

Illinois Department of Transportation

Memorandum

To: Files
From: Jason Stringer
Subject: IL 2 Public Information Open House
Date: July 19, 2012

FAP Route 734 (IL 2)
Section 78R-2
Winnebago County
Job No. P-92-050-06
IL 2 from Auburn Street to Riverside Blvd in Rockford

The third public meeting for the Illinois Route 2 Phase I Study was held on Wednesday, July 11, 2012 at Spectrum School, 2909 N. Main Street, Rockford, Illinois from 1:00pm – 6:00pm. The meeting was held in an open house format with exhibit boards for review and the opportunity for attendees to provide comments, suggestions, issues and concerns.

The purpose of the meeting was to share with the public details of the N. Main Street (IL 2) project that extends from north of Auburn Street to north of Riverside Boulevard in Rockford and to solicit input from the corridor's stakeholders. In addition, the meeting provided an opportunity for the public to understand and comment on the project's impacts to Brown Park.

Exhibits shared as a part of the meeting included:

- Two sets of the aerial plan view of the corridor with the preliminary layout of improvements. The exhibits included proposed right-of-way and temporary construction easements (see Attachment 1).
- Location map displaying the project limits (see Attachment 2).

Handouts included a newsletter (see Attachment 3) describing the project and the study process. It contained a Comment Form (also made available in a larger size) for stakeholders to complete and submit either at the meeting or by mail.

Notice of the meeting was sent to 502 stakeholders (see Attachment 4 for mailing list) and was also advertised in the Rockford Register on June 27 and July 5, 2012 (see Attachment 5).

The meeting was attended by 69 people in total (see Attachment 6 for sign-in sheet).

The following organizations/agencies were represented:

- City of Rockford, Matt Vitner
- City of Rockford, Patrick Zuroske
- City of Rockford, Jeremy Carter
- City of Rockford, Jamie Rott
- City of Rockford, Marcy Leach
- City of Rockford, Mark Lattner
- Rockford Park District, Tim Bragg
- Rockford Metropolitan Agency for Planning, Gary McIntyre
- Rockford Metropolitan Agency for Planning, Jon Paul Diipla
- Rockford Metropolitan Agency for Planning, Colleen Hoesly
- Rockford Metropolitan Agency for Planning, Michael Hren
- Rockford Metropolitan Agency for Planning, Colin Belle
- Stateline Area Transportation Study, Bob Soltau
- Trails for Illinois, Diana Cooper
- Trails for Illinois, Bev Moore
- Trails for Illinois, Brucie Chapman
- Trails for Illinois, Princess Rock
- Trails for Illinois, Zhenya Nazazyan

The following local businesses were represented:

- A & E Tool & Gage Company
- Altamore Ristorante
- Anna's Pizza & Pasta
- Greenwood Cemetery
- Healthfirst
- Krenek's Clock Haven
- Mobil
- Olympic Tavern
- Panino's Italian Restaurant
- Rockford Country Club
- Rockford Health System
- Rockford Washer
- Roy McNitt DDS
- Specialty Services Corp.
- Spectrum School
- Visiting Nurses Association
- Windmill Hill Inc.

The following media were represented:

- WREX
- WTVO

IDOT was represented by the following Project Study Team members:

- Jim Allen (FHWA)
- Jon McCormick (IDOT)
- Masood Ahmad (IDOT)
- Sam Abdullah (IDOT)
- Jason Stringer (IDOT)
- Bill McWethy (IDOT)
- Jim Allen (IDOT)
- Mike LeFever (IDOT)
- Jon Estrem (HR Green, Inc.)
- Chris Hartke (HR Green, Inc.)
- Carrie Hansen (Images, Inc.)

Public Comment:

The public was invited to submit comments about the project via the comment form at the meeting or by mail. Comments received by August 13, 2012 will become part of the official public meeting record.

Four (4) comment forms were received on July 11, 2012 at the Public Meeting. Three additional forms were submitted through the mail. The submitted comment forms are included in Attachment 7.

In general those in attendance at the meeting expressed support for improvements to the corridor. The Project Study Team explained the CSS process and design features of the corridor. In addition it encouraged input from attendees regarding the layout shown.

