Lane Closures on Dundee Road and Wheeling Road for Intersection Improvement Project

CHICAGO – The Illinois Department of Transportation (IDOT) announced that permanent lane closures will take place at the intersection of Dundee Road (Illinois 68) and McHenry Road/Wheeling Road, in Wheeling, beginning, weather permitting, Friday, September 23. The closures are necessary for an intersection improvement project.

In order to complete the work, eastbound Dundee Road (Illinois 68) and northbound Wheeling Road will be reduced to one lane at the intersection. A new lane configuration is planned for mid-Fall 2016.

The scope of the project consists of adding turn lanes on westbound Dundee Road and southbound McHenry Road. The project also will include resurfacing and improvements to the sidewalk, traffic signals and drainage at the intersection.

The overall project is expected to be completed in Spring 2017.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.
