as an Illinois municipal corporation "separate and apart from all other government agencies" to consolidate Chicago's public and private transportation carriers. The CTA commenced operations in 1947 and completed the consolidation of public transportation in 1952 upon purchasing the Chicago Motor Coach System.

The Northeast Illinois Regional Commuter Railroad Corporation ("NIRCRC"), a public corporation created in 1980 and operating under the service name of Metra, provides public transportation by commuter rail. The 1983 RTA restructuring formed a Commuter Rail Division, "responsible for providing public transportation by commuter rail." The Commuter Rail Division continued the operation of NIRCRC to provide this transportation. Metra contracts with the Union Pacific Railroad, Burlington Northern Santa Fe, and Northern Indiana Commuter Transportation District to provide service through the purchase of service agreements. In addition, Metra operates the services provided on its North Central Service and South West Service rail lines, as well as the services formerly provided by Rock Island, Milwaukee Road, and Illinois Central Gulf.

The 1983 RTA restructuring also formed a Suburban Bus Division, "responsible for providing public transportation by bus and as may be provided in [the RTA] Act." As such, the Division - operating under the service name Pace - provides non-rail public transportation throughout DuPage, Kane, Lake, McHenry, and Will counties, as well as the suburban area of Cook County.

Collectively, we refer to the RTA, the CTA, Metra, and Pace as the "RTA System."

Mission

The Act sets forth the responsibilities of the RTA. These responsibilities encompass planning, funding, and oversight duties. The Board of Directors has developed the following goals to carry out the RTA legislative mandates:

Plan—Ensure an integrated regional public transportation system through comprehensive planning and coordination with the service providers.

Fund—Develop and allocate resources among the Service Boards to ensure they provide quality and cost-effective service.

Oversee—Monitor and evaluate Service Boards' performance to ensure that service is provided efficiently and effectively.

The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program. This obligation incorporates planning, funding, and oversight duties. The Act enumerates a number of requirements with respect to the budget, plan, and program. These include a requirement that the budget and plan reflect operating revenues of at least 50% of operating costs (a farebox recovery ratio of at least 50%). In addition, the budget and plan must show a balance between revenues, including subsidies, and costs (a balanced budget).

Other responsibilities include establishing policies regarding the allocation of public transportation funding in the Chicago metropolitan region, developing system-wide plans and service standards, coordinating services among different modes of transportation, and ensuring compliance with Federal and State mandates.

Budget

The Act establishes budgetary controls. The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program.

> "Each year the Authority shall prepare and publish a comprehensive annual budget and program document describing the state of the Authority and presenting for the forthcoming fiscal year the Authority's plans for such operations and capital expenditures as the Authority intends to undertake and the means by which it intends to finance them."

The Act establishes certain criteria for the budget, including subsequent monitoring for compliance. Further, the Five-Year Capital Program must specify capital improvements exceeding $250,000 along with pertinent information. The budget calendar and statutory requirements govern the budget development process leading up to adoption of the budget. Subsequent activities involve oversight and amendment of the budget.

Budget Calendar

Based upon the estimate of tax receipts and revenues from other sources, "the Board shall, not later than ... September 15 prior to the beginning of the Authority's next fiscal year" advise each Service Board of the

amounts estimated to be available during the upcoming fiscal year and the next two following years, the times when the amounts will be available, and the cost recovery ratio for the next year. The recovery ratio for the region must meet a minimum standard of 50%.

Between September 15 and November 15, each Service Board must prepare and publish a comprehensive annual budget, program document, and a financial plan for the two following years. "The proposed budget and financial plan shall be based on the RTA's estimate of funds that will be available to the Service Boards by or through the Authority, and shall conform in all respects to the requirements established by the Authority." Before submitting its budget to the RTA, each Service Board must hold at least one public hearing in each of the counties in which it provides service, and at least one meeting with each respective county board. After considering the comments from these meetings, it must formally adopt the budget prior to submitting it to the RTA. "Not later than... November 15 prior to the commencement of such fiscal year, each Service Board shall submit to the Authority its proposed budget for the fiscal year and its proposed financial plan for the two following years."

The RTA must also hold at least one public hearing in the metropolitan region and one meeting with each county board on its own proposed budget. After conducting these hearings and taking into consideration the comments, the RTA must adopt its budget and the budgets submitted by the service boards, each of which meets the statutory criteria summarized below. Unless the RTA passes a budget and financial plan for a Service Board, "the Board shall not release to that Service Board any funds for the periods covered by such budget and financial plan," except for the sales tax directly allocated to the Service Board by statute.

Statutory Requirements

The RTA Act sets forth six statutory criteria for Board approval of the budget and financial plan of each Service Board. These six criteria are:

- *Balanced Budget*: A balance between anticipated revenues from all sources including operating subsidies and the costs of providing the services and of funding any operating deficits or encumbrances incurred in prior periods;

- *Cash Flow*: Cash balances including the proceeds of any anticipated cash flow borrowing sufficient to pay with reasonable promptness all costs and expenses as incurred;

- *Recovery Ratio*: A level of fares or charges, and operating or administrative costs, to allow the Service Board to meet its required system-generated revenue recovery ratio;

- *Assumptions*: Employ assumptions and projections which are reasonable and prudent;

- *Financial Practices*: Prepared in accordance with sound financial practices as determined by the Board; and

- *Other Requirements*: Other financial, budgetary, or fiscal requirements that the Board may establish by rule or regulation.

Oversight

After adoption of the budgets, the RTA has continuing oversight powers concerning the budget and the financial condition of each Service Board and the region as a whole. On a monthly basis, the RTA monitors the budgetary and operations performance of the Service Boards to ensure compliance with their budget and recovery ratios. On a quarterly basis, the RTA makes the following assessment:

- After the end of each fiscal quarter, each Service Board must report to the RTA "its financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction" for such quarter. If in compliance, the Board so states and approves each Service Board's compliance by adopted resolution.

- If in the judgment of the Board these results are not substantially in accordance with the Service Board's budget for such period as adopted by the RTA, the Board shall so advise the Service Board and the service board "shall, within the period specified by the Board, submit a revised budget incorporating such results."

- Once a Service Board submits a revised budget, the RTA must determine if it meets the six statutory budget criteria necessary to pass an annual budget. If not, the RTA must withhold from the Service Board (i) 25% of the cash proceeds of taxes imposed by the RTA and (ii) 25% of any state matching funds that are allocated to each Service Board.

- If a Service Board then submits a revised budget and plan which shows that the statutory budget criteria will be met within a four quarter period, the RTA "shall release any such withheld funds to the Service Board."

Amendment

When prudent, the RTA Board may revise estimates of amounts of funds available to the Service Boards during a fiscal year due to shifts in the economic climate, governmental funding programs, or new projects. Upon receiving notice of such a revision, the Service Boards must submit amended budgets to the RTA Board within 30 days. The RTA Board must approve all proposed amendments. If approved, the RTA then monitors actual results compared to the amended budget.

Reporting Entity

As defined by Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity*, the financial reporting entity consists of the primary government (the RTA, as legally defined), as well as its component units—legally separate entities for which the primary government has financial accountability.

Although part of the RTA System, the CTA, Metra, and Pace do not represent component units of the RTA under GASB Statement No. 14. Accordingly, the Comprehensive Annual Financial Report of the Regional Transportation Authority does not include the financial statements of the Service Boards. However, a Combining Annual Financial Report does combine the financial statements of the RTA, the CTA, Metra, and Pace as required by the RTA Act.

RTA System Characteristics

The six-county area served by the RTA system covers 3,700 square miles. Based on the 2000 census, the region has 8 million residents. Regional employment totaled 5 million in 2000. The RTA system carried 651.8 million riders in 2008, an increase of 4.62% compared to the prior year.

Governance

The RTA Act specifies the composition of the RTA Board of Directors. The RTA Board consists of fifteen appointed members and one elected member from the six-county region. The Mayor of the City of Chicago appoints five directors. The suburban members of the Cook County Board appoint five directors. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry and Will counties, each appoint a director. These fifteen directors, with a minimum concurrence of eleven directors, elect the Chairman of the RTA Board of Directors.

The RTA employs a professional staff of ninety-eight. The RTA Act limits the amount of administrative costs that the RTA may incur annually. The limit was set at $5 million for 1985 and has increased at a rate of 5% per year. The RTA has always held its administrative expenses under the prescribed limit.

The Chicago Transit Board, consisting of seven members, governs the CTA. Its members are appointed pursuant to the Metropolitan Transit Authority Act. The Governor of Illinois appoints three members, subject to the approval of the Illinois Senate and the Mayor of Chicago. The Mayor of Chicago, with the consent of the Chicago City Council and the Governor of Illinois, appoints four members, including the CTA Chairman.

The RTA Act specifies the composition of the Metra (Commuter Rail Division) and Pace (Suburban Bus Division) Boards. The Commuter Rail Board, consisting of eleven members, governs Metra. The suburban members of the Cook County Board appoint four members. The Chairmen or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry and Will counties each appoint one director. The Mayor of Chicago, with the consent of the Chicago City Council, appoints one member. These eleven directors, with a minimum concurrence of eight directors, elect the Chairman of the Commuter Rail Board.

The Suburban Bus Board, consisting of thirteen members, governs Pace. The suburban members of the Cook County Board appoint six members. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry, and Will counties each appoint one director. The RTA Act requires that each of these directors must be a current or former "chief executive officer of a municipality" from the area that appoints the member. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry, and Will, plus the suburban members of the Cook County Board, by simple majority, appoint the Chairman of the Suburban Bus Board.

Financing

The RTA Act specifies the funding responsibilities of the RTA, appointing the RTA as the primary public body in the metropolitan region to secure funds for public transportation.

Sections 4.03 and 4.03.1 of the Regional Transportation Act, 70 ILCS 3615/4.03, authorizes the RTA to impose a series of taxes within the six-county metropolitan region by a vote of nine of its directors: a sales tax, a car rental tax, a motor fuel tax, an off-street parking tax, and a replacement vehicle tax.

Sales Taxes

The Act authorizes the RTA to impose a retailers' occupation tax "ROT," a service occupation tax "SOT," and a use tax "UT." The RTA imposed this tax at the maximum permissible rate in 1979. The 2008 legislation increased the sales tax by .25% in Cook County and .50% in the collar counties. The individual collar counties keep .25% of the increase. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes.
The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 1% in Cook County and .75% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result, the RTA tax on food and drugs is imposed at a rate of 1.25% in Cook, and .75% in collar counties.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate and tax base are identical to the ROT.

The UT is imposed on persons living in the six county areas for the privilege of using a vehicle purchased outside the six county area that must be registered with the State. Unlike the state use tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

Car Rental Tax

Section 4.03.1 of the Act authorizes the RTA to impose an automobile rental occupation and use tax. This occupation tax, paralleling the state and local car rental taxes may be imposed at a rate of 1% in Cook County and ¼% in the collar counties of the gross receipts from car rentals. The use tax may be imposed at the same rates on the privilege of using in the region a car rented outside, but titled in, Illinois. Any car leasing tax would be collected by the Illinois Department of Revenue.

This taxing power was added to the RTA Act in 1982, when the legislature imposed a state-wide car rental tax and authorized cities, counties, and certain special districts that had the power to impose sales taxes to tax the car rental occupation. This taxing power has never been exercised by the RTA.

Motor Fuel Tax

The Act authorized the RTA to impose a tax on retail sales and use of motor fuel at a rate of 5% of gross receipts. Section 4.03 (p) of the Act prohibits the RTA from imposing the motor fuel tax, if it has imposed the broader sales taxes described above. Consequently, this tax has never been imposed.

Off-Street Parking Tax

The Act authorizes the RTA to impose a tax in unspecified amounts on the privilege of parking a motor vehicle in a public or private fee-charging lot in the six county area. Because the Act prohibits the imposition of this tax if the RTA has enacted sales taxes, it has never been imposed.

Replacement Vehicle Tax

The Act authorizes the RTA to impose a $50 tax on any passenger car purchased within the metropolitan area by an insurance company in settlement of a total loss claim of its insured. Any such tax would be collected by the State. This taxing power has never been exercised by the RTA.

As indicated above, the RTA imposes a sales tax in the six-county Northeastern Illinois region. The Illinois Department of Revenue collects this tax and remits the collections to the Illinois State Treasurer. The Treasurer holds the funds in trust for the RTA outside the State Treasury. The Treasurer disburses the funds monthly to the RTA, without appropriation, upon order of the State Comptroller.

The amounts of funding and taxes received, together with revenues from the provision of transit services by the Service Boards and other operating revenues, provide the resources to cover operating costs of the RTA System.

FACTORS AFFECTING ECONOMIC CONDITION

Financing

The RTA's primary source of operating funding is a regional (occupation and use) sales tax and a sales tax match from the State of Illinois. Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region (from the equivalent of 1.0% in Cook County and 0.25% in the remainder of the region to the equivalent of 1.25% in Cook County and 0.5% in the remainder of the region) beginning on April 1, 2008, created a real estate transfer tax in the City of Chicago to fund the CTA, and raised from 25 percent to 30 percent the portion of RTA tax revenues matched by the State Public Transfer Fund (PTF). In 2008, RTA sales tax receipts of $921 million exceeded prior year by 22.4% because of the rate increase but lagged budget by 4.5% because of the economic downturn during the second half of the year. In 2007, 2006, 2005, 2004, and 2003, the RTA sales tax increased 0.8%, 6.6%, 3.7%, 3.2%, and 1.1%, respectively.
The RTA 2009 operating budget approved by the Board of Directors on December 18, 2008, assumes sales tax revenue of $1,040 million, an increase of 12.9% and 7.8% over the 2008 actual and 2008 budget, respectively. In addition to the 30% sales tax match from the PTF, the State of Illinois will provide $116 million to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds and $37 million as partial reimbursement to the Service Boards for discounted and free fares (mandated by law) for student, elderly, and disabled riders.

Regional and Illinois Economy

The Chicago region is the home to one of the most economically diversified economies in the United States. According to World Business Chicago, the area leads the U.S. in many economic measurements, including high technology employment and output, manufacturing output, and truck, inter-modal, rail, and air distribution. Second only to New York, the region is home to 96 major publicly-traded headquarters, including 30 Fortune 500 companies. Noted strengths of the Chicago area economy include construction, transportation, utilities, manufacturing, information technology, wholesale and retail trade, leisure and hospitality, professional and business services, education, and healthcare.

Like the nation, both Illinois and the Chicago region posted significant declines in the unemployment rate earlier this decade. However, the unemployment rate in Illinois increased from 4.6% in 2006 to 5.1% in 2007 to 6.5% in 2008, while the unemployment rate in the Chicago region increased from 4.5% in 2006 to 4.9% in 2007 to 6.2% in 2008. The February 2008 Monthly Revenue Briefing issued by the State

Commission on Government Forecasting and Accountability noted that during the first nine months of the State's 2009 fiscal year, sales tax receipts of $5.2 billion decreased $241 million or 4.5% compared to the same period during the State's previous fiscal year.

National Economy

Through 2000, the real gross domestic product (GDP), the output of goods and services produced in the United States, grew in the neighborhood of 4% annually for several consecutive years. In 2001, the annual growth rate plunged to 0.8% before rebounding to a modest 1.6% in 2002 and 2.5% in 2003. The annual growth rate of 3.6% in 2004 declined to 2.9% in 2005, 2.8% in 2006, 2.0% in 2007 and 1.1% in 2008. The Congressional Budget Office (CBO) predicts real GDP contraction of 2.2% in 2009 followed by growth of 1.5% in 2010.

The national unemployment rate averaged 5.8% in 2008, rising from 4.6% in 2007 and 2006 after falling from 5.1% in 2005, 5.5% in 2004 and 6.0% in 2003, the highest average annual rate since 1994. The national unemployment rate rose from 8.1% in February to 8.5% in March 2009. The CBO forecasts national average unemployment rates of 8.3% and 9.0% in 2009 and 2010, respectively.

In 2008, the consumer price index (CPI), a measure of the pace of inflation, increased 3.8% following increases of 2.8% in 2007, 3.2% in 2006, 3.4% in 2005, 2.7% in 2004 and 2.3% in 2003. The CBO expects the CPI to increase 0.1% in 2009 and 1.7% in 2010.

Cash Management

RTA cash management policies and practices vary by fund.

General and Agency Funds

The RTA Board has adopted an investment policy that governs the investment of cash for these funds. The RTA policy which complies with Illinois law, addresses safety of principal, liquidity of funds, rate of return, as well as the other areas required by Illinois law. The policy lists permitted investments and prescribes safekeeping, collateralization, and reporting requirements. RTA staff manages the investment of these funds.

The RTA policy establishes the following objectives:

- ***Safety of Principal***—Every investment will be made with safety as the primary and overriding concern. Each investment transaction shall ensure that loss of capital, whether from credit or market risk, is minimized.

- ***Liquidity***—Maturity and marketability aspects of investments should be coordinated with the anticipated cash flow needs of the RTA.

- ***Rate of Return***—A secondary objective is to seek the highest return on investments consistent with preservation of principal and prudent investment principles.

- ***Public Trust***—The RTA and its officers should avoid any investment transaction or practice which in appearance or may impair public confidence in its stewardship of public funds.

- ***Investments in Local and Disadvantaged Institutions***—Locally owned and disadvantaged business financial institutions contribute to economic development of the RTA service area. The RTA recognizes its interest in the vitality of the local economy by investing in local, minority, and female (if any) owned financial institutions.

Debt Service Fund

Each bond issue has a separate debt service account, administered by a trustee, to accumulate the amount necessary for the next bondholder payment. The trust agreement establishes the requirements for the administration of the account, and requires that the trustee invest in securities that are legal investments under the laws of the State of Illinois at the time of investment.

Capital Projects Fund

The RTA usually contracts with an investment institution to manage the proceeds of its bond issues. A separate contract, awarded on a competitive basis, governs each issue. The contract requires full collateralization, limited to securities guaranteed by the full faith and credit of the United States government as to principal and interest, the Export-Import Bank of the United States, and selected agencies created pursuant to an Act of Congress, with weekly mark-to-market.

Joint Self-Insurance Fund

An RTA ordinance was passed to govern this fund. RTA staff manages the investment of these funds in compliance with this ordinance and the RTA investment policy. The joint self-insurance fund maintains a separate account for these funds. Cash and cash equivalents of the Joint Self-Insurance Fund are held in separate accounts and not commingled with other RTA assets.

Pension Fund

An RTA ordinance was passed to govern this fund. The ordinance requires that the RTA Board appoint the trustees to oversee the investment of the pension fund. A representative from the RTA, Metra, and Pace, plus four individuals not employed in the RTA system, comprise the trustees. The trustees have adopted an investment policy and have apportioned the pension fund among a number of investment institutions to execute this policy. In addition, the trustees utilize an independent firm to monitor the performance of the investment institutions.

Risk Management

The RTA, CTA, Metra, and Pace established a Loss Financing Plan in 1986. The Plan operates as a self-insurance program to provide a source from which to temporarily finance catastrophic losses and other claims incurred by the RTA and the Service Boards, arising out of personal injuries, property damage, and certain other losses. The participating entities (RTA, CTA, Metra, and Pace) administer the Plan, with a representative from the RTA acting as the Fund Manager and representatives from the CTA, Metra, and Pace acting as Fund Advisors.

The Plan required the creation of a Joint Self-Insurance Fund. The Fund has entered into a multi-year, claims-paid insurance agreement to insure against certain losses in excess of $5 million. The Fund pays premiums for this coverage. The participating entities must repay the Fund for submitted claims paid by the Fund that are not covered by the insurance agreement.

Pension and Other Post Employment Benefits

The RTA sponsors a multi-employer defined benefit pension plan for substantially all employees of the RTA and its Commuter Rail and Suburban Bus Divisions (Metra and Pace, respectively) who are not otherwise covered by a union pension plan. RTA, Metra, and Pace are collectively referred to hereinafter as the Employer. Each year, an independent actuary engaged by the pension plan calculates the amount of the annual contribution that each employer must make to the pension plan to ensure that the plan will be able to fully meet its obligations to retired employees on a timely basis. In 2007 and 2008, the employer's pension costs equal the required and actual contributions which were $9,137,000 and $9,195,000, respectively. The required contributions were determined as part of the January 1, 2007 and 2008 actuarial valuations.

The RTA also offers eligible retirees the option to continue participation in its group health insurance plan. Election to participate is voluntary with the RTA incurring no additional obligations except that the RTA will pay each eligible retiree the sum of up to $78 per month toward the cost of his/her health insurance. There are 20 participants eligible to receive benefits at December 31, 2008. The RTA recognized retiree health care benefits as expenses as they are paid and are not material in amount at the present time.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the RTA for its Comprehensive Annual Financial Report ("CAFR") for the year ended December 31, 2007. This was the fourteenth consecutive year that the RTA has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

In addition, the RTA received the GFOA Award for Distinguished Budget Presentation for its annual budget for the year ending December 31, 2008. This marks the twelfth consecutive year that the RTA has achieved this accomplishment. The Distinguished Budget Presentation Award requires that the GFOA judge the budget document as proficient in several categories, including policy documentation, financial planning, and organization.

I would like to express my appreciation to the RTA staff for their efforts in preparing this report.

Independent Auditor's Report

Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Regional Transportation Authority ("RTA") as of and for the year ended December 31, 2008, which collectively comprise the RTA's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the RTA's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Regional Transportation Authority as of December 31, 2008, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards,* we have also issued our report dated June 10, 2009 on our consideration of the RTA's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Required Supplementary Information and the Management's Discussion and Analysis listed in the foregoing table of contents are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

McGladrey & Pullen, LLP is a member firm of RSM International –
an affiliation of separate and independent legal entities.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the RTA's basic financial statements. The combining and individual fund schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund schedules are the responsibility of the RTA's management. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The accompanying introductory and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

REGIONAL TRANSPORTATION AUTHORITY

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) provides an overview of the financial activity affecting the operation of the Regional Transportation Authority ("RTA") for the fiscal year ended December 31, 2008. Please read it in conjunction with the RTA's basic financial statements which follow this section.

Financial Highlights

- For the year ended December 31, 2008, the RTA statement of activities for the governmental activities shows expenses increasing $68 million to $590 million from $522 million for the same period in 2007. This increase is due to an increase in financial assistance to the CTA, Metra, and Pace ("Service Boards") by $58 million. Revenues decreased by $34 million from 2007. The decrease was primarily due to lower operating grants and lower investment income offset by more PTF and state assistance.

- The government-wide statement of net assets shows assets of $693 million for the governmental activities, a net increase of $23 million. The increase is mainly due to an increase in receivables of $144 million offset by a decrease in cash and investments of $123 million. The increase in receivables was due to the timing of receipts. The decrease in cash and investments is due to capital expenditures activity in 2008. In the government-wide statement of net assets, bond-related liabilities decreased by $71 million due to payments for general obligation bonds in 2008.

- At the end of 2008, the government-wide statement of net assets shows a deficit of $2.1 billion for governmental activities. In contrast, the governmental funds balance sheet presented a total fund balance of $313 million. There is a $2.4 billion difference between the fund balance and the net deficit. This does not in any way represent a precarious financial position for the RTA. Rather, it is the result of the presentation of RTA financial statements required by the GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments ("GASB Statement No. 34")*, as it relates to the recording of the RTA general obligation bonds in the government-wide statement of net assets.

- The RTA has the obligation to pay the bonds it has issued to fund the Service Boards' capital expenditures. These expenditures and the related assets appear in the Service Boards' financial statements. The sales taxes imposed by the RTA in the region represent the primary source of payment for the bond obligations.

USING THIS COMPREHENSIVE ANNUAL FINANCIAL REPORT (CAFR)

Overview of the CAFR—The RTA CAFR consists of three parts:

1. Introductory Section—This section includes the letter of transmittal, the GFOA Certificate of Achievement, the organizational chart, and the list of principal officials.

2. Financial Section—This section is comprised of the independent auditor's report, the management's discussion and analysis, the basic financial statements, and the required supplementary information and combining and individual fund schedules.

3. Statistical Section (Unaudited)—This section provides additional analysis and is not a required part of the basic financial statements of the RTA.

The basic financial statements contain three parts: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to financial statements. A discussion of the basic financial statements is included in this CAFR as follows:

Government-wide Financial Statements—The government-wide financial statements provide a broad overview of the RTA finances in a manner similar to those of a private-sector business. The statements are prepared following the full accrual basis of accounting.

- ***Statement of Net Assets***—The statement of net assets presents information on all of the RTA's assets and liabilities. The statement subtracts liabilities from assets to compute—in the case of the RTA—a net deficit. This net deficit reflects the recording of bonds issued by the RTA for capital grants to the Service Boards to acquire and construct assets used to provide public transportation. These assets appear in the financial statements of the Service Boards. The bonds represent general obligations of the RTA to which the RTA has pledged its full faith and credit.

  The size of the net deficit will increase as the RTA continues to issue bonds to fund the RTA System capital program.

- ***Statement of Activities***—The statement of activities shows the change in net assets of the governmental and business-type activities. Governmental activities include operating and capital asset funding (capital grants) to the Service Boards, RTA administrative expenses, the RTA Travel Information Center, certification of riders for paratransit service under the Americans with Disabilities Act (regional expenses), and interest expense on bonds issued by the RTA. Business-type activities consist of the RTA Joint Self-Insurance Fund.

  The government-wide financial statements include only the RTA (the "primary government"). There are no "component units" (separate legal entities for which the RTA is financially accountable) that the RTA government-wide financial statements are required to include.

  The RTA does not consider the CTA, Metra, or Pace to be component units, therefore, the RTA government-wide financial statements do not incorporate the financial data of the Service Boards. See Letter of Transmittal and Note 1 to the financial statements for further details.

Fund Financial Statements—A fund refers to a set of related self-balancing accounts used to maintain control over resources segregated for specific activities or objectives. The RTA, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The RTA's funds are accounted for in three fund types: governmental funds, proprietary

funds, and fiduciary funds. These financial statements are prepared following the modified accrual basis of accounting.

- ***Governmental Funds***—Governmental funds account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as balances of spendable resources available at the end of the year.

  Unlike the information presented for governmental funds, information presented for governmental activities in the government-wide financial statements, includes the long-term impact of near-term financing decisions. The governmental funds financial statements provide reconciliations to facilitate comparison between governmental funds and government-wide financial statements.

  In the fund level basic financial statements, the RTA presents three major governmental funds: a general fund, a debt service fund, and a capital projects fund. The governmental funds financial statements present information for each major fund separately. Individual fund data for each of the RTA governmental funds is presented in this CAFR in the section labeled "Combining and Individual Fund Schedules."

  The RTA adopts an annual appropriated budget for its general fund. The Required Supplementary Information and Combining and Individual Fund Schedules include a budgetary comparison.

- ***Proprietary Funds***—The RTA maintains a proprietary fund to account for the RTA Joint Self-Insurance Fund. This type of proprietary fund, referred to as an enterprise fund, reports the same functions presented as business-type activities in the government-wide financial statements. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. As required by Article II of the Loss Financing Plan, the RTA Joint Self-Insurance Fund issues separate audited financial statements.

- ***Fiduciary Funds***—Fiduciary funds account for resources held for the benefit of parties outside the government activity. In the case of the RTA, the fiduciary fund accounts for the assets of the RTA defined-benefit Pension Plan and the Sales Tax Agency Fund. The government-wide financial statements do not reflect fiduciary funds as these funds are not available to support the programs and operations of the RTA. The RTA Pension Plan issues audited financial statements separately.

ANALYSIS OF THE GOVERNMENT-WIDE FINANCIAL STATEMENTS

The following table summarizes the Statement of Net Assets:

SUMMARY OF NET ASSETS
DECEMBER 31, 2008 AND 2007
(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2008	2007	Variance	2008	2007	Variance	2008	2007	Variance
Assets:									
Cash and investments	$ 396,836	$ 519,578	$ (122,742)	$ 22,902	$ 21,199	$ 1,703	$ 419,738	$ 540,777	$ (121,039)
Other assets	284,539	140,387	144,152	3,207	3,444	(237)	287,746	143,831	143,915
Noncurrent assets	-	-	-	2,750	3,750	(1,000)	2,750	3,750	(1,000)
Capital assets—net	11,118	9,754	1,364	-	-	-	11,118	9,754	1,364
Total assets	692,493	669,719	22,774	28,859	28,393	466	721,352	698,112	23,240
Liabilities:			-						
Current non bond-related liabilities	307,281	97,933	209,348	-	-	-	307,281	97,933	209,348
Current bond related liabilities	74,157	70,387	3,770	-	-	-	74,157	70,387	3,770
Long-term non-bond-related liabilities	50,136	51,442	(1,306)	-	-	-	50,136	51,442	(1,306)
Long-term bond-related liabilities	2,312,541	2,387,376	(74,835)	-	-	-	2,312,541	2,387,376	(74,835)
Total liabilities	2,744,115	2,607,138	136,977	-	-	-	2,744,115	2,607,138	136,977
Net assets (deficit):									
Invested in capital assets	11,118	9,754	1,364	-	-	-	11,118	9,754	1,364
Unrestricted (deficit)	(2,062,740)	(1,947,173)	(115,567)	28,859	28,393	466	(2,033,881)	(1,918,780)	(115,101)
Total net assets (deficit)	$ (2,051,622)	$ (1,937,419)	$ (114,203)	$ 28,859	$ 28,393	$ 466	$ (2,022,763)	$ (1,909,026)	$ (113,737)

As of December 31, 2008, cash and investments for governmental activities decreased by $123 million over the previous year. During 2008, the Capital Projects Fund decreased by $93 million, conversely the Debt Service Fund increased by $2.8 million. The decrease in cash and investments for the Capital Projects Fund reflects the activity in bond capital expenditures.

As of December 31, 2008, the current non bond-related liabilities increased by $209 million from the previous year due to timing differences in funds distributed to the Service Boards.

The presentation of financial statements under the GASB Statement No. 34 requires the recognition in the statement of net assets of $2.4 billion in current and long-term general obligation bonds payable. Prior to the implementation of GASB Statement No. 34, these bonds were recorded in the general long-term debt account group and presented, prior to the 2001, as credits, with an equal amount of other debits (i.e., amount available and amount to be provided for the retirement of long-term debt). This was a result of the recording of bonds issued by the RTA under its bonding authority. The issuance of these bonds was for the specific purpose of funding capital grants to acquire and construct assets used to provide public transportation within the RTA region.

The size of the net deficit will continue to increase over time as the RTA progresses with its bond financing to fund the RTA System capital program. This deficit will not affect the availability of RTA fund resources for future use. In fact, the RTA maintains its operations funding levels for 2009 as established in September 2008 during the 2009 budget process.

The following table summarizes the RTA Statement of Activities presented in this CAFR:

SUMMARY OF ACTIVITIES
DECEMBER 31, 2008 AND 2007
(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2008	2007	Variance	2008	2007	Variance	2008	2007	Variance
Expenses:									
Financial assistance to Service Boards	$ 249,948	$ 249,941	$ 7	$ -	$ -	$ -	$ 249,948	$ 249,941	$ 7
Administration of capital grants	119,373	113,328	6,045	-	-	-	119,373	113,328	6,045
Administration of operating grant	58,142	-	58,142	-	-	-	58,142	-	58,142
Administrative expenses	7,532	6,967	565	4,375	4,855	(481)	11,907	11,822	84

							-	-	
Net assets—end of year	$ (2,051,622)	$ (1,937,419)	$ (114,203)	$ 28,859	$ 28,393	$ 466	$ (2,022,763)	$ (1,909,026)	$ (113,737)

Financial assistance to the Service Boards increased by $58 million from $250 million in 2007 to $308 million in 2008. Capital grants to the Service Boards increased by $6 million, from $113 million in 2007 to $119 million in 2008, which reflects the activity in capital expenditures to the Service Boards during 2008. The amount of bond interest expense decreased by $3 million from $130 million to $127 million. PTF and state assistance increased by $42 million, offset by the sales tax decrease of $4 million, a decrease in investment income of $32 million, and the decrease in operating grant revenue of $40 million, resulting in a decrease of $34 million in total revenue from 2007.

During 2008, a total of $3.9 million was transferred to the Joint Self-Insurance Fund for excess liability. Insurance premiums represent the only major expense, and investment income represents the only revenue for the Business-type activities (insurance financing).

FINANCIAL ANALYSIS OF THE GOVERNMENT FUNDS

As noted earlier, the RTA employs three fund types: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds—Governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as the balances of spendable resources available at the end of the year. See the Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances on pages 27 and 29, respectively, for further details.

General Fund—Assets in the general fund primarily represent the amounts for Service Boards' operations and capital projects. Assets increased by $83 million from $264 million in 2007 to $347 million in 2008, mainly due to timing differences. Also, intergovernmental receivables increased $144 million due to timing differences.

At December 31, 2008, the majority of RTA's liabilities of $293 million are comprised of intergovernmental payables, i.e., accrued financial assistance, sales taxes, capital and other grants due to the Service Boards and deferred revenue and notes payable.

The total fund balance of the General Fund equals $53 million at December 31, 2008. The General Fund balance decreased by $96 million primarily due to decreases in sales taxes, operating assistance - CTA/PACE ADA Paratransit and increases in financial assistance to the Service Boards.

Reserved for other includes $25 million in interest rate swap expenses, $15 million in RTA capital, $47 million in Debt Service Deposit Agreement ("DSDA"), and $370 thousand in prepaid items. The amount reserved for RTA capital projects is for projects focusing on the application of advanced technology on transportation systems to improve the efficiency of such systems. The transit industry views such technology as having the potential for increasing ridership and revenues by making transit systems more attractive to customers.

These applications include the following:

- Active transit station signs, Phase III expansion and evaluation (variable message signs designed to provide real-time "next train" or "next bus" service information at transit stops).
- Transfer connection protection (a system to minimize connecting time between transit vehicles by ensuring pre-scheduled connections).
- Transit management systems (voice/data communication functions, computer-aided dispatching, and automatic vehicle location technologies to improve transit operating efficiency, increase service reliability, and ensure schedule adherence).
- Parking management systems (real-time information and guidance regarding the availability of parking spaces at transit and ride-share parking facilities).
- Transit signal priority (gives/extends a green signal to transit buses under certain circumstances to reduce passenger travel times, improve bus schedule adherence, and reduce bus operating costs).

- Multi-Modal Trip Planner System (MMTPS) to provide side by side comparisons of trip itineraries using transit, driving, or any combination of non-motorized modes such as biking and walking. It will give customers a comprehensive decision support tool for choosing travel options that incorporate convenience, efficiency, and cost – from the traveler's perspective.

- Traveler Resource and Itinerary Planning System (TRIPS) is a traveler information system which matches regional attractions with transit directions using interactive electronic kiosks.

The remaining unreserved and undesignated fund balances total ($53) million.

Debt Service Fund—The RTA establishes a Debt Service Fund to account for transfers received from the General Fund, investment income, and principal and interest payments made for each of its outstanding series of bonds. As of December 31, 2008, the RTA has nineteen series of general obligation bonds outstanding. Each respective bond agreement sets forth the debt service funding requirements. The 2008 Debt Service Fund balance increased by $2.8 million from 2007 to $80 million.

Capital Projects Fund—The RTA has established a Capital Projects Fund to account for bond proceeds, earnings on the investment of such proceeds (except noted otherwise), and the expenditure of such monies for capital assets of the Service Boards. In addition, the RTA can use a portion of these funds to pay for debt service on the related bonds. During 2008, the Capital Projects Fund decreased by $93 million. The decrease in cash and investments for the Capital Projects Fund reflects the activity in bond capital expenditures.

Proprietary Fund—The RTA has established a proprietary fund to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one proprietary fund which relates to the activities of the Joint Self-Insurance Fund.

GENERAL FUND BUDGETARY HIGHLIGHTS

Overall, revenues are lower than the budget goal by $45.8 million. A poor economic environment during 2008 resulted in lower than budgeted sales tax receipts, hence, higher PTF receipts. The RTA receives reimbursement from the State for debt service on bonds issued under the Strategic Capital Improvement Plan (SCIP). Such reimbursement, termed ASA and AFA, is included in the State assistance line item in the financial statements, which recognized a total of $121.9 million in 2008. In 2008, the investment income was $23.8 million less than budgeted, which was due mainly to interest rate swap valuation cost of $124 million in 2008. Total financial assistance to the Service Boards was lower than budget by $53 million in 2008. Other non-administration and technology program expenditures did not reach budgeted levels by $3.4 million, primarily due to delays in some program initiatives.

By policy established by the RTA ordinance, the annual budget and two-year financial plan adopted by the RTA each year must reflect an unreserved and undesignated fund balance of its general fund equal to or greater than 5% of the RTA total operating expenditures by the end of the planning period. The RTA has consistently met this requirement each year since its establishment.

SERVICE BOARDS CAPITAL ASSETS AND LONG-TERM DEBT ACTIVITY

The financial statements of the Service Boards reflect the capital assets discussed in this section. The statement of net assets for the RTA reflects the RTA bonds issued to provide a portion of the funding for these assets. The details of the RTA bond program are discussed further in Note 10 of this report.

Service Boards Capital Assets—The RTA System provides 651.8 million unlinked passenger trips annually. This has the beneficial impact of reducing road congestion, improving the flow of goods and services, and enhancing air quality. In addition, the RTA System provides essential mobility to those persons unable to utilize other transportation. The System represents an asset with replacement cost estimated at more than $31.3 billion for the entire region. To continue these public benefits, the RTA strives to maximize the amount of resources devoted to investment in its System for it to remain in good working order. The RTA Five-Year Capital Program report contains the details of this investment. The Five-Year Capital Program report is updated and adopted annually by the RTA Board, as required by the RTA Act.

Sources of funds for capital investment include federal programs, proceeds of RTA bonds, and State of Illinois programs. The level of capital funding from Federal as well as State programs has risen, reflecting the increasing recognition of the importance of public transportation. In recent years, the RTA and the Service Boards have also been able to direct funds to capital projects by successfully constraining operating costs.

Long-Term Debt Activity—Under the RTA Act, the RTA has authority to issue General Obligation Bonds for the improvement and expansion of the RTA System. This authority resulted from successful RTA efforts to demonstrate to the State legislature the need for capital reinvestment. The authorization identified two types of bonds: Strategic Capital Improvement Program ("SCIP") bonds and RTA ("Non-SCIP") bonds.

Prior to January 1, 2000, the RTA had the authority to issue up to $500 million in SCIP bonds and to have up to $500 million in Non-SCIP bonds outstanding. Effective January 1, 2000, the RTA Act was amended to increase the RTA authorization by an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004, and to issue and have outstanding up to $800 million of Non-SCIP bonds. As of year-end 2008, the RTA has issued $1.790 billion in SCIP bonds, with total SCIP bonds outstanding of $1.577 billion. The remaining $650.4 million bonds outstanding relate to Non-SCIP bonds.

For 2008, the bonds issued by the RTA carried a rating of "AA+" from Standard & Poor's, Aa2 by Moody's Investors Service, Inc and AA by Fitch, Inc. On May 27, 2009, Fitch Ratings downgraded the Regional Transportation Authority general obligation bond rating to AA- from AA and assigned a negative outlook to outstanding general obligation debt. On June 8, 2009, Moody's Investors Service downgraded the Regional Transportation Authority's approximately $2.5 billion of outstanding parity bonds to Aa3 from Aa2.

CONTACTING THE FINANCIAL MANAGEMENT OF THE REGIONAL TRANSPORTATION AUTHORITY

This CAFR provides a general overview of the finances of the RTA. Users of the CAFR should address questions concerning the information, or requests for additional financial information, to the Regional Transportation Authority, c/o Senior Deputy Executive Director, Finance and Administration 175 West Jackson Blvd., Suite 1550, Chicago, Illinois 60604 or visit our website at www.rtachicago.org.

REGIONAL TRANSPORTATION AUTHORITY

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET TO THE STATEMENT OF NET ASSETS
DECEMBER 31, 2008
(In Thousands)

TOTAL FUND BALANCE—GOVERNMENTAL FUNDS	$ 312,505
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds. This is the capital assets, net of accumulated depreciation recognized in the statement of net assets.	11,118
Bond issue costs are paid in the current year and, therefore, are reported in the funds. This asset represents the unamortized portion recognized in the statement of net assets.	12,067
General obligation bonds payable are not due and payable in the current period and, therefore, are not reported in the funds. This liability represents the total current and long-term portion of the general obligation bonds payable recognized on the statement of net assets.	(2,227,575)
Bond premiums are paid in the current year and, therefore, are reported in the funds. This liability represents the unamortized portion recognized in the statement of net assets.	(125,204)
Accrued interest payable on bonds is not due and payable in the current period and, therefore, is not reported in the funds. This liability is accrued in the statement of net assets.	(33,919)
Expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.	(614)
TOTAL NET DEFICIT—GOVERNMENTAL ACTIVITIES	$ (2,051,622)

The notes to financial statements are an integral part of this statement.

The notes to financial statements are an integral part of this statement.

REGIONAL TRANSPORTATION AUTHORITY

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF THE GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
YEAR ENDED DECEMBER 31, 2008
(In Thousands)

NET CHANGE IN FUND BALANCES—TOTAL GOVERNMENTAL FUNDS	$ (186,064)
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay ($2,096) exceeded depreciation expense ($732) in the current period.	1,364
The repayment of the principal of long-term debt consumes the current financial resources of governmental funds. However, this transaction has no effect on net assets.	64,685
Accrued interest on bonds reported in the statement of activites does not require the use of current financial resources and, therefore, is not reported expenditures in governmental funds.	678
Governmental funds report bond premiums as financing source. However, in the statement of activities, the premiums are amortized over the life of the bonds and recorded as a reduction of bond interest expense.	5,702
Unamortized bond issue costs reported in the statement of activities require the use of current financial resources and therefore, are fully recognized in the governmental funds.	(579)
Expenses reported in the statement of activities do not require the use of current resources and, therefore, are not reported as expenditures in governmental funds.	11
CHANGE IN NET ASSETS OF GOVERNMENTAL ACTIVITIES	$ (114,203)

The notes to financial statements are an integral part of this statement.