Project issues and concerns expressed either verbally to the Project Study Team or through formal comment forms included the following topics:

- Realignment of N. Main between Custer & Eddy
- Inclusion of a multi-use path
- Raised median from Vernon to Custer and from Eddy to River Bluff
- Various issues regarding the impact to existing businesses & properties

Notable verbal comments are summarized as follows:

Dick Berman: Resident along Country Club Beach Road. Mr. Berman would like to see different access to N. Main for his neighborhood. Rather than relocating the street directly across from Pierce Avenue, he would prefer aligning with the Halsted Road intersection. He feels the signals at N. Main and Halsted would provide for better accessibility for the neighborhood. In addition, he indicated this would eliminate concerns regarding the street being located on railroad right-of-way. He understands there is a difference in elevation between Halsted, the railroad and Country Club Beach Road, but feels these issues could be overcome by utilizing a portion of Rockford Country Club in order to tie into the existing street. Mr. Berman plans to pursue the matter further with the City of Rockford.

Rich Gaines: Rockford Country Club. Mr. Gaines indicated the area across from Halsted Road is within the golf club's signature hole. He indicated any impact to the property in this area would be strongly opposed by the club.

Chuck Elliot: Greenwood Cemetery Association. Mr. Elliot understands the reasoning behind closing the driveway across from Yonge Street. He indicated the entrance is rarely used and is agreeable to it being closed.

