

Illinois Commercial Vehicle Information Systems Network (CVISN) Update

The State of Illinois' goal is to conform to the Commercial Vehicle Information Systems and Networks (CVISN) Level 1 Criteria. Illinois is currently participating in the training and workshops leading to the development of the State of Illinois CVISN Top Level Design. Illinois has developed a business plan for electronic credentialing and has issued a Request for Proposal to build and deploy the electronic credentialing system (award pending available funding). Currently, Single State Registration and Oversize Overweight Permits are available via the web. Illinois has deployed electronic inspection reporting via ASPEN with State FY 2002 Federal Motor Carrier Safety Assistance Program (MCSAP) funds. Both of these elements are integral components of CVISN Level 1 compliance. Electronic screening infrastructure is in place at all interstate highway locations and screening has been deployed for two years. Single State Registration information is passed to the eScreening vendor nightly. Illinois has also implemented a wireless information network and deployed certain law enforcement and proprietary registration and credentialing systems across that network.

The IDOT ITS Program Office committed \$150,000 in federal FY 2003 ITS Deployment Program funds to further Illinois CVISN-related activities. These federal funds will be used to complete Illinois participation in the CVISN Deployment Workshops, CVISN Program Plan and top-level system design. Upon completion of these activities, remaining funds will be used to deploy CVISN core technical capabilities in the areas of safety information exchange and credentials administration. The non-federal match will be provided by equipment and personnel services dedicated by the various Illinois agencies responsible for specific CVO functions.

The State of Illinois CVISN effort is led by the Illinois Commerce Commission with strong support and participation from the Illinois Secretary of State's Office, Illinois State Police, Illinois Department of Revenue, Illinois Department of Transportation, and Illinois Environmental Protection Agency.