1. REPORTING ENTITY

The Regional Transportation Authority ("RTA") was established in 1974 upon approval of a referendum in its six-county Northeastern Illinois region. The operating responsibilities of the RTA are set forth in the RTA Act ("Act"). The RTA is a unit of local government, body politic, political subdivision and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, on November 9, 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"), each having its own independent board of directors. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Service Boards provide services to different geographic areas within the six-county region. Metra provides transit service to the six-county area, with the majority of the transit riders residing in the suburban metropolitan area and commuting into the City of Chicago. Pace's primary service area is the suburban communities, with limited services to areas within the City of Chicago. The CTA provides service to the City of Chicago and 38 neighboring suburbs within Cook County. Although programs are underway to increase the transfer of ridership between the service entities, trips of this type presently represent a minority of those taken.

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA System as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. For purposes of the recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with generally accepted accounting principles, with certain exceptions. Capitalized expenditures are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act. The Service Boards achieve their required recovery ratio by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA has the responsibility to monitor the budgets and financial performance of the Service Boards.

As defined by accounting principles generally accepted in the United States established by the Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity,* the financial reporting entity consists of the primary government, as well as its component units, which are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountability is defined as:

> Appointment of a voting majority of the component unit's board, and either: (a) the ability to impose will by the primary government, or (b) the possibility that the component unit will provide a financial benefit to, or impose a financial burden on, the primary government; or fiscal dependency on the primary government.

In addition, a component unit also includes certain organizations that the primary government is not financially accountable for if the nature and significance of their relationship, including ongoing financial support are such that exclusion from the financial reporting entity would render the entity's financial statements incomplete or misleading.

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with governmental accounting and financial reporting standards in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters, including ownership of assets, relations with Federal and State transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.

- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors who is also an RTA Board member.

- The Illinois statutes required the RTA Board to approve the budgets of the Service Boards if such budgets meet specified system-generated revenues recovery ratios and other requirements as defined by the Act.

- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficits.

Based on these factors and applying the aforementioned criteria used to determine financial accountability, management of the RTA does not consider the Service Boards to be component units and, accordingly, the financial data of the Service Boards have been excluded from the RTA reporting entity. The RTA is not aware of any entity which is financially accountable for the RTA that would result in the RTA's being considered a component unit of such entity.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the RTA conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting—The accounts of the RTA are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled. In the financial statements, the various funds are grouped into three broad fund types and six generic fund categories as follows:

Governmental Fund Types—The RTA's Governmental Fund Types consist of the General Fund, Debt Service Fund, and Capital Projects Fund.

General Fund—The General Fund is the general operating fund of the RTA. It is used to account for all financial transactions that are not specifically required to be accounted for in another fund.

Debt Service Fund—The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

Capital Projects Fund—In 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of Strategic Capital Improvement Program ("SCIP") bonds, and to have a maximum of $500 million RTA bonds outstanding. The Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of the bond issues. The Capital Projects Fund was first established in 1990 with the issuance of $100 million of RTA bonds to fund capital projects at the Service Boards. The proceeds from the bonds issued under the General Assembly's authorization were allocated by the RTA as follows: 50% for capital projects of the CTA; 45% for capital projects of Metra; and 5% for capital projects of Pace. Projects included in approved five-year Capital Programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

In 1999, the Illinois General Assembly passed additional bonding authorization, thereby increasing the RTA bond authority to $800 million outstanding effective January 1, 2000. It also increased SCIP bond issues by $260 million each year for five years from 2000 to 2006 for a total of $1.5 billion additional bond issues.

Proprietary Fund Type—Proprietary Funds are used to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one Proprietary Fund which relates to the activities of the Joint Self-Insurance Fund.

Joint Self-Insurance Fund—The Joint Self-Insurance Fund ("Fund") is used to account for the financing of claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. The Fund is essentially a financing mechanism providing a source from which to borrow or to pay for the first $5 million of catastrophic losses and other claims incurred by the Service Boards and the RTA arising out of personal injuries, property damage, and certain other losses. This Fund is reported as an Enterprise Fund since the predominant participants are outside of the RTA.

Fiduciary Fund Type—Fiduciary Funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's Fiduciary Funds consist of one Agency (Sales Tax) Fund and a Pension Trust Fund.

Agency Fund—The Sales Tax Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra and Pace, including Retailers' Occupation and Use Tax (sales taxes), interest on sales taxes, and reduced fare reimbursement grants. For RTA budgetary purposes, sales tax receipts are recorded in the Sales Tax Agency Fund and are equally offset by amounts recorded as disbursements reflecting the pass-through to the Service Boards.

Pension Trust Fund—The Pension Trust Fund is used to account for the accumulation of resources for, and payments of, retirement benefits to employees participating in the RTA Pension Plan.

Government-wide and Fund Financial Statements—The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the RTA in a manner similar to a private-sector business. The effect of

interfund activities has been removed from these statements. Governmental activities which are supported by sales taxes and intergovernmental revenues are reported separately from the insurance activities. The insurance activities include interest charges for loans advanced for claims of the Service Boards. Likewise, the fiduciary fund type - RTA Pension Trust Fund and Sales Tax Agency Fund are presented separately and are not included in the government-wide financial statements of the RTA.

The statement of activities shows certain direct program expenses which are offset by program revenues. Governmental program activities include expenses such as financial assistance and capital asset funding (capital grants) to CTA, Metra, and Pace; administrative expenses; operating the RTA Travel Information Center, certifying riders for paratransit service under the Americans with Disabilities Act ("ADA") and other services (regional expenses); and payment of debt service on bonds issued by the RTA. Program revenues include operating grants and contributions that are restricted to meeting the operational requirements of a particular program (i.e., technology and non-technology programs). Sales taxes, Public Transportation Fund ("PTF"), state assistance ("ASA/AFA") investment income and other items properly excluded from program revenues are reported instead as general revenues.

Fund level financial statements are provided for governmental funds, proprietary fund, and fiduciary funds.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation—The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund (Joint Self-Insurance Fund) and the Pension Trust Fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Sales taxes are recognized as revenues if collected by the retailers by year-end. Grants and similar items are recognized as revenues when qualifying expenditures have been incurred and as soon as all eligibility requirements imposed by the grantors have been met. Prepaid expenses are recorded using the consumption method.

The Joint Self-Insurance Fund distinguishes operating revenues and expenses from non-operating items. Operating revenues (interest charged to Service Boards) and expenses (administrative expenses including insurance premium and professional services) generally result from providing services in connection with the proprietary fund's ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The Sales Tax Agency Fund is custodial in nature (assets equal liabilities) and does not involve the measurement of results of operations.

Governmental fund financial statements use the current financial resources measurement focus. The funds are accounted for using the modified accrual basis of accounting; i.e., revenues are recognized as soon as they are both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or shortly thereafter to pay liabilities of the current period. Sales taxes are considered measurable and available if collected by the retailer by year-end and received by the RTA within 80 days after year-end. ASA/AFA are considered measurable and available if billed and received within 180 days after year-end. Sales taxes and ASA/AFA are susceptible to full accrual. Additionally, certain compensated absences and claims and judgments are recognized when the obligations are expected to be liquidated with expendable available financial resources.

The RTA reports three major governmental funds—General Fund, Debt Service Fund, and Capital Projects Fund; one proprietary fund—Joint Self-Insurance Fund; and two fiduciary funds—Pension Trust Fund and Sales Tax Agency Fund.

Major funds are funds whose revenues, expenditures/expenses, assets, or liabilities (excluding extraordinary items) are at least 10 percent of corresponding totals for all governmental or enterprise funds and at least 5 percent of the aggregate amount for all governmental and enterprise funds.

Assets, Liabilities and Fund Equity

Cash and Investments—All excess General Fund cash is invested and earnings are credited to the General Fund for use in financing general RTA operations. All investments are reported at fair value which is determined using various sources. Short-term investments are reported at cost, which approximates fair value due to their short-term nature. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

Intergovernmental Receivables—Receivables include amounts due from State and local governments for sales taxes, specific programs or projects, and services.

Capital Assets—The RTA sets a capitalization threshold of no less than $5,000 for any capital item(s). Capital assets are recorded at historical cost (or fair market value at the time of donation, if donated) and have a useful life of at least two years following the date of acquisition. Any acquisitions during the year are considered acquired at the beginning of that year for the purpose of computing depreciation. The RTA uses the straight-line method for computing depreciation expense. Leasehold improvements made to RTA's office facilities are capitalized, and their costs amortized during the life of the lease. Leasehold improvements and major equipment repairs, if any, are also capitalized during the remaining life of the lease or the extended useful life of the equipment. The Capital-Technology Program's capitalized assets are for projects in progress; therefore, the assets are non-depreciable.

Description	Useful Life
Furniture and equipment	5 years
Computer equipment	5 years
Leasehold improvements	Life of the lease

Restricted Assets—Bond proceeds and amounts set aside for general obligation debt service are classified as restricted assets since their use is limited by the bond indentures. When both restricted and unrestricted resources are available for use, it is RTA's policy to use restricted resources first, then unrestricted resources as needed.

Compensated Absences—Compensation for holidays, illness, and other qualifying absences is not accrued in the accompanying financial statements because rights to such compensation amounts either do not accumulate or they do not vest. The RTA accounts for compensated absences under GASB No. 16, entitled Accounting for Compensated Absences, whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability. Compensated absences are recorded in the General Fund only if they have matured (i.e., unused leave still outstanding at time of an employee's resignation or retirement).

Intergovernmental Payables—These amounts include accrued financial assistance, sales taxes, capital and other grants due to the Service Boards.

Fund Balances—Portions of the fund balances of the Governmental Funds are reserved by the RTA for specific purposes as follows:

Reserved for Service Boards Capital Projects represents the portion of the fund balance to provide the local share of Federal and State funded capital projects and to fund 100% of those projects not funded by another source. It also includes the remaining bond proceeds, investment income committed for capital projects of the Service Boards, and any interest rate swap proceeds for capital projects of the Service Boards.

Reserved for Debt Service represents the portion of the fund balance of RTA resources legally restricted for the payment of long-term debt principal and interest amounts maturing within the next year.

Reserved for RTA Capital Projects represents the portion of the RTA fund balance for the unspent portion of capital authorized by the RTA's current and prior years' budgets and the portion of the interest rate swap proceeds for RTA funded capital projects.

Reserved for Interest Rate Swap expense represents the portion of the interest rate swap proceeds set aside for future expenses relating to swap transactions such as fees and interest expenses.

Revenues—The RTA has four principal sources of revenue: (1) retailer's occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Tax); (2) funds appropriated to the RTA by statute through the PTF established under the Act; (3) State or Federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the Act; and (4) investment income on unexpended funds held by the RTA, and other miscellaneous revenue.

Sales Tax—The RTA Sales Tax consists of (i) in Cook County, (a) a tax of 1¼ % of the gross receipts from sales of drugs, certain medical supplies and food prepared for consumption off the premises (other than for immediate consumption) imposed on all persons selling tangible personal property at retail (a Food and Drug Tax) and (b) a tax of 1% of the gross receipts from all other taxable retail sales; (ii) in counties within Northeastern Illinois other than Cook County, a tax of 0.5% of the gross receipts from all taxable retail sales (together with (i) (b), a General Sales Tax); and (iii) a tax of 1% on the use in Cook County, and 0.5% on the use in Northeastern Illinois other than Cook County of tangible personal property purchased from a retailer outside Northeastern Illinois and titled or registered with a State agency by a person with a Northeastern Illinois address (a Use Tax); and (iv) a tax imposed in the same locations and at the same rates as the Food and Drug Tax and the General Sales Tax on persons engaged in a sale of service pursuant to which property in the form of tangible personal property or in the form of real estate is transferred incident to a sale of a service (a Service Occupation Tax).

The taxes described in (i) and (ii) above are also imposed on persons engaged in making sales of services pursuant to which tangible personal property or real estate (as incident to a sale of a service) is transferred (with respect to the taxes in (i) and (ii), a Service Occupation Tax).

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed that portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State, but registered or titled with a State agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the "Replacement Fund"). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax, and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a State agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the "Reform Fund"). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of the tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

Service Board	Collected Within Chicago	Collected within Cook County Outside Chicago	Collected in DuPage, Kane, Lake McHenry and Will Counties
CTA	100 %	30 %	
Metra		55 %	70 %
Pace		15 %	30 %

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of the total sales taxes collected to which it is entitled by the amended Act. The remaining portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

In January 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region, increased the real estate transfer tax (RETT) in the City of Chicago, and raised the portion of RTA sales tax revenues matched by PTF. The RTA sales tax rate was increased 0.25% in Cook County and 0.50% in the Collar Counties effective April 1, 2008. Proceeds of the sales tax increase in the Collar Counties are divided evenly between the RTA and the county where the tax is collected. Effective April 1, 2008,

the real estate transfer tax in the City of Chicago was increased 0.3% (e.g. for every $500 in sales price $1.50 in tax is collected).

In February 2008, the PTF match of the old RTA sales tax increased from 25% to 30%. In April 2008, the 5% PTF match was applied to the RETT and the RTA portion of the sales tax increase. Beginning in January 2009, the PTF match of both the RETT and the RTA portion of the sales tax increase will rise from 5% to 30%.

While the RETT and the 25% PTF match of RETT funds only the CTA, the largest part of P.A. 95-0708 revenue provides funding for CTA, Metra, Pace and ADA Paratransit operations, as well as for regional innovation, coordination and enhancement (ICE) and suburban community mobility (SCMF) initiatives. Funds for ADA Paratransit, ICE and SCMF are by statute set aside before distributions to the CTA, Metra and Pace.

Public Transportation Fund—In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the "Public Transportation Fund," an amount equal to 25% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes). These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2009 fiscal year which will end June 30, 2010. During 2008, the PTF was 30% on some sales tax and 5% on other sales tax and the RETT. The PTF is 30% on both sales tax and RETT beginning in 2009.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement—In the State's fiscal year 2009, which ends June 30, 2009, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation ("IDOT") is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2008 and June 30, 2009, the grants were in the amount of $36.7 million and $28.9 million, respectively. In 2007, the state provided the RTA with advanced reduce fare reimbursements in the amount of $15.6 million. The revenue is recognized on the modified accrual basis when the amount is requested from IDOT.

Additional State Assistance/Additional Financial Assistance—The State has authorized Additional State Assistance ("ASA") which is supplemental financing for the RTA's Strategic Capital Improvement Program ("SCIP") bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of refunding or advance refunding SCIP bonds, less interest earned on the remaining bond proceeds, or (ii) $55 million per year. The RTA recognized $39.7 million of ASA in 2008.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance ("AFA") to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million in the State's fiscal years 2008 and 2009, per year. The RTA recognized $82.1 million of AFA in 2008.

In accordance with the Act, earnings on certain investments in the Capital Projects Fund are credited to the Debt Service Fund. This is done to compensate for prior State fiscal year earnings reducing the actual ASA and AFA grant amounts.

Expenditures and Expenses—Operating grants consist of financial assistance to the Service Boards. The RTA provides operating assistance to the Service Boards to fund, in part, their RTA-approved budgets.

Capital grants consist of the RTA local match of Federal Transit Administration ("FTA") and IDOT-funded capital projects, 100% RTA-funded projects and capital projects funded by RTA, SCIP bonds, and investment income on bonds. Capital payments of approximately $10 million for sales tax funding are due to Metra based on a statutory formula. This formula consists of the budgeted sales tax revenues in excess of Metra's budgeted operating deficit. This amount is presented in the Sales Tax Agency Fund.

Administration consists of those costs of the RTA incurred to carry out its administrative activities. These costs were limited by statute to $15,357,619 for the year ended December 31, 2008.

Non-administration, listed as regional and technology program expenses in the statement of activities, consists of those costs of the RTA which are exempt from the statutory limit defined in the RTA Act. These costs include the operation of the Travel Information Center, Transit Check Program, Americans with Disabilities Act ("ADA"), reduced fare registration, capital development and other program costs incurred on behalf of the Service Boards and not for the benefit of RTA itself.

Cash Flows—For purposes of the statement of cash flows, the RTA considers all short-term securities with original maturities of three months or less to be cash equivalents. Cash and cash equivalents aggregated $14.3 million at December 31, 2008 and are included in cash and cash equivalents under business-type activities on the accompanying statement of net assets. The remaining $8.6 million constitutes investments in the Joint Self-Insurance Fund with original maturities in excess of three months.

Management's Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Accounting Pronouncements—In September 1993, the GASB released Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that use Proprietary Fund Accounting.* The statement provides that proprietary funds may apply all GASB pronouncements, as well as the following pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements: Statements and Interpretations of the Financial Accounting Standards Board ("FASB"), Accounting Principles Board ("APB") Opinions and Accounting Research Bulletins ("ARBs") of the Committee on Accounting Procedure. The RTA has elected to apply only FASB, APB and ARB statements and interpretations issued on or before November 30, 1989.

Interfund Transactions—The governmental fund's balance sheet reports all outstanding balances between funds, as "due to/from other funds." The government-wide financial statements report any residual balances outstanding between the governmental activities and business-type activities as "internal balances." Government-wide financial statements and the Statement of Fiduciary Net Assets report a "due to/from general fund" outstanding for pension contributions.

New Accounting Pronouncements— RTA implemented GASB Statement No. 50, *Pension Disclosures- an amendment to GASB Statements No. 25 and No. 27.* The object of this Statement is to amend note disclosure and required supplementary information (RSI) standards of Statements No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans,* and No. 27, *Accounting for Pensions by State and Local Governmental Employers*, to conform with applicable changes adopted in Statement No. 43, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions.* This Statement is intended to improve the transparency and decision usefulness of reported information about pensions by state and local governmental plans and employers.

3. BUDGETARY INFORMATION

Excess of Expenditures over Appropriations

For the year ended December 31, 2008, expenditures exceeded appropriations in the General Fund as follows:

Budget	Actual	Variance
$278,423,012	$365,829,249	$(87,406,237)

4. CASH AND INVESTMENTS

Governmental and Joint Self Insurance Fund Investments

Cash and investments in the statement of net assets are externally restricted by bond covenants, restricted by the RTA through board action, or unrestricted when no restrictions as to their use apply.

Deposits and Investments—Section 2.20(a)(ii) of the RTA Act authorizes the RTA to invest any funds or monies not required for immediate use or disbursement. The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/0.01, et seq.

The RTA investment policy is in accordance with the Illinois statutes and allows the RTA to invest in:

- Certain obligations of the U.S. Government and its agencies.

- Interest-bearing certificates of deposit, interest-bearing time deposits or any other investments constituting direct obligations of any FDIC insured bank as defined by the Illinois Banking Act.
- Short-term obligations of corporations organized in the United States with assets exceeding $500 million and rated within the highest classification established by at least two standard rating services.
- Certain money market mutual funds.
- The Illinois Funds.
- Repurchase agreements.

Custodial Credit Risk — Custodial credit risk is the risk that in the event of a bank failure, the RTA's deposits may not be returned to it. The RTA's policy for custodial credit risk states collateral will be valued at market value (excluding accrued interest) on the trade date. Collateral required will be 100% of the investment or such greater percentage as may be appropriate based upon the financial stability of the institution and the term of the collateral (i.e., maturity), less any insurance provided by the Federal Deposit Insurance Corporation (FDIC).

Certificates of deposit with initial maturities greater than three months amounting to $8,601,935 are reported as investments in the Statement of Net Assets.

Investments

Interest Rate Risk — To mitigate losses caused by changing interest rates, the maturities of the RTA's investments are limited. Per the RTA's investment policy, investments in corporations are limited to maturities of 180 days or less. Other investment maturities can not exceed three years.

As of December 31, 2008, the RTA's investments were as follows:

Investment Type	**Fair Value**
Commerical Paper	$ 33,443,909
Domestic corporate fixed-income securities	193,054,370
Illinois Funds	16,295,578
Money market fund	19,901,290
Short term money market securities	19,869,104
U.S. Agency securities	11,970,344
Total	$ 294,534,595

The weighted average maturity of the above investments is less than 90 days, for each investment type.

Credit Risk — The RTA's policy for credit risk states no investment shall be made in short-term obligations of corporations unless such obligations are rated at the time of purchase within the highest classification established by at least two standard rating services, the investment matures no later than 180 days from the date of purchase and the issuer is domiciled in the United States.

As of December 31, 2008, the RTA's investments were as follows:

Investment Type	Fair Value	Credit Rating Moody's	Credit Rating Standard & Poor's	Credit Rating Fitch
Commerical Paper	$ 33,443,909	P-1	A-1	F-1
Domestic corporate fixed-income securities	193,054,370	Aaa	AAA	AAA
Illinois Funds	16,295,578	*	AAAm	*
Money market fund	19,901,290	Aaa	AAA	AAA
Short term money market investments	19,869,104	Aaa	AAAm	*
U.S. Agency securities	11,970,344	Aaa	AAA	AAA
Total	$ 294,534,595			

* Rating not available

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. Except for commercial paper, the RTA's investment policy does not specifically address a limitation of investments in a single issuer; instead the policy addresses credit risk using broad categories of investments. The RTA's policy states the maximum percentage of the portfolio invested in commercial paper should not exceed 33.3%, money market mutual funds should not exceed 20.0%, U.S. Government Agency obligations should not exceed 20.0%, The Illinois Funds should not exceed 20% and Repurchase Agreements should not exceed 50.0%.

The RTA has investments in the following issuers that exceed 5% of the total investments:

Joint Self-Insurance Fund Investment	Amount	% of Portfolio
Autobahn Funding Corp (Commercial Paper)	$ 2,988,582	21%
Fountain Square Funding (Commerical Paper)	2,988,799	21%
Starbird Funding (Commerical Paper)	1,493,291	11%

In the Governmental fund, there is no single investment that exceeds 5% of the total investments.

The RTA's investments in money market funds are for liquidity and offer an alternative to other investment vehicles. Management has reviewed the investments in the money market funds and has determined that the types of investments included in the money market funds are consistent with the RTA's investment policy. These funds consist of U.S. Treasury Securities and Agencies.

The Illinois Funds investment pool is managed by the Treasurer of the State of Illinois and is not registered with the SEC. The Illinois Funds maintains a $1 per share net asset value (NAV) at all times. The fair market of the investment pool is equal to the number of pool shares owned.

Interest Rate Swaps (General Fund)—The RTA, under board ordinances adopted in 2001 through 2006, has entered into interest rate swap agreements to modify the interest rate characteristics of its outstanding bonds. The agreements involve the exchange of variable and fixed-rate interest payments over the life of selected RTA bonds without an exchange of the underlying principal amount. The differential to be paid or received is accrued as interest rates change and is recognized as interest expense or interest income. The related amount payable to or receivable from the counterparty is included in other payable/ receivables.

On August 1, 2002, the RTA adopted an ordinance establishing an Interest Rate Risk Management Policy. The policy limits the amount of variable rate exposure to 20% of the total RTA bonds outstanding. The RTA clarified this policy on December 13, 2002 to include interest rate swap agreements with delayed starts, up-front cash settlements, interest rate caps and/or floors, hedging arrangements to lock in interest savings, options, or other alternatives (collectively referred to in the ordinance as "interest rate swap agreements").

The RTA has entered three fixed-to-floating swaps. These agreements have the net effect of changing the interest rate characteristics of a portion of the RTA bonds from a fixed-rate to a variable-rate of interest equal to the Securities Industry and Financial Markets Association (formerly BMA) Swap Index averaged over six months. One such swap agreement was entered into on November 20, 2001. The swap has a notional amount of $97,115,000 (as of December 31, 2008) and matures on June 1, 2020. Two additional fixed-to-floating swaps were entered in June 2007. The 2007 swaps mature July 1, 2030 with a semi-annual call option beginning July 1, 2016. At year-end the aggregate notional value of the 2007 swaps was $256.6 million. For the year ended December 31, 2008, the three basis swaps produced a cash flow of $(6,871,341).

The RTA has one floating-to-fixed swap. This transaction was entered in 2005. The purpose was to lock-in historically low interest rates for the current refunding of the 1996 bonds.

During 2008, the RTA had three basis rate swaps in which the RTA assumed a different variable interest rate index than counterparties. The transactions are a hedge against higher interest rates. Anticipated revenues from the basis rate swaps during a period of rising rates will offset the anticipated decline in revenue from the fixed-to-floating swaps. Basis swaps do not change the notional amount of variable-rate exposure. As of December 31, 2008, the notional value of the three variable-rate swaps was $433,353,000. Cash flow produced during 2008 was a positive $453,226.

Board ordinances direct the RTA to use the net payments received under swap agreements in the following priority:

- Reimburse the RTA for transaction costs relating to the swap rather than use operating funds.

- Accumulate funds in an account as a reserve to secure counterparties. In this manner, the RTA would minimize the use of operating funds for payments or collateral due counterparties.

- Use the remaining amounts—the net proceeds from the transaction—for capital investment in the RTA system. This follows the principle of using proceeds from long-term transactions for long-term benefit. However, if operating funds are not adequate to meet senior debt obligations, funds currently dedicated for capital could be used.

The interest rate swaps have an estimated valuation of ($15,923,959) as of December 31, 2008.

Pension Fund Investments

Cash and investments in the Pension Fund provide sufficient funds to meet the obligations promised to the current and future beneficiaries of RTA's defined benefit pension plan.

Risk Posture - The RTA evaluated the assets and liabilities of the Pension Plan in order to determine an asset allocation that provides a high likelihood of achieving the responsibilities noted above. The obligations of current and future beneficiaries were evaluated under various market scenarios to develop an allocation that can be expected to generate a solid rate of return without incurring undue risk. In

general, the risk posture of the Pension Plan is such that the portfolio is structured to maintain funding requirements and modestly grow assets through a low to moderate level of risk.

Custodial Credit Risk – Custodial credit risk is the risk that in the event of a bank failure, the RTA's pension deposits may not be returned to it. The RTA's Pension Plan policy does not explicitly indicate custodial credit risk. As of December 31, 2008, none of the Plan's cash and investments was at risk.

Interest Rate Risk — Per the RTA's Pension Plan investment policy, the duration of the fixed income portfolio should be within 20% of the duration of the benchmark index.

As of December 31, 2008, the RTA's pension investments were as follows:

Investment Type	Fair Value	Weighted Average Maturity (Months)
Corporate fixed income mutual fund	$ 36,074,915	67
Money market fund	2,985,790	1
Total fair value	$ 39,060,705	
Portfolio weighted average maturity		62

Credit Risk — The RTA's pension policy for credit risk states at least 85% of the fixed income investments should be limited to securities with ratings of at least investment grade as defined by both Moody's and Standard & Poor's. Split rated bonds are to be governed by the lower rating. Unrated securities of the U.S. Treasury and government agencies are a permissible investment. No more than 15% of the portfolio may be invested in investment-grade securities of foreign entities domiciled in countries included in the Salomon Brothers World Government Bond Index.

As of December 31, 2008, the credit ratings for RTA pension investments were as follows:

		Credit Rating (where available)		
Investment Type	Total Fair Value	Moody's	Standard & Poor's	Fitch
Corporate fixed income mutual fund	$ 36,074,915	Aa	AA+	*
Money market fund	2,985,790	Aa1	*	AA+
Total	$ 39,060,705			

* Not available

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The RTA's pension investment policy states that fixed income securities of a single issuer (excluding obligations of the United States Government and its agencies) should be limited to 5% of the fixed income portfolio, measured at market value. The RTA's pension policy states the asset allocation policy has been developed based on the objectives and characteristics of the pension liabilities, capital market expectations, and asset-liability projections. This policy is long-term oriented and consistent with the risk posture. The pension fund did not have any investments in a single issuer which were greater than 5% of the total plan's net assets.

5. INTERGOVERNMENTAL RECEIVABLES AND PAYABLES

The intergovernmental receivables and payables in the statement of net assets comprise the following:

Receivable	**Amount**
General Fund:	
Sales taxes	$ 27,223,033
Interest on sales taxes	403,719
State assistance (ASA & AFA)	99,813,111
PTF/RETT	120,995,533
ADA/Paratransit	20,441,065
Illinois Department of Transportation (IDOT) grants and others	1,665,988
Total Intergovernmental Receivables	$ 270,542,449

Payable	
General Fund:	
Financial assistance	$ 160,918,500
Capital grants	1,017,624
CTA Operating Assistance (ADA)	4,071,581
Total General Fund	166,007,705
Capital Projects Fund:	
Capital grants, (CTA, METRA, PACE)	4,520,151
Total Intergovernmental Payables	$ 170,527,856

6. DUE TO/FROM OTHER FUNDS

Various transactions result in "due to/from other funds" balances. In most cases, the General Fund advances payments on behalf of other funds.

Due to/from balances between the Debt Service Fund and the Capital Projects Fund represent interest earned in the Capital Projects Fund which is transferred to the Debt Service Fund for payment of long-term debt. The General Fund also makes monthly transfers to the Debt Service Fund and occasionally makes transfers to the Joint Self-Insurance Fund. The General Fund owes the Pension Trust Fund for its share of contributions during the period. Cash receipts and payments on behalf of the Sales Tax Agency Fund originate in the General Fund.

On December 31, 2008, the amounts due to/from other funds presented in the Governmental Funds Balance Sheet, the Joint Self-Insurance Fund Statement of Net Assets, and the Fiduciary Funds Statement of Fiduciary Net Assets are as follows:

Receivable Fund	Payable Fund	Amount
General	Joint Self-Insurance	$ 18,400
General	Pension Trust	19,300
Pension Trust	General	995,402
Agency	General	14,374,000

7. INTERFUND TRANSFERS

Various transactions result in "transfer in/out" balances from funds. Transfer in/out balances presented on the Governmental Fund's Statement of Revenues, Expenditures, and Changes in Fund Balances and the Business Type Activities Fund's Statement of Revenues, Expenses, and Changes in Net Assets are as follows:

Transfer Out Fund	Transfer In Fund	Amount
General	Debt Service	$ 186,268,073
General	Joint Self-Insurance	3,920,000

The purpose of Interfund transfers from the General Fund to Debt Service is to satisfy the RTA's obligations to bondholders for principal and interest. The purpose of the Interfund transfer from the General Fund to the Joint Self-Insurance Fund is to make a capital contribution to the fund to purchase insurance.

8. ADVANCES TO SERVICE BOARDS

The Illinois Department of Revenue ("IDOR") sends a "13th month" sales tax advance to compensate for the delayed processing of sales tax payments to the RTA. Each year, IDOR calculates the amount and the RTA verifies that calculation. The allocations to the Service Boards are set forth below:

CTA	$ 25,214,717
Metra	22,316,658
Pace	7,020,219
Total Service Board Advances	$ 54,551,594

Sales tax advances have also been reported as current liabilities in the Agency Sales Tax Fund.

9. CAPITAL ASSETS

The following is a summary of changes in capital assets during the fiscal year:

	Balance at January 1, 2008	Additions	Retirements	Balance at December 31, 2008
Depreciable:				
Office furniture and equipment	$ 297,619	$ 15,401	$ -	$ 313,020
Computer equipment	2,064,027	156,009	-	2,220,036
Leasehold improvements	1,337,064	91,671	-	1,428,735
Subtotal	3,698,710	263,081	-	3,961,791
Less accumulated depreciation:				
Office furniture and equipment	193,533	44,580	-	238,114
Computer equipment	1,607,881	179,273	-	1,787,154
Leasehold improvements	422,332	111,823	-	534,154
Subtotal	2,223,746	335,676	-	2,559,421
Total Depreciable	1,474,964	(72,595)	-	1,402,370
Non-depreciable:				
Capital -Technology Program	8,279,092	1,833,362	397,012	9,715,442
Total Capital assets—net of accumulated depreciation	$ 9,754,056	$ 1,760,767	$ 397,012	$ 11,117,811

All capital assets are associated with governmental activities.

During 2008, total depreciation expense of $335,676 was allocated between two functions; $50,369 to regional expenditures and $285,307 to administrative expenditures.

10. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	January 1, 2008	New Issues	Current Retirements	December 31, 2008
1990A	$ 60,795,000	$ -	$ -	$ 60,795,000
1991A	55,745,000	-	-	55,745,000
1992A* & 1992B	40,185,000	-	6,840,000	33,345,000
1994A* & 1994B	24,395,000	-	-	24,395,000
1994C* & 1994D	62,205,000	-	4,420,000	57,785,000
1997 Refunding	70,830,000	-	4,875,000	65,955,000
1999* Refunding	280,110,000	-	5,665,000	274,445,000
2000A*	235,060,000	-	4,995,000	230,065,000
2001A*	90,510,000	-	1,880,000	88,630,000
2001B Refunding*	31,430,000	-	1,630,000	29,800,000
2002A*	147,760,000	-	2,835,000	144,925,000
2002B	154,145,000	-	10,060,000	144,085,000
2003A*	246,975,000	-	4,555,000	242,420,000
2003B	142,665,000	-	2,675,000	139,990,000
2003C Refunding	6,960,000	-	3,395,000	3,565,000
2004A*	250,815,000	-	4,405,000	246,410,000
2005B Refunding	142,375,000	-	3,070,000	139,305,000
2006A*	249,300,000	-	3,385,000	245,915,000
Total	$2,292,260,000	$ -	$ 64,685,000	$2,227,575,000

* Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2008, the total general obligation bonds payable of $2,227,575,000 are classified as current and long-term in the Statement of Net Assets in the amounts of $68,455,000 and $2,159,120,000, respectively.

Advance Refundings—On June 21, 1993, the RTA advance refunded a portion of its 1990A Series general obligation bond issue. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $20,350,000 of outstanding general obligation bonds (1990A Series) are considered defeased, and therefore, have been removed from the financial statements.

On January 19, 1996, the RTA advance refunded a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $60,300,000 of outstanding general obligation bonds (1994B Series) and $75,605,000 of outstanding general obligation bonds (1994D Series) are considered defeased, and therefore, have been removed from the financial statements.

On September 18, 1997, the RTA advance refunded a portion of its 1990A, 1991A, 1992B, and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $4,230,000 of outstanding general obligation bonds (1990A Series), $29,265,000 of outstanding general obligation bonds (1991A Series), $18,170,000 of outstanding general obligation bonds (1992B Series), and $47,465,000 of outstanding general obligation bonds (1993B Series) are considered defeased, and therefore, have been removed from the financial statements.

On August 24, 1999, the RTA advance refunded a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation refunding bonds (1999 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $113,895,000 of outstanding general obligation bonds (1992A Series), $9,720,000 of outstanding general obligation bonds (1993A), $142,615,000 of outstanding general obligation bonds (1994A) and $21,955,000 of outstanding general obligation bonds (1994C) are considered defeased, and therefore, have been removed from the financial statements.

On March 1, 2001, the RTA advance refunded a portion of its 1993A Series general obligation bond issues. The RTA issued $37,715,000 of general obligation refunding bonds (2001B Series). Proceeds from the issuance amounted to $40,437,798 which includes a premium of $2,554,206. The proceeds are to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $37,750,000 of outstanding general obligation bonds (1993A) are considered defeased, and therefore, have been removed from the financial statements.

On May 1, 2003, the RTA advance refunded a portion of its 1993C Series general obligation bond issues. The RTA issued $19,055,000 of general obligation refunding bonds (2003C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2008, $19,150,000 of outstanding general obligation bonds (1993C) are considered defeased, and therefore, have been removed from the financial statements.

On May 2, 2005, the RTA issued $148 million in General Obligation bonds with a variable rate which resets weekly to refund $144 million of outstanding 1996A Series bonds with an average interest rate of 5.5 percent. The net proceeds of $147 million (after payment of $892 thousand for issuance costs) were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust with an escrow agent to call the 1996A Series bonds June 1, 2005. As a result, the 1996A Series bonds are considered to be defeased and the liability for those bonds has been removed from the financial statements.

Debt Service Requirements—The "debt service requirements" set forth in the following tables represent payments due the trustee from the RTA, as required by the respective bond agreements. The "principal" columns represent principal payments due bondholders from the trustee.

1990 General Obligation Bonds—In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

The Series 1990A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 6.00% to 7.15% on November 1, 1990 and semiannually thereafter on May 1 and November 1 in each remaining year.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ -	$ 4,377,240	$ 4,377,240
2010	3,810,000	4,377,240	8,187,240
2011	4,085,000	4,102,920	8,187,920
2012	4,380,000	3,808,800	8,188,800
2013	4,695,000	3,493,440	8,188,440
2014-2018	29,060,000	11,882,160	40,942,160
2019-2020	14,765,000	1,613,160	16,378,160
Total	$ 60,795,000	$ 33,654,960	$ 94,449,960

1991 General Obligation Bonds—In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

The Series 1991A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 4.85% to 6.55% on May 1, 1992 and semiannually thereafter on November 1 and May 1 in each remaining year.

Debt service requirements on the 1991A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ -	$ 3,734,915	$ 3,734,915
2010	-	3,734,915	3,734,915
2011	-	3,734,914	3,734,914
2012	4,090,000	3,734,915	7,824,915
2013	4,365,000	3,460,885	7,825,885
2014-2018	26,635,000	12,504,210	39,139,210
2019-2021	20,655,000	2,827,400	23,482,400
Total	$ 55,745,000	$ 33,732,154	$ 89,477,154

1992 General Obligation Bonds—In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1992A and 1992B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 5.30% to 9.00% on December 1, 1992 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1992A and 1992B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 7,480,000	$ 1,991,960	$ 9,471,960
2010	-	1,396,960	1,396,960
2011	-	863,040	863,040
2012	25,865,000	293,760	26,158,760
Total	$ 33,345,000	$ 4,545,720	$ 37,890,720

1994 General Obligation Bonds—In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00% on December 1, 1994 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ -	$ 1,951,600	$ 1,951,600
2010	-	1,951,600	1,951,600
2011	-	1,951,601	1,951,601
2012	-	1,951,600	1,951,600
2013	-	1,951,600	1,951,600
2014-2024	24,395,000	5,892,599	30,287,599
Total	$ 24,395,000	$ 15,650,600	$ 40,045,600

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 1,500,000	$ 4,420,213	$ 5,920,213
2010	1,620,000	4,299,312	5,919,312

2011	5,750,000	3,125,100	8,875,100
2012	1,865,000	2,915,688	4,780,688
2013	3,320,000	2,764,800	6,084,800
2014-2018	19,975,000	10,473,150	30,448,150
2019-2023	24,445,000	3,559,650	28,004,650
Total	$ 65,955,000	$ 29,995,814	$ 95,950,814

1999 General Obligation Refunding Bonds—In August 1999, the RTA issued $299 million in General Obligation Bonds, Series 1999, to provide funds to refund in advance of maturity the RTA's outstanding Series 1992A Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $114 million, Series 1993A Bonds, maturing June 1 in the years 2009 and 2013, in the aggregate amount of $10 million, Series 1994A Bonds, maturing June 1 in the years 2006-2009, 2012, 2015 and 2024, in the aggregate amount of $143 million and Series 1994C Bonds, maturing June 1 in the year 2025, in the aggregate amount of $22 million.

The Series 1999 Refunding Bonds mature on June 1 over a twenty-five-year period and interest is payable at rates ranging from 5.00% to 6.00% on December 1, 1999 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1999 Refunding Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 7,670,000	$ 15,586,762	$ 23,256,762
2010	8,065,000	15,163,144	23,228,144
2011	8,525,000	14,686,182	23,211,182
2012	9,025,000	14,181,619	23,206,619
2013	17,990,000	13,404,938	31,394,938
2014-2018	77,325,000	53,475,820	130,800,820
2019-2023	123,665,000	24,175,543	147,840,543
2024-2025	22,180,000	918,600	23,098,600
Total	$ 274,445,000	$ 151,592,608	$ 426,037,608

2000 General Obligation Bonds—In June 2000, the RTA issued $260 million in General Obligation Bonds, Series 2000A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

Debt service requirements on the Series 2000A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 5,275,000	$ 14,579,350	$ 19,854,350
2010	5,575,000	14,276,038	19,851,038
2011	5,900,000	13,955,475	19,855,475
2012	6,245,000	13,601,475	19,846,475
2013	6,610,000	13,211,163	19,821,163
2014-2018	39,505,000	59,341,439	98,846,439
2019-2023	53,240,000	45,391,439	98,631,439
2024-2028	72,120,000	26,201,825	98,321,825
2029-2030	35,595,000	3,505,775	39,100,775
Total	$ 230,065,000	$ 204,063,979	$ 434,128,979

2001 General Obligation Bonds—In April 2001, the RTA issued $100 million in General Obligation Bonds, Series 2001A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2001A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.0% to 6.0% in January 2001 and semiannually thereafter on July 1 and January 1 in each remaining year.

Debt service requirements on the Series 2001A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 1,980,000	$ 5,241,413	$ 7,221,413
2010	2,090,000	5,132,513	7,222,513
2011	2,200,000	5,017,563	7,217,563
2012	2,325,000	4,896,563	7,221,563
2013	2,455,000	4,751,250	7,206,250
2014-2018	14,520,000	21,295,563	35,815,563
2019-2023	19,115,000	16,639,575	35,754,575
2024-2028	25,165,000	10,329,300	35,494,300
2029-2031	18,780,000	2,294,700	21,074,700
Total	$ 88,630,000	$ 75,598,440	$ 164,228,440

In March 2001, the RTA issued $38 million in General Obligation Bonds, Series 2001B, to provide funds to refund in advance of maturity the RTA's outstanding series 1993A Bonds, maturing June 1 in the years 2004-2008, in the aggregate amount of $38 million.

The Series 2001B Refunding Bonds mature on June 1 over a twenty-three year period and interest is payable at rates ranging from 4.00% to 5.50% on June 1, 2001 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2001B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ -	$ 1,639,000	$ 1,639,000

2029-2034	89,275,000	16,185,531	105,460,531
Total	$246,410,000	$219,373,786	$465,783,786

2005 General Obligation Bonds— In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005-2025, in the aggregate amount of $147 million.

The Series 2005B Bonds mature on June 1 over a twenty year period and interest is payable at variable rates which reset weekly based on current market rates.