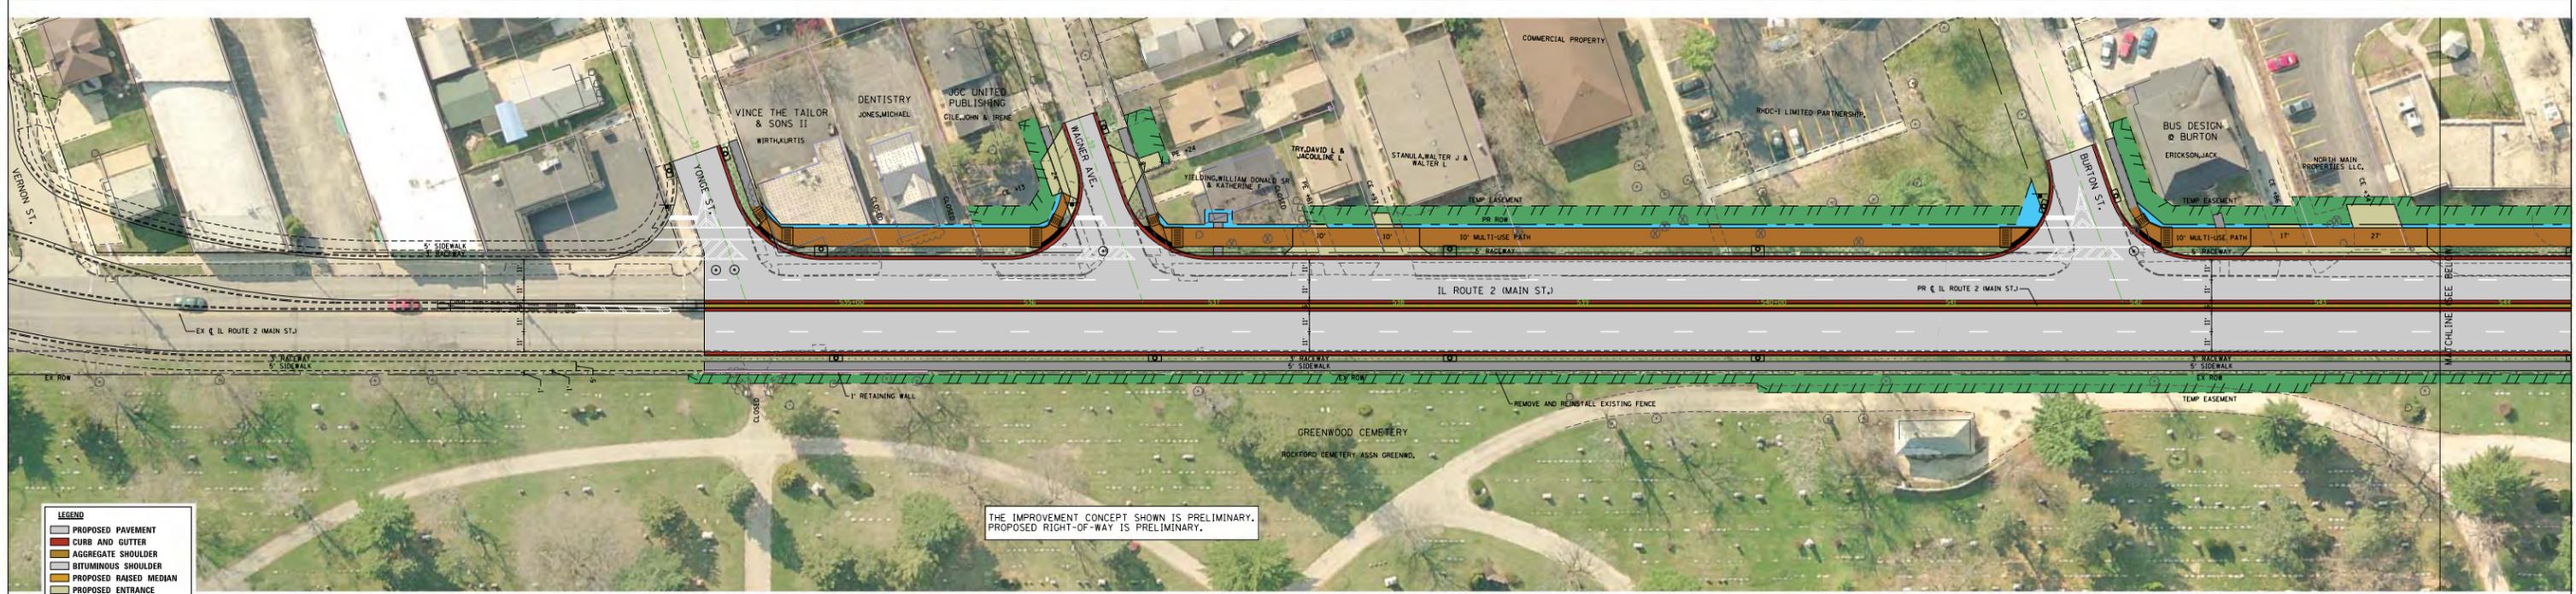

Roy McNitt, DDS: Owns the dental office at 3535 N. Main Street. Dr. McNitt is concerned that the proposed raised median in this area will have a negative impact on his business. He requested that the raised median be shortened to allow for left turns into his driveway. It was indicated that his request would be considered and, if appropriate, the requested changes made.

Bob Sanders: Mobil – Kelly-Williamson Company. Mr. Sanders noted that underground tanks are likely within the limits of the temporary construction easement. He asked that this be noted & coordinated during the land acquisition phase.

Richard Fang: Windmill Hill LLC. Mr. Fang is concerned that extending raised curb and gutter along the north side of River Bluff Boulevard to the extent shown will prevent patrons of Swedish Pancake House from parking in that area. He feels this would have a negative impact on the business. He asked that the raised curb and gutter be ended further to the west. Mr. Fang also asked that the full width of drive-thru lane be maintained for Chase Bank in the southeast intersection quadrant at Riverside Boulevard if possible. It was indicated that these requests would be considered and, if appropriate, the requested changes made. Mr. Fang also requested an enlarged version of the display in the area of Chase Bank.

Tom Rotello: Olympic Tavern. Mr. Rotello asked the trees located between the street and sidewalk be saved if possible. It was indicated that this would be considered and the change made if possible. If it is necessary to remove the trees, new trees will be incorporated as a part of the project.

Paula Knapik: Rockford Washer. Ms. Knapik requested an enlarged version of the display in the area of Rockford Washer.

