

Problem Statement

Developed by the study team in collaboration with the Community Advisory Group

“The transportation problems in the study area relate to traffic congestion, poor or mismanaged access and insufficient roadway continuity and connectivity, which contributes to delays and crashes. Traffic is often delayed by trains at the numerous at-grade rail crossings. These improvements need to consider the community’s desire to preserve the character of the community, to enhance the safety of the public, to promote more pedestrian/bike facilities and to maximize the economic benefit of IL Route 255.”

Project Purpose

Developed by the study team with public input and in collaboration with the Community Advisory Group

“The purpose of the project is to make improvements to the local roadway system, to improve continuity and connectivity between its major traffic destinations and IL Route 255, as well as to provide better connections between IL Route 3/111 and US Route 67.”
