Illinois 104 patching begins March 29

QUINCY – The Illinois Department of Transportation announces that pavement patching on Illinois 104 between Interstate 172 and Quincy Regional Airport begins March 29.

The work will reduce Illinois 104 to one lane in each direction, with traffic control utilizing dynamic message signs, spotters and barricades. Motorists will enjoy a smoother driving surface as a result of this project, which is expected to be complete by the end of May.

Motorists can expect delays and should allow extra time for trips through this area. To avoid the work area, when feasible, use of alternate routes should be considered. Drivers are urged to pay close attention to changed conditions and signs in the work zones, obey the posted speed limits, refrain from using mobile devices and be alert for workers and equipment.

Over the next six years, IDOT is planning to improve more than 3,300 miles of highway and 8.4 million square feet of bridge deck as part of the Rebuild Illinois capital program, which is investing \$33.2 billion into all modes of transportation. Year One included approximately \$2.7 billion of improvements statewide on 1,706 miles of highway, 128 bridges and 228 additional safety improvements.