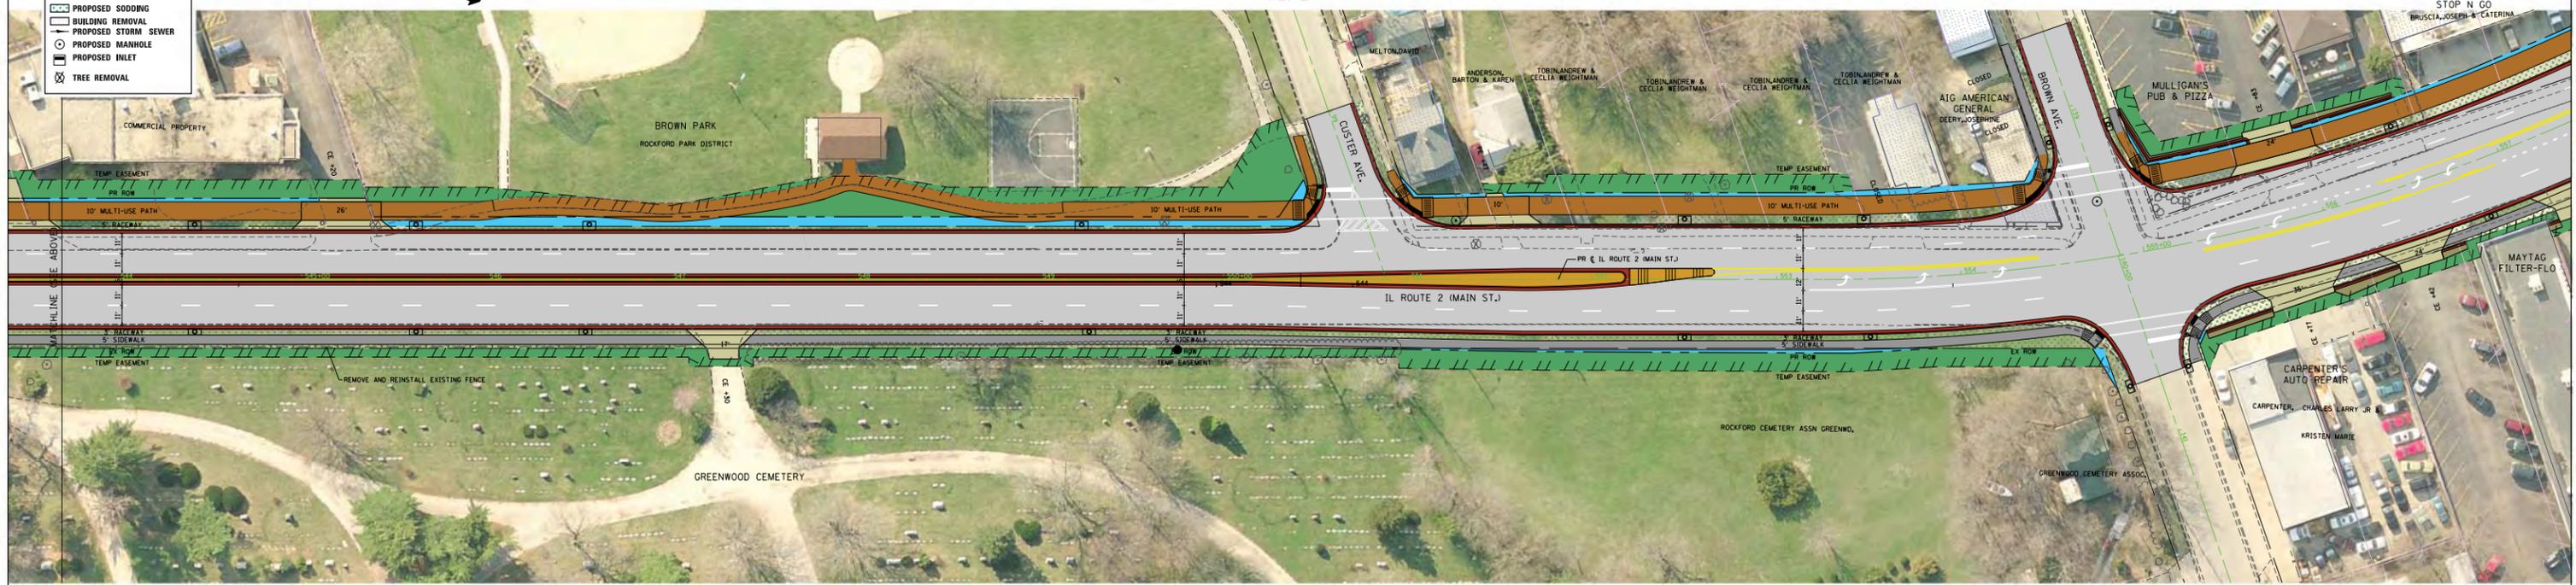

THE IMPROVEMENT CONCEPT SHOWN IS PRELIMINARY.
PROPOSED RIGHT-OF-WAY IS PRELIMINARY.