Debt service requirements on the Series 2005B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest*	Total
2009	$ 6,535,000	$ 4,489,238	$ 11,024,238
2010	6,850,000	4,268,385	11,118,385
2011	7,210,000	4,036,395	11,246,395
2012	7,590,000	3,792,195	11,382,195
2013	7,960,000	3,535,620	11,495,620
2014-2018	18,475,000	15,148,404	33,623,404
2019-2023	59,200,000	9,770,477	68,970,477
2024-2025	25,485,000	753,968	26,238,968
Total	$139,305,000	$ 45,794,682	$185,099,682

** Interest was calculated using a rate of 3.3%.*

2006 General Obligation Bonds—In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

The Series 2006A Bonds mature on July 1, over a thirty year period and interest is payable at rates ranging from 4.25% to 5.00% on January 1, 2007 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2006A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2009	$ 3,625,000	$ 12,041,281	$ 15,666,281
2010	3,780,000	11,860,031	15,640,031
2011	3,955,000	11,671,031	15,626,031
2012	4,150,000	11,473,281	15,623,281
2013	4,390,000	11,265,781	15,655,781
2014-2018	26,470,000	52,750,656	79,220,656
2019-2023	45,150,000	44,925,656	90,075,656
2024-2028	99,210,000	28,014,906	127,224,906
2029-2033	18,735,000	9,866,056	28,601,056
2033-2035	36,450,000	2,204,775	38,654,775
Total	$ 245,915,000	$ 196,073,456	$ 441,988,456

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $78,391,542 in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2008.

11. OTHER LONG-TERM OBLIGATIONS

Changes in other long-term obligations for the year ended December 31, 2008 were as follows:

	Balance January 1, 2008	Additions	Deletions	Balance December 31, 2008	Due Within One Year
Deferred rent	$ 1,911,000	$ 165,000	$ -	$ 2,076,000	$ -
Accrued interest payable	34,597,000	33,919,000	34,597,000	33,919,000	-
Deferred revenue	51,232,000	230,000	1,701,000	49,761,000	1,701,000
Unamortized bond premium	130,906,000	-	5,702,000	125,204,000	5,702,000

The long-term liabilities will be paid by the General Fund.

The RTA has a working cash note agreement with a limit of $80 million to provide cash flow needs. Draws under the agreement bear short-term interest at a variable rate benchmarked to one-month LIBOR. The agreement expires August 2009. The outstanding balance at December 31, 2008 is $56 million at an interest rate of 1.90%.

12. PENSION

Plan Description—Effective July 1, 1976, the RTA participates, along with Metra and Pace, in a cost-sharing multi-employer noncontributory defined benefit pension plan, the Regional Transportation Authority Pension Plan ("Plan"), covering substantially all employees not otherwise covered by a union pension plan. The responsibilities for establishing, administering, and amending the Plan are divided among a Board of Trustees, a Retirement Committee, a Plan Administrator, and the RTA Board of Directors ("Plan Administrators").

The Plan is classified as a "governmental plan" and is, therefore, generally exempt from the provisions of the Employee Retirement Income Security Act of 1974. The Internal Revenue Service has issued a letter of determination dated September 30, 1988 stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code ("Code") and is, therefore, exempt from Federal income taxes under the provisions of Section 501(a) of the Code. The Plan operates on a calendar fiscal year.

Pension Benefits—Participants are entitled to annual pension benefits upon normal retirement at age 65. Such benefits are generally based on a percentage of the average annual compensation in the highest three years of service, whether consecutive or not, multiplied by the number of years of credited service.

The Plan provides that, upon retirement, benefits payable will be reduced by a defined percentage of pension benefits payable to participants who received credit for prior service with an eligible employer. Because information with respect to these benefits is not readily available until retirement, the information included in the accumulated plan benefits and changes in accumulated plan benefits with respect to active and terminated participants does not reflect a reduction of these benefits.

The Plan permits early retirement at age 55 after completing ten years of credited service with reduced benefits. As a result of the August 1, 1999 amendment to the Plan, participants may receive their full vested benefits if they are at least 55 years of age and their combined age and credited years of service equals 85 or higher.

The Plan provides for benefit payments to beneficiaries equal to or reduced from the participant's monthly benefit payment subject to the election of the participant.

Disability Benefits—An employee is eligible for a disability pension if he or she becomes disabled after the completion of ten years of credited service, and is no longer receiving long-term disability benefits under a separate RTA benefit plan, or after reaching age 65, whichever is later.

Contributions and Vesting—The Plan is funded solely by employer contributions, which are actuarially determined under the projected unit credit method. During 2007, the RTA Board approved a resolution that a contribution of $9,195,000 be made to the Plan. The contribution is allocated as follows: Metra - $4,733,557; Pace - $ 3,466,041; RTA - $995,402. As of December 31, 2008, $9,195,000 had not been funded and was reported as contribution receivable in the Statements of Plan Net Assets. The 2008 contribution levels were within the actuarially determined ranges for the respective years.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to determine the actuarial accrued liability presented in the note to the Required Supplementary Information.

Participating employees do not contribute to the Plan. If participants terminate continuous service before rendering five years (ten years prior to January 1, 1987) of credited service, they forfeit the right to receive the portion of their accumulated benefits attributable to employer contributions. All forfeitures are applied to reduce the amount of contributions otherwise payable by the employer.

The complete Plan financial report, including all required disclosures can be obtained from the Plan Administrators at the following address:

Regional Transportation Authority Pension Plan
175 West Jackson Boulevard, Suite 1550
Chicago, IL 60604

Funding Policy—Prior to July 1, 1979, contributions were made on the basis of non-actuarial estimates. The Plan's initial actuarial study found that those estimates were in excess of actuarial requirements. As a result, pension expense is being reduced by amortization of the excess over 30 years.

The RTA, Metra, and Pace are required to contribute the amounts necessary to fund the benefits of their respective employees in the Plan using the projected unit credit actuarial method. Employer contribution and the income it earns through investments are used to operate the Plan and to pay benefits. Assets are valued recognizing a portion of both realized and unrealized gains and losses in order to avoid wide swings in actuarially determined funding requirements from year to year.

Related-Party Transactions—There were no securities of the RTA, Metra, Pace or related parties included in the Plan's assets.

Annual Pension Cost and Net Pension Obligation—For 2005, 2006 and 2007, the RTA's annual pension costs equal the required contributions which were $8,777,000, $ 9,137,000 and $9,195,000, respectively. The required contributions were determined as part of the January 1, 2006, 2007 and 2008 actuarial valuations.

In accordance with the GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, the RTA determined its net pension obligation at transition (January 1, 1997). There was no net pension obligation for the Plan at transition or at year-end.

Significant Actuarial Assumptions—The information presented in the notes and the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest valuation follows:

	January 1, 2008	January 1, 2007	January 1, 2006
Actuarial cost method	Projected unit credit	Projected unit credit	Projected unit credit
Remaining amortization period	30 years	30 years	30 years
Asset valuation method	Smoothed market value	Smoothed market value	Smoothed market value
Actuarial assumptions:			
Investment rate of return	8.5%	8.5%	8.5%
Salary increases:			
Attributed to inflation	*	4.00%	4.0%
Attributed to seniority/merit	*	0.5%	0.5%
Age graded scale	Range of 3.5% to 7.5% based on attained age.		
Mortality	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.
Withdrawals from service	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47% at age 20 to 0.39% at age 60 for males.	Termination rates range from 9.94% at age 20 to 0.15% at age 60 for females, and from 7.94 % at age 20 to 0.09% at age 60 for males.	Termination rates range from 9.94% at age 20 to 0.15% at age 60 for females, and from 7.94 % at age 20 to 0.09% at age 60 for males.

* The actuarial assumption changed from a flat rate to rates based on an age scale.

Funded Status and Funding Progress – As of December 31, 2008, the most recent actuarial valuation date, the plan was 77.88 percent funded. The actuarial accrued liability for benefits was $146,417,404 and the actuarial value of assets was $114,031,540, resulting in an underfunded actuarial accrued liability (UAAL) of $(32,385,864). The covered payroll (annual payroll of active employees covered by the Plan) was $61,364,198 and the ratio of the UAAL to the covered payroll was 52.8 percent.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

13. OTHER POSTEMPLOYMENT BENEFITS

In accordance with personnel practices, the RTA offers eligible retirees the option to continue participation in its group health insurance plan. Eligibility is in accordance with the qualifying factors of the RTA Pension Plan and Trust as follows: Retired employees who have attained age 55 with 10 years of continuous full-time employment are eligible to continue the Health Plan for themselves and their dependents (providing their dependents were covered immediately prior to their retirement). Retired employees who have attained age 65 or older with 10 years of continuous full-time employment are eligible for the Medicare Supplement Plan.

Retiree dependents are eligible for either the Health Plan or Medicare Supplement Plan, depending on their age (providing they were covered as dependents immediately prior to the employee's retirement).

Election to participate is voluntary with the RTA incurring no additional obligations, except that the RTA will pay each eligible retiree the sum of up to $78 per month toward the cost of his/her health insurance. The costs of retiree health care benefits are generally recognized as expenses as they are paid and are not material in amount at the present time.

For 2008, the RTA incurred $14,820 in other post employment benefit expenditures. There are 20 participants eligible to receive benefits as of December 31, 2008.

14. RISK MANAGEMENT

The RTA is exposed to various risks including, but not limited to, losses from workers' compensation, employee health insurance, and general liability/property. Commercial insurance coverage is procured to limit the RTA's exposure to such losses.

The Workers' Compensation and Employers' Liability Insurance Policy is procured through RTA's insurance policy with Traveler's. The RTA is insured for $500,000 each accident for bodily injury by accident, $500,000 each employee for bodily injury by disease and $500,000 policy limit. The RTA property is insured through Pace's Property Insurance with St. Paul Fire & Marine. The RTA's portion of insurance premiums is paid to Pace, and is accounted for in the General Fund. The RTA had no settlements in excess of insurance coverage in the past three years. There have been no significant reductions in the amount of coverage from the prior year.

In addition, the RTA is a participant in RTA's Joint Self-Insurance Fund. The Fund was created as required by Article Two of the Loss Financing Plan (Plan) of the RTA and the three Service Boards. The Plan is intended primarily to serve as a mechanism for funding catastrophic losses and, by capitalizing the Fund in advance of such losses, to smooth their impact over time. The Fund is essentially a self-insurance program that provides a means for financing losses that are normally insured, and is included in the RTA's reporting entity as a proprietary fund type (enterprise fund). The Plan is administered by the RTA, CTA, Metra, and Pace (Participating Entities) utilizing a Fund Manager appointed by the RTA and three Fund Advisors, one appointed by each of the Service Boards.

Each participating entity (RTA, CTA, Metra, and Pace) is only responsible to repay the Fund for submitted claims paid by the Fund. The Fund acts exclusively as a claims-service, and financing mechanism, not an insurer, with respect to claims presented.

The limit of liability to the Fund is established at $50 million less the retained limit (deductible portion) as described below:

General Liability—The categories of general liability that are covered, with certain defined exclusions, by the joint agreement are:

- Personal injury
- Property damage
- Advertising injury
- Evacuation, evacuation expenses and loss of use

The retained limit (deductible portion) for each Participating Entity is:

CTA	$ 2,500,000
Metra	2,500,000
Pace	250,000
RTA	100,000

Officer and Employee Liability—All directors, officers or employees of each Participating Entity are covered, with certain defined exclusions, by the Plan. The retained limits are $100,000 for each covered person. If a loss is covered under both types of liability, then the retained limit for general liability will apply.

15. COMMITMENTS AND CONTINGENCIES

The RTA has an operating lease agreement for its office facilities. In 2008, the total rent paid by the RTA was $1,418,140. Minimum required annual rental payments by the RTA are as follows:

Year Ending December 31	Amount
2009	$ 1,460,684
2010	1,504,505
2011	1,549,640
2012	1,596,129
2013	1,644,013
2014-2017	7,084,274
Total	$ 14,839,245

16. SUBSEQUENT EVENTS

In January 2009, the RTA borrowed $24 million under the terms of the working cash note agreement. The funds were used to supplement CTA's cash flow.

On May 27, 2009, Fitch Ratings downgraded the Regional Transportation Authority's (Illinois) (RTA, or the Authority) general obligation (GO) bond rating to 'AA-,' from 'AA,' and assigned a Negative Outlook to outstanding GO debt. In conjunction, Fitch assigned an 'F1+' rating to the Authority's approximately $132.8 million Series 2005B GO variable rate notes and an 'F1' rating to its approximately $260 million taxable GO working cash notes, Series 2009B. The Series 2009B and Series 2005B notes are expected to price during June 2009. The downgrade affects and the Negative Outlook applies to approximately $650.4 million of outstanding GO bonds.

On June 8, 2009, Moody's Investors Service assigned an Aa3 rating to the approximately $132.8 million remarketing of the Regional Transportation Authority (RTA) General Obligation Variable Rate Bonds, Series 2005B. At the same time, Moody's has downgraded the RTA's approximately $2.5 billion outstanding parity bonds to Aa3 from Aa2. The outlook is stable. The bonds are secured by a gross pledge of sales taxes and other state aid and constitute a full faith and credit obligation of the RTA.

In June 2009 the RTA intends to issue up to $260 million of Working Cash Notes that will mature not later than June 1, 2011. The purpose of the funding is to payoff an existing note and to provide timely operating funding for RTA and the Service Boards necessitated by the economic downturn.

On July 1, 2009 the RTA will initiate a mandatory tender of all Series 2005B bonds ($132,770,000), modify the indenture, and reissue the bonds in a different mode. (This is not a refunding. The par value and maturity of Series 2005B will not be changed by the transaction.) The mandatory tender will allow the Authority to eliminate the need to have a liquidity provider, change the interest reset frequency from weekly to monthly and lengthen the extension period from seven days to 12 months.

REGIONAL TRANSPORTATION AUTHORITY

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
YEAR ENDED DECEMBER 31, 2008

BUDGET AND BUDGETARY ACCOUNTING

The budgetary basis of the general fund's budget and actual presentation is included as required supplementary information. For comparison of the combined budgets as required for board presentation, the combined schedule of revenues, expenditures, and changes in fund balance—budget and actual—general and the sales tax agency funds are presented in the combining and individual fund schedules section of the CAFR. Additional budget detail is used by management for monitoring purposes which is provided in this section as the schedule of expenditures—budget and actual—general fund.

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the general fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States except for RTA capital expenditures and capital grants to Service Boards. The RTA capital expenditures and capital grants to Service Boards are budgeted on a project basis, which normally exceeds one year, and debt service payments, which are budgeted as transfers from the general fund. Budgets for RTA capital expenditures and capital grants to Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax agency fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end. There were several amendments to the 2008 budget. The 2008 budget (Ordinance 2007-63) was last revised on December 18, 2008 (Ordinance 2008-81). This ordinance amended the 2008 RTA budget and the budgets of the CTA, Metra, and Pace.

Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations/expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is the policy of the RTA to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from 85% sales tax receipts;
- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and
- The third source of funds credited against the budgeted funding amount is from RTA 15% sales tax receipts and other discretionary receipts.

The reimbursement of Service Boards' capital expenditures and the payment of PTF funds, 15% funds and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

RECONCILIATION OF BUDGETARY BASIS TO GAAP BASIS ACCOUNTING

The accompanying schedule of revenues, expenditures, and changes in fund balance, budget and actual-general fund (this section), and combining schedule of revenues, expenditures and changes in fund balance-budget and actual-general and agency funds (in combining and individual fund schedules section) present comparisons of the legally adopted budget with actual data on a budgetary basis.

Since accounting principles applied for purposes of developing data on a budgetary basis differ with accounting principles generally accepted in the United States of America, a reconciliation of timing differences in the excess of revenues over expenditures and other financing uses is presented below:

	General Fund
Excess of expenditures over revenues and other financing use-budgetary basis	$ (90,026,246)
Adjustments:	
Capital grant expenditures incurred in current year but considered in prior years' budgets	(5,961,708)
Capital grant expenditures expected to be incurred in future years but considered in current year budget	26,363
RTA capital expenditures expected to be incurred in future years but considered in current year operating budget	134,419
Budgetary basis to GAAP basis adjustments	(5,800,926)
Net change in fund balance - GAAP basis	$ (95,827,172)

2008	9,195,000	*	100%

* Contributions for the plan year ended December 31, 2008 will be paid during 2009.

COMBINING AND INDIVIDUAL FUND SCHEDULES

A. GENERAL FUND

The general fund is used to account for resources traditionally associated with the RTA which are not required legally or by sound financial management to be accounted for in another fund. A budget and actual schedule of general fund expenditures is presented in this section.

The RTA Board approves a comprehensive budget which includes the activity in the general fund and the Sales Tax Agency Fund. For comparison of the combined budgets, the combined budget and actual schedule of revenues, expenditures and changes in fund balance for both funds is also presented in this section.

C. CAPITAL PROJECTS FUND

Capital Projects Fund Accounts:

Strategic Capital Improvement Program (SCIP)—to account for 1992 through 1994, 2000, 2001, 2002, 2003, and 2004 bond sales proceeds and related SCIP capital grants made to the Service Boards as expenditures are incurred. Investment income earned on SCIP bonds is recorded in the related Debt Service Fund accounts.

Non-SCIP—to account for 1990 through 1994, 2002, and 2005 bond sale proceeds, investment income earned and related Non-SCIP investment income capital grants made to the Service Boards as expenditures are incurred.

Investment Income on Bonds—to account for transfers of investment income from SCIP Bonds fund accounts through June 30, 1999 and Non-SCIP Bonds fund accounts except those issued under Illinois First program and related capital grants made to the Service Boards as expenditures are incurred.

STATISTICAL SECTION
(UNAUDITED)

CONTENTS

Financial Trends (Tables 1, 2, 3, 4)

An analysis of Net Assets by component and Change in Net Assets are presented as an indicator of RTA's financial performance and to show the overall change in financial position over time. The schedules begin with fiscal year 2001 which is the first year that RTA presented their financials statements in accordance with GASB 34.

Revenue and Expense Capacity (Tables 5, 6, 7)

Revenues and expenditures presented in the following tables include the activities in the government-wide and fiduciary fund statements. Additions to and disbursements from the Sales Tax Agency Fund are considered to be revenues and expenditures, respectively, for the purpose of presentation in these tables. The schedules show the overall distribution of expenses and revenues by source over the past 10 years, the breakout of revenues by county and the federal allocation of capital funds.

Debt Capacity (Tables 8, 9, 10, 11)

Schedules in this section provide an overview of RTA's general obligation bonds (SCIP versus Non-SCIP) outstanding balances as of December 31, 2008 and a 10-year analysis of the debt service requirement to revenues and expenses.

Demographic and Economic Information (Tables 12, 13, 14, 15)

Schedules in this section provide economic information on the population and the ten largest employers in the six-county area to help readers understand the environment within which the RTA's financial activities take place.

Operating Information (Tables 16, 17)

Schedules in this section provide various statistics on passenger services offered by the service boards for fiscal year 2008 and a look at system ridership over the last ten years.

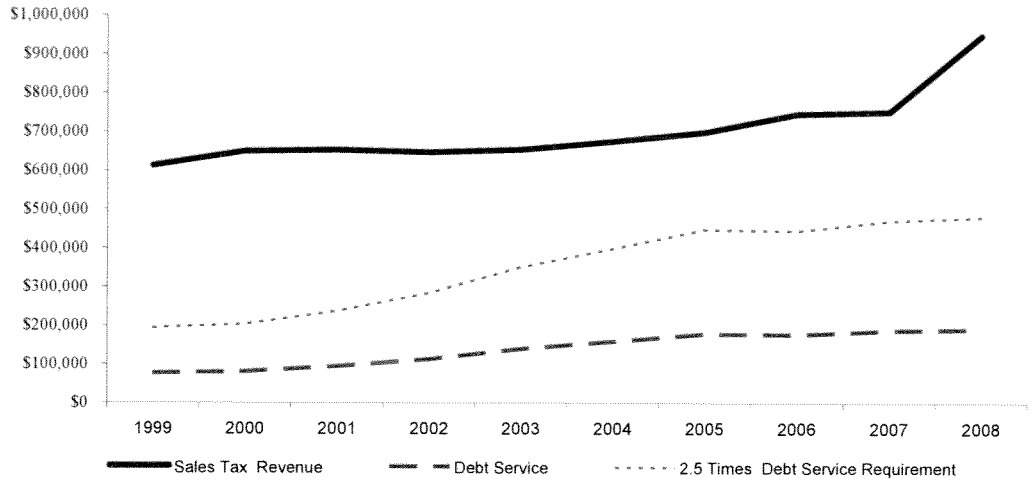
Table 11

COMPARISON OF SALES TAX REVENUE TO DEBT SERVICE REQUIREMENT

1999 - 2008
(In Thousands)



As defined in the Bond and Note General Ordinance, ordinance 85-39, Section 909 (3), revenue test required that all RTA revenues "shall equal or exceed two and one-half (2.5) times the maximum annual debt service requirements." In the graph presented above, the RTA compares 2.5 times debt service requirement to sales tax revenues, a major RTA revenue. In effect, the RTA significantly exceeds the revenue test defined in the ordinance.

Last Ten Years *(In Thousands)*

Year	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008
Sales Tax Revenue	$ 613,514	$ 650,284	$ 653,522	$ 647,685	$ 654,985	$ 675,628	$ 700,395	$ 746,829	$ 752,922	$ 949,617
Debt Service Requirement	77,866	81,676	95,187	113,526	140,607	159,702	179,536	178,086	188,551	192,555
2.5 Times Debt Service Requirement	$194,665	$204,190	$237,968	$283,815	$351,518	$399,255	$448,840	$445,215	$471,378	$481,388

Differences, if any, between debt service amounts presented above and amounts presented in the accompanying financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

June 30, 2010

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

I have the pleasure to submit to you the Comprehensive Annual Financial Report ("CAFR") of the Regional Transportation Authority ("RTA") for the year ended December 31, 2009. The RTA staff has prepared this report as required by, and in accordance with, the RTA Act. This state law requires that the RTA publish financial statements presented in conformity with generally accepted accounting principles and audited by an independent certified public accountant.

This report consists of RTA management's representations concerning its finances. The responsibility for the accuracy, completeness, and fairness of the data rests with management. To the best of our knowledge and belief, this report contains data complete and reliable in all material respects. To provide a reasonable basis for making these representations, management of the RTA has established an internal control structure designed to provide reasonable assurance that assets are safeguarded from loss, theft, or misuse, and that adequate and reliable accounting data is compiled to prepare financial statements in conformity with accounting principles generally accepted in the United States of America. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits of that control, and that the valuation of costs and benefits requires estimates and judgments by management.

In addition to the statutory requirement of the RTA Act for an annual audit by independent certified public accountants, the Single Audit Act Amendments of 1996 and the U.S. Office of Management and Budget Circular A-133, Audits of State and Local Governments, and Non-Profit Organizations, require the RTA to undergo an annual Single Audit. The RTA has engaged the firm of McGladrey & Pullen LLP to meet these requirements. The firm followed auditing standards generally accepted in the United States of America and the standards set forth in the above circular in conducting the engagement. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the RTA's financial statements for the year ended December 31, 2009 are presented in conformity with accounting principles generally accepted in the United States of America. The independent auditor's report is presented as the first part of the financial section of this report.

A separately issued Single Audit report contains a schedule of expenditures of federal awards, the independent auditor's report on internal controls and compliance with applicable laws, regulations, contracts and grants, a schedule of findings and questioned costs, and other information related to the Single Audit.

Accounting principles generally accepted in the United States require that management provide a discussion and analysis to accompany the financial statements. This letter of transmittal complements management's discussion and analysis, and should be read in conjunction with it. The RTA management's discussion and analysis ("MD&A") can be found immediately following the report of the independent auditors.

OVERVIEW OF THE REGIONAL TRANSPORTATION AUTHORITY

Illinois State law (the RTA Act, as amended) created the RTA as a fiscal and policy oversight agency committed to providing an efficient and effective public transportation system for Northeastern Illinois.

> "It is the purpose of [the RTA] Act to provide for, aid and assist public transportation in the northeastern area of the State without impairing the overall quality of existing public transportation by providing for the creation of a single authority responsive to the people and elected officials of the area and with the power and the competence to provide financial review of the providers of public transportation in the metropolitan region and facilitate public transportation provided by Service Boards which is attractive and economical to users, comprehensive, coordinated among its various elements, economical, safe, efficient and coordinated with area and State plans."

History

In 1974, upon approval of a referendum in the six counties of metropolitan Chicago (Cook, DuPage, Kane, Lake, McHenry, and Will), the Act created the RTA as a unit of local government, body politic, political subdivision, and municipal corporation. Initially, the RTA provided financial assistance to the then existing public transportation operators. Subsequently, the role of the RTA expanded to include the acquisition and operation of such public transportation providers, as well as contract with operators to provide service through the purchase of service agreements.

In 1983, the Illinois General Assembly reorganized the structure and funding of the RTA. The Act placed operating responsibilities with the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"). These three entities are defined in the Act as the "Service Boards."

The CTA provides bus and rail transportation services within Chicago and 38 adjacent suburbs. Illinois State law (the Metropolitan Transportation Authority Act) created the CTA in 1945. The law established the CTA as an Illinois municipal corporation "separate and apart from all other government agencies" to consolidate Chicago's public and private transportation carriers. The CTA commenced operations in 1947 and completed the consolidation of public transportation in 1952 upon purchasing the Chicago Motor Coach System.

The Northeast Illinois Regional Commuter Railroad Corporation ("NIRCRC"), a public corporation created in 1980 and operating under the service name of Metra, provides public transportation by commuter rail. The 1983 RTA restructuring formed a Commuter Rail Division, "responsible for providing public transportation by commuter rail." The Commuter Rail Division continued the operation of NIRCRC to provide this transportation. Metra contracts with the Union Pacific Railroad, Burlington Northern Santa Fe, and Northern Indiana Commuter Transportation District to provide service through the purchase of service agreements. In addition, Metra operates the services provided on its North Central Service and South West Service rail lines, as well as the services formerly provided by Rock Island, Milwaukee Road, and Illinois Central Gulf.

The 1983 RTA restructuring also formed a Suburban Bus Division, "responsible for providing public transportation by bus and as may be provided in [the RTA] Act." As such, the Division - operating under the service name Pace - provides non-rail public transportation throughout DuPage, Kane, Lake, McHenry, and Will counties, as well as the suburban area of Cook County.

Collectively, we refer to the RTA, the CTA, Metra, and Pace as the "RTA System."

Mission

The Act sets forth the responsibilities of the RTA. These responsibilities encompass planning, funding, and oversight duties. The Board of Directors has developed the following goals to carry out the RTA legislative mandates:

Plan—Ensure an integrated regional public transportation system through comprehensive planning and coordination with the service providers.

Fund—Develop and allocate resources among the Service Boards to ensure they provide quality and cost-effective service.

Oversee—Monitor and evaluate Service Boards' performance to ensure that service is provided efficiently and effectively.

The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program. This obligation incorporates planning, funding, and oversight duties. The Act enumerates a number of requirements with respect to the budget, plan, and program. These include a requirement that the budget and plan reflect operating revenues of at least 50% of operating costs (a farebox recovery ratio of at least 50%). In addition, the budget and plan must show a balance between revenues, including subsidies, and costs (a balanced budget).

Other responsibilities include establishing policies regarding the allocation of public transportation funding in the Chicago metropolitan region, developing system-wide plans and service standards, coordinating services among different modes of transportation, and ensuring compliance with Federal and State mandates.

Budget

The Act establishes budgetary controls. The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program.

> "Each year the Authority shall prepare and publish a comprehensive annual budget and program document describing the state of the Authority and presenting for the forthcoming fiscal year the Authority's plans for such operations and capital expenditures as the Authority intends to undertake and the means by which it intends to finance them."

The Act establishes certain criteria for the budget, including subsequent monitoring for compliance. Further, the Five-Year Capital Program must specify each capital improvement undertaken by or on behalf of the service boards. The budget calendar as adopted as part of the RTA Business Plan Call and statutory requirements govern the budget development process leading up to adoption of the budget. Subsequent activities involve oversight and amendment of the budget.

Budget Calendar

Based upon the estimate of tax receipts and revenues from other sources, "the Board shall, not later than ... September 15 prior to the beginning of the Authority's next fiscal year" advise each Service Board of the amounts estimated to be available during the upcoming fiscal year and the next two following years, the times when the amounts will be available, and the cost recovery ratio for the next year. The recovery ratio for the region must meet a minimum standard of 50%.

Between September 15 and November 15, each Service Board must prepare and publish a comprehensive annual budget, program document, and a financial plan for the two following years. "The proposed budget and financial plan shall be based on the RTA's estimate of funds that will be available to the Service Boards by or through the Authority, and shall conform in all respects to the requirements established by the Authority." Before submitting its budget to the RTA, each Service Board must hold at least one public hearing in each of the counties in which it provides service, and at least one meeting with each respective county board. After considering the comments from these meetings, it must formally adopt the budget prior to submitting it to the RTA. "Not later than... November 15 prior to the commencement of such fiscal year, each Service Board shall submit to the Authority its proposed budget for the fiscal year and its proposed financial plan for the two following years."

The RTA must also hold at least one public hearing in the metropolitan region and one meeting with each county board on its own proposed budget. After conducting these hearings and taking into consideration the comments, the RTA must adopt its budget and the budgets submitted by the service boards, each of which meets the statutory criteria summarized below. Unless the RTA passes a budget and financial plan for a Service Board, "the Board shall not release to that Service Board any funds for the periods covered by such budget and financial plan," except for the sales tax directly allocated to the Service Board by statute.

Statutory Requirements

The RTA Act sets forth seven statutory criteria for Board approval of the budget and financial plan of each Service Board. These seven criteria are:

- *Balanced Budget*: A balance between anticipated revenues from all sources including operating subsidies and the costs of providing the services and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

- *Cash Flow*: Cash balances including the proceeds of any anticipated cash flow borrowing sufficient to pay with reasonable promptness all costs and expenditures as incurred;

- *Recovery Ratio*: A level of fares or charges, and operating or administrative costs, to allow the Service Board to meet its required recovery ratio;

- *Assumptions*: Employ assumptions and projections which are reasonable and prudent;

- *Financial Practices*: Prepared in accordance with sound financial practices as determined by the Board

- *Strategic Plan:* Maintain consistency with the goals and objectives adopted by the RTA in the Strategic Plan; and

- *Other Requirements*: Other financial, budgetary, or fiscal requirements that the Board may establish by rule or regulation.

Oversight

After adoption of the budgets, the RTA has continuing oversight powers concerning the budget and the financial condition of each Service Board and the region as a whole. On a monthly basis, the RTA monitors the budgetary and operations performance of the Service Boards to ensure compliance with their budget and recovery ratios. On a quarterly basis, the RTA makes the following assessment:

- After the end of each fiscal quarter, each Service Board must report to the RTA "its financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction" for such quarter. If in compliance, the Board so states and approves each Service Board's compliance by adopted resolution.

- If in the judgment of the Board these results are not substantially in accordance with the Service Board's budget for such period as adopted by the RTA, the Board shall so advise the Service Board and the service board "shall, within the period specified by the Board, submit a revised budget incorporating such results."

- Once a Service Board submits a revised budget, the RTA must determine if it meets the seven statutory budget criteria necessary to pass an annual budget. If not, the RTA must withhold from the Service Board (i) 25% of the cash proceeds of taxes imposed by the RTA and (ii) 25% of any state matching funds that are allocated to each Service Board.

- If a Service Board then submits a revised budget and plan which shows that the statutory budget criteria will be met within a four quarter period, the RTA "shall release any such withheld funds to the Service Board."

Amendment

When prudent, the RTA Board may revise estimates of amounts of funds available to the Service Boards during a fiscal year due to shifts in the economic climate, governmental funding programs, or new projects. Upon receiving notice of such a revision, the Service Boards must submit amended budgets to the RTA Board within 30 days. The RTA Board must approve all proposed amendments. If approved, the RTA then monitors actual results compared to the amended budget.

Reporting Entity

As defined by Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity*, the financial reporting entity consists of the primary government (the RTA, as legally defined), as well as its component units—legally separate entities for which the primary government has financial accountability.

Although part of the RTA System, the CTA, Metra, and Pace do not represent component units of the RTA under GASB Statement No. 14. Accordingly, the Comprehensive Annual Financial Report of the Regional Transportation Authority does not include the financial statements of the Service Boards. However, a Combining Annual Financial Report does combine the financial statements of the RTA, the CTA, Metra, and Pace as required by the RTA Act.

RTA System Characteristics

The six-county area served by the RTA system covers 3,700 square miles. Based on the 2000 census, the region has 8 million residents. Regional employment totaled 5 million in 2000. The RTA system carried 639.1 million riders in 2009, a decrease of 1.95% compared to the prior year.

Governance

The RTA Act specifies the composition of the RTA Board of Directors. The RTA Board consists of fifteen appointed members and one elected member from the six-county region. The Mayor of the City of Chicago appoints five directors. The suburban members of the Cook County Board appoint five directors. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry and Will counties, each appoint a director. These fifteen directors, with a minimum concurrence of eleven directors, elect the Chairman of the RTA Board of Directors.

The RTA employs a professional staff of one hundred two. The RTA Act limits the amount of administrative costs that the RTA may incur annually. The limit was set at $5 million for 1985 and has increased at a rate of 5% per year. The RTA has always held its administrative expenses under the prescribed limit.

The Chicago Transit Board, consisting of seven members, governs the CTA. Its members are appointed pursuant to the Metropolitan Transit Authority Act. The Governor of Illinois appoints three members, subject to the approval of the Illinois Senate and the Mayor of Chicago. The Mayor of Chicago, with the consent of the Chicago City Council and the Governor of Illinois, appoints four members, including the CTA Chairman.

The RTA Act specifies the composition of the Metra (Commuter Rail Division) and Pace (Suburban Bus Division) Boards. The Commuter Rail Board, consisting of eleven members, governs Metra. The suburban members of the Cook County Board appoint four members. The Chairmen or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry and Will counties each appoint one director. The Mayor of Chicago, with the consent of the Chicago City Council, appoints one member. These eleven directors, with a minimum concurrence of eight directors, elect the Chairman of the Commuter Rail Board.

The Suburban Bus Board, consisting of thirteen members, governs Pace. The suburban members of the Cook County Board appoint six members. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry, and Will counties each appoint one director. The RTA Act requires that each of these directors must be a current or former "chief executive officer of a municipality" from the area that appoints the member. The Chairmen of the County Boards of DuPage, Kane, Lake, McHenry, and Will, plus the suburban members of the Cook County Board, by simple majority, appoint the Chairman of the Suburban Bus Board.

Financing

The RTA Act specifies the funding responsibilities of the RTA, appointing the RTA as the primary public body in the metropolitan region to secure funds for public transportation.

Sections 4.03 and 4.03.1 of the Regional Transportation Act, 70 ILCS 3615/4.03, authorizes the RTA to impose a series of taxes within the six-county metropolitan region by a vote of nine of its directors: a sales tax, a car rental tax, a motor fuel tax, an off-street parking tax, and a replacement vehicle tax.

Sales Taxes

The Act authorizes the RTA to impose a retailers' occupation tax "ROT," a service occupation tax "SOT," and a use tax "UT." The RTA imposed this tax at the maximum permissible rate in 1979. The 2008 legislation increased the sales tax by .25% in Cook County and .50% in the collar counties. The individual collar counties keep .25% of the increase. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes.
The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 1% in Cook County and .75% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result, the RTA tax on food and drugs is imposed at a rate of 1.25% in Cook, and .75% in collar counties.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate and tax base are identical to the ROT.

The UT is imposed on persons living in the six county areas for the privilege of using a vehicle purchased outside the six county area that must be registered with the State. Unlike the state use tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

Car Rental Tax

Section 4.03.1 of the Act authorizes the RTA to impose an automobile rental occupation and use tax. This occupation tax, paralleling the state and local car rental taxes may be imposed at a rate of 1% in Cook County and ¼% in the collar counties of the gross receipts from car rentals. The use tax may be imposed at the same rates on the privilege of using in the region a car rented outside, but titled in, Illinois. Any car leasing tax would be collected by the Illinois Department of Revenue.

This taxing power was added to the RTA Act in 1982, when the legislature imposed a state-wide car rental tax and authorized cities, counties, and certain special districts that had the power to impose sales taxes to tax the car rental occupation. This taxing power has never been exercised by the RTA.

Motor Fuel Tax

The Act authorized the RTA to impose a tax on retail sales and use of motor fuel at a rate of 5% of gross receipts. Section 4.03 (p) of the Act prohibits the RTA from imposing the motor fuel tax, if it has imposed the broader sales taxes described above. Consequently, this tax has never been imposed.

Off-Street Parking Tax

The Act authorizes the RTA to impose a tax in unspecified amounts on the privilege of parking a motor vehicle in a public or private fee-charging lot in the six county area. Because the Act prohibits the imposition of this tax if the RTA has enacted sales taxes, it has never been imposed.

Replacement Vehicle Tax

The Act authorizes the RTA to impose a $50 tax on any passenger car purchased within the metropolitan area by an insurance company in settlement of a total loss claim of its insured. Any such tax would be collected by the State. This taxing power has never been exercised by the RTA.

As indicated above, the RTA imposes a sales tax in the six-county Northeastern Illinois region. The Illinois Department of Revenue collects this tax and remits the collections to the Illinois State Treasurer. The Treasurer holds the funds in trust for the RTA outside the State Treasury. The Treasurer disburses the funds monthly to the RTA, without appropriation, upon order of the State Comptroller.

The amounts of funding and taxes received, together with revenues from the provision of transit services by the Service Boards and other operating revenues, provide the resources to cover operating costs of the RTA System.

FACTORS AFFECTING ECONOMIC CONDITION

Financing

The RTA's primary source of operating funding is a regional (occupation and use) sales tax and a sales tax match from the State of Illinois. Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region (from the equivalent of 1.0% in Cook County and 0.25% in the remainder of the region to the equivalent of 1.25% in Cook County and 0.5% in the remainder of the region) beginning on April 1, 2008, created a real estate transfer tax in the City of Chicago to fund the CTA, and raised from 25 percent to 30 percent the portion of RTA tax revenues matched by the State Public Transfer Fund (PTF). In 2009, RTA sales tax receipts of $894 million declined 2.9% from prior year despite the rate increase but exceeded budget by 1.9%. In 2008, RTA sales tax receipts exceeded prior year by 22.4% because of the rate increase. In 2007, 2006, 2005, 2004, and 2003, the RTA sales tax increased 0.8%, 6.6%, 3.7%, 3.2%, and 1.1%, respectively.

The RTA 2010 operating budget approved by the Board of Directors on December 17, 2009, assumes sales tax revenue of $890 million, an increase of 1.5% over the 2009 budget but a decline of 0.4% from 2009 actual receipts. In addition to the 30% tax match from the PTF, the budget recognizes these funds from the State of Illinois: $122 million to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds, $36.8 million as partial reimbursement to the Service Boards for discounted and free fares (mandated by law) for student, elderly, and disabled riders, $8.5 million for ADA Paratransit service operations, and $5.4 million of capital funds for the CTA.

Regional and Illinois Economy

The Chicago region is the home to one of the most economically diversified economies in the United States. According to World Business Chicago, the area leads the U.S. in many economic measurements, including high technology employment and output, manufacturing output, and truck, inter-modal, rail, and air distribution. The region is home to more than 400 major corporate headquarters, including 29 Fortune 500 companies. Noted strengths of the Chicago area economy include construction, transportation, utilities, manufacturing, information technology, wholesale and retail trade, leisure and hospitality, professional and business services, education, and healthcare.

Like the nation, both Illinois and the Chicago region posted significant declines in the unemployment rate earlier this decade. However, the unemployment rate in the Chicago region increased from 4.5% in 2006 to 4.9% in 2007 to 6.2% in 2008 to 10.0% in 2009. Similarly, the unemployment rate in Illinois increased from 4.6% in 2006 to 5.1% in 2007 to 6.4% in 2008 to 10.1% in 2009.

The March 2009 Monthly Revenue Briefing issued by the State Commission on Government Forecasting and Accountability noted that during the first nine months of the State's 2010 fiscal year, sales tax receipts of $4.7 billion decreased $506 million or 9.8% compared to the same period during the State's previous fiscal year.

National Economy

Through 2000, the real gross domestic product (GDP), the output of goods and services produced in the United States, grew in the neighborhood of 4% annually for several consecutive years. In 2001, the annual growth rate fell to 1.1% before rebounding to a modest 1.8% in 2002 and 2.5% in 2003. The annual growth rate of 3.6% in 2004 declined to 3.1% in 2005, 2.7% in 2006, and 2.1% in 2007, before plunging to 0.4% in 2008. In 2009, the real gross domestic product contracted 2.4%. The Congressional Budget Office (CBO) predicts real GDP growth of 2.2% in 2010 followed by growth of 1.9% in 2011.

The national unemployment rate averaged 9.3% in 2009, the highest average annual rate since 1994, rising from 5.8% in 2008 and 4.6% in 2007 and 2006. The national unemployment rate held at 9.7% during the first quarter of 2010 declining from 10.0% during November and December of 2009. The CBO forecasts national unemployment rates of 10.1% and 9.5% in 2010 and 2011.

In 2009, the consumer price index (CPI), a measure of the pace of inflation, declined 0.4%. In 2008, the CPI increased 3.8% following increases of 2.8% in 2007, 3.2% in 2006, 3.4% in 2005, 2.7% in 2004 and 2.3% in 2003. The CBO expects the CPI to increase 2.4% in 2010 and 1.3% in 2011, respectively.

Risk Management

The RTA, CTA, Metra, and Pace established a Loss Financing Plan in 1986. The Plan operates as a self-insurance program to provide a source from which to temporarily finance catastrophic losses and other claims incurred by the RTA and the Service Boards, arising out of personal injuries, property damage, and certain other losses. The participating entities (RTA, CTA, Metra, and Pace) administer the Plan, with a representative from the RTA acting as the Fund Manager and representatives from the CTA, Metra, and Pace acting as Fund Advisors.

