DESCRIPTION AND PURPOSE OF ITEM

This item indicates the prevailing number of <u>through-traffic</u> lanes in both directions during peak hour operation.

This information is used for capacity calculation and map preparation.

This item can be obtained from construction plans or, if plans are unavailable, field review. If in question, contact the district Bureau of Program Development.

Notes:

1. For narrow highways or those with no marked centerline, if two-way traffic is permitted, record '2', regardless of surface width.

2. This item can be entered into IRIS specific to the "With" and "Against" direction of travel or as a "Centerline" average.

CODE AND SCREEN ENTRY INSTRUCTIONS

A 2-digit number, right justified. Enter the appropriate number.

Examples

Code	Description
2	2 through-traffic lanes with parking each side
4	4 through-traffic lanes with no parking
4	4 through-traffic lanes with bi-directional turn lane