**PROJECT STUDY OF IL 2
FROM AUBURN ST. TO W. RIVERSIDE BLVD.**

JULY 11, 2012

MEETING LOCATION:

**SPECTRUM SCHOOL
2909 N. MAIN ST., ROCKFORD, ILLINOIS**

WELCOME TO THE PUBLIC MEETING

Welcome to the Public Informational Open House meeting for the Project Study of IL 2 from Auburn Street to Riverside Blvd. Personnel from the Illinois Department of Transportation, HR Green, and Images, Inc. are here to answer your questions and receive your comments regarding the proposed project.

This meeting is being held in an Open House format to allow informal discussions between the public and study team members. Participants are encouraged to submit written comments about the project. Written statements may be given to us today or mailed to the Deputy Director of Highways. A form is provided in this handout that you may use to submit your statement.

The purpose of the meeting is to share the recommendations from the Citizen Advisory Group (CAG) work sessions and solicit feedback. Interested persons may visit anytime between 1:00 and 6:00 p.m. IDOT will provide information regarding preliminary project details, the study schedule and process, study area characteristics & public involvement opportunities. Attendees will have the opportunity to review exhibits, provide comments, and meet with IDOT and study team representatives on a one-on-one basis.

FOR FURTHER INFORMATION CONTACT:

- All comments and recommendations will receive consideration
- Maps, drawings and other pertinent information are available at the IDOT District 2 Office located at 819 Depot Avenue, Dixon, Illinois, 61021
- Telephone (815) 284-2271 or Text Transmission (888) 642-3457
- Further Questions may be addressed to:

<u>Title</u>	<u>Name</u>	<u>Telephone</u>
IDOT— Acting Bureau Chief	John Wegmeyer	(815) 284-5302
IDOT—Studies & Plans Engineer	Jon McCormick	(815) 284-5351
IDOT—Project Engineer	Masood Ahmad	(815) 284-5510
IDOT—Senior Squad Engineer	Sam Abdullah	(815) 284-5935
IDOT—Project Manager	Jason Stringer	(815) 284-5513

The Department of Transportation wishes to thank you for your interest and participation in this meeting.

Eric S. Therkildsen, P.E.
Acting Deputy Director of Highways,
Region Two Engineer

JOB No. P-92-050-06**

**PROJECT STUDY LIMITS BEGIN NORTH OF AUBURN ST.
AND END NORTH OF RIVERSIDE BLVD.**

ON BEHALF OF IDOT

This information is published on behalf of the Illinois Department of Transportation, District 2, to assist citizens in understanding the various elements of the project from earliest concepts to the completion of the roadway. This information allows you to learn about what has been done thus far, and what remains to be done to allow us to construct the project.

We, as a Department, hope you will find this handout useful and that it will help you understand what it takes to study, design, and construct a highway project. This handout should help answer some of the most commonly asked questions by the public regarding a project.

YEAR ONE — FEASIBILITY STUDY

A feasibility study is typically initiated to assess whether or not a proposed highway improvement warrants further study or whether additional Phase I Engineering Studies are needed. Feasibility studies typically are conducted to address the following types of questions.

- Will a new highway or major river bridge promote economic development in a certain region of the State and create more benefits than costs, or would upgrading existing highways be a better solution for satisfying State and local needs?
- Is a missing link of a four-lane highway causing traffic

operational problems which, in turn, are creating a high number of accidents?

- Would it be possible and cost effective to build a new four-lane highway on new alignment through rugged terrain in comparison to upgrading the existing alignment?
- Other similar situations where additional information is needed before making a decision to proceed with more detailed engineering studies (e.g. major drainage alternatives, alternate locations for a proposed interchange).

**IL Route 2 (North Main Street)
Public Informational Open House
July 11, 2012**

The Illinois Department of Transportation (IDOT) is studying IL Route 2 (North Main Street) within the City of Rockford. The IL Route 2 study area is comprised of approximately 2.0 miles, extending from north of Auburn Street to north of Riverside Boulevard. The study will take a detailed look at the current and future transportation needs of the corridor and will involve a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, affix a stamp, and mail.

Please send comments related to the IL Route 2 project by Monday, August 13, 2012. Comments received by this date will become part of the public awareness meeting record.

YEAR TWO-THREE — PHASE I STUDIES & ENGINEERING

SCOPE

Phase I Studies include both Engineering and Environmental Studies, each requiring a separate decision-making process.

Phase I work can vary from a very minor type study to an in-depth investigation of corridors, alternative alignments and cross sections, different highway types, and other design features with consideration of social, economic, environmental, and engineering factors.