The Plan required the creation of a Joint Self-Insurance Fund. The Fund has entered into a multi-year, claims-paid insurance agreement to insure against certain losses in excess of $5 million. The Fund pays premiums for this coverage. The participating entities must repay the Fund for submitted claims paid by the Fund that are not covered by the insurance agreement.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the RTA for its Comprehensive Annual Financial Report ("CAFR") for the year ended December 31, 2008. This was the fifteenth consecutive year that the RTA has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

In addition, the RTA received the GFOA Award for Distinguished Budget Presentation for its annual budget for the year ending December 31, 2009. This marks the thirteenth consecutive year that the RTA has achieved this accomplishment. The Distinguished Budget Presentation Award requires that the GFOA judge the budget document as proficient in several categories, including policy documentation, financial planning, and organization.

I would like to express my appreciation to the RTA staff for their efforts in preparing this report.

INDEPENDENT AUDITOR'S REPORT

McGladrey & Pullen
Certified Public Accountants

Independent Auditor's Report

Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Regional Transportation Authority ("RTA") as of and for the year ended December 31, 2009, which collectively comprise the RTA's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the RTA's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Regional Transportation Authority as of December 31, 2009, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Required Supplementary Information and the Management's Discussion and Analysis listed in the foregoing table of contents are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

McGladrey & Pullen, LLP is a member firm of RSM International –
an affiliation of separate and independent legal entities.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the RTA's basic financial statements. The combining and individual fund schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund schedules are the responsibility of the RTA's management. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The accompanying introductory and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

REGIONAL TRANSPORTATION AUTHORITY

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) provides an overview of the financial activity affecting the operation of the Regional Transportation Authority ("RTA") for the fiscal year ended December 31, 2009. Please read it in conjunction with the RTA's basic financial statements which follow this section.

Financial Highlights

- For the year ended December 31, 2009, the RTA statement of activities for the governmental activities shows expenses decreasing $187 million to $399 million from $586 million for the same period in 2008. This decrease is due to a decrease in financial assistance to the CTA, Metra, and Pace ("Service Boards") by $156 million. Revenues increased by $28 million from 2008. The increase was primarily due to an increase in the market value of swap investments.

- The government-wide statement of net assets shows assets of $794 million for the governmental activities, a net increase of $101 million. The increase is mainly due to an increase in cash and investments of $101 million. The increase in cash and investments was due to the timing of receipts. In the government-wide statement of net assets, bond-related liabilities increased by $185 million, which reflects the issuance of bonds of $260 million offset by bond liability reductions.

- At the end of 2009, the government-wide statement of net assets shows a deficit of $2.0 billion for governmental activities. In contrast, the governmental funds balance sheet presented a total fund balance of $596 million. There is a $2.6 billion difference between the fund balance and the net deficit. This does not in any way represent a precarious financial position for the RTA. Rather, it is the result of the presentation of RTA financial statements required by the GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments ("GASB Statement No. 34")*, as it relates to the recording of the RTA general obligation bonds in the government-wide statement of net assets.

- The RTA has the obligation to pay the bonds it has issued to fund the Service Boards' capital expenditures. These expenditures and the related assets appear in the Service Boards' financial statements. The sales taxes imposed by the RTA in the region represent the primary source of payment for the bond obligations.

USING THIS COMPREHENSIVE ANNUAL FINANCIAL REPORT (CAFR)

Overview of the CAFR—The RTA CAFR consists of three parts:

1. Introductory Section—This section includes the letter of transmittal, the GFOA Certificate of Achievement, the organizational chart, and the list of principal officials.

2. Financial Section—This section is comprised of the independent auditor's report, the management's discussion and analysis, the basic financial statements, and the required supplementary information and combining and individual fund schedules.

3. Statistical Section (Unaudited)—This section provides additional analysis and is not a required part of the basic financial statements of the RTA.

The basic financial statements contain three parts: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to financial statements. A discussion of the basic financial statements is included in this CAFR as follows:

Government-wide Financial Statements—The government-wide financial statements provide a broad overview of the RTA finances in a manner similar to those of a private-sector business. The statements are prepared following the full accrual basis of accounting.

- ***Statement of Net Assets***—The statement of net assets presents information on all of the RTA's assets and liabilities. The statement subtracts liabilities from assets to compute—in the case of the RTA—a net deficit. This net deficit reflects the recording of bonds issued by the RTA for capital grants to the Service Boards to acquire and construct assets used to provide public transportation. These assets appear in the financial statements of the Service Boards. The bonds represent general obligations of the RTA to which the RTA has pledged its full faith and credit.

  The size of the net deficit will increase as the RTA continues to issue bonds to fund the RTA System capital program.

- ***Statement of Activities***—The statement of activities shows the change in net assets of the governmental and business-type activities. Governmental activities include operating and capital asset funding (capital grants) to the Service Boards, RTA administrative expenses, the RTA Travel Information Center, certification of riders for paratransit service under the Americans with Disabilities Act (regional expenses), and interest expense on bonds issued by the RTA. Business-type activities consist of the RTA Joint Self-Insurance Fund.

  The government-wide financial statements include only the RTA (the "primary government"). There are no "component units" (separate legal entities for which the RTA is financially accountable) that the RTA government-wide financial statements are required to include.

  The RTA does not consider the CTA, Metra, or Pace to be component units, therefore, the RTA government-wide financial statements do not incorporate the financial data of the Service Boards. See Letter of Transmittal and Note 1 to the financial statements for further details.

Fund Financial Statements—A fund refers to a set of related self-balancing accounts used to maintain control over resources segregated for specific activities or objectives. The RTA, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The RTA's funds are accounted for in three fund types: governmental funds, proprietary

funds, and fiduciary funds. These financial statements are prepared following the modified accrual basis of accounting.

- ***Governmental Funds***—Governmental funds account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as balances of spendable resources available at the end of the year.

  Unlike the information presented for governmental funds, information presented for governmental activities in the government-wide financial statements, includes the long-term impact of near-term financing decisions. The governmental funds financial statements provide reconciliations to facilitate comparison between governmental funds and government-wide financial statements.

  In the fund level basic financial statements, the RTA presents three major governmental funds: a general fund, a debt service fund, and a capital projects fund. The governmental funds financial statements present information for each major fund separately. Individual fund data for each of the RTA governmental funds is presented in this CAFR in the section labeled "Combining and Individual Fund Schedules."

  The RTA adopts an annual appropriated budget for its general fund. The Required Supplementary Information and Combining and Individual Fund Schedules include a budgetary comparison.

- ***Proprietary Funds***—The RTA maintains a proprietary fund to account for the RTA Joint Self-Insurance Fund. This type of proprietary fund, referred to as an enterprise fund, reports the same functions presented as business-type activities in the government-wide financial statements. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. As required by Article II of the Loss Financing Plan, the RTA Joint Self-Insurance Fund issues separate audited financial statements.

- ***Fiduciary Funds***—Fiduciary funds account for resources held for the benefit of parties outside the government activity. In the case of the RTA, the fiduciary fund accounts for the assets of the RTA defined-benefit Pension Plan and the Sales Tax Agency Fund. The government-wide financial statements do not reflect fiduciary funds as these funds are not available to support the programs and operations of the RTA. The RTA Pension Plan issues audited financial statements separately.

ANALYSIS OF THE GOVERNMENT-WIDE FINANCIAL STATEMENTS

The following table summarizes the Statement of Net Assets:

SUMMARY OF NET ASSETS

DECEMBER 31, 2009 AND 2008

(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2009	2008	Variance	2009	2008	Variance	2009	2008	Variance
Assets:									
Cash and investments	$ 497,841	$ 396,836	$ 101,005	$ 20,612	$ 22,902	$ (2,290)	$ 518,453	$ 419,738	$ 98,715
Other assets	283,137	284,539	(1,402)	6,347	3,207	3,140	289,484	287,746	1,738
Noncurrent assets	-	-	-	2,108	2,750	(642)	2,108	2,750	(642)
Capital assets—net	12,660	11,118	1,542	-	-	-	12,660	11,118	1,542
Total assets	793,638	692,493	101,145	29,067	28,859	208	822,705	721,352	101,353
Liabilities:			-						
Current non bond-related liabilities	123,927	307,281	(183,354)	-	-	-	123,927	307,281	(183,354)
Current bond related liabilities	69,827	74,157	(4,330)	-	-	-	69,827	74,157	(4,330)
Long-term non-bond-related liabilities	49,133	50,136	(1,003)	-	-	-	49,133	50,136	(1,003)
Long-term bond-related liabilities	2,502,199	2,312,541	189,658	-	-	-	2,502,199	2,312,541	189,658
Total liabilities	2,745,086	2,744,115	971	-	-	-	2,745,086	2,744,115	971
Net assets (deficit):									
Invested in capital assets	12,660	11,118	1,542	-	-	-	12,660	11,118	1,542
Unrestricted (deficit)	(1,964,108)	(2,062,740)	98,632	29,067	28,859	208	(1,935,041)	(2,033,881)	98,840
Total net assets (deficit)	$ (1,951,448)	$ (2,051,622)	$ 100,174	$ 29,067	$ 28,859	$ 208	$ (1,922,381)	$ (2,022,763)	$ 100,382

As of December 31, 2009, cash and investments for governmental activities increased by $101 million over the previous year. During 2009, the Capital Projects Fund decreased by $47 million, conversely the Debt Service Fund increased by $156 million mainly due to 2009 cash note borrowings. The decrease in cash and investments for the Capital Projects Fund reflects the activity in bond capital expenditures.

As of December 31, 2009, the current non bond-related liabilities decreased by $183 million from the previous year due to timing differences in funds distributed to the Service Boards and the payoff of the working cash note.

The presentation of financial statements under the GASB Statement No. 34 requires the recognition in the statement of net assets of $2.6 billion in current and long-term general obligation bonds payable. Prior to the implementation of GASB Statement No. 34, these bonds were recorded in the general long-term debt account group and presented, prior to the 2001, as credits, with an equal amount of other debits (i.e., amount available and amount to be provided for the retirement of long-term debt). This was a result of the recording of bonds issued by the RTA under its bonding authority. The issuance of these bonds was for the specific purpose of funding capital grants to acquire and construct assets used to provide public transportation within the RTA region.

This deficit will not affect the availability of RTA fund resources for future use. In fact, the RTA maintains its operations funding levels for 2010 as established in September 2009 during the 2010 budget process.

The following table summarizes the RTA Statement of Activities presented in this CAFR:

SUMMARY OF ACTIVITIES
DECEMBER 31, 2009 AND 2008
(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2009	2008	Variance	2009	2008	Variance	2009	2008	Variance
Expenses:									
Financial assistance to Service Boards	$ 93,453	$ 249,948	$ (156,495)	$ -	$ -	$ -	$ 93,453	$ 249,948	$ (156,495)

Change in net assets	100,174	(114,203)	214,377	208	466	(258)	100,382	(113,737)	214,119
Net assets—beginning of year	(2,051,622)	(1,937,419)	(114,203)	28,859	28,393	466	(2,022,763)	(1,909,026)	(113,737)
Net assets—end of year	$ (1,951,448)	$ (2,051,622)	$ 100,174	$ 29,067	$ 28,859	$ 208	$ (1,922,381)	$ (2,022,763)	$ 100,382

Financial assistance to the Service Boards decreased by $157 million from $250 million in 2008 to $93 million in 2009. Capital grants to the Service Boards also decreased by $52 million, from $119 million in 2008 to $67 million in 2009, which reflects the activity in capital expenditures to the Service Boards during 2009. The amount of bond interest increased by $4 million from $127 million to $131 million. PTF and state assistance increased by $2 million, offset by the sales tax decrease of $10 million, an increase in investment income of $39 million was due to an increase in swap investments market value and appreciation in market value of investments, and the decrease in operating grant revenue of $5 million, resulting in an increase of $27 million in total revenue from 2008.

During 2009, a total of $3.5 million was transferred to the Joint Self-Insurance Fund for excess liability. Insurance premiums represent the only major expense, and investment income represents the only revenue for the Business-type activities (insurance financing).

FINANCIAL ANALYSIS OF THE GOVERNMENT FUNDS

As noted earlier, the RTA employs three fund types: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds—Governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as the balances of spendable resources available at the end of the year. See the Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances on pages 26 and 28, respectively, for further details.

General Fund—Assets in the general fund primarily represent the amounts for Service Boards' operations and capital projects. Assets increased by $1 million from $347 million in 2008 to $348 million in 2009, mainly due to timing differences. Also, intergovernmental receivables decreased $53 million due to timing differences.

At December 31, 2009, the majority of RTA's liabilities of $220 million are comprised of intergovernmental payables and due to other fund, i.e., accrued financial assistance, sales taxes, capital and other grants due to the Service Boards and deferred revenue and notes payable.

The total fund balance of the General Fund equals $127 million at December 31, 2009. The General Fund balance increased by $74 million primarily due to increases in public funding and higher investment income.

Reserved for other includes $38 million in interest rate swap expenses, $31 million in capital, $47 million in Debt Service Deposit Agreement ("DSDA"), and $485 thousand in prepaid items. The amount reserved for RTA capital projects is for projects focusing on the application of advanced technology on transportation systems to improve the efficiency of such systems. The transit industry views such technology as having the potential for increasing ridership and revenues by making transit systems more attractive to customers.

These applications include the following:

- Active transit station signs, Phase III expansion and evaluation (variable message signs designed to provide real-time "next train" or "next bus" service information at transit stops).
- Transfer connection protection (a system to minimize connecting time between transit vehicles by ensuring pre-scheduled connections).
- Transit management systems (voice/data communication functions, computer-aided dispatching, and automatic vehicle location technologies to improve transit operating efficiency, increase service reliability, and ensure schedule adherence).
- Parking management systems (real-time information and guidance regarding the availability of parking spaces at transit and ride-share parking facilities).
- Transit signal priority (gives/extends a green signal to transit buses under certain circumstances to reduce passenger travel times, improve bus schedule adherence, and reduce bus operating costs).

- Multi-Modal Trip Planner System (MMTPS) to provide side by side comparisons of trip itineraries using transit, driving, or any combination of non-motorized modes such as biking and walking. It will give customers a comprehensive decision support tool for choosing travel options that incorporate convenience, efficiency, and cost – from the traveler's perspective.

- Traveler Resource and Itinerary Planning System (TRIPS) is a traveler information system which matches regional attractions with transit directions using interactive electronic kiosks.

The remaining unreserved and undesignated fund balances total ($28) million.

Debt Service Fund—The RTA establishes a Debt Service Fund to account for transfers received from the General Fund, investment income, and principal and interest payments made for each of its outstanding series of bonds. As of December 31, 2009, the RTA has eighteen series of general obligation bonds outstanding. Each respective bond agreement sets forth the debt service funding requirements. The 2009 Debt Service Fund balance increased by $256 million to $337 million.

Capital Projects Fund—The RTA has established a Capital Projects Fund to account for bond proceeds, earnings on the investment of such proceeds (except noted otherwise), and the expenditure of such monies for capital assets of the Service Boards. In addition, the RTA can use a portion of these funds to pay for debt service on the related bonds. During 2009, the Capital Projects Fund decreased by $47 million. The decrease in cash and investments for the Capital Projects Fund reflects the activity in bond capital expenditures.

Proprietary Fund—The RTA has established a proprietary fund to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one proprietary fund which relates to the activities of the Joint Self-Insurance Fund.

GENERAL FUND BUDGETARY HIGHLIGHTS

Overall, revenues are higher than the budget goal by $44 million. Despite a poor economic environment during 2009 sales tax and PTF receipts exceeded budget. The RTA receives reimbursement from the State for debt service on bonds issued under the Strategic Capital Improvement Plan (SCIP). Such reimbursement, termed ASA and AFA, is included in the State assistance line item in the financial statements, which recognized a total of $123 million in 2009. In 2009, the investment income exceeded budget by $26 million which was due mainly to interest rate swap valuation gain of $20 million in 2008. Total financial assistance to the Service Boards exceeded budget by $9 million in 2009. Other non-administration and technology program expenditures were under budget by $1 million, primarily due to delays in some program initiatives.

SERVICE BOARDS CAPITAL ASSETS AND LONG-TERM DEBT ACTIVITY

The financial statements of the Service Boards reflect the capital assets discussed in this section. The statement of net assets for the RTA reflects the RTA bonds issued to provide a portion of the funding for these assets. The details of the RTA bond program are discussed further in Note 10 of this report.

Service Boards Capital Assets—The RTA System provides 639.1 million unlinked passenger trips annually. This has the beneficial impact of reducing road congestion, improving the flow of goods and services, and enhancing air quality. In addition, the RTA System provides essential mobility to those persons unable to utilize other transportation. The System represents an asset with replacement cost estimated at more than $36.4 billion for the entire region. Prior year's asset values of $31.3 billion were inflated using Engineering News Record's Chicago Construction Cost Index. To continue these public benefits, the RTA strives to maximize the amount of resources devoted to investment in its System for it to remain in good working order. The RTA Five-Year Capital Program report contains the details of this investment. The Five-Year Capital Program report is updated and adopted annually by the RTA Board, as required by the RTA Act.

Sources of funds for capital investment include federal programs, proceeds of RTA bonds, and State of Illinois programs. The level of capital funding from Federal as well as State programs has risen, reflecting the increasing recognition of the importance of public transportation. In recent years, the RTA and the Service Boards have also been able to direct funds to capital projects by successfully constraining operating costs.

RTA Capital Assets—For more detailed information on capital asset activity, please see Note 9 in the notes to the financial statements.

Long-Term Debt Activity—Under the RTA Act, the RTA has authority to issue General Obligation Bonds for the improvement and expansion of the RTA System. This authority resulted from successful RTA efforts to demonstrate to the State legislature the need for capital reinvestment. The authorization identified two types of bonds: Strategic Capital Improvement Program ("SCIP") bonds and RTA ("Non-SCIP") bonds.

Prior to January 1, 2000, the RTA had the authority to issue up to $500 million in SCIP bonds and to have up to $500 million in Non-SCIP bonds outstanding. Effective January 1, 2000, the RTA Act was amended to increase the RTA authorization by an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004, and to issue and have outstanding up to $800 million of Non-SCIP bonds. As of year-end 2009, the RTA has issued $1.790 billion in SCIP bonds, with total SCIP bonds outstanding of $1.538 billion. The remaining $620.8 million bonds outstanding relate to Non-SCIP bonds.

For 2009, the bonds issued by the RTA carried a rating of "AA+" from Standard & Poor's, Aa3 by Moody's Investors Service, Inc and AA- by Fitch, Inc. On January 21, 2010, the RTA issued $175.1 million of Non-SCIP bonds.

CONTACTING THE FINANCIAL MANAGEMENT OF THE REGIONAL TRANSPORTATION AUTHORITY

This CAFR provides a general overview of the finances of the RTA. Users of the CAFR should address questions concerning the information, or requests for additional financial information, to the Regional Transportation Authority, c/o Senior Deputy Executive Director, Finance and Administration 175 West Jackson Blvd., Suite 1550, Chicago, Illinois 60604 or visit our website at www.rtachicago.org.

REGIONAL TRANSPORTATION AUTHORITY

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET TO THE STATEMENT OF NET ASSETS
DECEMBER 31, 2009
(In Thousands)

TOTAL FUND BALANCE—GOVERNMENTAL FUNDS	$ 596,240
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds. This is the capital assets, net of accumulated depreciation recognized in the statement of net assets.	12,660
Bond issue costs are paid in the current year and, therefore, are reported in the funds. This asset represents the unamortized portion recognized in the statement of net assets.	12,401
General obligation bonds payable are not due and payable in the current period and, therefore, are not reported in the funds. This liability represents the total current and long-term portion of the general obligation bonds payable recognized on the statement of net assets.	(2,419,120)
Bond premiums are paid in the current year and, therefore, are reported in the funds. This liability represents the unamortized portion recognized in the statement of net assets.	(119,502)
Accrued interest payable on bonds is not due and payable in the current period and, therefore, is not reported in the funds. This liability is accrued in the statement of net assets.	(33,404)
Expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.	(723)
TOTAL NET DEFICIT—GOVERNMENTAL ACTIVITIES	$ (1,951,448)

The notes to financial statements are an integral part of this statement.

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF THE GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
YEAR ENDED DECEMBER 31, 2009
(In Thousands)

NET CHANGE IN FUND BALANCES—TOTAL GOVERNMENTAL FUNDS	$ 283,735
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay ($2,053) exceeded depreciation expense ($510) in the current period.	1,543
The issuance of long-term debt provides current financial resources to governmental funds. However, this transaction has no effect on net assets.	(260,000)
The repayment of the principal of long-term debt consumes the current financial resources of governmental funds. However, this transaction has no effect on net assets.	68,455
Accrued interest on bonds reported in the statement of activities does not require the use of current financial resources and, therefore, is not reported as expenditures in governmental funds.	515
Governmental funds report bond premiums as financing source. However, in the statement of activities, the premiums are amortized over the life of the bonds and recorded as a reduction of bond interest expense.	5,702
Unamortized bond issue costs reported in the statement of activities require the use of current financial resources and therefore, are fully recognized in the governmental funds.	334
Expenses reported in the statement of activities do not require the use of current resources and, therefore, are not reported as expenditures in governmental funds.	(110)
CHANGE IN NET ASSETS OF GOVERNMENTAL ACTIVITIES	$ 100,174

1. REPORTING ENTITY

The Regional Transportation Authority ("RTA") was established in 1974 upon approval of a referendum in its six-county Northeastern Illinois region. The operating responsibilities of the RTA are set forth in the RTA Act ("Act"). The RTA is a unit of local government, body politic, political subdivision and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, on November 9, 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"), each having its own independent board of directors. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Service Boards provide services to different geographic areas within the six-county region. Metra provides transit service to the six-county area, with the majority of the transit riders residing in the suburban metropolitan area and commuting into the City of Chicago. Pace's primary service area is the suburban communities, with limited services to areas within the City of Chicago. The CTA provides service to the City of Chicago and 38 neighboring suburbs within Cook County. Although programs are underway to increase the transfer of ridership between the service entities, trips of this type presently represent a minority of those taken.

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA System as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. For purposes of the recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with generally accepted accounting principles, with certain exceptions. Capitalized expenditures are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act. The Service Boards achieve their required recovery ratio by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA has the responsibility to monitor the budgets and financial performance of the Service Boards.

As defined by accounting principles generally accepted in the United States established by the Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity,* the financial reporting entity consists of the primary government, as well as its component units, which are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountability is defined as:

> Appointment of a voting majority of the component unit's board, and either: (a) the ability to impose will by the primary government, or (b) the possibility that the component unit will provide a financial benefit to, or impose a financial burden on, the primary government; or fiscal dependency on the primary government.

In addition, a component unit also includes certain organizations that the primary government is not financially accountable for if the nature and significance of their relationship, including ongoing financial support are such that exclusion from the financial reporting entity would render the entity's financial statements incomplete or misleading.

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with governmental accounting and financial reporting standards in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters, including ownership of assets, relations with Federal and State transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.

- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors who is also an RTA Board member.

- The Illinois statutes required the RTA Board to approve the budgets of the Service Boards if such budgets meet specified system-generated revenues recovery ratios and other requirements as defined by the Act.

- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficits.

Based on these factors and applying the aforementioned criteria used to determine financial accountability, management of the RTA does not consider the Service Boards to be component units and, accordingly, the financial data of the Service Boards have been excluded from the RTA reporting entity. The RTA is not aware of any entity which is financially accountable for the RTA that would result in the RTA's being considered a component unit of such entity.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the RTA conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting—The accounts of the RTA are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled. In the financial statements, the various funds are grouped into three broad fund types and six generic fund categories as follows:

Governmental Fund Types—The RTA's Governmental Fund Types consist of the General Fund, Debt Service Fund, and Capital Projects Fund.

General Fund—The General Fund is the general operating fund of the RTA. It is used to account for all financial transactions that are not specifically required to be accounted for in another fund.

Debt Service Fund—The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

Capital Projects Fund—In 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of Strategic Capital Improvement Program ("SCIP") bonds, and to have a maximum of $500 million RTA bonds outstanding. The Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of the bond issues. The Capital Projects Fund was first established in 1990 with the issuance of $100 million of RTA bonds to fund capital projects at the Service Boards. The proceeds from the bonds issued under the General Assembly's authorization were allocated by the RTA as follows: 50% for capital projects of the CTA; 45% for capital projects of Metra; and 5% for capital projects of Pace. Projects included in approved five-year Capital Programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

In 1999, the Illinois General Assembly passed additional bonding authorization, thereby increasing the RTA bond authority to $800 million outstanding effective January 1, 2000. It also increased SCIP bond issues by $260 million each year for five years from 2000 to 2006 for a total of $1.5 billion additional bond issues.

Proprietary Fund Type—Proprietary Funds are used to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one Proprietary Fund which relates to the activities of the Joint Self-Insurance Fund.

Joint Self-Insurance Fund—The Joint Self-Insurance Fund ("Fund") is used to account for the financing of claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. The Fund is essentially a financing mechanism providing a source from which to borrow or to pay for the first $5 million of catastrophic losses and other claims incurred by the Service Boards and the RTA arising out of personal injuries, property damage, and certain other losses. This Fund is reported as an Enterprise Fund since the predominant participants are outside of the RTA.

Fiduciary Fund Type—Fiduciary Funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's Fiduciary Funds consist of one Agency (Sales Tax) Fund and a Pension Trust Fund.

Agency Fund—The Sales Tax Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra and Pace, including Retailers' Occupation and Use Tax (sales taxes), interest on sales taxes, and reduced fare reimbursement grants. For RTA budgetary purposes, sales tax receipts are recorded in the Sales Tax Agency Fund and are equally offset by amounts recorded as disbursements reflecting the pass-through to the Service Boards.

Pension Trust Fund—The Pension Trust Fund is used to account for the accumulation of resources for, and payments of, retirement benefits to employees participating in the RTA Pension Plan.

Government-wide and Fund Financial Statements—The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the RTA in a manner similar to a private-sector business. The effect of

interfund activities have been removed from these statements. Governmental activities which are supported by sales taxes and intergovernmental revenues are reported separately from the insurance activities. The insurance activities include interest charges for loans advanced for claims of the Service Boards. Likewise, the fiduciary fund type - RTA Pension Trust Fund and Sales Tax Agency Fund are presented separately and are not included in the government-wide financial statements of the RTA.

The statement of activities shows certain direct program expenses which are offset by program revenues. Governmental program activities include expenses such as financial assistance and capital asset funding (capital grants) to CTA, Metra, and Pace; administrative expenses; operating the RTA Travel Information Center, certifying riders for paratransit service under the Americans with Disabilities Act ("ADA") and other services (regional expenses); and payment of debt service on bonds issued by the RTA. Program revenues include operating grants and contributions that are restricted to meeting the operational requirements of a particular program (i.e., technology and non-technology programs). Sales taxes, Public Transportation Fund ("PTF"), state assistance ("ASA/AFA"), investment income and other items properly excluded from program revenues are reported instead as general revenues.

Fund level financial statements are provided for governmental funds, proprietary fund, and fiduciary funds.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation—The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund (Joint Self-Insurance Fund) and the Pension Trust Fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Sales taxes are recognized as revenues if collected by the retailers by year-end. Grants and similar items are recognized as revenues when qualifying expenditures have been incurred and as soon as all eligibility requirements imposed by the grantors have been met. Prepaid expenses are recorded using the consumption method.

The Joint Self-Insurance Fund distinguishes operating revenues and expenses from non-operating items. Operating revenues (interest charged to Service Boards) and expenses (administrative expenses including insurance premium and professional services) generally result from providing services in connection with the proprietary fund's ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The Sales Tax Agency Fund is custodial in nature (assets equal liabilities) and does not involve the measurement of results of operations.

Governmental fund financial statements use the current financial resources measurement focus. The funds are accounted for using the modified accrual basis of accounting; i.e., revenues are recognized as soon as they are both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or shortly thereafter to pay liabilities of the current period. Sales taxes are considered measurable and available if collected by the retailer by year-end and received by the RTA within 80 days after year-end. ASA/AFA is considered measurable and available if billed and received within 180 days after year-end. Sales taxes and ASA/AFA are susceptible to full accrual. Additionally, certain compensated absences and claims and judgments are recognized when the obligations are expected to be liquidated with expendable available financial resources.

The RTA reports three major governmental funds—General Fund, Debt Service Fund, and Capital Projects Fund; one proprietary fund—Joint Self-Insurance Fund; and two fiduciary funds—Pension Trust Fund and Sales Tax Agency Fund.

Major funds are funds whose revenues, expenditures/expenses, assets, or liabilities (excluding extraordinary items) are at least 10 percent of corresponding totals for all governmental or enterprise funds and at least 5 percent of the aggregate amount for all governmental and enterprise funds.

Assets, Liabilities and Fund Equity

Cash and Investments—All excess General Fund cash is invested and earnings are credited to the General Fund for use in financing general RTA operations. All investments are reported at fair value which is determined using various sources. Short-term investments are reported at cost, which approximates fair value due to their short-term nature. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

Intergovernmental Receivables—Receivables include amounts due from State and local governments for sales taxes, specific programs or projects, and services.

Capital Assets—The RTA sets a capitalization threshold of no less than $5,000 for any capital item(s). Capital assets are recorded at historical cost (or fair market value at the time of donation, if donated) and have a useful life of at least two years following the date of acquisition. Any acquisitions during the year are considered acquired at the beginning of that year for the purpose of computing depreciation. The RTA uses the straight-line method for computing depreciation expense. Leasehold improvements made to RTA's office facilities are capitalized, and their costs amortized during the life of the lease. Leasehold improvements and major equipment repairs, if any, are also capitalized during the remaining life of the lease or the extended useful life of the equipment. The Capital-Technology Program's capitalized assets are for projects in progress; therefore, the assets are non-depreciable.

Description	Useful Life
Furniture and equipment	5 years
Computer equipment	5 years
Leasehold improvements	Life of the lease

Restricted Assets—Bond proceeds and amounts set aside for general obligation debt service are classified as restricted assets since their use is limited by the bond indentures. When both restricted and unrestricted resources are available for use, it is RTA's policy to use restricted resources first, then unrestricted resources as needed.

Compensated Absences—Compensation for holidays, illness, and other qualifying absences is not accrued in the accompanying financial statements because rights to such compensation amounts either do not accumulate or they do not vest. The RTA accounts for compensated absences under GASB No. 16, entitled Accounting for Compensated Absences, whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability. Compensated absences are recorded in the General Fund only if they have matured (i.e., unused leave still outstanding at time of an employee's resignation or retirement).

Intergovernmental Payables—These amounts include accrued financial assistance, sales taxes, capital and other grants due to the Service Boards.

Fund Balances—Portions of the fund balances of the Governmental Funds are reserved by the RTA for specific purposes as follows:

Reserved for Service Boards Capital Projects represents the portion of the fund balance to provide the local share of Federal and State funded capital projects and to fund 100% of those projects not funded by another source. It also includes the remaining bond proceeds, investment income committed for capital projects of the Service Boards, and any interest rate swap proceeds for capital projects of the Service Boards.

Reserved for Debt Service represents the portion of the fund balance of RTA resources legally restricted for the payment of long-term debt principal and interest amounts maturing within the next year.

Reserved for RTA Capital Projects represents the portion of the RTA fund balance for the unspent portion of capital authorized by the RTA's current and prior years' budgets and the portion of the interest rate swap proceeds for RTA funded capital projects.

Reserved for Interest Rate Swap expense represents the portion of the interest rate swap proceeds set aside for future expenses relating to swap transactions such as fees and interest expenses.

Revenues—The RTA has four principal sources of revenue: (1) retailer's occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Tax); (2) funds appropriated to the RTA by statute through the PTF established under the Act; (3) State or Federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the Act; and (4) investment income on unexpended funds held by the RTA, and other miscellaneous revenue.

Sales Tax—The RTA Sales Tax consists of (i) in Cook County, (a) a tax of 1¼ % of the gross receipts from sales of drugs, certain medical supplies and food prepared for consumption off the premises (other than for immediate consumption) imposed on all persons selling tangible personal property at retail (a Food and Drug Tax) and (b) a tax of 1% of the gross receipts from all other taxable retail sales; (ii) in counties within Northeastern Illinois other than Cook County, a tax of 0.5% of the gross receipts from all taxable retail sales (together with (i) (b), a General Sales Tax); and (iii) a tax of 1% on the use in Cook County, and 0.5% on the use in Northeastern Illinois other than Cook County of tangible personal property purchased from a retailer outside Northeastern Illinois and titled or registered with a State agency by a person with a Northeastern Illinois address (a Use Tax); and (iv) a tax imposed in the same locations and at the same rates as the Food and Drug Tax and the General Sales Tax on persons engaged in a sale of service pursuant to which property in the form of tangible personal property or in the form of real estate is transferred incident to a sale of a service (a Service Occupation Tax).

The taxes described in (i) and (ii) above are also imposed on persons engaged in making sales of services pursuant to which tangible personal property or real estate (as incident to a sale of a service) is transferred (with respect to the taxes in (i) and (ii), a Service Occupation Tax).

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed that portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State, but registered or titled with a State agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the "Replacement Fund"). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax, and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a State agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the "Reform Fund"). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of the tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

Service Board	Collected Within Chicago	Collected within Cook County Outside Chicago	Collected in DuPage, Kane, Lake McHenry and Will Counties
CTA	100 %	30 %	
Metra		55 %	70 %
Pace		15 %	30 %

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of the total sales taxes collected to which it is entitled by the amended Act. The remaining portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

In January 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region, increased the real estate transfer tax (RETT) in the City of Chicago, and raised the portion of RTA sales tax revenues matched by PTF. The RTA sales tax rate was increased 0.25% in Cook County and 0.50% in the Collar Counties effective April 1, 2008. Proceeds of the sales tax increase in the Collar Counties are divided evenly between the RTA and the county where the tax is collected. Effective April 1, 2008,

the real estate transfer tax (RETT) in the City of Chicago was increased 0.3% (i.e. for every $500 in sales price $1.50 in tax is collected).

In February 2008, the PTF match of the pre-2008 RTA sales tax increased from 25% to 30%. In April 2008, the 5% PTF match was applied to the RETT and the RTA portion of the sales tax increase. In January 2009, the PTF match of both the RETT and the RTA portion of the sales tax increase rose from 5% to 30%.

While the RETT and the 25% PTF match of RETT funds only the CTA, the largest part of P.A. 95-0708 revenue provides funding for CTA, Metra, Pace and ADA Paratransit operations, as well as for regional innovation, coordination and enhancement (ICE) and suburban community mobility (SCMF) initiatives. Funds for ADA Paratransit, ICE and SCMF are by statute set aside before distributions to the CTA, Metra and Pace.

Public Transportation Fund—In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the "Public Transportation Fund," an amount equal to 30% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes) and RETT. These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2010 fiscal year which will end June 30, 2011.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement—In the State's fiscal year 2010, which ends June 30, 2010, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation ("IDOT") is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2009 and June 30, 2010, the grants were in the amount of $28.9 million and $42 million, respectively.

Additional State Assistance/Additional Financial Assistance—The State has authorized Additional State Assistance ("ASA") which is supplemental financing for the RTA's Strategic Capital Improvement Program ("SCIP") bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of refunding or advance refunding SCIP bonds, less interest earned on the remaining bond proceeds, or (ii) $55 million per year. The RTA recognized $39.7 million of ASA in 2009.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance ("AFA") to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million in the State's fiscal years 2009 and 2010, per year. The RTA recognized $83.3 million of AFA in 2009.

In accordance with the Act, earnings on certain investments in the Capital Projects Fund are credited to the Debt Service Fund. This is done to compensate for prior State fiscal year earnings reducing the actual ASA and AFA grant amounts.

Expenditures and Expenses—Operating grants consist of financial assistance to the Service Boards. The RTA provides operating assistance to the Service Boards to fund, in part, their RTA-approved budgets.

Capital grants consist of the RTA local match of Federal Transit Administration ("FTA") and IDOT-funded capital projects, 100% RTA-funded projects and capital projects funded by RTA, SCIP bonds, and investment income on bonds. Capital payments of approximately $10 million for sales tax funding are due to Metra based on a statutory formula. This formula consists of the budgeted sales tax revenues in excess of Metra's budgeted operating deficit. This amount is presented in the Sales Tax Agency Fund.

Administration consists of those costs of the RTA incurred to carry out its administrative activities. These costs were limited by statute to $16,125,371 for the year ended December 31, 2009.

Non-administration, listed as regional and technology program expenses in the statement of activities, consists of those costs of the RTA which are exempt from the statutory limit defined in the RTA Act. These costs include the operation of the Travel Information Center, Transit Check Program, Americans with Disabilities Act ("ADA"), reduced fare registration, capital development and other program costs incurred on behalf of the Service Boards and not for the benefit of RTA itself.

Cash Flows—For purposes of the statement of cash flows, the RTA considers all short-term securities with original maturities of three months or less to be cash equivalents. Cash and cash equivalents aggregated $12.8 million at December 31, 2009 and are included in cash and cash equivalents under business-type activities on the accompanying statement of net assets. The remaining $7.8 million constitutes investments in the Joint Self-Insurance Fund with original maturities in excess of three months.

Management's Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Accounting Pronouncements—In September 1993, the GASB released Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that use Proprietary Fund Accounting.* The statement provides that proprietary funds may apply all GASB pronouncements, as well as the following pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements: Statements and Interpretations of the Financial Accounting Standards Board ("FASB"), Accounting Principles Board ("APB") Opinions and Accounting Research Bulletins ("ARBs") of the Committee on Accounting Procedure. The RTA has elected to apply only FASB, APB and ARB statements and interpretations issued on or before November 30, 1989.

Interfund Transactions—The governmental fund's balance sheet reports all outstanding balances between funds, as "due to/from other funds." The government-wide financial statements report any residual balances outstanding between the governmental activities and business-type activities as "internal balances." Government-wide financial statements and the Statement of Fiduciary Net Assets report a "due to/from general fund" outstanding for pension contributions.

New Accounting Pronouncements— Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments,* will be effective for the Authority beginning with its year ending December 31, 2010. This Statement addresses the recognition, measurement, and disclosure of information regarding derivative instruments entered into by state and local governments.

Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions,* was issued to enhance the usefulness of fund balance information by providing clearer fund balance classifications and by clarifying the existing fund type definitions. This Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed on the use of the resources reported in governmental funds. The Authority is required to implement this Statement for the fiscal year ending December 31, 2011.

Subsequent Events: The Authority has evaluated subsequent events for potential recognition and/or disclosure through June 30, 2010, the date the financial statements were available to be issued.

3. BUDGETARY INFORMATION

Excess of Expenditures over Appropriations

For the year ended December 31, 2009, expenditures exceeded appropriations in the General Fund as follows:

Budget	Actual	Variance
$164,131,662	$174,110,753	$ (9,979,091)

4. CASH AND INVESTMENTS

Governmental and Joint Self Insurance Fund Investments

Cash and investments in the statement of net assets are externally restricted by bond covenants, restricted by the RTA through board action, or unrestricted when no restrictions as to their use apply.

Deposits and Investments—Section 2.20(a)(ii) of the RTA Act authorizes the RTA to invest any funds or monies not required for immediate use or disbursement. The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/0.01, et seq.

The RTA investment policy is in accordance with the Illinois statutes and allows the RTA to invest in:

- Certain obligations of the U.S. Government and its agencies.
- Interest-bearing certificates of deposit, interest-bearing time deposits or any other investments constituting direct obligations of any FDIC insured bank as defined by the Illinois Banking Act.
- Short-term obligations of corporations organized in the United States with assets exceeding $500 million and rated within the highest classification established by at least two standard rating services.
- Certain money market mutual funds.
- The Illinois Funds.
- Repurchase agreements.

Custodial Credit Risk — Custodial credit risk is the risk that in the event of a bank failure, the RTA's deposits may not be returned to it. The RTA's policy for custodial credit risk states collateral will be valued at market value (excluding accrued interest) on the trade date. Collateral required will be 100% of the investment or such greater percentage as may be appropriate based upon the financial stability of the institution and the term of the collateral (i.e., maturity), less any insurance provided by the Federal Deposit Insurance Corporation (FDIC).

Certificates of deposit with initial maturities greater than three months amounting to $7,750,000 are reported as investments in the Statement of Net Assets.

Investments

Interest Rate Risk — To mitigate losses caused by changing interest rates, the maturities of the RTA's investments is limited. Per the RTA's investment policy, investments in corporations are limited to maturities of 180 days or less. Other investment maturities can not exceed three years.

As of December 31, 2009, the RTA's investments were as follows:

Investment Type	Fair Value
Commercial paper	$ 47,564,583
Domestic corporate fixed-income securities	189,377,327
Illinois Funds	24,519,409
Money market fund	30,283,735
Short term money market securities	9,998,632
Total	$ 301,743,686

The weighted average maturity of the above investments is less than 90 days, for each investment type.

Credit Risk — The RTA's policy for credit risk states no investment shall be made in short-term obligations of corporations unless such obligations are rated at the time of purchase within the highest classification established by at least two standard rating services, the investment matures no later than 180 days from the date of purchase and the issuer is domiciled in the United States.

As of December 31, 2009, the RTA's investments were as follows:

Investment Type	Fair Value	Credit Rating Moody's	Credit Rating Standard & Poor's	Credit Rating Fitch
Commercial paper	$ 47,564,583	P-1	A-1	F-1
Domestic corporate fixed-income securities	189,377,327	AAA	AAAm	*
Illinois Funds	24,519,409	*	AAAm	*
Money market fund	30,283,735	Aaa	AAA	AAA
Short term money market investments	9,998,632	Aaa	AAA	AAA
Total	$ 301,743,686			

* Rating not available

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. Except for commercial paper, the RTA's investment policy does not specifically address a limitation of investments in a single issuer; instead the policy addresses credit risk using broad categories of investments. The RTA's policy states the maximum percentage of the portfolio invested in commercial paper should not exceed 33.3%, money market mutual funds should not exceed 20.0%, U.S. Government Agency obligations should not exceed 20.0%, The Illinois Funds should not exceed 20% and Repurchase Agreements should not exceed 50.0%.

The RTA has investments in the following issuers that exceed 5% of the total investments:

Joint Self-Insurance Fund Investment	Amount	% of Portfolio
Silver Tower U.S. Funding (Commercial Paper)	$ 2,998,281	24%
Paradigm Funding LLC (Commercial Paper)	2,496,107	20%
White Point Funding, Inc. (Commercial Paper)	998,649	8%

In the Governmental fund, there is no single investment that exceeds 5% of the total investments.

