BDE PROCEDURE MEMORANDUM

NUMBER: 12-01

SUBJECT: BDE Manual Revisions – Chapters 17, 34, and 53

DATE: January 3, 2012

Chapter 17, Chapter 34, and Chapter 53 of the BDE Manual have been revised to clarify the intended applications of 8 inch and 16 inch rumble strip designs. See Chapter 17, Chapter 34, and Chapter 53 of the BDE Manual on-line to view the revisions.

Background

Section 17-2.02(a), point 2 under Section 17-2.02(h), and Section 34-2.02(e) of the BDE Manual were revised to clarify when to provide the 8 inch rather than 16 inch rumble strips to minimize the impact to on-road bicycle accommodations for roadways with a rural cross section.

Section 53-4.06(d) was revised by eliminating the discussion of when to specify rumble strips and instead references Section 34-2.02(e) for this information.