PURPOSE

Phase I studies are developed to ensure that, as practical, highway locations and proposed designs are consistent with Federal, State, and local goals and objectives. The following are considered when performing a Phase I study:

1. Design Uniformity: to ensure that the proposed improvement will satisfy a need and that uniform designs are used Statewide.

2. Public Involvement: develop the final design with input from the general public. (This is the stage of the project which we are in now.)

3. Public Interest Consideration: make final project decisions in the best overall public interest.

4. Adverse Effects of Project: ensure that the potential adverse economic, social, and environmental effects of proposed action have been fully considered.

SOCIAL, ECONOMIC AND ENVIRONMENTAL CONSIDERATIONS

The following items are discussed when developing a highway improvement:

- Effects on regional and community growth
- Conservation and preservation of natural resources
- Public facilities, services, and recreational areas
- Community cohesion

- Displacement of people, businesses, and farms
- Air, noise, and water pollution
- Aesthetic value

The depth of social, economic, and environmental analysis will vary depending upon the scope and nature of the project, the stage of project development, and magnitude of any adverse

impacts. For major projects, the District will prepare a separate environmental document, i.e., an Environmental Impact Statement (EIS) or an Environmental Assessment (EA). For most projects the Project Report will document the environmental analysis.

DESIGN AND ENGINEERING CONSIDERATIONS

Phase I studies are used to identify the following:

- Need for highway improvement
- Capacity deficiencies
- Need to improve safety

- Project termini
- Typical Section
- Need for right-of-way
- Drainage concerns
- Location of traffic control devices

- Project Cost

The scope and depth of engineering analyses will vary depending on the scope of work.

YEAR FOUR—PHASE II ENGINEERING

PLAN DEVELOPMENT STAGE

The designer is responsible for preparing the final plans so that they can be constructed. To ensure the plans are correct and complete, the designer will review the Phase I report and the project commitment files. The plans are reviewed at the preliminary, pre-final, and/or final stages to ensure that they are free from errors and omissions.

Preliminary Plan Review. This is the stage that various bureaus, sections, agencies, etc. have a chance to conduct an overall review of the plans. The preliminary plan review will occur after the designer has essentially completed the plans, including the cover sheets, plan and profile sheets, detail sheets, cross section sheets, determined pay items, special provisions, etc.

During this stage the designer will address any utility conflicts and determine if adjustments and/or relocations are necessary. For major projects, several reviews may be necessary to avoid having to make substantial changes later in the plan preparation process.

LAND ACQUISITION

This phase is where the amount of right-of-way and easements are determined. Once the amount of property is determined, an appraiser will determine the value of the property we will need to acquire and the effect it will have on the remaining parcel. When the appraisal has been completed, it is then given to a negotiator who will meet with the prop-

erty owner and discuss the value of the property. After the price has been set, either by negotiation or determined by a court, the sale of the parcel is completed and the transfer of the land is recorded. Another part of the land acquisition activity is relocation assistance for persons in legal physical possession of the real estate acquired, which may be tenants or owner/

occupants. Those occupants may be residents, businesses (including farms and non-profit organizations), or just personal property that needs to be moved. In any case, anyone displaced by acquisition will be afforded relocation assistance.

UTILITY WORK

Utility coordination starts in Phase I where preliminary plans are provided to the utility owners. The utility owners mark their locations on the plans and return them to IDOT, where they are incorporated into the project files. The designer will do their best to minimize

impacts to the utilities. Pre-final plans are then sent to the utilities so they can design the relocation of the facilities being impacted. Final plans are sent out with a 15 day notice to submit for a permit. This is done when the project is submitted for letting. Once the per-

mit is approved and the new right-of-way purchased, the utilities have 90 days to complete the relocation. If the proper coordination is not done between IDOT and the utilities, it could effect the timing of the project.

YEARS FIVE—SIX—PHASE III ENGINEERING

CONTRACT PROPOSAL AND ADVERTISING FOR BIDS

After all the design plans and contract documents are completed, the construction improvement project is included on the Department's regularly scheduled advertisement for bids. All contractors must meet the Department's pre-qualification requirements.

The pre-qualification process reviews each contractor's experience;

quality and timeliness of previously constructed work, and the equipment and capital they have available to complete the project. This pre-qualification rating establishes the size of project each contractor is able to bid on and the type of work they are qualified to do (i.e. bridges, resurfacing, concrete paving, traffic signals, etc.). This helps to assure that the contractor is capable of completing the work in a

quality manner within the scheduled time limits.