The RTA's investments in money market funds are for liquidity and offer an alternative to other investment vehicles. Management has reviewed the investments in the money market funds and has determined that the types of investments included in the money market funds are consistent with the RTA's investment policy. These funds consist of U.S. Treasury Securities and Agencies.

The Illinois Funds investment pool is managed by the Treasurer of the State of Illinois and is not registered with the SEC. The Illinois Funds maintains a $1 per share net asset value (NAV) at all times. The fair market of the investment pool is equal to the number of pool shares owned.

Interest Rate Swaps (General Fund)—The RTA, under board ordinances adopted in 2001 through 2006, has entered into interest rate swap agreements to modify the interest rate characteristics of its outstanding bonds. The agreements involve the exchange of variable and fixed-rate interest payments over the life of selected RTA bonds without an exchange of the underlying principal amount. The differential to be paid or received is accrued as interest rates change and is recognized as interest expense or interest income. The related amount payable to or receivable from the counterparty is included in other payables/ receivables.

On August 1, 2002, the RTA adopted an ordinance establishing an Interest Rate Risk Management Policy. The policy limits the amount of variable rate exposure to 20% of the total RTA bonds outstanding. The RTA clarified this policy on December 13, 2002 to include interest rate swap agreements with delayed starts, up-front cash settlements, interest rate caps and/or floors, hedging arrangements to lock in interest savings, options, or other alternatives (collectively referred to in the ordinance as "interest rate swap agreements").

The RTA has entered three fixed-to-floating swaps. These agreements have the net effect of changing the interest rate characteristics of a portion of RTA bonds from a fixed-rate to a variable-rate of interest equal to the Securities Industry and Financial Markets Association (formerly BMA) Swap Index. One such swap agreement was entered into on November 20, 2001. The swap has a notional amount of $97,115,000 (as of December 31, 2009) and matures on June 1, 2020. Two additional fixed-to-floating swaps were entered in June 2007. The 2007 swaps mature July 1, 2030 with a semi-annual call option beginning July 1, 2016. At year-end the aggregate notional value of the 2007 swaps was $253 million. For the year ended December 31, 2009, the three fixed-to-floating swaps produced a cash flow of $(13,705,975).

The RTA has one floating-to-fixed swap. This transaction was entered in 2005. The purpose was to lock-in historically low interest rates for the current refunding of the 1996 bonds.

During 2009, the RTA had three basis rate swaps in which the RTA assumed a different variable interest rate index than counterparties. The transactions are a hedge against higher interest rates. Anticipated revenues from the basis rate swaps during a period of rising rates will offset the anticipated decline in revenue from the fixed-to-floating swaps. Basis swaps do not change the notional amount of variable-rate exposure. As of December 31, 2009, the notional value of the three basis-rate swaps was $433.4 million. Cash flow produced during 2009 was ($363,871).

Board ordinances direct the RTA to use the net payments received under swap agreements in the following priority:

- Reimburse the RTA for transaction costs relating to the swap rather than use operating funds.
- Accumulate funds in an account as a reserve to secure counterparties. In this manner, the RTA would minimize the use of operating funds for payments or collateral due counterparties.
- Use the remaining amounts—the net proceeds from the transaction—for capital investment in the RTA system. This follows the principle of using proceeds from long-term transactions for long-term benefit. However, if operating funds are not adequate to meet senior debt obligations, funds currently dedicated for capital could be used.

The interest rate swaps have an estimated valuation of $4,677,816 as of December 31, 2009.

Pension Fund Investments

Cash and investments in the Pension Fund provide sufficient funds to meet the obligations promised to the current and future beneficiaries of RTA's defined benefit pension plan.

Risk Posture - The RTA evaluated the assets and liabilities of the Pension Plan in order to determine an asset allocation that provides a high likelihood of achieving the responsibilities noted above. The obligations of current and future beneficiaries were evaluated under various market scenarios to develop an allocation that can be expected to generate a solid rate of return without incurring undue risk. In

general, the risk posture of the Pension Plan is such that the portfolio is structured to maintain funding requirements and modestly grow assets through a low to moderate level of risk.

Custodial Credit Risk – Custodial credit risk is the risk that in the event of a bank failure, the RTA's pension deposits may not be returned to it. The RTA's Pension Plan policy does not explicitly indicate custodial credit risk. As of December 31, 2009, none of the Plan's cash and investments was at risk.

Interest Rate Risk — Per the RTA's Pension Plan investment policy, the duration of the fixed income portfolio should be within 20% of the duration of the benchmark index.

As of December 31, 2009, the RTA's pension investments were as follows:

Investment Type	Fair Value	Weighted Average Maturity (Months)
Corporate fixed income mutual fund	$ 37,832,156	81
Money market fund	3,063,300	1
Total fair value	$ 40,895,456	
Portfolio weighted average maturity		75

Credit Risk — The RTA's pension policy for credit risk states at least 85% of the fixed income investments should be limited to securities with ratings of at least investment grade as defined by both Moody's and Standard & Poor's. Split rated bonds are to be governed by the lower rating. Unrated securities of the U.S. Treasury and government agencies are a permissible investment. No more than 15% of the portfolio may be invested in investment-grade securities of foreign entities domiciled in countries included in the Salomon Brothers World Government Bond Index.

As of December 31, 2009, the credit ratings for RTA pension investments were as follows:

		Credit Rating (where available)		
Investment Type	Total Fair Value	Moody's	Standard & Poor's	Fitch
Corporate fixed income mutual fund	$ 37,832,156	Aa	Aa	*
Money market fund	3,063,300	Aa2	*	AA
Total	$ 40,895,456			

* Not available

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The RTA's pension investment policy states that fixed income securities of a single issuer (excluding obligations of the United States Government and its agencies) should be limited to 5% of the fixed income portfolio, measured at market value. The RTA's pension policy states the asset allocation policy has been developed based on the objectives and characteristics of the pension liabilities, capital market expectations, and asset-liability projections. This policy is long-term oriented and consistent with the risk posture. The pension fund did not have any investments in a single issuer which were greater than 5% of the total plan's net assets.

5. INTERGOVERNMENTAL RECEIVABLES AND PAYABLES

The intergovernmental receivables and payables in the statement of net assets comprise the following:

Receivable	**Amount**
General Fund:	
Sales taxes	$ 26,026,465
Interest on sales taxes	34,668
State assistance (ASA & AFA)	100,988,968
PTF	85,167,833
ADA	3,000,000
Illinois Department of Transportation (IDOT) grants and others	2,059,590
Total Intergovernmental Receivables	$ 217,277,524

Payable	
General Fund:	
Financial assistance	$ 75,488,193
Capital grants	2,011,555
CTA Operating Assistance (ADA)	2,663,684
Total General Fund	80,163,432
Capital Projects Fund:	
Capital grants, (CTA, METRA, PACE)	7,477,181
Total Intergovernmental Payables	$ 87,640,613

6. DUE TO/FROM OTHER FUNDS

Various transactions result in "due to/from other funds" balances. In most cases, the General Fund advances payments on behalf of other funds.

Due to/from balances between the Debt Service Fund and the Capital Projects Fund represent interest earned in the Capital Projects Fund which is transferred to the Debt Service Fund for payment of long-term debt. The General Fund also makes monthly transfers to the Debt Service Fund and occasionally makes transfers to the Joint Self-Insurance Fund. The General Fund owes the Pension Trust Fund for its share of contributions during the period. Cash receipts and payments on behalf of the Sales Tax Agency Fund originate in the General Fund.

On December 31, 2009, the amounts due to/from other funds presented in the Governmental Funds Balance Sheet, the Joint Self-Insurance Fund Statement of Net Assets, and the Fiduciary Funds Statement of Fiduciary Net Assets are as follows:

Receivable Fund	Payable Fund	Amount
General	Joint Self-Insurance	$ 19,285
Joint Self-Insurance	General	3,574,621
Pension Trust	General	1,137,400
Debt Service	General	80,057,596

7. INTERFUND TRANSFERS

Various transactions result in "transfer in/out" balances from funds. Transfer in/out balances presented on the Governmental Fund's Statement of Revenues, Expenditures and Changes in Fund Balances and the Business Type Activities Fund's Statement of Revenues, Expenses and Changes in Net Assets are as follows:

Transfer Out Fund	Transfer In Fund	Amount
General	Debt Service	$ 195,260,981
General	Joint Self-Insurance	3,574,621

The purpose of Interfund transfers from the General Fund to Debt Service is to satisfy the RTA's obligations to bondholders for principal and interest. The purpose of the Interfund transfer from the General Fund to the Joint Self-Insurance Fund is to make a capital contribution to the fund to purchase insurance.

8. ADVANCES TO SERVICE BOARDS

The Illinois Department of Revenue ("IDOR") sends a "13th month" sales tax advance to compensate for the delayed processing of sales tax payments to the RTA. Each year, IDOR calculates the amount and the RTA verifies that calculation. The allocations to the Service Boards are set forth below:

CTA	$ 30,582,743
Metra	26,837,594
Pace	8,466,595
Total Service Board Advances	$ 65,886,931

Sales tax advances have also been reported as current liabilities in the Agency Sales Tax Fund.

9. CAPITAL ASSETS

The following is a summary of changes in capital assets during the fiscal year:

	Balance at January 1, 2009	Additions	Retirements	Balance at December 31, 2009
Depreciable:				
Office furniture and equipment	$ 313,020	$ -	$ -	$ 313,020
Computer equipment	2,220,036	1,100,134	-	3,320,170
Leasehold improvements	1,428,735	10,009	-	1,438,744
Subtotal	3,961,791	1,110,143	-	5,071,934
Less accumulated depreciation:				
Office furniture and equipment	238,114	28,628	-	266,741
Computer equipment	1,787,154	368,993	-	2,156,147
Leasehold improvements	534,154	113,074	-	647,228
Subtotal	2,559,421	510,694	-	3,070,116
Total Depreciable	1,402,370	599,449	-	2,001,818
Non-depreciable:				
Capital -Technology Program	9,715,442	942,619	-	10,658,061
Total Capital assets—net of accumulated depreciation	$11,117,811	$ 1,542,068	$ -	$ 12,659,879

All capital assets are associated with governmental activities.

During 2009, total depreciation expense of $510,694 was allocated between two functions; $46,232 to regional expenditures and $464,462 to administrative expenditures.

10. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	January 1, 2009	New Issues	Current Retirements	December 31, 2009	Due Within 1 Year
1990A	$ 60,795,000	$ -	$ -	$ 60,795,000	$ 3,810,000
1991A	55,745,000	-	-	55,745,000	-
1992A* & 1992B	33,345,000	-	7,480,000	25,865,000	-
1994A* & 1994B	24,395,000	-	-	24,395,000	-
1994C* & 1994D	57,785,000	-	1,500,000	56,285,000	1,620,000
1997 Refunding	65,955,000	-	5,155,000	60,800,000	5,445,000
1999* Refunding	274,445,000	-	7,670,000	266,775,000	8,065,000
2000A*	230,065,000	-	5,275,000	224,790,000	5,575,000
2001A*	88,630,000	-	1,980,000	86,650,000	2,090,000
2001B Refunding*	29,800,000	-	-	29,800,000	-
2002A*	144,925,000	-	2,985,000	141,940,000	3,150,000
2002B	144,085,000	-	10,450,000	133,635,000	10,870,000
2003A*	242,420,000	-	4,790,000	237,630,000	5,045,000
2003B	139,990,000	-	2,810,000	137,180,000	2,955,000
2003C Refunding	3,565,000	-	3,565,000	-	-
2004A*	246,410,000	-	4,635,000	241,775,000	4,870,000
2005B Refunding	139,305,000	-	6,535,000	132,770,000	6,850,000
2006A*	245,915,000	-	3,625,000	242,290,000	3,780,000
2009B Cash Notes	-	260,000,000	-	260,000,000	-
Total	$2,227,575,000	$ 260,000,000	$ 68,455,000	$ 2,419,120,000	$ 64,125,000

* Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2009, the total general obligation bonds payable of $2,419,120,000 are classified as current and long-term in the Statement of Net Assets in the amounts of $64,125,000 and $2,354,995,000, respectively.

Advance Refundings—On June 21, 1993, the RTA advance refunded a portion of its 1990A Series general obligation bond issue. The RTA issued $23,265,000 of general obligation refunding bonds (1993C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $20,350,000 of outstanding general obligation bonds (1990A Series) is considered defeased, and therefore, has been removed from the financial statements.

On January 19, 1996, the RTA advance refunded a portion of its 1994B and 1994D Series general obligation bond issues. The RTA issued $151,235,000 of general obligation refunding bonds (1996 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $60,300,000 of outstanding general obligation bonds (1994B Series) and $75,605,000 of outstanding general obligation bonds (1994D Series) are considered defeased, and therefore, have been removed from the financial statements.

On September 18, 1997, the RTA advance refunded a portion of its 1990A, 1991A, 1992B, and 1993B Series general obligation bond issues. The RTA issued $98,385,000 of general obligation refunding bonds (1997 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $4,230,000 of outstanding general obligation bonds (1990A Series), $29,265,000 of outstanding general obligation bonds (1991A Series), $18,170,000 of outstanding general obligation bonds (1992B Series), and $47,465,000 of outstanding general obligation bonds (1993B Series) are considered defeased, and therefore, have been removed from the financial statements.

On August 24, 1999, the RTA advance refunded a portion of its 1992A, 1993A, 1994A, and 1994C Series general obligation bond issues. The RTA issued $298,725,000 of general obligation refunding bonds (1999 Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $113,895,000 of outstanding general obligation bonds (1992A Series), $9,720,000 of outstanding general obligation bonds (1993A), $142,615,000 of outstanding general obligation bonds (1994A) and $21,955,000 of outstanding general obligation bonds (1994C) are considered defeased, and therefore, have been removed from the financial statements.

On March 1, 2001, the RTA advance refunded a portion of its 1993A Series general obligation bond issues. The RTA issued $37,715,000 of general obligation refunding bonds (2001B Series). Proceeds from the issuance amounted to $40,437,798 which includes a premium of $2,554,206. The proceeds are to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $37,750,000 of outstanding general obligation bonds (1993A) is considered defeased, and therefore, has been removed from the financial statements.

On May 1, 2003, the RTA advance refunded a portion of its 1993C Series general obligation bond issues. The RTA issued $19,055,000 of general obligation refunding bonds (2003C Series) to provide resources to fund an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. At December 31, 2009, $19,150,000 of outstanding general obligation bonds (1993C) is considered defeased, and therefore, has been removed from the financial statements.

On May 2, 2005, the RTA issued $148 million in General Obligation bonds with a variable rate which resets weekly to refund $144 million of outstanding 1996A Series bonds with an average interest rate of 5.5 percent. The net proceeds of $147 million (after payment of $892 thousand for issuance costs) were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust with an escrow agent to call the 1996A Series bonds June 1, 2005. As a result, the 1996A Series bonds are considered to be defeased and the liability for those bonds has been removed from the financial statements.

Debt Service Requirements—The "debt service requirements" set forth in the following tables represent payments due the trustee from the RTA, as required by the respective bond agreements. The "principal" columns represent principal payments due bondholders from the trustee.

1990 General Obligation Bonds—In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

The Series 1990A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 6.00% to 7.15% on November 1, 1990 and semiannually thereafter on May 1 and November 1 in each remaining year.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 3,810,000	$ 4,377,240	$ 8,187,240
2011	4,085,000	4,102,920	8,187,920
2012	4,380,000	3,808,800	8,188,800
2013	4,695,000	3,493,440	8,188,440
2014	5,035,000	3,155,400	8,190,400
2015-2019	31,150,000	9,789,840	40,939,840
2020	7,640,000	550,080	8,190,080
Total	$ 60,795,000	$ 29,277,720	$ 90,072,720

1991 General Obligation Bonds—In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

The Series 1991A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 4.85% to 6.55% on May 1, 1992 and semiannually thereafter on November 1 and May 1 in each remaining year.

Debt service requirements on the 1991A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ -	$ 3,734,915	$ 3,734,915
2011	-	3,734,914	3,734,914
2012	4,090,000	3,734,915	7,824,915
2013	4,365,000	3,460,885	7,825,885
2014	4,660,000	3,168,430	7,828,430
2015-2019	28,420,000	10,719,665	39,139,665
2020-2021	14,210,000	1,443,515	15,653,515
Total	$ 55,745,000	$ 29,997,239	$ 85,742,239

1992 General Obligation Bonds—In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1992A and 1992B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 5.30% to 9.00% on December 1, 1992 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1992A and 1992B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ -	$ 1,396,960	$ 1,396,960
2011	-	863,040	863,040
2012	25,865,000	293,760	26,158,760
Total	$ 25,865,000	$ 2,553,760	$ 28,418,760

1994 General Obligation Bonds—In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00% on December 1, 1994 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ -	$ 1,951,600	$ 1,951,600
2011	-	1,951,601	1,951,601
2012	-	1,951,600	1,951,600
2013	-	1,951,600	1,951,600
2014	-	1,951,600	1,951,600
2015-2017	24,395,000	3,940,999	28,335,999
Total	$ 24,395,000	$ 13,699,000	$ 38,094,000

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 1,620,000	$ 4,299,312	$ 5,919,312
2011	1,750,000	4,168,725	5,918,725
2012	1,890,000	4,027,675	5,917,675
2013	2,045,000	3,875,194	5,920,194
2014	2,210,000	3,710,313	5,920,313
2015-2019	43,250,000	10,262,937	53,512,937
2020-2024	3,520,000	136,401	3,656,401
Total	$ 56,285,000	$ 30,480,557	$ 86,765,557

1997 General Obligation Refunding Bonds—In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001-2002, in the aggregate amount of $4 million, Series 1991A Bonds, maturing November 1 in the years 2002-2006, 2008 and 2011, in the aggregate amount of $29 million, Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million and Series 1993B Bonds, maturing June 1 in the years 2004-2009, 2013 and 2023, in the aggregate amount of $47 million.

The Series 1997 Refunding Bonds mature on June 1 over a twenty-six-year period and interest is payable at rates ranging from 4.00% to 6.00% on December 1, 1997 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1997 Refunding bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 5,445,000	$ 3,432,963	$ 8,877,963
2011	5,750,000	3,125,100	8,875,100
2012	1,865,000	2,915,688	4,780,688
2013	3,320,000	2,764,800	6,084,800
2014	3,530,000	2,559,300	6,089,300
2015-2019	21,210,000	9,237,600	30,447,600
2020-2023	19,680,000	2,235,900	21,915,900
Total	$ 60,800,000	$ 26,271,351	$ 87,071,351

1999 General Obligation Refunding Bonds—In August 1999, the RTA issued $299 million in General Obligation Bonds, Series 1999, to provide funds to refund in advance of maturity the RTA's outstanding

Series 1992A Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $114 million, Series 1993A Bonds, maturing June 1 in the years 2009 and 2013, in the aggregate amount of $10 million, Series 1994A Bonds, maturing June 1 in the years 2006-2009, 2012, 2015 and 2024, in the aggregate amount of $143 million and Series 1994C Bonds, maturing June 1 in the year 2025, in the aggregate amount of $22 million.

The Series 1999 Refunding Bonds mature on June 1 over a twenty-five-year period and interest is payable at rates ranging from 5.00% to 6.00% on December 1, 1999 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1999 Refunding Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 8,065,000	$ 15,163,144	$ 23,228,144
2011	8,525,000	14,686,182	23,211,182
2012	9,025,000	14,181,619	23,206,619
2013	17,990,000	13,404,938	31,394,938
2014	16,735,000	12,406,594	29,141,594
2015-2019	83,240,000	48,859,576	132,099,576
2020-2024	118,975,000	17,177,193	136,152,193
2025	4,220,000	126,600	4,346,600
Total	$ 266,775,000	$ 136,005,846	$ 402,780,846

2000 General Obligation Bonds—In June 2000, the RTA issued $260 million in General Obligation Bonds, Series 2000A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

Debt service requirements on the Series 2000A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 5,575,000	$ 14,276,038	$ 19,851,038
2011	5,900,000	13,955,475	19,855,475
2012	6,245,000	13,601,475	19,846,475
2013	6,610,000	13,211,163	19,821,163
2014	7,005,000	12,798,038	19,803,038
2015-2019	41,905,000	56,872,376	98,777,376
2020-2024	56,560,000	42,063,939	98,623,939
2025-2029	76,650,000	21,514,025	98,164,025
2030	18,340,000	1,192,100	19,532,100
Total	$ 224,790,000	$ 189,484,629	$ 414,274,629

2001 General Obligation Bonds—In April 2001, the RTA issued $100 million in General Obligation Bonds, Series 2001A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2001A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.0% to 6.0% in January 2001 and semiannually thereafter on July 1 and January 1 in each remaining year.

Debt service requirements on the Series 2001A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 2,090,000	$ 5,132,513	$ 7,222,513
2011	2,200,000	5,017,563	7,217,563
2012	2,325,000	4,896,563	7,221,563
2013	2,455,000	4,751,250	7,206,250
2014	2,595,000	4,597,813	7,192,813
2015-2019	15,340,000	20,427,175	35,767,175
2020-2024	20,195,000	15,546,850	35,741,850
2025-2029	26,590,000	8,819,400	35,409,400
2030-2031	12,860,000	1,167,900	14,027,900
Total	$ 86,650,000	$ 70,357,027	$ 157,007,027

In March 2001, the RTA issued $38 million in General Obligation Bonds, Series 2001B, to provide funds to refund in advance of maturity the RTA's outstanding series 1993A Bonds, maturing June 1 in the years 2004-2008, in the aggregate amount of $38 million.

The Series 2001B Refunding Bonds mature on June 1 over a twenty-three year period and interest is payable at rates ranging from 4.00% to 5.50% on June 1, 2001 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2001B Refunding Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ -	$ 1,639,000	$ 1,639,000
2011	-	1,639,000	1,639,000
2012	-	1,639,000	1,639,000
2013	-	1,639,000	1,639,000
2014	2,295,000	1,575,888	3,870,888
2015-2019	13,585,000	5,778,714	19,363,714
2020-2023	13,920,000	1,584,276	15,504,276
Total	$ 29,800,000	$ 15,494,878	$ 45,294,878

2002 General Obligation Bonds—In March 2002, the RTA issued $160 million in General Obligation Bonds, Series 2002A, to pay the costs of construction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 2002A Bonds mature on July 1 over a thirty-year period and interest is payable at rates ranging from 5.0% to 6.0% on July 1, 2002 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2002A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 3,150,000	$ 8,407,938	$ 11,557,938
2011	3,315,000	8,250,438	11,565,438
2012	3,495,000	8,068,113	11,563,113
2013	3,690,000	7,867,150	11,557,150
2014	3,900,000	7,654,975	11,554,975
2015-2019	23,070,000	34,635,050	57,705,050
2020-2024	30,535,000	26,937,900	57,472,900
2025-2029	40,450,000	16,654,200	57,104,200
2030-2032	30,335,000	3,708,300	34,043,300
Total	$ 141,940,000	$ 122,184,064	$ 264,124,064

In June 2002, the RTA issued $200 million in General Obligation Bonds, Series 2002B, to provide interim funding, as needed for a portion of the costs in connection with the reconstruction and expansion of rapid transit facilities operated by the CTA and to fund other public transportation projects.

The Series 2002B Bonds mature on June 1 over a seventeen year period and interest is payable at rates ranging from 3.00% to 5.50% on December 1, 2002, and semi-annually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2002B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 10,870,000	$ 6,941,888	$ 17,811,888

2015-2019	21,190,000	31,078,002	52,268,002
2020-2024	27,545,000	24,413,239	51,958,239
2025-2029	35,820,000	15,710,520	51,530,520
2030-2033	36,255,000	4,306,320	40,561,320
Total	$ 137,180,000	$ 111,632,144	$ 248,812,144

2004 General Obligation Bonds—In October 2004, the RTA issued $260 million in General Obligation Bonds, Series 2004A, to pay the costs of construction, acquisition, repair, and replacement of certain public transportation facilities for the Service Boards.

The Series 2004A Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.0% to 5.75% on June 1, 2005 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 2004A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 4,870,000	$ 13,287,538	$ 18,157,538
2011	5,120,000	13,037,788	18,157,788
2012	5,385,000	12,775,163	18,160,163
2013	5,660,000	12,499,038	18,159,038
2014	5,950,000	12,208,788	18,158,788
2015-2019	34,730,000	55,523,207	90,253,207
2020-2024	45,120,000	44,515,863	89,635,863
2025-2029	58,660,000	30,575,413	89,235,413
2030-2034	76,280,000	11,425,825	87,705,825
Total	$ 241,775,000	$ 205,848,623	$ 447,623,623

2005 General Obligation Bonds— In May 2005, the RTA issued $148 million in General Obligation Bonds, Series 2005B, to provide funds to refund in advance of maturity the RTA's outstanding Series 1996A Bonds, maturing June 1 in the years 2005-2025, in the aggregate amount of $147 million.

The Series 2005B Bonds mature on June 1 over a twenty year period and interest is payable at variable rates which reset weekly based on current market rates.

Debt service requirements on the Series 2005B Refunding Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest*	Total
2010	$ 6,850,000	$ 4,268,385	$ 11,118,385
2011	7,210,000	4,036,395	11,246,395
2012	7,590,000	3,792,195	11,382,195
2013	7,960,000	3,535,620	11,495,620
2014	8,425,000	3,265,268	11,690,268
2015-2019	15,005,000	14,595,984	29,600,984
2020-2024	69,625,000	7,644,864	77,269,864
2025	10,105,000	166,733	10,271,733
Total	$ 132,770,000	$ 41,305,444	$ 174,075,444

** Interest was calculated using a rate of 3.3%.*

2006 General Obligation Bonds—In October 2006, the RTA issued $250 million in General Obligation Bonds, Series 2006A, to finance a portion of the costs incurred in connection with the construction, acquisition, repair and replacement of certain public transportation facilities.

The Series 2006A Bonds mature on July 1, over a thirty year period and interest is payable at rates ranging from 4.25% to 5.00% on January 1, 2007 and semiannually thereafter on January 1 and July 1 in each remaining year.

Debt service requirements on the Series 2006A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ 3,780,000	$ 11,860,031	$ 15,640,031
2011	3,955,000	11,671,031	15,626,031
2012	4,150,000	11,473,281	15,623,281
2013	4,390,000	11,265,781	15,655,781
2014	4,630,000	11,046,281	15,676,281
2015-2019	28,135,000	51,427,156	79,562,156
2020-2024	56,335,000	42,668,156	99,003,156
2025-2029	92,705,000	23,054,406	115,759,406
2030-2034	31,665,000	9,001,525	40,666,525
2035	12,545,000	564,525	13,109,525
Total	$ 242,290,000	$ 184,032,175	$ 426,322,175

2009 Working Cash Notes—In June 2009, the RTA issued $260 million in General Obligation Working Cash Notes, Series 2009B, to provide funds to be used to manage the cash flow needs of the RTA and the Service Boards, including if necessary, the refinancing of any existing Authority obligations for such purpose and pay the costs of issuance.

The Series 2009B Working Cash Notes mature on April 1, 2011 and June 1, 2011 and interest is payable at 2.879% and 2.979%, respectively.

Debt service requirements on the Series 2009B Working Cash Notes to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2010	$ -	$ 7,615,400	$ 7,615,400
2011	260,000,000	3,183,917	263,183,917
Total	$ 260,000,000	$ 10,799,317	$ 270,799,317

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $200,411,612 in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2009.

11. OTHER LONG-TERM OBLIGATIONS

Changes in other long-term obligations for the year ended December 31, 2009 were as follows:

	Balance January 1, 2009	Additions	Deletions	Balance December 31, 2009	Due Within One Year
Deferred rent	$ 2,706,000	$ 84,000	$ -	$ 2,160,000	$ -
Accrued interest payable	33,919,000	33,404,000	33,919,000	33,404,000	-
Unearned revenue	48,761,000	1,614,000	1,701,000	48,674,000	1,701,000
Unamortized bond premium	125,204,000	-	5,702,000	119,502,000	5,702,000

The long-term liabilities will be paid by the General Fund.

The RTA had a working cash note agreement with a limit of $80 million to provide cash flow needs. Draws under the agreement bear short-term interest at a variable rate benchmarked to one-month LIBOR. The agreement expired August 2009. The outstanding balance at December 31, 2008 was $56 million. In January 2009, the RTA borrowed $24 million under the terms of the working cash note agreement. In June 2009, the RTA paid the entire $80 million outstanding balance. The outstanding balance at December 31, 2009 was $0.

12. PENSION

Plan Description—Effective July 1, 1976, the RTA participates, along with Metra and Pace, in a cost-sharing multi-employer noncontributory defined benefit pension plan, the Regional Transportation Authority Pension Plan ("Plan"), covering substantially all employees not otherwise covered by a union pension plan. The responsibilities for establishing, administering, and amending the Plan are divided among a Board of Trustees, a Retirement Committee, a Plan Administrator, and the RTA Board of Directors ("Plan Administrators").

The Plan is classified as a "governmental plan" and is, therefore, generally exempt from the provisions of the Employee Retirement Income Security Act of 1974. The Internal Revenue Service has issued a letter of determination dated September 30, 1988 stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code ("Code") and is, therefore, exempt from Federal income taxes under the provisions of Section 501(a) of the Code. The Plan operates on a calendar fiscal year.

Pension Benefits—Participants are entitled to annual pension benefits upon normal retirement at age 65. Such benefits are generally based on a percentage of the average annual compensation in the highest three years of service, whether consecutive or not, multiplied by the number of years of credited service.

The Plan provides that, upon retirement, benefits payable will be reduced by a defined percentage of pension benefits payable to participants who received credit for prior service with an eligible employer. Because information with respect to these benefits is not readily available until retirement, the information included in the accumulated plan benefits and changes in accumulated plan benefits with respect to active and terminated participants does not reflect a reduction of these benefits.

The Plan permits early retirement at age 55 after completing ten years of credited service with reduced benefits. As a result of the August 1, 1999 amendment to the Plan, participants may receive their full vested benefits if they are at least 55 years of age and their combined age and credited years of service equals 85 or higher.

The Plan provides for benefit payments to beneficiaries equal to or reduced from the participant's monthly benefit payment subject to the election of the participant.

Disability Benefits—An employee is eligible for a disability pension if he or she becomes disabled after the completion of ten years of credited service, and is no longer receiving long-term disability benefits under a separate RTA benefit plan, or after reaching age 65, whichever is later.

Contributions and Vesting—The Plan is funded solely by employer contributions, which are actuarially determined under the projected unit credit method. During 2009, the RTA Board approved a resolution that a contribution of $10,827,000 be made to the Plan. The contribution is allocated as follows: Metra - $5,652,000; Pace - $ 4,038,000; RTA - $1,137,000. As of December 31, 2009, $10,827,000 had not been funded and was reported as contribution receivable in the Statements of Plan Net Assets. The 2009 contribution levels were within the actuarially determined ranges for the respective years.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to determine the actuarial accrued liability presented in the note to the Required Supplementary Information.

Participating employees do not contribute to the Plan. If participants terminate continuous service before rendering five years (ten years prior to January 1, 1987) of credited service, they forfeit the right to receive the portion of their accumulated benefits attributable to employer contributions. All forfeitures are applied to reduce the amount of contributions otherwise payable by the employer.

The complete Plan financial report, including all required disclosures can be obtained from the Plan Administrators at the following address:

Regional Transportation Authority Pension Plan
175 West Jackson Boulevard, Suite 1550
Chicago, IL 60604

Funding Policy—Prior to July 1, 1979, contributions were made on the basis of non-actuarial estimates. The Plan's initial actuarial study found that those estimates were in excess of actuarial requirements. As a result, pension expense is being reduced by amortization of the excess over 30 years.

The RTA, Metra, and Pace are required to contribute the amounts necessary to fund the benefits of their respective employees in the Plan using the projected unit credit actuarial method. Employer contribution and the income it earns through investments are used to operate the Plan and to pay benefits. Assets are valued recognizing a portion of both realized and unrealized gains and losses in order to avoid wide swings in actuarially determined funding requirements from year to year.

Related-Party Transactions—There were no securities of the RTA, Metra, Pace or related parties included in the Plan's assets.

Annual Pension Cost and Net Pension Obligation—For 2007, 2008 and 2009, the RTA's annual pension costs equal the required contributions which were, $ 9,137,000, $9,195,000 and $10,827,000, respectively. The required contributions were determined as part of the January 1, 2007, 2008 and 2009 actuarial valuations.

In accordance with the GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, the RTA determined its net pension obligation at transition (January 1, 1997). There was no net pension obligation for the Plan at transition or at year-end.

Significant Actuarial Assumptions—The information presented in the notes and the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest valuation follows:

	January 1, 2009	January 1, 2008	January 1, 2007
Actuarial cost method	Projected unit credit	Projected unit credit	Projected unit credit
Amortization method	Straight-line, open	Straight-line, open	Straight-line, open
Remaining amortization period	30 years	30 years	30 years
Asset valuation method	Smoothed market value	Smoothed market value	Smoothed market value
Actuarial assumptions:			
Investment rate of return	8.5%	8.5%	8.5%
Projected salary increases:			
Attributed to inflation	*	*	4.0%
Attributed to seniority/merit	*	*	0.5%
Age graded scale	Range of 3.5% to 7.5% based on attained age.	Range of 3.5% to 7.5% based on attained age.	
Mortality	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.
Withdrawals from service	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47 % at age 20 to 0.39% at age 60 for males.	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47% at age 20 to 0.39% at age 60 for males.	Termination rates range from 9.94% at age 20 to 0.15% at age 60 for females, and from 7.94 % at age 20 to 0.09% at age 60 for males.

* The actuarial assumption changed from a flat rate to rates based on an age scale.

Funded Status and Funding Progress – As of December 31, 2009, the most recent actuarial valuation date, the plan was 69.17 percent funded. The actuarial accrued liability for benefits was $153,284,576 and the actuarial value of assets was $106,021,198, resulting in an underfunded actuarial accrued liability (UAAL) of $(47,263,378). The covered payroll (annual payroll of active employees covered by the Plan) was $66,010,613 and the ratio of the UAAL to the covered payroll was 71.60 percent.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

13. OTHER POSTEMPLOYMENT BENEFITS

In accordance with personnel practices, the RTA offers eligible retirees the option to continue participation in its group health insurance plan. Eligibility is in accordance with the qualifying factors of the RTA Pension Plan and Trust as follows: Retired employees who have attained age 55 with 10 years of continuous full-time employment are eligible to continue the Health Plan for themselves and their dependents (providing their dependents were covered immediately prior to their retirement). Retired employees who have attained age 65 or older with 10 years of continuous full-time employment are eligible for the Medicare Supplement Plan.

Retiree dependents are eligible for either the Health Plan or Medicare Supplement Plan, depending on their age (providing they were covered as dependents immediately prior to the employee's retirement).

Election to participate is voluntary with the RTA incurring no additional obligations, except that the RTA will pay each eligible retiree the sum of up to $78 per month toward the cost of his/her health insurance. The costs of retiree health care benefits are generally recognized as expenses as they are paid and are not material in amount at the present time.

For 2009, the RTA incurred $19,032 in other post employment benefit expenditures. There are 22 participants eligible to receive benefits as of December 31, 2009.

14. RISK MANAGEMENT

The RTA is exposed to various risks including, but not limited to, losses from workers' compensation, employee health insurance, and general liability/property. Commercial insurance coverage is procured to limit the RTA's exposure to such losses.

The Workers' Compensation and Employers' Liability Insurance Policy is procured through RTA's insurance policy with The Hartford. The RTA is insured for $500,000 each accident for bodily injury by accident, $500,000 each employee for bodily injury by disease and $500,000 policy limit. The RTA property is insured through Pace's Property Insurance with Mesirow Insurance Services, Inc. The RTA's portion of insurance premiums is paid to Pace, and is accounted for in the General Fund. The RTA had no settlements in excess of insurance coverage in the past three years. There have been no significant reductions in the amount of coverage from the prior year.

In addition, the RTA is a participant in RTA's Joint Self-Insurance Fund. The Fund was created as required by Article Two of the Loss Financing Plan (Plan) of the RTA and the three Service Boards. The Plan is intended primarily to serve as a mechanism for funding catastrophic losses and, by capitalizing the Fund in advance of such losses, to smooth their impact over time. The Fund is essentially a self-insurance program that provides a means for financing losses that are normally insured, and is included in the RTA's reporting entity as a proprietary fund type (enterprise fund). The Plan is administered by the RTA, CTA, Metra, and Pace (Participating Entities) utilizing a Fund Manager appointed by the RTA and three Fund Advisors, one appointed by each of the Service Boards.

Each participating entity (RTA, CTA, Metra, and Pace) is only responsible to repay the Fund for submitted claims paid by the Fund. The Fund acts exclusively as a claims-service, and financing mechanism, not an insurer, with respect to claims presented.

The limit of liability to the Fund is established at $50 million less the retained limit (deductible portion) as described below:

General Liability—The categories of general liability that are covered, with certain defined exclusions, by the joint agreement are:

- Personal injury
- Property damage
- Advertising injury
- Evacuation, evacuation expenses and loss of use

The retained limit (deductible portion) for each Participating Entity is:

CTA	$ 2,500,000
Metra	2,500,000
Pace	250,000
RTA	100,000

Officer and Employee Liability—All directors, officers or employees of each Participating Entity are covered, with certain defined exclusions, by the Plan. The retained limits are $100,000 for each covered person. If a loss is covered under both types of liability, then the retained limit for general liability will apply.

15. COMMITMENTS AND CONTINGENCIES

The RTA has an operating lease agreement for its office facilities. In 2009, the total rent paid by the RTA was $1,460,684. Minimum required annual rental payments by the RTA are as follows:

Year Ending December 31	Amount
2010	$ 1,739,740
2011	1,822,918
2012	1,906,161
2013	1,989,448
2014	2,072,800
2015-2017	6,190,540
Total	$ 15,721,607

16. SUBSEQUENT EVENTS

On January 21, 2010, the RTA issued $175.1 million of Non-SCIP bonds.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
YEAR ENDED DECEMBER 31, 2009

BUDGET AND BUDGETARY ACCOUNTING

The budgetary basis of the general fund's budget and actual presentation is included as required supplementary information. For comparison of the combined budgets as required for board presentation, the combined schedule of revenues, expenditures, and changes in fund balance—budget and actual—general and the sales tax agency funds are presented in the combining and individual fund schedules section of the CAFR. Additional budget detail is used by management for monitoring purposes which is provided in this section as the schedule of expenditures—budget and actual—general fund.

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the general fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States except for RTA capital expenditures and capital grants to Service Boards. The RTA capital expenditures and capital grants to Service Boards are budgeted on a project basis, which normally exceeds one year, and debt service payments, which are budgeted as transfers from the general fund. Budgets for RTA capital expenditures and capital grants to Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax agency fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end. There were several amendments to the 2009 budget. The 2009 budget (Ordinance 2008-83) was last revised on May 20, 2010 (Ordinance 2010-42). This ordinance amended the 2009 budget for ADA Paratransit service.

Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations/expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is generally the policy of the RTA (ordinance 91-9) to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. However, unfavorable economic conditions created the need to waive, for purposes of the adoption of the 2009 budget and 2010-2011 financial plan, the provision of the RTA funding policy adopted by Ordinance 98-15 that requires that the RTA annual budget and two-year financial plan show a year-end unreserved and undesignated fund balance equal to 5% of the RTA general fund by no later than the end of the three-year planning period. This waiver removed the ability of the RTA to fund the operating budgets of the Service Boards at the levels established in the operating budget marks. The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from 85% sales tax receipts;

- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and

- The third source of funds credited against the budgeted funding amount is from RTA 15% sales tax receipts and other discretionary receipts.

The reimbursement of Service Boards' capital expenditures and the payment of PTF funds, 15% funds and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

RECONCILIATION OF BUDGETARY BASIS TO GAAP BASIS ACCOUNTING

The accompanying schedule of revenues, expenditures, and changes in fund balance, budget and actual-general fund (this section), and combining schedule of revenues, expenditures and changes in fund balance-budget and actual-general and agency funds (in combining and individual fund schedules section) present comparisons of the legally adopted budget with actual data on a budgetary basis.

Since accounting principles applied for purposes of developing data on a budgetary basis differ with accounting principles generally accepted in the United States of America, a reconciliation of timing differences in the excess of revenues over expenditures and other financing uses is presented below:

	General Fund
Excess of expenditures over revenues and other financing use-budgetary basis	$ 72,161,834
Adjustments:	
Capital grant expenditures incurred in current year but considered in prior years' budgets	(4,506,113)
Capital grant expenditures expected to be incurred in future years but considered in current year budget	5,894,230
RTA capital expenditures expected to be incurred in future years but considered in current year operating budget	767,357
Budgetary basis to GAAP basis adjustments	2,155,474
Net change in fund balance - GAAP basis	$ 74,317,308

COMBINING AND INDIVIDUAL FUND SCHEDULES

A. GENERAL FUND

The general fund is used to account for resources traditionally associated with the RTA which are not required legally or by sound financial management to be accounted for in another fund. A budget and actual schedule of general fund expenditures is presented in this section.

The RTA Board approves a comprehensive budget which includes the activity in the general fund and the Sales Tax Agency Fund. For comparison of the combined budgets, the combined budget and actual schedule of revenues, expenditures and changes in fund balance for both funds is also presented in this section.

C. CAPITAL PROJECTS FUND

Capital Projects Fund Accounts:

Strategic Capital Improvement Program (SCIP)—to account for 1992 through 1994, 2000, 2001, 2002, 2003, and 2004 bond sales proceeds and related SCIP capital grants made to the Service Boards as expenditures are incurred. Investment income earned on SCIP bonds is recorded in the related Debt Service Fund accounts.

Non-SCIP—to account for 1990 through 1994, 2002, and 2005 bond sale proceeds, investment income earned and related Non-SCIP investment income capital grants made to the Service Boards as expenditures are incurred.

Investment Income on Bonds—to account for transfers of investment income from SCIP Bonds fund accounts through June 30, 1999 and Non-SCIP Bonds fund accounts except those issued under Illinois First program and related capital grants made to the Service Boards as expenditures are incurred.

STATISTICAL SECTION
(UNAUDITED)

CONTENTS

Financial Trends (Tables 1, 2, 3, 4)

An analysis of Net Assets by component and Change in Net Assets are presented as an indicator of RTA's financial performance and to show the overall change in financial position over time. The schedules begin with fiscal year 2001 which is the first year that RTA presented their financial statements in accordance with GASB 34.

Revenue and Expense Capacity (Tables 5, 6, 7)

Revenues and expenditures presented in the following tables include the activities in the government-wide and fiduciary fund statements. Additions to and disbursements from the Sales Tax Agency Fund are considered to be revenues and expenditures, respectively, for the purpose of presentation in these tables. The schedules show the overall distribution of expenses and revenues by source over the past 10 years, the breakout of revenues by county and the federal allocation of capital funds.

Debt Capacity (Tables 8, 9, 10, 11)

Schedules in this section provide an overview of RTA's general obligation bonds (SCIP versus Non-SCIP) outstanding balances as of December 31, 2009 and a 10-year analysis of the debt service requirement to revenues and expenses.

Demographic and Economic Information (Tables 12, 13, 14, 15)

Schedules in this section provide economic information on the population and the ten largest employers in the six-county area to help readers understand the environment within which the RTA's financial activities take place.

Operating Information (Tables 16, 17, 18)

Schedules in this section provide various statistics on passenger services offered by the service boards for fiscal year 2009, a look at system ridership over the last ten years and the RTA's full-time employees by function over the last four years.

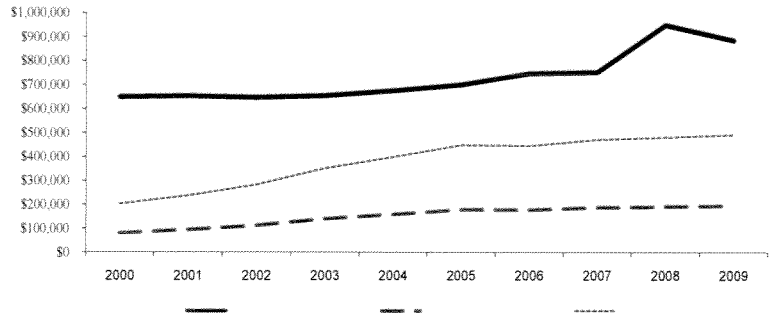
Table 11

COMPARISON OF SALES TAX REVENUE TO DEBT SERVICE REQUIREMENT

2000 - 2009
(In Thousands)



As defined in the Bond and Note General Ordinance, ordinance 85-39, Section 909 (3), revenue test required that all RTA revenues "shall equal or exceed two and one-half (2.5) times the maximum annual debt service requirements." In the graph presented above, the RTA compares 2.5 times debt service requirement to sales tax revenues, a major RTA revenue. In effect, the RTA significantly exceeds the revenue test defined in the ordinance.

Last Ten Years *(In Thousands)*

Year	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
Sales Tax Revenue	$ 650,284	$ 653,522	$ 647,685	$ 654,985	$ 675,628	$ 700,395	$ 746,829	$ 752,922	$ 949,617	$ 894,238
Debt Service Requirement	$ 81,676	$ 95,187	$ 113,526	$ 140,607	$ 159,702	$ 179,536	$ 178,086	$ 188,551	$ 192,555	$ 196,845
2.5 Times Debt Service Requirement	$204,190	$237,968	$283,815	$351,518	$399,255	$448,840	$445,215	$471,378	$481,388	$492,112

Differences, if any, between debt service amounts presented above and amounts presented in the accompanying financial statements represent timing differences between payments made to trustees and payments made to bondholders. Also, investment income earned in the debt service accounts may lower actual cash transfers from the General Fund.

Table 12

RATIO OF ANNUAL DEBT SERVICE REQUIREMENTS FOR GENERAL OBLIGATION BONDS TO TOTAL EXPENDITURES

Last Ten Years *(In Thousands)*

	Debt Service Requirements			Total	Ratio of Debt Service to Total
Year	Principal	Interest	Total	Expenditures	Expenditures

Table 16

RTA & SERVICE BOARDS OPERATING CHARACTERISTICS

2009

Chicago Transit Authority

Rapid Transit

- 8 rail routes
- 143 stations served
- 1,190 rapid transit cars
- 202.6 million riders per year
- 1,158 STO* positions

Motor Bus

- 150 bus routes
- 2,077 buses
- 318.7 million riders per year
- 4,341 STO* positions

Other

- 1.2 billion passenger rail miles per year
- 12.4 million rail miles per year
- 739.3 million passenger miles per year
- 69.4 million vehicle miles per year
- 5,001 without STO* Postions

*STO is Scheduled transit operators. This classification includes bus operators, motormen, conductors, and customer assistants.

*Metra Commuter Rail Division

- 487.7 route miles
- 1,155 miles of track
- 240 stations
- 146 locomotives
- 841 passenger cars
- 171 electric cars
- 702 weekly trains operated
- 95.7% on-time performance
- 82.3 million riders per year
- 4,429 full-time employees

Other

- 1.7 billion passenger miles per year
- 45.1 million vehicle miles per year

All data excludes NICTD South Shore

Pace Suburban Bus Division

Fixed Route

- 149 regular routes
- 46 feeder routes
- 17 shuttle routes
- 629 vehicles in use during peak periods
- 34.6 million riders per year
- 6 seasonal routes
- 712 Pace-owed busses
- 1,584 full-time employees

Paratransit**

- 173 Pace owned lift-equipped buses in service
- 2.8 millions of riders per year
- 29 full-time employees

Dial-A-Ride**

- 61 local services
- 203 Pace owned lift-equipped buses in service
- 222 communities served
- 1.2 millions of riders per year
- 7.8 million passenger miles per year
- 5.8 million vehicle miles per year

Other

- 643 vanpools in operation
- 1.8 million riders for the year
- 21.7 million passenger miles per year
- 31.1 million vehicle miles per year

**Prior to 2008 ADA Paratransit and Dial-A-Ride were combined.

Source of data: Information obtained from the Service Boards' and RTA records.

To the Board of Directors
Regional Transportation Authority
Chicago, Illinois

I have the pleasure to submit to you the Comprehensive Annual Financial Report ("CAFR") of the Regional Transportation Authority ("RTA") for the year ended December 31, 2010. The RTA staff has prepared this report as required by, and in accordance with, the RTA Act. This state law requires that the RTA publish financial statements presented in conformity with generally accepted accounting principles and audited by an independent certified public accountant.

This report consists of RTA management's representations concerning its finances. The responsibility for the accuracy, completeness, and fairness of the data rests with management. To the best of our knowledge and belief, this report contains data complete and reliable in all material respects. To provide a reasonable basis for making these representations, management of the RTA has established an internal control structure designed to provide reasonable assurance that assets are safeguarded from loss, theft, or misuse, and that adequate and reliable accounting data is compiled to prepare financial statements in conformity with accounting principles generally accepted in the United States of America. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits of that control, and that the valuation of costs and benefits requires estimates and judgments by management.

In addition to the statutory requirement of the RTA Act for an annual audit by independent certified public accountants, the Single Audit Act Amendments of 1996 and the U.S. Office of Management and Budget Circular A-133, Audits of State and Local Governments, and Non-Profit Organizations, require the RTA to undergo an annual Single Audit. The RTA has engaged the firm of McGladrey & Pullen LLP to meet these requirements. The firm followed auditing standards generally accepted in the United States of America and the standards set forth in the above circular in conducting the engagement. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the RTA's financial statements for the year ended December 31, 2010 are presented in conformity with accounting principles generally accepted in the United States of America. The independent auditor's report is presented as the first part of the financial section of this report.

A separately issued Single Audit report contains a schedule of expenditures of federal awards, the independent auditor's report on internal controls and compliance with applicable laws, regulations, contracts and grants, a schedule of findings and questioned costs, and other information related to the Single Audit.

Accounting principles generally accepted in the United States of America require that management provide a discussion and analysis to accompany the financial statements. This letter of transmittal complements management's discussion and analysis, and should be read in conjunction with it. The RTA management's discussion and analysis ("MD&A") can be found immediately following the report of the independent auditors.

OVERVIEW OF THE REGIONAL TRANSPORTATION AUTHORITY

Illinois State law (the RTA Act, as amended) created the RTA as a fiscal and policy oversight agency committed to providing an efficient and effective public transportation system for Northeastern Illinois.

> "It is the purpose of [the RTA] Act to provide for, aid and assist public transportation in the northeastern area of the State without impairing the overall quality of existing public transportation by providing for the creation of a single authority responsive to the people and elected officials of the area and with the power and the competence to provide financial review of the providers of public transportation in the metropolitan region and facilitate public transportation provided by Service Boards which is attractive and economical to users, comprehensive, coordinated among its various elements, economical, safe, efficient and coordinated with area and State plans."

History

In 1974, upon approval of a referendum in the six counties of metropolitan Chicago (Cook, DuPage, Kane, Lake, McHenry, and Will), the Act created the RTA as a unit of local government, body politic, political subdivision, and municipal corporation. Initially, the RTA provided financial assistance to the then existing public transportation operators. Subsequently, the role of the RTA expanded to include the acquisition and operation of such public transportation providers, as well as contract with operators to provide service through the purchase of service agreements.

In 1983, the Illinois General Assembly reorganized the structure and funding of the RTA. The Act placed operating responsibilities with the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"). These three entities are defined in the Act as the "Service Boards."

The CTA provides bus and rail transportation services within Chicago and 38 adjacent suburbs. Illinois State law (the Metropolitan Transportation Authority Act) created the CTA in 1945. The law established the CTA as an Illinois municipal corporation "separate and apart from all other government agencies" to consolidate Chicago's public and private transportation carriers. The CTA commenced operations in 1947 and completed the consolidation of public transportation in 1952 upon purchasing the Chicago Motor Coach System.

The Northeast Illinois Regional Commuter Railroad Corporation ("NIRCRC"), a public corporation created in 1980 and operating under the service name of Metra, provides public transportation by commuter rail. The 1983 RTA restructuring formed a Commuter Rail Division, "responsible for providing public transportation by commuter rail." The Commuter Rail Division continued the operation of NIRCRC to provide this transportation. Metra contracts with the Union Pacific Railroad, Burlington Northern Santa Fe, and Northern Indiana Commuter Transportation District to provide service through the purchase of service agreements. In addition, Metra operates the services provided on its North Central Service and South West Service rail lines, as well as the services formerly provided by Rock Island, Milwaukee Road, and Illinois Central Gulf.

The 1983 RTA restructuring also formed a Suburban Bus Division, "responsible for providing public transportation by bus and as may be provided in [the RTA] Act." As such, the Division - operating under the service name Pace - provides non-rail public transportation throughout DuPage, Kane, Lake, McHenry, and Will counties, as well as the suburban area of Cook County.

Collectively, we refer to the RTA, the CTA, Metra, and Pace as the "RTA System."

Mission

The Act sets forth the responsibilities of the RTA. These responsibilities encompass planning, funding, and oversight duties. The Board of Directors has developed the following goals to carry out the RTA legislative mandates:

Plan—Ensure an integrated regional public transportation system through comprehensive planning and coordination with the service providers.

Fund—Develop and allocate resources among the Service Boards to ensure they provide quality and cost-effective service.

Oversee—Monitor and evaluate Service Boards' performance to ensure that service is provided efficiently and effectively.

The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program. This obligation incorporates planning, funding, and oversight duties. The Act enumerates a number of requirements with respect to the budget, plan, and program. These include a requirement that the budget and plan reflect operating revenues of at least 50% of operating costs (a farebox recovery ratio of at least 50%). In addition, the budget and plan must show a balance between revenues, including subsidies, and costs (a balanced budget).

Other responsibilities include establishing policies regarding the allocation of public transportation funding in the Chicago metropolitan region, developing system-wide plans and service standards, coordinating services among different modes of transportation, and ensuring compliance with Federal and State mandates.

Budget

The Act establishes budgetary controls. The Act requires, as one of the primary responsibilities of the RTA, the adoption of an annual budget, two-year financial plan, and a Five-Year Capital Program.

> "Each year the Authority shall prepare and publish a comprehensive annual budget and program document describing the state of the Authority and presenting for the forthcoming fiscal year the Authority's plans for such operations and capital expenditures as the Authority intends to undertake and the means by which it intends to finance them."

The Act establishes certain criteria for the budget, including subsequent monitoring for compliance. Further, the Five-Year Capital Program must specify each capital improvement undertaken by or on behalf of the service boards. The budget calendar as adopted as part of the RTA Business Plan Call and statutory requirements govern the budget development process leading up to adoption of the budget. Subsequent activities involve oversight and amendment of the budget.

Budget Calendar

Based upon the estimate of tax receipts and revenues from other sources, "the Board shall, not later than September 15 prior to the beginning of the Authority's next fiscal year" advise each Service Board of the amounts estimated to be available during the upcoming fiscal year and the next two following years, the times when the amounts will be available, and the cost recovery ratio for the next year. The recovery ratio for the region must meet a minimum standard of 50%.

Between September 15 and November 15, each Service Board must prepare and publish a comprehensive annual budget, program document, and a financial plan for the two following years. "The proposed budget and financial plan shall be based on the RTA's estimate of funds that will be available to the Service Boards by or through the Authority, and shall conform in all respects to the requirements established by the Authority." Before submitting its budget to the RTA, each Service Board must hold at least one public hearing in each of the counties in which it provides service, and at least one meeting with each respective county board. After considering the comments from these meetings, it must formally adopt the budget prior to submitting it to the RTA. "Not later than... November 15 prior to the commencement of such fiscal year, each Service Board shall submit to the Authority its proposed budget for the fiscal year and its proposed financial plan for the two following years."

The RTA must also hold at least one public hearing in the metropolitan region and one meeting with each county board on its own proposed budget. After conducting these hearings and taking into consideration the comments, the RTA must adopt its budget and the budgets submitted by the service boards, each of which meets the statutory criteria summarized below. Unless the RTA passes a budget and financial plan for a Service Board, "the Board shall not release to that Service Board any funds for the periods covered by such budget and financial plan," except for the sales tax directly allocated to the Service Board by statute.

Statutory Requirements

The RTA Act sets forth seven statutory criteria for Board approval of the budget and financial plan of each Service Board. These seven criteria are:

- *Balanced Budget*: A balance between anticipated revenues from all sources including operating subsidies and the costs of providing the services and of funding any operating deficits or encumbrances incurred in prior periods, including provision for payment when due of principal and interest on outstanding indebtedness;

- *Cash Flow*: Cash balances including the proceeds of any anticipated cash flow borrowing sufficient to pay with reasonable promptness all costs and expenditures as incurred;

- *Recovery Ratio*: A level of fares or charges, and operating or administrative costs, to allow the Service Board to meet its required recovery ratio;

- *Assumptions*: Employ assumptions and projections which are reasonable and prudent;

- *Financial Practices*: Prepared in accordance with sound financial practices as determined by the Board;

- *Strategic Plan:* Maintain consistency with the goals and objectives adopted by the RTA in the Strategic Plan; and

- *Other Requirements*: Other financial, budgetary, or fiscal requirements that the Board may establish by rule or regulation.

Oversight

After adoption of the budgets, the RTA has continuing oversight powers concerning the budget and the financial condition of each Service Board and the region as a whole. On a monthly basis, the RTA monitors the budgetary and operations performance of the Service Boards to ensure compliance with their budget and recovery ratios. On a quarterly basis, the RTA makes the following assessments:

- After the end of each fiscal quarter, each Service Board must report to the RTA "its financial condition and results of operations and the financial condition and results of operations of the public transportation services subject to its jurisdiction" for such quarter. If in compliance, the Board so states and approves each Service Board's compliance by adopted resolution.

- If in the judgment of the Board these results are not substantially in accordance with the Service Board's budget for such period as adopted by the RTA, the Board shall so advise the Service Board and the service board "shall, within the period specified by the Board, submit a revised budget incorporating such results."

- Once a Service Board submits a revised budget, the RTA must determine if it meets the seven statutory budget criteria necessary to pass an annual budget. If not, the RTA must withhold from the Service Board (i) 25% of the cash proceeds of taxes imposed by the RTA and (ii) 25% of any state matching funds that are allocated to each Service Board.

- If a Service Board then submits a revised budget and plan which shows that the statutory budget criteria will be met within a four quarter period, the RTA "shall release any such withheld funds to the Service Board."

Amendment

When prudent, the RTA Board may revise estimates of amounts of funds available to the Service Boards during a fiscal year due to shifts in the economic climate, governmental funding programs, or new projects. Upon receiving notice of such a revision, the Service Boards must submit amended budgets to the RTA Board within 30 days. The RTA Board must approve all proposed amendments. If approved, the RTA then monitors actual results compared to the amended budget.

Reporting Entity

As defined by Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity*, the financial reporting entity consists of the primary government (the RTA, as legally defined), as well as its component units—legally separate entities for which the primary government has financial accountability.

Although part of the RTA System, the CTA, Metra, and Pace do not represent component units of the RTA under GASB Statement No. 14. Accordingly, the Comprehensive Annual Financial Report of the Regional Transportation Authority does not include the financial statements of the Service Boards. However, a Combining Annual Financial Report does combine the financial statements of the RTA, the CTA, Metra, and Pace as required by the RTA Act.

RTA System Characteristics

The six-county area served by the RTA system covers 3,700 square miles. According to the Census Bureau, the population of the region was 8.4 million in 2009. The Illinois Department of Employment Security reported a regional labor force of 4.3 million during the same year. The RTA system carried 634.2 million riders in 2010 decline of 0.8% from the prior year.

Governance

The RTA Act specifies the composition of the RTA Board of Directors. The RTA Board consists of fifteen appointed members and a Chairman. The Mayor of the City of Chicago appoints five directors. The suburban members of the Cook County Board appoint five directors. The chairman or executive of the County Boards of DuPage, Kane, Lake, McHenry and Will counties, each appoint a director. These fifteen directors, with a minimum concurrence of eleven directors, elect the Chairman of the RTA Board of Directors.

The RTA employs a professional staff of approximately one hundred and ten employees. The RTA Act limits the amount of administrative costs that the RTA may incur annually. The limit was set at $5 million for 1985 and increases at a rate of 5% per year. The RTA has always held its administrative expenses under the prescribed limit.

The Chicago Transit Board, consisting of seven members, governs the CTA. Its members are appointed pursuant to the Metropolitan Transit Authority Act. The Governor of Illinois appoints three members, subject to the approval of the Illinois Senate and the Mayor of Chicago. The Mayor of Chicago, with the consent of the Chicago City Council and the Governor of Illinois, appoints four members, including the CTA Chairman.

The RTA Act specifies the composition of the Metra (Commuter Rail Division) and Pace (Suburban Bus Division) Boards. The Commuter Rail Board, consisting of eleven members, governs Metra. The suburban members of the Cook County Board appoint four members. The Chairman or executive of the County Boards of Cook, DuPage, Kane, Lake, McHenry and Will counties each appoint one director. The Mayor of Chicago, with the consent of the Chicago City Council, appoints one member. These eleven directors, with a minimum concurrence of eight directors, elect the Chairman of the Commuter Rail Board.

The Suburban Bus Board, consisting of thirteen members, governs Pace. The suburban members of the Cook County Board appoint six members. The Chairman or executive of the County Boards of DuPage, Kane, Lake, McHenry, and Will counties each appoint one director. The RTA Act requires that each of these directors must be a current or former "chief executive officer of a municipality" from the area that appoints the member. One director is the Commissioner of the Mayor's Office for People with Disabilities for the City of Chicago. The Chairman or executive of each of the County Boards of DuPage, Kane, Lake, McHenry, and Will, plus the suburban members of the Cook County Board, by simple majority, appoint the Chairman of the Suburban Bus Board.

Financing

The RTA Act specifies the funding responsibilities of the RTA, appointing the RTA as the primary public body in the metropolitan region to secure funds for public transportation.

Sections 4.03 and 4.03.1 of the Regional Transportation Act, 70 ILCS 3615/4.03, authorizes the RTA to impose a series of taxes within the six-county metropolitan region by a vote of nine of its directors: a sales tax, a car rental tax, a motor fuel tax, an off-street parking tax, and a replacement vehicle tax.

Sales Taxes

The Act authorizes the RTA to impose a retailers' occupation tax "ROT," a service occupation tax "SOT," and a use tax "UT." The RTA imposed this tax at the maximum permissible rate in 1979. The 2008 legislation increased the sales tax by .25% in Cook County and .50% in the collar counties. The individual collar counties keep .25% of the increase. All of the RTA sales taxes are collected by the Illinois Department of Revenue under procedures that are largely identical to the corresponding state sales taxes.

The ROT is imposed on the gross receipts from the sale of tangible personal property at a rate of 1% in Cook County and .75% in the collar counties. Except for the tax on food and drugs, the RTA tax base is identical to the State retailers' occupation tax base. Consequently, when the state base is expanded or contracted by taxing or exempting receipts from specific transactions, e.g., the sale of computer software or rolling stock, the RTA tax base likewise expands or contracts. However, when the legislature exempted the sale of food and drugs from the state tax, the exemption was not extended to the RTA and other local government taxes. As a result, the RTA tax on food and drugs is imposed at a rate of 1.25% in Cook, and .75% in collar counties.

The SOT is imposed on the gross receipts from the sale of tangible personal property as an incident to the sale of a service. The tax rate and tax base are identical to the ROT.

The UT is imposed on persons living in the six county areas for the privilege of using a vehicle purchased outside the six county area that must be registered with the State. Unlike the state use tax, the RTA UT is limited to registered property, largely automobiles. The tax is imposed on the selling price of the property at the same rates as the ROT.

Car Rental Tax

Section 4.03.1 of the Act authorizes the RTA to impose an automobile rental occupation and use tax. This occupation tax, paralleling the state and local car rental taxes, may be imposed at a rate of 1% in Cook County and ¼% in the collar counties of the gross receipts from car rentals. The use tax may be imposed at the same rates on the privilege of using in the region a car rented outside, but titled in, Illinois. Any car leasing tax would be collected by the Illinois Department of Revenue.

This taxing power was added to the RTA Act in 1982, when the legislature imposed a state-wide car rental tax and authorized cities, counties, and certain special districts that had the power to impose sales taxes to tax the car rental occupation. This taxing power has never been exercised by the RTA.

Motor Fuel Tax

The Act authorized the RTA to impose a tax on retail sales and use of motor fuel at a rate of 5% of gross receipts. Section 4.03 (p) of the Act prohibits the RTA from imposing the motor fuel tax, if it has imposed the broader sales taxes described above.

Off-Street Parking Tax

The Act authorizes the RTA to impose a tax in unspecified amounts on the privilege of parking a motor vehicle in a public or private fee-charging lot in the six county area. Because the Act prohibits the imposition of this tax if the RTA has enacted sales taxes, it has never been imposed.

Replacement Vehicle Tax

The Act authorizes the RTA to impose a $50 tax on any passenger car purchased within the metropolitan area by an insurance company in settlement of a total loss claim of its insured. Any such tax would be collected by the State. This taxing power has never been exercised by the RTA.

As indicated above, the RTA imposes a sales tax in the six-county Northeastern Illinois region. The Illinois Department of Revenue collects this tax and remits the collections to the Illinois State Treasurer. The Treasurer holds the funds in trust for the RTA outside the State Treasury. The Treasurer disburses the funds monthly to the RTA, without appropriation, upon order of the State Comptroller.

The amounts of funding and taxes received, together with revenues from the provision of transit services by the Service Boards and other operating revenues, provide the resources to cover operating costs of the RTA System.

FACTORS AFFECTING ECONOMIC CONDITION

Financing

The RTA's primary source of operating funding is a regional (occupation and use) sales tax and a sales tax match from the State of Illinois. Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region (from the equivalent of 1.0% in Cook County and 0.25% in the remainder of the region to the equivalent of 1.25% in Cook County and 0.5% in the remainder of the region) beginning on April 1, 2008, created a real estate transfer tax in the City of Chicago to fund the CTA, and raised from 25 percent to 30 percent the portion of RTA tax revenues matched by the State Public Transportation Fund (PTF). In 2010, RTA sales tax receipts of $931 million increased 4.2% from prior year and exceeded budget by 4.6%. In 2009, RTA sales tax receipts declined 2.9% from prior year.

The RTA 2011 operating budget approved by the Board of Directors on December 16, 2010, assumes sales tax revenues of $916 million, an increase of 2.9% over the 2010 budget but a decline of 1.6% from 2010 actual receipts. In addition to the 30% tax match from the PTF, the budget recognizes these funds from the State of Illinois: $123 million to reimburse the debt service expenses for the RTA's Strategic Capital Improvement Program (SCIP) bonds, $33.6 million as partial reimbursement to the Service Boards for discounted and free fares (mandated by law) for student, elderly, and disabled riders, and grant proceeds from the Illinois Department of Transportation totaling $18.7 million.

Regional and Illinois Economy

The Chicago region is the home to one of the most economically diversified economies in the United States. The region is home to more than 400 major corporate headquarters, including 28 Fortune 500 companies. A global leader in options, futures, and derivatives trading, the Chicago area economy's strengths includes business and financial services, manufacturing, information technology, health services, and transportation & distribution. Chicago is not only a leader in sustainable business but also ranks as one of the most sustainable cities in the country.The unemployment rate in the Chicago region increased from 4.5% in 2006 to 10.2% in 2010. Similarly, the unemployment rate in Illinois increased from 4.6% in 2006 to 10.3% in 2010.

The March 2011 Monthly Revenue Briefing issued by the State Commission on Government Forecasting and Accountability noted that during the first nine months of the State's 2011 fiscal year, sales tax receipts of $5.1 billion increased $414 million or 8.9% compared to the same period during the State's previous fiscal year.

National Economy

Annual growth of the real gross domestic product (GDP), the output of goods and services produced in the United States, declined from 3.6% in 2004 to 1.9% in 2007. Real GDP was unchanged in 2008 and contracted 2.6% in 2009. In 2010, real GDP grew 2.9%. The Congressional Budget Office (CBO) predicts annual real GDP growth of 2.7% in 2011 and 3.1% in 2012.

Rising from 4.6% in 2006 to 9.3% in 2009, the national unemployment rate averaged 9.6% in 2010, the highest average annual rate since 1983. The national unemployment rate average 8.9% during the first quarter of 2010, declining from 9.0% during January to 8.8% in March. The CBO forecasts national unemployment rates of 9.4% in 2011 and 8.4% in 2012.

In 2010, the consumer price index (CPI), a measure of the pace of inflation, rose 1.6%. Following increases of 2.8% in 2007 and 3.8% in 2008, the CPI declined 0.4% in 2009. The CBO expects the CPI to increase 1.6% in 2011 and 1.3% in 2012.

Risk Management

The RTA, CTA, Metra, and Pace established a Loss Financing Plan in 1986. The Plan operates as a self-insurance program to provide a source from which to temporarily finance catastrophic losses and other claims incurred by the RTA and the Service Boards, arising out of personal injuries, property damage, and certain other losses. The participating entities (RTA, CTA, Metra, and Pace) administer the Plan, with a representative from the RTA acting as the Fund Manager and representatives from the CTA, Metra, and Pace acting as Fund Advisors.

The Plan required the creation of a Joint Self-Insurance Fund. The Fund has entered into a multi-year, claims-paid insurance agreement to insure against certain losses in excess of $5 million. The Fund pays premiums for this coverage. The participating entities must repay the Fund for submitted claims paid by the Fund that are not covered by the insurance agreement.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the RTA for its Comprehensive Annual Financial Report ("CAFR") for the year ended December 31, 2009. This was the sixteenth consecutive year that the RTA has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

In addition, the RTA received the GFOA Award for Distinguished Budget Presentation for its annual budget for the year ending December 31, 2010. This marks the fourteenth consecutive year that the RTA has achieved this accomplishment. The Distinguished Budget Presentation Award requires that the GFOA judge the budget document as proficient in several categories, including policy documentation, financial planning, and organization.

I would like to express my appreciation to the RTA staff for their efforts in preparing this report.

Grace Gallucci
Chief Financial Officer and
Senior Deputy Executive Director,
Finance and Performance Management

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Regional Transportation Authority

Illinois

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
December 31, 2009

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

INDEPENDENT AUDITOR'S REPORT

McGladrey

Independent Auditor's Report

Board of Directors
Regional Transportation Authority
Chicago, Illinois

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Regional Transportation Authority ("RTA") as of and for the year ended December 31, 2010, which collectively comprise the RTA's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the RTA's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Regional Transportation Authority as of December 31, 2010, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 16 to the financial statements, the December 31, 2009 net assets for the government activities and fund balance for the General Fund have been restated to reflect the implementation of Governmental Accounting Standards Board Statement No. 53 relating to derivatives.

The Required Supplementary Information which includes Management's Discussion and Analysis (pages 16-23), budgetary comparison information (pages 73-75) and pension related information (pages 76-77) is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

McGladrey is the brand under which RSM McGladrey, Inc. and McGladrey & Pullen, LLP serve clients' business needs. The two firms operate as separate legal entities in an alternative practice structure.

Member of RSM International network, a network of independent accounting, tax and consulting firms.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the RTA's basic financial statements. The combining and individual fund statements and schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The accompanying introductory and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis ("MD&A") provides an overview of the financial activity affecting the operation of the Regional Transportation Authority ("RTA") for the fiscal year ended December 31, 2010. Please read it in conjunction with the RTA's basic financial statements which follow this section.

Financial Highlights

- For the year ended December 31, 2010, the RTA statement of activities for the governmental activities shows expenses increasing $12 million to $411 million from $399 million for the same period in 2009. This increase is due to an increase in financial assistance to the CTA, Metra, and Pace ("Service Boards") by $4 million. Also, the interest expense and the Regional and Technology Program expenses were higher by $4 million and $2 million, respectively. Conversely, the PTF and the State Assistance Revenues increased by $21 million from 2009.

- The government-wide statement of net assets shows assets of $1,141 million for the governmental activities, a net increase of $351 million. The increase is mainly due to an increase in cash and investments. The increase in cash and investments was due to the timing of receipts. In the government-wide statement of net assets, bond-related liabilities increased by $208 million, which reflects the increase in general-obligation bonds payable in 2010.

- At the end of 2010, the government-wide statement of net assets shows a deficit of $1.9 billion for governmental activities. In contrast, the governmental funds balance sheet presented a total fund balance of $924 million. There is a $2.8 billion difference between the fund balance and the net deficit. This does not in any way represent a precarious financial position for the RTA. Rather, it is how GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*, requires RTA's general obligation bonds to be presented in the government-wide statement of net assets.

- The RTA has the obligation to pay the bonds it has issued to fund the Service Boards' capital expenditures. These expenditures and the related assets appear in the Service Boards' financial statements. The sales taxes imposed by the RTA in the region represent the primary source of payment for the bond obligations.

USING THIS COMPREHENSIVE ANNUAL FINANCIAL REPORT (CAFR)

Overview of the CAFR—The RTA CAFR consists of three parts:

1. Introductory Section—This section includes the letter of transmittal, the GFOA Certificate of Achievement, the organizational chart, and the list of principal officials.

2. Financial Section—This section is comprised of the independent auditor's report, the management's discussion and analysis, the basic financial statements, and the required supplementary information and combining and individual fund schedules.

3. Statistical Section (Unaudited)—This section provides additional analysis and is not a required part of the basic financial statements of the RTA.

The basic financial statements contain three parts: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to financial statements. A discussion of the basic financial statements is included in this CAFR as follows:

Government-wide Financial Statements—The government-wide financial statements provide a broad overview of the RTA's finances in a manner similar to those of a private-sector business. The statements are prepared following the full accrual basis of accounting.

- ***Statement of Net Assets***—The statement of net assets presents information on all of the RTA's assets and liabilities. The statement subtracts liabilities from assets to compute—in the case of the RTA—a net deficit. This net deficit reflects the recording of bonds issued by the RTA for capital grants to the Service Boards to acquire and construct assets used to provide public transportation. These assets appear in the financial statements of the Service Boards. The bonds represent general obligations of the RTA to which the RTA has pledged its full faith and credit.

  The size of the net deficit will increase as the RTA continues to issue bonds to fund the RTA System's capital program.

- ***Statement of Activities***—The statement of activities shows the change in net assets of the governmental and business-type activities. Governmental activities include operating and capital asset funding (capital grants) to the Service Boards, RTA administrative expenses, the RTA Travel Information Center, certification of riders for paratransit service under the Americans with Disabilities Act (regional expenses), and interest expense on bonds issued by the RTA. Business-type activities consist of the RTA Joint Self-Insurance Fund.

  The government-wide financial statements include only the RTA (the "primary government"). There are no "component units" (separate legal entities for which the RTA is financially accountable) that the RTA government-wide financial statements are required to include.

  The RTA does not consider the CTA, Metra, or Pace to be component units, therefore, the RTA government-wide financial statements do not incorporate the financial data of the Service Boards. (See Letter of Transmittal and Note 1 to the financial statements for further details.)

Fund Financial Statements—A fund refers to a set of related self-balancing accounts used to maintain control over resources segregated for specific activities or objectives. The RTA, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The RTA's funds are accounted for in three fund types: governmental funds, proprietary

funds, and fiduciary funds. These financial statements are prepared following the modified accrual basis of accounting.

- ***Governmental Funds***—Governmental funds account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as balances of spendable resources available at the end of the year.

  Unlike the information presented for governmental funds, information presented for governmental activities in the government-wide financial statements includes the long-term impact of near-term financing decisions. The governmental funds financial statements provide reconciliations to facilitate comparison between governmental funds and government-wide financial statements.

  In the fund level basic financial statements, the RTA presents three major governmental funds: a general fund, a debt service fund, and a capital projects fund. The governmental funds financial statements present information for each major fund separately. Individual fund data for each of the RTA governmental funds is presented in this CAFR in the section labeled "Combining and Individual Fund Schedules."

  The RTA adopts an annual appropriated budget for its general fund. The Required Supplementary Information and Combining and Individual Fund Schedules include a budgetary comparison.

- ***Proprietary Funds***—The RTA maintains a proprietary fund to account for the RTA Joint Self-Insurance Fund. This type of proprietary fund, referred to as an enterprise fund, reports the same functions presented as business-type activities in the government-wide financial statements. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. As required by Article II of the Loss Financing Plan, the RTA Joint Self-Insurance Fund issues separate annual audited financial statements.

- ***Fiduciary Funds***—Fiduciary funds account for resources held for the benefit of parties outside the government activity. In the case of the RTA, the fiduciary fund accounts for the assets of the RTA defined-benefit Pension Plan and the Sales Tax Agency Fund. The government-wide financial statements do not reflect fiduciary funds as these funds are not available to support the programs and operations of the RTA. The RTA Pension Plan issues annual audited financial statements separately.

ANALYSIS OF THE GOVERNMENT-WIDE FINANCIAL STATEMENTS

The following table summarizes the Statement of Net Assets:

SUMMARY OF NET ASSETS
DECEMBER 31, 2010 AND 2009
(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2010	2009	Variance	2010	2009	Variance	2010	2009	Variance
Assets:									
Cash and investments	$ 753,522	$ 494,670	$ 258,852	$ 16,010	$ 20,612	$ (4,602)	$ 769,532	$ 515,282	$ 254,250
Other assets	299,504	283,137	16,367	6,786	6,347	439	306,290	289,484	16,806
Noncurrent assets	73,316	-	73,316	6,167	2,108	4,059	79,483	2,108	77,375
Capital assets—net	15,265	12,660	2,605	-	-	-	15,265	12,660	2,605
Total assets	1,141,607	790,467	351,140	28,963	29,067	(104)	1,170,570	819,534	351,036
Liabilities:									
Current non bond-related liabilities	80,409	123,927	(43,518)	-	-	-	80,409	123,927	(43,518)
Current bond related liabilities	345,124	69,827	275,297	-	-	-	345,124	69,827	275,297
Long-term non-bond-related liabilities	154,352	49,133	105,219	-	-	-	154,352	49,133	105,219
Long-term bond-related liabilities	2,435,370	2,502,199	(66,829)	-	-	-	2,435,370	2,502,199	(66,829)
Total liabilities	3,015,255	2,745,086	270,169	-	-	-	3,015,255	2,745,086	270,169
Net assets (deficit):									
Invested in capital assets	15,265	12,660	2,605	-	-	-	15,265	12,660	2,605
Restricted	83,277	270,019	(186,742)	-	-	-	83,277	270,019	(186,742)
Unrestricted (deficit)	(1,972,190)	(2,234,127)	261,937	28,963	29,067	(104)	(1,859,950)	(1,938,212)	78,262
Total net assets (deficit)	$(1,873,648)	$(1,954,619)	$ 80,971	$ 28,963	$ 29,067	$ (104)	$(1,844,685)	$(1,925,552)	$ 80,867

As of December 31, 2010, cash and investments for governmental activities increased by $259 million over the previous year. The RTA's cash balance increased significantly from last year due to a partial catch up by the State of Illinois on unpaid RTA requisitions. During 2010, the Capital Projects Fund increased by $124 million, and the Debt Service Fund increased by $164 million mainly due to 2010 cash note borrowings.

As of December 31, 2010, the current bond & non bond-related liabilities increased by $232 million from the previous year due primarily to the 2010 cash note borrowings.

The presentation of financial statements under the GASB Statement No. 34 requires the recognition in the statements of net assets of $2.8 billion in current and long-term general obligation bonds payable. The issuance of these bonds was for the specific purpose of funding capital grants to acquire and construct assets used to provide public transportation within the RTA region.

The RTA net deficit at December 31, 2010 will not affect the availability of RTA fund resources for future use. In fact, the RTA maintains its operations funding levels for 2011 as established in September 2010 during the 2011 budget process.

The following table summarizes the RTA Statement of Activities presented in this CAFR:

SUMMARY OF ACTIVITIES
DECEMBER 31, 2010 AND 2009
(In thousands)

	Governmental Activities			Business-type Activities			Total		
	2010	2009	Variance	2010	2009	Variance	2010	2009	Variance

Total revenues and transfers	492,251	496,715	(4,464)	4,636	4,035	601	496,887	500,750	(3,863)
Change in net assets	80,971	97,003	(16,032)	(104)	208	(312)	80,867	97,211	(16,344)
Net assets—beginning of year, as restated	(1,954,619)	(2,051,622)	97,003	29,067	28,859	208	(1,925,552)	(2,022,763)	97,211
Net assets—end of year	$ (1,873,648)	$ (1,954,619)	$ 80,971	$ 28,963	$ 29,067	$ (104)	$ (1,844,685)	$ (1,925,552)	$ 80,867

In 2010, financial assistance to the Service Boards increased by $4 million from 2009. Also, the capital grants to the Service Boards increased by $52 million from 2009 to $119 million in 2010, which reflects the activity in capital expenses to the Service Boards during 2010. Furthermore, the amount of bond interest expense increased by $4 million from $132 million to $136 million in 2010. PTF and state assistance increased by $21 million and the sales tax also increased by $4 million, a decrease in investment income and other of $30 million was mainly due to a decrease in swap investments market value and the market value of investments.

During 2010, $4 million was transferred to the Joint Self-Insurance Fund for excess liability. Insurance premiums representing the only major expense, and investment income represents the only revenue for the Business-type activities (insurance financing).

FINANCIAL ANALYSIS OF THE GOVERNMENT FUNDS

As noted earlier, the RTA employs three fund types: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds—Governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as the balances of spendable resources available at the end of the year. See the Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances on pages 26 and 28, respectively, for further details.

General Fund—Assets in the General Fund primarily represent the amounts for Service Boards' operations and capital projects. Assets increased by $219 million from $348 million in 2009 to $567 million in 2010, mainly due to timing differences. The RTA's cash balance increased significantly from last year due to a partial catch up by the State of Illinois on unpaid RTA requisitions. Also, intergovernmental receivables increased by $2 million due to timing differences.

At December 31, 2010, the majority of RTA's liabilities of $399 million are comprised of intergovernmental payables and due to other funds, i.e., accrued financial assistance, sales taxes, capital and other grants due to the Service Boards and deferred revenue and notes payable.

The total fund balance of the General Fund equals $168 million at December 31, 2010. The General Fund balance increased by $45 million primarily due to timing and increase in financial assistance to the Service Boards.

Reserved for other includes $59 million in unfavorable investment changes, $30 million in capital, $47 million in Debt Service Deposit Agreement ("DSDA"), and $261 thousand in prepaid items. The amount reserved for RTA capital projects is for projects focusing on the application of advanced technology on transportation systems to improve the efficiency of such systems. The transit industry views such technology as having the potential for increasing ridership and revenues by making transit systems more attractive to customers.

These applications include the following:

- A regional open fare payment system to promote seamless regional mobility, making it easier for transit customers to pay for travel on different segments of the RTA system with a simple single payment method. Key components of this initiative include development of an interagency fare model, demonstration and deployment of handheld fare collection onboard Metra trains, and extension of the CTA's open fare payment system.

- A regional real-time information system that integrates CTA's BusTracker and TrainTracker, Pace's WebWatch, and Metra's future next train information system. This initiative includes online delivery of the integrated information on desktop and mobile channels, the RTA's Travel Information Center, and the installation of electronic displays at bus stops and train stations that provide real-time "next train" or "next bus" service information.

- A five-year program of Transit Signal Priority (TSP) implementation along priority corridors and strategic CTA and Pace bus routes. TSP gives/extends a green signal to transit buses under certain circumstances to reduce passenger travel times, improve bus schedule adherence, and reduce bus operating costs.

- A comprehensive Chicago-land Commute Options Management System that utilizes social networking and employer outreach to shift commute trips away from single-occupancy vehicle (SOV) use toward sustainable transportation modes like transit and vanpools.

- Interagency Transit Passenger Information Display (ITPID) that utilizes regional wayfinding and static information sign standards to promote seamless travel on multi-agency transit facilities.

- Multi-Modal Trip Planner System (MMTPS) to provide side by side comparisons of trip itineraries using transit, driving, or any combination of non-motorized modes such as biking and walking. It will give customers a comprehensive decision support tool for choosing travel options that incorporate convenience, efficiency, and cost – from the traveler's perspective.

- Transfer connection protection (a system to minimize connecting time between transit vehicles by ensuring pre-scheduled connections).