All interested contractors are given four weeks to review the contract plans for the proposed project and prepare their bids to complete the work. The sealed bids are then reviewed at the scheduled bid opening. The contract is then awarded to the lowest bidder on the project who meets all the contract requirements and pre-qualifications.

CONTRACT AWARDED: CONSTRUCTION BEGINS

During construction of the project, the Department inspects all materials used in the improvement, monitors the contractor's operation to ensure all specifications are followed, and completes all the required documentation

Materials inspection involves testing and

approval of all items used on the contract, including aggregates, concrete, asphalt, culverts, traffic signals and metal products. Everything from trees and topsoil to pavement marking paint, must meet specifications before it can be used on the project.

Construction engineers and inspectors are assigned to each project to monitor progress and complete the necessary documentation. They make sure everything is located properly and built to correct dimensions.

Illinois Department of Transportation

PUBLIC NOTICE INFORMATIONAL OPEN HOUSE

for

THE PROPOSED RECONSTRUCTION OF ILLINOIS ROUTE 2 FROM YONGE STREET TO NORTH OF RIVERSIDE BOULEVARD IN ROCKFORD

(INCLUDING THE USE OF DEMINIMIS FINDING AT THE BROWN PARK
A 4(F) PROTECTED RESOURCE)

TIME AND DATE

WEDNESDAY JULY 11, 2012
1:00 P.M. - 6:00 P.M.

LOCATION

SPECTRUM SCHOOL
2909 N. MAIN STREET
ROCKFORD, IL

The Illinois Department of Transportation (IDOT) is seeking Public Comment for the proposed improvements in general as well as the effects that improvements will have on Brown Park in Rockford. Brown Park is a publically owned park. As such, it is subject to protection under Section 4(f) of the US Department of Transportation Act of 1966. For the Illinois Route 2 improvement project, IDOT intends to seek a Section 4(f) "De Minimis" impact finding from the Federal Highway Administration based on a determination that the project will not adversely affect the features, attributes or activities that qualify Brown Park for protection under Section 4(f).

Improvements to Illinois Route 2 include reconstruction, correcting deficient geometry, installing a bi-directional left turn lane, curb and gutter, storm drainage, traffic signals and pedestrian facility improvements. Effects of the Illinois Route 2 improvements on Brown Park include purchasing approximately 0.066 acres of right-of-way and 0.197 acres of temporary construction easement for the construction of storm sewer facilities and a multi-use path on the east edge of the park along Illinois Route 2 (N. Main Street) as well as geometric improvements in the southwest intersection quadrant of Illinois Route 2 at Custer Avenue. The path will improve pedestrian access to the park. The geometric improvements will enhance safety for turning vehicles. Construction of the path and storm sewer will require removal of five trees on park property. Mitigation will include replacement of these trees on a one-to-one basis within the project limits.

Detailed information regarding the project in general as well as the impact to Brown Park including graphic displays will be available during the meeting. IDOT representatives will be available to take comments regarding the project and park impacts and to answer questions regarding the project in general. Detailed information will also be available for viewing at the IDOT office listed below during the comment period. Written comments may be submitted or mailed to the IDOT office or submitted electronically to Masood.Ahmad@illinois.gov. Comments must be received by August 11, 2012 to be considered as part of the public record.

**Illinois Department of Transportation
Region 2 /District 2
819 Depot Avenue
Dixon, IL 61021-3500
Attention: Masood Ahmad**

This meeting is accessible to disabled individuals. Persons planning to attend who will need a sign language interpreter or other similar accommodations, should notify Mr. Masood Ahmad by letter (see address above) or telephone at (815) 284-5510, or by Transmission for the Deaf at (888) 642-3457. Notification is required at least five days prior to the meeting so that reasonable accommodations can be made.

IL Route 2 (North Main Street) Public Informational Open House #3 July 11, 2012

The Illinois Department of Transportation (IDOT) is studying the IL Route 2 (North Main Street), from Yonge Street to Riverside Boulevard. The IL Route 2 study area is comprised of approximately 2.0 miles located between north of Yonge Street on the south and north of Riverside Boulevard on the north, within the City of Rockford. The study is taking a detailed look at the current and future transportation needs of the corridor and involves a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, place a stamp and mail.