- Parking management systems (real-time information and guidance regarding the availability of parking spaces at transit and ride-share parking facilities).

The remaining unreserved and undesignated fund balances total $7 million.

Debt Service Fund—The RTA establishes a Debt Service Fund to account for transfers received from the General Fund, investment income, and principal and interest payments made for each of its outstanding series of bonds. As of December 31, 2010, the RTA has twenty-four series of general obligation bonds/notes outstanding. Each respective bond/note agreement sets forth the debt service funding requirements. The 2010 Debt Service Fund balance increased by $163 million from 2009 to $500 million.

Capital Projects Fund—The RTA has established a Capital Projects Fund to account for bond proceeds, earnings on the investment of such proceeds, and the expenditure of such monies for capital assets of the Service Boards. In addition, the RTA can use a portion of these funds to pay for debt service on the related bonds. During 2010, the Capital Projects Fund increased by $124 million. The increase reflects the proceeds of the new bond, offset by the increased activities in bond capital expenditure during 2010.

Proprietary Fund—The RTA has established a proprietary fund to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one proprietary fund which relates to the activities of the Joint Self-Insurance Fund.

GENERAL FUND BUDGETARY HIGHLIGHTS

In 2010 the actual change in revenues over expenditures of $40 million, including other financing (debt service) use, was $7 million higher than the budget figure of $33 million. In the General Fund total revenues exceeded budget by $84 million and the Agency Fund exceeded budget by $35 million for a combined excess of $119 million. The positive variance in the General Fund is essentially due to the receipt of state funding for progress payments regarding Metra's purchase of 160 rail cars totaling $56 million, the increase in RTA formula sales tax receipt of $6 million as the economy rebounded, a $6 million fund recovery from prior year ADA Paratransit operating assistance, investment income of $8 million and $8 million in state financial assistance (AFA and ASA) to reimburse the debt service expenses on bonds issued for the RTA's Strategic Capital Improvement Program. The gain in Agency Fund receipts of $35 million is the direct result of an improved economy as sales tax receipts that are supplemented with a 30% match in state Public Transportation Funds (PTF) exceeded budget by 4.6%.

Total Expenditures in the General Fund, before transfers out exceeded the budget by $70 million. When combined with the debt service costs the total exceeded budget by $76 million. This variance includes: a $61 million overage in capital grants that takes in the $56 million payment for Metra's rail cars, total debt related costs of $12 million, the remaining balance of $3 million resulting in differences for Pace ADA Paratransit and other changes in expenditures including the Joint Self Insurance Fund, and the Innovation, Coordination and Enhancement (ICE) Fund. The additional expenditures in the Agency Fund compared to Budget of $35

million correlate to the 4.6% increase in sales tax and PTF formula funds the Service Boards (The CTA, Metra and Pace) receive statutorily.

SERVICE BOARDS CAPITAL ASSETS AND LONG-TERM DEBT ACTIVITY

The financial statements of the Service Boards reflect the capital assets discussed in this section. The statement of net assets for the RTA reflects the RTA bonds issued to provide a portion of the funding for these assets. The details of the RTA bond program are discussed further in Note 10 of this report.

Service Boards Capital Assets—The RTA System provides 634 million unlinked passenger trips annually. This has the beneficial impact of reducing road congestion, improving the flow of goods and services, and enhancing air quality. In addition, the RTA System provides essential mobility to those persons unable to utilize other transportation. The System represents an asset with replacement cost estimated at more than $42 billion for the entire region. To continue these public benefits, the RTA strives to maximize the amount of resources devoted to investment in its System for it to remain in good working order. The RTA Five-Year Capital Program report contains the details of this investment. The Five-Year Capital Program report is updated and adopted annually by the RTA Board, as required by the RTA Act.

Sources of funds for capital investment include federal programs, proceeds of RTA bonds, and State of Illinois programs. The level of capital funding from Federal as well as State programs has risen, reflecting the increasing recognition of the importance of public transportation. In recent years, the RTA and the Service Boards have also been able to direct funds to capital projects by successfully constraining operating costs.

RTA Capital Assets—For more detailed information on capital asset activity, please see Note 9 in the notes to the financial statements.

Long-Term Debt Activity—Under the RTA Act, the RTA has authority to issue General Obligation Bonds for the improvement and expansion of the RTA System. This authority resulted from successful RTA efforts to demonstrate to the State legislature the need for capital reinvestment. The authorization identified two types of bonds: Strategic Capital Improvement Program ("SCIP") bonds and RTA ("Non-SCIP") bonds.

Prior to January 1, 2000, the RTA had the authority to issue up to $500 million in SCIP bonds and to have up to $500 million in Non-SCIP bonds outstanding. Effective January 1, 2000, the RTA Act was amended to increase the RTA authorization by an additional $260 million of SCIP bonds in each year for the period of 2000 through 2004, and to issue and have outstanding up to $800 million of Non-SCIP bonds. As of year-end 2010, the RTA has issued $1.790 billion in SCIP bonds, with total SCIP bonds outstanding of $1.497 billion. The remaining $763.0 million of bonds outstanding are Non-SCIP bonds.

For 2010, the bonds issued by the RTA carried a rating of "AA" from Standard & Poor's, Aa3 by Moody's Investors Service, Inc. and AA- by Fitch, Inc.

CONTACTING THE FINANCIAL MANAGEMENT OF THE REGIONAL TRANSPORTATION AUTHORITY

This CAFR provides a general overview of the finances of the RTA. Users of the CAFR should address questions concerning the information, or requests for additional financial information, to the Regional Transportation Authority, c/o Senior Deputy Executive Director, Finance and Administration 175 West Jackson Blvd., Suite 1650, Chicago, Illinois 60604 or visit our website at www.rtachicago.org.

RECONCILIATION OF THE GOVERNMENTAL FUNDS
BALANCE SHEET TO THE STATEMENT OF NET ASSETS
DECEMBER 31, 2010
(In Thousands)

TOTAL FUND BALANCE—GOVERNMENTAL FUNDS	$ 924,446
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds. This is the capital assets, net of accumulated depreciation recognized in the statement of net assets.	15,265
Bond issue costs are paid in the current year and, therefore, are reported in the funds. This asset represents the unamortized portion recognized in the statement of net assets.	13,752
General obligation bonds payable are not due and payable in the current period and, therefore, are not reported in the funds. This liability represents the total current and long-term portion of the general obligation bonds payable recognized on the statement of net assets.	(2,660,160)
Bond premiums are paid in the current year and, therefore, are reported in the funds. This liability represents the unamortized portion recognized in the statement of net assets.	(120,334)
Accrued interest payable on bonds is not due and payable in the current period and, therefore, is not reported in the funds. This liability is accrued in the statement of net assets.	(39,196)
Compensated absences are not due and payable in the current period and, therefore, are not reported in the funds.	(725)
Derivative instruments do not provide or use current financial resources and are not reported in the fund statements. This is the amount by which derivative related liabilities exceeded assets at year-end.	(6,696)
TOTAL NET DEFICIT—GOVERNMENTAL ACTIVITIES	$ (1,873,648)

The notes to financial statements are an integral part of this statement.

REGIONAL TRANSPORTATION AUTHORITY

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF THE GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
YEAR ENDED DECEMBER 31, 2010
(In Thousands)

NET CHANGE IN FUND BALANCES—TOTAL GOVERNMENTAL FUNDS	$	332,872
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay ($3,559) exceeded depreciation expense ($954) in the current period.		2,605
The issuance of long-term debt provides current financial resources to governmental funds. However, this transaction has no effect on net assets.		(321,946)
The repayment of the principal of long-term debt consumes the current financial resources of governmental funds. However, this transaction has no effect on net assets.		74,060
Accrued interest on bonds reported in the statement of activities does not require the use of current financial resources and, therefore, is not reported as expenditures in governmental funds.		(5,792)
Governmental funds report bond premiums as an other financing source. However, in the statement of activities, the premiums are amortized over the life of the bonds and recorded as a reduction of bond interest expense.		6,014
Unamortized bond issue costs reported in the statement of activities require the use of current financial resources and therefore, are fully recognized in the governmental funds.		2,073
Compensated absenses reported in the statement of activities does not require the use of current financial resources and, therefore, is not reported as expenditures in governmental funds.		(725)
Increases (decreases) in the fair values of investment derivative instruments do not provide (use) financial resources and are not reported in the fund financial statements.		(8,190)
CHANGE IN NET ASSETS OF GOVERNMENTAL ACTIVITIES	$	80,971

NOTE 1. REPORTING ENTITY

The Regional Transportation Authority ("RTA") was established in 1974 upon approval of a referendum in its six-county Northeastern Illinois region. The operating responsibilities of the RTA are set forth in the RTA Act ("Act"). The RTA is a unit of local government, body politic, political subdivision and municipal corporation of the State of Illinois. As initially established, the RTA was an operating entity responsible for providing day-to-day bus and rail transportation services. However, on November 9, 1983, the Illinois General Assembly reorganized the structure and funding of the RTA from an operating entity to a planning, funding, and oversight entity. The reorganization placed all operating responsibilities in the Chicago Transit Authority ("CTA") and two operating divisions of the RTA: the Commuter Rail Division ("Metra") and the Suburban Bus Division ("Pace"), each having its own independent board of directors. These divisions conduct operations and deal with subsidized carriers. These three entities are defined in the Act as the "Service Boards."

The Service Boards provide services to different geographic areas within the six-county region. Metra provides transit service to the six-county area, with the majority of the transit riders residing in the suburban metropolitan area and commuting into the City of Chicago. Pace's primary service area is the suburban communities, with limited services to areas within the City of Chicago. The CTA provides service to the City of Chicago and 38 neighboring suburbs within Cook County. Although programs are underway to increase the transfer of ridership between the service entities, trips of this type presently represent a minority of those taken.

The Act sets forth detailed provisions for the allocation of receipts by the RTA to the various Service Boards, and imposes a requirement that the RTA System as a whole achieves annually a "system-generated revenues recovery ratio" (i.e., aggregate income for transportation services provided) of at least 50% of the cost of transportation services. For purposes of the recovery ratio calculation, the Act requires that the costs used in the calculation include all operating costs consistent with generally accepted accounting principles, with certain exceptions. Capitalized expenditures are recorded as capital assets, and are excluded from the recovery ratio calculation as required by the Act. The Service Boards achieve their required recovery ratio by establishing fares and related revenue to cover the required proportion of their proposed expenses. The RTA has the responsibility to monitor the budgets and financial performance of the Service Boards.

As defined by accounting principles generally accepted in the United States established by the Governmental Accounting Standards Board ("GASB") Statement No. 14, *The Financial Reporting Entity,* the financial reporting entity consists of the primary government, as well as its component units, which are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountability is defined as:

> Appointment of a voting majority of the component unit's board, and either: (a) the ability to impose will by the primary government, or (b) the possibility that the component unit will provide a financial benefit to, or impose a financial burden on, the primary government; or fiscal dependency on the primary government.

In addition, a component unit also includes certain organizations that the primary government is not financially accountable for if the nature and significance of their relationship, including ongoing financial support are such that exclusion from the financial reporting entity would render the entity's financial statements incomplete or misleading.

In the judgment of the management of each of the entities and their analysis and application of Statement No. 14 criteria, while the RTA does exercise some fiscal oversight, the Service Boards are not part of the RTA reporting entity for the purpose of preparing a comprehensive annual financial report in accordance with generally accepted accounting principles in the United States.

In arriving at this conclusion, the following factors were considered:

- The Service Boards maintain separate management, exercise control over all operations (including the passenger fare structure), and are accountable for fiscal matters, including ownership of assets, relations with Federal and State transportation funding agencies that provide financial assistance in the acquisition of these assets, and the preparation of operating budgets. The Service Boards are also responsible for the purchase of services and approval of contracts relating to their operations.

- The RTA Board has control neither in the selection nor the appointment of any Service Board Director nor of any of its management. Further, directors of the Service Boards are excluded from serving on more than one entity's board of directors, including that of the RTA, except for the Chairman of the CTA Board of Directors who is also an RTA Board member.

- The Illinois statutes required the RTA Board to approve the budgets of the Service Boards if such budgets meet specified system-generated revenues recovery ratios and other requirements as defined by the Act.

- The RTA is not entitled to any Service Board surplus or responsible for any Service Board deficits.

Based on these factors and applying the aforementioned criteria used to determine financial accountability, management of the RTA does not consider the Service Boards to be component units and, accordingly, the financial data of the Service Boards have been excluded from the RTA reporting entity. The RTA is not aware of any entity which is financially accountable for the RTA that would result in the RTA's being considered a component unit of such entity.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the RTA conform to accounting principles generally accepted in the United States as applicable to governments. The following is a summary of the significant policies:

Fund Accounting—The accounts of the RTA are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. RTA resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be utilized and the means by which spending activities are controlled. In the financial statements, the various funds are grouped into three broad fund types and six generic fund categories as follows:

Governmental Fund Types—The RTA's Governmental Fund Types consist of the General Fund, Debt Service Fund, and Capital Projects Fund.

General Fund—The General Fund is the general operating fund of the RTA. It is used to account for all financial transactions that are not specifically required to be accounted for in another fund.

Debt Service Fund—The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

Capital Projects Fund—In 1989, the Illinois General Assembly authorized the RTA to issue a maximum of $500 million of Strategic Capital Improvement Program ("SCIP") bonds, and to have a maximum of $500 million RTA bonds outstanding. The Capital Projects Fund is utilized for the receipt and disbursement of the proceeds of the bond issues. The Capital Projects Fund was first established in 1990 with the issuance of $100 million of RTA bonds to fund capital projects at the Service Boards. The proceeds from the bonds issued under the General Assembly's authorization were allocated by the RTA as follows: 50% for capital projects of the CTA; 45% for capital projects of Metra; and 5% for capital projects of Pace. Projects included in approved five-year Capital Programs will be eligible for reimbursements from these proceeds by the RTA without further review or action by the RTA Board of Directors.

In 1999, the Illinois General Assembly passed additional bonding authorization, thereby increasing the RTA bond authority to $800 million outstanding effective January 1, 2000. It also increased SCIP bond issues by $260 million each year for five years from 2000 to 2006 for a total of $1.5 billion additional bond issues.

Proprietary Fund Type—Proprietary Funds are used to account for activities that are similar to those found in the private sector and to account for the financing of goods or services provided by a department or agency to other departments or agencies of the governmental unit, or to other governmental units on a cost-reimbursement basis. The RTA has one Proprietary Fund which relates to the activities of the Joint Self-Insurance Fund.

Joint Self-Insurance Fund—The Joint Self-Insurance Fund ("Fund") is used to account for the financing of claims incurred by the Service Boards and the RTA on a cost-reimbursement basis. The Fund is essentially a financing mechanism providing a source from which to borrow or to pay for the first $5 million of catastrophic losses and other claims incurred by the Service Boards and the RTA arising out of personal injuries, property damage, and certain other losses. This Fund is reported as an Enterprise Fund since the predominant participants are outside of the RTA.

Fiduciary Fund Type—Fiduciary Funds account for assets held by a governmental entity in a trustee capacity or as an agent for others. The RTA's Fiduciary Funds consist of one Agency (Sales Tax) Fund and a Pension Trust Fund.

Agency Fund—The Sales Tax Agency Fund records the receipt and disbursement of amounts due to the CTA, Metra and Pace, including Retailers' Occupation and Use Tax (sales taxes), interest on sales taxes, and reduced fare reimbursement grants. For RTA budgetary purposes, sales tax receipts are recorded in the Sales Tax Agency Fund and are equally offset by amounts recorded as disbursements reflecting the pass-through to the Service Boards.

Pension Trust Fund—The Pension Trust Fund is used to account for the accumulation of resources for, and payments of, retirement benefits to employees participating in the RTA Pension Plan.

Government-wide and Fund Financial Statements—The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the RTA in a manner similar to a private-sector business. The effect of interfund activities have been removed from these statements. Governmental activities which are supported by sales taxes and intergovernmental revenues are reported separately from the insurance activities. The insurance activities include interest charges for loans advanced for claims of the Service Boards. Likewise, the fiduciary fund type - RTA Pension Trust Fund and Sales Tax Agency Fund are presented separately and are not included in the government-wide financial statements of the RTA.

The statement of activities shows certain direct program expenses which are offset by program revenues. Governmental program activities include expenses such as financial assistance and capital asset funding (capital grants) to CTA, Metra, and Pace; administrative expenses; operating the RTA Travel Information Center, certifying riders for paratransit service under the Americans with Disabilities Act ("ADA") and other services (regional expenses); and payment of debt service on bonds issued by the RTA. Program revenues include operating grants and contributions that are restricted to meeting the operational requirements of a particular program (i.e., technology and non-technology programs). Sales taxes, Public Transportation Fund ("PTF"), state assistance ("ASA/AFA"), investment income and other items properly excluded from program revenues are reported instead as general revenues.

Fund level financial statements are provided for governmental funds, proprietary fund, and fiduciary funds.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation—The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund (Joint Self-Insurance Fund) and the Pension Trust Fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Sales taxes are recognized as revenues if collected by the retailers by year-end. Grants and similar items are recognized as revenues when qualifying expenditures have been incurred and as soon as all eligibility requirements imposed by the grantors have been met. Prepaid expenses are recorded using the consumption method.

The Joint Self-Insurance Fund distinguishes operating revenues and expenses from non-operating items. Operating revenues (interest charged to Service Boards) and expenses (administrative expenses including insurance premium and professional services) generally result from providing services in connection with the proprietary fund's ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The Sales Tax Agency Fund is custodial in nature (assets equal liabilities) and does not involve the measurement of results of operations.

Governmental fund financial statements use the current financial resources measurement focus. The funds are accounted for using the modified accrual basis of accounting; i.e., revenues are recognized as soon as they are both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or shortly thereafter to pay liabilities of the current period. Sales taxes are considered measurable and available if collected by the retailer by year-end and received by the RTA within 80 days after year-end. ASA/AFA is considered measurable and available if billed and received within 180 days after year-end. Sales taxes and ASA/AFA are susceptible to full accrual. Additionally, certain compensated absences and claims and judgments are recognized when the obligations are expected to be liquidated with expendable available financial resources.

The RTA reports three major governmental funds—General Fund, Debt Service Fund, and Capital Projects Fund; one major proprietary fund—Joint Self-Insurance Fund; and two fiduciary funds—Pension Trust Fund and Sales Tax Agency Fund.

Major funds are funds whose revenues, expenditures/expenses, assets, or liabilities (excluding extraordinary items) are at least 10 percent of corresponding totals for all governmental or enterprise funds and at least 5 percent of the aggregate amount for all governmental and enterprise funds.

Assets, Liabilities and Fund Equity

Cash and Investments—All excess General Fund cash is invested and earnings are credited to the General Fund for use in financing general RTA operations. Most investments are reported at fair value which is determined using various sources. Short-term investments are reported at cost, which approximates fair value due to their short-term nature. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

Intergovernmental Receivables—Receivables include amounts due from State and local governments for sales taxes, specific programs or projects, and services.

Capital Assets—The RTA sets a capitalization threshold of no less than $5,000 for any capital item(s). Capital assets are recorded at historical cost (or fair market value at the time of donation, if donated) and have a useful life of at least two years following the date of acquisition. Any acquisitions during the year are considered acquired at the beginning of that year for the purpose of computing depreciation. The RTA uses the straight-line method for computing depreciation expense. Leasehold improvements made to RTA's office facilities are capitalized, and their costs amortized during the life of the lease. Leasehold improvements and major equipment repairs, if any, are also capitalized during the remaining life of the lease or the extended useful life of the equipment. The Capital-Technology Program's capitalized assets are for projects in progress; therefore, the assets are non-depreciable.

Description	Useful Life
Furniture and equipment	5 years
Computer equipment and software	5 years
Leasehold improvements	Life of the lease

Restricted Assets—Bond proceeds and amounts set aside for general obligation debt service are classified as restricted assets since their use is limited by the bond indentures. When both restricted and unrestricted resources are available for use, it is RTA's policy to use restricted resources first, then unrestricted resources as needed.

Compensated Absences—Compensation for holidays, illness, and other qualifying absences is not accrued in the accompanying financial statements because rights to such compensation amounts either do not accumulate or they do not vest. The RTA accounts for compensated absences under GASB No. 16, entitled "Accounting for Compensated Absences", whereby the applicable salary-related employer obligations are accrued in addition to the compensated absences liability. Compensated absences are recorded in the General Fund only if they have matured (i.e., unused leave still outstanding at time of an employee's resignation or retirement). Compensated absences are recorded in the governmental activities as current liabilities. The RTA's policy is compensated absences have to be used by the end of the following fiscal year.

Intergovernmental Payables—These amounts include accrued financial assistance, sales taxes, capital and other grants due to the Service Boards.

Fund Balances—Portions of the fund balances of the Governmental Funds are reserved by the RTA for specific purposes as follows:

Reserved for Service Boards Capital Projects represents the portion of the fund balance to provide the local share of Federal and State funded capital projects and to fund 100% of those projects not funded by another source. It also includes the remaining bond proceeds, investment income committed for capital projects of the Service Boards, and any interest rate swap proceeds for capital projects of the Service Boards.

Reserved for Debt Service represents the portion of the fund balance of RTA resources legally restricted for the payment of long-term debt principal and interest amounts maturing within the next year.

Reserved for RTA Capital Projects represents the portion of the RTA fund balance for the unspent portion of capital authorized by the RTA's current and prior years' budgets and the portion of the interest rate swap proceeds for RTA funded capital projects.

Revenues—The RTA has four principal sources of revenue: (1) retailer's occupation taxes, service occupation taxes, and use taxes (collectively, RTA Sales Tax); (2) funds appropriated to the RTA by statute through the PTF established under the Act; (3) State or Federal grants, or any other such funds, which the RTA is authorized to apply for and receive under the Act; and (4) investment income on unexpended funds held by the RTA, and other miscellaneous revenue.

Sales Tax—Prior to 2008, the RTA Sales Tax consisted of (i) in Cook County, (a) a tax of 1 % of the gross receipts from sales of drugs, certain medical supplies and food prepared for consumption off the premises (other than for immediate consumption) imposed on all persons selling tangible personal property at retail (a Food and Drug Tax) and (b) a tax of 0.75% of the gross receipts from all other taxable retail sales; (ii) in counties within Northeastern Illinois other than Cook County, a tax of 0.25% of the gross receipts from all taxable retail sales (together with (i) (b), a General Sales Tax); and (iii) a tax of 1% on the use in Cook County, and 0.25% on the use in Northeastern Illinois other than Cook County of tangible personal property purchased from a retailer outside Northeastern Illinois and titled or registered with a State agency by a person with a Northeastern Illinois address (a Use Tax); and (iv) a tax imposed in the same locations and at the same rates as the Food and Drug Tax and the General Sales Tax on persons engaged in a sale of service pursuant to which property in the form of tangible personal property or in the form of real estate is transferred incident to a sale of a service (a Service Occupation Tax).

The taxes described in (i) and (ii) above are also imposed on persons engaged in making sales of services pursuant to which tangible personal property or real estate (as incident to a sale of a service) is transferred (with respect to the taxes in (i) and (ii), a Service Occupation Tax).

The RTA Sales Tax is collected by the Illinois Department of Revenue (the "Department of Revenue"), and paid to the Treasurer of the State to be held in trust for the RTA outside the State Treasury. Proceeds from the RTA Sales Tax are payable monthly directly to the RTA, without appropriation, by the State Treasurer on the order of the State Comptroller.

Also, proceeds from certain sales taxes imposed by the State are allocated to the RTA as part of the restructuring of the State and local sales taxes in Illinois. Until January 1, 1990, the State General Sales Tax, State Use Tax, and State Service Occupation Tax portions of the RTA Sales Tax were imposed at a rate of 1% in Cook County. Effective January 1, 1990, as a result of legislation (the Sales Tax Reform Act) aimed at simplifying the base and rate structure of taxes imposed by the State and its local governments, including the RTA, the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax were increased from 5% to 6.25% and any corresponding portions of the RTA Sales Tax in Cook County were reduced from 1% to 0.75%. In order to avoid a revenue loss to the RTA because of the reduction in this portion of the RTA Sales Tax, the Sales Tax Reform Act directed that portions of the receipts from the State General Sales Tax, State Use Tax, State Service Occupation Tax, and State Service Use Tax be paid to the RTA annually.

Specifically, 4% of the net monthly revenue from the 6.25% State General Sales Tax and State Service Occupation Tax and 4% of the net monthly revenue from the State Use Tax on personal property purchased at retail outside the State, but registered or titled with a State agency within the State (i.e., 0.25% of total) is transferred into the County and Mass Transit District Fund in the State Treasury (the "CMTD Fund"). The amount in the CMTD Fund attributable to taxable sales occurring in Cook County or to property registered or titled in Cook County is then transferred into the RTA Occupation and Use Tax Replacement Fund in the State Treasury (the "Replacement Fund"). In addition, (i) the net monthly revenue from the State Use Tax and State Service Use Tax portions of the 1% State Food and Drug Tax, and (ii) 20% of the net monthly revenue of the 6.25% State Use Tax and State Service Use Tax (i.e., 1.25% of total), other than revenues of such taxes attributable to personal property purchased at retail outside the State but registered or titled with a State agency within the State, are deposited in the State and Local Sales Tax Reform Fund (the "Reform Fund"). Of the money paid into the Reform Fund, 10% is transferred into the Replacement Fund.

The Act provides that the RTA withhold 15% of these tax revenues generated and that these revenues are deposited into the RTA's General Fund. The RTA is required to pass on to the Service Boards, pursuant to statutory formula, an amount equal to the remainder of such tax revenues. The remaining 85% of sales tax is allocated to the Service Boards as follows:

Service Board	Collected Within Chicago	Collected within Cook County Outside Chicago	Collected in DuPage, Kane, Lake McHenry and Will Counties
CTA	100 %	30 %	
Metra		55 %	70 %
Pace		15 %	30 %

The RTA recognizes as a receivable and revenue in the General Fund only the 15% of this portion of the total sales taxes collected to which it is entitled by the amended Act. The remaining 85% of this portion of the sales tax is recorded in the Agency Fund. The criteria applied for recognition of the receivable and related revenue are that the amounts are "measurable and available" for the RTA to meet its current obligations.

In January 2008, Illinois Public Act 95-0708 increased the RTA sales tax rate throughout the region, increased the real estate transfer tax (RETT) in the City of Chicago, and raised the rate at which RTA sales tax revenues are matched by PTF. The RTA sales tax rate was increased 0.25% in Cook County and 0.50% in the Collar Counties effective April 1, 2008. Proceeds of the sales tax increase in the Collar Counties are divided evenly between the RTA and the county where the tax is collected. Effective April 1, 2008, the real estate transfer tax (RETT) in the City of Chicago was increased 0.3% (i.e. for every $500 in sales price $1.50 in tax is collected).

Public Transportation Fund—In accordance with the Act, the State Treasurer is authorized and required to transfer from the State's General Revenue Fund to a special fund in the State Treasury designated the "Public Transportation Fund," an amount equal to 30% of net revenues realized from sales taxes (or, as the case may be, gasoline or parking taxes) and RETT. These amounts may be paid to the RTA only upon State appropriation. The State has approved an appropriation from the PTF through its 2011 fiscal year which will end June 30, 2012.

In February 2008, the PTF match of the pre-2008 RTA sales tax increased from 25% to 30%. In April 2008, the 5% PTF match was applied to the RETT and the RTA portion of the sales tax increase. In January 2009, the PTF match of both the RETT and the RTA portion of the sales tax increase rose from 5% to 30%.

While the RETT and the 25% PTF match of RETT funds only the CTA, the largest part of P.A. 95-0708 revenue provides funding for CTA, Metra, Pace and ADA Paratransit operations, as well as for regional innovation, coordination and enhancement (ICE) and suburban community mobility (SCMF) initiatives. Funds for ADA Paratransit, ICE and SCMF are by statute set aside before distributions to the CTA, Metra and Pace.

None of the revenues from the PTF are payable to the RTA unless and until the RTA certifies to the Governor, State Comptroller, and Mayor of the City of Chicago that it has adopted a budget and financial plan as called for by the Act. This certification has been submitted.

The amounts allocable to each of the Service Boards from funding received by the RTA from a portion of the State's PTF are allocated at the discretion of the RTA Board in connection with the review and approval of the annual and revised budgets of each Service Board. This portion corresponds to 25% of the pre-2008 sales tax receipts. The remaining portion of the State's PTF is combined with the sales tax resulting from the 2008 rate increase and allocated by statute first to the ADA Paratransit Fund, ICE Fund, and SCMF, with the remainder distributed 48% to the CTA, 39% to Metra, an 13% to Pace.

The allocable amounts of such funds are payable as soon as may be practicable upon their receipt, provided that the RTA has adopted a budget pursuant to Section 4.01 of the Act, and the Service Board that is to receive such funds is in compliance with the budget requirement imposed upon the Service Board pursuant to Section 4.11 of the Act.

Reduced Fare Reimbursement—In the State's fiscal year 2011, which ends June 30, 2011, the Illinois General Assembly appropriated funds for a program under which the Illinois Department of Transportation ("IDOT") is authorized to provide to the RTA a reduced fare reimbursement grant for the purpose of reimbursing the Service Boards for a portion of actual revenue losses attributable to reduced fares for students, people with disabilities, and the elderly. For the State fiscal years ended June 30, 2010 and June 30, 2011, the grants were in the amount of $42 million and $33.6 million, respectively.

Additional State Assistance/Additional Financial Assistance—The State has authorized Additional State Assistance ("ASA") which is supplemental financing for the RTA's Strategic Capital Improvement Program ("SCIP") bonds. The ASA available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds plus any debt service savings from the issuance of refunding or advance refunding SCIP bonds, less interest earned on the unspent bond proceeds, or (ii) $55 million per year. The RTA recognized $39.7 million of ASA in 2010.

Beginning with the State's fiscal year 2001, the State has also authorized Additional Financial Assistance ("AFA") to pay for debt service requirements for SCIP bonds authorized under the Illinois First Program. The amount available to the RTA during the State's July through June fiscal year is limited to the lesser of (i) the actual debt service payable during such year on any outstanding SCIP bonds less interest earned on those bond proceeds, or (ii) $100 million in the State's fiscal years 2010 and 2011, per year. The RTA recognized $90 million of AFA in 2010.

Expenditures and Expenses—Operating grants consist of financial assistance to the Service Boards. The RTA provides operating assistance to the Service Boards to fund, in part, their RTA-approved budgets.

Capital grants consist of the RTA local match of Federal Transit Administration ("FTA") and IDOT-funded capital projects, 100% RTA-funded projects and capital projects funded by RTA, SCIP bonds, and investment income on bonds. Capital payments of approximately $10 million for sales tax funding are due to Metra based on a statutory formula. This formula consists of the budgeted sales tax revenues in excess of Metra's budgeted operating deficit. This amount is presented in the Sales Tax Agency Fund.

Administration consists of those costs of the RTA incurred to carry out its administrative activities. These costs were limited by statute to $16,931,639 for the year ended December 31, 2010.

Non-administration, listed as regional and technology program expenses in the statement of activities, consists of those costs of the RTA which are exempt from the statutory limit defined in the RTA Act. These costs include the operation of the Travel Information Center, Transit Check Program, Americans with Disabilities Act ("ADA"), reduced fare registration, capital development and other program costs incurred on behalf of the Service Boards and not for the benefit of RTA itself.

Cash Flows—For purposes of the statement of cash flows, the RTA considers all short-term securities with original maturities of three months or less to be cash equivalents. Cash and cash equivalents aggregated $10.5 million at December 31, 2010 and are included in cash and cash equivalents under business-type activities on the accompanying statement of net assets. The remaining $5.6 million constitutes investments in the Joint Self-Insurance Fund with original maturities in excess of three months.

Management's Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Accounting Pronouncements—In September 1993, the GASB released Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that use Proprietary Fund Accounting.* The statement provides that proprietary funds may apply all GASB pronouncements, as well as the following pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements: Statements and Interpretations of the Financial Accounting Standards Board ("FASB"), Accounting Principles Board ("APB") Opinions and Accounting Research Bulletins ("ARBs") of the Committee on Accounting Procedure. The RTA has elected to apply only FASB, APB and ARB statements and interpretations issued on or before November 30, 1989.

Interfund Transactions—The governmental fund's balance sheet reports all outstanding balances between funds, as "due to/from other funds." The government-wide financial statements report any residual balances outstanding between the governmental activities and business-type activities as "internal balances." Government-wide financial statements and the Statement of Fiduciary Net Assets report a "due to/from general fund" outstanding for pension contributions.

New Accounting Pronouncements—Statement No. 53, *Accounting and Financial Reporting for Derivatives,* addresses the recognition, measurement, and disclosure of information regarding derivative instruments entered into by state and local governments. Derivative instruments are often complex financial arrangements used by governments to manage specific risks or to make investments. The Authority implemented this Statement in the current fiscal year (see Note 4 for more information).

Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions,* was issued to enhance the usefulness of fund balance information by providing clearer fund balance classifications and by clarifying the existing fund type definitions. This Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed on the use of the resources reported in governmental funds. The Authority is required to implement this Statement for the fiscal year ending December 31, 2011.

Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*, was issued to update standards related to the use of the alternative measurement method and the frequency and timing of measurements by employers that participate in agent multiple-employer other postemployment benefit (OPEB) plans. This Statement amends Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, to permit an agent employer that has an individual-employer OPEB plan with fewer than 100 total plan members to use the alternative measurement method, at its option, regardless of the number of total plan members in the agent multiple-employer OPEB plan in which it participates. The Authority is required to implement this Statement for the year ending December 31, 2012.

Statement No. 59, *Financial Instruments Omnibus*, was issued to update and improve existing standards regarding financial reporting and disclosure requirements of certain financial instruments and external investment pools for which significant issues have been identified in practice. The requirements of this Statement will improve financial reporting by providing more complex information by improving consistency of measurements and by providing clarifications of existing standards. The Authority is required to implement this Statement for the fiscal year ending December 31, 2011.

Statement No. 61, *The Financial Reporting Omnibus, An Amendment of GASB Statements No. 14 and No. 34*, was issued to improve financial reporting for a governmental financial reporting entity. The requirements of Statement No. 14, *The Financial Reporting Entity* and the related financial reporting requirements of Statement No. 34, *Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments*, were amended to better meet user needs and to address reporting entity issues that have arisen since the issuance of those Statements. This Statement modifies certain requirements for inclusion of component units in the financial reporting entity. For organizations that previously were required to be included as component units by meeting the fiscal dependency criterion, a financial benefit or burden relationship also would need to be present between the primary government and that organization for it to be included in the reporting entity as a component unit. Further, for organizations that do not meet the financial accountability criteria for inclusion as component units but that, nevertheless, should be included because the primary government's management determines that it would be misleading to exclude them, this Statement clarifies the manner in which that determination should be made and the types of relationships that generally should be considered in making the determination. The Authority is required to implement this Statement for the year ending December 31, 2013.

Statement No. 62, *Codification of Accounting and Financial Reporting Guidance contained in pre-November 1989 FASB and AICPA Pronouncements*, was established to incorporate into the GASB's authoritative literature certain accounting and financial reporting guidance that is included in certain FASB and AICPA pronouncements issued on or before November 30, 1989, which does not conflict with or contradict GASB pronouncements. The Authority is required to implement this Statement for the year ending December 31, 2013.

Management has not currently determined what impact, if any, these Statements may have on its financial statements.

Reclassifications: Certain amounts previously reported in the 2009 financial statements have been reclassified to conform to the current year presentation.

***Subsequent Events*:** The Authority has evaluated subsequent events for potential recognition and/or disclosure through June 29, 2011, the date the financial statements were available to be issued.

NOTE 3. BUDGETARY INFORMATION

Excess of Expenditures over Appropriations

For the year ended December 31, 2010, expenditures and transfers exceeded appropriations in the General Fund as follows:

Budget	Actual	Variance
$ 387,876,000	$ 463,973,000	$ (76,097,000)

NOTE 4. CASH AND INVESTMENTS

Governmental and Joint Self-Insurance Fund Investments

Cash and investments in the statement of net assets may be restricted by bond covenants or through action of the RTA board as to their use. Unrestricted cash and investments may be used for any purpose.

Deposits and Investments—Section 2.20(a)(ii) of the RTA Act authorizes the RTA to invest any funds or monies not required for immediate use or disbursement. The applicable statutory provisions governing the investment of public funds are found in 30 ILCS 235/0.01, et seq.

The RTA investment policy is in accordance with the Illinois statutes and allows the RTA to invest in:

- Certain obligations of the U.S. Government and its agencies.
- Interest-bearing certificates of deposit, interest-bearing time deposits or any other investments constituting direct obligations of any FDIC insured bank as defined by the Illinois Banking Act.
- Short-term obligations of corporations organized in the United States with assets exceeding $500 million and rated within the highest classification established by at least two standard rating services.
- Certain money market mutual funds.
- The Illinois Funds.
- Repurchase agreements.

Custodial Credit Risk — Custodial credit risk is the risk that in the event of a bank failure, the RTA's deposits may not be returned to it. The RTA's policy for custodial credit risk states collateral will be valued at market value (excluding accrued interest) on the trade date. Collateral required will be 100% of the investment or such greater percentage as may be appropriate based upon the financial stability of the institution and the term of the collateral (i.e., maturity), less any insurance provided by the Federal Deposit Insurance Corporation (FDIC).

Investments

Interest Rate Risk — To mitigate losses caused by changing interest rates, the maturities of the RTA's investments is limited. Per the RTA's investment policy, investments in corporations are limited to maturities of 180 days or less. Other investment maturities can not exceed three years.

As of December 31, 2010, the RTA's investments were as follows:

Investment Type	Fair Value
Commercial paper	$ 98,983,184
Money market & fixed-income securities	313,404,056
Illinois Funds	64,452,096
Money market fund	8,750,256
Fixed Income securities	9,994,567
U.S. Agency securities	37,511,221
Total	$ 533,095,379

The weighted average maturity of the above investments is less than 90 days, for each investment type.

Credit Risk — The RTA's policy for credit risk states no investment shall be made in short-term obligations of corporations unless such obligations are rated at the time of purchase within the highest classification established by at least two standard rating services, the investment matures no later than 180 days from the date of purchase and the issuer is domiciled in the United States.

As of December 31, 2010, the RTA's investments were as follows:

Investment Type	Fair Value	Credit Rating Moody's	Credit Rating Standard & Poor's	Credit Rating Fitch
Commercial paper	$ 98,983,184	P-1	A-1	F1
Money market & fixed-income securities	313,404,056	Aaa	AAAm	*
Illinois Funds	64,452,096	*	AAAm	*
Money market fund	8,750,256	Aaa	AAAm	AAA
Fixed Income securities	9,994,567	Aaa	AAAm	*
U.S. Agency securities	37,511,221	Aaa	AAA	AAA
Total	$ 533,095,379			

* Rating not available

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. Except for commercial paper, the RTA's investment policy does not specifically address a limitation of investments in a single issuer; instead the policy addresses credit risk using broad categories of investments. The RTA's policy states the maximum percentage of the portfolio invested in commercial paper should not exceed 33.3%, money market mutual funds should not exceed 20.0%, U.S. Government Agency obligations should not exceed 20.0%, The Illinois Funds should not exceed 20% and Repurchase Agreements should not exceed 50.0%.

The RTA has investments in the following issuers that exceed 5% of the total investments:

In the Governmental fund, there is no single investment that exceeds 5% of the total investments.

Joint Self-Insurance Fund Investment	Amount	% of Portfolio
ABN AMRO Funding (Commercial Paper)	$ 2,999,948	30%
Ciesco (Commercial Paper)	999,899	10%
Concord Minuteman (Commercial Paper)	999,863	10%

The RTA's investments in money market funds are for liquidity and offer an alternative to other investment vehicles. Management has reviewed the investments in the money market funds and has determined that the types of investments included in the money market funds are consistent with the RTA's investment policy. These funds consist of U.S. Treasury Securities and Agencies.

The Illinois Funds investment pool is managed by the Treasurer of the State of Illinois and is not registered with the SEC. The Illinois Funds targets maintaining a $1 per share net asset value (NAV) at all times. The fair market of the investment pool is equal to the number of pool shares owned.

Derivative Instruments

The fair value balances and notional amounts of derivative instruments outstanding at December 31, 2010, classified by type, and the changes in fair value of such derivative instruments for the year then ended as reported in the 2010 financial statements are as follows (debit (credit)):

	Changes in Fair Value		December 31, 2010		
	Classification	Amount	Classification	Amount	Notional
Governmental activities					
Fair value hedges:					
Receive-fixed interest rate swap	Deferred inflow	$ 1,432,434	Debt	$ 11,425,734	$ 93,305,000
Receive-fixed interest rate swap	Deferred inflow	3,185,108	Debt	9,417,656	99,684,000
Receive-fixed interest rate swap	Deferred inflow	4,306,914	Debt	14,126,484	149,526,000
Cash flow hedge:					
Pay-fixed interest rate swap	Deferred outflow	(3,107,284)	Debt	(25,981,297)	126,445,000
Investment derivatives:					
Basis swap	Investment revenue	(3,486,980)	Investment	(2,754,543)	188,771,500
Basis swap	Investment revenue	(3,324,007)	Investment	(2,748,472)	188,771,500
Basis swap	Investment revenue	(1,379,408)	Investment	(1,081,757)	52,000,000

Objective, Terms, Fair Value and Accounting of Derivative Instruments

The RTA engaged an independent pricing service with no vested interest in the interest rate swap transactions to perform the valuations, the required tests, and evaluation of all the swaps for compliance with GASB 53. The fair values take into consideration the prevailing interest rate environment and the specific terms and conditions of each swap. All fair values were estimated using the zero-coupon discounting method. This method calculates the future payments required by the swap, assuming that the current forward rates implied by the yield curve are the market's best estimate of future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for a hypothetical zero-coupon rate bond due on the date of each future net settlement payment on the swaps.

The table below displays the objectives, terms, and fair values of the RTA's derivative instruments outstanding as of December 31, 2010, along with the counterparties and their credit ratings.

Type of Swap	Objective	RTA Pays	RTA Receives	Effective Date	Maturity Date	Current Notional	Counterparty	Ratings	Fair Value
Receive-fixed	Hedge of fair value changes in the Series 1990 A, 1994 B, and 1994 D bonds	SIFMA Swap Index	4.30200%	11/20/2001	06/01/2020	$93,305,000	UBS AG	Aa3/A+/A+	$ 11,425,734
Pay-fixed	Hedge of changes in cash flows on the Series 2005 B bonds	4.95200%	70% of USD-LIBI	06/01/2005	06/01/2025	$126,445,000	JPMorgan Chase Bank, N.A	Aa1/AA-/AA-	$ (25,981,297)
Basis	Reduce interest expense (investment instrument under GASB 53)	SIFMA Swap Index	78.25% of USD-LIBOR (One Month)	08/11/2003	06/01/2024	$188,771,500	Merrill Lynch Capital Services, Inc. (Bank of America)	A2/A/A+	$ (2,754,543)
Basis	Reduce interest expense (investment instrument under GASB 53)	SIFMA Swap Index	78.25% of USD-LIBOR (One Month)	08/11/2003	06/01/2024	$188,771,500	UBS AG	Aa3/A+/A+	$ (2,748,472)
Basis	Reduce interest expense (investment instrument under GASB 53)	SIFMA Swap Index	79% of USD-LIBOR (One Month)	03/29/2005	07/01/2023	$52,000,000	JPMorgan Chase Bank, N.A	Aa1/AA-/AA-	$ (1,081,757)
Receive-fixed	Hedge of fair value changes in the Series 2000 A and 2006 A	SIFMA Swap Index	4.36700%	06/11/2007	07/01/2030 Put Option 7/01/16	$99,684,000	JPMorgan Chase Bank, N.A	Aa1/AA-/AA-	$ 9,417,656
Receive-fixed	Hedge of fair value changes in the Series 2000 A and 2006 A	SIFMA Swap Index	4.36700%	06/11/2007	07/01/2030 Put Option 7/01/16	$149,526,000	Goldman Sachs Bank USA	Aa3/A/A+	$ 14,126,484

The receive-fixed swap transactions are associated with fixed rate debt. Combining a receive-fixed pay-variable rate swap with fixed rate debt results in what is termed "synthetic" variable-rate debt. It is called synthetic because the economics are similar to floating-rate debt, but an additional instrument is involved unlike traditional floating-rate debt. When the RTA created synthetic floating-rate debt, it had very little unhedged variable-rate exposure in its overall debt profile. A comparison and determination was made that the terms and costs of issuing traditional floating-rate debt, which would involve ongoing liquidity, credit, and maintenance fees, would have been higher and involved greater risk than by creating synthetic variable-rate debt through the receive-fixed swap.

The three swaps where the RTA receives a fixed rate and pays a floating rate are considered fair value hedges. They all qualify for hedge accounting under GASB 53, therefore all cumulative changes in fair value as of December 31, 2010, which were all assets, were offset by a corresponding deferred inflow liability on the statement of net assets.

The one swap where the RTA pays a fixed rate and receives a floating rate is considered a cash flow hedge. The swap exceeds the underlying $125.9 mm bond principal by approximately $0.5 mm of notional. This pay-

fixed swap transaction is associated with variable debt. Combining a pay-fixed/receive-variable rate swap with variable debt results in what is termed "synthetic" fixed-rate debt. It is called synthetic because the economics are similar to fixed-rate debt, but an additional instrument is involved unlike traditional fixed-rate debt. When the RTA created synthetic fixed-rate debt, a comparison and determination was made that the fixed rate on traditional debt would have been higher than the all-in fixed rate on the swap, inclusive of credit support costs for the underlying variable-rate demand bonds. The RTA received a payment of $11.7 million when the swap agreement was entered into.

The three swaps where the RTA pays and receives floating rates, basis swaps, are deemed investment instruments under GASB 53 and are accounted for as investment instruments.

Tthere are three main strategies the RTA pursues with respect to each transaction. Each swap can achieve one or more of these strategies. Then as a result of execution of the derivative, its value will change with respect to how prevailing rates in each reporting period compare to when the derivative was put in place. The accumulated changes in fair value, or total fair value of all the derivatives are a function of how prevailing interest rates and other market factors affect each transaction at each reporting period. Pursuant to GASB 53, each swap transaction is then evaluated to determine what type of accounting treatment to apply.

(i) Mitigate the effect of fluctuations in variable interest rates. This is the primary function of the swap. The RTA pays a fixed rate, and receives a floating rate. In an interest rate environment whose level is generally higher than the rate at which the RTA is fixed, the swap would result in a positive value to the RTA. Correspondingly, a lower rate environment than the fixed rate would result in a negative value to the RTA. The value primarily depends on the overall level of interest rates on the reporting date compared to what the RTA pays. The overall level of long-term interest rates from period to period is the primary driver of changes in value recorded from the investment derivatives where the RTA pays fixed and receives a floating rate. Interest rates have trended lower since inception of the pay-fixed swap, therefore, the mark-to-market value is generally more negative to the RTA.

(ii) Reduce interest expense from expected benefit resulting from the difference between tax-exempt and taxable rates. This is a function of the swap where the RTA receives a percentage of 1-Month LIBOR when hedging tax-exempt variable debt, with the expectation of receiving an ongoing net benefit from paying a lower fixed rate at the time of putting on the swap transaction. The historical average ratio of 1-Month LIBOR (short-term taxable rates) versus tax-exempt rates, a direct function of tax rates, is approximately 70%, but the ratio of long-term taxable rates and long-term tax-exempt rates is normally significantly higher than the percentage received by the RTA on the fixed-rate swap. Therefore, the fixed rate payable in exchange for a smaller percentage of LIBOR plus applicable spread will be significantly less than a long-term tax-exempt fixed rate. This reduction in fixed rate is the value of the benefit, the risk being tax rates change over the life of the percentage of LIBOR swap, or the variable rates on the RTA's hedged bonds do not closely match the percentage of LIBOR variable rate on the swap. The value of such a swap is determined by the prevailing level of taxable interest rates, with no reference to tax-exempt interest rates.

For the three basis swaps, the RTA receives 78.25% and 79% of 1-Month LIBOR which is significantly higher than the historical average ratio of 70% stated above. This additional receipt to the RTA is the expected benefit and reduction to interest expense for the life of the basis swap transaction. The value of such a swap is determined by the prevailing level of taxable interest rates received versus the level of tax-exempt interest rates paid.

(iii) Converting a portion of fixed-rate debt to variable in an environment of higher long term fixed rates and lower variable interest rates, with no ongoing liquidity fees. This is the function of the swaps where the RTA receives fixed and pays the SIFMA Swap Index. The cancellation option in the two swaps mirror the RTA's call option on the underlying bonds. Including this option in the receive-fixed swap increased the fixed-rate receivable to the RTA. If either counterparty exercises their option and cancels the swap, interest rates will likely have declined, also allowing the RTA to refund the underlying fixed rate bonds for savings. The value of each swap is determined by the prevailing level of interest rates, and if applicable, the value of the cancellation option which is an asset to the counterparty. Interest rates have trended lower since inception of the receive-fixed swaps, therefore, the mark-to-market value is generally more positive to the RTA.

Risks

Credit risk. This is the risk that the counterparty fails to perform according to its contractual obligations. The appropriate measurement of this risk at the reporting date is the sum fair value of swaps netting, or aggregating under a contract between the RTA and each counterparty. The RTA would be exposed to credit risk on derivative instruments under a netting agreement that would sum to an asset position. As of December 31, 2010, the RTA has credit risk exposure to Goldman Sachs Bank USA and UBS AG. This is because the transactions associated with each counterparty net to a positive fair value, meaning the RTA is exposed to the counterparty in the amount of the derivative contracts' fair values. However, should interest rates change and the fair values become negative, the RTA would not be exposed to credit risk.

The RTA has no credit risk exposure on the rest of the swap contracts because the swaps under each netting agreement with each counterparty have negative fair values, meaning the counterparties are exposed to the RTA in the amount of the derivatives' fair values. However, should interest rates change and the fair values of the swaps become positive, the RTA would be exposed to credit risk.

The swap agreements contain varying collateral agreements with the counterparties. The swaps require collateralization of the fair value of the swap should the counterparty's credit rating fall below the applicable thresholds.

Interest rate risk. The RTA is exposed to interest rate risk on its interest rate swaps. On the receive fix/pay variable, as interest rates increase, the risk increases. On pay fix/receive variable, as interest rates decrease, the risk increases.

Basis risk. Basis risk is the risk that the interest rate paid by the RTA on underlying variable rate bonds to bondholders differs from the variable swap rate received from the applicable counterparty. The RTA bears basis risk on its fixed rate swap. The swap has basis risk since the RTA receives a percentage of LIBOR to offset the actual variable bond rate the RTA pays on its bonds. The RTA is exposed to basis risk should the floating rate that it receives on a swap be less than the actual variable rate the RTA pays on the bonds. Depending on the magnitude and duration of any basis risk shortfall, the expected cost savings from the swap may not be realized.

Termination risk. The RTA or the counterparty may terminate any of the swaps if the other party fails to perform under the terms of the respective contracts. If the fixed-rate swap is terminated, the associated variable-rate bonds would no longer be hedged to a fixed rate. If at the time of termination the swaps have a negative fair value, the RTA would be liable to the counterparty for a payment equal to the swap's fair value.

Hedging derivative instrument payments and hedged debt. As of December 31, 2010, aggregate debt service requirements of the RTA's debt (fixed rate and variable rate) and net receipts/payments on associated hedging derivative instruments are as follows. These amounts assume that current interest rates on variable-rate bonds and the current reference rates of hedging derivative instruments will remain the same for their term. As these rates vary, interest payments on variable-rate bonds and net receipts/payments on the hedging derivative instruments will vary.

Year Ending December 31,	Principal	Interest	Hedging Derivatives, Net	Total
2011	$ 7,210	$ 1,712	$ (5,856)	$ 3,066
2012	7,590	1,609	(5,532)	3,667
2013	7,960	1,500	(5,118)	4,342
2014	8,425	1,385	(4,728)	5,082
2015	3,910	1,299	(4,447)	762
2016-2020	23,650	5,922	(20,265)	9,307
2021-2025	67,175	2,286	(7,836)	61,625
Total	$ 125,920	$ 15,713	$ (53,782)	$ 87,851

Pension Fund Investments

Cash and investments in the Pension Fund provide sufficient funds to meet the obligations promised to the current and future beneficiaries of RTA's defined benefit pension plan.

Risk Posture **-** The RTA evaluated the assets and liabilities of the Pension Plan in order to determine an asset allocation that provides a high likelihood of achieving the responsibilities noted above. The obligations of current and future beneficiaries were evaluated under various market scenarios to develop an allocation that can be expected to generate a solid rate of return without incurring undue risk. In general, the risk posture of the Pension Plan is such that the portfolio is structured to maintain funding requirements and modestly grow assets through a low to moderate level of risk.

Custodial Credit Risk – Custodial credit risk is the risk that in the event of a bank failure, the RTA's pension deposits may not be returned to it. The RTA's Pension Plan policy does not explicitly indicate custodial credit risk. As of December 31, 2010, none of the Plan's cash and investments was at risk.

Interest Rate Risk — Per the RTA's Pension Plan investment policy, the duration of the fixed income portfolio should be within 20% of the duration of the benchmark index.

As of December 31, 2010, the RTA's pension investments were as follows:

Investment Type	Fair Value	Weighted Average Maturity (Months)
Corporate fixed income mutual fund	$ 36,948,820	54
Money market fund	12,266,185	1
Total fair value	$ 49,215,005	
Portfolio weighted average maturity		53

Credit Risk — The RTA's pension policy for credit risk states at least 85% of the fixed income investments should be limited to securities with ratings of at least investment grade as defined by both Moody's and Standard & Poor's. Split rated bonds are to be governed by the lower rating. Unrated securities of the U.S. Treasury and government agencies are a permissible investment. No more than 15% of the portfolio may be invested in investment-grade securities of foreign entities domiciled in countries included in the Salomon Brothers World Government Bond Index.

As of December 31, 2010, the credit ratings for RTA pension investments were as follows:

		Credit Rating (where available)		
Investment Type	Total Fair Value	Moody's	Standard & Poor's	Fitch
Corporate fixed income mutual fund	$ 36,948,820	NR	NR	NR
Money market fund	12,266,185	Aa2	*	AA
Total	$ 49,215,005			

* Not available

NR - not rated

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The RTA's pension investment policy states that fixed income securities of a single issuer (excluding obligations of the United States Government and its agencies) should be limited to 5% of the fixed income portfolio, measured at market value. The RTA's pension policy states the asset allocation policy has been developed based on the objectives and characteristics of the pension liabilities, capital market expectations, and asset-liability projections. This policy is long-term oriented and consistent with the risk posture. The pension fund did not have any investments in a single issuer which were greater than 5% of the total plan's net assets.

NOTE 5. INTERGOVERNMENTAL RECEIVABLES AND PAYABLES

The intergovernmental receivables and payables in the statement of net assets comprise the following:

Receivable	**Amount**
General Fund:	
Sales taxes	$ 28,245,086
ICE	449,611
State assistance (ASA & AFA)	108,161,447
Local Match Receivable (CTA)	1,119,206
PTF	98,293,593
MOA-Pace	4,250,000
Illinois Department of Transportation (IDOT) grants and others	424,316
Total Intergovernmental Receivables	$ 240,943,259
Payable	
General Fund:	
Financial assistance	$ 59,351,945
State bond payable	4,250,000
Capital assistance	94,497
CTA Operating Assistance (ADA)	2,368,289
Total General Fund	66,064,731
Capital Projects Fund:	
Capital grants, (CTA, METRA, PACE)	9,466,465
Total Intergovernmental Payables	$ 75,531,196

NOTE 6. DUE TO/FROM OTHER FUNDS

Various transactions result in "due to/from other funds" balances. In most cases, the General Fund advances payments on behalf of other funds.

The General Fund makes monthly transfers to the Debt Service Fund and occasionally makes transfers to the Joint Self-Insurance Fund. The General Fund owes the Pension Trust Fund for its share of contributions during the period. Cash receipts and payments on behalf of the Sales Tax Agency Fund originate in the General Fund.

On December 31, 2010, the amounts due to/from other funds presented in the Governmental Funds Balance Sheet, the Joint Self-Insurance Fund Statement of Net Assets, and the Fiduciary Funds Statement of Fiduciary Net Assets are as follows:

Receivable Fund	Payable Fund	Amount
General	Pension	$ 21,000
General	Joint Self-Insurance	64,305
Pension Trust	General	1,276,000
Debt Service	General	281,112,924
Capital Projects	Capital Projects	6,933,000

NOTE 7. INTERFUND TRANSFERS

Various transactions result in "transfer in/out" balances from funds. Transfer in/out balances presented on the Governmental Fund's Statement of Revenues, Expenditures and Changes in Fund Balances and the Business Type Activities Fund's Statement of Revenues, Expenses and Changes in Net Assets are as follows:

Transfer Out Fund	Transfer In Fund	Amount
General	Debt Service	$ 212,748,782
Capital Projects	Debt Service	15,316,114
General	Joint Self-Insurance	4,425,379

The purpose of Interfund transfers from the General Fund to Debt Service is to satisfy the RTA's obligations to bondholders for principal and interest. The purpose of the Interfund transfer from the General Fund to the Joint Self-Insurance Fund is to make a capital contribution to the fund to purchase insurance.

NOTE 8. ADVANCES TO SERVICE BOARDS

The Illinois Department of Revenue ("IDOR") sends a "13th month" sales tax advance to compensate for the delayed processing of sales tax payments to the RTA. Each year, IDOR calculates the amount and the RTA verifies that calculation. The allocations to the Service Boards are set forth below:

CTA	$ 30,820,742
Metra	27,034,224
Pace	8,529,377
Total Service Board Advances	$ 66,384,344

Sales tax advances have also been reported as current liabilities in the Agency Sales Tax Fund.

NOTE 9. CAPITAL ASSETS

The following is a summary of changes in capital assets during the fiscal year:

	Balance at January 1, 2010	Additions	Retirements	Balance at December 31, 2010
Depreciable:				
Office furniture and equipment	$ 313,020	$ 599,390	$ -	$ 912,410
Computer equipment	3,320,170	620,169	-	3,940,339
Leasehold improvements	1,438,744	499,459	-	1,938,203
Subtotal	5,071,934	1,719,018	-	6,790,952
Less accumulated depreciation:				
Office furniture and equipment	266,741	312,175	-	578,916
Computer equipment	2,156,147	487,541	-	2,643,688
Leasehold improvements	647,228	154,557	-	801,785
Subtotal	3,070,116	954,274	-	4,024,389
Total Depreciable	2,001,818	764,744	-	2,766,563
Non-depreciable:				
Capital -Technology Program	10,658,061	1,840,126	-	12,498,187
Total Capital assets—net of accumulated depreciation	$ 12,659,879	$ 2,604,870	$ -	$ 15,264,750

All capital assets are associated with governmental activities.

During 2010, total depreciation expense of $954,274 was allocated between two functions; $103,178 to regional expenditures and $851,096 to administrative expenditures.

NOTE 10. GENERAL OBLIGATION BONDS PAYABLE

Changes during the year in bonds payable were as follows:

	January 1, 2010	New Issues	Current Retirements	December 31, 2010	Due Within One Year
1990A	$ 60,795,000	$ -	$ 3,810,000	$ 56,985,000	$ 4,085,000
1991A	55,745,000	-	-	55,745,000	-
1992A* & 1992B	25,865,000	-	8,075,000	17,790,000	8,610,000
1994A* & 1994B	24,395,000	-	-	24,395,000	-
1994C* & 1994D	56,285,000	-	1,620,000	54,665,000	1,750,000
1997 Refunding	60,800,000	-	5,445,000	55,355,000	5,750,000
1999* Refunding	266,775,000	-	8,065,000	258,710,000	8,525,000
2000A*	224,790,000	-	5,575,000	219,215,000	5,900,000
2001A*	86,650,000	-	2,090,000	84,560,000	2,200,000
2001B* Refunding	29,800,000	-	-	29,800,000	-
2002A*	141,940,000	-	3,150,000	138,790,000	3,315,000
2002B	133,635,000	-	10,870,000	122,765,000	11,325,000
2003A*	237,630,000	-	5,045,000	232,585,000	5,310,000
2003B	137,180,000	-	2,955,000	134,225,000	3,105,000
2004A*	241,775,000	-	4,870,000	236,905,000	5,120,000
2005B Refunding	132,770,000	-	6,850,000	125,920,000	7,210,000
2006A*	242,290,000	-	3,780,000	238,510,000	3,955,000
2009B Cash Note	260,000,000	-	-	260,000,000	260,000,000
2010A	-	62,175,000	1,860,000	60,315,000	2,950,000
2010B	-	112,925,000	-	112,925,000	-
2010C Cash Note	-	140,000,000	-	140,000,000	-
Subtotal	2,419,120,000	315,100,000	74,060,000	2,660,160,000	339,110,000
Unamortized bond premium	119,502,000	6,846,000	6,014,000	120,334,000	6,014,000
Total	$2,538,622,000	$321,946,000	$ 80,074,000	$ 2,780,494,000	$345,124,000

* Strategic Capital Improvement Program (SCIP) Bonds

At December 31, 2010, the total general obligation bonds payable of $2,660,160,000 are classified as current and long-term in the Statement of Net Assets in the amounts of $339,110,000 and $ 2,321,050,000, respectively.

Debt Service Requirements—The "debt service requirements" set forth in the following tables represent payments due the bondholders, as required by the respective bond agreements. The amounts do not represent sinking fund payments the RTA must deposit with the trustee.

1990 General Obligation Bonds—In May 1990, the RTA issued $100 million in General Obligation Bonds, Series 1990A, to establish a Capital Projects Fund to provide the source of paying costs of the Capital Program for the Service Boards.

Debt service requirements on the Series 1990A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ 4,085,000	$ 4,102,920	$ 8,187,920
2012	4,380,000	3,808,800	8,188,800
2013	4,695,000	3,493,440	8,188,440
2014	5,035,000	3,155,400	8,190,400
2015	5,395,000	2,792,880	8,187,880
2016-2020	33,395,000	7,547,040	40,942,040
Total	$ 56,985,000	$ 24,900,480	$ 81,885,480

1991 General Obligation Bonds—In November 1991, the RTA issued $100 million in General Obligation Bonds, Series 1991A, to replenish the Capital Projects Fund and to provide the source for paying costs of the Capital Program for the Service Boards.

The Series 1991A Bonds mature on November 1 over a thirty-year period and interest is payable at rates ranging from 4.85% to 6.55% on May 1, 1992 and semiannually thereafter on November 1 and May 1 in each remaining year.

Debt service requirements on the 1991A Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ -	$ 3,734,914	$ 3,734,914
2012	4,090,000	3,734,915	7,824,915
2013	4,365,000	3,460,885	7,825,885
2014	4,660,000	3,168,430	7,828,430
2015	4,970,000	2,856,210	7,826,210
2016-2020	30,325,000	8,815,525	39,140,525
2021	7,335,000	491,445	7,826,445
Total	$ 55,745,000	$ 26,262,324	$ 82,007,324

1992 General Obligation Bonds—In June 1992, the RTA issued $188 million in General Obligation Bonds, Series 1992A, to pay the cost of purchasing and reconstructing railcars for Metra. The RTA also issued $30 million in General Obligation Bonds, Series 1992B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1992A and 1992B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 5.30% to 9.00% on December 1, 1992 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1992A and 1992B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ 8,610,000	$ 863,040	$ 9,473,040
2012	9,180,000	293,760	9,473,760
Total	$ 17,790,000	$ 1,156,800	$ 18,946,800

1994 General Obligation Bonds—In May 1994, the RTA issued $195 million in General Obligation Bonds, Series 1994A, to pay the costs of purchasing and reconstructing railcars for Metra. Proceeds of Series 1994A Bonds may also be used to purchase new paratransit vehicles for Pace and for rehabilitation of railcars for the CTA. The RTA also issued $80 million in General Obligation Bonds, Series 1994B, to pay the costs of reconstruction, acquisition, repair and replacement of certain public transportation facilities for the Service Boards.

The Series 1994A and 1994B Bonds mature on June 1, over a thirty-year period and interest is payable at rates ranging from 3.75% to 8.00% on December 1, 1994 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994A and 1994B Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ -	$ 1,951,601	$ 1,951,601
2012	-	1,951,600	1,951,600
2013	-	1,951,600	1,951,600
2014	-	1,951,600	1,951,600
2015	-	1,951,600	1,951,600
2016-2024	24,395,000	1,989,399	26,384,399
Total	$ 24,395,000	$ 11,747,400	$ 36,142,400

In December 1994, the RTA issued $62 million in General Obligation Bonds, Series 1994C, to pay for capital projects of the Service Boards required by the ADA for vehicle rehabilitation and the construction or renewal of support facilities. The RTA also issued $130 million in General Obligation Bonds, Series 1994D, to pay for portions of the CTA's rehabilitation of the Green Line elevated structure, track replacement and repair or replacement of bus supporting services, and for Pace's construction of bus garages and purchase of new buses and paratransit vehicles.

The 1994C and 1994D Bonds mature on June 1 over a thirty-year period and interest is payable at rates ranging from 5.30% to 7.75% on June 1, 1995 and semiannually thereafter on June 1 and December 1 in each remaining year.

Debt service requirements on the Series 1994C and 1994D Bonds to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ 1,750,000	$ 4,168,725	$ 5,918,725
2012	1,890,000	4,027,675	5,917,675
2013	2,045,000	3,875,194	5,920,194
2014	2,210,000	3,710,313	5,920,313
2015	7,360,000	3,339,475	10,699,475
2016-2025	39,410,000	7,059,863	46,469,863
Total	$ 54,665,000	$ 26,181,245	$ 80,846,245

1997 General Obligation Refunding Bonds—In September 1997, the RTA issued $98 million in General Obligation Bonds, Series 1997, to provide funds to refund in advance of maturity the RTA's outstanding Series 1990A Bonds, maturing November 1 in the years 2001-2002, in the aggregate amount of $4 million, Series 1991A Bonds, maturing November 1 in the years 2002-2006, 2008 and 2011, in the aggregate amount of $29 million, Series 1992B Bonds, maturing June 1 in the years 2015 and 2022, in the aggregate amount of $18 million and Series 1993B Bonds, maturing June 1 in the years 2004-2009, 2013 and 2023, in the aggregate amount of $47 million.

2026-2030	41,435,000	22,584,055	64,019,055
2031-2035	50,065,000	9,242,100	59,307,100
Total	$ 112,925,000	$ 130,014,400	$ 242,939,400

2010 Working Cash Notes—In July 2009, the RTA issued $140 million in General Obligation Working Cash Notes, Series 2010C, to provide funds to be used to manage the cash flow needs of the RTA and the Service Boards, including if necessary, the refinancing of any existing Authority obligations for such purpose and pay the costs of issuance.

The Series 2010C Working Cash Notes mature on July 1, 2012 and interest is payable at 2.843%.

Debt service requirements on the Series 2010C Working Cash Notes to maturity are set forth below:

Year Ending December 31	Debt Service Requirements		
	Principal	Interest	Total
2011	$ -	$ 3,980,200	$ 3,980,200
2012	140,000,000	1,990,100	141,990,100
Total	$ 140,000,000	$ 5,970,300	$ 145,970,300

All the bonds are recorded as current and long-term liabilities, as applicable, of the governmental activities in the government-wide statement of net assets, and are general obligations of the RTA to which the full faith and credit of the RTA are pledged. The bonds are payable from all revenues and all other funds received or held by the RTA (except amounts in the Joint Self-Insurance Fund and amounts required to be held or used with respect to separate ordinance obligations) that lawfully may be used for retiring the debt.

The bonds are secured by an assignment of a lien on the sales taxes imposed by the RTA. All sales tax receipts are to be paid directly to the trustee by officials of the State. If, for any reason, the required monthly debt service payment has not been made by the RTA, the trustee is to deduct it from the sales tax receipts. If all payments have been made, the funds are made available to the RTA for regular use.

Under the RTA Act, the Service Boards' farebox receipts and funds on hand are not available for payment of debt service.

In the Debt Service Fund, $162,822,114 in investments are available to service principal and interest payments of the RTA's long-term debt as of December 31, 2010.

NOTE 11. OTHER LONG-TERM OBLIGATIONS

Changes in other long-term obligations for the year ended December 31, 2010 were as follows:

	Balance January 1, 2010	Additions	Deletions	Balance December 31, 2010	Due Within One Year
Compensated absences payable	$ -	$ 725,000	$ -	$ 725,000	$ -
Deferred rent	2,160,000	3,000	-	2,163,000	-
Accrued interest payable	33,404,000	39,196,000	33,404,000	39,196,000	-
Unearned revenue	48,674,000	524,000	1,701,000	47,497,000	1,701,000

The long-term liabilities will be paid by the General Fund.

NOTE 12. PENSION

Plan Description—Effective July 1, 1976, the RTA participates, along with Metra and Pace, in a cost-sharing multi-employer noncontributory defined benefit pension plan, the Regional Transportation Authority Pension Plan ("Plan"), covering substantially all employees not otherwise covered by a union pension plan. The responsibilities for establishing, administering, and amending the Plan are divided among a Board of Trustees, a Retirement Committee, a Plan Administrator, and the RTA Board of Directors ("Plan Administrators").

The Plan is classified as a "governmental plan" and is, therefore, generally exempt from the provisions of the Employee Retirement Income Security Act of 1974. The Internal Revenue Service has issued a letter of determination dated September 30, 1988 stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code ("Code") and is, therefore, exempt from Federal income taxes under the provisions of Section 501(a) of the Code. The Plan operates on a calendar fiscal year.

Pension Benefits—Participants are entitled to annual pension benefits upon normal retirement at age 65. Such benefits are generally based on a percentage of the average annual compensation in the highest three years of service, whether consecutive or not, multiplied by the number of years of credited service.

The Plan provides that, upon retirement, benefits payable will be reduced by a defined percentage of pension benefits payable to participants who received credit for prior service with an eligible employer. Because information with respect to these benefits is not readily available until retirement, the information included in the accumulated plan benefits and changes in accumulated plan benefits with respect to active and terminated participants does not reflect a reduction of these benefits.

The Plan permits early retirement at age 55 after completing ten years of credited service with reduced benefits. As a result of the August 1, 1999 amendment to the Plan, participants may receive their full vested benefits if they are at least 55 years of age and their combined age and credited years of service equals 85 or higher.

The Plan provides for benefit payments to beneficiaries equal to or reduced from the participant's monthly benefit payment subject to the election of the participant.

Disability Benefits—An employee is eligible for a disability pension if he or she becomes disabled after the completion of ten years of credited service, and is no longer receiving long-term disability benefits under a separate RTA benefit plan, or after reaching age 65, whichever is later.

Contributions and Vesting—The Plan is funded solely by employer contributions, which are actuarially determined under the projected unit credit method. During 2010, the RTA Board approved a resolution that a contribution of $11,288,000 be made to the Plan. The contribution is allocated as follows: Metra - $5,802,000; Pace - $ 4,210,000; RTA - $1,276,000. As of December 31, 2010, $11,288,000 had not been funded and was reported as contribution receivable in the Statements of Plan Net Assets. The 2010 contribution levels were within the actuarially determined ranges for the respective years.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to determine the actuarial accrued liability presented in the note to the Required Supplementary Information.

Participating employees do not contribute to the Plan. If participants terminate continuous service before rendering five years (ten years prior to January 1, 1987) of credited service, they forfeit the right to receive the portion of their accumulated benefits attributable to employer contributions. All forfeitures are applied to reduce the amount of contributions otherwise payable by the employer.

The complete Plan financial report, including all required disclosures can be obtained from the Plan Administrators at the following address:

Regional Transportation Authority Pension Plan
175 West Jackson Boulevard, Suite 1650
Chicago, IL 60604

Funding Policy—Prior to July 1, 1979, contributions were made on the basis of non-actuarial estimates. The Plan's initial actuarial study found that those estimates were in excess of actuarial requirements. As a result, pension expense is being reduced by amortization of the excess over 30 years.

The RTA, Metra, and Pace are required to contribute the amounts necessary to fund the benefits of their respective employees in the Plan using the projected unit credit actuarial method. Employer contribution and the income it earns through investments are used to operate the Plan and to pay benefits. Assets are valued recognizing a portion of both realized and unrealized gains and losses in order to avoid wide swings in actuarially determined funding requirements from year to year.

Related-Party Transactions—There were no securities of the RTA, Metra, Pace or related parties included in the Plan's assets.

Annual Pension Cost and Net Pension Obligation—For 2008, 2009 and 2010 the RTA's annual pension costs equal the required contributions which were, $9,195,000, $10,827,000 and $11,288,000, respectively. The required contributions were determined as part of the January 1, 2008, 2009 and 2010 actuarial valuations.

In accordance with the GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, the RTA determined its net pension obligation at transition (January 1, 1997). There was no net pension obligation for the Plan at transition or at year-end.

Significant Actuarial Assumptions—The information presented in the notes and the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest valuation follows:

	January 1, 2010	January 1, 2009	January 1, 2008
Actuarial cost method	Projected unit credit	Projected unit credit	Projected unit credit
Amortization method	Straight-line, open	Straight-line, open	Straight-line, open
Remaining amortization period	30 years	30 years	30 years
Asset valuation method	Smoothed market value	Smoothed market value	Smoothed market value
Actuarial assumptions:			
Investment rate of return	8.5%	8.5%	8.5%
Projected salary increases:			
Age graded scale	Range of 3.5% to 7.5% based on attained age.	Range of 3.5% to 7.5% based on attained age.	Range of 3.5% to 7.5% based on attained age.
Mortality	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.	RP2000 White Collar Mortality Table applied separately for males and females projected to 2011.
Withdrawals from service	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47 % at age 20 to 0.39% at age 60 for males.	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47 % at age 20 to 0.39% at age 60 for males.	Termination rates range from 5.47% at age 20 to 0.49% at age 60 for females, and from 5.47% at age 20 to 0.39% at age 60 for males.

Funded Status and Funding Progress – As of December 31, 2010, the most recent actuarial valuation date, the plan was 71.28 percent funded. The actuarial accrued liability for benefits was $166,663,123 and the actuarial value of assets was $118,805,281, resulting in an underfunded actuarial accrued liability (UAAL) of $(47,857,842). The covered payroll (annual payroll of active employees covered by the Plan) was $68,389,409 and the ratio of the UAAL to the covered payroll was 70.0 percent.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

NOTE 13. OTHER POSTEMPLOYMENT BENEFITS

In accordance with personnel practices, the RTA offers eligible retirees the option to continue participation in its group health insurance plan. Eligibility is in accordance with the qualifying factors of the RTA Pension Plan and Trust as follows: Retired employees who have attained age 55 with 10 years of continuous full-time employment are eligible to continue the Health Plan for themselves and their dependents (providing their dependents were covered immediately prior to their retirement). Retired employees who have attained age 65 or older with 10 years of continuous full-time employment are eligible for the Medicare Supplement Plan.

Retiree dependents are eligible for either the Health Plan or Medicare Supplement Plan, depending on their age (providing they were covered as dependents immediately prior to the employee's retirement).

Election to participate is voluntary with the RTA incurring no additional obligations, except that the RTA will pay each eligible retiree the sum of up to $78 per month toward the cost of his/her health insurance. The costs of retiree health care benefits are generally recognized as expenses as they are paid and are not material in amount at the present time.

For 2010, the RTA incurred $19,188 in other post employment benefit expenditures. There are 24 participants eligible to receive benefits as of December 31, 2010.

NOTE 14. RISK MANAGEMENT

The RTA is exposed to various risks including, but not limited to, losses from workers' compensation, employee health insurance, and general liability/property. Commercial insurance coverage is procured to limit the RTA's exposure to such losses.

The Workers' Compensation and Employers' Liability Insurance Policy is procured through RTA's insurance policy with The Hartford. The RTA is insured for $500,000 each accident for bodily injury by accident, $500,000 each employee for bodily injury by disease and $500,000 policy limit. The RTA property is insured through Pace's Property Insurance with Mesirow Insurance Services, Inc. The RTA's portion of insurance premiums is paid to Pace, and is accounted for in the General Fund. The RTA had no settlements in excess of insurance coverage in the past three years. There have been no significant reductions in the amount of coverage from the prior year.

In addition, the RTA is a participant in RTA's Joint Self-Insurance Fund. The Fund was created as required by Article Two of the Loss Financing Plan (Plan) of the RTA and the three Service Boards. The Plan is intended primarily to serve as a mechanism for funding catastrophic losses and, by capitalizing the Fund in advance of such losses, to smooth their impact over time. The Fund is essentially a self-insurance program that provides a means for financing losses that are normally insured, and is included in the RTA's reporting entity as a proprietary fund type (enterprise fund). The Plan is administered by the RTA, CTA, Metra, and Pace (Participating Entities) utilizing a Fund Manager appointed by the RTA and three Fund Advisors, one appointed by each of the Service Boards.

Each participating entity (RTA, CTA, Metra, and Pace) is only responsible to repay the Fund for submitted claims paid by the Fund. The Fund acts exclusively as a claims-service, and financing mechanism, not an insurer, with respect to claims presented.

The limit of liability to the Fund is established at $50 million less the retained limit (deductible portion) as described below:

General Liability—The categories of general liability that are covered, with certain defined exclusions, by the joint agreement are:

- Personal injury

- Property damage
- Advertising injury
- Evacuation, evacuation expenses and loss of use

The retained limit (deductible portion) for each Participating Entity is:

CTA	$ 2,500,000
Metra	2,500,000
Pace	250,000
RTA	100,000

Officer and Employee Liability—All directors, officers or employees of each Participating Entity are covered, with certain defined exclusions, by the Plan. The retained limits are $100,000 for each covered person. If a loss is covered under both types of liability, then the retained limit for general liability will apply.

NOTE 15. COMMITMENTS AND CONTINGENCIES

The RTA has an operating lease agreement for its office facilities. In 2010, the total rent paid by the RTA was $1,698,152. Minimum required annual rental payments by the RTA are as follows:

Year Ending December 31	Amount
2011	$ 1,979,670
2012	1,982,815
2013	1,972,587
2014	1,818,595
2015	1,857,549
2016-2020	9,569,953
2021-2024	6,598,424
Total	$ 25,779,593

NOTE 16. RESTATEMENT

In order to comply with the provisions of Governmental Accounting Standards Board Statement (GASB) 53, *Accounting and Financial Reporting for Derivative Instruments,* the December 31, 2009 Net Assets for Governmental Activities and Fund Balance for the General Fund have been restated as follows.

	General Fund Increase (Decrease) Fund Balance/ (Deficit)	Statement of Net Assets Increase (Decrease) Net Assets
December 31, 2009 balance/(deficit) as previously reported	$ 127,658	$ (1,951,448)
Restatement to reflect GASB 53 valuations of derivative instruments	(4,666)	(3,171)
December 31, 2009 balance/(deficit) as restated	$ 122,992	$ (1,954,619)

NOTE 17. SUBSEQUENT EVENTS

Beginning in January 2011, the RTA began drawing on a newly authorized commercial paper facility that authorizes the RTA to borrow up to $260 million. Note holders are fully secured by a letter of credit and a subordinate lien on sales taxes levied by the RTA.

In July 2011, the RTA anticipates issuing advance refunding bonds to pre-refund $99.6 million of RTA bonds scheduled to mature between 2013 and 2019. The refunding action will not significantly change the RTA's outstanding debt but will reduce interest expense over the refunding period.

Note 1. BUDGET AND BUDGETARY ACCOUNTING

The budgetary basis of the General Fund's budget and actual presentation is included as required supplementary information. For comparison of the combined budgets as required for board presentation, the combined schedule of revenues, expenditures, and changes in fund balance—budget and actual—general and the sales tax agency funds are presented in the combining and individual fund schedules section of the CAFR. Additional budget detail is used by management for monitoring purposes which is provided in this section as the schedule of expenditures—budget and actual—General Fund.

Section 4.01(a) of the Act requires the RTA to prepare and adopt a comprehensive annual budget and program presenting the RTA's planned operations and capital expenditures for the forthcoming year. The Service Boards' proposed budgets are based on the RTA's estimate of funds that will be available to the Service Boards by or through the RTA's own budget. This budget is comprehensive and includes the activity in the General Fund and sales tax agency fund.

The annual budget and related appropriations are prepared using the modified accrual basis of accounting in conformity with accounting principles generally accepted in the United States except for RTA capital expenditures and capital grants to the Service Boards. The RTA capital expenditures and capital grants to the Service Boards are budgeted on a project basis, which normally exceeds one year, and debt service payments, which are budgeted as transfers from the General Fund. Budgets for RTA capital expenditures and capital grants to the Service Boards that extend beyond one year are presented in the first year of the grants and represent the total amounts awarded. In addition, for the sales tax agency fund, additions and deletions are treated as revenues and expenditures. All appropriations lapse at year-end.

Although appropriations are adopted for individual line items, the legal level of control (i.e., the level at which appropriation transfers or expenditures in excess of appropriated amounts require RTA Board approval) is restricted to total appropriations/expenditures and total administration appropriations/expenditures. Management has the authority to exceed any line item appropriation without Board approval, provided it does not exceed the total appropriations/expenditures and the total administration appropriations/expenditures. It is generally the policy of the RTA (ordinance 91-9) to fund the budgets of the Service Boards up to the amount appropriated in the annual Budget Ordinance. However, unfavorable economic conditions created the need to waive this policy for purposes of the adoption of the 2010 budget and 2011-2012 financial plan and the 2011 budget and 2012-2013 financial plan. Also waived for the purpose of the adoption of the 2010 budget and 2011-2012 financial plan was the provision of the RTA funding policy adopted by Ordinance 98-15 that requires that the RTA annual budget and two-year financial plan show a year-end unreserved and undesignated fund balance equal to 5% of the RTA general fund by no later than the end of the three-year planning period.

The Service Boards shall maintain all financial records and shall prepare all financial statements and reports, including quarterly and annual reports required under the Act, in accordance with the following provisions:

- The first source of funds to be credited against the budgeted funding amount is from Service Board sales tax receipts;
- The second source of funds to be credited against the budgeted funding amount is from PTF receipts; and
- The third source of funds credited against the budgeted funding amount is from unallocated RTA sales tax receipts and other discretionary receipts.

The reimbursement of Service Boards' capital expenditures and the payment of PTF funds, unallocated RTA sale tax receipts and other discretionary funds of the RTA shall be made under the terms and conditions of grant agreements governing such expenditures.

Note 2. RECONCILIATION OF BUDGETARY BASIS TO GAAP BASIS ACCOUNTING

The accompanying schedule of revenues, expenditures, and changes in fund balance, budget and actual-general fund (this section), and combining schedule of revenues, expenditures and changes in fund balance-budget and actual-general and agency funds (in combining and individual fund schedules section) present comparisons of the legally adopted budget with actual data on a budgetary basis.

Since accounting principles applied for purposes of developing data on a budgetary basis differ with accounting principles generally accepted in the United States of America, a reconciliation of timing differences in the excess of revenues over expenditures and other financing uses is presented below:

	General Fund
Excess of expenditures over revenues and other financing use-budgetary basis	$ 40,369,607
Adjustments:	
Capital grant expenditures incurred in current year but considered in prior years' budgets	(6,660,069)
Capital grant expenditures expected to be incurred in future years but considered in current year budget	11,721,044
RTA capital expenditures expected to be incurred in future years but considered in current year operating budget	(209,516)
Budgetary basis to GAAP basis adjustments	4,851,459
Net change in fund balance - GAAP basis	$ 45,221,066

COMBINING AND INDIVIDUAL FUND SCHEDULES

A. GENERAL FUND

The general fund is used to account for resources traditionally associated with the RTA which are not required legally or by sound financial management to be accounted for in another fund. A budget and actual schedule of general fund expenditures is presented in this section.

The RTA Board approves a comprehensive budget which includes the activity in the general fund and the Sales Tax Agency Fund. For comparison of the combined budgets, the combined budget and actual schedule of revenues, expenditures and changes in fund balance for both funds is also presented in this section.