Please send comments related to the IL Route 2 project by Saturday, August 11, 2012. Comments received by this date will become part of the Public Information Open House meeting record.

Comments/Questions: There are many good ideas that are incorporated in this design - multiuse path, center left-turn lanes, pavement replacement, general roadway improvement. There is one major drawback in the design. Re-aligning the roadway at Fulton to avoid the Olympic tavern is a mis-use of tax payer money. A better use of tax payer funds is to put the Olympic a few blocks to the north in the old grocery store area on the west side. Keep the alignment simple and the Fulton intersection 90°. In general, the city needs to develop a comprehensive urban renewal plan for the area. Fixing the roadway is only about 40% of the problem. Please give serious consideration to relocating the Olympic, or at least a commitment from the owners to stay in business and not relocate after construction is done.

IL Route 2 (North Main Street) Public Informational Open House #3 July 11, 2012

The Illinois Department of Transportation (IDOT) is studying the IL Route 2 (North Main Street), from Yonge Street to Riverside Boulevard. The IL Route 2 study area is comprised of approximately 2.0 miles located between north of Yonge Street on the south and north of Riverside Boulevard on the north, within the City of Rockford. The study is taking a detailed look at the current and future transportation needs of the corridor and involves a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, place a stamp and mail.

Please respond to this comment:

The residents of Country Club Beach Road are very concerned about certain solutions being proposals for our access to North Main Street and would propose to have the City of Rockford and the State of Illinois consider as part of the redevelopment of North Main Street the following:

Situation Analysis:

- a) The intersection of Country Club Beach and North Main Street is dangerous due to the railroad crossing and the angle of approach.
- b) At many hours of the day, when traffic is heavy on North Main, it can be very hard to get in to traffic to go north and almost impossible to go south. This access is dangerous and may even be more dangerous in the future.
- c) Country Club Beach Road is on rail road property at the North Main intersection and northeasterly from there to the end of the Rockford Country Club property line. We understand that because the road is on rail road property the city can not build or properly maintain this road. We do acknowledge that the city has done a reasonable job of snow plowing and some pothole repair but the road was not built properly in the first place and is in very poor condition today.

We would like to ask that you consider;

That Country Club Beach Road be closed at North Main Street and the pavement removed from the present intersection to the end of Rockford Country Club property, and that Halstead Ave be extended east with a new railroad crossing to connect to Country Club Beach Road. This would allow some six feet to be cut off the top of the hill and thus improve the grade problem. This solution resolves all the problems noted above.

We understand that a proposal has been made to have Pierce Avenue extended across North Main to Country Club Beach Road with a new railroad crossing and a sharp right angle turn to connect to the present road. It is our contention that this solution may partially resolve problem "a", it would make "b" even worst and not solve problem "c" at all.

Comments/Questions: *Thank you so much for the good work you are doing on IL Route 2 (North Main St). I used that route regularly over 40 years and was always fearful of a rear-end collision due to the lack of turn lanes.*

I also especially appreciate the addition of a bicycle and pedestrian facility for those folks who cannot afford a car or those who wish to travel in a healthy environmentally friendly manner.

Comments/Questions: _____

Following comments/questions relate to the east portion of the IL Route 2 plan from Young St. to Brown Ave. adjacent to Greenwood Cemetery.

It is understood that the easement needs will include removal and replacement of the green chain link fencing. It is also understood that the entrance opposite Young St. will be closed. Please comment on the easement plan relative to the two current entrance locations and the existing hedge row north of the north entrance.

The drawings seem to show easements which overlap stone pillars and iron fencing at the the entrances. These structures are considered to be of historic significance as part of the over 150 year old cemetery and need to be preserved.

We would appreciate your consideration and comment relative to the structures at the two entrances and the hedge row.

Thank you,

Chuck Elliot

ROY H. McNITT, D.D.S.
GENERAL DENTISTRY

July 18, 2012
Jason Stringer
IDOT-Project Manager

Dear Jason,

It was good to meet with you and Sam Abdullah at the public meeting on July 11 at Spectrum School.

I own a dental office building at 3535 North Main Street that will be impacted by the project. My concern is my patients will have a "right in right out" only, due to the raised median that is in the current plan. This will have a negative impact on my practice. My neighbor to the south, Erik Cederberg of Rockford Washer, will also be impacted.

I hope a solution can be made to resolve this issue. Please contact me via email.

Sincerely yours,

Roy McNitt DDS
